LETITIA. Why you know that old Mr John-Richard-Robert-Jacob-Isaac-Abraham-Cornelius Van Dumpling, Billy Dimple's father (for he has thought fit to soften his name, as well as manners, during his English tour), was the most intimate friend of Maria's father. The old folks, about a year before Mr Van Dumpling's death, proposed this match, the young folks were accordingly introduced, and told they must love one another. Billy was then a good-natured, decent-dressing young fellow, with a little dash of the coxcomb, such as our young fellows of fortune usually have. At this time, I really believe she thought she loved him, and had they then been married, I doubt not they might have jogged on, to the end of the chapter, a good kind of a sing-song lack-a-daysical life, as other honest married folks do

CHARLOTTE. Why did they not then marry?

2 pocket-hoop, a hoopskirt with whalebone stiffening only at the hips. The bell hoop and court hoop, mentioned later, were more extreme examples. • 7 the Mall, perhaps Broadway, or what is now Bowling Green Park, at the foot of Broadway. • 8 battery, then as now a park at the southern tip of Manhattan Island. • 23 friseur, hairdresser. • 29 Buffon from Soufflee. A buffon, or buffont, was a piece of gauze or linen worn over the breast, a soufflée, or soufflé, of course, a delicate dish baked with whipped white of egg to make it rise. • 32 Spectator. See especially Nos. 433 and 435. The attitude described by Charlotte is characteristic of the many comments on women by Addison and Steele. • 45 lutestring, or lustring, a silk fabric.

LETITIA Upon the death of his father, Billy went to England to see the world and rub off a little of the pat-
troon rust. During his absence, Maria, like a good girl,
to keep herself constant to her *own true-love*, avoided
company, and betook herself, for her amusement, to her
books, and her dear Billy's letters. But, alas! how many
ways has the mischievous demon of inconstancy of steal-
ing into a woman's heart! Her love was destroyed by the
very means she took to support it.

10 CHARLOTTE How?—Oh! I have it—some likely young
beau found the way to her study.

LETITIA Be patient, Charlotte, your head so runs up-
on beaux. Why, she read Sir Charles Grandison, Clarissa
Harlow, Shenstone, and the Sentimental Journey, and be-
tween whiles, as I said, Billy's letters. But, as her taste
improved, her love declined. The contrast was so striking
betwixt the good sense of her books and the flimsiness of
her love-letters, that she discovered she had unthinkingly
engaged her hand without her heart, and then the whole
20 transaction, managed by the old folks, now appeared so
unsentimental, and looked so like bargaining for a bale
of goods, that she found she ought to have rejected, ac-
cording to every rule of romance, even the man of her
choice, if imposed upon her in that manner. Clary Har-
low would have scorned such a match.

CHARLOTTE Well, how was it on Mr. Dimple's re-
turn? Did he meet a more favourable reception than his
letters?

LETITIA Much the same. She spoke of him with
30 respect abroad, and with contempt in her closet. She
watched his conduct and conversation, and found that he
had by travelling acquired the wickedness of Lovelace
without his wit, and the politeness of Sir Charles Grandi-
son without his generosity. The ruddy youth, who washed
his face at the cistern every morning, and swore and
looked eternal love and constancy, was now metamor-
phosed into a flippant, palid, polite beau, who devotes
the morning to his toilet, reads a few pages of Chester-
field's letters, and then minces out, to put the infamous
40 principles in practice upon every woman he meets.

CHARLOTTE But, if she is so apt at conjuring up these
sentimental bugbears, why does she not discard him at
once?

LETITIA Why, she thinks her word too sacred to be
trifled with. Besides, her father, who has a great respect
for the memory of his deceased friend, is ever telling her

how he shall renew his years in their union, and repeating
the dying injunctions of old Van Dumphing.

CHARLOTTE A mighty pretty story! And so you
would make me believe that the sensible Maria would
give up Dumphing manor, and the all-accomplished Dim-
ple as a husband, for the absurd, ridiculous reason, for
sooth because she despises and abhors him. Just as if a
lady could not be privileged to spend a man's fortune
ride in his carriage, be called after his name, and call him
her *own dear lovee* when she wants money without
loving and respecting the great he-creature. Oh! my dear
girl, you are a monstrous prude.

LETITIA I don't say what I would do, I only intimate
how I suppose she wishes to act.

CHARLOTTE No, no, no! A fig for sentiment. It sh-
breaks, or wishes to break, with Mr. Dimple, depen-
upon it, she has some other man in her eye. A woman
rarely discards one lover until she is sure of another.
Letitia little thinks what a clue I have to Dimple's co-
duct. The generous man submits to render himself dis-
gusting to Maria, in order that she may leave him
liberty to address me. I must change the subject. [*Ann
and rings a bell.*]

[Enter SERVANT.]

Frank, order the horses to—Talking of marriage, did you
hear that Sally Bloomsbury is going to be married in
week to Mr. Indigo, the rich Carolinian?

LETITIA Sally Bloomsbury married!—why, she is
yet in her teens.

CHARLOTTE I do not know how that is, but you must
depend upon it, 'tis a done affair. I have it from the best
authority. There is my aunt Wyerly's Hannah. You
know Hannah, though a black, she is a wench that
never caught in a lie in her life. Now, Hannah has a
brother who courts Sarah, Mrs. Cartwright the milliner's,
and she told Hannah's brother, and Hannah, who

2 patroon, here meaning provincial, from the name of the
landholders of New York. • 13 Sir Charles Grandison The Hi-
story of Sir Charles Grandison (1753-1754) and Clarissa, or the History
of a Young Lady (1747-1748), by Samuel Richardson. English poet
William Shenstone (1714-1763), English poet, author of The So-
mistress (1742) and A Sentimental Journey through France
Italy (1768), by the English satirist, Laurence Sterne (1713-1768).
32 Lovelace, the villain in Richardson's Clarissa. • 39 infamous
principles Although Chesterfield doubtless emphasized the external
of a man of the world at the expense of morality, Tyler is some-
what unfair to him.

said before, is a girl of undoubted veracity, told it directly to me, that Mrs. Catgut was making a new cap for Miss Bloomsbury, which, as it was very dressy, it is very probable is designed for a wedding cap. Now, as she is to be married, who can it be to but to Mr. Indigo? Why, there is no other gentleman that visits at her papa's.

LETITIA. Say not a word more, Charlotte. Your intelligence is so direct and well grounded, it is almost a pity that it is not a piece of scandal.

CHARLOTTE. Oh! I am the pink of prudence. Though I cannot charge myself with ever having discredited a tea-party by my silence, yet I take care never to report any thing of my acquaintance, especially if it is to their credit,—*discredit*, I mean,—until I have searched to the bottom of it. It is true, there is infinite pleasure in this charitable pursuit. Oh! how delicious to go and condole with the friends of some backsliding sister, or to retire with some old dowager or maiden aunt of the family, who love scandal so well that they cannot forbear gratifying their appetite at the expense of the reputation of their nearest relations! And then to return full fraught with a rich collection of circumstances, to retail to the next circle of our acquaintance under the strongest injunctions of secrecy,—ha, ha, ha!—interlarding the melancholy tale with so many doleful shakes of the head, and more doleful "Ah! who would have thought it!" so amiable, so prudent a young lady, as we all thought her, what a monstrous pity! well, I have nothing to charge myself with, I acted the part of a friend, I warned her of the principles of that rake, I told her what would be the consequence, I told her so, I told her so"—Ha, ha, ha!

LETITIA. Ha, ha, ha! Well, but, Charlotte, you don't tell me what you think of Miss Bloomsbury's match.

CHARLOTTE. Think! why I think it is probable she married for a plaything, and they have given her a husband. Well, well, well, the pining child shall not be deprived of her plaything. 'Tis only exchanging London dolls for American babies—Apropos, of babies, have you heard what Mrs. Affable's high-flying notions of delicacy have come to?

LETITIA. Who, she that was Miss Lovely?

CHARLOTTE. The same; she married Bob Affable of Schenectady. Don't you remember?

[Enter SERVANT.]

SERVANT. Madam, the carriage is ready.

LETITIA. Shall we go to the stores first, or visiting?

CHARLOTTE. I should think it rather too early to visit, especially Mrs. Prim, you know she is so particular.

LETITIA. Well, but what of Mrs. Affable?

CHARLOTTE. Oh, I'll tell you as we go, come, come, let us hasten. I hear Mrs. Catgut has some of the prettiest caps arrived you ever saw. I shall die if I have not the first sight of them. [Exeunt.]

SCENE 2. A Room in Van Rough's House. Maria sitting disconsolate at a Table, with Books, etc.

Song

I

The sun sets in night, and the stars shun the day,
But glory remains when their lights fade away!
Begin, ye tormentors! your threats are in vain,
For the son of Alknomook shall never complain.

II

Remember the arrows he shot from his bow,
Remember your chiefs by his hatchet laid low.
Why so slow?—do you wait till I shrink from the pain?
No—the son of Alknomook will never complain.

III

Remember the wood where in ambush we lay,
And the scalps which we bore from your nation away.
Now the flame rises fast, you exult in my pain,
But the son of Alknomook can never complain.

IV.

I go to the land where my father is gone,
His ghost shall rejoice in the fame of his son.
Death comes like a friend, he relieves me from pain;
And my son, Oh Alknomook! has scorn'd to complain.

There is something in this song which ever calls forth my affections. The manly virtue of courage, that fortitude which steels the heart against the keenest misfortunes, which interweaves the laurel of glory amidst the

Song. This piece was published anonymously under the title of *The Death Song of a Cherokee Indian* in the *American Museum* for January 1787. As early as 1790 it was attributed to Philip Freneau, but there is no convincing evidence that it was not Tyler's.

instruments of torture and death, displays something so noble, so exalted, that in despite of the prejudices of education I cannot but admire it, even in a savage. The prepossession which our sex is supposed to entertain for the character of a soldier is, I know, a standing piece of raillery among the wits. A cockade, a lapell'd coat, and a feather, they will tell you, are irresistible by a female heart. Let it be so. Who is it that considers the helpless situation of our sex, that does not see that we each moment stand in need of a protector, and that a brave one too? Formed of the more delicate materials of nature, endowed only with the softer passions, incapable from our ignorance of the world, to guard against the wiles of mankind, our security for happiness often depends upon their generosity and courage. Alas! how little of the former do we find! How inconsistent! that man should be leagued to destroy that honor upon which solely rests his respect and esteem. Ten thousand temptations allure us, ten thousand passions betray us, yet the smallest deviation from the path of rectitude is followed by the contempt and insult of man, and the more remorseless pity of woman, years of penitence and tears cannot wash away the stain, nor a life of virtue obliterate its remembrance. Reputation is the life of woman, yet courage to protect it is masculine and disgusting, and the only safe asylum a woman of delicacy can find is in the arms of a man of honour. How naturally, then, should we love the brave and the generous, how gratefully should we bless the arm raised for our protection, when nerv'd by virtue and directed by honour! Heaven grant that the man with whom I may be connected—may be connected! Whither has my imagination transported me—whither does it now lead me? Am I not indissolubly engaged, "by every obligation of honour which my own consent and my father's approbation can give," to a man who can never share my affections, and whom a few days hence it will be criminal for me to disapprove—to disapprove! would to heaven that were all—to despise. For, can the most frivolous manners, actuated by the most depraved heart, meet, or merit, anything but contempt from every woman of delicacy and sentiment?

[VAN ROUGH, *without* Mary!]

Ha! my father's voice—Sir!—

[*Enter VAN ROUGH*]

VAN ROUGH What, Mary, always singing doleful ditties, and moping over these plaguy books.

MARIA I hope, Sir, that it is not criminal to improve my mind with books, or to divert my melancholy with singing, at my leisure hours

VAN ROUGH Why, I don't know that, child, I don't know that. They us'd to say when I was a young man that if a woman knew how to make a pudding, and to keep herself out of fire and water, she knew enough for a wife. Now, what good have these books done you have they not made you melancholy? as you call it. Pray what right has a girl of your age to be in the dumps haven't you everything your heart can wish, an't you going to be married to a young man of great fortune, an you going to have the quit-rent of twenty miles square

MARIA One-hundredth part of the land and a lease for life of the heart of a man I could love, would satisfy me

VAN ROUGH Pho, pho, pho! child, nonsense, downright nonsense, child. This comes of your reading your story-books, your Charles Grandisons, your Sentimental Journals, and your Robinson Crusoes, and such other trumpery. No, no, no! child, it is money makes the marriage, keep your eye upon the main chance, Mary

MARIA Marriage, Sir, is, indeed, a very serious affair

VAN ROUGH You are right, child, you are right. I assure I found it so, to my cost

MARIA I mean, Sir, that as marriage is a portion of life, and so intimately involves our happiness, we cannot be too considerate in the choice of our companion

VAN ROUGH Right, child, very right. A young woman should be very sober when she is making her choice but when she has once made it, as you have done, I do not see why she should not be as merry as a grig. I am sure she has reason enough to be so. Solomon says that "there is a time to laugh, and a time to weep." Now, a time for a young woman to laugh is when she has made sure of a good rich husband. Now, a time to cry, according to you, Mary, is when she is making choice of him, but she should think that a young woman's time to cry was when she despaired of *getting* one. Why, there was your mother, now to be sure, when I popp'd the question on her she did look a little silly, but when she had once looked down on her apron-strings, as all modest young

64 Robinson Crusoes, an allusion to the famous novel (1719) by D. Defoe. It is hardly in the same class as Maria's other reading. Van Rough is no expert. • 76 grig, cricket. • 77 Solomon says text is actually Ecclesiastes 3:4

women us'd to do, and drawled out ye-s, she was as brisk and as merry as a bee.

MARIA. My honoured mother, Sir, had no motive to melancholy; she married the man of her choice

VAN ROUGH. The man of her choice! And pray, Mary, ant you going to marry the man of your choice—what trumpery notion is this? It is these vile books [*throwing them away*]. I'd have you to know, Mary, if you won't make young Van Dumpling the man of *your* choice, you shall marry him as the man of *my* choice

MARIA. You terrify me, Sir. Indeed, Sir, I am all submission. My will is yours

VAN ROUGH. Why, that is the way your mother us'd to talk. My will is yours, my dear Mr. Van Rough, my will is yours, but she took special care to have her own way, though, for all that

MARIA. Do not reflect upon my mother's memory, Sir—

VAN ROUGH. Why not, Mary, why not? She kept me from speaking my mind all her *life* and do you think she shall henpeck me now she is *dead* too? Come, come; don't go to sniveling. be a good girl, and mind the **main** chance. I'll see you well settled in the world

MARIA. I do not doubt your love, Sir, and it is **my** duty to obey you. I will endeavour to make my duty and inclination go hand in hand

VAN ROUGH. Well, well, Mary, do you be a good girl, mind the main chance, and never mind inclination. Why do you know that I have been down in the cellar this very morning to examine a pipe of Madeira which I purchased the week you were born and mean to tap on your wedding day?—That pipe cost me fifty pounds sterling. It was well worth sixty pounds, but I overreach'd Ben Bulkhead the supercargo. I'll tell you the whole story. You must know that—

[*Enter SERVANT*]

SERVANT. Sir, Mr. Transfer, the broker, is below

[*Exit*]

VAN ROUGH. Well, Mary, I must go. Remember and be a good girl, and mind the main chance. [*Exit*]

MARIA [*alone*]. How deplorable is my situation! How distressing for a daughter to find her heart militating with her filial duty! I know my father loves me tenderly, why then do I reluctantly obey him? Heaven knows! with what reluctance I should oppose the will of a parent or set an example of filial disobedience, at a parent's com-

mand, I could wed awkwardness and deformity. Were the heart of my husband good, I would so magnify his good qualities with the eye of conjugal affection, that the defects of his person and manners should be lost in the emanation of his virtues. At a father's command, I could embrace poverty. Were the poor man my husband, I would learn resignation to my lot, I would enliven our frugal meal with good humour, and chase away misfortune from our cottage with a smile. At a father's command, I could almost submit to what every female heart knows to be the most mortifying, to marry a weak man and blush at my husband's folly in every company. I visited. But to marry a depraved wretch, whose only virtue is a polished exterior, who is actuated by the unmanly ambition of conquering the defenseless, whose heart, insensible to the emotions of patriotism, dilates at the plaudits of every unthinking girl, whose laurels are the sighs and tears of the miserable victims of his specious behaviour,—can he, who has no regard for the peace and happiness of other families, ever have a due regard for the peace and happiness of his own? Would to heaven that my father were not so hasty in his temper! Surely, if I were to state my reasons for declining this match, he would not compel me to marry a man whom, though my lips may solemnly promise to honour, I find my heart must ever despise

[*Exit.*] 70

ACT II

SCENE I. Enter Charlotte and Letitia.

CHARLOTTE [*at entering*]. Betty, take those things out of the carriage and carry them to my chamber, see that you don't tumble them. My dear, I protest, I think it was the homeliest of the whole. I declare I was almost tempted to return and change it

LETITIA. Why would you take it?

CHARLOTTE. Didn't Mrs. Catgut say it was the most fashionable?

LETITIA. But, my dear, it will never fit becomingly on you

CHARLOTTE. I know that, but did not you hear Mrs. Catgut say it was fashionable?

30 pipe of Madeira, a large cask (normally 105 gallons) of wine

LETITIA. Did you see that sweet airy cap with the white sprig?

CHARLOTTIE. Yes and I longed to take it, but, my dear, what could I do? Did not Mrs Catgut say it was the most fashionable; and if I had not taken it, was not that awkward gawky, Sally Slender, ready to purchase it immediately?

LETITIA. Did you observe how she tumbled over the things at the next shop, and then went off without purchasing any thing, nor even thanking the poor man for his trouble? But, of all the awkward creatures, did you see Miss Blouze endeavouring to thrust her unmerciful arm into those small kid gloves?

CHARLOTTE. Ha, ha, ha, ha!

LETITIA. Then did you take notice with what an affected warmth of friendship she and Miss Wasp met? when all their acquaintance know how much pleasure they take in abusing each other in every company

CHARLOTTE. Lud! Letitia, is that so extraordinary?
20 Why, my dear, I hope you are not going to turn sentimentalist. Scandal, you know, is but amusing ourselves with the faults, foibles, follies, and reputations of our friends, indeed, I don't know why we should have friends, if we are not at liberty to make use of them. But no person is so ignorant of the world as to suppose, because I amuse myself with a lady's faults, that I am obliged to quarrel with her person every time we meet, believe me, my dear, we should have very few acquaintance at that rate

[SERVANT enters and delivers a letter to CHARLOTTE, and—exit]

30 CHARLOTTE. You'll excuse me, my dear [Opens and reads to herself]

LETITIA. Oh, quite excusable

CHARLOTTE. As I hope to be married, my brother Henry is in the city

LETITIA. What, your brother, Colonel Manly?

CHARLOTTE. Yes, my dear, the only brother I have in the world

LETITIA. Was he never in this city?

CHARLOTTE. Never nearer than Harlem Heights, where he lay with his regiment

40 LETITIA. What sort of a being is this brother of yours? If he is as chatty, as pretty, as sprightly as you, half the belles in the city will be pulling caps for him

CHARLOTTE. My brother is the very counterpart and

reverse of me. I am gay, he is grave, I am airy, he is solid, I am ever selecting the most pleasing objects for my laughter he has a tear for every pitiful one. And thus whilst he is plucking the briars and thorns from the path of the unfortunate, I am strewing my own path with roses

LETITIA. My sweet friend, not quite so poetical, and a little more particular

CHARLOTTE. Hands off, Letitia. I feel the rage of simile upon me, I can't talk to you in any other way. My brother has a heart replete with the noblest sentiments, but then, it is like—it is like—Oh! you provoking girl, you have deranged all my ideas—it is like—Oh! I have it—his heart is like an old maiden lady's bandbox, it contains many costly things, arranged with the most scrupulous nicety, yet the misfortune is that they are too delicate, costly, and antiquated for common use.

LETITIA. By what I can pick out of your flowery description, your brother is no beau

CHARLOTTE. No, indeed, he makes no pretension to the character. He'd ride, or rather fly, an hundred miles to relieve a distressed object, or to do a gallant act in the service of his country, but should you drop your fan or bouquet in his presence, it is ten to one that some beau at the farther end of the room would have the honour of presenting it to you before he had observed that it fell. I'll tell you one of his antiquated anti-gallant notions. He said once in my presence, in a room full of company,—would you believe it?—in a large circle of ladies, that the best evidence a gentleman could give a young lady of his respect and affection was to endeavour in a friendly manner to rectify her foibles. I protest I was crimson to the eyes, upon reflecting that I was known as his sister

LETITIA. Insupportable creature! tell a lady of her faults! if he is so grave, I fear I have no chance of captivating him

CHARLOTTE. His conversation is like a rich, old-fashioned brocade—it will stand alone, every sentence is a sentiment. Now you may judge what a time I had with him, in my twelve months' visit to my father. He read me such lectures, out of pure brotherly affection against the extremes of fashion, dress, flirting, and

38 Harlem Heights, at the northern end of Manhattan Island, scene of a minor battle on September 16, 1776

coquetry, and all the other dear things which he knows I doat upon, that I protest his conversation made me as melancholy as if I had been at church, and heaven knows, though I never prayed to go there but on one occasion, yet I would have exchanged his conversation for a psalm and a sermon. Church is rather melancholy, to be sure, but then I can ogle the beaux, and be regaled with "here enderth the first lesson," but his brotherly *here*, you would think had no end. You captivate him! Why, my dear, he would as soon fall in love with a box of Italian flowers. There is Maria, now, if she were not engaged, she might do something. Oh! how I should like to see that pair of penserosos together, looking as grave as two sailors' wives of a stormy night, with a flow of sentiment meandering through their conversation like purling streams in modern poetry.

LETITIA. Oh! my *deu fanceuil*—

CHARLOTTE. Hush! I hear some person coming through the entry.

[Enter SERVANT.]

SERVANT. Madam, there's a gentleman below who calls himself Colonel Manly, do you chuse to be at home?

CHARLOTTE. Shew him in. [Exit SERVANT.] Now for a sober face.

[Enter COLONEL MANLY.]

MANLY. My dear Charlotte, I am happy that I once more enfold you within the arms of fraternal affection. I know you are going to ask (amiable impatience!) how our parents do,—the venerable pair transmit you their blessings by me. They totter on the verge of a well-spent life, and wish only to see their children settled in the world, to depart in peace.

CHARLOTTE. I am very happy to hear that they are well. [Coolsly.] Brother, will you give me leave to introduce you to our uncle's ward, one of my most intimate friends?

MANLY. [Addressing LETITIA.] I ought to regard your friends as my own.

CHARLOTTE. Come, Letitia, do give us a little dash of your vivacity, my brother is so sentimental and so grave, that I protest he'll give us the vapours.

MANLY. Though sentiment and gravity, I know, are banished the polite world, yet I hoped they might find some countenance in the meeting of such near connections as brother and sister.

CHARLOTTE. Positively, brother, if you go one step

further in this strain, you will set me crying, and that you know, would spoil my eyes, and then I should never get the husband which our good papa and mamma have so kindly wished me—never be established in the world.

MANLY. Forgive me, my sister,—I am no enemy to mirth, I love your sprightliness, and I hope it will one day enliven the hours of some worthy man, but when I mention the respectable authors of my existence,—the cherishers and protectors of my helpless infancy, whose hearts glow with such fondness and attachment that they would willingly lay down their lives for my welfare,—you will excuse me if I am so unfashionable as to speak of them with some degree of respect and reverence.

CHARLOTTE. Well, well, brother, if you won't be gay, we'll not differ, I will be as grave as you wish. [Affecting gravity.] And so, brother, you have come to the city to exchange some of your commutation notes for a little pleasure?

MANLY. Indeed you are mistaken, my errand is not of amusement, but business, and as I neither drink nor game, my expenses will be so trivial, I shall have no occasion to sell my notes.

CHARLOTTE. Then you won't have occasion to do a very good thing. Why, here was the Vermont General—he came down some time since, sold all his musty notes at one stroke, and then laid the cash out in trinkets for his dear Fanny. I want a dozen pretty things myself, have you got the notes with you?

MANLY. I shall be ever willing to contribute, as far as it is in my power, to adorn or in any way to please my sister, yet I hope I shall never be obliged for this to sell my notes. I may be romantic, but I preserve them as a sacred deposit. Their full amount is justly due to me, but my embarrassments, the natural consequences of a long war, disable my country from supporting its credit, I shall wait with patience until it is rich enough

11 Italian flowers, of wax • 13 penserosos, thoughtful, melancholy persons, from II Penseroso (1632) by John Milton (1608-1674), English poet. • 62 commutation notes. The American Army in the Revolution used in script issued either by the Continental Congress or by the state legislatures. Since these notes were in effect bonds, negotiable at the value which the purchaser was willing to place on the credit of the government, they were likely to fall into the hands of speculators, as Manly's remarks indicate. • 69 the Vermont General, almost certainly Ethan Allen (1737-1789), whose second wife was named Fanny.

to discharge them. If that is not in my day, they shall be transmitted as an honourable certificate to posterity, that I have humbly imitated our illustrious WASHINGTON, in having exposed my health and life in the service of my country, without reaping any other reward than the glory of conquering in so arduous a contest.

CHARLOTTE. Well said heroics! Why, my dear Henry, you have such a lofty way of saying things, that I protest I almost tremble at the thought of introducing you to the
10 polite circles in the city. The belles would think you were a player run mad, with your head filled with old scraps of tragedy, and as to the beaux they might admire, because they would not understand you. But, however, I must, I believe, introduce you to two or three ladies of my acquaintance.

LETITIA. And that will make him acquainted with thirty or forty beaux.

CHARLOTTE. Oh! brother, you don't know what a fund of happiness you have in store.

20 MANLY. I fear, sister, I have not refinement sufficient to enjoy it.

CHARLOTTE. Oh! you cannot fail being pleased.

LETITIA. Our ladies are so delicate and dressy.

CHARLOTTE. And our beaux are dressy and delicate.

LETITIA. Our ladies chat and flirt so agreeably.

CHARLOTTE. And our beaux simper and bow so gracefully.

LETITIA. With their hair so trim and neat.

CHARLOTTE. And their faces so soft and sleek.

30 LETITIA. Their buckles so tonish and bright.

CHARLOTTE. And their hands so slender and white.

LETITIA. I vow, Charlotte, we are quite poetical.

CHARLOTTE. And then, brother, the faces of the beaux are of such a lily-white hue! None of that horrid robustness of constitution, that vulgar corn-fed glow of health, which can only serve to alarm an unmarried lady with apprehension, and prove a melancholy memento to a married one, that she can never hope for the happiness of being a widow. I will say this to the credit of our
40 city beaux, that such is the delicacy of their complexion, dress, and address, that, even had I no reliance upon the honour of the dear Adonises, I would trust myself in any possible situation with them, without the least apprehensions of rudeness.

MANLY. Sister Charlotte!

CHARLOTTE. Now, now, now, brother [*interrupting*

him], now don't go to spoil my mirth with a dash of your gravity, I am so glad to see you, I am in tiptop spirits. Oh! that you could be with us at a little snug party. There is Billy Simper, Jack Chaffé, and Colonel Van Titter, Miss Promenade, and the two Miss Tambours, sometimes make a party, with some other ladies, in a side-box at the play. Everything is conducted with such decorum. First we bow round to the company in general, then to each one in particular, then we have so many inquiries after each other's health, and we are so happy to meet each other, and it is so many ages since we last had that pleasure, and if a married lady is in company, we have such a sweet dissertation upon her son Bobby's chin-cough, then the curtain rises, then our sensibility is all awake, and then, by the mere force of apprehension, we torture some harmless expression into a double meaning, which the poor author never dreamt of, and then we have recourse to our fans, and then we blush, and then the gentlemen jog one another peep under the fan, and make the prettiest remarks, and then we giggle and they simper, and they giggle and we simper, and then the curtain drops, and then for nuts and oranges, and then we bow, and it's pray, Ma'am, take it, and pray, Sir, keep it, and oh! not for the world, Sir, and then the curtain rises again, and then we blush and giggle and simper and bow all over again. Oh! the sentimental charms of a side-box conversation [*All laugh.*]

MANLY. Well, sister, I join heartily with you in the laugh, for, in my opinion, it is as justifiable to laugh at folly as it is reprehensible to ridicule misfortune.

CHARLOTTE. Well, but brother, positively I can't introduce you in these clothes—why, your coat looks as if it were calculated for the vulgar purpose of keeping yourself comfortable.

MANLY. This coat was my regimental coat in the late war. The public tumults of our state have induced me

42 Adonises, male beauties, from Adonis, a youth beloved by Venus. * 83 public tumults, the so-called Shays' Rebellion of 1786-1787, in part caused by the feeling of the farmers of western Massachusetts that they were being taxed unfairly by the owning classes of Boston. To put down what amounted to armed rebellion, the governor enlisted an army of over four thousand men. Tyler was active in this incident, and visited both Vermont and New York in an effort to arrange for the extradition of Daniel Shays (1747-1825), the leader of the farmers.

to buckle on the sword in support of that government which I once fought to establish. I can only say, sister, that there was a time when this coat was respectable, and some people even thought that those men who had endured so many winter campaigns in the service of their country, without bread, clothing, or pay at least deserved that the poverty of their appearance should not be ridiculed.

CHARLOTTE. We agree in opinion entirely, brother, though it would not have done for me to have said it is the coat makes the man respectable. In the time of the war, when we were almost frightened to death why, your coat was respectable, that is, fashionable, now another kind of coat is fashionable, that is, respectable. And pray direct the taylor to make yours the height of the fashion.

MANLY. Though it is of little consequence to me of what shape my coat is, yet, as to the height of the fashion, there you will please to excuse me, sister. You know my sentiments on that subject. I have often lamented the advantage which the French have over us in that particular. In Paris, the fashions have their dawns, their routine, and declensions, and depend as much upon the caprice of the day as in other countries, but there every lady assumes a right to deviate from the general *ton* as far as will be of advantage to her own appearance. In America, the cry is, what is the fashion? and we follow it indiscriminately, because it is so.

CHARLOTTE. Therefore it is, that when large hoops are in fashion, we often see many a plump girl lost in the immensity of a hoop-petticoat, whose want of height and *en-bon-point* would never have been remarked in any other dress. When the high head-dress is the mode how then do we see a lofty cushion, with a profusion of gauze, feathers, and ribband, supported by a face no bigger than an apple! whilst a broad full-faced lady, who really would have appeared tolerably handsome in a large head-dress, looks with her smart chapeau as masculine as a soldier.

MANLY. But remember, my dear sister, and I wish all my fair country-women would recollect, that the only excuse a young lady can have for going extravagantly into a fashion is because it makes her look extravagantly handsome—Ladies, I must wish you a good morning.

CHARLOTTE. But, brother, you are going to make home with us.

MANLY. Indeed I cannot. I have seen my uncle and explained that matter.

CHARLOTTE. Come and dine with us, then. We have a family dinner about half-past four o'clock. 50

MANLY. I am engaged to dine with the Spanish ambassador. I was introduced to him by an old brother officer, and instead of freezing me with a cold card of compliment to dine with him ten days hence, he, with the true old Castilian frankness in a friendly manner, asked me to dine with him to-day—an honour I could not refuse. Sister, adieu—Madam, your most obedient—

[Exit]

CHARLOTTE. I will wait upon you to the door, brother, I have something particular to say to you.

[Exit]

LETTIEA [alone]. What a pair!—She the pink of a flirtation, he the essence of everything that is *outré* and gloomy—I think I have completely deceived Charlotte by my manner of speaking of Mr Dimple, she's too much the friend of Maria to be confided in. He is certainly rendering himself disagreeable to Maria, in order to break with her and proffer his hand to me. This is what the delicate fellow hinted in our last conversation.

[Exit]

SCENE 2 The Mall

[Enter JESSAMY.]

JESSAMY. Positively this Mall is a very pretty place. I hope the city won't ruin it by repairs. To be sure, it won't do to speak of in the same day with Ranelagh or Vauxhall, however, it's a fine place for a young fellow to display his person to advantage. Indeed, nothing is lost here, the girls have taste, and I am very happy to find they have adopted the elegant London fashion of looking back after a genteel fellow like me has passed.

55 Castilian, from Castile, in central Spain, notable for the purity of its manners and language. • 61 *outré*, unfashionable. • 71 *Ranelagh* or *Vauxhall*, popular pleasure resorts of eighteenth century Londoners, up the Thames River. Ranelagh was on the north bank, in what is now Chelsea, Vauxhall on the south bank, in modern Lambeth. Each was provided with an excellent orchestra and a pipe organ, so that the visitors could listen to music as they strolled about. There were apparently similar halls or gardens, with the same names, in New York, not long after Tyler wrote.

them—Ah! who comes here? This, by his awkwardness must be the Yankee colonel's servant. I'll accost him
[Enter JONATHAN.]

JESSAMY. Votre très—humble serviteur, Monsieur. I understand Colonel Manly, the Yankee officer, has the honour of your services

JONATHAN. Sir!—

JESSAMY. I say, Sir, I understand that Colonel Manly has the honour of having you for a servant

JONATHAN. Servant! Sir, do you take me for a nigger,—I am Colonel Manly's waiter

JESSAMY. A true Yankee distinction, egad, without a difference. Why, Sir, do you not perform all the offices of a servant? do you not even blacken his boots?

JONATHAN. Yes, I do grease them a bit sometimes, but I am a true blue son of liberty, for all that. Father said I should come as Colonel Manly's waiter, to see the world, and all that, but no man shall master me. My father has a good a farm as the colonel

JESSAMY. Well, Sir, we will not quarrel about terms upon the eve of an acquaintance from which I promise myself so much satisfaction,—therefore, sans ceremonie—

JONATHAN. What?—

JESSAMY. I say I am extremely happy to see Colonel Manly's waiter

JONATHAN. Well, and I vow, too, I am pretty considerably glad to see you, but what the dogs need of all this outlandish lingo? Who may you be, Sir, if I may be so bold?

JESSAMY. I have the honour to be Mr Dimple's servant, or, if you please, waiter. We lodge under the same roof and should be glad of the honour of your acquaintance

JONATHAN. You a waiter! By the living jingo, you look so topping, I took you for one of the agents to Congress

JESSAMY. The brute has discernment, notwithstanding his appearance—Give me leave to say I wonder then at your familiarity

JONATHAN. Why, as to the matter of that, Mr—, pray, what's your name?

JESSAMY. Jessamy, at your service

JONATHAN. Why, I swear we don't make any great matter of distinction in our state between quality and other folks

JESSAMY. This is, indeed, a levelling principle—I hope, Mr Jonathan, you have not taken part with the insurgents

JONATHAN. Why, since General Shays has sneaked off and given us the bag to hold, I don't care to give my opinion, but you'll promise not to tell—put your ear this way—you won't tell?—I vow I did think the surgeons were right

JESSAMY. I thought, Mr Jonathan, you Massachusetts men always argued with a gun in your hand. Why didn't you join them?

JONATHAN. Why, the colonel is one of those folks called the Shin—Shin—dang it all, I can't speak them lignum vitæ words—you know who I mean—there is a company of them—they wear a china goose at their button-hole—a kind of gilt thing—Now the colonel told father and brother,—you must know there are, let me see—there is Elnathan, Silas, and Barnabas, Tabitha—no, no, she's a scone—tarnation, now I have it—there's Elnathan, Silas, Barnabas Jonathan, that's I—seven of us, six went into the wars, and I staid at home to take care of mother. Colonel said that it was a burning shame for the true blue Bunker Hill sons of liberty, who had fought Governor Hutchinson, Lord North and the Devil, to have any hand in kicking up a cursed dust against a government which we had every mother's son of us, a hand in making

JESSAMY. Bravo!—Well, have you been abroad in the city since your arrival? What have you seen that is curious and entertaining?

JONATHAN. Oh! I have seen a power of fine sights. I went to see two marble-stone men and a leaden horse that stands out in doors in all weathers and when I came where they was, one had got no head, and t'other

3 *Votre serviteur*, your very humble servant • 10 waiter, or else valet • 21 sans ceremonie, without ceremony • 35 Congress, which met in New York under the Confederation, 1785-1788 • 52 surgeons, insurgents. Tyler, judging from this speech by Jonathan, was aware that there were two sides to the Shays uprising • 58 Shin—Shin Jonathan's version of the Society of the Cincinnati, organized by officers under Washington on May 13, 1783, and, because of its hereditary membership, suspected of undemocratic aims. Its emblem was a bald eagle • 59 lignum vitæ, tough, very hard, from the wood of the yew • 69 Governor Hutchinson, Lord North. See notes, pp. 210 and 310 • 77 two marble-stone . . . horse, evidently statues, which the editor has been unable to identify

went there. They said as how the leaden man was a damn'd tory, and that he took wit in his anger and rode off in the time of the troubles.

JESSAMY. But this was not the end of your excursion?

JONATHAN. Oh, no, I went to a place they call Holy Ground. Now I counted this was a place where folks go to meeting, so I put my hymn-book in my pocket, and walked softly and grave as a minister, and when I came there, the dogs a bit of a meeting-house could I see. At last I spied a young gentlewoman standing by one of the seats which they have here at the doors. I took her to be the deacon's daughter, and she looked so kind, and so obliging, that I thought I would go and ask her the way to lecture, and—would you think it?—she called me dear, and sweeting, and honey, just as if we were married. By the living jingo, I had a month's mind to buss her.

JESSAMY. Well, but how did it end?

JONATHAN. Why, as I was standing talking with her a parcel of sailor men and boys got round me, the snarl-headed curs fell a-kicking and cursing of me at such a tainal rate, that I vow I was glad to take my heels and split home, right off, tail on end, like a stream of chalk.

JESSAMY. Why, my dear friend, you are not acquainted with the city, that girl you saw was a—

[*Whispers*]

JONATHAN. Mercy on my soul! was that young woman a harlot?—Well! if this is New-York Holy Ground, what must the Holy-day Ground be!

JESSAMY. Well, you should not judge of the city too rashly. We have a number of elegant, fine girls here that make a man's leisure hours pass very agreeably. I would esteem it an honour to announce you to some of them—Gad! that announce is a select word. I wonder where I picked it up.

JONATHAN. I don't want to know them.

JESSAMY. Come, come, my dear friend, I see that I must assume the honour of being the director of your amusements. Nature has given us passions, and youth and opportunity stimulate to gratify them. It is no shame, my dear Blueskin, for a man to amuse himself with a little gallantry.

JONATHAN. Girl huntry! I don't altogether understand. I never played at that game. I know how to play hunt the squirrel, but I can't play anything with the girls, I am as good as married.

JESSAMY. Vulgar, horrid brute! Married, and above a hundred miles from his wife, and thinks that an objection to his making love to every woman he meets! He never can have read, no, he never can have been in a room with a volume of the divine Chesterfield—So you are married?

JONATHAN. No, I don't say so, I said I was as good as married, a kind of promise.

JESSAMY. As good as married!—

JONATHAN. Why yes, there's Tabitha Wymen, the deacon's daughter, at home, she and I have been courting a great while, and folks say as how we are to be married, and so I broke a piece of money with her when we parted, and she promised not to spark it with Solomon Dyer while I am gone. You wouldn't have to me false to my true-love, would you?

JESSAMY. May be you have another reason for constancy, possibly the young lady has a fortune? Ha! Mr Jonathan, the solid charms—the chains of love are never so binding as when the links are made of gold.

JONATHAN. Why, as to fortune, I must needs say her father is pretty dumb rich, he went representative for our town last year. He will give her—let me see—four times seven is—seven times four—nought and carry one,—he will give her twenty acres of land—somewhat rocky though—a Bible, and a cow.

JESSAMY. Twenty acres of rock, a Bible, and a cow! Why, my dear Mr Jonathan, we have servant-maids, or, as you would more elegantly express it, waitresses, in this city, who collect more in one year from their mistresses' cast clothes.

JONATHAN. You don't say so!—

JESSAMY. Yes, and I'll introduce you to one of them. There is a little lump of flesh and delicacy that lives at next door, waitress to Miss Maria, we often see her on the stoop.

JONATHAN. But are you sure she would be courted by me?

5 Holy Ground, an ironical name • 17 buss, kiss • 40 Blueskin, an ardent supporter of the Revolution (obsolete Americanism) • 44 hunt the squirrel. See *The Spectator*, No. 67. Hunt the Squirrel, in which while the Woman flies the man pursues her, but as soon as she turns, he runs away, and she is obliged to follow • 58 broke . . . money, as a pledge of constancy

JESSAMY Never doubt it, remember a faint heart never—blisters on my tongue—I was going to be guilty of a vile proverb, flat against the authority of Chesterfield I say there can be no doubt that the brilliancy of your merit will secure you a favourable reception.

JONATHAN Well, but what must I say to her?

JESSAMY Say to her! why, my dear friend, though I admire your profound knowledge on every other subject, yet, you will pardon my saying that your want of opportunity has made the female heart escape the poignancy of your penetration Say to her! Why, when a man goes a-courting, and hopes for success, he must begin with doing, and not saying

JONATHAN. Well, what must I do?

JESSAMY. Why, when you are introduced you must make five or six elegant bows

JONATHAN. Six elegant bows! I understand that, six, you say? Well—

JESSAMY Then you must press and kiss her hand, then press and kiss, and so on to her lips and cheeks, then talk as much as you can about hearts, darts, flames, nectar, and ambrosia—the more incoherent the better

JONATHAN Well, but suppose she should be angry with I?

JESSAMY Why, if she should pretend—please to observe, Mr Jonathan—if she should pretend to be offended, you must—But I'll tell you how my master acted in such a case He was seated by a young lady of eighteen upon a sofa, plucking with a wanton hand the blooming sweets of youth and beauty When the lady thought it necessary to check his ardour, she called up a frown upon her lovely face, so irresistibly alluring, that it would have warmed the frozen bosom of age, remember, said she, putting her delicate arm upon his, remember your character and my honour My master instantly dropped upon his knees, with eyes swimming with love, cheeks glowing with desire, and in the gentlest modulation of voice he said My dear Caroline, in a few months our hands will be indissolubly united at the altar, our hearts
30 I feel are already so, the favours you now grant as evidence of your affection are favours indeed, yet, when the ceremony is once past, what will now be received with rapture will then be attributed to duty

JONATHAN. Well, and what was the consequence?

JESSAMY The consequence—Ah! forgive me, my dear friend, but you New England gentlemen have such a

laudable curiosity of seeing the bottom of every thing,—why, to be honest I confess I saw the blooming cherub of a consequence smiling in its angelic mother's arms about ten months afterwards

JONATHAN. Well, if I follow all your plans, make them six bows and all that shall I have such little cherubim consequences?

JESSAMY. Undoubtedly—What are you musing upon

JONATHAN You say you'll certainly make me acquainted?—Why, I was thinking then how I should contrive to pass this broken piece of silver—wont I buy a sugar-dram?

JESSAMY. What is that, the love-token from the deacon's daughter?—You come on bravely But I must hasten to my master Adieu, my dear friend

JONATHAN Stay, Mr Jessamy—must I buss her when I am introduced to her?

JESSAMY I told you you must kiss her

JONATHAN Well, but must I buss her?

JESSAMY Why kiss and buss, and buss and kiss, all one

JONATHAN. Oh! my dear friend, though you have profound knowledge of all, a pugnency of tribulation you don't know everything [Exit.]

JESSAMY [alone]. Well certainly I improve, my master could not have insinuated himself with more address into the heart of a man he despised Now with this blundering dog sicken Jenny with his nauseous pawings, until she flies into my arms for very ease How sweet will the contrast be between the blundering Jonathan and the courtly and accomplished Jessamy!

ACT III

SCENE 1 Dimple's Room Dimple discovered at a Toilet
Reading

DIMPLE "Women have in general but one object which is their beauty" Very true, my lord, positive

3 a vile proverb See Chesterfield to his son, September 27, 17

A man of fashion never has recourse to proverbs and vulgar aphorisms

• 58 sugar-dram, probably a small piece of candy • 78 Women, etc.

See Chesterfield to his son, October 16, 1747, here directly quoted

very true. "Nature has hardly formed a woman ugly enough to be insensible to flattery upon her person" Extremely just, my lord, every day's delightful experience confirms this. If her face is so shocking that she must, in some degree, be conscious of it, her figure and air, she thinks, make ample amends for it. The sallow Miss Wan is a proof of this. Upon my telling the distasteful wretch, the other day, that her countenance spoke the pensive language of sentiment, and that Lady Wortley Montague declared that if the ladies were arrayed in the garb of innocence, the face would be the last part which would be admired, as Monsieur Milton expresses it, she grinn'd horribly a ghastly smile. If her figure is deformed, she thinks her face counterbalances it. [Enter JESSAMY with letters.]

DIMPLE. Where got you these, Jessamy?

JESSAMY. Sir, the English packet is arrived.

DIMPLE [*opens and reads a letter enclosing notes*] "Sir,

"I have drawn bills on you in favour of Messrs. Van Cash and Co. as per margin. I have taken up your note to Col. Piquet, and discharged your debts to my Lord Lurcher and Sir Harry Rook. I herewith enclose you copies of the bills, which I have no doubt will be immediately honoured. On failure, I shall empower some lawyer in your country to recover the amounts."

"I am, Sir,

"Your most humble servant,

"JOHN HAZARD."

Now, did not my lord expressly say that it was unbecoming a well-bred man to be in a passion, I confess I should be ruffled. [*Reads.*] "There is no accident so unfortunate, which a wise man may not turn to his advantage, nor any accident so fortunate which a fool will not turn to his disadvantage." True, my lord, but how advantage can be derived from this I can't see. Chesterfield himself, who made, however, the worst practice of the most excellent precepts, was never in so embarrassing a situation. I love the person of Charlotte, and it is necessary I should command the fortune of Letitia. As to Maria—I doubt not by my *sang-froid* behaviour I shall compel her to decline the match, but the blame must not fall upon me. A prudent man, as my lord says, should take all the credit of a good action to himself, and throw the discredit of a bad one upon others. I must break with Maria, marry Letitia, and as for

Charlotte—why, Charlotte must be a companion to my wife.—Here, Jessamy.

[Enter JESSAMY. DIMPLE *folds and seals two letters.*]

DIMPLE. Here, Jessamy, take this letter to my love [*Gives one*].

JESSAMY. To which of your honour's loves?—Oh! [*reading*] to Miss Letitia, your honour's rich love. 50

DIMPLE. And this [*delivers another*] to Miss Charlotte Manly. See that you deliver them privately.

JESSAMY. Yes, your honour. [*Going.*]

DIMPLE. Jessamy, who are these strange lodgers that came to the house last night?

JESSAMY. Why, the master is a Yankee colonel, I have not seen much of him, but the man is the most unpolished animal your honour ever disgraced your eyes by looking upon. I have had one of the most *outré* conversations with him. He really has a most prodigious 60 effect upon my riability.

DIMPLE. I ought, according to every rule of Chesterfield, to wait on him and insinuate myself into his good graces—Jessamy, wait on the colonel with my compliments, and if he is disengaged I will do myself the honour of paying him my respects—Some ignorant unpolished boor— [JESSAMY *goes off and returns*].

JESSAMY. Sir, the colonel is gone out, and Jonathan his servant says that he is gone to stretch his legs upon the Mall—Stretch his legs! what an indelicacy of diction! 70

DIMPLE. Very well. Reach me my hat and sword. I'll accost him there, in my way to Letitia's, as by accident, pretend to be struck by his person and address, and endeavour to steal into his confidence. Jessamy, I have no business for you at present. [*Exit.*]

JESSAMY [*taking up the book*]. My master and I obtain our knowledge from the same source,—though, gad! I think myself much the prettier fellow of the two [*Surveying himself in the glass.*] That was a brilliant thought, to insinuate that I folded my master's letters for 80 him, the folding is so neat, that it does honour to the operator. I once intended to have insinuated that I wrote his

9 Lady [Mary] Wortley Montague (1689-1762), English author of letters from Turkey and Italy, published in 1763. • 12 Monsieur Milton. See *Paradise Lost*, Bk. II, ll. 845-846.

And Death

Grinn'd horrible a ghastly smile

• 40 *sang-froid*, cool, unexcited. Not usually an adjective, Jessamy misuses his French words.

letters too, but that was before I saw them, it won't do now, no honour there, positively—"Nothing looks more vulgar [*reading affectedly*], ordinary, and illiberal than ugly, uneven, and ragged nails, the ends of which should be kept even and clean, not tipped with black, and cut in small segments of circles—Segments of circles! surely my lord did not consider that he wrote for the beaux Segments of circles, what a crabbed term! Now I dare answer that my master, with all his learning,
 10 does not know that this means, according to the present mode, to let the nails grow long, and then cut them off even at top [*Laughing without.*] Ha! that's Jenny's titter I protest I despair of ever teaching that girl to laugh, she has something so execrably natural in her laugh, that I declare it absolutely discomposes my nerves. How came she into our house! [*Calls.*] Jenny!
 [*Enter JENNY*]

JESSAMY. Prythee, Jenny, don't spoil your fine face with laughing

JENNY. Why, mustn't I laugh, Mr. Jessamy?

20 JESSAMY. You may smile, but, as my lord says, nothing can authorise a laugh.

JENNY. Well, but I can't help laughing—Have you seen him, Mr. Jessamy? Ha, ha, ha!

JESSAMY. Seen whom?—

JENNY. Why, Jonathan, the New England colonel's servant. Do you know he was at the play last night, and the stupid creature don't know where he has been. He would not go to a play for the world, he thinks it was a show, as he calls it

30 JESSAMY. As ignorant and unpolished as he is, do you know, Miss Jenny, that I propose to introduce him to the honour of your acquaintance?

JENNY. Introduce him to me! for what?

JESSAMY. Why, my lovely girl, that you may take him under your protection, as Madame Rambouillet did young Stanhope, that you may, by your plastic hand, mould this uncouth cub into a gentleman. He is to make love to you

JENNY. Make love to me!—

40 JESSAMY. Yes, Mistress Jenny, make love to you, and, I doubt not, when he shall become *domesticated* in your kitchen, that this boor, under your auspices, will soon become *un amiable petit Jonathan*.

JENNY. I must say, Mr. Jessamy, if he copies after me, he will be vastly, monstrously polite

JESSAMY. Stay here one moment, and I will call him—Jonathan!—Mr. Jonathan!— [*Calls*]

JONATHAN [*within*]. Holla! there.—[*Enters.*] You promise to stand by me—six bows you say [*Bows*]

JESSAMY. Mrs. Jenny. I have the honour of presenting Mr. Jonathan, Colonel Manly's waiter, to you. I am extremely happy that I have it in my power to make two worthy people acquainted with each other's merits.

JENNY. So, Mr. Jonathan, I hear you were at the play last night

JONATHAN. At the play! why, did you think I went to the devil's drawing-room?

JENNY. The devil's drawing-room!

JONATHAN. Yes, why an't cards and dice the devil's device, and the play-house the shop where the devil hangs out the vanities of the world upon the tent-hooks of temptation? I believe you have not heard how they were acting the old boy one night, and the wicked one came among them sure enough, and went right on in a storm, and carried one quarter of the play-house with him. Oh! no, no, no! you won't catch me at a play-house. I warrant you

JENNY. Well, Mr. Jonathan, though I don't scruple your veracity, I have some reasons for believing you were there. pray, where were you about six o'clock?

JONATHAN. Why, I went to see one Mr. Morrison the *hocus pocus* man, they said as how he could eat a case knife

JENNY. Well, and how did you find the place?

JONATHAN. As I was going about here and there, and again, to find it, I saw a great crowd of folks going into a long entry that had lanterns over the door, so I asked a man whether that was not the place where they played *hocus pocus*? He was a very civil, kind man, though he did speak like the Hessians, he lifted up his

2 Nothing vulgar. See Chesterfield to his son, November 12 '17.
 • 20 my lord. See Chesterfield to his son, March 9 and October 1748.
 • 35 Madame Rambouillet. The Marquise de Rambouillet (1618-1665) presided over a famous Paris salon, at which many poets and scholars gathered. Young Stanhope may be one of Lord Chesterfield's ancestors, or Jessamy may simply have been confused.
 • 43 un amiable petit Jonathan, a good-natured little Jonathan.
 • 72 hocus pocus magician. A search of the newspapers of Tyler's day might bring Mr. Morrison to light, but the editor has not identified him.
 Hessians. See note, p. 352

eyes and said, They play *hocus pocus* tricks enough there, Gor knows, mine friend"

JENNY. Well—

JONATHAN. So I went right in, and they shewed me away, clean up to the garret, just like meeting-house gallery And so I saw a power of topping folks, all sitting round in little cabbins, 'just like father's corn-cribs, and then there was such a squeaking with the riddles, and such a tarnal blaze with the lights, my head was near turned. At last the people that sat near me set up such a hissing—hiss—like so many mad cats, and then they went thump, thump, thump, just like our Peleg threshing wheat, and stamp away, just like the nation, and called out for one Mr Langolee,—I suppose he helps act the tricks

JENNY. Well, and what did you do all this time?

JONATHAN. Gor, I—I liked the fun, and so I thumpte away, and hissed as lustily as the best of 'em One sailor-looking man that sat by me, seeing me stamp, and knowing I was a cute fellow because I could make a roaring noise, clapt me on the shoulder and said, 'you are a d——d hearty cock, smite my timbers!' I told him so I was, but I thought he need not swear so, and make use of such naughty words

JESSAMY. The savage!—Well, and did you see the man with his tricks?

JONATHAN. Why, I vow, as I was looking for him, they lifted up a great green cloth and let us look right into the next neighbour's house Have you a good many houses in New-York made so in that 'ere way?

JENNY. Not many but did you see the family?

JONATHAN. Yes, swamp it, I see'd the family

JENNY. Well, and how did you like them?

JONATHAN. Why, I vow they were pretty much like other families,—there was a poor, good-natured, curse of a husband, and a sad rantipole of a wife

JENNY. But did you see no other folks?

JONATHAN. Yes There was one youngster, they called him Mr Joseph, he talked as sober and as pious as a minister, but, like some ministers that I know, he was a sly tike in his heart for all that He was going to ask a young woman to spark it with him, and—the Lord have mercy on my soul!—she was another man's wife

JESSAMY. The Wabash!

JENNY. And did you see any more folks?

JONATHAN. Why, they came on as thick as mustard

For my part, I thought the house was haunted. There was a soldier fellow, who talked about his row de dow, dow, and courted a young woman, but, of all the cute folk I saw, I liked one little fellow—

JENNY. Aye! who was he?

JONATHAN. Why, he had red hair, and a little round plump face like mine, only not altogether so handsome. His name was—Darby,—that was his baptizing name, his other name I forgot Oh! it was Wig—Wag—Wag—all, Darby, Wag-all—pray, do you know him?— I should like to take a sling with him, or a drap of cyder with a pepper-pod in it, to make it warm and comfortable

JENNY. I can't say I have that pleasure

JONATHAN. I wish you did, he is a cute fellow But there was one thing I didn't like in that Mr Darby, and that was, he was afraid of some of them 'ere shooting irons, such as your troopers wear on training days Now, I'm a true born Yankee American son of liberty, and I never was afraid of a gun yet in all my life

JENNY. Well, Mr Jonathan, you were certainly at the play-house

JONATHAN. I at the play-house!—Why didn't I see the play then?

JENNY. Why, the people you saw were players

JONATHAN. Mercy on my soul! did I see the wicked players?—Mayhap that 'ere Darby that I liked so was the old serpent himself, and had his cloven foot in his pocket Why, I vow, now I come to think on't, the candles seemed to burn blue, and I am sure where I sat it smelt tarnally of brimstone

JESSAMY. Well, Mr Jonathan, from your account, which I confess is very accurate, you must have been at the play-house

JONATHAN. Why, I vow I began to smell a rat When I came away, I went to the man for my money again, you want your money? says he; yes, says I, for what? says he, why, says I, no man shall jockey me out

14 Mr Langolee, apparently an actor, although no one by this name appears on the roll of the American Company • 39 Mr. Joseph, Joseph Surface, of *The School for Scandal* • 43 row dow, disturbance, here the refrain of a song by a soldier character, Patrick, in *O'Keeffe's The Poor Soldier*, Act I • 54 Darby, the leading comic figure of *The Poor Soldier* • 57 sling, a drink, usually of gin and water • 63 afraid In Act II of *The Poor Soldier* Darby, by accident, almost gets into a duel

of my money, I paid my money to see sights, and the dogs a bit of a sight have I seen, unless you call listening to people's private business a sight. Why, says he, it is the School for Scandalization—The School for Scandalization!—Oh! ho! no wonder you New York folks are so cute at it, when you go to school to learn it, and so I jogged off

JESSAMY. My dear Jenny, my master's business drags me from you, would to heaven I knew no other servitude
10 than to your charms

JONATHAN. Well, but don't go, you won't leave me so—

JESSAMY. Excuse me—Remember the cash
[*Aside to him, and—Exit.*]

JINNY. Mr. Jonathan, won't you please to sit down? Mr. Jessamy tells me you wanted to have some conversation with me

[*Having brought forward two chairs, they sit.*]

JONATHAN. Ma'am!—

JENNY. Sir!—

JONATHAN. Ma'am!—

20 JINNY. Pray, how do you like the city, Sir?

JONATHAN. Ma'am!—

JINNY. I say, Sir, how do you like New-York?

JONATHAN. Ma'am!—

JINNY. The stupid creature! but I must pass some little time with him, if it is only to endeavour to learn whether it was his master that made such an abrupt entrance into our house, and my young mistress's heart, this morning [*Aside.*] As you don't seem to like to talk, Mr. Jonathan—do you sing?

30 JONATHAN. Gor, I—I am glad she asked that, for I forgot what Mr. Jessamy bid me say, and I dare as well be hanged as act what he bid me do, I'm so ashamed [*Aside.*] Yes, Ma'am, I can sing—I can sing Mear, Old Hundred, and Bangor

JENNY. Oh! I don't mean psalm tunes. Have you no little song to please the ladies, such as Roslin Castle, or the Maid of the Mill?

JONATHAN. Why, all my tunes are go to meeting tunes, save one, and I count you won't altogether like
40 that 'ere

JENNY. What is it called?

JONATHAN. I am sure you have heard folks talk about it; it is called Yankee Doodle

JENNY. Oh! it is the tune I am fond of, and if I know

anything of my mistress, she would be glad to dance to Pray, sing!

JONATHAN [*sings*].

Father and I went up to camp,—
Along with Captain Goodwin,
And there we saw the men and boys,
As thick as hasty-pudding
Yankee doodle do, etc

And there we saw a swamping gun,
Big as log of maple,
On a little deuced cart,
A load for father's cattle
Yankee doodle do, etc

And every time they fired it off,
It took a horn of powder
It made a noise—like father's gun,
Only a nation louder
Yankee doodle do, etc.

There was a man in our town,
His name was—

No, no, that's won't do. Now, if I was with Tabitha Wymen and Jemima Cawley down at father Chas's I shouldn't mind singing this all out before them—y would be affronted if I was to sing that, though that lucky thought, if you should be affronted, I have son thing dang'd cute, which Jessamy told me to say to y

JENNY. Is that all? I assure you I like it of all thin

JONATHAN. No, no; I can sing more, some otl time, when you and I are better acquainted, I'll sing t whole of it—no, no—that's a fib—I can't sing but hundred and ninety verses, our Tabitha at home c sing it all—[*Sings.*]

33 Mear . Bangor, psalm tunes in the New England churches. "Old Hundredth," the most familiar, based on Psalm 100, is the tune of doxology, 'Praise God, from whom all blessings flow.' • 36 Roslin Mill, popular songs of the period. Roslin Castle (1769) was written by Richard Hewitt, with the music by James Oswald. 'The Maid of the Mill' may be an obscure song by S. Adams, with the music H. Aide, or an allusion to an opera of that name, by Samuel John Arnold (1740-1802). • 76 sing it all. 'Yankee Doodle,' like 'Maden selle from Armentieres' and 'Dirty Gertie from Bizerte,' was known in innumerable stanzas, relatively few of which have been collected. Its origin is much debated.

Marblehead's a rocky place,
 And Cape-Cod is sandy,
 Charlestown is burnt down,
 Boston is the dandy
 Yankee doodle, doodle do, etc.

I vow, my own town song has put me into such topping spirits that I believe I'll begin to do a little, as Jessamy says we must when we go a-courting—[*Runs and kisses her*] Burning rivers! cooling flames! red-hot roses! pig-nuts! hasty-pudding and ambrosia!

JENNY. What means this freedom? you insulting wretch [*Strikes him*]

JONATHAN. Are you affronted?

JENNY. Affronted! with what looks shall I express my anger?

JONATHAN. Looks! why as to the matter of looks, you look as cross as a witch

JENNY. Have you no feeling for the delicacy of my sex?

JONATHAN. Feeling! Gor, I—I feel the delicacy of your sex pretty smartly [*Rubbing his cheek*], though, I vow, I thought when you city ladies courted and married, and all that, you put feeling out of the question. But I want to know whether you are really affronted, or only pretend to be so? Cause, if you are certainly right down affronted, I am at the end of my tether, Jessamy didn't tell me what to say to you

JENNY. Pretend to be affronted!

JONATHAN. Aye, aye, if you only pretend, you shall see how I'll go to work to make cherubim consequences [*Runs up to her*]

JENNY. Begone, you brute!

JONATHAN. That looks like mad, but I won't lose my speech. My dearest Jenny—your name is Jenny, I think—My dearest Jenny, though I have the highest esteem for the sweet favours you have just now granted me—Gor, that's a fib, though, but Jessamy says it is not wicked to tell lies to the women [*Aude*] I say, though I have the highest esteem for the favours you have just now granted me, yet you will consider that, as soon as the dissolvable knot is tied they will no longer be yours, but only matters of duty and matters of course

JENNY. Marry you! you audacious monster! get out of my sight or, rather, let me fly from you [*Exit hastily*]

JONATHAN. Gor, she's gone off in a swinging pas-

sion, before I had time to think of consequences. If this is the way with your city ladies, give me the twenty acres of rock, the Bible, the cow, and Tabitha, and a little peaceable bundling

SCENE 2 The Mall Enter Manly.

MANLY. It must be so, Montague! and it is not all the tribe of Mandevilles that shall convince me that a nation, to become great, must first become dissipated. Luxury is surely the bane of a nation. Luxury! which enervates both soul and body, by opening a thousand new sources of enjoyment, opens, also, a thousand new sources of contention and want. Luxury! which renders a people weak at home, and accessible to bribery, corruption, and force from abroad. When the Grecian states knew no other tools than the axe and the saw, the Grecians were a great, a free, and a happy people. The kings of Greece devoted their lives to the service of their country, and her senators knew no other superiority over their fellow-citizens than a glorious pre-eminence in danger and virtue. They exhibited to the world a noble spectacle,—a number of independent states united by a similarity of language, sentiment, manners, common interest, and common consent in one grand mutual league of protection. And, thus united, long might they have continued the cherishers of arts and sciences, the protectors of the oppressed, the scourge of tyrants, and the safe asylum of liberty. But when foreign gold, and still more pernicious foreign luxury, had crept among them, they sapped the vitals of their virtue. The virtues of their ancestors were only found in their writings. Envy and suspicion, the vices of little minds, possessed them. The various states engendered jealousies of each other, and, more unfortunately, growing jealous of their great federal council, the Amphictyons, they forgot that their common safety had existed, and would exist, in giving them an honourable extensive prerogative. The

49 Montague, a reference, apparently, to something which Manly had been reading, perhaps the letters of Lady Mary Wortley Montague

• 50 Mandevilles. In *The Fable of the Bees* (1714, revision of *The Grumbling Hive*, 1705), Bernard de Mandeville (1670?-1733), an English author, argued that private vices are public benefits, since free spending and luxuries are possible only when there is general prosperity

• 77 Amphictyons, assembly of the Greek city-states. See note, p. 544

common good was lost in the pursuit of private interest and that people who, by uniting, might have stood against the world in arms, by dividing, crumbled into ruin,—their name is now only known in the page of the historian, and what they once were is all we have left to admire. Oh! that America! Oh! that my country, would, in this her day, learn the things which belong to her peace!

[Enter DIMPLE.]

DIMPLE. You are Colonel Manly, I presume?

10 MANLY. At your service, Sir

DIMPLE. My name is Dimple, Sir. I have the honour to be a lodger in the same house with you, and, hearing you were in the Mall, came hither to take the liberty of joining you

MANLY. You are very obliging, Sir

DIMPLE. As I understand you are a stranger here, Sir, I have taken the liberty to introduce myself to your acquaintance, as possibly I may have it in my power to point out some things in this city worthy your notice

20 MANLY. An attention to strangers is worthy a liberal mind, and must ever be gratefully received. But to a soldier, who has no fixed abode, such attentions are particularly pleasing

DIMPLE. Sir, there is no character so respectable as that of a soldier. And, indeed, when we reflect how much we owe to those brave men who have suffered so much in the service of their country, and secured to us those inestimable blessings that we now enjoy, our liberty and independence, they demand every attention
30 which gratitude can pay. For my own part, I never meet an officer but I embrace him as my friend, nor a private in distress, but I insensibly extend my charity to him—I have hit the Bumkin off very tolerably. [Aside]

MANLY. Give me your hand, Sir! I do not proffer this hand to everybody, but you steal into my heart. I hope I am as insensible to flattery as most men, but I declare (it may be my weak side) that I never hear the name of soldier mentioned with respect, but I experience a thrill of pleasure which I never feel on any
40 other occasion

DIMPLE. Will you give me leave, my dear Colonel, to confer an obligation on myself, by shewing you some civilities during your stay here, and giving a similar opportunity to some of my friends?

MANLY. Sir, I thank you, but I believe my stay in

this city will be very short

DIMPLE. I can introduce you to some men of excellent sense, in whose company you will esteem yourself happy; and, by way of amusement, to some fine gentlemen who will listen to your soft things with pleasure

MANLY. Sir, I should be proud of the honour of being acquainted with those gentlemen.—but, as for the ladies, I don't understand you

DIMPLE. Why, Sir, I need not tell you, that when a young gentleman is alone with a young lady he may say some soft things to her fair cheek—indeed, the ladies will expect it. To be sure, there is not much pleasure when a man of the world and a finished coquette meet who perfectly know each other, but how delicious is to excite the emotions of joy, hope, expectation, and delight in the bosom of a lovely girl who believes even a tittle of what you say to be serious!

MANLY. Serious, Sir! In my opinion the man who under pretensions of marriage, can plant thorns in the bosom of an innocent, unsuspecting girl is more detestable than a common robber, in the same proportion private violence is more despicable than open force. Money of less value than happiness

DIMPLE. How he awes me by the superiority of his sentiments. [Aside.] As you say, Sir, a gentleman should be cautious how he mentions marriage

MANLY. Cautious, Sir! No person more approves an intercourse between the sexes than I do. Female conversation softens our manners, whilst our discourse, from the superiority of our literary advantages, improves their minds. But, in our young country, where there is such a thing as gallantry, when a gentleman speaks of it to a lady, whether he mentions marriage or no, ought to conclude either that he meant to insult her, or that his intentions are the most serious and honourable. How mean, how cruel, is it, by a thousand tender duties, to win the affections of an amiable girl, though you leave her virtue unspotted, to betray her the appearance of so many tender partialities, that a man of delicacy would suppress his inclination toward her, by supposing her heart engaged! Can any man, for the trivial gratification of his leisure hours, affect the happiness of a whole life! His not having spoken of marriage may add to his perfidy, but can be no excuse for his conduct

DIMPLE. Sir, I admire your sentiments,—they

mine. The light observations that fell from me were only a principle of the tongue, they came not from the heart, my practice has ever disapproved these principles.

MANLY. I believe you, Sir. I should with reluctance suppose that those pernicious sentiments could find admittance into the heart of a gentleman.

DIMPLE. I am now, Sir, going to visit a family, where, if you please, I will have the honour of introducing you. Mr. Manly's ward, Miss Letitia, is a young lady of immense fortune; and his niece, Miss Charlotte Manly, is a young lady of great sprightliness and beauty.

MANLY. That gentleman, Sir, is my uncle, and Miss Manly my sister.

DIMPLE. The devil she is! [*Aside.*] Miss Manly your sister, Sir? I rejoice to hear it, and feel a double pleasure in being known to you—Plague on him! I wish he was at Boston again, with all my soul [*Aside.*]

MANLY. Come, Sir, will you go?

DIMPLE. I will follow you in a moment, Sir [*Exit MANLY.*] Plague on it! this is unlucky. A fighting brother is a cursed appendage to a fine girl. Egad! I just stopped in time, had he not discovered himself, in two minutes more I should have told him how well I was with his sister. Indeed, I cannot see the satisfaction of an intrigue, if one can't have the pleasure of communicating it to our friends. [*Exit.*]

ACT IV

SCENE 1. Charlotte's Apartment. Charlotte leading in Maria.

CHARLOTTE. This is so kind, my sweet friend, to come to see me at this moment. I declare, if I were going to be married in a few days, as you are, I should scarce have found time to visit my friends.

MARIA. Do you think, then, that there is an impropriety in it?—How should you dispose of your time?

CHARLOTTE. Why, I should be shut up in my chamber, and my head would so run upon—upon—upon the solemn ceremony that I was to pass through!—I declare, it would take me above two hours merely to learn that little monosyllable—*Yes*. Ah! my dear, your sentimental imagination does not conceive what that little tiny word implies.

MARIA. Spare me your raillery, my sweet friend; I should love your agreeable vivacity at any other time.

CHARLOTTE. Why, this is the very time to amuse you. You grieve me to see you look so unhappy.

MARIA. Have I not reason to look so?

CHARLOTTE. What new grief distresses you?

MARIA. Oh! how sweet it is, when the heart is borne down with misfortune, to recline and repose on the bosom of friendship! Heaven knows that, although it is improper for a young lady to praise a gentleman, yet I have ever concealed Mr. Dimple's foibles, and spoke of him as of one whose reputation I expected would be linked with mine, but his late conduct towards me has turned my coolness into contempt. He behaves as if he meant to insult and disgust me, whilst my father, in the last conversation on the subject of our marriage, spoke of it as a matter which laid near his heart, and in which he would not bear contradiction.

CHARLOTTE. This works well, oh! the generous Dimple. I'll endeavour to excite her to discharge him [*Aside.*] But, my dear friend, your happiness depends on yourself. Why don't you discard him? Though the match has been of long standing, I would not be forced to make myself miserable: no parent in the world should oblige me to marry the man I did not like.

MARIA. Oh! my dear, you never lived with your parents, and do not know what influence a father's frowns have upon a daughter's heart. Besides, what have I to alledge against Mr. Dimple, to justify myself to the world? He carries himself so smoothly, that every one would impute the blame to me, and call me capricious.

CHARLOTTE. And call her capricious! Did ever such an objection start into the heart of woman? For my part, I wish I had fifty lovers to discard, for no other reason than because I did not fancy them. My dear Maria, you will forgive me, I know your candour and confidence in me, but I have at times, I confess, been led to suppose that some other gentleman was the cause of your aversion to Mr. Dimple.

MARIA. No, my sweet friend, you may be assured, that though I have seen many gentlemen I could prefer to Mr. Dimple, yet I never saw one that I thought I could give my hand to, until this morning.

CHARLOTTE. This morning!

MARIA. Yes, one of the strangest accidents in the world. The odious Dimple, after disgusting me with his

conversation had just left me, when a gentleman, who it seems, boards in the same house with him, saw him coming out of our door, and the houses looking very much alike, he came into our house instead of his lodgings, nor did he discover his mistake until he got into the parlour, where I was, he then bowed so gracefully made such a genteel apology, and looked so manly and noble!—

CHARLOTTE. I see some folks, though it is so great an impropriety, can praise a gentleman, when he happens to be the man of their fancy [*Aside.*]

MARIA. I don't know how it was,—I hope he did not think me indelicate,—but I asked him, I believe to sit down, or pointed to a chair. He sat down, and, instead of having recourse to observations upon the weather, or hackneyed criticisms upon the theatre, he entered readily into a conversation worthy of a man of sense to speak and a lady of delicacy and sentiment to hear. He was not strictly handsome but he spoke the language of sentiment, and his eyes looked tenderness and honour

CHARLOTTE. Oh! [*eagerly*] you sentimental, grave girls, when your hearts are once touched, beat us rattles a bar's length. And so, you are quite in love with this he-angel!

MARIA. In love with him! How can you rattle so. Charlotte? am I not going to be miserable? [*Sighs.*] In love with a gentleman I never saw but one hour in my life, and don't know his name! No, I only wished that the man I shall marry may look, and talk, and act, just like him. Besides, my dear, he is a married man

CHARLOTTE. Why, that was good-natured—he told you so, I suppose, in mere charity, to prevent you falling in love with him?

MARIA. He didn't tell me so, [*peevishly*] he looked as if he was married

CHARLOTTE. How, my dear, did he look sheepish?

MARIA. I am sure he has a susceptible heart, and the ladies of his acquaintance must be very stupid not to—

CHARLOTTE. Hush! I hear some person coming
[*Enter LETITIA*]

LETITIA. My dear Maria, I am happy to see you. Lud! what a pity it is that you have purchased your wedding clothes

MARIA. I think so [*Sighing.*]

LETITIA. Why, my dear, there is the sweetest parcel of silks come over you ever saw! Nancy Brilliant has a

full suit come, she sent over her measure, and it fits her to a hair, it is immensely dressy, and made for a court hoop. I thought they said the large hoops were going out of fashion.

CHARLOTTE. Did you see the hat? Is it a fact that the deep laces round the border is still the fashion?

DIMPLE [*within*]. Upon my honour, Sir.

MARIA. Ha! Dimple's voice! My dear, I must take leave of you. There are some things necessary to be done at our house. Can't I go through the other room?
[*Enter DIMPLE and MANLY.*]

DIMPLE. Ladies, your most obedient.

CHARLOTTE. Miss Van Rough, shall I present my brother Henry to you? Colonel Manly, Maria,—Mr. Van Rough, brother

MARIA. Her brother! [*Turns and sees MANLY.*] C'my heart! the very gentleman I have been praising

MANLY. The same amiable girl I saw this mornin'

CHARLOTTE. Why, you look as if you were acquainted

MANLY. I unintentionally intruded into this lady's presence this morning, for which she was so good to promise me her forgiveness

CHARLOTTE. Oh! ho! is that the case! Have the two penserosos been together? Were they Henry's e that looked so tenderly? [*Aside.*] And so you promise to pardon him? and could you be so good-natured? has he really forgiven him? I beg you would do it for his sake [*whispering loud to MARIA*] But, my dear, as you are in such haste, it would be cruel to detain you, I will show you the way through the other room

MARIA. Spare me, my sprightly friend

MANLY. The lady does not, I hope intend to deprive us of the pleasure of her company so soon

CHARLOTTE. She has only a mantua-maker who waits for her at home. But, as I am to give my opinion of the dress I think she cannot go yet. We were talking of the fashions when you came in, but I suppose the subject must be changed to something of more importance now. Mr. Dimple, will you favour us with an account of the public entertainments?

DIMPLE. Why, really, Miss Manly, you could not have asked me a question more *mal-a-propos*. For my part I must confess that, to a man who has travelled, there is nothing that is worthy the name of amusement to be found in this city

CHARLOTTE. Except visiting the ladies.

DIMPLE. Pardon me, Madam, that is the avocation of a man of taste. But for amusement, I positively know of nothing that can be called so, unless you dignify with that title the hopping once a fortnight to the sound of two or three squeaking fiddles, and the clattering of the old tavern windows, or sitting to see the miserable mummers, whom you call actors, murder comedy and make a farce of tragedy.

MANLY. Do you never attend the theatre, Sir?

DIMPLE. I was tortured there once.

CHARLOTTE. Pray, Mr Dimple, was it a tragedy or a comedy?

DIMPLE. Faith, Madam, I cannot tell, for I sat with my back to the stage all the time, admiring a much better actress than any there—a lady who played the fine woman to perfection, though, by the laugh of the horrid creatures round me, I suppose it was comedy. Yet, on second thoughts, it might be some hero in a tragedy, dying so comically as to set the whole house in an uproar. Colonel, I presume you have been in Europe?

MANLY. Indeed, Sir, I was never ten leagues from the continent.

DIMPLE. Believe me, Colonel, you have an immense pleasure to come, and when you shall have seen the brilliant exhibitions of Europe, you will learn to despise the amusements of this country as much as I do.

MANLY. Therefore I do not wish to see them, for I can never esteem that knowledge valuable which tends to give me a distaste for my native country.

DIMPLE. Well, Colonel, though you have not travelled, you have read.

MANLY. I have, a little, and by it have discovered that there is a laudable partiality which ignorant, untravelled men entertain for everything that belongs to their native country. I call it laudable, it injures no one; adds to their own happiness, and, when extended, becomes the noble principle of patriotism. Travelled gentlemen rise superior, in their own opinion, to this, but if the contempt which they contract for their country is the most valuable acquisition of their travels, I am far from thinking that their time and money are well spent.

MARIA. What noble sentiments!

CHARLOTTE. Let my brother set out where he will in the fields of conversation, he is sure to end his tour in the temple of gravity.

MANLY. Forgive me, my sister. I love my country;

it has its foibles undoubtedly,—some foreigners will with pleasure remark them—but such remarks fall very ungracefully from the lips of her citizens.

DIMPLE. You are perfectly in the right, Colonel— 50 America has her faults.

MANLY. Yes, Sir, and we, her children, should blush for them in private, and endeavour, as individuals, to reform them. But, if our country has its errors in common with other countries, I am proud to say America—I mean the United States—has displayed virtues and achievements which modern nations may admire, but of which they have seldom set us the example.

CHARLOTTE. But, brother, we must introduce you to some of our gay folks, and let you see the city, such 60 as it is. Mr Dimple is known to almost every family in town, he will doubtless take a pleasure in introducing you.

DIMPLE. I shall esteem every service I can render your brother an honour.

MANLY. I fear the business I am upon will take up all my time, and my family will be anxious to hear from me.

MARIA. His family! but what is it to me that he is married! [*Aside.*] Pray, how did you leave your lady, 70 Sir?

CHARLOTTE. My brother is not married [*observing her anxiety*], it is only an odd way he has of expressing himself. Pray, brother, is this business, which you make your continual excuse, a secret?

MANLY. No, sister, I came hither to solicit the honourable Congress, that a number of my brave old soldiers may be put upon the pension-list, who were, at first, not judged to be so materially wounded as to need the public assistance. My sister says true [*to MARIA*]. I call my 80 late soldiers my family. Those who were not in the field in the late glorious contest, and those who were, have their respective merits, but, I confess, my old brother-soldiers are dearer to me than the former description. Friendships made in adversity are lasting; our countrymen may forget us, but that is no reason why we should forget one another. But I must leave you; my time of engagement approaches.

CHARLOTTE. Well, but, brother, if you will go, will you please to conduct my fair friend home? You live 90 in the same street—I was to have gone with her myself—[*Aside.*] A lucky thought.

MARIA. I am obliged to your sister, Sir, and was just intending to go [*Going.*]

MANLY. I shall attend her with pleasure
[*Exit with MARIA, followed by DIMPLE and CHARLOTTE.*]

MARIA. Now, pray, don't betray me to your brother.

CHARLOTTE [*Just as she sees him make a motion to take his leave*] One word with you, brother, if you please [*Follows them out.*]

[*Manent, DIMPLE and LETITIA.*]

DIMPLE. You received the billet I sent you, I presume?

LETITIA. Hush!—Yes

10 DIMPLE. When shall I pay my respects to you?

LETITIA. At eight I shall be unengaged

[*Reënter CHARLOTTE.*]

DIMPLE. Did my lovely angel receive my billet? [*to CHARLOTTE.*]

CHARLOTTE. Yes

DIMPLE. What hour shall I expect with impatience?

CHARLOTTE. At eight I shall be at home unengaged.

DIMPLE. Unfortunate! I have a horrid engagement of business at that hour. Can't you finish your visit earlier and let six be the happy hour?

20 CHARLOTTE. You know your influence over me
[*Exeunt severally.*]

SCENE 2 Van Rough's House Van Rough, alone.

VAN ROUGH. It cannot possibly be true! The son of my old friend can't have acted so unadvisedly. Seventeen thousand pounds! in bills! Mr Transfer must have been mistaken. He always appeared so prudent, and talked so well upon money matters, and even assured me that he intended to change his dress for a suit of clothes which would not cost so much, and look more substantial, as soon as he married. No, no, no! it can't be; it cannot be. But, however, I must look out sharp. I did
30 not care what his principles or his actions were, so long as he minded the main chance. Seventeen thousand pounds! If he had lost it in trade, why the best men may have ill-luck, but to game it away, as Transfer says—why, at this rate, his whole estate may go in one night, and, what is ten times worse, mine into the bargain. No, no, Mary is right. Leave women to look out in these matters, for all they look as if they didn't know a journal from a ledger, when their interest is concerned they know what's what, they mind the main chance as

well as the best of us. I wonder Mary did not tell me she knew of his spending his money so foolishly. Seventeen thousand pounds! Why, if my daughter was standing up to be married, I would forbid the banns, if I found it was to a man who did not mind the main chance.—Hush! I hear somebody coming. 'Tis Mary's voice, a man with her too! I shouldn't be surprised if this should be the other string to her bow. Aye, aye, let them alone, women understand the main chance—Though, i' faith, I'll listen a little [*Retires into a closet.*]

[*MANLY leading in MARIA.*]

MANLY. I hope you will excuse my speaking upon so important a subject so abruptly, but, the moment entered your room, you struck me as the lady whom had long loved in imagination, and never hoped to see.

MARIA. Indeed, Sir, I have been led to hear more upon this subject than I ought.

MANLY. Do you, then, disapprove my suit, Madam, or the abruptness of my introducing it? If the latter, my peculiar situation, being obliged to leave the city in a few days, will, I hope, be my excuse, if the former, will retire, for I am sure I would not give a moment of inquietude to her whom I could devote my life to please. I am not so indelicate as to seek your immediate approbation; permit me only to be near you, and by thousand tender assiduities to endeavour to excite grateful return.

MARIA. I have a father, whom I would die to make happy, he will disapprove—

MANLY. Do you think me so ungenerous as to seek a place in your esteem without his consent? You must—you ever ought to consider that man as unworthy you who seeks an interest in your heart contrary to father's approbation. A young lady should reflect that the loss of a lover may be supplied, but nothing can compensate for the loss of a parent's affection. Yet, would you suppose your father would disapprove? In our country, the affections are not sacrificed to riches. family aggrandizement should you approve, my family is decent, and my rank honourable.

MARIA. You distress me, Sir.

MANLY. Then I will sincerely beg your excuse for obtruding so disagreeable a subject, and retire. [*Going.*]

Manent, remaining

MARIA. Stay, Sir! your generosity and good opinion of me deserve a return; but why must I declare what, for these few hours, I have scarce suffered myself to think?—I am—

MANLY. What?

MARIA. Engaged, Sir; and, in a few days, to be married to the gentleman you saw at your sister's

MANLY. Engaged to be married! And have I been basely invading the rights of another? Why have you permitted this? Is this the return for the partiality I declared for you?

MARIA. You distress me, Sir. What would you have me say? You are too generous to wish the truth. Ought I to say that I dared not suffer myself to think of my engagement, and that I am going to give my hand without my heart? Would you have me confess a partiality for you? If so, your triumph is compleat and you can be only more so when days of misery with the man I cannot love will make me think of him whom I could prefer

MANLY [*after a pause*]. We are both unhappy, but it is your duty to obey your parent—mine to obey my honour. Let us, therefore, both follow the path of rectitude, and of this we may be assured, that if we are not happy, we shall, at least, deserve to be so. Adieu! I dare not trust myself longer with you

[*Exeunt severally*]

ACT V

SCENE 1 Dimple's Lodgings Jessamy meeting Jonathan.

JESSAMY. Well, Mr Jonathan, what success with the fair?

JONATHAN. Why, such a tarnal cross tike you never saw. You would have counted she had lived upon crab-apples and vinegar for a fortnight. But what the rattle makes you look so tarnation glum?

JESSAMY. I was thinking, Mr Jonathan, what could be the reason of her carrying herself so coolly to you

JONATHAN. Coolly, do you call it? Why, I vow, she was fire-hot angry may be it was because I buss'd her.

JESSAMY. No, no, Mr Jonathan; there must be some other cause; I never yet knew a lady angry at being kissed.

JONATHAN. Well, if it is not the young woman's bashfulness, I vow I can't conceive why she shouldn't like me

JESSAMY. May be it is because you have not the Graces, Mr Jonathan

JONATHAN. Grace! Why, does the young woman expect I must be converted before I court her?

JESSAMY. I mean graces of person for instance, my lord tells us that we must cut off our nails even at top, in small segments of circles—though you won't understand that, in the next place, you must regulate your laugh.

JONATHAN. Maple-log seize it! don't I laugh natural?

JESSAMY. That's the very fault, Mr Jonathan. Besides, you absolutely misplace it. I was told by a friend of mine that you laughed outright at the play the other night, when you ought only to have tittered

JONATHAN. Gor! I—what does one go to see fun for if they can't laugh?

JESSAMY. You may laugh, but you must laugh by rule

JONATHAN. Swamp it—laugh by rule! Well, I should like that tarnally

JESSAMY. Why, you know, Mr Jonathan, that to dance, a lady to play with her fan, or a gentleman with his cane, and all other natural motions, are regulated by art. My master has composed an immensely pretty gamut, by which any lady or gentleman with a few years' close application, may learn to laugh as gracefully as if they were born and bred to it

JONATHAN. Mercy on my soul! A gamut for laughing—just like fa, la, sol?

JESSAMY. Yes. It comprises every possible display of iocularity, from an *affettuoso* smile to a *piano* titter, or full chorus *fortissimo* ha, ha, ha! My master employs his leisure hours in marking out the plays, like a cathedral chanting-book, that the ignorant may know where to laugh, and that pit, box, and gallery may keep time together, and not have a snigger in one part of the house, a broad grin in the other, and a d—d grum look in the third. How delightful to see the audience all smile together, then look on their books, then twist their mouths

45 Grace. Jonathan takes the word in its theological sense • 66 gamut, scale. In *The Spectator*, No. 102, the art of handling a fan is treated much as Jessamy deals with laughter • 72 *affettuoso* . . . *piano* . . . *fortissimo*, "with feeling," "softly," "very loudly"—musical terms

into an agreeable simper, then altogether shake the house with a general ha, ha, ha! loud as a full chorus of Handel's at an Abbey commemoration.

JONATHAN. Ha, ha, ha! that's dang'd cute, I swear.

JESSAMY. The gentlemen, you see, will laugh the tenor; the ladies will play the counter-tenor, the beaux will squeak the treble; and our jolly friends in the gallery a thorough bass, ho, ho, ho!

JONATHAN. Well, can't you let me see that gamut?

10 JESSAMY. Oh! yes, Mr Jonathan, here it is [*Takes out a book.*] Oh! no, this is only a titter with its variations. Ah, here it is [*Takes out another*] Now, you must know, Mr Jonathan, this is a piece written by Ben Jonson, which I have set to my master's gamut. The places where you must smile, look grave, or laugh outright, are marked below the line. Now look over me. "There was a certain man"—now you must smile.

JONATHAN. Well, read it again, I warrant I'll mind my eye.

20 JESSAMY. "There was a certain man, who had a sad scolding wife,"—now you must laugh.

JONATHAN. Tarnation! That's no laughing matter though.

JESSAMY. "And she lay sick a-dying",—now you must titter.

JONATHAN. What, snigger when a good woman's a-dying! Gor, I—

JESSAMY. Yes, the notes say you must—"and she asked her husband leave to make a will,"—now you 30 must begin to look grave,—"and her husband said"—

JONATHAN. Ay, what did her husband say? Something dang'd cute, I reckon.

JESSAMY. "And her husband said, you have had your will all your life-time, and would you have it after you are dead, too?"

JONATHAN. Ho, ho, ho! There the old man was even with her! he was up to the notch—ha, ha, ha!

JESSAMY. But, Mr. Jonathan, you must not laugh so. Why, you ought to have tittered *piano*, and you have 40 laughed *fortissimo*. Look here, you see these marks, A, B, C, and so on, these are the references to the other part of the book. Let us turn to it, and you will see the directions how to manage the muscles. This [*turns over*] was note D you blundered at—You must purse the mouth into a smile, then titter, discovering the lower part of the three front upper teeth.

JONATHAN. How? read it again.

JESSAMY. "There was a certain man"—very well—"who had a sad scolding wife,"—why don't you laugh?

JONATHAN. Now, that scolding wife sticks in my gizzard so pluckily that I can't laugh for the blood ar nouns of me. Let me look grave here, and I'll laugh your belly full, where the old creature's a-dying—

JESSAMY. "And she asked her husband"—[*Bell rings*] My master's bell! he's returned, I fear—Here Mr Jonathan, take this gamut, and I make no doubt but with few years' application, you may be able to smile gracefully. [*Exeunt severally*]

SCENE 2. Charlotte's Apartment. Enter Manly.

MANLY. What, no one at home? How unfortunate to meet the only lady my heart was ever moved by, find her engaged to another, and confessing her partial for me! Yet engaged to a man who, by her intimacy and his libertine conversation with me, I fear, does merit her. Aye! there's the sting; for, were I assured that Maria was happy, my heart is not so selfish but that it would dilate in knowing it, even though it were with another. But to know she is unhappy!—I must drive these thoughts from me. Charlotte has some books, and this is what I believe she calls her little library.

[*Enters a close*]

[*Enter DIMPLE leading LETITIA.*]

LETITIA. And will you pretend to say now, I Dimple, that you propose to break with Maria? Are the banns published? Are not the clothes purchased? Are not the friends invited? In short, is it not a done affair?

DIMPLE. Believe me, my dear Letitia, I would marry her.

LETITIA. Why have you not broke with her before this, as you all along deluded me by saying you would?

DIMPLE. Because I was in hopes she would, ere I have broke with me.

LETITIA. You could not expect it.

2 Handel's . commemoration. Georg Friedrich Handel (1685-1759) German-born composer, who lived in England most of the time. In 1710, was pensioned by Queen Anne for composing a "Te Deum" celebrating the Peace of Utrecht (1713). He is now best known for his oratorios as "The Messiah." • Ben Jonson (1573-1637), English dramatist. It seems likely that the situation described by Jessamy comes from some farce well known to the audience.

DIMPLE. Nay, but be calm a moment, 'twas from my regard to you that I did not discard her.

LETITIA. Regard to me!

DIMPLE. Yes, I have done everything in my power to break with her, but the foolish girl is so fond of me that nothing can accomplish it. Besides, how can I offer her my hand, when my heart is indissolubly engaged to you?

LETITIA. There may be reason in this, but why so attentive to Miss Manly?

DIMPLE. Attentive to Miss Manly! For heaven's sake, if you have no better opinion of my constancy, pay not so ill a compliment to my taste.

LETITIA. Did I not see you whisper her to-day?

DIMPLE. Possibly I might—but something of so very trifling a nature that I have already forgot what it was.

LETITIA. I believe she has not forgot it.

DIMPLE. My dear creature, how can you for a moment suppose I should have any serious thoughts of that trifling, gay, flighty coquette, that disagreeable—
[Enter CHARLOTTE.]

DIMPLE. My dear Miss Manly, I rejoice to see you, there is a charm in your conversation that always marks your entrance into company as fortunate.

LETITIA. Where have you been, my dear?

CHARLOTTE. Why, I have been about to twenty shops, turning over pretty things, and so have left twenty visits unpaid. I wish you would step into the carriage and whisk round, make my apology, and leave my cards where our friends are not at home, that, you know, will serve as a visit. Come, do go.

LETITIA. So anxious to get me out! but I'll watch you [Aside.] Oh! yes, I'll go, I want a little exercise. Positively [DIMPLE offering to accompany her.], Mr Dimple, you shall not go, why, half my visits are cake and caudle visits, it won't do, you know, for you to go.

[Exit, but returns to the door in the back scene and listens.]

DIMPLE. This attachment of your brother to Maria is fortunate.

CHARLOTTE. How did you come to the knowledge of it?

DIMPLE. I read it in their eyes.

CHARLOTTE. And I had it from her mouth. It would have amused you to have seen her! She, that thought it so great an impropriety to praise a gentleman that she

could not bring out one word in your favour, found a redundancy to praise him.

DIMPLE. I have done everything in my power to assist his passion there—your delicacy, my dearest girl, would be shocked at half the instances of neglect and misbehaviour.

CHARLOTTE. I don't know how I should bear neglect; but Mr Dimple must misbehave himself indeed, to forfeit my good opinion.

DIMPLE. Your good opinion, my angel, is the pride and pleasure of my heart, and if the most respectful tenderness for you, and an utter indifference for all your sex besides, can make me worthy of your esteem, I shall richly merit it.

CHARLOTTE. All my sex besides, Mr Dimple—you forgot your tête-à-tête with Letitia.

DIMPLE. How can you, my lovely angel, cast a thought on that insipid, wry-mouthed, ugly creature!

CHARLOTTE. But her fortune may have charms?

DIMPLE. Not to a heart like mine. The man, who has been blessed with the good opinion of my Charlotte, must despise the allurements of fortune.

CHARLOTTE. I am satisfied.

DIMPLE. Let us think no more on the odious subject, but devote the present hour to happiness.

CHARLOTTE. Can I be happy when I see the man I prefer going to be married to another? 70

DIMPLE. Have I not already satisfied my charming angel, that I can never think of marrying the puling Maria? But, even if it were so, could that be any bar to our happiness? for, as the poet sings,

"Love, free as air, at sight of human ties,
Spreads his light wings, and in a moment flies"

Come, then, my charming angel! why delay our bliss? The present moment is ours, the next is in the hand of fate [Kissing her.] 80

CHARLOTTE. Begone, Sir! By your delusions you had almost lulled my honour asleep.

DIMPLE. Let me lull the demon to sleep again with kisses [He struggles with her she screams.]

[Enter MANLY.]

35 caudle, hot spiced wine or ale, a woman's drink • 74 the poet, Alexander Pope (1688-1744) The lines are from the 'Epistle from Elissa to Abelard' (1717)

MANLY. Turn, villain! and defend yourself.—[*Draws.*
VAN ROUGH *enters and beats down their swords*]

VAN ROUGH. Is the devil in you? are you going to murder one another? [*Holding DIMPLE.*]

DIMPLE. Hold him, hold him,—I can command my passion
[*Enter JONATHAN.*]

"I feel chock-full of fight,—do you want to kill the colonel?—"

JONATHAN. What the rattle ails you? Is the old one in you? Let the colonel alone, can't you? I feel chock-full of fight,—do you want to kill the colonel?—

10 MANLY. Be still, Jonathan, the gentleman does not want to hurt me

JONATHAN. Gor! I—I wish he did, I'd shew him Yankee boys play, pretty quick—Don't you see you have frightened the young woman into the *hystrikes*?

VAN ROUGH. Pray, some of you explain this, what has been the occasion of all this racket?

MANLY. That gentleman can explain it to you, it will be a very diverting story for an intended father-in-law to hear

VAN ROUGH. How was this matter, Mr. Van Dumpling DIMPLE. Sir,—upon my honour,—all I know is, th. I was talking to this young lady, and this gentleman broke in on us in a very extraordinary manner.

VAN ROUGH. Why, all this is nothing to the purpose, can you explain it, Miss? [*To CHARLOTTE.*]
[*Enter LETITIA through the back scene.*]

LETITIA. I can explain it to that gentleman's confusion. Though long betrothed to your daughter [*To VAN ROUGH*], yet, allured by my fortune, it seems (with shame do I speak it) he has privately paid his address to me. I was drawn in to listen to him by his assurance that the match was made by his father without his consent, and that he proposed to break with Maria whether he married me or not. But, whatever were his intentions respecting your daughter, Sir, even to me I was false, for he has repeated the same story, with some cruel reflections upon my person, to Miss Manly.

JONATHAN. What a tarnal curse!

LETITIA. Nor is this all, Miss Manly. When he was with me this very morning, he made the same ungenerous reflections upon the weakness of your mind as he has so recently done upon the defects of my person.

JONATHAN. What a tarnal curse and damn, too!

DIMPLE. Ha! since I have lost Letitia, I believe I had good make it up with Maria. [*Aside.*] Mr. Van Rough at present I cannot enter into particulars; but, I believe I can explain everything to your satisfaction in private.

VAN ROUGH. There is another matter, Mr. Van Dumpling, which I would have you explain. Pray, have Messrs. Van Cash and Co. presented you those bills for acceptance?

DIMPLE. The deuce! Has he heard of those bills? Nay, then, all's up with Maria, too, but an affair of that sort can never prejudice me among the ladies; they were rather long to know what the dear creature possesses make him so agreeable [*Aside.*] Sir, you'll hear from me [*To MANLY.*]

MANLY. And you from me, Sir—

DIMPLE. Sir, you wear a sword—

MANLY. Yes, Sir. This sword was presented to me by that brave Gallic hero, the Marquis De La Fayette

60 Marquis De La Fayette (1757-1834), who had revisited America in 1784. His services in the Revolution extended from 1777 to 178

have drawn it in the service of my country, and in private life, on the only occasion where a man is justified in drawing his sword, in defence of a lady's honour. I have fought too many battles in the service of my country to dread the imputation of cowardice. Death from a man of honour would be a glory you do not merit; you shall live to bear the insult of man and the contempt of that sex whose general smiles afforded you all your happiness.

DIMPLE. You won't meet me, Sir? Then I'll post you for a coward.

MANLY. I'll venture that, Sir. The reputation of my life does not depend upon the breath of a Mr. Dimple. I would have you to know, however, Sir, that I have a cane to chastise the insolence of a scoundrel, and a sword and the good laws of my country to protect me from the attempts of an assassin—

DIMPLE. Mighty well! Very fine, indeed! Ladies and gentlemen, I take my leave, and you will please to observe in the case of my deportment, the contrast between a gentleman who has read Chesterfield and received the polish of Europe and an unpolished, untravelled American.

[Exit.]

[Enter MARIA.]

MARIA. Is he indeed gone?—

LETITIA. I hope, never to return.

VAN ROUGH. I am glad I heard of those bills, though it's plaguy unlucky. I hoped to see Mary married before I died.

MANLY. Will you permit a gentleman, Sir, to offer himself as a suitor to your daughter? Though a stranger to you, he is not altogether so to her, or unknown in this city. You may find a son-in-law of more fortune, but you can never meet with one who is richer in love for her or respect for you.

VAN ROUGH. Why, Mary, you have not let this gentleman make love to you without my leave?

MANLY. I did not say, Sir—

MARIA. Say, Sir!—I—the gentleman, to be sure, met me accidentally.

VAN ROUGH. Ha, ha, ha! Mark me, Mary, young folks think old folks to be fools, but old folks know young folks to be fools. Why, I knew all about this affair. This was only a cunning way I had to bring it about. Hark ye! I was in the closet when you and he

were at our house [Turns to the company.] I heard that little baggage say she loved her old father, and would die to make him happy! Oh! how I loved the little baggage! And you talked very prudently, young man. I have inquired into your character, and find you to be a man of punctuality and mind the main chance. 50 And so, as you love Mary and Mary loves you, you shall have my consent immediately to be married. I'll settle my fortune on you, and go and live with you the remainder of my life.

MANLY. Sir, I hope—

VAN ROUGH. Come, come, no fine speeches, mind the main chance, young man, and you and I shall always agree.

LETITIA. I sincerely wish you joy [advancing to MARIA], and hope your pardon for my conduct. 60

MARIA. I thank you for your congratulations, and hope we shall at once forget the wretch who has given us so much disquiet and the trouble that he has occasioned.

CHARLOTTE. And I, my dear Maria,—how shall I look up to you for forgiveness? I, who, in the practice of the meanest arts, have violated the most sacred rights of friendship? I can never forgive myself, or hope charity from the world, but, I confess, I have much to hope from such a brother, and I am happy that I may 70 soon say, such a sister.

MARIA. My dear, you distress me, you have all my love.

MANLY. And mine.

CHARLOTTE. If repentance can entitle me to forgiveness, I have already much merit, for I despise the littleness of my past conduct. I now find that the heart of any worthy man cannot be gained by invidious attacks upon the rights and characters of others,—by countenancing the addresses of a thousand,—or that the finest assemblage of features, the greatest taste in dress, the genteel- 80 est address, or the most brilliant wit, cannot eventually secure a coquette from contempt and ridicule.

MANLY. And I have learned that probity, virtue, honour, though they should not have received the polish of Europe, will secure to an honest American the good graces of his fair countrywomen, and, I hope, the applause of THE PUBLIC.

[Curtain.]

1786-1790

Washington Irving

1783 • 1859

Washington Irving was both the most polished and the most popular American prose writer of his generation. Not a profound thinker and heavily indebted for his tastes and skills to European models, he was nevertheless a gifted observer of surface details, and in the course of time he developed a style which justly earned him lasting fame. Wherever the short story is read, men, women, and children continue to enjoy "Rip Van Winkle," "The Legend of Sleepy Hollow," and other story sketches by Irving. They are both historically important, being among the first mature examples of American fiction, and charmingly untouched by time, revealing their author as a man who understood the amenities of life in a world which is not always orderly and reasonable.

Irving's career is best understood when divided into three periods: (1) 1783-1815, a rather lengthy but youthful groping for a profession which would satisfy

his somewhat dilettantish tastes, (2) 1815-1832, a seventeen-year residence in Europe, where he achieved international recognition as one of the romantic red coverers of the past, and (3) 1832-1859, in which he established as a fashionable author, he wrote chiefly as a biographer and historian.

He was born in New York City on April 3, 1783, the eleventh and last son of Scotch-English parents. The staunch Presbyterianism of his father, a well-to-do merchant, played little part in Washington Irving's unsystematic education. A delicate boy, he found his chief pleasures in light literature, the theater, art, travel, and most particularly, in good company. At nineteen, when he began reading law, he contributed a series of essays dealing

Panel (l to r) The Alhambra • Sunnyside, Irving's home on the Hudson River • Washington Irving at the age of 26 • Illustration from *Bracebridge Hall*

largely with the theater to his brother Peter's newspaper, the *Morning Chronicle*, signing them in the eighteenth-century manner as "Jonathan Oldstyle." Between 1804 and 1806 he traveled in Europe, curiously unconcerned about the political turmoil in Napoleon's empire, but much impressed with such new friends as Washington Allston, the painter

Back in New York and admitted to the bar, he joined his brother and James Kirke Paulding in the *New Yorker*-like series, *Salmagundi*, which ran for twenty numbers in 1807-1808. A more extended burlesque, begun with Peter Irving, resulted in *A History of New York . . . By Diedrich Knickerbocker* (1809), a satire so elaborate that the law must have been much neglected during its composition. In his twenties, as a matter of fact, Irving was doubtless uncertain of himself and of his aims. He enjoyed the convivial society of New York's younger set, shared some responsibility in the family hardware business, and dabbled occasionally in Federalist politics, meanwhile pursuing a gentlemanly interest in literature. A moot question in Irving's biography is the importance of his romantic attachment to Matilda Hoffman, who died of consumption in 1809. Had he married, Irving might conceivably have settled down to the law or to the editing of literary magazines. Matilda's death made roving possible. A bachelor all his life, he cherished as he grew older a sentimental memory which did not entirely outlaw mild flirtations with living ladies.

In 1815 he went to Liverpool on business and found that family affairs there were in great disorder because of a brother's illness. Three years later the Irving firm was bankrupt, and his great decision—to make his living by authorship—was more or less forced upon him. The results were impressive. *The Sketch Book*, published serially in 1819-1820, *Bracebridge Hall* (1822), *Tales of a Traveller* (1824), and, after a stay in Spain as a diplomatic attaché, *The Alhambra* (1832). These and other books, together with his many social connections, brought fame and considerable fortune. Irving was at home in London, Paris, Dresden, and Madrid, he met and was accepted by many of the leading literary folk of Europe, he became, in short, a great success, bringing to the United States what the new nation most ardently desired in a man of letters—the respect of the Old World. Like Sir Walter Scott, whom he much admired, Irving worked hard but insisted on preserving

the pleasant fiction that authorship was something that a gentleman accomplished with his left hand.

In this attitude he had the assistance of various governmental appointments which were urged upon him in his later years. He wisely refused offers of nominations to a seat in Congress, to the post of mayor of New York, to the secretaryship of the Navy. In 1841, however, he accepted the appointment of minister to Spain, and was again in Madrid between 1842 and 1845, when he resigned. The last years of his life were devoted to several relatively minor books dealing with the American West ("A Tour on the Prairies" in *The Crayon Miscellany*, 1835; *Astoria*, written in collaboration with his nephew, Pierre, 1836, and *Adventures of Captain Bonneville*, 1837), as well as to the biographical works which display his literary and political nostalgias (*Life of Oliver Goldsmith*, 1840, and *Life of Washington*, 5 vols., 1855-1859). Much of his time after 1835 was spent in the rambling, stepped-gabled cottage at Sunnyside, near Tarrytown and Sleepy Hollow on the Hudson, where he died on November 28, 1859.

Irving's historical work exemplifies the antiquarian spirit which he shared with Scott and other romanticists, but he is most significant for bringing American fiction into the main stream of world literature. He wrote with full knowledge of his immediate predecessors and contemporaries, and his work held its own in direct comparison with theirs. Irving owed much to Fielding, Sterne, Goldsmith, and Scott, he owed much, also, to such German romanticists as Ludwig Tieck and E. T. A. Hoffman. When all his literary obligations are recognized, however, there is much in Irving that is his own: a feeling for place and local customs, good-humored acceptance of eccentricities in human beings and divergent ways of looking at the world; a persistent refusal to take either himself or society too seriously, and, not least of all, a delicate balance between conformity and independence which, if not originality in the strictest sense, is still creative and individual. These are virtues which Americans have always liked to think characteristic of their nation.

Irving, *The Life and Letters of Washington Irving*, 4 vols., New York, 1862-1864 • S. T. Williams, *The Life of Washington Irving*, 2 vols., New York, 1935 • Van Wyck Brooks, *The World of Washington Irving*, New York, 1944

From

A History of New York *By Diedrich Knickerbocker*

Soon after the conclusion of the *Salmagundi* series in January 1808, Irving and his brother Peter planned to parody Samuel Latham Mitchill's *The Picture of New York* (1807) with a historical sketch, "followed by notices of the customs, manners, and institutions of the city; written in a serio-comic vein, and treating local errors, follies, and abuses with good-humored satire" ("The Author's Apology," in the 1848 edition). But Peter went to Europe, and in the spring of 1809, Washington Irving took up the task alone. First discarding the plan of a parody in favor of a comic history, he eventually confined himself to an account of the period of Dutch domination, in seven books. As he wrote, Irving discovered that the history of New York as a Dutch colony had never been adequately written, and he spent many hours with dusty books and manuscripts in the New York Historical Society and other libraries. Despite his humorous and satirical purposes, his account embodied fact as well as fiction, and, as he said in later life, his work provoked research into the forgotten archives of the province.

When, in October, he was ready to publish, he and his close friends devised a newspaper hoax to attract attention to the forthcoming book. An advertisement in the *Evening Post* announced that "a small elderly gentleman, dressed in an old black coat and cocked hat, by the name of KNICKERBOCKER," was missing from his lodgings; ten days later a letter to the same paper conveyed news of a person of this description seen on the Albany stage, in another ten days came the announcement that Mr. Knickerbocker had left a curious manuscript in his room at the Independent Hotel, which might be printed to pay Seth Handaside, the proprietor, for board and lodging. Thus, the *History* was published on December 6, 1809, with a dedication to the New York Historical Society and an account of the author signed by the fictitious Seth Handaside.

As Professor Williams has said, the *History* is without question "the most allusive of all American literary compositions written before 1825." Almost every page reflects

Irving's wide reading of classical and English literature. He parodies or imitates Homer, Cervantes, Malory, Fielding, Sterne, Swift, and many other favorites; the work is, in effect, a patchwork quilt of references, echoes, burlesques. Footnotes cite all kinds of material, some of it created out of Irving's imagination; part of Irving's purpose was to poke fun at pompous learning. Sometimes, as in the selections from Book IV which follow, Irving indulges in thinly veiled political satire, similar to that of Swift's *Tale of a Tub* and *Gulliver's Travels*.

No one can read Irving's *History* without feeling its youthful, undisciplined, irreverent buoyancy, never again, perhaps, did he write so effortlessly and at the same time so artfully. The aping of various literary models is accomplished with such verve and evident pleasure that its occasional lack of restraint and proportion is easily forgiven. The book should be received as Irving wished it to be, "with good-humored indulgence," to "be thumbed and chuckled over by the family fireside." It is literary rather than native humor, it produces not belly laughs but appreciative smiles, and the more one reads of world literature the more smiles it offers.

BOOK IV

CONTAINING THE CHRONICLES OF THE REIGN OF WILLIAM THE TESTY

Chapter

Showing the Nature of History in General
Containing Farthermore the Universe
Acquirements of William The Testy, and
How a Man May Learn So Much As To
Render Himself Good for Nothing

When the lofty Thucydides is about to enter upon his description of the plague that desolated Athens, one

Text: the 1848 edition. • *William the Testy*, i.e., William Kieft (1605-1647), fifth director-general of New Netherland. For satirical purposes Irving endowed Kieft with many characteristics which his readers were expected to recognize as Thomas Jefferson's. • *Thucydides* (460-400? B.C.), Greek historian, author of the classic account of the Peloponnesian War. The description of the plague appears in Bk. II. The "modern commentator" was evidently indebted to the comparison of Thucydides and Livy by René Rapin (1621-1687), a French Jesuit writer.

his modern commentators assures the reader, that the history is now going to be exceeding solemn, serious, and pathetic; and hints, with that air of chuckling gratulation with which a good dame draws forth a choice morsel from a cupboard to regale a favorite, that this plague will give his history a most agreeable variety

In like manner did my heart leap within me, when I came to the dolorous dilemma of Fort Goed Hoop, which I at once perceived to be the forerunner of a series of great events and entertaining disasters. Such are the true subjects for the historic pen. For what is history, in fact, but a kind of Newgate calendar, a register of the crimes and miseries that man has inflicted on his fellow-man? It is a huge libel on human nature, to which we industriously add page after page, volume after volume, as if we were building up a monument to the honor, rather than the infamy of our species. If we turn over the pages of these chronicles that man has written of himself, what are the characters dignified by the appellation of great, and held up to the admiration of posterity? Tyrants, robbers, conquerors, renowned only for the magnitude of their misdeeds, and the stupendous wrongs and miseries they have inflicted on mankind—warriors, who have hired themselves to the trade of blood, not from motives of virtuous patriotism, or to protect the injured and defenceless, but merely to gain the vaunted glory of being adroit and successful in massacring their fellow-beings! What are the great events that constitute a glorious era?—The fall of empires—the desolation of happy countries—splendid cities smoking in their ruins—the proudest works of art tumbled in the dust—the shrieks and groans of whole nations ascending unto heaven!

It is thus the historian may be said to thrive on the miseries of mankind, like birds of prey which hover over the field of battle, to fatten on the mighty dead. It was observed by a great projector of inland lock navigation, that rivers, lakes, and oceans were only formed to feed canals—In like manner I am tempted to believe that plots, conspiracies, wars, victories, and massacres, are ordained by Providence only as food for the historian

It is a source of great delight to the philosopher, in studying the wonderful economy of nature, to trace the mutual dependencies of things, how they are created

reciprocally for each other, and how the most noxious and apparently unnecessary animal has its uses. Thus those swarms of flies, which are so often execrated as useless vermin, are created for the sustenance of spiders⁵⁰—and spiders, on the other hand, are evidently made to devour flies. So those heroes who have been such scourges to the world, were bounteously provided as themes for the poet and historian, while the poet and the historian were destined to record the achievements of heroes!

These, and many similar reflections, naturally arose in my mind, as I took up my pen to commence the reign of William Kieft, for now the stream of our history, which hitherto has rolled in a tranquil⁶⁰ current, is about to depart forever from its peaceful haunts, and brawl through many a turbulent and rugged scene

As some sleek ox, sunk in the rich repose of a clover-field, dozing and chewing the cud, will bear repeated blows before it raises itself, so the province of Nieuw Nederlandts, having waxed fat under the drowsy reign of the Doubter, needed cuffs and kicks to rouse it into action. The reader will now witness the manner in which a peaceful community advances towards a state⁷⁰ of war, which is apt to be like the approach of a horse to a drum, with much prancing and little progress, and too often with the wrong end foremost

Wilhelmus Kieft, who, in 1634, ascended the gubernatorial chair (to borrow a favorite though clumsy appellation of modern phraseologists), was of a lofty descent, his father being inspector of wind-mills in the ancient town of Saardam, and our hero, we are told, when a boy, made very curious investigations into the nature and operation of these machines, which was one⁸⁰

9 Fort Goed Hoop, or Fort Hope, a Dutch outpost established in 1633 near the present site of Hartford, Connecticut. • 13 Newgate calendar, *The Newgate Calendar, or Malefactors' Bloody Register* (c. 1774, second series, c. 1826), a record of famous English crimes and criminals. • 38 projector, promoter. Irving was probably echoing current discussion of the Erie Canal scheme, for which a survey had been ordered in 1808. • 68 the Doubter, Wouter van Twiller (1580?-1646?), a director-general of New Netherland, to whom Irving had devoted Bk. III of the *History*. • 74 1634, a disputed date. Kieft actually arrived in 1637 or 1638. • 78 Saardam, modern Zaandam, a village a few miles from Amsterdam, in northern Holland.

reason why he afterwards came to be so ingenious a governor. His name, according to the most authentic etymologists, was a corruption of Kyver, that is to say, a *wrangler* or *scolder*; and expressed the characteristic of his family, which, for nearly two centuries, had kept the windy town of Saardam in hot water, and produced more tartars and brimstones than any ten families in the place, and so truly did he inherit this family peculiarity, that he had not been a year in the government of the province, before he was universally denominated William the Testy. His appearance answered to his name. He was a brisk, wiry, waspish little old gentleman, such a one as may now and then be seen stumping about our city in a broad-skirted coat with huge buttons, a cocked hat stuck on the back of his head, and a cane as high as his chin. His face was broad, but his features were sharp, his cheeks were scorched into a dusky red, by two fiery little gray eyes, his nose turned up, and the corners of his mouth turned down, pretty much like the muzzle of an irritable pug-dog.

I have heard it observed by a profound adept in human physiology, that if a woman waxes fat with the progress of years, her tenure of life is somewhat precarious, but if haply she withers as she grows old, she lives forever. Such promised to be the case with William the Testy, who grew tough in proportion as he dried. He had withered, in fact, not through the process of years, but through the tropical fervor of his soul, which burnt like a vehement rush-light in his bosom, inciting him to incessant broils and bickerings. Ancient traditions speak much of his learning, and of the gallant inroads he had made into the dead languages, in which he had made captive a host of Greek nouns and Latin verbs, and brought off rich booty in ancient saws and apothegms, which he was wont to parade in his public harangues, as a triumphant general of yore, his *spolia opima*. Of metaphysics he knew enough to confound all hearers and himself into the bargain. In logic, he knew the whole family of syllogisms and dilemmas, and was so proud of his skill that he never suffered even a self-evident fact to pass unargued. It was observed, however, that he seldom got into an argument without getting into a perplexity, and then into a passion with his adversary for not being convinced gratis.

He had, moreover, skirmished smartly on the frontiers of several of the sciences, was fond of experimental philosophy, and prided himself upon inventions of all kinds. His abode, which he had fixed at a Bowerie or country-seat at a short distance from the city, just at what is now called Dutch-street, soon abounded with proofs of his ingenuity: patent smoke-jacks that required a horse to work them. Dutch ovens that roasted meat without fire, carts that went before the horses; weather cocks that turned against the wind, and other wrong-headed contrivances that astonished and confounded all beholders. The house, too, was beset with paralytic cats and dogs, the subject of his experimental philosophy and the yelling and yelping of the latter unhappy victim of science, while aiding in the pursuit of knowledge soon gained for the place the name of "Dog's Misery," by which it continues to be known even at the present day.

It is in knowledge as in swimming; he who flounders and splashes on the surface, makes more noise, and attracts more attention, than the pearl-diver who quietly dives in quest of treasures to the bottom. The various acquirements of the new governor were the theme of marvel among the simple burghers of New Amsterdam. He figured about the place as learned a man as a Bonz at Pekin, who has mastered one half of the Chinese alphabet, and was unanimously pronounced a "universal genius!"

I have known in my time many a genius of the stamp, but, to speak my mind freely, I never knew one who, for the ordinary purposes of life, was worth his weight in straw. In this respect, a little sound judgment and plain common sense is worth all the sparkling genius that ever wrote poetry or invented theories. Let us see how the universal acquirer of William the Testy aided him in the affairs of government.

7 tartars and brimstones, intractable and scolding women • 36 *spolia opima*, the richest spoils • 49 Bowerie, hence the street known as "Bowery, paralleling Broadway on the east in lower Manhattan. The estate is usually identified as Peter Stuyvesant's rather than as Kieft's • 52 smoke-jacks, spits for roasting meat, propelled by hot air ascending in the chimney and turning a flywheel placed there. The paragraph is a thrust at Jefferson's fondness for "gadgets" of all kinds • 70 Bonz a Buddhist priest

Chapter II

How William the Testy Undertook to Conquer by Proclamation—How He Was A Great Man Abroad, but a Little Man In His Own House

No sooner had this bustling little potentate been blown by a whiff of fortune into the seat of government than he called his council together to make them a speech on the state of affairs

Caius Gracchus, it is said, when he harangued the Roman populace, modulated his tone by an oratorical flute or pitch-pipe, Wilhelmus Kieft, not having such an instrument at hand, availed himself of that musical organ or trump which nature has implanted in the midst of a man's face, in other words, he preluded his address by a sonorous blast of the nose, a preliminary flourish much in vogue among public orators

He then commenced by expressing his humble sense of his utter unworthiness of the high post to which he had been appointed, which made some of the simple burghers wonder why he undertook it, not knowing that it is a point of etiquette with a public orator never to enter upon office without declaring himself unworthy to cross the threshold. He then proceeded in a manner highly classic and erudite to speak of government generally, and of the governments of ancient Greece in particular, together with the wars of Rome and Carthage, and the rise and fall of sundry outlandish empires which the worthy burghers had never read nor heard of. Having thus, after the manner of your learned orator, treated of things in general, he came, by a natural, roundabout transition, to the matter in hand, namely, the daring aggressions of the Yankees.

As my readers are well aware of the advantage a potentate has of handling his enemies as he pleases in his speeches and bulletins, where he has the talk all on his own side, they may rest assured that William the Testy did not let such an opportunity escape of giving the Yankees what is called "a taste of his quality." In speaking of their inroads into the territories of their High Mightinesses, he compared them to the Gauls who desolated Rome, the Goths and Vandals who overran the fairest plains of Europe, but when he came to speak of the unparalleled audacity with which they of

Weathersfield had advanced their patches up to the 40
very walls of Fort Goed Hoop, and threatened to smother the garrison in onions, tears of rage started into his eyes, as though he nosed the very offense in question.

Having thus wrought up his tale to a climax, he assumed a most belligerent look, and assured the council that he had devised an instrument, potent in its effects, and which he trusted would soon drive the Yankees from the land. So saying, he thrust his hand into one of the deep pockets of his broad-skirted coat and drew forth, not an infernal machine, but an instrument in writing, 50
which he laid with great emphasis upon the table

The burghers gazed at it for a time in silent awe, as a wary housewife does at a gun, fearful it may go off half-cocked. The document in question had a sinister look, it is true, it was crabbed in text, and from a broad red ribbon dangled the great seal of the province, about the size of a buckwheat pancake. Still, after all, it was but an instrument in writing. Herein, however, existed the wonder of the invention. The document in question was a PROCLAMATION, ordering the Yankees to depart 60
instantly from the territories of their High Mightinesses under pain of suffering all the forfeitures and punishments in such case made and provided. It was on the moral effect of this formidable instrument that Wilhelmus Kieft calculated, pledging his valor as a governor that, once fulminated against the Yankees, it would, in less than two months, drive every mother's son of them across the borders.

The council broke up in perfect wonder, and nothing was talked of for some time among the old men and 70
women of New Amsterdam but the vast genius of the governor, and his new and cheap mode of fighting by proclamation.

As to Wilhelmus Kieft, having dispatched his proclamation to the frontiers, he put on his cocked hat and corduroy small-clothes, and mounting a tall raw-boned charger, trotted out to his rural retreat of Dog's Misery.

5 Caius Gracchus (159-121 B.C.), Roman statesman and orator • 13 commenced. Compare with the *First Inaugural* (p. 389) and other messages by Jefferson • 40 Weathersfield, now Wethersfield, a suburb of Hartford. It is still famous for market-gardening • 60 Proclamation, a hit at Jefferson's effort to counter the British blockade and Napoleon's "continental system" by orders that the belligerents cease interfering with American shipping

Here, like the good Numa, he reposed from the toils of state, taking lessons in government, not from the nymph Egeria, but from the honored wife of his bosom; who was one of that class of females sent upon the earth a little after the flood, as a punishment for the sins of mankind, and commonly known by the appellation of *knowing women*. In fact, my duty as an historian obliges me to make known a circumstance which was a great secret at the time, and consequently was not a subject
 10 of scandal at more than half the tea-tables in New Amsterdam, but which, like many other great secrets, has leaked out in the lapse of years—and this was, that Wilhelmus the Testy, though one of the most potent little men that ever breathed, yet submitted at home to a species of government, neither laid down in Aristotle nor Plato, in short, it partook of the nature of a pure, unmixed tyranny, and is familiarly denominated *petticoat government*.—An absolute sway, which, although
 20 exceedingly common in these modern days, was very rare among the ancients, if we may judge from the rout made about the domestic economy of honest Sociates, which is the only ancient case on record

The great Kieft, however, warded off all the sneers and sarcasms of his particular friends, who are ever ready to joke with a man on sore points of the kind, by alleging that it was a government of his own election, to which he submitted through choice, adding at the same time a profound maxim which he had found in an ancient author, that "he who would aspire to *govern*,
 30 should first learn to *obey*."

BOOK V

CONTAINING THE FIRST PART OF THE REIGN OF PETER STUYVESANT, AND HIS TROUBLES WITH THE AMPHICTYONIC COUNCIL

Chapter I

In Which the Death of a Great Man Is Shown To Be No Very Inconsolable Matter of Sorrow—And How Peter Stuyvesant Acquired a Great Name from the Uncommon Strength of his Head

To a profound philosopher like myself, who am apt to see clear through a subject, where the penetration of ordinary people extends but half way, there is no fact

more simple and manifest than that the death of a great man is a matter of very little importance. Much as we may think of ourselves, and much as we may excite the empty plaudits of the million, it is certain that the greatest among us do actually fill but an exceeding small space in the world, and it is equally certain, that even that small space is quickly supplied when we leave it vacant. "Of what consequence is it," said Pliny, "that individuals appear, or make their exit? the world is a theatre whose scenes and actors are continually changing." Never did philosopher speak more correctly, and I only wonder that so wise a remark could have existed so many ages, and mankind not have laid it more to heart. Sage follows on in the footsteps of sage; one hero just steps out of his triumphal car, to make way for the hero who comes after him, and of the proudest monarch it is merely said that "he slept with his fathers, and his successor reigned in his stead."

The world, to tell the private truth, cares but little for their loss, and if left to itself would soon forget to grieve, and though a nation has often been figuratively drowned in tears on the death of a great man, yet it is ten to one if an individual tear has been shed on the occasion, excepting from the forlorn pen of some hungry author. It is the historian, the biographer, and the poet who have the whole burden of grief to sustain, who—kind souls!—like undertakers in England, act the part of chief mourners—who inflate a nation with sighs it never heaved, and deluge it with tears it never dreamt of shedding. Thus, while the patriotic author is weeping and howling, in prose, in blank verse, and in rhyme, and collecting the drops of public sorrow into his volume as into a lachrymal vase, it is more than probable his

1 Numa Egeria Numa Pompilius (eighth century B.C.), successor to Romulus as legendary king of Rome, was supposed to have been instructed in the foundation of the Roman religion by Egeria, goddess of fountains and childbirth, who loved him • 15 Aristotle nor Plato, whose *Politics* and *The Republic*, respectively, are the most important Greek works on political philosophy • 20 rout, noise • 21 Socrates, whose wife, Xanthippe, was the most famous shrew of antiquity • 28 maxim The sentence appears in the *Laws* of Solon and of Plato • Amphictyonic, relating to the league of Greek city-states centered around the sanctuaries of Apollo at Delphi and Demeter, near Thermopylae • Peter Stuyvesant (1592-1672), a director-general of New Netherland • 41 Pliny, probably Pliny the Younger (62-113), author of a series of letters • 66 lachrymal vase, a tiny vase in which the ancients collected tears of mourners, often to bury them with the corpse

fellow citizens are eating and drinking, fiddling and dancing, as utterly ignorant of the bitter lamentations made in their name, as are those men of straw, John Doe and Richard Roe, of the plaintiffs for whom they are generously pleased to become sureties

The most glorious hero that ever desolated nations might have mouldered into oblivion among the rubbish of his own monument, did not some historian take him into favor, and benevolently transmit his name to posterity—and much as the valiant William Kieft worried, and bustled, and turmoiled, while he had the destinies of a whole colony in his hand, I question seriously whether he will not be obliged to this authentic history for all his future celebrity

His exit occasioned no convulsion in the city of New Amsterdam nor its vicinity: the earth trembled not, neither did any stars shoot from their spheres—the heavens were not shrouded in black, as poets would fain persuade us they have been, on the death of a hero—the rocks (hard-hearted varlets!) melted not into tears, nor did the trees hang their heads in silent sorrow, and as to the sun, he lay a-bed the next night just as long, and showed as jolly a face when he rose as he ever did on the same day of the month in any year, either before or since. The good people of New Amsterdam, one and all, declared that he had been a very busy, active, bustling little governor, that he was “the father of his country”—that he was “the noblest work of God”—that “he was a man, take him for all in all, they ne’er should look upon his like again”—together with sundry other civil and affectionate speeches regularly said on the death of all great men, after which they smoked their pipes, thought no more about him, and Peter Stuyvesant succeeded to his station

Peter Stuyvesant was the last, and, like the renowned Wouter Van Twiller, the best of our ancient Dutch governors. Wouter having surpassed all who preceded him, and Peter, or Piet, as he was sociably called by the old Dutch burghers, who were ever prone to familiarize names, having never been equalled by any successor. He was in fact the very man fitted by nature to retrieve the desperate fortunes of her beloved province, had not the fates, those most potent and unrelenting of all ancient spinsters, destined them to inextricable confusion

To say merely that he was a hero, would be doing him great injustice—he was in truth a combination of

heroes—for he was of a sturdy, raw-boned make like Ajax Telamon, with a pair of round shoulders that Hercules would have given his hide for (meaning his lion’s hide,) when he undertook to ease old Atlas of his load. He was, moreover, as Plutarch describes Coriolanus, not only terrible for the force of his arm, but likewise of his voice, which sounded as though it came out of a barrel, and, like the self-same warrior, he possessed a sovereign contempt for the sovereign people, and an iron aspect, which was enough of itself to make the very bowels of his adversaries quake with terror and dismay. All this martial excellency of appearance was inexpressibly heightened by an accidental advantage, with which I am surprised that neither Homer nor Virgil have graced any of their heroes. This was nothing less than a wooden leg, which was the only prize he had gained in bravely fighting the battles of his country, but of which he was so proud, that he was often heard to declare he valued it more than all his other limbs put together, indeed so highly did he esteem it, that he had it gallantly encased and relieved with silver devices, which caused it to be related in divers histories and legends that he wore a silver leg

Like that choleric warrior Achilles, he was somewhat subject to extempore bursts of passion, which were rather unpleasant to his favorites and attendants, whose perceptions he was apt to quicken, after the manner of his illustrious imitator, Peter the Great, by anointing their shoulders with his walking-staff

Though I cannot find that he had read Plato, or Aristotle, or Hobbes, or Bacon, or Algernon Sydney, or Tom Paine, yet did he sometimes manifest a shrewdness and sagacity in his measures, that one would hardly expect

3 John Doe and Richard Roe, fictitious figures in hypothetical law cases—an echo of Irving’s legal studies • 48 Ajax Telamon, a Greek leader in the Trojan War, second only to Achilles in bravery, but conquered by Odysseus in the contest for the armor of Achilles • 51 Plutarch. See note, p. 250. The remark alluded to appears in his life of Coriolanus, a Roman hero of the fifth century B.C., at a point where Plutarch was actually quoting Cato’s requirements for a soldier • 67 encased and relieved, embossed and decorated • 69 silver leg. See the histories of Masters Josselyn and Brame.—Irving. The references are to John Josselyn’s *Account of Two Voyages to New-England* (1674) and Richard Blome’s *Present State of His Majesty’s Isles and Territories* (1687) • 74 Peter the Great (1672-1724), emperor of Russia, notorious for his brutality • 76 Plato . . . Tom Paine, all of whom wrote on political philosophy

from a man who did not know Greek, and had never studied the ancients. True it is, and I confess it with sorrow, that he had an unreasonable aversion to experiments, and was fond of governing his province after the simplest manner. but then he contrived to keep it in better order than did the erudite Kieft, though he had all the philosophers, ancient and modern, to assist and perplex him. I must likewise own that he made but very few laws; but then again he took care that
10 those few were rigidly and impartially enforced. and I do not know but justice on the whole was as well administered as if there had been volumes of sage acts and statutes yearly made, and daily neglected and forgotten.

He was, in fact, the very reverse of his predecessors. being neither tranquil and inert, like Walter the Doubter, nor restless and fidgeting, like William the Testy; but a man, or rather a governor of such uncommon activity and decision of mind, that he never sought nor accepted the advice of others, depending bravely upon
20 his single head as would a hero of yore upon his single arm, to carry him through all difficulties and dangers. To tell the simple truth, he wanted nothing more to complete him as a statesman than to think always right; for no one can say but that he always acted as he thought. He was never a man to flinch when he found himself in a scrape, but to dash forward through thick and thin, trusting, by hook or by crook, to make all things straight in the end. In a word, he possessed, in an eminent degree, that great quality in a statesman, called perse-
30 verance by the polite, but nicknamed obstinacy by the vulgar. A wonderful salve for official blunders; since he who perseveres in error without flinching, gets the credit of boldness and consistency, while he who wavers in seeking to do what is right gets stigmatized as a trimmer. This much is certain, and it is a maxim well worthy the attention of all legislators, great and small, who stand shaking in the wind, irresolute which way to steer, that a ruler who follows his own will pleases himself; while he who seeks to satisfy the wishes and whims of
40 others runs great risk of pleasing nobody. There is nothing too like putting down one's foot resolutely, when in doubt, and letting things take their course. The clock that stands still points right twice in the four-and-twenty hours while others may keep going continually and be continually going wrong.

Nor did this magnanimous quality escape the dis-

cernment of the good people of Nieuw Nederlands. on the contrary, so much were they struck with the independent will and vigorous resolution displayed on all occasions by their new governor, that they universally called him Hard-Koppig Piet, or Peter the Headstrong—a great compliment to the strength of his understanding.

If, from all that I have said, thou dost not gather worthy reader, that Peter Stuyvesant was a tough, sturdy, valiant, weather-beaten, mettlesome, obstinate, leathern-sided, lion-hearted, generous-spirited old governor, either I have written to but little purpose, or thou art very dull at drawing conclusions.

This most excellent governor commenced his administration on the 29th of May, 1647; a remarkably stormy day, distinguished in all the almanacks of the time which have come down to us by the name of *Windy Friday*. As he was very jealous of his personal and official dignity, he was inaugurated into office with great ceremony, the goodly oaken chair of the renowned Wouter Van Twiller being carefully preserved for such occasions, in like manner as the chair and stone were reverentially preserved at Schone, in Scotland, for the coronation of the Caledonian monarchs.

I must not omit to mention that the tempestuous state of the elements, together with its being that unlucky day of the week termed "hanging day," did not fail to excite much grave speculation and divers very reasonable apprehensions among the more ancient and enlightened inhabitants; and several of the sager sex who were reputed to be not a little skilled in the mystery of astrology and fortune-telling, did declare outright that they were omens of a disastrous administration—an event that came to be lamentably verified, and which proves, beyond dispute, the wisdom of attending to those preternatural intimations furnished by dream and visions, the flying of birds, falling of stones, and cackling of geese, on which the sages and rulers of ancient times placed such reliance—or to those shooting of stars, eclipses of the moon, howlings of dogs, and flarings of candles, carefully noted and interpreted by the

34 trimmer, one who sacrifices principle to expediency • 68 Schone or Scone, a Scottish town in whose abbey was preserved the Stone of Scone, or Stone of Destiny, on which Celtic kings are supposed to have been crowned. It was conveyed to London by Edward I, in 1296 and rests beneath the coronation chair in Westminster Abbey

oracular sibyls of our day; who, in my humble opinion, are the legitimate inheritors and preservers of the ancient science of divination. This much is certain, that Governor Stuyvesant succeeded to the chair of state at a turbulent period, when foes thronged and threatened from without; when anarchy and stiff-necked opposition reigned rampant within, when the authority of their High Mightinesses the Lords States General, though supported by economy and defended by speeches, protests, and proclamations, yet tottered to its very centre, and when the great city of New Amsterdam, though fortified by flagstaffs, trumpeters, and wind-mills, seemed, like some fair lady of easy virtue, to lie open to attack, and ready to yield to the first invader.

BOOK VI

CONTAINING THE SECOND PART OF THE REIGN OF PETER THE HEADSTRONG, AND HIS GALLANT ACHIEVEMENTS ON THE DELAWARE

Chapter VII

Showing the Great Advantage That the
Author Has over His Reader in Time of
Battle—Together with Divers Portentous
Movements, Which Betoken That Something
Terrible Is About To Happen

Like as a mighty alderman, when at a corporation feast the first spoonful of turtle-soup salutes his palate, feels his appetite but tenfold quickened, and redoubles his vigorous attacks upon the tureen; while his projecting eyes roll greedily round, devouring everything at table—so did the mettlesome Peter Stuyvesant feel that hunger for martial glory, which raged within his bowels, inflamed by the capture of Fort Casimir, and nothing could allay it but the conquest of all New Sweden. No sooner, therefore, had he secured his conquest, than he stumped resolutely on, flushed with success, to gather fresh laurels at Fort Christina.

This was the grand Swedish post, established on a small river (or, as it is improperly termed, creek) of the same name, and here that crafty governor Jan Risingh lay grimly drawn up, like a gray-bearded spider in the citadel of his web.

But before we hurry into the direful scenes which must

attend the meeting of two such potent chieftains, it is advisable to pause for a moment, and hold a kind of war-like council. Battles should not be rushed into precipitately by the historian and his readers, any more than by the general and his soldiers. The great commanders of antiquity never engaged the enemy without previously preparing the minds of their followers by animating harangues, spurring them up to heroic deeds assuring 40 them of the protection of the gods, and inspiring them with a confidence in the prowess of their leaders. So the historian should awaken the attention and enlist the passions of his readers, and having set them all on fire with the importance of his subject, he should put himself at their head, flourish his pen, and lead them on to the thickest of the fight.

An illustrious example of this rule may be seen in that mirror of historians, the immortal Thucydides. Having arrived at the breaking out of the Peloponnesian war, one 50 of his commentators observes that "he sounds the charge in all the disposition and spirit of Homer. He catalogues the allies on both sides. He awakens our expectations, and fast engages our attention. All mankind are concerned in the important point now going to be decided. Endeavors are made to disclose futurity. Heaven itself is interested in the dispute. The earth totters, and nature seems to labor with the great event. This is his solemn, sublime manner of setting out. Thus he magnifies a war between two, as Rapin styles them, petty states; and thus 60 artfully he supports a little subject by treating it in a great and noble method."

In like manner, having conducted my readers into the very teeth of peril—having followed the adventurous Peter and his band into foreign regions—surrounded by foes, and stunned by the horrid din of arms—at this important moment, while darkness and doubt hang o'er each coming chapter, I hold it meet to harangue them, and prepare them for the events that are to follow.

8 the Lords . . . General, the legislature of the Netherlands • 22 Fort Casimir, a small post established by the Dutch in 1651 on the Delaware River near the present site of New Castle. Surrendered to the Swedes in 1654, it was recaptured by Stuyvesant and his forces in 1655 • 26 Fort Christina "At present a flourishing town, called Christiana, or Christeen, about thirty-seven miles from Philadelphia, on the post-road to Baltimore"—Irving. This fort, established in 1638, is usually said to have been at Wilmington • 29 Jan Risingh, Johan Classon Rising (1617-1672), director-general of New Sweden, 1654-1655

And here I would premise one great advantage which, as historian, I possess over my reader; and this it is, that though I cannot save the life of my favorite hero, nor absolutely contradict the event of a battle (both which liberties, though often taken by the French writers of the present reign, I hold to be utterly unworthy of a scrupulous historian), yet I can now and then make him bestow on his enemy a sturdy back-stroke sufficient to fell a giant; though, in honest truth, he may never have done anything
 10 of the kind—or I can drive his antagonist clear round and round the field, as did Homer make that fine fellow Hector scamper like a poltroon round the walls of Troy, for which, if ever they have encountered one another in the Elysian fields, I'll warrant the prince of poets has had to make the most humble apology

I am aware that many conscientious readers will be ready to cry out "foul play!" whenever I render a little assistance to my hero—but I consider it one of those privileges exercised by historians of all ages—and one
 20 which has never been disputed. An historian is, in fact, as it were, bound in honor to stand by his hero—the fame of the latter is intrusted to his hands, and it is his duty to do the best by it he can. Never was there a general, an admiral, or any other commander, who, in giving account of any battle he had fought, did not sorely belabor the enemy, and I have no doubt that, had my heroes written the history of their own achievements, they would have dealt much harder blows than any that I shall recount. Standing forth, therefore, as the guardian of their
 30 fame, it behooves me to do them the same justice they would have done themselves, and if I happen to be a little hard upon the Swedes, I give free leave to any of their descendants, who may write a story of the State of Delaware, to take fair retaliation, and belabor Peter Stuyvesant as hard as they please

Therefore stand by for broken heads and bloody noses!—My pen hath long itched for a battle—siege after siege have I carried on without blows or bloodshed, but now I have at length got a chance, and I vow to Heaven and St
 40 Nicholas, that, let the chronicles of the times say what they please, neither Sallust, Livy, Tacitus, Polybius, nor any other historian, did ever record a fiercer fight than that in which my valiant chieftains are now about to engage.

And you, oh most excellent readers, whom, for your faithful adherence, I could cherish in the warmest corner

of my heart—be not uneasy—trust the fate of our favorite Stuyvesant with me—for by the rood, come what may, I'll stick by Hardkoppig Piet to the last. I'll make him drive about these losels vile, as did the renowned Launcelot of the Lake a herd of recreant Cornish knights—and if he does fall, let me never draw my pen to fight another battle in behalf of a brave man, if I don't make these lubberly Swedes pay for it!

No sooner had Peter Stuyvesant arrived at Fort Christina than he proceeded without delay to intrench himself and immediately on running his first parallel, dispatched Antony Van Corlear to summon the fortress to surrender. Van Corlear was received with all due formality, hoodwinked at the portal, and conducted through a pestiferous smell of salt fish and onions to the citadel, a substantial hut built of pine logs. His eyes were here uncovered and he found himself in the august presence of Governor Risingh. This chieftain, as I have before noted, was a very giantly man, and was clad in a coarse blue coat strapped round the waist with a leathern belt, which caused the enormous skirts and pockets to set off with a very warlike sweep. His ponderous legs were cased in a pair of foxy-colored jackboots, and he was straddling in the attitude of the Colossus of Rhodes before a bit of broken looking-glass, shaving himself with a villanously dull razor. This afflicting operation caused him to make a series of horrible grimaces, which heightened exceedingly the grisly terrors of his visage. On Antony Van Corlear's being announced, the grim commander paused for a moment, in the midst of one of his most hard-favored contortions, and after eying him askance over the

41 Sallust . . . Polybius, ancient historians. Polybius was a Greek, the other Romans. • 50 losels, worthless fellows (archaic). • 50 Launcelot . . . Lake, an echo of the *Morte d'Arthur* by Sir Thomas Malory. (1470). The "driving about" of Cornish knights occurs chiefly in Bk. IX. • 58 Antony Van Corlear, or Van Curler, a figure more renowned in folklore than in history. As governor's trumpeter, he is supposed by Irving to have given his name to Anthony's Nose, a mountain across the Hudson from West Point, and to have died in 1664 on a mission from Stuyvesant. Sent to arouse the Dutch colonists to their danger from the British, he discovered that the creek separating Manhattan from the Bronx was swollen by rains. Swearing to swim it, "I'en spuyl den Duyvil," he started out, but was seized halfway across by the Devil. He freed himself once by a blast on his trumpet, but the Devil, recovering from surprise, dragged him down. Hence the name Spuyten Duyvil Creek. • 70 Colossus of Rhodes, a statue of Apollo over one hundred feet high which in ancient times stood astride the entrance to the harbor of that Aegean island.

shoulder, with a kind of snarling grin on his countenance, resumed his labors at the glass.

This iron harvest being reaped, he turned once more to the trumpeter, and demanded the purport of his errand. Antony Van Corlear delivered in a few words, being a kind of short-hand speaker, a long message from his excellency, recounting the whole history of the province, with a recapitulation of grievances, and enumeration of claims, and concluding with a peremptory demand of instant surrender, which done, he turned aside, took his nose between his thumb and fingers, and blew a tremendous blast, not unlike the flourish of a trumpet of defiance—which it had doubtless learned from a long and intimate neighborhood with the melodious instrument.

Governor Risingh heard him through, trumpet and all, but with infinite impatience, leaning at times, as was his usual custom, on the pommel of his sword, and at times twirling a huge steel watch-chain, or snapping his fingers. Van Corlear having finished, he bluntly replied, that Peter Stuyvesant and his summons might go to the d....., whither he hoped to send him and his crew of ragamuffins before supper-time. Then unsheathing his brass-hilted sword, and throwing away the scabbard—"Fore gad," quod he, "but I will not sheathe thee again until I make a scabbard of the smoke-dried leathern hide of this runagate Dutchman." Then having flung a fierce defiance in the teeth of his adversary by the lips of his messenger, the latter was reconducted to the portal, with all the ceremonious civility due to the trumpeter, squire, and ambassador of so great a commander, and being again unblinded, was courteously dismissed with a tweak of the nose, to assist him in recollecting his message.

No sooner did the gallant Peter receive this insolent reply than he let fly a tremendous volley of red-hot execrations, which would infallibly have battered down the fortifications, and blown up the powder magazine about the ears of the fiery Swede, had not the ramparts been remarkably strong, and the magazine bomb-proof. Perceiving that the works withstood this terrific blast, and that it was utterly impossible (as it really was in those unphilosophic days) to carry on a war with words, he ordered his merry men all to prepare for an immediate assault. But here a strange murmur broke out among his troops, beginning with the tribe of the Van Bummels, those valiant trenchermen of the Bronx, and spreading from man to man, accompanied with certain

mutinous looks and discontented murmurs. For once in his life, and only for once, did the great Peter turn pale, for he verily thought his warriors were going to falter in this hour of perilous trial, and thus to tarnish forever the fame of the province of New Netherlands.

But soon did he discover, to his great joy, that in his suspicion he deeply wronged his most undaunted army; for the cause of this agitation and uneasiness simply was, that the hour of dinner was at hand, and it would have almost broken the hearts of these regular Dutch warriors to have broken in upon the invariable routine of their habits. Besides, it was an established rule among our ancestors always to fight upon a full stomach, and to this may be doubtless attributed the circumstance that they came to be so renowned in arms.

And now are the hearty men of the Manhattoes, and their no less hearty comrades, all lustily engaged under the trees, buffeting stoutly with the contents of their wallets, and taking such affectionate embraces of their canteens and pottles, as though they verily believed they were to be the last. And as I foresee we shall have hot work in a page or two, I advise my readers to do the same, for which purpose I will bring this chapter to a close, giving them my word of honor, that no advantage shall be taken of this armistice to surprise, or in any wise molest, the honest Nederlanders, while at their vigorous repast.

Chapter VIII

Containing the Most Horrible Battle Ever
Recorded in Poetry or Prose, With the
Admirable Exploits of Peter the Headstrong

'Now had the Dutchmen snatched a huge repast,' and finding themselves wonderfully encouraged and animated thereby, prepared to take the field. Expectation, says the writer of the Stuyvesant manuscript—Expectation now

25 *runagate*, vagabond • 45 *trenchermen*, hearty eaters • 62 *Manhattoes*, the inhabitants of Manhattan. The origin of the name, spelled variously as *Monados*, *Manados*, *Manloes*, and *Manhates*, is obscure, one theory is that it came from the Spanish '*monados*,' 'drunken men' • 66 *pottles*, two-quart tankards [obsolete] • 77 *Stuyvesant manuscript*, described in Irving's Preface as "an elaborate manuscript written in exceeding pure and classic low Dutch, excepting a few errors in orthography, which was found in the archives of the Stuyvesant family." It is apparently one of Irving's few fictitious authorities.

stood on stilts. The world forgot to turn round, or rather stood still, that it might witness the affray, like a round-bellied alderman, watching the combat of two chivalrous flies upon his jerkin. The eyes of all mankind, as usual in such cases, were turned upon Fort Christina. The sun, like a little man in a crowd at a puppet-show, scampered about the heavens, popping his head here and there, and endeavoring to get a peep between the unmannerly clouds that obtruded themselves in his way. The historians filled
 10 their ink-horns—the poets went without their dinners, either that they might buy paper and goose-quills, or because they could not get anything to eat. Antiquity scowled sulkily out of its grave, to see itself outdone—while even Posterity stood mute, gazing in gaping ecstasy of retrospection on the eventful field.

The immortal deities, who whilom had seen service at the "affair" of Troy—now mounted their feather-bed clouds, and sailed over the plain, or mingled among the combatants in different disguises, all itching to have a
 20 finger in the pie. Jupiter sent off his thunderbolt to a noted coppersmith, to have it furbished up for the direful occasion. Venus vowed by her chastity to patronize the Swedes, and in semblance of a blear-eyed trull paraded the battlements of Fort Christina, accompanied by Diana, as a sergeant's widow, of cracked reputation. The noted bully, Mars, stuck two horse-pistols into his belt, shouldered a rusty firelock, and gallantly swaggered at their elbow, as a drunken corporal—while Apollo trudged in their rear, as a bandy-legged fifer, playing most villanously
 30 out of tune.

On the other side, the ox-eyed Juno, who had gained a pair of black eyes over night, in one of her curtain lectures with old Jupiter, displayed her haughty beauties on a baggage-wagon—Minerva, as a brawny gin-suttler, tucked up her skirts, brandished her fists, and swore most heroically, in exceeding bad Dutch (having but lately studied the language,) by way of keeping up the spirits of the soldiers, while Vulcan halted as a club-footed blacksmith, lately promoted to be a captain of militia.
 40 All was silent awe, or busting preparation. War reared his horrid front, gnashed loud his iron fangs, and shook his direful crest of bristling bayonets.

And now the mighty chieftains marshalled out their hosts. Here stood stout Risingh, firm as a thousand rocks—incrusted with stockades, and intrenched to the chin in mud batteries. His valiant soldiery lined the breastwork in grim array, each having his mustachios

fiercely greased, and his hair pomatumed back, and queued so stiffly, that he grinned above the ramparts like a grisly death's head.

There came on the intrepid Peter—his brows knit, his teeth set, his fists clenched, almost breathing forth volumes of smoke, so fierce was the fire that raged within his bosom. His faithful squire Van Corlear trudged valiantly at his heels, with his trumpet gorgeously bedecked with red and yellow ribbons, the remembrances of his fair mistresses at the Manhattoes. Then came waddling on the sturdy chivalry of the Hudson. There were the Van Wycks, and the Van Dycks, and the Ten Eycks—the Van Nesses, the Van Tassels, the Van Grolls; the Van Hoesens, the Van Giesons and the Van Blarcoms—the Van Warts, the Van Winkles, the Van Dams, the Van Pelts, the Van Rippers, and the Van Brunts. There were the Van Hornes, the Van Hooks, the Van Bunschotens, the Van Gelders, the Van Arsdale, and the Van Bummels, the Vander Belts, the Vander Hoofs, the Vander Voorts, the Vander Lins, the Vander Pools, and the Vander Spiegles—then came the Hoffmans, the Hooghlands, the Hoppers, the Cloppers, the Ryckmans, the Dyckmans, the Hogebooms, the Rosebooms, the Oothouts, the Quackenbosses, the Roerbacks, the Garrebrantzes, the Bensons, the Brouwers, the Waldrons, the Onderdonks, the Varra Vangers, the Schermerhorns, the Stoutenburghs, the Brinkerhoffs, the Bontecous, the Knickerbockers, the Hockstrassers, the Ten Breecheses and the Tough Breecheses, with a host more of worthies, whose names are too crabbed to be written, or if they could be written, it would be impossible for man to utter—all fortified with a mighty dinner and, to use the words of a great Dutch poet,

"Brimful of wrath and cabbage."

For an instant the mighty Peter paused in the midst of his career, and mounting on a stump, addressed his troops in eloquent Low Dutch, exhorting them to fight like *duytels*, and assuring them that if they conquered they should get plenty of booty—if they fell, they should be allowed the satisfaction, while dying, of reflecting that it was in the service of their country—and after they were

17 the "affair" of Troy. In this and the following paragraph Irving burlesques Bk. V of Homer's *Iliad*. • 34 gin-suttler, gin-selling camp-follower. • 48 pomatumed, smoothed with pomatum, a scented ointment. • 58 Van Wycks, etc. See the catalogue of ships in Bk. I of the *Iliad*.

dead, of seeing their names inscribed in the temple of renown, and handed down, in company with all the other great men of the year, for the admiration of posterity — Finally, he swore to them, on the word of a governor (and they knew him too well to doubt it for a moment), that if he caught any mother's son of them looking pale, or playing craven, he would curry his hide till he made him run out of it like a snake in spring time. Then lunging out his trusty sabre, he brandished it three times over his head, ordered Van Corlear to sound a charge, and shouting the words "St Nicholas and the Manhattoes!" courageously dashed forwards. His warlike followers, who had employed the interval in lighting their pipes, instantly stuck them into their mouths, gave a furious puff, and charged gallantly under cover of the smoke.

The Swedish garrison, ordered by the cunning Risingh not to fire until they could distinguish the whites of their assailants' eyes, stood in horrid silence on the covert-way, until the eager Dutchmen had ascended the glacis. Then did they pour into them such a tremendous volley, that the very hills quaked around, and were terrified even unto an incontinence of water, insomuch that certain springs burst forth from their sides, which continue to run unto the present day. Not a Dutchman but would have bitten the dust beneath that dreadful fire, had not the protecting Minerva kindly taken care that the Swedes should, one and all, observe their usual custom of shutting their eyes and turning away their heads at the moment of discharge.

The Swedes followed up their fire by leaping the counterscarp, and falling tooth and nail upon the foe with furious outcries. And now might be seen prodigies of valor, unmatched in history or song. Here was the sturdy Stoffel Brinkerhoff brandishing his quarter-staff, like the giant Blanderon his oak tree (for he scorned to carry any other weapon), and drumming a horrific tune upon the hard heads of the Swedish soldiery. There were the Van Kortlandts, posted at a distance, like the Locrian archers of yore, and plying it most potently with the longbow, for which they were so justly renowned. On a rising knoll were gathered the valiant men of Sing-Sing, assisting marvellously in the fight, by chanting the great song of St Nicholas, but as to the Gardeniers of Hudson, they were absent on a marauding party, laying waste the neighboring watermelon patches.

In a different part of the field were the Van Grolls of Antony's Nose, struggling to get to the thickest of the

fight, but horribly perplexed in a defile between two hills, by reason of the length of their noses. So also the Van Bunschotens of Nyack and Kakiat, so renowned for kicking with the left foot, were brought to a stand for want of wind, in consequence of the hearty dinner they had eaten, and would have been put to utter rout but for the arrival of a gallant corps of *voltigeurs*, composed of the Hoppers, who advanced nimbly to their assistance on one foot. Nor must I omit to mention the valiant achievements of Antony Van Corlear, who, for a good quarter of an hour, waged stubborn fight with a little puffy Swedish drummer, whose hide he drummed most magnificently, and whom he would infallibly have annihilated on the spot, but that he had come into the battle with no other weapon but his trumpet.

But now the combat thickened—On came the mighty Jacobus Varra Vanger and the fighting men of the Wallabout, after them thundered the Van Pelts of Flopus, together with the Van Rippers and the Van Brunts, bearing down all before them—then the Suy Dams, and the Van Dams, pressing forward with many a blustering oath, at the head of the warriors of Hell-gate, clad in their thunder and lightning gaberdines, and lastly, the standard-bearers and body-guard of Peter Stuyvesant, bearing the great beaver of the Manhattoes.

And now commenced the horrid din, the desperate struggle, the maddening ferocity, the frantic desperation, the confusion and self-abandonment of war. Dutchman and Swede commingled, tugged, panted, and blowed. The heavens were darkened with a tempest of missives. Bang! went the guns—whack! went the broad-swords—thump! went the cudgels—crash! went the musket-stocks—blows—kicks—cuffs—scratches—black eyes and bloody noses swelling the horrors of the scene! Thick thwack, cut and hack, helter-skelter, higgledy-piggledy, hurly-burly, head over heels, rough and tumble!—Dunder and blixum! swore the Dutchmen—splitter and splutter! cried the

18 *covert-way* . . . *glacis*. Irving's familiarity with the scientific terms of military fortification was probably derived from one of his favorite books, *Tristram Shandy* (See note, p. 439.) The *covert-way* is a covered passage in the counterscarp, or outer wall of a trench, the *glacis* is the open slope in front of that wall. • 35 the giant *Blanderon*, a name apparently invented by Irving. Perhaps he had in mind the giants of Greek mythology who revolted against Jupiter, using tree trunks for weapons. • 38 *Locrian archers*. The Locrians were the most ancient of Greek peoples. • 54 *voltigeurs*, members of a special skirmishing company attached to a French infantry regiment (obsolete).

Swedes—Storm the works! shouted Hardkoppig Peter—
 Fire the mine! roared stout Risingh—Tanta-rarra-ra!
 twanged the trumpet of Antony Van Corlear—until all
 voice and sound became unintelligible—grunts of pain,
 yells of fury, and shouts of triumph mingling in one hide-
 ous clamor. The earth shook as if struck with a para-
 lytic stroke—trees shrunk aghast, and withered at the
 sight—rocks burrowed in the ground like rabbits—and
 even Christina creek turned from its course, and ran up
 10 a hill in breathless terror!

Long hung the contest doubtful, for though a heavy
 shower of rain, sent by the "cloud-compelling Jove," in
 some measure cooled their ardor, as doth a bucket of
 water thrown on a group of fighting mastiffs, yet did they
 but pause for a moment, to return with tenfold fury to
 the charge. Just at this juncture a vast and dense column
 of smoke was seen slowly rolling toward the scene of
 battle. The combatants paused for a moment, gazing in
 mute astonishment, until the wind, dispelling the murky
 20 cloud, revealed the flaunting banner of Michael Paw, the
 Patroon of Communipaw. That valiant chieftain came
 fearlessly on at the head of a phalanx of oyster-fed Pavon-
 ians and a corps de reserve of the Van Arsdals and Van
 Brummels, who had remained behind to digest the enor-
 mous dinner they had eaten. These now trudged man-
 fully forward, smoking their pipes with outrageous vigor,
 so as to raise the awful cloud that has been mentioned,
 but marching exceedingly slow, being short of leg, and
 of great rotundity in the belt

30 And now the deities who watched over the fortunes
 of the Nederlanders having unthinkingly left the field,
 and stepped into a neighboring tavern to refresh them-
 selves with a pot of beer, a direful catastrophe had well-
 nigh ensued. Scarce had the myrmidons of Michael Paw
 attained the front of battle, when the Swedes, instructed
 by the cunning Risingh, levelled a shower of blows full
 at their tobacco-pipes. Astounded at this assault, and
 dismayed at the havoc of their pipes, these ponderous
 warriors gave way, and like a drove of frightened ele-
 40 phants broke through the ranks of their own army. The
 little Hoppers were borne down in the surge; the sacred
 banner emblazoned with the gigantic oyster of Communi-
 paw was trampled in the dirt. on blundered and thun-
 dered the heavy-sterned fugitives, the Swedes pressing on
 their rear and applying their feet *a parte poste* of the
 Van Arsdals and the Van Brummels with a vigor that

prodigiously accelerated their movements—nor did the
 renowned Michael Paw himself fail to receive divers
 grievous and dishonorable visitations of shoe-leather.

But what, oh Muse! was the rage of Peter Stuyvesant,
 when from afar he saw his army giving way! In the
 transports of his wrath he sent forth a roar, enough to
 shake the very hills. The men of the Manhattoes plucked
 up new courage at the sound, or rather, they rallied at the
 voice of their leader, of whom they stood more in awe
 than of all the Swedes in Christendom. Without waiting
 for their aid, the daring Peter dashed sword in hand into
 the thickest of the foe. Then might be seen achievements
 worthy of the days of the giants. Wherever he went, the
 enemy shrank before him, the Swedes fled to right and
 left, or were driven, like dogs, into their own ditch, but
 as he pushed forward singly with headlong courage, the
 foe closed behind and hung upon his rear. One aimed a
 blow full at his heart; but the protecting power which
 watches over the great and good turned aside the hostile
 blade and directed it to a side-pocket, where reposed an
 enormous iron tobacco-box, endowed, like the shield of
 Achilles, with supernatural powers, doubtless from bear-
 ing the portrait of the blessed St. Nicholas. Peter Stuy-
 vesant turned like an angry bear upon the foe, and seizing
 him as he fled, by an immeasurable queue, "Ah, whore-
 son caterpillar," roared he, "here's what shall make worms'
 meat of thee!" So saying, he whirled his sword, and dealt
 a blow that would have decapitated the varlet, but that
 the pitying steel struck short and shaved the queue for-
 ever from his crown. At this moment an arquebuser
 levelled his piece from a neighboring mound, with deadly
 aim, but the watchful Minerva, who had just stopped to
 tie up her garter, seeing the peril of her favorite hero,
 sent old Boreas with his bellows, who, as the match de-
 scended to the pan, gave a blast that blew the priming
 from the touch-hole.

Thus waged the fight, when the stout Risingh, survey-
 ing the field from the top of a little ravelin, perceived his
 troops banged, beaten, and kicked by the invincible Peter.
 Drawing his falchion and uttering a thousand anathemas
 he strode down to the scene of combat with some such
 thundering strides as Jupiter is said by Hesiod to have

23 *corps de reserve*, reserve corps • 45 *a parte poste*, from the part
 after, here meaning to the backsides • 88 Hesiod (fl. 900 B.C.), Greek
 poet

taken, when he strode down the spheres to hurl his thunder-bolts at the Titans

When the rival heroes came face to face, each made a prodigious start in the style of a veteran stage-champion. Then did they regard each other for a moment with the bitter aspect of two furious ram-cats on the point of a clapper-clawing. Then did they throw themselves into one attitude, then into another, striking their swords on the ground, first on the right side, then on the left—at last at it they went, with incredible ferocity. Words cannot tell the prodigies of strength and valor displayed in this direful encounter—an encounter compared to which the far-famed battles of Ajax with Hector, of Aeneas with Turnus, Orlando with Rodomont, Guy of Warwick with Colbrand the Dane, or of that renowned Welsh knight, Sir Owen of the Mountains with the giant Guylon, were all gentle sports and holiday recreations. At length the valiant Peter, watching his opportunity, aimed a blow, enough to cleave his adversary to the very chine, but Risingh, nimbly raising his sword, warded it off so narrowly, that glancing on one side, it shaved away a huge canteen in which he carried his liquor; thence pursuing its trenchant course, it severed off a deep coat pocket, stored with bread and cheese—which provant rolling among the armies, occasioned a fearful scrambling between the Swedes and Dutchmen, and made the general battle to wax more furious than ever.

Enraged to see his military stores laid waste, the stout Risingh, collecting all his forces, aimed a mighty blow full at the hero's crest. In vain did his fierce little cocked hat oppose its course. The biting steel clove through the stubborn ram beaver, and would have cracked the crown of any one not endowed with supernatural hardness of head, but the brittle weapon shattered in pieces on the skull of Hardkoppig Piet, shedding a thousand sparks, like beams of glory, round his grizzly visage.

The good Peter reeled with the blow, and turning up his eyes beheld a thousand suns, besides moons and stars, dancing about the firmament—at length, missing his footing, by reason of his wooden leg, down he came on his seat of honor with a crash which shook the surrounding hills, and might have wrecked his frame, had he not been received into a cushion softer than velvet, which Providence, or Minerva, or St. Nicholas, or some cow, had benevolently prepared for his reception.

The furious Risingh, in spite of the maxim, cherished

by all true knights, that "fair play is a jewel," hastened to take advantage of the hero's fall; but, as he stooped to give a fatal blow, Peter Stuyvesant dealt him a thwack over the scone with his wooden leg, which set a chime of 50 bells ringing triple bob majors in his cerebellum. The bewildered Swede staggered with the blow, and the wary Peter seizing a pocket pistol, which lay hard by, discharged it full at the head of the reeling Risingh. Let not my reader mistake, it was not a murderous weapon loaded with powder and ball, but a little sturdy stone pottle charged to the muzzle with a double dram of true Dutch courage, which the knowing Antony Van Corlear carried about him by way of replenishing his valor, and which had dropped from his wallet during his furious encounter 60 with the drummer. The hideous weapon sang through the air, and true to its course as was the fragment of rock discharged at Hector by bully Ajax, encountered the head of the gigantic Swede with matchless violence.

This heaven-directed blow decided the battle. The ponderous pericranium of General Jan Risingh sank upon his breast, his knees tottered under him, a deathlike torpor seized upon his frame, and he tumbled to the earth with such violence, that old Pluto started with affright, lest he should have broken through the roof of his infernal palace. 70

His fall was the signal of defeat and victory—the Swedes gave way—the Dutch pressed forward; the former took to their heels, the latter hotly pursued.—Some entered with them, pell-mell, through the sally-port—others stormed the bastion, and others scrambled over the curtain. Thus in a little while the fortress of Fort Christina, which, like another Troy, had stood a siege of full ten hours, was carried by assault, without the loss of a

6 ram-cats . . . clapper-clawing, tomcats about to fight (dialectal)
• 13 Ajax . . . Guylon, a list of famous combats in literature. Irving's ultimate sources were Bk. XIV of the *Iliad*, Bk. XII of the *Aeneid*, Bk. VI of the *Orlando Inamorata* of Matteo Maria Boiardo (1434-1494), the metrical romance of *Guy of Warwick* (thirteenth century), and *The Mabinogion* (twelfth century).
• 24 provant, provender, an allowance of food.
• 32 ram beaver, man's hat.
• 46 maxim, usually attributed to Scott's *Redgauntlet* (1824). Since Irving's use is of an earlier date, it is probable that both authors drew upon some source in chivalric literature.
• 51 triple bob majors, a bell-ringing term. Bob-majors are rung upon eight bells, a treble bob being a method which produces a dodging or irregular effect.
• 75 sally-port . . . bastion . . . curtain. The sally-port is a small concealed gate in a fortification, the bastion, a projection, the curtain, the wall between bastions.

single man on either side. Victory, in the likeness of a gigantic ox-fly, sat perched upon the cocked hat of the gallant Stuyvesant; and it was declared, by all the writers whom he hired to write the history of his expedition, that on this memorable day he gained a sufficient quantity of glory to immortalize a dozen of the greatest heroes in Christendom

Chapter IX

In Which the Author and the Reader, While
Reposing after the Battle, Fall into a Very
Grave Discourse—after Which Is Recorded
the Conduct of Peter Stuyvesant
after His Victory

Thanks to St Nicholas, we have safely finished this tremendous battle let us sit down, my worthy reader, and
10 cool ourselves, for I am in a prodigious sweat and agitation—truly this fighting of battles is hot work! and if your great commanders did not know what trouble they give their historians, they would not have the conscience to achieve so many horrible victories. But methinks I hear my reader complain, that throughout this boasted battle there is not the least slaughter, nor a single individual maimed, if we except the unhappy Swede, who was shorn of his queue by the trenchant blade of Peter Stuyvesant; all which, he observes, is a great outrage on
20 probability, and highly injurious to the interest of the narration.

This is certainly an objection of no little moment, but it arises entirely from the obscurity enveloping the remote periods of time about which I have undertaken to write. Thus, though doubtless, from the importance of the object, and the prowess of the parties concerned, there must have been terrible carnage, and prodigies of valor displayed before the walls of Christina, yet, notwithstanding that I have consulted every history, manuscript, and tradi-
30 tion, touching this memorable though long-forgotten battle, I cannot find mention made of a single man killed or wounded in the whole affair.

This is, without doubt, owing to the extreme modesty of our forefathers, who, unlike their descendants, were never prone to vaunt of their achievements; but it is a virtue which places their historian in a most embarrassing predicament; for, having promised my readers a hideous

and unparalleled battle, and having worked them up into a warlike and bloodthirsty state of mind, to put them off without any havoc and slaughter would have been as bitter a disappointment as to summon a multitude of good people to attend an execution, and then cruelly balk them by a reprieve.

Had the fates only allowed me some half a score of dead men, I had been content; for I would have made them such heroes as abounded in the olden time, but whose race is now unfortunately extinct; any one of whom, if we may believe those authentic writers, the poets, could drive great armies, like sheep, before him, and conquer and desolate whole cities by his single arm.

But seeing that I had not a single life at my disposal, all that was left me was to make the most I could of my battle, by means of kicks, and cuffs, and bruises, and such like ignoble wounds. And here I cannot but compare my dilemma, in some sort, to that of the divine Milton, who having arrayed with sublime preparation his immortal hosts against each other, is sadly put to it how to manage them, and how he shall make the end of his battle answer to the beginning, inasmuch as, being mere spirits, he can not deal a mortal blow, nor even give a flesh wound to any of his combatants. For my part, the greatest difficulty I found was, when I had once put my warriors in a passion, and let them loose into the midst of the enemy, to keep them from doing mischief. Many a time had I to restrain the sturdy Peter from cleaving a gigantic Swede to the very waistband, or spitting half a dozen little fellows on his sword, like so many sparrows. And when I had set some hundred of missives flying in the air, I did not dare to suffer one of them to reach the ground, lest it should have put an end to some unlucky Dutchman.

The reader cannot conceive how mortifying it is to a writer thus in a manner to have his hands tied, and how many tempting opportunities I had to wink at, where might have made as fine a death-blow as any recorded in history or song.

From my own experience I begin to doubt most positively of the authenticity of many of Homer's stories. I verily believe, that when he had once launched one of his favorite heroes among a crowd of the enemy, he cut down many an honest fellow, without any authority for so do

55 Milton. See Bk. VI of *Paradise Lost*

ing, excepting that he presented a fair mark—and that often a poor fellow was sent to grim Pluto's domains, merely because he had a name that would give a sounding turn to a period. But I disclaim all such unprincipled liberties—let me but have truth and the law on my side, and no man would fight harder than myself—but since the various records I consulted did not warrant it, I had too much conscience to kill a single soldier. By St Nicholas, but it would have been a pretty piece of business! My enemies, the critics, who I foresee will be ready enough to lay any crime they can discover at my door, might have charged me with murder outright—and I should have esteemed myself lucky to escape with no harsher verdict than manslaughter!

And now, gentle reader, that we are tranquilly sitting down here, smoking our pipes, permit me to indulge in a melancholy reflection which at this moment passes across my mind. How vain, how fleeting, how uncertain are all those gaudy bubbles after which we are panting and toiling in this world of fair delusions! The wealth which the miser has amassed with so many weary days, so many sleepless nights, a spendthrift here may squander away in joyless prodigality, the noblest monuments which pride has ever reared to perpetuate a name, the hand of time will shortly tumble into ruins—and even the brightest laurels, gained by feats of arms, may wither, and be forever blighted by the chilling neglect of mankind. 'How many illustrious heroes,' says the good Boetius, 'who were once the pride and glory of the age, hath the silence of historians buried in eternal oblivion!' And this it was that induced the Spartans, when they went to battle, solemnly to sacrifice to the Muses, supplicating that their achievements might be worthily recorded. Had not Homer tuned his lofty lyre, observes the elegant Cicero, the valor of Achilles had remained unsung. And such, too, after all the toils and perils he had braved, after all the gallant actions he had achieved, such too had nearly been the fate of the chivalric Peter Stuyvesant, but that I fortunately stepped in and engraved his name on the indelible tablet of history, just as the carter Time was silently brushing it away forever!

The more I reflect, the more I am astonished at the important character of the historian. He is the sovereign censor to decide upon the renown or infamy of his fellow men. He is the patron of kings and conquerors, on whom it depends whether they shall live in after ages, or be for-

gotten as were their ancestors before them. The tyrant may oppress while the object of his tyranny exists; but the historian possesses superior might, for his power extends even beyond the grave. The shades of departed and long- 50 forgotten heroes anxiously bend down from above, while he writes, watching each movement of his pen, whether it shall pass by their names with neglect, or inscribe them on the deathless pages of renown. Even the drop of ink which hangs trembling on his pen, which he may either dash upon the floor, or waste in idle scrawlings—that very drop, which to him is not worth the twentieth part of a farthing, may be of incalculable value to some departed worthy—may elevate half a score, in one moment, to immortality, who would have given worlds, had they 60 possessed them, to insure the glorious meed.

Let not my readers imagine, however, that I am indulging in vainglorious boastings, or am anxious to blazon forth the importance of my tribe. On the contrary, I shrink when I reflect on the awful responsibility we historians assume—I shudder to think what direful commotions and calamities we occasion in the world—I swear to thee, honest reader, as I am a man, I weep at the very idea! Why, let me ask, are so many illustrious men daily tearing themselves away from the embraces of their fam- 70 ilies—slighting the smiles of beauty—despising the allurements of fortune, and exposing themselves to the miseries of war?—Why are kings desolating empires, and depopulating whole countries? In short, what induces all great men of all ages and countries to commit so many victories and misdeeds, and inflict so many miseries upon mankind and upon themselves, but the mere hope that some historian will kindly take them into notice, and admit them into a corner of his volume? For, in short, the mighty object of all their toils, their hardships, and pri- 80 vations, is nothing but *immortal fame*. And what is immortal fame?—why, half a page of dirty paper!—alas! alas! how humiliating the idea—that the renown of so great a man as Peter Stuyvesant would depend upon the pen of so little a man as Diedrich Knickerbocker!

And now, having refreshed ourselves after the fatigues and perils of the field, it behooves us to return once more to the scene of conflict, and inquire what were the results

2 Pluto's domains, i.e., Hades • 28 Boetius. The remark appears in Bk. II, Prose VII of *The Consolations of Philosophy*, written early in the sixth century • 35 Cicero. See *Pro Archia Poeta*, Chap. X

of this renowned conquest. The fortress of Christina being the fair metropolis, and in a manner the key to New Sweden, its capture was speedily followed by the entire subjugation of the province. This was not a little promoted by the gallant and courteous deportment of the chivalric Peter. Though a man terrible in battle, yet in the hour of victory was he endued with a spirit generous, merciful, and humane. He vaunted not over his enemies, nor did he make defeat more galling by unmanly insults; 10 for like that mirror of knightly virtue, the renowned Paladin Orlando, he was more anxious to do great actions than to talk of them after they were done. He put no man to death; ordered no houses to be burnt down, permitted no ravages to be perpetrated on the property of the vanquished, and even gave one of his bravest officers a severe admonishment with his walking staff, for having been detected in the act of sacking a hen-roost.

He moreover issued a proclamation, inviting the inhabitants to submit to the authority of their High Mightinesses, but declaring, with unexampled clemency, that 20 whoever refused should be lodged at the public expense in a goodly castle provided for the purpose, and have an armed retinue to wait on them in the bargain. In consequence of these beneficent terms, about thirty Swedes stepped manfully forward and took the oath of allegiance; in reward for which they were graciously permitted to remain on the banks of the Delaware, where their descendants reside at this very day. I am told, however, by divers observant travellers, that they have never been able 30 to get over the chap-fallen looks of their ancestors; but that they still do strangely transmit from father to son manifest marks of the sound drubbing given them by the sturdy Amsterdammers.

The whole country of New Sweden, having thus yielded to the arms of the triumphant Peter, was reduced to a colony called South River, and placed under the superintendence of a lieutenant-governor, subject to the control of the supreme government of New Amsterdam. This great dignitary was called Mynheer William Beek- 40 man, or rather *Beck*-man, who derived his surname, as did Ovidious Naso of yore, from the lordly dimensions of his nose, which projected from the centre of his countenance, like the beak of a parrot. He was the great progenitor of the tribe of the Beekmans, one of the most ancient and honorable families of the province; the members of which do gratefully commemorate the origin of their dignity; not as your noble families in England would

do, by having a glowing proboscis emblazoned in their escutcheon, but by one and all wearing a right goodly nose, stuck in the very middle of their faces.

Thus was this perilous enterprise gloriously terminated, with the loss of only two men—Wolfert Van Horne, a tall spare man, who was knocked overboard by the boom of a sloop in a flaw of wind; and fat Brom Van Bummel who was suddenly carried off by an indigestion, both however, were immortalized, as having bravely fallen in the service of their country. True it is, Peter Stuyvesan had one of his limbs terribly fractured in the act of storming the fortress, but as it was fortunately his wooden leg the wound was promptly and effectually healed.

And now nothing remains to this branch of my history but to mention that this immaculate hero, and his victorious army, returned joyously to the Manhattoes, where they made a solemn and triumphant entry, bearing with them the conquered Risingh, and the remnant of his battered crew, who had refused allegiance, for it appears that the gigantic Swede had only fallen into a swoon, at the end of the battle, from which he was speedily restored by a wholesome tweak of the nose.

These captive heroes were lodged, according to the promise of the governor, at the public expense, in a fair and spacious castle, being the prison of state, of which Stoffel Brinkerhoff, the immortal conqueror of Oyster Bay, was appointed governor; and which has ever since remained in the possession of his descendants.

It was a pleasant and goodly sight to witness the joy of the people of New Amsterdam, at beholding their warriors once more return from this war in the wilderness. The old women thronged round Antony Van Corlear, who gave the whole history of the campaign with matchless accuracy; saving that he took the credit of fighting the whole battle himself, and especially of vanquishing the stout Risingh, which he considered himself as clearly entitled to, seeing that it was effected by his own stone portul

The schoolmasters throughout the town gave holiday to their little urchins, who followed in droves after the drums, with paper caps on their heads, and sticks in the

breeches, thus taking the first lesson in the art of war. As to the sturdy rabble, they thronged at the heels of Peter Stuyvesant wherever he went, waving their greasy hats in the air, and shouting "Hardkoppig Piet forever!"

It was indeed a day of roaring rout and jubilee. A huge dinner was prepared at the Stadthouse in honor of the conquerors, where were assembled in one glorious constellation the great and little luminaries of New Amsterdam. There were the lordly Schout and his obsequious deputy—the burgomasters with their officious schepens at their elbows—the subaltern officers at the elbows of the schepens, and so on down to the lowest hanger-on of police: every tag having his rag at his side, to finish his pipe, drink off his heel-taps, and laugh at his flights of immortal dullness. In short—for a city feast is a city feast all the world over, and has been a city feast ever since the creation—the dinner went off much the same as do our great corporation junketings and Fourth of July

banquets. Loads of fish, flesh, and fowl were devoured, oceans of liquor drank, thousands of pipes smoked, and many a dull joke honored with much obstreperous fat-sided laughter.

I must not omit to mention, that to this far-famed victory Peter Stuyvesant was indebted for another of his many titles—for so hugely delighted were the honest burghers with his achievements, that they unanimously honored him with the name of *Pieter de Groodt*, that is to say, Peter the Great, or, as it was translated into English by the people of New Amsterdam, for the benefit of their New England visitors, *Piet de pig*—an appellation which he maintained even unto the day of his death.

The Author's Account of Himself

The Sketchbook of Geoffrey Crayon, Gent. was first published in seven numbers in New York, between June 23, 1819, and September 13, 1820. In his Preface to the revised edition of 1848, Irving said that most of the essays and stories therein were part of an intended series which, before his plan had matured, he was compelled by circumstances to send piecemeal to the United States.

In addition to "The Author's Account of Himself" and "L'Envoy," collected editions usually contain thirty-two pieces; the original seven numbers offered only twenty-five. Among the additions were "Traits of Indian Character" and "Philip of Pokanoket," previously printed in the *Analectic Magazine* of Philadelphia. The greater

part of *The Sketch Book* is composed of essays on English life and manners with a decidedly nostalgic flavor. Among the more famous are "Rural Life in England" (in No. II), "The Boar's Head Tavern, Eastcheap" (No. III), a series on Christmas customs at the country house of a Yorkshire squire, "Bracebridge Hall" (in No. V), "John Bull" (No. VI), and "Westminster Abbey" and "Stratford-on-Avon" (No. VII). Their emphasis upon the common literary and social heritage of Americans and Englishmen doubtless contributed to international good will in an era when misunderstanding seemed inevitable. That Irving was no sycophantic Anglophile was shown by his vigorous "English Writers on America" (No. II), a frank warning to England that "should those reverses overtake her, from which the proudest empires have not been exempt," she might regret having lost the friendship of the United States. *The Sketch Book* has remained a classic, however, largely because of two sketches or short stories, "Rip Van Winkle" (No. I) and "The Legend of Sleepy Hollow" (No. VI), which are unquestionably among the best-known tales in the English language.

Both stories were written in England in 1818, while Irving was absorbed in what he called "the rich mine of German literature," whose discovery he probably owed to the enthusiasm of Scott. Scholarly investigation has shown that Irving followed German legends for both

plots (see especially H. A. Pochmann's article in *Studies in Philology* for July 1930); his many allusions and tags of quotation reveal, in fact, how conscious he was of literary tradition. Yet, bookish as they are, both tales are skillfully localized and depend for their effect upon much the same feeling for history and folk life which characterizes the *History of New York*. Both of them, it will be noted, continue the pleasant fiction of Diedrich Knickerbocker; both, although thin in plot and unremarkable for characterization, display a perfection of tone and the delight in details of living which are Irving's finest qualities.

"I am of this mind with Homer, that as the snail that crept out of her shell was turned eftsoons into a toad, and thereby was forced to make a stoole to sit on; so the traveller that straggleth from his owne country is in a short time transformed into so monstrous a shape, that he is faine to alter his mansion with his manners, and to live where he can, not where he would."—LYLY'S *EUPHUES*

I was always fond of visiting new scenes, and observing strange characters and manners. Even when a mere child I began my travels, and made many tours of discovery into foreign parts and unknown regions of my native city, to the frequent alarm of my parents, and the emolument of the town-crier. As I grew into boyhood, I extended the range of my observations. My holiday afternoons were spent in rambles about the surrounding country. I made myself familiar with all its places famous in history
 10 or fable. I knew every spot where a murder or robbery had been committed, or a ghost seen. I visited the neighboring villages, and added greatly to my stock of knowledge, by noting their habits and customs, and conversing with their sages and great men. I even journeyed one long summer's day to the summit of the most distant hill, whence I stretched my eye over many a mile of terra incognita, and was astonished to find how vast a globe I inhabited.

This rambling propensity strengthened with my years
 20 Books of voyages and travels became my passion, and in devouring their contents, I neglected the regular exercises of the school. How wistfully would I wander about the

pier-heads in fine weather, and watch the parting ships, bound to distant climes—with what longing eyes would I gaze after their lessening sails, and waft myself in imagination to the ends of the earth!

Further reading and thinking, though they brought this vague inclination into more reasonable bounds, only served to make it more decided. I visited various parts of my own country; and had I been merely a lover of fine scenery, I should have felt little desire to seek elsewhere its gratification, for on no country have the charms of nature been more prodigally lavished. Her mighty lakes, like oceans of liquid silver; her mountains, with their bright aerial tints, her valleys, teeming with wild fertility; her tremendous cataracts, thundering in their solitudes; her boundless plains, waving with spontaneous verdure; her broad deep rivers, rolling in solemn silence to the ocean, her trackless forests, where vegetation puts forth all its magnificence; her skies, kindling with the magic of summer clouds and glorious sunshine,—no never need an American look beyond his own country for the sublime and beautiful of natural scenery.

But Europe held forth the charms of storied and poetical association. There were to be seen the masterpieces of art, the refinements of highly-cultivated society, the quaint peculiarities of ancient and local custom. My native country was full of youthful promise. Europe was rich in the accumulated treasures of age. Her very ruin told the history of times gone by, and every mouldering stone was a chronicle. I longed to wander over the scene of renowned achievement—to tread, as it were, in the footsteps of antiquity—to loiter about the ruined castle—to meditate on the falling tower—to escape, in short from the common-place realities of the present, and lose myself among the shadowy grandeurs of the past.

I had, beside all this, an earnest desire to see the great men of the earth. We have, it is true, our great men in America: not a city but has an ample share of them. I have mingled among them in my time, and been almost withered by the shade into which they cast me; for there is nothing so baleful to a small man as the shade of a great one, particularly the great man of a city. But I was

Text: the revised edition of 1848 • *Lyly's Euphues*. The quotation from near the beginning of *Euphues and His England* (1580), by John Lyly (1553?-1606), English author of prose romances and courtly comedies • 16 terra incognita, unexplored region

anxious to see the great men of Europe, for I had read in the works of various philosophers, that all animals degenerated in America, and man among the number. A great man of Europe, thought I, must therefore be as superior to a great man of America, as a peak of the Alps to a highland of the Hudson, and in this idea I was confirmed, by observing the comparative importance and swelling magnitude of many English travellers among us, who, I was assured, were very little people in their own country. I will visit this land of wonders, thought I, and see the gigantic race from which I am degenerated.

It has been either my good or evil lot to have my roving passion gratified. I have wandered through different countries, and witnessed many of the shifting scenes of life. I cannot say that I have studied them with the eye of a philosopher, but rather with the sauntering gaze with which humble lovers of the picturesque stroll from the window of one print-shop to another, caught sometimes by the delineations of beauty, sometimes by the distortions of caricature, and sometimes by the loveliness of landscape. As it is the fashion for modern tourists to travel pencil in hand, and bring home their portfolios filled with sketches, I am disposed to get up a few for the entertainment of my friends. When, however, I look over the hints and memorandums I have taken down for the

purpose, my heart almost fails me at finding how my idle humor has led me aside from the great objects studied by every regular traveller who would make a book. I fear I shall give equal disappointment with an unlucky landscape painter, who had travelled on the continent,³⁰ but, following the bent of his vagrant inclination, had sketched in nooks, and corners, and by-places. His sketch-book was accordingly crowded with cottages, and landscapes, and obscure ruins; but he had neglected to paint St. Peter's, or the Coliseum, the cascade of Terni, or the bay of Naples, and had not a single glacier or volcano in his whole collection.

1819

2 philosophers, e.g., the Comte de Buffon (see note, p. 263), who theorized on the harmful effects of the American climate • 8 English travellers. Irving was keenly aware of the "Paper War" in which his countrymen had been defending themselves against the attacks of Englishmen. Here he echoes the judgment of John Bristed (*The Resources of the United States*, New York, 1816), that among the vilest and silliest of those who had abused America were "Parkinson, an English farmer, Ashe, a soi-disant military officer, and one Jansen [Janson], a non-descript." For a full account see Jane L. Mesick, *The English Traveller in America, 1785-1835* (New York, 1922), and see "English Writers on America" in No. II of *The Sketch Book* • 35 cascade of Terni, artificial waterfalls in the Apennines, about fifty miles north of Rome. They had been described by Byron in *Childe Harold's Pilgrimage*, Canto IV (1818), stanzas lxxix-lxxii.

Rip Van Winkle

A Posthumous Writing of
Diedrich Knickerbocker

By Woden, God of Saxons.

From whence comes Wensday, that is Wodensday.

Truth is a thing that ever I will keep

Unto thylke day in which I creep into

My sepulchre.—CARTWRIGHT

[The following Tale was found among the papers of the late Diedrich Knickerbocker, an old gentleman of

New York, who was very curious in the Dutch history of the province, and the manners of the descendants from its primitive settlers. His historical researches, however, did not lie so much among books as among men, for the former are lamentably scanty on his favorite topics, whereas he found the old burghers, and still more their wives, rich in that legendary lore, so invaluable to true history. Whenever, therefore, he happened¹⁰ upon a genuine Dutch family, snugly shut up in its low-roofed farmhouse, under a spreading sycamore, he looked upon it as a little clasped volume of black-letter, and studied it with the zeal of a book-worm.

Woden, Odin, Teutonic god of storms and battles • Cartwright, possibly William Cartwright (1610-1643), English poet • 1 The following Tale. The present foreword did not appear in the original number of 1819 • 13 black-letter, a heavy-faced type used by early printers, now called Gothic or Old English

The result of all these researches was a history of the province during the reign of the Dutch governors, which he published some years since. There have been various opinions as to the literary character of his work, and, to tell the truth, it is not a whit better than it should be. Its chief merit is its scrupulous accuracy, which indeed was a little questioned on its first appearance, but has since been completely established, and it is now admitted into all historical collections, as a book of unquestion-
10 able authority.

The old gentleman died shortly after the publication of his work, and now that he is dead and gone, it cannot do much harm to his memory to say that his time might have been much better employed in weightier labors. He, however, was apt to ride his hobby his own way; and though it did now and then kick up the dust a little in the eyes of his neighbors, and grieve the spirit of some friends, for whom he felt the truest deference and affection, yet his errors and follies are remembered
20 "more in sorrow than in anger," and it begins to be suspected, that he never intended to injure or offend. But however his memory may be appreciated by critics, it is still held dear by many folk, whose good opinion is well worth having, particularly by certain biscuit-bakers, who have gone so far as to imprint his likeness on their new-year cakes, and have thus given him a chance for immortality, almost equal to the being stamped on a Waterloo Medal, or a Queen Anne's Farthing.]

Whoever has made a voyage up the Hudson must re-
30 member the Kaatskill mountains. They are a dismembered branch of the great Appalachian family, and are seen away to the west of the river, swelling up to a noble height, and lording it over the surrounding country. Every change of season, every change of weather, indeed, every hour of the day, produces some change in the magical hues and shapes of these mountains, and they are regarded by all the good wives, far and near, as perfect barometers. When the weather is fair and settled, they are clothed in blue and purple, and print their bold
40 outlines on the clear evening sky, but, sometimes, when the rest of the landscape is cloudless, they will gather a hood of gray vapors about their summits, which, in the last rays of the setting sun, will glow and light up like a crown of glory.

At the foot of these fairy mountains, the voyager may

have descried the light smoke curling up from a village whose shingle-roofs gleam among the trees, just where the blue tints of the upland melt away into the fresh green of the nearer landscape. It is a little village, of great antiquity, having been founded by some of the Dutch colonists, in the early times of the province, just about the beginning of the government of the good Peter Stuyvesant (may he rest in peace!) and there were some of the houses of the original settlers standing within a few years, built of small yellow bricks brought from Holland, having latticed windows and gabled fronts, surmounted with weather-cocks.

In that same village, and in one of these very houses (which, to tell the precise truth, was sadly time-worn and weather-beaten), there lived many years since, while the country was yet a province of Great Britain, a simple good-natured fellow, of the name of Rip Van Winkle. He was a descendant of the Van Winkles who figured so gallantly in the chivalrous days of Peter Stuyvesant, and accompanied him to the siege of Fort Christina. He inherited, however, but little of the martial character of his ancestors. I have observed that he was a simple good-natured man; he was, moreover, a kind neighbor, and an obedient hen-pecked husband. Indeed to the latter circumstance might be owing that meekness of spirit which gained him such universal popularity for those men are most apt to be obsequious and conciliating abroad, who are under the discipline of shrew at home. Their tempers, doubtless, are rendered pliant and malleable in the fiery furnace of domestic tribulation, and a curtain lecture is worth all the sermons in the world for teaching the virtues of patience and long-suffering. A termagant wife may, therefore, in some respects, be considered a tolerable blessing, and if so, Rip Van Winkle was thrice blessed.

Certain it is, that he was a great favorite among all the good wives of the village, who, as usual, with the amiable sex, took his part in all family squabbles; and never failed, whenever they talked those matters over in their evening gossipings, to lay all the blame on Dan-

28 **Waterloo Medal**, struck off to commemorate the defeat of Napoleon on June 18, 1815. It was given to all British soldiers engaged in the action and bore the likeness of the Prince Regent (later King George I).
• 28 **Queen Anne's Farthing**, a copper coin minted in the latter part of the reign of Anne (1702-1714). • 65 **Fort Christina**. See note, p. 5

"...continually dinning in his ears about his idleness..."

Van Winkle The children of the village, too, would shout with joy whenever he approached. He assisted at their sports, made their playthings, taught them to fly kites and shoot marbles, and told them long stories of ghosts, witches, and Indians. Whenever he went dodging about the village, he was surrounded by a troop of them, hanging on his skirts, clambering on his back, and playing a thousand tricks on him with impunity; and not a dog would bark at him throughout the neighborhood.

The great error in Rip's composition was an insuperable aversion to all kinds of profitable labor. It could not be from the want of assiduity or perseverance, for he would sit on a wet rock, with a rod as long and heavy as a Tartar's lance, and fish all day without a murmur, even though he should not be encouraged by a single nibble. He would carry a fowling-piece on his shoulder for hours together, trudging through woods and swamps, and up hill and down dale, to shoot a few squirrels or wild pigeons. He would never refuse to assist a neighbor even in the roughest toil, and was a foremost man at all country frolics for husking Indian corn, or building stone-fences, the women of the village, too, used to employ him to run their errands, and to do such little odd jobs as their less obliging husbands would not do for them. In a word Rip was ready to attend to anybody's business but his own, but as to doing family duty, and keeping his farm in order, he found it impossible.

In fact, he declared it was of no use to work on his farm, it was the most pestilent little piece of ground in the whole country, every thing about it went wrong,

and would go wrong, in spite of him. His fences were continually falling to pieces; his cow would either go astray, or get among the cabbages; weeds were sure to grow quicker in his fields than anywhere else; the rain always made a point of setting in just as he had some out-door work to do; so that though his patrimonial estate had dwindled away under his management, acre by acre, until there was little more left than a mere patch of Indian corn and potatoes, yet it was the worst conditioned farm in the neighborhood.

40

His children, too, were as ragged and wild as if they belonged to nobody. His son Rip, an urchin begotten in his own likeness, promised to inherit the habits, with the old clothes of his father. He was generally seen trooping like a colt at his mother's heels, equipped in a pair of his father's cast-off galligaskins, which he had much ado to hold up with one hand, as a fine lady does her train in bad weather.

Rip Van Winkle, however, was one of those happy mortals, of foolish, well-oiled dispositions, who take the world easy, eat white bread or brown, whichever can be got with least thought and trouble, and would rather starve on a penny than work for a pound. If left to himself, he would have whistled life away in perfect contentment; but his wife kept continually dinning in his ears about his idleness, his carelessness, and the ruin he was bringing on his family. Morning, noon, and night, her tongue was incessantly going, and every thing he said or did was sure to produce a torrent of household eloquence. Rip had but one way of replying to all lectures of the kind, and that, by frequent use, had grown into a habit. He shrugged his shoulders, shook his head, cast up his eyes, but said nothing. This, however, always provoked a fresh volley from his wife, so that he was fain to draw off his forces, and take to the outside of the house—the only side which, in truth, belongs to a hen-pecked husband.

Rip's sole domestic adherent was his dog Wolf, who was as much hen-pecked as his master, for Dame Van Winkle regarded them as companions in idleness, and even looked upon Wolf with an evil eye, as the cause of his master's going so often astray. True it is, in all points of spirit befitting an honorable dog, he was as

46 galligaskins, loose, wide trousers

what courage can withstand the ever-during and all-besetting terrors of a woman's tongue? The moment Wolf entered the house his crest fell, his tail drooped to the ground, or curled between his legs, he sneaked about with a gallows air, casting many a sidelong glance at Dame Van Winkle, and at the least flourish of a broomstick or ladle, he would fly to the door with yelping precipitation.

10 Times grew worse and worse with Rip Van Winkle as years of matrimony rolled on, a tart temper never mellows with age, and a sharp tongue is the only edged tool that grows keener with constant use. For a long time he used to console himself, when driven from home, by frequenting a kind of perpetual club of the sages, philosophers, and other idle personages of the vil-
20 lage, which held its sessions on a bench before a small inn, designated by a rubicund portrait of His Majesty George the Third. Here they used to sit in the shade through a long lazy summer's day, talking listlessly over village gossip, or telling endless sleepy stories about nothing. But it would have been worth any statesman's money to have heard the profound discussions that sometimes took place, when by chance an old newspaper fell into their hands from some passing traveller. How solemnly they would listen to the contents, as drawled
30 out by Derrick Van Bummel, the schoolmaster, a dapper learned little man, who was not to be daunted by the most gigantic word in the dictionary; and how sagely they would deliberate upon public events some months after they had taken place.

The opinions of this junto were completely controlled by Nicholas Vedder, a patriarch of the village, and landlord of the inn, at the door of which he took his seat from morning till night, just moving sufficiently to avoid the sun and keep in the shade of a large tree; so that the neighbors could tell the hour by his movements as accurately as by a sun-dial. It is true he was rarely heard to speak, but smoked his pipe incessantly.
40 His adherents, however (for every great man has his adherents), perfectly understood him, and knew how to gather his opinions. When any thing that was read or related displeased him, he was observed to smoke his pipe vehemently, and to send forth short, frequent and angry puffs; but when pleased, he would inhale the smoke slowly and tranquilly, and emit it in light and

moderately, and setting the pipe down, would gravely nod his head in token of perfect approbation.

From even this stronghold the unlucky Rip length routed by his termagant wife, who would suddenly break in upon the tranquillity of the assembly, call the members all to naught, nor was that personage, Nicholas Vedder himself, sacred from the stinging tongue of this terrible virago, who charged him right with encouraging her husband in habits of idleness.

Poor Rip was at last reduced almost to despair, his only alternative, to escape from the labor and clamor of his wife, was to take gun and fowling-piece and stroll away into the woods. Here he would sometimes seat himself at the foot of a tree, and search the contents of his wallet with Wolf, with whom he sympathized as a fellow-sufferer in persecution. "Poor fellow," he would say, "thy mistress leads thee a dog's life, but never mind, my lad, whilst I live thou shalt want a friend to stand by thee!" Wolf would wag his tail, look wistfully in his master's face, and if distressed, would feel pity. I verily believe he reciprocated the sentiment with all his heart.

In a long ramble of the kind on a fine autumn day, Rip had unconsciously scrambled to one of the parts of the Kaatskill mountains. He was a favorite sport of squirrel shooting, and the stillness had echoed and re-echoed with the reports of his gun. Panting and fatigued, he threw himself, late in the afternoon, on a green knoll, covered with mountain laurel, that crowned the brow of a precipice. From an opening between the trees he could overlook all the lower country for many a mile of rich woodland. He saw at a glance the lordly Hudson, far, far below him, moving in its silent but majestic course, with the reflection of the blue cloud, or the sail of a lagging bark, here and there appearing on its glassy bosom, and at last losing itself in the blue highlands.

On the other side he looked down into a deep, solitary glen, wild, lonely, and shagged, the bottom strewn with fragments from the impending cliffs, and lighted by the reflected rays of the setting sun. For some time Rip lay musing on this scene; evening was slowly and silently advancing; the mountains began to throw their blue shadows over the valleys; he saw that it was

dark long before he could reach the village, and he heaved a heavy sigh when he thought of encountering the terrors of Dame Van Winkle.

As he was about to descend, he heard a voice from a distance, hallooing, "Rip Van Winkle! Rip Van Winkle!" He looked round, but could see nothing but a crow winging its solitary flight across the mountain. He thought his fancy must have deceived him, and turned again to descend, when he heard the same cry ring through the still evening air; "Rip Van Winkle! Rip Van Winkle!"—at the same time Wolf bristled up his back, and giving a low growl, skulked to his master's side, looking fearfully down into the glen. Rip now felt a vague apprehension stealing over him; he looked anxiously in the same direction, and perceived a strange figure slowly toiling up the rocks, and bending under the weight of something he carried on his back. He was surprised to see any human being in this lonely and unfrequented place, but supposing it to be some one of the neighborhood in need of his assistance, he hastened down to yield it.

On nearer approach he was still more surprised at the singularity of the stranger's appearance. He was a short square-built old fellow, with thick bushy hair, and a grizzled beard. His dress was of the antique Dutch fashion—a cloth jerkin strapped round the waist—several pair of breeches, the outer one of ample volume, decorated with rows of buttons down the sides, and bunches at the knees. He bore on his shoulder a stout keg, that seemed full of liquor, and made signs for Rip to approach and assist him with the load. Though rather shy and distrustful of this new acquaintance, Rip complied with his usual alacrity; and mutually relieving one another, they clambered up a narrow gully, apparently the dry bed of a mountain torrent. As they ascended, Rip every now and then heard long rolling peals, like distant thunder, that seemed to issue out of a deep ravine, or rather cleft, between lofty rocks toward which their rugged path conducted. He paused for an instant, but supposing it to be the muttering of one of those transient thunder-showers which often take place in mountain heights, he proceeded. Passing through the ravine, they came to a hollow, like a small amphitheatre, surrounded by perpendicular precipices, over the brinks of which impending trees shot their branches, so that you only caught glimpses of the azure sky and the bright evening-cloud. During the whole time Rip and his companion had labored on in silence; for

"...talking listlessly...telling endless sleepy stories."

though the former marvelled greatly what could be the object of carrying a keg of liquor up this wild mountain yet there was something strange and incomprehensible about the unknown, that inspired awe and checked familiarity.

On entering the amphitheatre, new objects of wonder presented themselves. On a level spot in the centre was a company of odd-looking personages playing at ninepins. They were dressed in a quaint outlandish fashion; some wore short doublets, others jerkins, with long knives in their belts, and most of them had enormous breeches of similar style with that of the guide's. Their visages too, were peculiar: one had a large beard, broad face, and small piggish eyes; the face of another seemed to consist entirely of nose, and was surmounted by a white sugar-loaf hat, set off with a little red cock's tail. They all had beards, of various shapes and colors. There was one who seemed to be the commander. He was a stout old gentleman, with a weather-beaten countenance; he wore a lace doublet, broad belt and hanger, high crowned hat and feather, red stockings, and high-heeled shoes, with roses in them. The whole group reminded Rip of the figures in an old Flemish painting, in the parlor of Dominie Van Schaick, the village parson, and which had been brought over from Holland at the time of the settlement.

What seemed particularly odd to Rip was, that though these folks were evidently amusing themselves, yet the

59 beard. 1819 head The 1848 text is probably an error • 67 roses
rosettes

maintained the gravest faces, the most mysterious silence, and were, withal, the most melancholy party of pleasure he had ever witnessed. Nothing interrupted the stillness of the scene but the noise of the balls, which, whenever they were rolled, echoed along the mountains like rumbling peals of thunder.

As Rip and his companion approached them, they suddenly desisted from their play, and stared at him with such fixed statue-like gaze, and such strange, uncouth, 10 lack-lustre countenances, that his heart turned within him, and his knees smote together. His companion now emptied the contents of the keg into large flagons, and made signs to him to wait upon the company. He obeyed with fear and trembling, they quaffed the liquor in profound silence, and then returned to their game.

By degrees Rip's awe and apprehension subsided. He even ventured, when no eye was fixed upon him, to taste the beverage, which he found had much of the flavor of excellent Hollands. He was naturally a thirsty soul, and 20 was soon tempted to repeat the draught. One taste provoked another; and he reiterated his visits to the flagon so often that at length his senses were overpowered, his eyes swam in his head, his head gradually declined, and he fell into a deep sleep.

On waking, he found himself on the green knoll whence he had first seen the old man of the glen. He rubbed his eyes—it was a bright sunny morning. The birds were hopping and twittering among the bushes, and the eagle was wheeling aloft, and breasting the pure 30 mountain breeze. "Surely," thought Rip, "I have not slept here all night." He recalled the occurrences before he fell asleep. The strange man with a keg of liquor—the mountain ravine—the wild retreat among the rocks—the wobegone party at nine-pins—the flagon—"Oh! that flagon! that wicked flagon!" thought Rip—"what excuse shall I make to Dame Van Winkle!"

He looked round for his gun, but in place of the clean well-oiled fowling-piece, he found an old firelock lying by him, the barrel incrustated with rust, the lock falling off, 40 and the stock worm-eaten. He now suspected that the grave roysters of the mountain had put a trick upon him, and, having dosed him with liquor had robbed him of his gun. Wolf, too, had disappeared, but he might have strayed away after a squirrel or partridge. He whistled after him and shouted his name, but all in vain; the echoes repeated his whistle and shout, but no dog was

He determined to revisit the scene of the last ever gambol, and if he met with any of the party, to deliver his dog and gun. As he rose to walk, he found his stiff in the joints, and wanting in his usual act. "These mountain beds do not agree with me," thought Rip, "and if this frolic should lay me up with a fit of rheumatism, I shall have a blessed time with Dame Winkle." With some difficulty he got down into the glen. He found the gully up which he and his companion had ascended the preceding evening, but to his astonishment a mountain stream was now foaming down it, rushing from rock to rock, and filling the glen with babbling murmurs. He, however, made shift to scramble up the sides, working his toilsome way through thickets of birch, sassafras, and witch-hazel, and sometimes tripped up or entangled by the wild grapevines that twisted in coils or tendrils from tree to tree, and spread a kin network in his path.

At length he reached to where the ravine had opened through the cliffs to the amphitheatre, but no trace of such opening remained. The rocks presented a high impenetrable wall over which the torrent came tumbling a sheet of feathery foam, and fell into a broad deep black from the shadows of the surrounding forest. Then, poor Rip was brought to a stand. He again whistled after his dog; he was only answered by the cawing of a flock of idle crows, sporting high in air above a dry tree that overhung a sunny precipice; and the secure in their elevation, seemed to look down at him at the poor man's perplexities. What was to be the morning was passing away, and Rip felt famished with want of his breakfast. He grieved to give up his dog and gun, he dreaded to meet his wife; but it would do no good to starve among the mountains. He shook his head, loaded the rusty firelock, and, with a heart full of grief and anxiety, turned his steps homeward.

As he approached the village he met a number of people, but none whom he knew, which somewhat surprised him, for he had thought himself acquainted with everyone in the country round. Their dress, too, was of a different fashion from that to which he was accustomed. They all stared at him with equal marks of surprise whenever they cast their eyes upon him, and never stroked their chins. The constant recurrence of this

ture induced Rip, involuntarily, to do the same, when, to his astonishment, he found his beard had grown a foot long!

He had now entered the skirts of the village. A troop of strange children ran at his heels, hooting after him, and pointing at his gray beard. The dogs, too, not one of which he recognized for an old acquaintance, barked at him as he passed. The very village was altered, it was larger and more populous. There were rows of houses which he had never seen before, and those which had been his familiar haunts had disappeared. Strange names were over the doors—strange faces at the windows—every thing was strange. His mind now misgave him, he began to doubt whether both he and the world around him were not bewitched. Surely this was his native village, which he had left but the day before. There stood the Kaatskill mountains—there ran the silvery Hudson at a distance—there was every hill and dale precisely as it had always been—Rip was sorely perplexed.—“That flagon last night,” thought he, “has addled my poor head sadly.”

It was with some difficulty that he found the way to his own house, which he approached with silent awe, expecting every moment to hear the shrill voice of Dame Van Winkle. He found the house gone to decay—the roof fallen in, the windows shattered, and the doors off the hinges. A half-starved dog that looked like Wolf was skulking about it. Rip called him by name, but the cur snarled, showed his teeth, and passed on. This was an unkind cut indeed—“My very dog,” sighed poor Rip, “has forgotten me!”

He entered the house, which, to tell the truth, Dame Van Winkle had always kept in neat order. It was empty, forlorn, and apparently abandoned. This desolateness overcame all his connubial fears—he called loudly for his wife and children—the lonely chambers rang for a moment with his voice, and then all again was silence.

He now hurried forth, and hastened to his old resort, the village inn—but it too was gone. A large rickety wooden building stood in its place, with great gaping windows, some of them broken and mended with old hats and petticoats, and over the door was painted, “the Union Hotel, by Jonathan Doolittle.” Instead of the great tree that used to shelter the quiet little Dutch inn of yore, there was now reared a tall naked pole, with something on the top that looked like a red night-cap, and from it was fluttering a flag, on which was a singular

assemblage of stars and stripes—all this was strange and incomprehensible. He recognized on the sign, however, the ruby face of King George, under which he had smoked so many a peaceful pipe; but even this was singularly metamorphosed. The red coat was changed for one blue and buff, a sword was held in the hand instead of sceptre, the head was decorated with a cocked hat, and underneath was painted in large characters, *GENERAL WASHINGTON*.

There was, as usual, a crowd of folk about the door, but none that Rip recollected. The very character of the people seemed changed. There was a busy, bustling, disputatious tone about it, instead of the accustomed phlegm and drowsy tranquillity. He looked in vain for the same Nicholas Vedder, with his broad face, double chin, and fair long pipe, uttering clouds of tobacco-smoke instead of idle speeches, or Van Bummel, the schoolmaster, dealing forth the contents of an ancient newspaper. In place of these, a lean, bilious-looking fellow, with his pockets full of handbills, was haranguing vehemently about rights of citizens—elections—members of congress—liberty Bunker’s Hill—heroes of seventy-six—and other words which were a perfect Babylonish jargon to the bewildered Van Winkle.

The appearance of Rip, with his long grizzled beard, his rusty fowling-piece, his uncouth dress, and an army of women and children at his heels, soon attracted the attention of the tavern politicians. They crowded round him, eyeing him from head to foot with great curiosity. The orator bustled up to him, and, drawing him partly aside, inquired “on which side he voted?” Rip stared in vacant stupidity. Another short but busy little fellow pulled him by the arm, and, rising on tiptoe, inquired in his ear, “Whether he was Federal or Democrat?” Rip was equally at a loss to comprehend the question, when a knowing, self-important old gentleman, in a sharp cocked hat, making his way through the crowd, putting them to the right and left with his elbows as he passed, and planting himself before Van Winkle, with one arm akimbo, the other resting on his cane, his keen eyes and sharp nose penetrating, as it were, into his very soul, demanded in an austere tone, “what brought him to the election with

46 red night-cap, the “liberty cap.” See Bryant’s “The Antiquity of Freedom,” p. 477. • 70 Babylonish jargon, unintelligible speech, apparently an allusion to the Tower of Babel, Genesis 11:1-9. • 81 Federal or Democrat? i.e., a Federalist or a supporter of Jefferson.

gun on his shoulder, and a mob at his heels, and whether he meant to breed a riot in the village?"—"Alas! gentlemen," cried Rip, somewhat dismayed, "I am a poor quiet man, a native of the place, and a loyal subject of the king, God bless him!"

Here a general shout burst from the by-standers—"A tory! a tory! a spy! a refugee! hustle him! away with him!" It was with great difficulty that the self-important man in the cocked hat restored order, and, having
10 assumed a tenfold austerity of brow, demanded again of the unknown culprit, what he came there for, and whom he was seeking? The poor man humbly assured him that he meant no harm, but merely came there in search of some of his neighbors, who used to keep about the tavern

"Well—who are they?—name them"

Rip bethought himself a moment, and inquired, "Where's Nicholas Vedder?"

There was a silence for a little while, when an old man
20 replied, in a thin piping voice, "Nicholas Vedder! why, he is dead and gone these eighteen years! There was a wooden tombstone in the church-yard that used to tell all about him, but that's rotten and gone too."

"Where's Brom Dutcher?"

"Oh, he went off to the army in the beginning of the war; some say he was killed at the storming of Stony Point—others say he was drowned in a squall at the foot of Anthony's Nose I don't know—he never came back again"

30 "Where's Van Bummel, the schoolmaster?"

"He went off to the wars too, was a great militia general, and is now in congress"

Rip's heart died away at hearing of these sad changes in his home and friends, and finding himself thus alone in the world Every answer puzzled him, too, by treating of such enormous lapses of time, and of matters which he could not understand war—congress—Stony Point;—he had no courage to ask after any more friends, but cried out in despair, "Does nobody here know Rip Van
40 Winkle?"

"Oh, Rip Van Winkle!" exclaimed two or three, "Oh, to be sure! that's Rip Van Winkle yonder, leaning against the tree"

Rip looked, and beheld a precise counterpart of himself, as he went up the mountain. apparently as lazy, and certainly as ragged. The poor fellow was now com-

pletely confounded. He doubted his own identity whether he was himself or another man. In the midst of his bewilderment, the man in the cocked hat died who he was, and what was his name?

"God knows," exclaimed he, at his wit's end, "not myself—I'm somebody else—that's me yonder that's somebody else got into my shoes—I was last night, but I fell asleep on the mountain, and changed my gun, and every thing's changed, changed, and I can't tell what's my name, or who

The by-standers began now to look at each other and wink significantly, and tap their fingers against their foreheads. There was a whisper, also, about the gun, and keeping the old fellow from doing at the very suggestion of which the self-important man in the cocked hat retired with some precipitation. At this critical moment a fresh comely woman came through the throng to get a peep at the gray man. She had a chubby child in her arms, frightened at his looks, began to cry. "Hush, R. she, "hush, you little fool; the old man won't hear. The name of the child, the air of the mother, though her voice, all awakened a train of recollection in his mind. "What is your name, my good woman?"

"Judith Gardenier."

"And your father's name?"

"Ah, poor man, Rip Van Winkle was his name. It's twenty years since he went away from home with his gun, and never has been heard of since—his children have come home without him, but whether he shot himself or was carried away by the Indians, nobody can tell. I have but a little girl"

Rip had but one more question to ask; but he asked it with a faltering voice:

"Where's your mother?"

"Oh, she too had died but a short time since. She broke a blood-vessel in a fit of passion at a New York peddler."

There was a drop of comfort, at least, in the intelligence. The honest man could contain himself no longer. He caught his daughter and her child in his arms, and cried—"I am your father!" cried he—"Young Rip Van

26 Stony Point, a rocky headland on the west bank of the Hudson, a few miles below West Point • 28 Anthony's Nose. See I

once—old Rip Van Winkle now!—Does nobody know poor Rip Van Winkle?"

All stood amazed, until an old woman, tottering out from among the crowd, put her hand to her brow, and peering under it in his face for a moment, exclaimed, 'Sure enough! it is Rip Van Winkle—it is himself!—Welcome home again, old neighbor—Why, where have you been these twenty long years?"

Rip's story was soon told, for the whole twenty years he had been to him but as one night. The neighbors stared when they heard it, some were seen to wink at each other, and put their tongues in their cheeks—and the self-important man in the cocked hat, who, when the alarm was over, had returned to the field, screwed down the corners of his mouth, and shook his head—upon which there was a general shaking of the head throughout the assemblage.

It was determined, however, to take the opinion of old Peter Vanderdonk, who was seen slowly advancing up the road. He was a descendant of the historian of that name, who wrote one of the earliest accounts of the province. Peter was the most ancient inhabitant of the village, and well versed in all the wonderful events and traditions of the neighborhood. He recollected Rip at once, and corroborated his story in the most satisfactory manner. He assured the company that it was a fact, handed down from his ancestor the historian, that the Kaatskill mountains had always been haunted by strange beings. That it was affirmed that the great Hendrick Hudson, the first discoverer of the river and country, kept a kind of vigil there every twenty years, with his crew of the Half-moon, being permitted in this way to revisit the scenes of his enterprise, and keep a guardian eye upon the river, and the great city called by his name. That his father had once seen them in their old Dutch dresses playing at nine-pins in a hollow of the mountain; and that he himself had heard, one summer afternoon, the sound of their balls, like distant peals of thunder.

To make a long story short, the company broke up, and returned to the more important concerns of the election. Rip's daughter took him home to live with her, she had a snug, well-furnished house, and a stout cheery farmer for a husband, whom Rip recollected for one of the urchins that used to climb upon his back. As to Rip's son and heir, who was the ditto of himself, seen leaning against the tree, he was employed to work on the farm;

but evinced an hereditary disposition to attend to a thing else but his business.

Rip now resumed his old walks and habits; he so found many of his former cronies, though all rather t worse for the wear and tear of time, and preferred making friends among the rising generation, with whom soon grew into great favor.

Having nothing to do at home, and being arrived at that happy age when a man can be idle with impunity, he took his place once more on the bench at the ir door, and was revered as one of the patriarchs of the village, and a chronicle of the old times "before the war." It was some time before he could get into the regular track of gossip, or could be made to comprehend the strange events that had taken place during his torpor. How that there had been a revolutionary war—that the country had thrown off the yoke of old England—that, instead of being a subject of his Majesty George the Third, he was now a free citizen of the United States. Rip, in fact, was no politician, the changes of states and empires made but little impression on him, but there was one species of despotism under which he had long groaned, and that was—petticoat government. Happy that was at an end, he had got his neck out of the yoke of matrimony, and could go in and out whenever pleased, without dreading the tyranny of Dame V. Winkle. Whenever her name was mentioned, however, he shook his head, shrugged his shoulders, and cast up his eyes, which might pass either for an expression of resignation to his fate, or joy at his deliverance.

He used to tell his story to every stranger that arrived at Mr. Doolittle's hotel. He was observed, at first, to vary on some points every time he told it, which was doubtless, owing to his having so recently awaked. He at last settled down precisely to the tale I have related, and not a man, woman, or child in the neighborhood but knew it by heart. Some always pretended to doubt the reality of it, and insisted that Rip had been out of his head, and that this was one point on which he always remained flighty. The old Dutch inhabitants, however, almost universally gave it full credit. Even to this day

20 the historian, Adriaen Van der Donck (1620-1655?), author of description of New Netherland, in Dutch, published at Amsterdam in 1655 • 34 great city Hudson, on the east bank of the river, across from the Catskills, was a thriving shipping center in Irving's day

they never hear a thunderstorm of a summer afternoon about the Kaatskill, but they say Hendrick Hudson and his crew are at their game of nine-pins; and it is a common wish of all henpecked husbands in the neighborhood, when life hangs heavy on their hands, that they might have a quieting draught out of Rip Van Winkle's flagon.

NOTE

The foregoing Tale, one would suspect, had been suggested to Mr Knickerbocker by a little German superstition about the Emperor Frederick *der Rothbart*, and the Kypphauser mountain the subjoined note, however, which he had appended to the tale, shows that it is an absolute fact, narrated with his usual fidelity

"The story of Rip Van Winkle may seem incredible to many, but nevertheless I give it my full belief, for I know the vicinity of our old Dutch settlements to have been very subject to marvellous events and appearances. Indeed, I have heard many stranger stories than this, in the villages along the Hudson all of which were too well authenticated to admit of a doubt. I have even talked with Rip Van Winkle myself, who, when last I saw him, was a very venerable old man, and so perfectly rational and consistent on every other point, that I think no conscientious person could refuse to take this into the bargain; nay, I have seen a certificate on the subject taken before a country justice and signed with a cross, in the justice's own handwriting. The story, therefore, is beyond the possibility of doubt.

DK"

POSTSCRIPT

The following are travelling notes from a memorandum-book of Mr Knickerbocker

The Kaatsberg, or Catskill Mountains, have always been a region full of fable. The Indians considered them the abode of spirits, who influenced the weather, spreading sunshine or clouds over the landscape, and sending good or bad hunting seasons. They were ruled by an old squaw spirit, said to be their mother. She dwelt on the highest peak of the Catskills, and had charge of the doors of day and night to open and shut them at the proper hour. She hung up the new moons in the skies, and cut up the old ones into stars. In times

of drought, if properly propitiated, she would send summer clouds out of cobwebs and morning dew from the crest of the mountain, flake, like flakes of carded cotton, to float in the air until, dissolved by the heat of the sun, they would fall in gentle showers, causing the grass to spring, the corn to ripen, and the corn to grow an inch an hour. If, however, she would brew up clouds to bring rain, sitting in the midst of them like a bottle in a spider in the midst of its web; and when these broke, would betide the valleys'

In old times, say the Indian traditions, there was a kind of Manitou or Spirit, who kept about the recesses of the Catskill Mountains, and took a miscellaneous pleasure in wreaking all kinds of evils and vengeance upon the red men. Sometimes he would assume the form of a bear, a panther, or a deer, lead the best hunter a weary chase through tangled forests and over ragged rocks, and then spring off with a loud laugh, leaving him aghast on the brink of a boiling or raging torrent.

The favorite abode of this Manitou is still supposed to be a great rock or cliff on the loneliest part of the mountains, and, from the flowering vines which grow about it, and the wild flowers which abound in its neighborhood, is known by the name of the Garden of Eden. Near the foot of it is a small lake, the haunt of a solitary bittern, with water-snakes basking in the sun on the leaves of the pond-lilies which lie on the water. This place was held in great awe by the Indians, and that the boldest hunter would not pursue his game into its precincts. Once upon a time, however, a hunter had lost his way, penetrated to the garden rock, and he beheld a number of gourds placed in the shade of the trees. One of these he seized and made off with, but in the hurry of his retreat he let it fall among the rocks, when a great stream gushed forth, which swept him away and swept him down precipices, where he dashed to pieces, and the stream made its way to the Hudson, and continues to flow to the present day under the identical stream known by the name of the Kaatskill.

10 *der Rothbart*, the Redbeard: Frederick I (better known as Barbarossa), emperor of the Holy Roman Empire, 1152-1190 according to peasant tradition, in a mountain in central Italy.
Postscript, added after 1819

The Legend of Sleepy Hollow

Found Among the Papers of the
Late Diedrich Knickerbocker

*A pleasing land of drowsy head it was,
Of dreams that wave before the half-shut eye;
And of gay castles in the clouds that pass,
For ever flushing round a summer sky.*
CASTLE OF INDOLENCE

In the bosom of one of those spacious coves which indent the eastern shore of the Hudson, at that broad expansion of the river denominated by the ancient Dutch navigators the Tappan Zee, and where they always prudently shortened sail, and implored the protection of St. Nicholas when they crossed, there lies a small market-town or rural port, which by some is called Greensburgh, but which is more generally and properly known by the name of Tarry Town. This name was given, we are told, in former days, by the good housewives of the adjacent country, from the inveterate propensity of their husbands to linger about the village tavern on market days. Be that as it may, I do not vouch for the fact, but merely advert to it, for the sake of being precise and authentic. Not far from this village, perhaps about two miles, there is a little valley, or rather lap of land, among high hills, which is one of the quietest places in the whole world. A small brook glides through it, with just murmur enough to lull one to repose; and the occasional whistle of a quail, or tapping of a woodpecker, is almost the only sound that ever breaks in upon the uniform tranquillity.

I recollect that, when a stripling, my first exploit in squirrel-shooting was in a grove of tall walnut-trees that shades one side of the valley. I had wandered into it at noon time, when all nature is peculiarly quiet, and was startled by the roar of my own gun, as it broke the Sabbath stillness around, and was prolonged and reverberated by the angry echoes. If ever I should wish for a retreat, whither I might steal from the world and its distractions, and dream quietly away the remnant of a

troubled life, I know of none more promising than this little valley.

From the listless repose of the place, and the peculiar character of its inhabitants, who are descendants from the original Dutch settlers, this sequestered glen has long been known by the name of SLEEPY HOLLOW, and its rustic lads are called the Sleepy Hollow Boys throughout all the neighboring country. A drowsy, dreamy influence seems to hang over the land, and to pervade the very atmosphere. Some say that the place was bewitched by a high German doctor, during the early days of the settlement, others, that an old Indian chief, the prophet or wizard of his tribe, held his powwows there before the country was discovered by Master Hendrick Hudson. Certain it is, the place still continues under the sway of some witching power, that holds a spell over the minds of the good people, causing them to walk in a continual reverie. They are given to all kinds of marvellous beliefs, are subject to trances and visions, and frequently see strange sights, and hear music and voices in the air. The whole neighborhood abounds with local tales, haunted spots, and twilight superstitions, stars shoot and meteors glare oftener across the valley than in any other part of the country, and the nightmare, with her whole nine fold, seems to make it the favorite scene of her gambols.

The dominant spirit, however, that haunts this enchanted region, and seems to be commander-in-chief of all the powers of the air, is the apparition of a figure on horseback without a head. It is said by some to be the ghost of a Hessian trooper, whose head had been carried away by a cannon-ball, in some nameless battle during the revolutionary war; and who is ever and anon seen by the country folk, hurrying along in the gloom of night, as if on the wings of the wind. His haunts are not confined to the valley, but extend at times to the adjacent roads, and especially to the vicinity of a church

Castle of Indolence (1748), an English poem in imitation of Spenser, by James Thomson (1700-1748). The lines appear in Bk. I • 9 Tarry Town, one of the first Dutch settlements on the Hudson. In folk belief the nightmare was a demon, nine fold refers to her offspring (from foals) or familiars. See note, pp. 146 and 148

at no great distance. Indeed, certain of the most authentic historians of those parts, who have been careful in collecting and collating the floating facts concerning this spectre, allege that the body of the trooper, having been buried in the church-yard, the ghost rides forth to the scene of battle in nightly quest of his head; and that the rushing speed with which he sometimes passes along the Hollow, like a midnight blast, is owing to his being belated, and in a hurry to get back to the church-yard
10 before daybreak

Such is the general purport of this legendary superstition, which has furnished materials for many a wild story in that region of shadows, and the spectre is known, at all the country firesides, by the name of the Headless Horseman of Sleepy Hollow

It is remarkable that the visionary propensity I have mentioned is not confined to the native inhabitants of the valley, but is unconsciously imbibed by every one who resides there for a time. However wide awake they may
20 have been before they entered that sleepy region, they are sure, in a little time, to inhale the witching influence of the air, and begin to grow imaginative—to dream dreams, and see apparitions

I mention this peaceful spot with all possible laud; for it is in such little retired Dutch valleys, found here and there embosomed in the great State of New-York, that population, manners, and customs, remain fixed; while the great torrent of migration and improvement, which is making such incessant changes in other parts
30 of this restless country, sweeps by them unobserved. They are like those little nooks of still water which border a rapid stream, where we may see the straw and bubble riding quietly at anchor, or slowly revolving in their mimic harbor, undisturbed by the rush of the passing current. Though many years have elapsed since I trod the drowsy shades of Sleepy Hollow, yet I question whether I should not still find the same trees and the same families vegetating in its sheltered bosom.

In this by-place of nature, there abode, in a remote
40 period of American history, that is to say, some thirty years since, a worthy wight of the name of Ichabod Crane; who sojourned, or, as he expressed it, "tarried," in Sleepy Hollow, for the purpose of instructing the children of the vicinity. He was a native of Connecticut; a State which supplies the Union with pioneers for the mind as well as for the forest, and sends forth yearly its legions of frontier woodsmen and country schoolmasters.

The cognomen of Crane was not inapplicable to his person. He was tall, but exceedingly lank, with narrow shoulders, long arms and legs, hands that dangled a mile
50 out of his sleeves, feet that might have served for shovels, and his whole frame most loosely hung together. His head was small, and flat at top, with huge ears, large green glassy eyes, and a long snipe nose, so that it looked like a weather-cock, perched upon his spindle neck, to tell which way the wind blew. To see him striding along the profile of a hill on a windy day, with his clothes bagging and fluttering about him, one might have mistaken him for the genius of famine descending upon the earth, or some scarecrow eloped from a cornfield. 6

His school-house was a low building of one large room, rudely constructed of logs; the windows partly glazed, and partly patched with leaves of old copy-books. It was most ingeniously secured at vacant hours, by a withe twisted in the handle of the door, and stakes set against the window shutters; so that, though a thief might get in with perfect ease, he would find some embarrassment in getting out; an idea most probably borrowed by the architect, Yost Van Houten, from the mystery of an eel-pot. The school-house stood in a rather lonely but pleasant situation, just at the foot of a woody hill, with a brook running close by, and a formidable birch tree growing at one end of it. From hence the low murmur of his pupils' voices, conning over their lessons, might be heard in a drowsy summer's day, like the hum of a bee-hive, interrupted now and then by the authoritative voice of the master, in the tone of menace or command; or, peradventure, by the appalling sound of the birch, as he urged some tardy loiterer along the flowery path of knowledge. Truth to say, he was a conscientious man, and ever bore in mind the golden maxim. "Spare the rod and spoil the child."—Ichabod Crane's scholars certainly were not spoiled.

I would not have it imagined, however, that he was one of those cruel potentates of the school, who joy in the smart of their subjects; on the contrary, he administered justice with discrimination rather than severity; taking the burthen off the backs of the weak, and

10 before daybreak. See the actions of the ghost of Hamlet's father, in *Hamlet*, Act I • 59 genius, guiding spirit • 82 "Spare . . . child" See Proverbs 13-24 "He that spareth his rod hateth his son" In the form used here the maxim first appeared in Part II (1664) of *Hudibras*, by Samuel Butler (1612-1680), an English satirical poet

laying it on those of the strong. Your mere puny strip-ling, that winced at the least flourish of the rod, was passed by with indulgence, but the claims of justice were satisfied by inflicting a double portion on some little, tough, wrong-headed, broad-skirted Dutch urchin, who sulked and swelled and grew dogged and sullen beneath the birch. All this he called "doing his duty by their parents," and he never inflicted a chastisement without following it by the assurance, so consolatory to the smarting urchin, that "he would remember it, and thank him for it the longest day he had to live"

When school hours were over, he was even the companion and playmate of the larger boys, and on holiday afternoons would convoy some of the smaller ones home, who happened to have pretty sisters, or good housewives for mothers, noted for the comforts of the cupboard. Indeed it behooved him to keep on good terms with his pupils. The revenue arising from his school was small, and would have been scarcely sufficient to furnish him with daily bread, for he was a huge feeder, and though lank, had the dilating powers of an anaconda, but to help out his maintenance, he was, according to country custom in those parts, boarded and lodged at the houses of the farmers, whose children he instructed. With these he lived successively a week at a time; thus going the rounds of the neighborhood, with all his worldly effects tied up in a cotton handkerchief.

That all this might not be too onerous on the purses of his rustic patrons, who are apt to consider the costs of schooling a grievous burden, and schoolmasters as mere drones, he had various ways of rendering himself both useful and agreeable. He assisted the farmers occasionally in the lighter labors of their farms, helped to make hay; mended the fences; took the horses to water, drove the cows from pasture; and cut wood for the winter fire. He laid aside, too, all the dominant dignity and absolute sway with which he lorded it in his little empire, the school, and became wonderfully gentle and ingratiating. He found favor in the eyes of the mothers, by petting the children, particularly the youngest; and like the lion bold, which whilom so magnanimously the lamb did hold, he would sit with a child on one knee, and rock a cradle with his foot for whole hours together.

In addition to his other vocations, he was the singing-master of the neighborhood, and picked up many bright shillings by instructing the young folks in psalmody. It was a matter of no little vanity to him, on Sundays, to

take his station in front of the church gallery, with a band of chosen singers, where, in his own mind, he completely carried away the palm from the parson. Certain it is, his voice resounded far above all the rest of the congregation, and there are peculiar quavers still to be heard in that church, and which may even be heard half a mile off, quite to the opposite side of the mill-pond, on a still Sunday morning, which are said to be legitimately descended from the nose of Ichabod Crane. Thus, by divers little make-shifts in that ingenious way which is commonly denominated "by hook and by crook," the worthy pedagogue got on tolerably enough, and was thought, by all who understood nothing of the labor of headwork, to have a wonderfully easy life of it.

The schoolmaster is generally a man of some importance in the female circle of a rural neighborhood, being considered a kind of idle gentlemanlike personage, of vastly superior taste and accomplishments to the rough country swains, and, indeed, inferior in learning only to the parson. His appearance, therefore, is apt to occasion some little stir at the tea-table of a farmhouse, and the addition of a supernumerary dish of cakes or sweetmeats, or, peradventure, the parade of a silver tea-pot. Our man of letters, therefore, was peculiarly happy in the smiles of all the country damsels. How he would figure among them in the church-yard, between services on Sundays! gathering grapes for them from the wild vines that overrun the surrounding trees, reciting for their amusement all the epitaphs on the tombstones, or sauntering, with a whole bevy of them, along the banks of the adjacent mill-pond, while the more bashful country bumpkins hung sheepishly back, envying his superior elegance and address.

From his half itinerant life, also, he was a kind of travelling gazette, carrying the whole budget of local gossip from house to house; so that his appearance was always greeted with satisfaction. He was, moreover, esteemed by the women as a man of great erudition, for he had read several books quite through, and was a perfect master of Cotton Mather's history of New-England.

40 the lion bold . . . , a couplet which appears in the 1747 edition of *The New England Primer* • 58 "by . . . crook," a phrase from "Colyn Cloute" (1523), by the English poet, John Skelton (1460?-1529) • 87 Cotton Mather's history, a reference either to the *Memorable Providences* (1689) or to *Wonders of the Invisible World* (1693) See p. 145

Witchcraft, in which, by the way, he most firmly and potently believed.

He was, in fact, an odd mixture of small shrewdness and simple credulity. His appetite for the marvellous, and his powers of digesting it, were equally extraordinary, and both had been increased by his residence in this spell-bound region. No tale was too gross or monstrous for his capacious swallow. It was often his delight, after his school was dismissed in the afternoon, to stretch
10 himself on the rich bed of clover, bordering the little brook that whimpered by his school-house, and there con over old Mather's direful tales, until the gathering dusk of the evening made the printed page a mere mist before his eyes. Then, as he wended his way, by swamp and stream and awful woodland, to the farmhouse where he happened to be quartered, every sound of nature, at that witching hour, fluttered his excited imagination: the moan of the whip-poor-will from the hill-side, the boding cry of the tree-toad, that harbinger of storm, the
20 dreary hooting of the screech-owl, or the sudden rustling in the thicket of birds frightened from their roost. The fire-flies, too, which sparkled most vividly in the darkest places, now and then startled him, as one of uncommon brightness would stream across his path, and if, by chance, a huge blockhead of a beetle came winging his blundering flight against him, the poor varlet was ready to give up the ghost, with the idea that he was struck with a witch's token. His only resource on such occasions, either to drown thought, or drive away evil spirits, was
30 to sing psalm tunes,—and the good people of Sleepy Hollow, as they sat by their doors of an evening, were often filled with awe, at hearing his nasal melody, "in linked sweetness long drawn out," floating from the distant hill, or along the dusky road.

Another of his sources of fearful pleasure was, to pass long winter evenings with the old Dutch wives, as they sat spinning by the fire, with a row of apples roasting and spluttering along the hearth, and listen to their marvellous tales of ghosts and goblins, and haunted fields,
40 and haunted brooks, and haunted bridges, and haunted houses, and particularly of the headless horseman, or galloping Hessian of the Hollow, as they sometimes called him. He would delight them equally by his anecdotes of witchcraft, and of the direful omens and portentous sights and sounds in the air, which prevailed in the earlier times of Connecticut; and would frighten

them wofully with speculations upon comets and shooting stars; and with the alarming fact that the world did absolutely turn round, and that they were half the time topsy-turvy!

But if there was a pleasure in all this, while snug cuddling in the chimney corner of a chamber that was all of a ruddy glow from the crackling wood fire, and where, of course, no spectre dared to show his face, was dearly purchased by the terrors of his subsequent walk homewards. What fearful shapes and shadows beset his path amidst the dim and ghastly glare of a snow night!—With what wistful look did he eye every twinkling ray of light streaming across the waste fields from some distant window!—How often was he appalled by some shrub covered with snow, which, like a sheeted spectre, beset his very path!—How often did he shrink with curdling awe at the sound of his own steps on the frosty crust beneath his feet, and dread to look over his shoulder, lest he should behold some uncouth being tramping close behind him!—and how often was he thrown into complete dismay by some rushing blast howling among the trees, in the idea that it was the Galloping Hessian on one of his nightly scourings!

All these, however, were mere terrors of the night phantoms of the mind that walk in darkness, and though he had seen many spectres in his time, and been more than once beset by Satan in divers shapes, in his long perambulations, yet daylight put an end to all the evils; and he would have passed a pleasant life of it in despite of the devil and all his works, if his path had not been crossed by a being that causes more perplexity to mortal man than ghosts, goblins, and the whole race of witches put together, and that was—a woman.

Among the musical disciples who assembled, one evening in each week, to receive his instructions in psalmody was Katrina Van Tassel, the daughter and only child of a substantial Dutch farmer. She was a blooming lass, fresh eighteen, plump as a partridge; ripe and melting and rosy cheeked as one of her father's peaches, and universally famed, not merely for her beauty, but her expectations. She was withal a little of a coquette.

18 *whip-poor-will*. "The whip-poor-will is a bird which is only heard at night. It receives its name from its note, which is thought to resemble those words" (Irving's note, added after 1820) • 32 "in linked sweetness long drawn out," a line from "L'Allegro" by John Milton (1608-1674)

might be perceived even in her dress, which was a mixture of ancient and modern fashions, as most suited to set off her charms. She wore the ornaments of pure yellow gold, which her great-great-grandmother had brought over from Saardam, the tempting stomacher of the olden time, and withal a provokingly short petticoat, to display the prettiest foot and ankle in the country round.

Ichabod Crane had a soft and foolish heart towards the sex; and it is not to be wondered at, that so tempting a morsel soon found favor in his eyes, more especially after he had visited her in her paternal mansion. Old Baltus Van Tassel was a perfect picture of a thriving, contented, liberal-hearted farmer. He seldom, it is true, sent either his eyes or his thoughts beyond the boundaries of his own farm, but within those every thing was snug, happy, and well-conditioned. He was satisfied with his wealth, but not proud of it, and piqued himself upon the hearty abundance, rather than the style in which he lived. His stronghold was situated on the banks of the Hudson, in one of those green, sheltered, fertile nooks, in which the Dutch farmers are so fond of nestling. A great elm-tree spread its broad branches over it, at the foot of which bubbled up a spring of the softest and sweetest water, in a little well, formed of a barrel, and then stole sparkling away through the grass, to a neighboring brook, that bubbled along among alders and dwarf willows. Hard by the farmhouse was a vast barn, that might have served for a church, every window and crevice of which seemed bursting forth with the treasures of the farm, the flail was busily resounding within it from morning to night, swallows and martins skimmed twittering about the eaves; and rows of pigeons, some with one eye turned up, as if watching the weather, some with their heads under their wings, or buried in their bosoms, and others swelling, and cooing, and bowing about their dames, were enjoying the sunshine on the roof. Sleek unwieldy porkers were grunting in the repose and abundance of their pens; whence sallied forth, now and then, troops of sucking pigs, as if to snuff the air. A stately squadron of snowy geese were riding in an adjoining pond, convoying whole fleets of ducks; regiments of turkeys were gobbling through the farmyard, and guinea fowls fretting about it, like ill-tempered housewives, with their peevish discontented cry. Before the barn door strutted the gallant cock, that pattern of a husband, a warrior, and a fine gentleman, clapping his

burnished wings, and crowing in the pride and gladness of his heart—sometimes tearing up the earth with his feet, and then generously calling his ever-hungry family of wives and children to enjoy the rich morsel which he 50 had discovered.

The pedagogue's mouth watered, as he looked upon this sumptuous promise of luxurious winter fare. In his devouring mind's eye, he pictured to himself every roasting-pig running about with a pudding in his belly, and an apple in his mouth, the pigeons were snugly put to bed in a comfortable pie, and tucked in with a coverlet of crust, the geese were swimming in their own gravy, and the ducks pairing cosily in dishes, like snug married couples, with a decent competency of onion sauce. In 60 the porkers he saw carved out the future sleek side of bacon, and juicy relishing ham, not a turkey but he beheld daintily trussed up, with its gizzard under its wing, and, peradventure, a necklace of savory sausages, and even bright chanticleer himself lay sprawling on his back in a side-dish, with uplifted claws, as if craving that quarter which his chivalrous spirit disdained to ask while living.

As the enraptured Ichabod fancied all this and as he rolled his great green eyes over the fat meadow-lands, 70 the rich fields of wheat, of rye, of buckwheat, and Indian corn, and the orchards burthened with ruddy fruit, which surrounded the warm tenement of Van Tassel, his heart yearned after the damsel who was to inherit these domains, and his imagination expanded with the idea, how they might be readily turned into cash, and the money invested in immense tracts of wild land, and shingle palaces in the wilderness. Nay, his busy fancy already realized his hopes, and presented to him the blooming Katrina, with a whole family of children, 80 mounted on the top of a wagon loaded with household trumpery, with pots and kettles dangling beneath, and he beheld himself bestriding a pacing mare, with a colt at her heels, setting out for Kentucky, Tennessee, or the Lord knows where.

When he entered the house the conquest of his heart was complete. It was one of those spacious farmhouses, with high-ridged, but lowly-sloping roofs, built in the style handed down from the first Dutch settlers; the low projecting eaves forming a piazza along the front, 90

5 Saardam, Zaandam (see p. 542)

capable of being closed up in bad weather. Under this were hung flails, harness, various utensils of husbandry, and nets for fishing in the neighboring river. Benches were built along the sides for summer use, and a great spinning-wheel at one end, and a churn at the other, showed the various uses to which this important porch might be devoted. From this piazza the wondering Ichabod entered the hall, which formed the centre of the mansion and the place of usual residence. Here, rows
 10 of resplendent pewter, ranged on a long dresser, dazzled his eyes. In one corner stood a huge bag of wool ready to be spun; in another a quantity of linsey-woolsey just from the loom; ears of Indian corn, and strings of dried apples and peaches, hung in gay festoons along the walls, mingled with the gaud of red peppers, and a door left ajar gave him a peep into the best parlor, where the claw-footed chairs, and dark mahogany tables, shone like mirrors, and irons, with their accompanying shovel and tongs, glistened from their covert of asparagus tops,
 20 mock-oranges and conch-shells decorated the mantel-piece; strings of various colored birds' eggs were suspended above it: a great ostrich egg was hung from the centre of the room, and a corner cupboard, knowingly left open, displayed immense treasures of old silver and well-mended china.

From the moment Ichabod laid his eyes upon these regions of delight, the peace of his mind was at an end, and his only study was how to gain the affections of the peerless daughter of Van Tassel. In this enterprise, how-
 30 ever, he had more real difficulties than generally fell to the lot of a knight-errant of yore, who seldom had any thing but giants, enchanters, fiery dragons, and such like easily-conquered adversaries, to contend with, and had to make his way merely through gates of iron and brass, and walls of adamant, to the castle keep, where the lady of his heart was confined, all which he achieved as easily as a man would carve his way to the centre of a Christmas pie, and then the lady gave him her hand as a matter of course. Ichabod, on the contrary, had to
 40 win his way to the heart of a country coquette, beset with a labyrinth of whims and caprices, which were for ever presenting new difficulties and impediments, and he had to encounter a host of fearful adversaries of real flesh and blood, the numerous rustic admirers, who beset every portal to her heart; keeping a watchful and angry eye upon each other, but ready to fly out in the common cause against any new competitor.

Among these the most formidable was a burly, roaring, roystering blade, of the name of Abraham, or, according to the Dutch abbreviation, Brom Van Brur, the hero of the country round, which rang with his feat of strength and hardihood. He was broad-shouldered and double-jointed, with short curly black hair, and bluff, but not unpleasant countenance, having a mingled air of fun and arrogance. From his Herculean frame and great powers of limb, he had received the nickname BROM BONES, by which he was universally known. He was famed for great knowledge and skill in horsemanship, being as dexterous on horseback as a Tartar. He was foremost at all races and cock-fights, and, with the ascendancy which bodily strength acquires in rustic life, was the umpire in all disputes, setting his hat on one side, and giving his decisions with an air and tone admitting of no gainsay or appeal. He was always ready for either a fight or a frolic, but had more mischief than ill-will in his composition, and, with all his overbearing roughness, there was a strong dash of waggish good humor at bottom. He had three or four boon companions, who regarded him as their model, and at the head of whom he scoured the country, attending every scene of feud or merriment for miles round. In cold weather he was distinguished by a fur cap, surmounted with a flaunting fox's tail, and when the folks at a country gathering descried this well-known crest at a distance, they whisked about among a squad of hard riders, they always stood by for a squall. Sometimes his crew would be heard dashing along past the farmhouses at midnight with whoop and halloo, like a troop of Don Cossacks, and the old dames, startled out of their sleep, would listen for a moment till the hurry-scurry had clattered by, and then exclaim, "Ay, there goes Brom Bones and his gang!" The neighbors looked upon him with a mixture of awe, admiration, and good-will, and when a madcap prank, or rustic brawl, occurred in the vicinity, they always shook their heads, and warranted Brom Bones was at the bottom of it.

This rantipole hero had for some time singled out

18 and irons. 1820 andirons. The 1848 text is probably in error.
 20 mock-oranges, probably syringas. • 78 Don Cossacks, Cossacks of the Don River region of Russia. The Cossacks were originally famous for their strong military (and especially their cavalry) organization, the name is variously interpreted as meaning "adventurers," "freebooters," and "plunderers." • 87 rantipole, reckless, wild (it

blooming Katrina for the object of his uncouth gallantries, and though his amorous toyings were something like the gentle caresses and endearments of a bear, yet it was whispered that she did not altogether discourage his hopes. Certain it is, his advances were signals for rival candidates to retire, who felt no inclination to cross a lion in his amours, insomuch, that when his horse was seen tied to Van Tassel's paling, on a Sunday night, a sure sign that his master was courting, or, as it is termed, "sparking," within all other suitors passed by in despair, and carried the war into other quarters.

Such was the formidable rival with whom Ichabod Crane had to contend, and, considering all things, a stouter man than he would have shrunk from the competition, and a wiser man would have despaired. He had, however, a happy mixture of pliability and perseverance in his nature; he was in form and spirit like a supple-jack—yielding, but tough, though he bent, he never broke; and though he bowed beneath the slightest pressure, yet, the moment it was away—jerk! he was erect, and carried his head as high as ever.

To have taken the field openly against his rival would have been madness; for he was not a man to be thwarted in his amours, any more than that stormy lover, Achilles. Ichabod, therefore, made his advances in a quiet and gently-insinuating manner. Under cover of his character of singing-master, he made frequent visits at the farmhouse, not that he had any thing to apprehend from the meddlesome interference of parents, which is so often a stumbling-block in the path of lovers. Balt Van Tassel was an easy indulgent soul, he loved his daughter better even than his pipe, and, like a reasonable man and an excellent father, let her have her way in every thing. His notable little wife, too, had enough to do to attend to her housekeeping and manage her poultry; for, as she sagely observed, ducks and geese are foolish things, and must be looked after, but girls can take care of themselves. Thus while the busy dame bustled about the house, or plied her spinning-wheel at one end of the piazza, honest Balt would sit smoking his evening pipe at the other, watching the achievements of a little wooden warrior, who, armed with a sword in each hand, was most valiantly fighting the wind on the pinnacle of the barn. In the mean time, Ichabod would carry on his suit with the daughter by the side of the spring under the great elm, or sauntering along in the twilight, that hour so favorable to the lover's eloquence.

I profess not to know how women's hearts are wooed and won. To me they have always been matters of riddle and admiration. Some seem to have but one vulnerable point, or door of access, while others have a thousand avenues, and may be captured in a thousand different ways. It is a great triumph of skill to gain the former, but a still greater proof of generalship to maintain possession of the latter, for the man must battle for his fortress at every door and window. He who wins a thousand common hearts is therefore entitled to some renown; but he who keeps undisputed sway over the heart of a coquette, is indeed a hero. Certain it is, this was not the case with the redoubtable Brom Bones, and from the moment Ichabod Crane made his advances, the interests of the former evidently declined, his horse was no longer seen tied at the palings on Sunday nights, and a deadly feud gradually arose between him and the preceptor of Sleepy Hollow.

Brom, who had a degree of rough chivalry in his nature, would fain have carried matters to open warfare, and have settled their pretensions to the lady, according to the mode of those most concise and simple reasoners, the knights-errant of yore—by single combat, but Ichabod was too conscious of the superior might of his adversary to enter the lists against him. He had overheard a boast of Bones, that he would "double the schoolmaster up, and lay him on a shelf of his own school-house," and he was too wary to give him an opportunity. There was something extremely provoking in this obstinately pacific system, it left Brom no alternative but to draw upon the funds of rustic waggery in his disposition, and to play off boorish practical jokes upon his rival. Ichabod became the object of whimsical persecution to Bones, and his gang of rough riders. They harried his hitherto peaceful domains, smoked out his singing school, by stopping up the chimney, broke into the school-house at night, in spite of its formidable fastenings of withe and window stakes, and turned every thing topsy-turvy so that the poor schoolmaster began to think all the witches in the country held their meetings there. But what was still

17 *supple-jack*, a walking-stick, cut from a climbing vine • 24 *Achilles*, an allusion to his passion for Polyxena, daughter of Priam, the Trojan. Slain while arranging for the marriage, which was expected to bring peace, Achilles or his shade returned after death to demand his promised bride, she was accordingly sacrificed by the Greeks

more annoying, Brom took all opportunities of turning him into ridicule in presence of his mistress, and had a scoundrel dog whom he taught to whine in the most ludicrous manner, and introduced as a rival of Ichabod's to instruct her in psalmody

In this way matters went on for some time, without producing any material effect on the relative situation of the contending powers. On a fine autumnal afternoon, Ichabod, in pensive mood, sat enthroned on a lofty stool
10 whence he usually watched all the concerns of his little literary realm. In his hand he swayed a ferule, that sceptre of despotic power, the birch of justice reposed on three nails, behind the throne, a constant terror to evil doers, while on the desk before him might be seen sundry contraband articles and prohibited weapons, detected upon the persons of idle urchins; such as half-munched apples, popguns, whirligigs, fly-cages, and whole legions of rampant little paper game-cocks. Apparently there had been some appalling act of justice recently inflicted,
20 for his scholars were all busily intent upon their books, or slyly whispering behind them with one eye kept upon the master, and a kind of buzzing stillness reigned throughout the school-room. It was suddenly interrupted by the appearance of a Negro, in tow-cloth jacket and trowsers, a round-crowned fragment of a hat, like the cap of Mercury, and mounted on the back of a ragged, wild, half-broken colt, which he managed with a rope by way of halter. He came clattering up to the school door with an invitation to Ichabod to attend a merry-
30 making or "quilting frolic," to be held that evening at Mynheer Van Tassel's, and having delivered his message with that air of importance, and effort at fine language, which a Negro is apt to display on petty embassies of the kind, he dashed over the brook, and was seen scampering away up the hollow, full of the importance and hurry of his mission.

All was now bustle and hubbub in the late quiet school-room. The scholars were hurried through their lessons, without stopping at trifles, those who were
40 nimble skipped over half with impunity, and those who were tardy, had a smart application now and then in the rear, to quicken their speed, or help them over a tall word. Books were flung aside without being put away on the shelves, inkstands were overturned, benches thrown down, and the whole school was turned loose an hour before the usual time, bursting forth like a legion of young imps, yelping and racketing

about the green, in joy at their early emancipation.

The gallant Ichabod now spent at least an extra hour at his toilet, brushing and furbishing up his best and indeed only suit of rusty black, and arranging his looks by a bit of broken looking-glass, that hung up in the school-house. That he might make his appearance before his mistress in the true style of a cavalier, he borrowed a horse from the farmer with whom he was domiciliated, a choleric old Dutchman, of the name Hans Van Ripper, and, thus gallantly mounted, issued forth, like a night-errant in quest of adventures. But to meet I should, in the true spirit of romantic story, give some account of the looks and equipments of the hero and his steed. The animal he bestrode was a broken-down plough-horse, that had outlived almost every thing but his viciousness. He was gaunt and shagged, with a ewe neck and a head like a hammer. His rusty mane and tail were tangled and knotted with burrs, one eye had lost its pupil, and was glaring a spectral, but the other had the gleam of a genuine devil in it. Still he must have had fire and mettle in his day, if we may judge from the name he bore of Gunpowder. He had, in fact, been a favorite steed of his master, the choleric Van Ripper, who was a furious rider, and had infused, very probably, some of his own spirit into the animal, for, old and broken-down as he looked, there was more of the lurking devil in him than in any young filly in the country.

Ichabod was a suitable figure for such a steed. He rode with short stirrups, which brought his knees nearly to the pommel of the saddle, his sharp elbows stuck out like grasshoppers', he carried his whip perpendicularly in his hand, like a sceptre, and, as his horse jogged on, the motion of his arms was not unlike the flapping of a pair of wings. A small wool hat rested on the top of his nose, for so his scanty strip of forehead might be called, and the skirts of his black coat fluttered out almost to the horse's tail. Such was the appearance of Ichabod and his steed, as they shamled out of the door of Hans Van Ripper, and it was altogether such an apparition as is seldom to be met with in broad daylight.

It was, as I have said, a fine autumnal day, the sky clear and serene, and nature wore that rich and go

26 cap of Mercury, the Pegasus, or winged hat, symbol of Mercury, speed as messenger of the gods

livery which we always associate with the idea of abundance. The forests had put on their sober brown and yellow, while some trees of the tenderer kind had been nipped by the frosts into brilliant dyes of orange, purple, and scarlet. Streaming files of wild ducks began to make their appearance high in the air, the bark of the squirrel might be heard from the groves of beech and hickory nuts, and the pensive whistle of the quail at intervals from the neighboring stubble-field.

The small birds were taking their farewell banquets. In the fulness of their revelry, they fluttered, chirping and frolicking, from bush to bush, and tree to tree, capricious from the very profusion and variety around them. There was the honest cock-robin, the favorite game of stripling sportsmen, with its loud querulous note, and the twittering blackbirds flying in sable clouds, and the golden-winged woodpecker, with his crimson crest, his broad black gorget, and splendid plumage, and the cedar bird, with its red-tipt wings and yellow-tipt tail, and its little monteiro cap of feathers, and the blue jay, that noisy coxcomb, in his gay light-blue coat and white under-clothes, screaming and chattering, nodding and bobbing and bowing, and pretending to be on good terms with every songster of the grove.

As Ichabod jogged slowly on his way, his eye, ever open to every symptom of culinary abundance, ranged with delight over the treasures of jolly autumn. On all sides he beheld vast store of apples, some hanging in oppressive opulence on the trees, some gathered into baskets and barrels for the market, others heaped up in rich piles for the cider-press. Farther on he beheld great fields of Indian corn, with its golden ears peeping from their leafy coverts, and holding out the promise of cakes and hasty pudding, and the yellow pumpkins lying beneath them, turning up their fair round bellies to the sun, and giving ample prospects of the most luxurious of pies; and anon he passed the fragrant buckwheat fields, breathing the odor of the bee-hive, and as he beheld them, soft anticipation stole over his mind of dainty slapjacks, well buttered, and garnished with honey or treacle, by the delicate little dimpled hand of Katrina Van Tassel.

Thus feeding his mind with many sweet thoughts and "sugar suppositions," he journeyed along the sides of a range of hills which look out upon some of the goodliest scenes of the mighty Hudson. The sun gradually wheeled his broad disk down into the west. The

wide bosom of the Tappan Zee lay motionless and glassy, excepting that here and there a gentle undulation waved and prolonged the blue shadow of the distant 50 mountain. A few amber clouds floated in the sky, without a breath of air to move them. The horizon was of a fine golden tint, changing gradually into a pure apple green, and from that into the deep blue of the mid-heaven. A slanting ray lingered on the woody crests of the precipices that overhung some parts of the river, giving greater depth to the dark-gray and purple of their rocky sides. A sloop was loitering in the distance, dropping slowly down with the tide, her sail hanging uselessly against the mast, and as the reflection of the sky gleamed 60 along the still water, it seemed as if the vessel was suspended in the air.

It was toward evening that Ichabod arrived at the castle of the Heer Van Tassel, which he found thronged with the pride and flower of the adjacent country. Old farmers, a spare leathern-faced race, in homespun coats and breeches, blue stockings, huge shoes, and magnificent pewter buckles. Their brisk withered little dames, in close crimped caps, long-waisted short-gowns, homespun 70 petticoats, with scissors and pincushions, and gay calico pockets hanging on the outside. Buxom lasses, almost as antiquated as their mothers, excepting where a straw hat, a fine ribbon or perhaps a white frock, gave symptoms of city innovation. The sons, in short square-skirted coats with rows of stupendous brass buttons, and their hair generally queued in the fashion of the times, especially if they could procure an eel-skin for the purpose, it being esteemed, throughout the country, as a potent nourisher and strengthener of the hair.

Brom Bones, however, was the hero of the scene, 80 having come to the gathering on his favorite steed Daredevil, a creature, like himself, full of mettle and mischief, and which no one but himself could manage. He was, in fact, noted for preferring vicious animals, given to all kinds of tricks, which kept the rider in constant risk of his neck, for he held a tractable well-broken horse as unworthy of a lad of spirit.

Fain would I pause to dwell upon the world of charms that burst upon the enraptured gaze of my hero, as he entered the state parlor of Van Tassel's mansion. Not 90 those of the bevy of buxom lasses, with their luxurious

20 monteiro cap, a hunting-cap with a flap

display of red and white. but the ample charms of a genuine Dutch country tea-table, in the sumptuous time of autumn. Such heaped-up platters of cakes of various and almost indescribable kinds, known only to experienced Dutch housewives! There was the doughty dough-nut, the tenderer oly koek, and the crisp and crumbling cruller, sweet cakes and short cakes, ginger cakes and honey cakes, and the whole family of cakes. And then there were apple pies and peach pies and pumpkin pies; 10 besides slices of ham and smoked beef, and moreover delectable dishes of preserved plums, and peaches, and pears, and quinces, not to mention broiled shad and roasted chickens, together with bowls of milk and cream, all mingled higgledy-piggledy, pretty much as I have enumerated them, with the motherly tea-pot sending up its clouds of vapor from the midst—Heaven bless the mark! I want breath and time to discuss this banquet as it deserves, and am too eager to get on with my story. Happily, Ichabod Crane was not in so great a 20 hurry as his historian, but did ample justice to every dainty.

He was a kind and thankful creature, whose heart dilated in proportion as his skin was filled with good cheer, and whose spirits rose with eating as some men's do with drink. He could not help, too, rolling his large eyes round him as he ate, and chuckling with the possibility that he might one day be lord of all this scene of almost unimaginable luxury and splendor. Then, he thought, how soon he'd turn his back upon the old 30 school-house, snap his fingers in the face of Hans Van Ripper, and every other niggardly patron, and kick any itinerant pedagogue out of doors that should dare to call him comrade!

Old Baltus Van Tassel moved about among his guests with a face dilated with content and good humor, round and jolly as the harvest moon. His hospitable attentions were brief, but expressive, being confined to a shake of the hand, a slap on the shoulder, a loud laugh, and a pressing invitation to "fall to, and help themselves."

40 And now the sound of the music from the common room or hall, summoned to the dance. The musician was an old grayheaded Negro, who had been the itinerant orchestra of the neighborhood for more than half a century. His instrument was as old and battered as himself. The greater part of the time he scraped on two or three strings, accompanying every movement of the bow with a motion of the head; bowing almost to the ground,

and stamping with his foot whenever a fresh couple were to start.

Ichabod prided himself upon his dancing as much as upon his vocal powers. Not a limb, not a fibre about him was idle; and to have seen his loosely hung frame in full motion, and clattering about the room, you would have thought Saint Vitus himself, that blessed patron of the dance, was figuring before you in person. He was the admiration of all the Negroes, who having gathered, of all ages and sizes, from the farm and the neighborhood, stood forming a pyramid of shining black faces at every door and window, gazing with delight at the scene, rolling their white eye-balls, and showing grinning rows of ivory from ear to ear. How could the flogger of urchins be otherwise than animated at joyous? the lady of his heart was his partner in the dance and smiling graciously in reply to all his amorous oglings, while Brom Bones, sorely smitten with love and jealousy, sat brooding by himself in one corner.

When the dance was at an end, Ichabod was attracted to a knot of the sager folks, who, with old Van Tassel sat smoking at one end of the piazza, gossiping over former times, and drawing out long stories about the war.

This neighborhood, at the time of which I am speaking, was one of those highly-favored places which abound with chronicle and great men. The British and American line had run near it during the war; it had, therefore, been the scene of marauding, and infested with refugee cow-boys, and all kinds of border chivalry. Just sufficient time had elapsed to enable each story-teller to dress his tale with a little becoming fiction, and, in the distinctness of his recollection, to make himself the hero of every exploit.

There was the story of Doffue Martling, a large bearded Dutchman, who had nearly taken a British frigate with an old iron nine-pounder from a mud-brewery, only that his gun burst at the sixth discharge. There was an old gentleman who shall be nameless, being too rich a mynheer to be lightly mentioned, who won the battle of Whiteplains, being an excellent master

5 dough-nut . . . oly koek . . . cruller, all of them fried in deep fat but varying in composition. Oly koek, from the Dutch, is known as a cake in New York. • 54 Saint Vitus, according to legend a Christian martyr of the third century, especially venerated in medieval Germany. • 76 cow-boys, bands of Tory guerillas who operated near New York during the Revolution.

defence, parried a musket ball with a small sword, inso-
much that he absolutely felt it whiz round the blade,
and glance off at the hilt in proof of which, he was
ready at any time to show the sword, with the hilt a
little bent. There were several more that had been
equally great in the field, not one of whom but was per-
suaded that he had a considerable hand in bringing the
war to a happy termination

But all these were nothing to the tales of ghosts and
apparitions that succeeded. The neighborhood is rich in
legendary treasures of the kind. Local tales and super-
stitions thrive best in these sheltered long-settled re-
treats, but are trampled under foot by the shifting throng
that forms the population of most of our country places.
Besides, there is no encouragement for ghosts in most
of our villages, for they have scarcely had time to finish
their first nap, and turn themselves in their graves, be-
fore their surviving friends have travelled away from
the neighborhood, so that when they turn out at night
to walk their rounds, they have no acquaintance left to
call upon. This is perhaps the reason why we so seldom
hear of ghosts except in our long-established Dutch
communities

The immediate cause, however, of the prevalence of
supernatural stories in these parts, was doubtless owing
to the vicinity of Sleepy Hollow. There was a contagion
in the very air that blew from that haunted region, it
breathed forth an atmosphere of dreams and fancies in-
fecting all the land. Several of the Sleepy Hollow people
were present at Van Tassel's, and, as usual, were doing
out their wild and wonderful legends. Many dismal
tales were told about funeral trains, and mourning cries
and wailings heard and seen about the great tree where
the unfortunate Major André was taken, and which
stood in the neighborhood. Some mention was made
also of the woman in white, that haunted the dark glen
at Raven Rock, and was often heard to shriek on winter
nights before a storm, having perished there in the
snow. The chief part of the stories, however, turned
upon the favorite spectre of Sleepy Hollow, the headless
horseman, who had been heard several times of late,
patrolling the country; and, it was said, tethered his
horse nightly among the graves in the church-yard.

The sequestered situation of this church seems al-
ways to have made it a favorite haunt of troubled spirits.
It stands on a knoll, surrounded by locust-trees and
lofty elms, from among which its decent, whitewashed

walls shine modestly forth, like Christian purity beaming
through the shades of retirement. A gentle slope de-
scends from it to a silver sheet of water, bordered by ⁵⁰
high trees, between which, peeps may be caught at the
blue hills of the Hudson. To look upon its grass-grown
yard, where the sunbeams seem to sleep so quietly, one
would think that there at least the dead might rest in
peace. On one side of the church extends a wide woody
dell, along which raves a large brook among broken
rocks and trunks of fallen trees. Over a deep black part
of the stream, not far from the church, was formerly
thrown a wooden bridge, the road that led to it, and the
bridge itself, were thickly shaded by overhanging trees, ⁶⁰
which cast a gloom about it, even in the daytime, but
occasioned a fearful darkness at night. This was one of
the favorite haunts of the headless horseman; and the
place where he was most frequently encountered. The
tale was told of old Brouwer, a most heretical disbeliever
in ghosts, how he met the horseman returning from his
foray into Sleepy Hollow, and was obliged to get up
behind him, how they galloped over bush and brake,
over hill and swamp, until they reached the bridge;
when the horseman suddenly turned into a skeleton, ⁷⁰
threw old Brouwer into the brook, and sprang away over
the tree-tops with a clap of thunder.

This story was immediately matched by a thrice mar-
vellous adventure of Brom Bones, who made light of
the galloping Hessian as an arrant jockey. He affirmed
that, on returning one night from the neighboring village
of Sing Sing, he had been overtaken by this midnight
trooper; that he had offered to race with him for a bowl
of punch, and should have won it too, for Daredevil
beat the goblin horse all hollow, but, just as they came ⁸⁰
to the church bridge, the Hessian bolted, and vanished
in a flash of fire.

All these tales, told in that drowsy undertone with
which men talk in the dark, the countenances of the lis-
teners only now and then receiving a casual gleam from
the glare of a pipe, sank deep in the mind of Ichabod.
He repaid them in kind with large extracts from his in-
valuable author, Cotton Mather, and added many mar-
vellous events that had taken place in his native State

34 Major André (1751-1700), executed at Tappan, across the Hudson a
few miles below Tarrytown, following his capture with the plans of
West Point and evidence of the treason of Benedict Arnold. A monu-
ment now stands near the place of his capture in Tarrytown.

of Connecticut, and fearful sights which he had seen in his nightly walks about Sleepy Hollow.

The revel now gradually broke up. The old farmers gathered together their families in their wagons, and were heard for some time rattling along the hollow roads, and over the distant hills. Some of the damsels mounted on pillions behind their favorite swains, and their light-hearted laughter, mingling with the clatter of hoofs, echoed along the silent woodlands, sounding
10 fainter and fainter until they gradually died away—and the late scene of noise and frolic was all silent and deserted. Ichabod only lingered behind, according to the custom of country lovers, to have a tête-à-tête with the heiress, fully convinced that he was now on the high road to success. What passed at this interview I will not pretend to say, for in fact I do not know. Something, however, I fear me, must have gone wrong, for he certainly sallied forth, after no very great interval, with an air quite desolate and chop-fallen.—Oh these women!
20 these women! Could that girl have been playing off any of her coquettish tricks?—Was her encouragement of the poor pedagogue all a mere sham to secure her conquest of his rival?—Heaven only knows, not I!—Let it suffice to say, Ichabod stole forth with the air of one who had been sacking a hen-roost, rather than a fair lady's heart. Without looking to the right or left to notice the scene of rural wealth, on which he had so often gloated, he went straight to the stable, and with several hearty cuffs and kicks, roused his steed most un-
30 courteously from the comfortable quarters in which he was soundly sleeping, dreaming of mountains of corn and oats, and whole valleys of timothy and clover.

It was the very witching time of night that Ichabod, heavy-hearted and crest-fallen, pursued his travel homewards, along the sides of the lofty hills which rise above Tarry Town, and which he had traversed so cheerily in the afternoon. The hour was as dismal as himself. Far below him, the Tappan Zee spread its dusky and indistinct waste of waters, with here and there the tall
40 mast of a sloop, riding quietly at anchor under the land. In the dead hush of midnight, he could even hear the barking of the watch dog from the opposite shore of the Hudson; but it was so vague and faint as only to give an idea of his distance from this faithful companion of man. Now and then, too, the long-drawn crowing of a cock, accidentally awakened, would sound far, far off, from some farmhouse away among the hills—

but it was like a dreaming sound in his ear. No sign of life occurred near him, but occasionally the melancholy chirp of a cricket, or perhaps the guttural twang of a bull-frog, from a neighboring marsh, as if sleeping uncomfortably, and turning suddenly in his bed.

All the stories of ghosts and goblins that he had heard in the afternoon, now came crowding upon his recollection. The night grew darker and darker, the stars seemed to sink deeper in the sky, and driving clouds occasionally hid them from his sight. He had never felt so lonely and dismal. He was, moreover, approaching the very place where many of the scenes the ghost stories had been laid. In the centre of the road stood an enormous tulip-tree, which towered like a giant above all the other trees of the neighborhood, and formed a kind of landmark. Its limbs were gnarled, a fantastic, large enough to form trunks for ordinary trees twisting down almost to the earth, and rising again into the air. It was connected with the tragical story of the unfortunate André, who had been taken prisoner here by, and was universally known by the name of Major André's tree. The common people regarded it with a mixture of respect and superstition, partly out of sympathy for the fate of its ill-starred namesake, and partly from the tales of strange sights and doleful lamentations told concerning it.

As Ichabod approached this fearful tree, he began to whistle, he thought his whistle was answered—it was but a blast sweeping sharply through the dry branches. As he approached a little nearer, he thought he saw something white, hanging in the midst of the tree—paused and ceased whistling, but on looking more narrowly, perceived that it was a place where the tree had been scathed by lightning, and the white wood laid bare. Suddenly he heard a groan—his teeth chattered and his knees smote against the saddle. It was but the rubbing of one huge bough upon another, as they were swayed about by the breeze. He passed the tree in safety, but new perils lay before him.

About two hundred yards from the tree a small brook crossed the road, and ran into a marshy and thick wooded glen, known by the name of Wiley's swamp. A few rough logs, laid side by side, served for a bridge over this stream. On that side of the road where the brook entered the wood, a group of oaks and chestnuts matted thick with wild grapevines, threw a cavernous gloom over it. To pass this bridge was the severest

It was at this identical spot that the unfortunate André was captured, and under the covert of those chestnuts and vines were the sturdy yeomen concealed who surprised him. This has ever since been considered a haunted stream, and fearful are the feelings of the schoolboy who has to pass it alone after dark.

As he approached the stream, his heart began to thump, he summoned up, however, all his resolution, gave his horse half a score of kicks in the ribs, and attempted to dash briskly across the bridge, but instead of starting forward, the perverse old animal made a lateral movement, and ran broadside against the fence Ichabod, whose fears increased with the delay, jerked the reins on the other side, and kicked lustily with the contrary foot—it was all in vain, his steed started, it is true, but it was only to plunge to the opposite side of the road into a thicket of brambles and alder bushes. The schoolmaster now bestowed both whip and heel upon the starveling ribs of old Gunpowder, who dashed forward, snuffling and snorting, but came to a stand just by the bridge, with a suddenness that had nearly sent his rider sprawling over his head. Just at this moment a plashy tramp by the side of the bridge caught the sensitive ear of Ichabod. In the dark shadow of the grove, on the margin of the brook, he beheld something huge, misshapen, black and towering. It stirred not, but seemed gathered up in the gloom, like some gigantic monster ready to spring upon the traveller.

The hair of the affrighted pedagogue rose upon his head with terror. What was to be done? To turn and fly was now too late, and besides, what chance was there of escaping ghost or goblin, if such it was, which could ride upon the wings of the wind? Summoning up, therefore, a show of courage, he demanded in stammering accents—"Who are you?" He received no reply. He repeated his demand in a still more agitated voice. Still there was no answer. Once more he cudgelled the sides of the inflexible Gunpowder, and, shutting his eyes, broke forth with involuntary fervor into a psalm tune. Just then the shadowy object of alarm put itself in motion and, with a scramble and a bound, stood at once in the middle of the road. Though the night was dark and dismal, yet the form of the unknown might now in some degree be ascertained. He appeared to be a horseman of large dimensions, and mounted on a black horse of powerful frame. He made no offer of molestation or sociability, but kept aloof on one side of the road,

"He beheld something huge, misshapen . . . towering."

jogging along on the blind side of old Gunpowder, who had now got over his fright and waywardness.

Ichabod, who had no relish for this strange midnight 50 companion, and bethought himself of the adventure of Brom Bones with the Galloping Hessian, now quickened his steed, in hopes of leaving him behind. The stranger, however, quickened his horse to an equal pace. Ichabod pulled up, and fell into a walk, thinking to lag behind—the other did the same. His heart began to sink within him, he endeavored to resume his psalm tune, but his parched tongue clove to the roof of his mouth, and he could not utter a stave. There was something in the moody and dogged silence of this pertinacious companion, 60 that was mysterious and appalling. It was soon fearfully accounted for. On mounting a rising ground, which brought the figure of his fellow-traveller in relief against the sky, gigantic in height, and muffled in a cloak, Ichabod was horror-struck, on perceiving that he was headless!—but his horror was still more increased, on observing that the head, which should have rested on his shoulders, was carried before him on the pommel of the saddle. His terror rose to desperation; he rained a shower of kicks and blows upon Gunpowder, hoping, by 70 a sudden movement, to give his companion the slip—but the spectre started full jump with him. Away then they dashed, through thick and thin, stones flying, and sparks flashing at every bound. Ichabod's flimsy garments fluttered in the air, as he stretched his long lank body away over his horse's head, in the eagerness of his flight.

They had now reached the road which turns off to

Sleepy Hollow, but Gunpowder, who seemed possessed with a demon, instead of keeping up it, made an opposite turn, and plunged headlong down hill to the left. This road leads through a sandy hollow, shaded by trees for about a quarter of a mile, where it crosses the bridge famous in goblin story, and just beyond swells the green knoll on which stands the whitewashed church.

As yet the panic of the steed had given his unskilful rider an apparent advantage in the chase; but just as he
10 had got half way through the hollow, the girths of the saddle gave way, and he felt it slipping from under him. He seized it by the pommel, and endeavored to hold it firm, but in vain; and had just time to save himself by clasping old Gunpowder round the neck, when the saddle fell to the earth, and he heard it trampled under foot by his pursuer. For a moment the terror of Hans Van Ripper's wrath passed across his mind—for it was his Sunday saddle, but this was no time for petty fears; the goblin was hard on his haunches, and (unskilful rider
20 that he was!) he had much ado to maintain his seat, sometimes slipping on one side, sometimes on another, and sometimes jolted on the high ridge of his horse's backbone, with a violence that he verily feared would cleave him asunder.

An opening in the trees now cheered him with the hopes that the church bridge was at hand. The wavering reflection of a silver star in the bosom of the brook told him that he was not mistaken. He saw the walls of the church dimly glaring under the trees beyond. He recol-
30 lected the place where Brom Bones's ghostly competitor had disappeared. "If I can but reach that bridge," thought Ichabod, "I am safe." Just then he heard the black steed panting and blowing close behind him, he even fancied that he felt his hot breath. Another convulsive kick in the ribs, and old Gunpowder sprang upon the bridge, he thundered over the resounding planks; he gained the opposite side; and now Ichabod cast a look behind to see if his pursuer should vanish, according to rule, in a flash of fire and brimstone. Just then he saw the goblin rising
40 in his stirrups, and in the very act of hurling his head at him. Ichabod endeavored to dodge the horrible missile, but too late. It encountered his cranium with a tremendous crash—he was tumbled headlong into the dust, and Gunpowder, the black steed, and the goblin rider, passed by like a whirlwind.

The next morning the old horse was found without his saddle, and with the bridle under his feet, soberly

cropping the grass at his master's gate. Ichabod did not make his appearance at breakfast—dinner-hour came, but no Ichabod. The boys assembled at the school-house, and strolled idly about the banks of the brook; but no schoolmaster. Hans Van Ripper now began to feel some uneasiness about the fate of poor Ichabod, and his saddle. An inquiry was set on foot, and after diligent investigation they came upon his traces. In one part of the road leading to the church was found the saddle trampled in the dirt, the tracks of horses' hoofs deeply dented in the road, and evidently at furious speed, were traced to the bridge, beyond which, on the bank of a broad part of the brook, where the water ran deep and black, was found the hat of the unfortunate Ichabod, and close beside it a shattered pumpkin.

The brook was searched, but the body of the schoolmaster was not to be discovered. Hans Van Ripper, executor of his estate, examined the bundle which contained all his worldly effects. They consisted of two shirts and a half; two stocks for the neck; a pair or two of worsted stockings, an old pair of corduroy small-clothes, a rusty razor; a book of psalm tunes, full of doggerel, and a broken pitchpipe. As to the books and furniture of the school-house, they belonged to the community, excepting Cotton Mather's History of Witchcraft, a New England Almanac, and a book of dreams and fortune-telling, in which last was a sheet of foolscap manuscript scribbled and blotted in several fruitless attempts to make a copy of verses in honor of the heiress of Van Tassel. These magic books and the poetic scrawl were forthwith consigned to the flames by Hans Van Ripper; who from that time forward determined to send his children more to school; observing, that he never knew any good come of this same reading and writing. Whatever money the schoolmaster possessed, and he had received his quarter's pay but a day or two before, he must have squandered about his person at the time of his disappearance.

The mysterious event caused much speculation at the church on the following Sunday. Knots of gazers and gossips were collected in the churchyard, at the bridge, and at the spot where the hat and pumpkin had been found. The stories of Brouwer, of Bones, and a whole budget of others, were called to mind, and when they had diligently considered them all, and compared them with the symptoms of the present case, they shook their heads, and came to the conclusion that Ichabod had been carried off by the galloping Hessian. As he was

bachelor, and in nobody's debt, nobody troubled his head any more about him. The school was removed to a different quarter of the hollow, and another pedagogue reigned in his stead

It is true, an old farmer, who had been down to New-York on a visit several years after, and from whom this account of the ghostly adventure was received, brought home the intelligence that Ichabod Crane was still alive, that he had left the neighborhood, partly through fear of the goblin and Hans Van Ripper, and partly in mortification at having been suddenly dismissed by the heiress, that he had changed his quarters to a distant part of the country; had kept school and studied law at the same time, had been admitted to the bar, turned politician, electioneered, written for the newspapers, and finally had been made a justice of the Ten Pound Court. Brom Bones too, who, shortly after his rival's disappearance, conducted the blooming Katrina in triumph to the altar, was observed to look exceedingly knowing whenever the story of Ichabod was related, and always burst into a hearty laugh at the mention of the pumpkin, which led some to suspect that he knew more about the matter than he chose to tell.

The old country wives, however, who are the best judges of these matters, maintain to this day that Ichabod was spirited away by supernatural means, and it is a favorite story often told about the neighborhood round the winter evening fire. The bridge became more than ever an object of superstitious awe, and that may be the reason why the road has been altered of late years, so as to approach the church by the border of the mill-pond. The school-house being deserted, soon fell to decay, and was reported to be haunted by the ghost of the unfortunate pedagogue; and the plough boy, loitering homeward of a still summer evening, has often fancied his voice at a distance, chanting a melancholy psalm tune among the tranquil solitudes of Sleepy Hollow

POSTSCRIPT, FOUND IN THE HANDWRITING OF MR. KNICKERBOCKER

The preceding Tale is given, almost in the precise words in which I heard it related at a Corporation meeting of the ancient city of Manhattoes, at which were present many of its sagest and most illustrious burghers. The narrator was a pleasant, shabby, gentlemanly old fellow, a pepper-and-salt clothes, with a sadly humorous face;

and one whom I strongly suspected of being poor,—he made such efforts to be entertaining. When his story was concluded, there was much laughter and approbation, particularly from two or three deputy aldermen, who had been asleep the greater part of the time. There was, however, one tall, dry-looking old gentleman, with beetling eyebrows who maintained a grave and rather severe face throughout now and then folding his arms, inclining his head, and looking down upon the floor, as if turning a doubt over in his mind. He was one of your wary men, who never laugh, but upon good grounds—when they have reason and the law on their side. When the mirth of the rest of the company had subsided, and silence was restored, he leaned one arm on the elbow of his chair, and sticking the other akimbo, demanded, with a slight, but exceedingly sage motion of the head, and contraction of the brow, what was the moral of the story, and what it went to prove?

The story-teller, who was just putting a glass of wine to his lips, as a refreshment after his toils, paused for a moment, looked at his inquirer with an air of infinite deference, and, lowering the glass slowly to the table, observed, that the story was intended most logically to prove —

"That there is no situation in life but has its advantages and pleasures—provided we will but take a joke as we find it

"That, therefore, he that runs races with goblin troopers is likely to have rough riding of it

"Ergo, for a country schoolmaster to be refused the hand of a Dutch heiress, is a certain step to high preferment, in the state"

The cautious old gentleman knit his brows tenfold closer after this explanation, being sorely puzzled by the ratiocination of the syllogism, while, methought, the one in pepper-and-salt eyed him with something of a triumphant leer. At length he observed, that all this was very well, but still he thought the story a little on the extravagant—there were one or two points on which he had his doubts

"Faith, sir," replied the story-teller, "as to that matter, I don't believe one-half of it myself"

D. K.
1818-1820

16 Ten Pound Court, in which cases involving not more than ten pounds were tried by a justice

James Fenimore Cooper

1789 • 1851

James Cooper (he became "James Fenimore-Cooper" by a legislative act in 1826 and later dropped the hyphen) was born at Burlington, New Jersey, in 1789. In the previous year his father had laid out the site of Cooperstown at the foot of Otsego Lake, in New York, and in 1790 he settled there with his family. The son was brought up in a community in which the Coopers were by far the most important personages, his future was from the first defined as that of a landowner and estate manager. To prepare for it he had the education of a gentleman, first under a private tutor in Albany, and then in Yale College, which expelled him for too much pleasure-seeking in 1806. His further education consisted of shipping to England as a common sailor in

1806-1807 and three years' service as a midshipman in the United States Navy, from which he resigned shortly after his marriage, in 1811, to Susan Augusta De Larocque, daughter of a wealthy family in Mamaroneck, Westchester County. Both he and his wife had money of their own, and there was more in prospect. They settled down to raising a family and supervising their interests, living for some time at Cooperstown, and later in Westchester. In 1819, when Cooper was thirty, he was a gentleman farmer and a small capitalist, with neither the ambition nor the necessity for authorship.

Seldom, perhaps, has a novelist developed more casually. The tradition is that, reading aloud to his wife a story of English country life, he remarked that he could do as well himself and set out to make good his boast. The result was *Precaution*, a novel picturing English society and abounding with moral sentiment on marriage. It was published in 1820, and, although not especially successful, it led directly to *The Spy* (1821), which was enormously so. The course of Cooper's life was changed abruptly from that natural to a country gentleman to the uncertain peregrinations of a writer. He discovered that he had both a fertile imagination and a ready pen, and, devoting his mornings to composition, he began to produce a stream of books which, at the time of his death in 1851, consisted of thirty-three novels and numerous volumes of social comment, naval history, and travel.

The relation between his life and his writing is highly complicated. In general, however, three periods are clearly distinguishable. Between 1820 and 1826 he explored the possibilities of the novel of romantic action, in emulation of Sir Walter Scott, living in New York City after 1822, the center of the congenial "Lunch" or Bread and Cheese Club, he sent forth to the world, in rapid succession, *The Pioneers* (1823), *The Pilot* (1824), *Lionel Lincoln* (1825), and *The Last of the Mohicans* (1826). Between 1826 and 1833 he lived in Europe, where, under the tutelage of Lafayette, he became deeply interested in political philosophy, particularly as it appeared in the contrast between American and European institutions. An ardent patriot, he wrote a trilogy in opposition to Scott's glorification of medievalism, but *The Bravo* (1831), *The Heidenmauer* (1832), and *The Headsman* (1833) disappointed the public, in America as well as in Europe, and inaugurated a disillusion in their author which grew steadily with the years. From 1834 until his death Cooper lived half of each year in Cooperstown, spending the other six months in New York City. He had left the United States in the administration of John Quincy Adams, when he returned, the Jacksonian revolution had materially changed the social and political complexion of the nation. Cooper, an aristocrat by birth, by education, and by temperament, did not find the change wholly admirable, indeed, the last seventeen years of his life were spent in an unhappy battle for aristocratic principles

which his countrymen found objectionable. Occasionally, as in *The Pathfinder* (1840) and *The Deerslayer* (1841), Cooper returned to his earlier vein, but his more characteristic works were social satires, such as *Home as Found* (1838), and the problem novels, *Satanstoe* (1845), *The Chamberlain* (1845), and *The Red Rover* (1846), based upon the opposition of New Yorkers to the continuance of the tenant farm system of the patroons. Sometimes, indeed, he deserted fiction to present his conviction that individual liberty can only be achieved by a constitutional government which protects property as well as human rights, in *The American Democrat* (1838), for example, he argued for an aristocracy of merit not unlike that envisaged by Alexander Hamilton and the Federalists.

Cooper was unpopular in his later years because of his criticism of democracy. The tale of his innumerable libel suits against those critics who unjustly defamed his character is lengthy and inappropriate here, but it should be said that he was usually in the right and won his cases. There is justice in Professor Spiller's claim that Cooper was the "most thoroughly critical mind that early America produced." Few men of his generation realized as he did that democracy, wrongly understood, can be tyrannical, that distinction and quality cannot be achieved by the glorification of mediocrity and numbers.

It is not as a social critic, however, that Cooper has won his fame, and another age than the present may well forget his problem novels. He lives, as his friend Bryant said, as the American Hesiod or Theocritus, a poet of the youth of a nation, a nation which was wresting a continent from nature and the Indians, not always intelligently, not always justly, but with full awareness of the imaginative "lift" of the great open spaces and the epic quality of man's struggle with the wilderness. His claim to fame as the first great American novelist can scarcely be challenged.

The Pioneers;

or The Sources of the Susquehanna

The Pioneers, Cooper's third published novel and the first of the five Leather-Stocking tales, appeared in two volumes on February 1, 1823, in New York. A London edition appeared in the same month and by 1832 there were translations into French, German, Swedish, Danish, and Spanish. Although it has not been, over the years, the most popular of his writings, *The Pioneers* has the distinction of introducing the two characters of the American wilderness for which Cooper is most famous—Natty Bumppo, or the Leather-Stocking, and Chingachgook, Natty's Mohican friend and companion. The novel, moreover, is among the most autobiographical of Cooper's works, frequently foreshadowing his criticism of the ignorance and irresponsibility of frontier democracy which later became almost an obsession.

The first half of the book moves slowly—it takes Cooper nineteen chapters to cover the first twenty-four hours of his tale—but the reader is rewarded by a faithful representation of the life of a newly settled community in 1793, obviously based upon the author's memories of Coopers-town. The remainder of the book consists of a series of episodes in which the woodcraft and native intelligence of Natty Bumppo are given a central position. The plot will be found a mixture of disguised identity and escape from physical danger, a somewhat weak but wholly characteristic example of Cooper's storytelling. In the following abridgement, Cooper's poetical handling of external nature will be apparent, as well as his typical methods of characterization, successful frequently in the case of his men, almost always conventional in the portrayal of women. A Preface written for a revision made in 1831 acknowledged that the author depended largely upon fact for his setting and Templeton backgrounds, but denied any intention of describing accurately any real characters. Nevertheless, Judge Temple has seemed to most critics a portrait of William Cooper, the novelist's father, and

various other characters have been identified with Coopers-town folk.

Natty Bumppo, however, was a creation all Cooper's own, with only a vague resemblance to Daniel Boone, who has been suggested as his prototype. Natty, under various names—the Leather-Stocking, Deerslayer, Hawk-eye, and Pathfinder—appears in and binds together five novels: *The Pioneers* (1823), *The Last of the Mohicans* (1836), *The Prairie* (1827), *The Pathfinder* (1840), and *The Deerslayer* (1841). Cooper did not plan these novels as a whole, however, and they are held together only in parts of a biographical whole which has numerous discrepancies. In point of biographical time *The Deerslayer* should be read first; its action takes place on Otsego Lake between 1740 and 1745. Next comes *The Last of the Mohicans*, which occurs on Lake George in 1757, followed by *The Pathfinder*, whose scene is Lake Ontario in 1790. After *The Pioneers*, as if Natty were not feeble enough at its conclusion, comes *The Prairie*, in which the name hero—his dog Hector, stuffed by an Indian taxidermist at his side—dies in 1804 amid the scenic splendor of Pawnee country.

CHAPTER I

Near the centre of the State of New York lies an extensive district of country, whose surface is a succession of hills and dales, or, to speak with greater deference to geographical definitions, of mountains and valleys. It is among these hills that the Delaware takes its rise, and flowing from the limpid lakes and thousand springs of this region, the numerous sources of the Susquehanna meander through the valleys, until, uniting their streams, they form one of the proudest rivers of the United States. The mountains are generally arable to the tops, although instances are not wanting where the sides are rugged with rocks, that aid greatly in giving to the country that romantic and picturesque character which it so eminently possesses. The vales are narrow, rich, and cultivated; with a stream uniformly winding through

Text: the collected edition of Cooper's novels in thirty-two volumes, New York, 1859-1861. The tags of poetry used by Cooper for headings have been omitted.

each. Beautiful and thriving villages are found interspersed along the margins of the small lakes, or situated at those points of the streams which are favorable to manufacturing; and neat and comfortable farms, with every indication of wealth about them, are scattered profusely through the vales, and even to the mountain tops. Roads diverge in every direction, from the even and graceful bottoms of the valleys, to the most rugged and intricate passes of the hills. Academies, and minor edifices of learning, meet the eye of the stranger at every few miles, as he winds his way through this uneven territory, and places for the worship of God abound with that frequency which characterizes a moral and reflecting people, and with that variety of exterior and canonical government which flows from unfettered liberty of conscience. In short, the whole district is hourly exhibiting how much can be done, in even a rugged country, and with a severe climate, under the dominion of mild laws, and where every man feels a direct interest in the prosperity of a commonwealth, of which he knows himself to form a part. The expedients of the pioneers who first broke ground in the settlement of this country are succeeded by the permanent improvements of the yeoman, who intends to leave his remains to moulder under the sod which he tills, or, perhaps, of the son, who, born in the land, piously wishes to linger around the grave of his father. Only forty years have passed since this territory was a wilderness.

Very soon after the establishment of the independence of the States, by the peace of 1783, the enterprise of their citizens was directed to a development of the natural advantages of their widely extended dominions. Before the war of the revolution the inhabited parts of the colony of New York were limited to less than a tenth of its possessions. A narrow belt of country, extending for a short distance on either side of the Hudson, with a similar occupation of fifty miles on the banks of the Mohawk, together with the islands of Nassau and Staten, and a few insulated settlements on chosen land along the margins of streams, composed the country, which was then inhabited by less than two hundred thousand souls. Within the short period we have mentioned, the population has spread itself over five degrees of latitude and seven of longitude, and has swelled to a million and a half inhabitants, who are maintained in abundance, and can look forward to ages before the evil day must

arrive when their possessions shall become unequal to their wants.

Our tale begins in 1793, about seven years after the commencement of one of the earliest of those settlements, 50 which have conduced to effect that magical change in the power and condition of the State, to which we have alluded.

It was near the setting of the sun, on a clear, cold day in December, when a sleigh was moving slowly up one of the mountains, in the district we have described. The day had been fine for the season, and but two or three large clouds, whose color seemed brightened by the light reflected from the mass of snow that covered the earth, floated in a sky of the purest blue. The road wound 60 along the brow of a precipice, and on one side was upheld by a foundation of logs, piled one upon the other, while a narrow excavation in the mountain, in the opposite direction, had made a passage of sufficient width for the ordinary travelling of that day. But logs, excavation, and everything that did not reach several feet above the earth, lay alike buried beneath the snow. A single track, barely wide enough to receive the sleigh, denoted the route of the highway, and this was sunk nearly two feet below the surrounding surface. In the vale, which lay at a distance of several hundred feet lower, there was what in 70 the language of the country was called a *clearing*, and all the usual improvements of a new settlement, these even extended up the hill to the point where the road turned short and ran across the level land, which lay on the summit of the mountain, but the summit itself remained in

14 canonical, legal—a somewhat unusual handling of the word •
 27 forty years The book was written in 1823.—Cooper • 44 a
 million . . . inhabitants The population of New York is now (1831)
 quite 2,000,000.—Cooper • 67 sleigh Sleigh is the word used in
 every part of the United States to denote a traineau. It is of local use
 in the west of England, whence it is more probably derived by the
 Americans. The latter draw a distinction between a sled, or sledge,
 and a sleigh, the sleigh being shod with metal. Sleighs are also sub-
 divided into two-horse and one-horse sleighs. Of the latter, there are
 the cutter, with thills so arranged as to permit the horse to travel in
 the side track, the 'pung' or 'tow-pung,' which is driven with a pole,
 and the 'gumper,' a rude construction used for temporary purposes, in
 the new countries.

Many of the American sleighs are elegant, though the use of this
 mode of conveyance is much lessened with the melioration of the climate,
 consequent on the clearing of the forests.—Cooper. Cooper was
 apparently correct in regarding 'sleigh' as an American word, although
 present-day lexicographers believe its origin to have been Dutch. His
 remark on climate represents an opinion on a much-debated question
 of his day.

forest. There was a glittering in the atmosphere, as if it were filled with innumerable shining particles, and the noble bay horses that drew the sleigh were covered, in many parts, with a coat of hoar frost. The vapor from their nostrils was seen to issue like smoke, and every object in the view, as well as every arrangement of the travellers, denoted the depth of a winter in the mountains. The harness, which was of a deep dull black, differing from the glossy varnishing of the present day, was ornamented with enormous plates and buckles of brass, that shone like gold in those transient beams of the sun, which found their way obliquely through the tops of the trees. Huge saddles, studded with nails, and fitted with cloth that served as blankets to the shoulders of the cattle, supported four high, square-topped turrets, through which the stout reins led from the mouths of the horses to the hands of the driver, who was a Negro, of apparently twenty years of age. His face, which nature had colored with a glistening black, was now mottled with the cold, and his large shining eyes filled with tears, a tribute to their power that the keen frosts of those regions always extracted from one of his African origin. Still there was a smiling expression of good humor in his happy countenance, that was created by the thoughts of home, and a Christmas fire-side, with its Christmas frolics. The sleigh was one of those large, comfortable, old-fashioned conveyances, which would admit a whole family within its bosom, but which now contained only two passengers besides the driver. The color of its outside was a modest green, and that of its inside a fiery red. The latter was intended to convey the idea of heat in that cold climate. Large buffalo skins, trimmed around the edges with red cloth, cut into festoons, covered the back of the sleigh, and were spread over its bottom, and drawn up around the feet of the travellers—one of whom was a man of middle age, and the other a female, just entering upon womanhood. The former was of a large stature, but the precautions he had taken to guard against the cold left but little of his person exposed to view. A greatcoat, that was abundantly ornamented by a profusion of furs, enveloped the whole of his figure, excepting the head, which was covered with a cap of marten skins, lined with morocco, the sides of which were made to fall, if necessary, and were now drawn close over the ears, and fastened beneath his chin with a black riband. The top of the cap was sur-

mounted with the tail of the animal whose skin it furnished the rest of the materials, which fell back, ungracefully, a few inches behind the head. From beneath this mask were to be seen part of a fine male face, and particularly a pair of expressive, large blue eyes, that promised extraordinary intellect, covert valor, and great benevolence. The form of his companion was literally hid beneath the garments she wore. There were furs and silks peeping from under a large Canadian cloak, with a thick flannel lining, that, by its cut and size, was evidently intended for a masculine wearer. A huge hood of black silk, that was quilted with down, concealed the whole of her head, except at a small opening in front for breath, through which occasionally sparkled a pair of animated jet-black eyes.

Both the father and daughter (for such was the connection between the two travellers) were too much occupied with their reflections to break a stillness, which received little or no interruption from the easy gliding of the sleigh, by the sound of their voices. The father was thinking of the wife that had held this their first child to her bosom, when, four years before, she reluctantly consented to relinquish the society of her daughter, in order that the latter might enjoy the advantages of an education which the city of New York could only offer at that period. A few months afterward death had deprived him of the remaining companion of his solitude, but still he had enough of regard for his child, not to bring her into the comparative wilderness in which he dwelt, until the full period had expired to which he had limited her juvenile labors. The reflections of the daughter were less melancholy and mingled with a pleased astonishment at the new scenery she met at every turn in the road.

The mountain on which they were journeying was covered with pines, that rose without a branch to a seventy or eighty feet, and which frequently doubled that height by the addition of the tops. Through innumerable vistas that opened beneath the lofty trees the eye could penetrate, until it was met by a deep inequality in the ground, or was stopped by a view of the summit of the mountain, which lay on the opposite side of the valley to which they were hastening. The dark trunks of the trees rose from the pure white snow, in regularly formed shafts, until, at a certain height, their branches shot forth horizontal limbs,

were covered with the meagre foliage of an evergreen, affording a melancholy contrast to the torpor of nature below. To the travellers, there seemed to be no wind; but these pines waved majestically at their topmost boughs, sending forth a dull, plaintive sound, that was quite in consonance with the rest of the melancholy scene

The sleigh had glided for some distance along the even surface, and the gaze of the female was bent in inquisitive, and, perhaps, timid glances, into the recesses of the forest, when a loud and continued howling was heard, pealing under the long arches of the woods, like the cry of a numerous pack of hounds. The instant the sound reached the ears of the gentleman, he cried aloud to the black—

"Hold up, Aggy, there is old Hector, I should know his bay among ten thousand! The Leather-stocking has put his hounds into the hills, this clear day, and they have started their game. There is a deer-track a few rods ahead,—and now, Bess, if thou canst muster courage enough to stand fire, I will give thee a saddle for thy Christmas dinner."

The black drew up, with a cheerful grin upon his chilled features, and began thrashing his arms together, in order to restore the circulation to his fingers, while the speaker stood erect, and, throwing aside his outer covering, stepped from the sleigh upon a bank of snow, which sustained his weight without yielding.

In a few moments the speaker succeeded in extricating a double-barrelled fowling-piece from among a multitude of trunks and bandboxes. After throwing aside the thick mittens which had encased his hands, that now appeared in a pair of leather gloves tipped with fur, he examined his priming, and was about to move forward, when the light bounding noise of an animal plunging through the woods was heard, and a fine buck darted into the path, a short distance ahead of him. The appearance of the animal was sudden, and his flight inconceivably rapid, but the traveller appeared to be too keen a sportsman to be disconcerted by either. As it came first into view he raised the fowling-piece to his shoulder, and, with a practised eye and steady hand, drew a trigger. The deer dashed forward undaunted, and apparently unhurt. Without lowering his piece, the traveller turned its muzzle toward his victim, and fired again. Neither discharge, however, seemed to have taken effect.

The whole scene had passed with a rapidity that confused the female, who was unconsciously rejoicing in the escape of the buck, as he rather darted like a meteor, than ran across the road, when a sharp quick sound struck her ear, quite different from the full, round reports of her father's gun, but still sufficiently distinct to be known as the concussion produced by fire-arms. At the same instant that she heard this unexpected report, the buck sprang from the snow to a great height in the air, and directly a second discharge, similar in sound to the first, followed, when the animal came to the earth, falling headlong, and rolling over on the crust with its own velocity. A loud shout was given by the unseen marksman, and a couple of men instantly appeared from behind the trunks of two of the pines, where they had evidently placed themselves in expectation of the passage of the deer.

"Ha! Natty, had I known you were in ambush, I should not have fired," cried the traveller, moving toward the spot where the deer lay—near to which he was followed by the delighted black, with his sleigh, "but the sound of old Hector was too exhilarating to be quiet, though I hardly think I struck him either."

"No—no—Judge," returned the hunter, with an inward chuckle, and with that look of exultation that indicates a consciousness of superior skill, "you burnt your powder only to warm your nose this cold evening. Did ye think to stop a full-grown buck, with Hector and the slut open upon him within sound, with that pop-gun in your hand? There's plenty of pheasants among the swamps, and the snow-birds are flying round your own door, where you may feed them with crumbs, and shoot them at pleasure, any day, but if you're for a buck, or a little bear's meat, Judge, you'll have to take the long rifle, with a greased wadding, or you'll waste more powder than you'll fill stomachs, I'm thinking."

As the speaker concluded, he drew his bare hand across the bottom of his nose, and again opened his enormous mouth with a kind of inward laugh.

"The gun scatters well, Natty, and it has killed a deer before now," said the traveller, smiling good-humoredly. "One barrel was charged with buck-shot, but the other was loaded for birds only. Here are two hurts; one through the neck, and the other directly through the heart. It is by no means certain, Natty, but I gave him one of the two."

The Leather-Stocking's cabin.

"Let who will kill him," said the hunter, rather surlily, "I suppose the creature is to be eaten." So saying, he drew a large knife from a leathern sheath, which was stuck through his girdle or sash, and cut the throat of the animal. "If there are two balls through the deer, I would ask if there wer'n't two rifles fired—besides, who ever saw such a ragged hole from a smooth-bore, as this through the neck?"—and you will own yourself, Judge, that the buck fell at the last shot, which was sent from a truer and a younger hand than your'n or mine either, but for my part, although I am a poor man, I can live without the venison, but I don't love to give up my lawful dues in a free country. Though, for the matter of that, might often makes right here, as well as in the old country, for what I can see."

An air of sullen dissatisfaction pervaded the manner of the hunter during the whole of this speech, yet he thought it prudent to utter the close of the sentence in such an undertone, as to leave nothing audible but the grumbling sounds of his voice.

"Nay, Natty," rejoined the traveller, with undisturbed good humor, "it is for the honor that I contend. A few dollars will pay for the venison, but what will requite me for the lost honor of a buck's tail in my cap? Think, Natty, how I should triumph over that quizzing dog, Dick Jones, who has failed seven times already this season, and has only brought in one woodchuck and a few gray squirrels."

"Ah! the game is becoming hard to find, indeed, Judge, with your clearings and betterments," said the old hunter, with a kind of compelled resignation. "The time has been, when I have shot thirteen deer, without counting the fa'ns, standing in the door of my own hut!—and for bear's meat, if one wanted a ham or so, he had only to watch a-nights, and he could shoot one by moonlight, through the cracks of the logs; no fear of his over-sleeping himself neither, for the howling of the wolves was

sartin to keep his eyes open. There's old Hector, patting with affection a tall hound, of black and yellow spots, with white belly and legs, that just then came on the scent, accompanied by the slut he had mentior "see where the wolves bit his throat, the night I d them from the venison that was smoking on the chim top,—that dog is more to be trusted than many a Christian man, for he never forgets a friend, and loves hand that gives him bread."

There was a peculiarity in the manner of the hunter that attracted the notice of the young female, who had been a close and interested observer of his appearance and equipments, from the moment he came into view. He was tall, and so meagre as to make him seem at least even the six feet that he actually stood in his stockings. On his head, which was thinly covered with lank, sandy hair, he wore a cap made of foxskin, resembling in shape the one we have already described, although much inferior in finish and ornaments. His face was skinny, thin almost to emaciation; but yet it bore no signs of disease—on the contrary, it had every indication of most robust and enduring health. The cold and the exposure had, together, given it a color of uniform gray. His gray eyes were glancing under a pair of shaggy brows that overhung them in long hairs of gray mingled with their natural hue; his scraggy neck was bare, and blended to the same tint with his face; though a small part of a shirt collar, made of the country check, was to be seen above the over-dress he wore. A kind of coat, made of dressed deerskin, with the hair on, was belted closely to his lank body, by a girdle of colored worsted. On his feet were deerskin moccasins, ornamented with porcupine quills, after the manner of the Indians, and his limbs were guarded with long leggings of the same material as the moccasins, which, gartering over the knees of his tarnished buckskin breeches, had obtained for him, among the settlers, the nickname of Leather-Stocking. Over his left shoulder was slung a belt of deerskin, from which depended an enormous ox horn, thinly scraped as to discover the powder it contained. The larger end was fitted ingeniously and securely into a wooden bottom, and the other was stopped tight with a little plug. A leathern pouch hung before him, and

25 quizzing, fun loving or mocking

which, as he concluded his last speech, he took a small measure, and, filling it accurately with powder, he commenced reloading the rifle, which, as its butt rested on the snow before him, reached nearly to the top of his foxskin cap.

The traveller had been closely examining the wounds during these movements, and now, without heeding the ill-humor of the hunter's manner, he exclaimed:

"I would fain establish a right, Natty, to the honor of this death; and surely if the hit in the neck be mine, it is enough; for the shot in the heart was unnecessary—what we call an act of supererogation, Leather-stocking."

"You may call it by what larned name you please, Judge," said the hunter, throwing his rifle across his left arm, and knocking up a brass lid in the breech, from which he took a small piece of greased leather, and wrapping a ball in it, forced them down by main strength on the powder, where he continued to pound them while speaking. "It's far easier to call names than to shoot a buck on the spring; but the cretur came by his end from a younger hand than either your'n or mine, as I said before."

"What say you, my friend," cried the traveller, turning pleasantly to Natty's companion, "shall we toss up this dollar for the honor, and you keep the silver if you lose; what say you, friend?"

"That I killed the deer," answered the young man with a little haughtiness, as he leaned on another long rifle, similar to that of Natty

"Here are two to one, indeed," replied the Judge, with a smile; "I am outvoted—over-ruled, as we say on the bench. There is Aggy, he can't vote, being a slave; and Bess is a minor—so I must even make the best of it. But you'll sell me the venison, and the deuce is in it, but I make a good story about its death."

"The meat is none of mine to sell," said Leather-stocking, adopting a little of his companion's hauteur; "for my part I have known animals travel days with shots in the neck, and I'm none of them who'll rob a man of his rightful dues."

"You are tenacious of your rights, this cold evening, Natty," returned the Judge, with unconquerable good nature, "but what say you, young man, will three dollars pay you for the buck?"

"First let us determine the question of right to the satisfaction of us both," said the youth, firmly but respectfully, and with a pronunciation and language vastly

superior to his appearance; "with how many shot did you load your gun?"

"With five, sir," said the Judge, a little struck with the other's manner; "are they not enough to slay a buck 50 like this?"

"One would do it, but," moving to the tree from behind which he had appeared, "you know, sir, you fired in this direction—here are four of the bullets in the tree."

The Judge examined the fresh marks in the bark of the pine, and shaking his head, said, with a laugh:

"You are making out the case against yourself, my young advocate—where is the fifth?"

"Here," said the youth, throwing aside the rough overcoat that he wore, and exhibiting a hole in his under 60 garment, through which large drops of blood were oozing

"Good God!" exclaimed the Judge with horror; "have I been trifling here about an empty distinction, and a fellow-creature suffering from my hands without a murmur? But hasten—quick—get into my sleigh—it is but a mile to the village, where surgical aid can be obtained,—all shall be done at my expense, and thou shalt live with me until thy wound is healed, aye, and forever afterward."

"I thank you for your good intention, but I must decline 70 your offer. I have a friend who would be uneasy were he to hear that I am hurt and away from him. The injury is but slight, and the bullet has missed the bones, but I believe, sir, you will now admit my title to the venison."

"Admit it!" repeated the agitated Judge; "I here give thee a right to shoot deer, or bears, or anything thou pleasest in my woods, forever. Leather-stocking is the only other man that I have granted the same privilege to; and the time is coming when it will be of value. 80 But I buy your deer—here, this bill will pay thee, both for thy shot and my own."

The old hunter gathered his tall person up into an air of pride, during this dialogue, but he waited until the other had done speaking.

"There's them living who say that Nathaniel Bumppo's right to shoot on these hills is of older date than Marmaduke Temple's right to forbid him," he said. "But if there's a law about it at all—though who ever heard of a law that a man shouldn't kill deer where he pleased! 90—but if there is a law at all, it should be to keep people from the use of smooth-bores. A body never knows

where his lead will fly, when he pulls the trigger of one of them uncertain fire-arms."

Without attending to the soliloquy of Natty, the youth bowed his head silently to the offer of the bank note, and replied.

"Excuse me, I have need of the venison"

"But this will buy you many deer," said the Judge, "take it, I entreat you," and lowering his voice to a whisper, he added—"it is for a hundred dollars."

10 For an instant only, the youth seemed to hesitate, and then, blushing even through the high color that the cold had given to his cheeks, as if with inward shame at his own weakness, he again declined the offer

During this scene the female arose, and, regardless of the cold air, she threw back the hood which concealed her features, and now spoke, with great earnestness

"Surely, surely—young man,—sir—you would not pain my father so much, as to have him think that he leaves a fellow-creature in this wilderness, whom his
20 own hand has injured I entreat you will go with us, and receive medical aid"

Whether his wound became more painful, or there was something irresistible in the voice and manner of the fair pleader for her father's feelings, we know not; but the distance of the young man's manner was sensibly softened by this appeal, and he stood in apparent doubt, as if reluctant to comply with, and yet unwilling to refuse her request The Judge, for such being his office, must in future be his title, watched, with no little interest, the display of this singular contention in the feelings of the youth; and advancing, kindly took his hand, and as he pulled him gently toward the sleigh, urged him to enter it

"There is no human aid nearer than Templeton," he said, "and the hut of Natty is full three miles from this;—come—come, my young friend, go with us, and let the new doctor look to this shoulder of thine Here is Natty will take the tidings of thy welfare to thy friend; and should'st thou require it, thou shalt return home in
40 the morning."

The young man succeeded in extricating his hand from the warm grasp of the Judge, but he continued to gaze on the face of the female, who, regardless of the cold, was still standing with her fine features exposed, which expressed feelings that eloquently seconded the request of her father Leather-stocking stood, in the meantime,

leaning upon his long rifle, with his head turned a little to one side, as if engaged in sagacious musing; but having apparently satisfied his doubts, by revolving subject in his mind, he broke silence.

"It may be best to go, lad, after all, for if the hands hang under the skin, my hand is getting too old to cutting into human flesh, as I once used to. Though so thirty years ago, in the old war, when I was out with Sir William, I travelled seventy miles alone in the howling wilderness, with a rifle bullet in my thigh, and I cut it out with my own jack-knife. Old Indian Jack knows the time well. I met him with a party of Delawares, on the trail of the Iroquois, who had been down and taken five scalps on the Schoharie But I saw a mark on the redskin that I'll warrant he carried to grave I took him on his postereum, saving the life in presence, as he got up from the ambushment, and ran three buckshot into his naked hide, so close, that it might have laid a broad joe upon them all—" here Natty stretched out his long neck, and straightened his back as he opened his mouth, which exposed a single tussock of yellow bone, while his eyes, his face, even his whole frame seemed to laugh, although no sound was emitted except a kind of thick hissing, as he inhaled his breath in quavers "I had lost my bullet mould in crossing Oneida outlet, and had to make shift with the buckshot but the rifle was true, and didn't scatter like your legged thing there, Judge, which don't do, I find, to be in company with"

Natty's apology to the delicacy of the young lady was unnecessary, for, while he was speaking, she was much employed in helping her father to remove certain articles of baggage to hear him Unable to resist the kind urgency of the travellers any longer, the youth though still with an unaccountable reluctance, submitted himself to be persuaded to enter the sleigh The lady with the aid of his master, threw the buck across the baggage, and entering the vehicle themselves, the youth invited the hunter to do so likewise.

55 Sir William, Sir William Johnson (1715-1774), who led an expedition against Crown Point on Lake Champlain in 1755 and the successful attack on Fort Niagara at the mouth of the Niagara River in 1759. His influence with the Mohawk Indians was one of the main reasons for the British success in their long struggle with the French • 65
joe, gold coin of Portugal

"No, no," said the old man, shaking his head; "I have work to do at home this Christmas eve—drive on with the boy, and let your doctor look to the shoulder; though if he will only cut out the shot, I have yarbs that will heal the wound quicker than all his foreign 'intments." He turned, and was about to move off, when, suddenly recollecting himself, he again faced the party, and added. "If you see anything of Indian John, about the foot of the lake, you had better take him with you, and let him lend the doctor a hand; for old as he is, he is curious at cuts and bruises, and it's likelier than not he'll be in with brooms to sweep your Christmas ha'arths."

"Stop, stop," cried the youth, catching the arm of the black as he prepared to urge his horses forward, "Natty—you need say nothing of the shot, nor of where I am going—remember, Natty, as you love me."

"Trust old Leather-stocking," returned the hunter, significantly, "he hasn't lived fifty years in the wilderness, and not larnt from the savages how to hold his tongue—trust to me, lad, and remember old Indian John."

"And, Natty," said the youth eagerly, still holding the black by the arm, "I will just get the shot extracted, and bring you up to-night, a quarter of the buck, for the Christmas dinner."

He was interrupted by the hunter, who held up his finger with an expressive gesture for silence. He then moved softly along the margin of the road, keeping his eyes steadfastly fixed on the branches of a pine. When he had obtained such a position as he wished, he stopped, and cocking his rifle, threw one leg far behind him, and, stretching his left arm to its utmost extent along the barrel of his piece, he began slowly to raise its muzzle in a line with the straight trunk of the tree. The eyes of the group in the sleigh naturally preceded the movement of the rifle, and they soon discovered the object of Natty's aim. On a small dead branch of the pine, which, at the distance of seventy feet from the ground, shot out horizontally, immediately beneath the living members of the tree, sat a bird, that in the vulgar language of the country was indiscriminately called a pheasant or a partridge. In size, it was but little smaller than a common barn-yard fowl. The baying of the dogs, and the conversation that had passed near the root of the tree on which it was perched, had alarmed the bird, which was now drawn up near the body of the pine, with a head and neck so erect, as to form nearly a straight line

with its legs. As soon as the rifle bore on the victim, Natty drew his trigger, and the partridge fell from its height with a force that buried it in the snow.

"Lie down, you old villain!" exclaimed Leather-stock-⁵⁰ ing, shaking his ramrod at Hector as he bounded toward the foot of the tree, "lie down, I say!" The dog obeyed, and Natty proceeded with great rapidity, though with the nicest accuracy, to reload his piece. When this was ended, he took up his game, and showing it to the party without a head, he cried, "Here is a titbit for an old man's Christmas—never mind the venison, boy, and remember Indian John, his yarbs are better than all the foreign 'intments. Here, Judge," holding up the bird again, "do you think a smooth-bore would pick game⁶⁰ off their roost, and not ruffle a feather?" The old man gave another of his remarkable laughs, which partook so largely of exultation, mirth, and irony, and shaking his head, he turned, with his rifle at a trail, and moved into the forest with steps that were between a walk and a trot. At each movement he made, his body lowered several inches, his knees yielding with an inclination inward, but as the sleigh turned at a bend in the road, the youth cast his eyes in quest of his old companion, and he saw that he was already nearly concealed by the⁷⁰ trunks of the trees, while his dogs were following quietly in his footsteps, occasionally scenting the deer track, that they seemed to know instinctively was now of no further use to them. Another jerk was given to the sleigh, and Leather-stocking was hid from view.

[CHAPTER II Here the reader learns that Marmaduke Temple is the descendant of a Quaker who had settled in Pennsylvania toward the end of the seventeenth century and had acquired many thousands of acres of land. For two generations, however, the family fortunes had dwindled, then, in the person of Marmaduke's father, they began again to rise. Marmaduke, sent to a good school, had made the acquaintance of Edward Effingham, the son of a British major who so disliked business affairs that he transferred his estate to his son. Edward thereupon invested it in a silent partnership with Marmaduke in a Philadelphia mercantile house, a transaction kept secret because of Major Effingham's distrust of the Quaker sect, to which Marmaduke nominally belonged. The business proved successful and the two friends prospered—then came the Revolution. Leaving his papers and effects in

Marmaduke's hands, Edward went to England, whence he returned in the uniform of a British officer. Marmaduke sided with the rebels and, although forced to abandon Philadelphia, handled his business affairs wisely, while serving his country in civil capacities. A large part of his funds he used to purchase confiscated Tory estates in New York, including (as is revealed a bit later) those of the Effinghams. He has now turned from commerce to the settlement and development of his land holdings in Otsego County and has become the chief magistrate in that jurisdiction. His only child and heir, Elizabeth, is returning from school to become the mistress of his household.]

CHAPTER III

Some little while elapsed ere Marmaduke Temple was sufficiently recovered from his agitation to scan the person of his new companion. He now observed that he was a youth of some two or three and twenty years of age, and rather above the middle height. Further observation was prevented by the rough overcoat which was belted close to his form by a worsted sash, much like the one worn by the old hunter. The eyes of the Judge, after resting a moment on the figure of the stranger, were raised to a scrutiny of his countenance. There had been a look of care visible in the features of the youth, when he first entered the sleigh, that had not only attracted the notice of Elizabeth, but which she had been much puzzled to interpret. His anxiety seemed the strongest when he was enjoining his old companion to secrecy, and even when he had decided, and was rather passively suffering himself to be conveyed to the village, the expression of his eyes by no means indicated any great degree of self-satisfaction at the step. But the lines of an uncommonly prepossessing countenance were gradually becoming composed, and he now sat silent, and apparently musing. The Judge gazed at him for some time with earnestness, and then smiling, as if at his own forgetfulness, he said:

"I believe, my young friend, that terror has driven you from my recollection; your face is very familiar, and yet, for the honor of a score of bucks' tails in my cap, I could not tell your name."

"I came into the country but three weeks since," returned the youth coldly, "and I understand you have been absent twice that time."

"It will be five to-morrow. Yet your face is one that I have seen; though it would not be strange, such has been my affright, should I see thee in thy winding-sheet walking by my bedside to-night. What say'st thou, Bess, Am I *compos mentis* or not?—Fit to charge a grand jury, or, what is just now of more pressing necessity, able to do the honors of a Christmas-eve in the hall of Templeton?"

"More able to do either, my dear father," said a playful voice from under the ample inclosures of the hood, "than to kill deer with a smooth-bore." A short pause followed, and the same voice, but in a different accent continued: "We shall have good reasons for our thank giving to-night, on more accounts than one."

The horses soon reached a point where they seemed to know by instinct that the journey was nearly ended and bearing on the bits as they tossed their heads, they rapidly drew the sleigh over the level land which lay at the top of the mountain, and soon came to the point where the road descended, suddenly but circuitously, in the valley.

The Judge was roused from his reflections, when he saw the four columns of smoke which floated above his own chimneys. As house, village, and valley burst on his sight, he exclaimed cheerfully to his daughter:

"See, Bess, there is thy resting-place for life!—A home, too, young man, if thou wilt consent to dwell with us."

The eyes of his auditors involuntarily met; and the color that gathered over the face of Elizabeth was contradicted by the cold expression of her eye, the ambiguous smile that again played about the lips of the stranger seemed equally to deny the probability of his consenting to form one of this family group. The scene was one, however, which might easily warm a heart less given to philanthropy than that of Marmaduke Temple.

The side of the mountain on which our travellers were journeying, though not absolutely perpendicular, was so steep as to render great care necessary in descending the rude and narrow path, which, in that early day, wound along the precipices. The Negro reined in his impatient steeds, and time was given Elizabeth to dwell on a scene which was so rapidly altering under the hand

of man, that it only resembled, in its outlines, the picture she had so often studied with delight in childhood. Immediately beneath them lay a seeming plain, glittering without inequality, and buried in mountains. The latter were precipitous, especially on the side of the plain, and chiefly in forest. Here and there the hills fell away in long, low points, and broke the sameness of the outline, or setting to the long and wide field of snow, which, without house, tree, fence, or any other fixture, resembled so much spotless cloud settled to the earth. A few dark and moving spots were, however, visible on the even surface, which the eye of Elizabeth knew to be so many sleighs going their several ways, to or from the village. On the western border of the plain, the mountains, though equally high, were less precipitous, and, as they receded, opened into irregular valleys and glens, or were formed into terraces and hollows that admitted of cultivation. Although the evergreens still held dominion over many of the hills that rose on this side of the valley, yet the undulating outlines of the distant mountains, covered with forests of beech and maple, gave a relief to the eye, and the promise of a kinder soil. Occasionally spots of white were discoverable amidst the forests of the opposite hills, which announced, by the smoke that curled over the tops of the trees, the habitations of man, and the commencement of agriculture. These spots were sometimes, by the aid of united labor, enlarged into what were called settlements, but more frequently were small and insulated, though so rapid were the changes, and so persevering the labors of those who had cast their fortunes on the success of the enterprise, that it was not difficult for the imagination of Elizabeth to conceive they were enlarging under her eye, while she was gazing, in mute wonder, at the alterations that a few short years had made in the aspect of the country. The points on the western side of this remarkable plain, on which no plant had taken root, were both larger and more numerous than those on its eastern, and one in particular thrust itself forward in such a manner as to form beautifully curved bays of snow on either side. On its extreme end an oak stretched forward, as if to overshadow, with its branches, a spot which its roots were forbidden to enter. It had released itself from the thralldom that a growth of centuries had imposed on the branches of the surrounding forest trees, and threw its gnarled and fantastic arms abroad, in the

wildness of liberty. A dark spot of a few acres in extent at the southern extremity of this beautiful flat, and immediately under the feet of our travellers, alone showed by its rippling surface, and the vapors which exhaled from it, that what at first might seem a plain was one of the mountain lakes, locked in the frosts of winter. A narrow current rushed impetuously from its bosom at the open place we have mentioned, and was to be traced, for miles, as it wound its way toward the south through the real valley, by its borders of hemlock and pine, and by the vapor which arose from its warmer surface into the chill atmosphere of the hills. The banks of this lovely basin, at its outlet, or southern end, were steep but not high, and in that direction the land continued, far as the eye could reach, a narrow but graceful valley, along which the settlers had scattered their humble habitation, with a profusion that bespoke the quality of the soil, and the comparative facilities of intercourse.

Immediately on the bank of the lake and at its foot, stood the village of Templeton. It consisted of some fifty buildings, including those of every description, chiefly built of wood, and which, in their architecture, bore no great marks of taste, but which also, by the unfinished appearance of most of the dwellings, indicated the hasty manner of their construction. To the eye, they presented a variety of colors. A few were white in both front and rear, but more bore that expensive color on their fronts only, while their economical but ambitious owners had covered the remaining sides of the edifices with a dingy red. One or two were slowly assuming the russet of age; while the uncovered beams that were to be seen through the broken windows of their second stories, showed that either the taste or the vanity of their proprietors had led them to undertake a task which they were unable to accomplish. The whole were grouped in a manner that aped the streets of a city, and were evidently so arranged by the directions of one who looked to the wants of posterity rather than to the convenience of the present incumbents. Some three or four of the better sort of buildings, in addition to the uniformity of their color, were fitted with green blinds, which, at that season at least, were rather strangely contrasted to the chill aspect of the lake, the mountains, the forests, and the wide fields of snow. Before the doors of these pretending dwellings were placed a few saplings, either without branches, or possessing only the feeble shoots of one or two summers'

growth, that looked not unlike tall grenadiers on post near the threshold of princes. In truth, the occupants of these favored habitations were the nobles of Templeton, as Marmaduke was its king. They were the dwellings of two young men who were cunning in the law, an equal number of that class who chaffered to the wants of the community under the title of storekeepers; and a disciple of Æsculapius, who, for a novelty, brought more subjects into the world than he sent out of it. In the midst of this incongruous group of dwellings, rose the mansion of the Judge, towering above all its neighbors. It stood in the centre of an inclosure of several acres, which were covered with fruit trees. Some of the latter had been left by the Indians, and began already to assume the moss and inclination of age, therein forming a very marked contrast to the infant plantations that peered over most of the picketed fences of the village. In addition to this show of cultivation, were two rows of young Lombardy poplars, a tree but lately introduced into America, formally lining either side of a pathway, which led from a gate that opened on the principal street to the front door of the building. The house itself had been built entirely under the superintendence of a certain Mr. Richard Jones, whom we have already mentioned, and who from his cleverness in small matters, and an entire willingness to exert his talents, added to the circumstance of their being sisters' children, ordinarily superintended all the minor concerns of Marmaduke Temple. Richard was fond of saying, that this child of his invention consisted of nothing more nor less than what should form the groundwork of every clergyman's discourse; viz, a firstly, and a lastly. He had commenced his labors, in the first year of their residence, by erecting a tall, gaunt edifice of wood, with its gable toward the highway. In this shelter, for it was little more, the family resided three years. By the end of that period, Richard had completed his design. He had availed himself, in this heavy undertaking, of the experience of a certain wandering eastern mechanic, who, by exhibiting a few soiled plates of English architecture, and talking learnedly of friezes, entablatures, and particularly of the composite order, had obtained a very undue influence over Richard's taste, in everything that pertained to that branch of the fine arts. Not that Mr. Jones did not affect to consider Hiram Doolittle a perfect empiric in his profession, being in the constant habit of listening to his treatises on architecture with a kind of indulgent

smile, yet, either from an inability to oppose ther anything plausible from his own stores of learning, from secret admiration, Richard generally submitted the arguments of his coadjutor. Together, they had only erected a dwelling for Marmaduke, but they given a fashion to the architecture of the whole colony. The composite order, Mr. Doolittle would contend, an order composed of many others, and was intended to be the most useful of all, for it admitted into its construction such alterations as convenience or circumstance might require. To this proposition Richard usually assented, and when rival geniuses, who monopolize only all the reputation, but most of the money of a neighborhood, are of a mind, it is not uncommon to see lead the fashion, even in graver matters. In the present instance, as we have already hinted, the castle, as John Templeton's dwelling was termed in common parlance, came to be the model, in some one or other of its numerous excellences, for every aspiring edifice within twenty miles of it.

The house itself, or the "lastly," was of stone, and square, and far from uncomfortable. These were requisites on which Marmaduke had insisted with a more than his ordinary pertinacity. But everything was peaceably assigned to Richard and his associates. These worthies found the material a little too solid, the tools of their workmen, which, in general, were played on a substance no harder than the white pine of the adjacent mountains, a wood so proverbially soft that it is commonly chosen by the hunters for pillows. But this awkward dilemma, it is probable that the ambivalences of our two architects would have left us much to do in the way of description. Driven from the interior of the house by the obduracy of the material, they sought refuge in the porch and on the roof. The former, it was decided, should be severely classical, and the latter a specimen of the merits of the composite order.

A roof, Richard contended, was a part of the edifice that the ancients always endeavored to conceal, it being an excrescence in architecture that was only to be tolerated on account of its usefulness. Besides, as he would add, a chief merit in a dwelling was to present a favorable front on whichever side it might happen to be seen; for

8 Æsculapius, god of medicine in classical mythology

was exposed to all eyes in all weathers, there should be no weak flank for envy or unneighborly criticism to assail. It was therefore decided that the roof should be flat, and with four faces. To this arrangement, Marmaduke objected the heavy snows that lay for months, frequently covering the earth to a depth of three or four feet. Happily, the facilities of the composite order presented themselves to effect a compromise, and the rafters were lengthened, so as to give a descent that should carry off the frozen element. But unluckily, some mistake was made in the admeasurement of these material parts of the fabric, and as one of the greatest recommendations of Hiram was his ability to work by the "square rule," no opportunity was found of discovering the effect until the massive timbers were raised, on the four walls of the building. Then, indeed, it was soon seen that, in defiance of all rule, the roof was by far the most conspicuous part of the whole edifice. Richard and his associate consoled themselves with the belief, that the covering would aid in concealing this unnatural elevation; but every shingle that was laid only multiplied objects to look at. Richard essayed to remedy the evil with paint, and four different colors were laid on by his own hands. The first was a sky-blue, in the vain expectation that the eye might be cheated into the belief it was the heavens themselves that hung so imposingly over Marmaduke's dwelling; the second was what he called a "cloud-color," being nothing more nor less than an imitation of smoke; the third was what Richard termed an invisible green, an experiment that did not succeed against a background of sky. Abandoning the attempt to conceal, our architects drew upon their invention for means to ornament the offensive shingles. After much deliberation and two or three essays by moonlight, Richard ended the affair by boldly covering the whole beneath a color that he christened "sunshine," a cheap way, as he assured his cousin, the Judge, of always keeping fair weather over his head. The platform, as well as the eaves of the house, were surmounted by gaudily painted railings, and the genius of Hiram was exerted in the fabrication of divers urns and mouldings, that were scattered profusely around this part of their labors. Richard had originally a cunning expedient, by which the chimneys were intended to be so low, and so situated, as to resemble ornaments on the balustrades; but comfort required that the chimneys should rise with the roof, in order that the smoke might be carried off,

and they thus became four extremely conspicuous objects in the view.

As this roof was much the most important architectural undertaking in which Mr. Jones was ever engaged, his failure produced a correspondent degree of mortification. At first, he whispered among his acquaintances, that it proceeded from ignorance of the square rule on the part of Hiram, but as his eye became gradually accustomed to the object, he grew better satisfied with his labors, and instead of apologizing for the defects, he commenced praising the beauties of the mansion-house. He soon found hearers, and, as wealth and comfort are at all times attractive, it was, as has been said, made a model for imitation on a small scale. In less than two years from its erection, he had the pleasure of standing on the elevated platform, and of looking down on three humble imitators of its beauty. Thus it is ever with fashion, which even renders the faults of the great, subjects of admiration.

Marmaduke bore this deformity in his dwelling with great good nature, and soon contrived, by his own improvements, to give an air of respectability and comfort to his place of residence. Still there was much of incongruity, even immediately about the mansion-house. Although poplars had been brought from Europe to ornament the grounds, and willows and other trees were gradually springing up nigh the dwelling, yet many a pile of snow betrayed the presence of the stump of a pine; and even in one or two instances, unsightly remnants of trees that had been partly destroyed by fire were seen rearing their black, glistening columns twenty or thirty feet above the pure white of the snow. These, which in the language of the country are termed stubs, abounded in the open fields adjacent to the village, and were accompanied by the ruin of a pine or a hemlock that had been stripped of its bark, and which waved in melancholy grandeur its naked limbs to the blast, a skeleton of its former glory. But these and many other unpleasant additions to the view were unseen by the delighted Elizabeth, who, as the horses moved down the side of the mountain, saw only in gross the cluster of houses that lay like a map at her feet, the fifty smokes that were curling from the valley to the clouds, the frozen lake as it lay imbedded in mountains of evergreen, with the long shadows of the pines on its white surface, lengthening in the setting sun; the dark riband of water that gushed from the outlet, and was winding its way toward the dis-

tant Chesapeake—the altered, though still remembered, scenes of her childhood.

Five years had wrought greater changes than a century would produce in countries where time and labor have given permanency to the works of man. To the young hunter and the Judge the scene had less novelty, though none ever emerge from the dark forests of that mountain, and witness the glorious scenery of that beauteous valley, as it bursts unexpectedly upon them, without a feeling of
10 delight. The former cast one admiring glance from north to south, and sank his face again beneath the folds of his coat; while the latter contemplated, with philanthropic pleasure, the prospect of affluence and comfort that was expanding around him; the result of his own enterprise, and much of it the fruits of his own industry. . . .

[CHAPTER IV. On the way down the mountain the party is met by a four-horse lumber-sleigh containing four men: Richard Jones, small and red-faced; Monsieur Le Quoi, tall and sharp-featured, with projecting eyes, light blue and glassy; Major Fritz Hartmann, solid, short, and square, and Mr. Grant, a meek-looking, long-visaged clergyman. They welcome the Judge and his daughter in their various dialects. Richard attempts to turn around on the narrow road, and a bad accident is averted only by the quick action of the young hunter in seizing the bridles of the lead team, the welcoming party, however, is tossed out into the snow and the sleigh overturned. The Judge throws out the deer and his baggage, leaving Richard and the Negro to bring them when they have righted the larger sleigh; he takes the others in and drives on. Richard worms out of Agamemnon the details of the shooting of the deer.

CHAPTER V. At the base of the mountain Richard and Agamemnon catch up with the smaller sleigh, and all arrive at the mansion-house as the sun goes down. There they are greeted by the major-domo, Benjamin Penguillan (nicknamed Ben Pump), a Cornishman who until 1783 had served in the British navy, by the housekeeper, Remarkable Petibone, and by several lesser servants and the family dogs. The interior, as inexpertly furnished as the house itself is constructed, is described in detail. After some conversation, by which Richard is restrained from attempting to practice his amateur knowledge of surgery upon the young hunter, the village physician arrives.

CHAPTER VI. Dr. Elnathan Todd, largely self-educated, makes elaborate preparations to remove the bullet, though he has never previously attempted such an operation. He is aided by numerous suggestions from bystanders. At length his patient informs him that the ball is only skin deep at the back of the shoulder, no probe will be necessary. The incision is made; young hunter jerks his arm; and the bullet falls out. At that moment Indian John appears in the doorway.]

CHAPTER

Before the Europeans, or, to use a more significant term, the Christians, dispossessed the original owner the soil, all that section of country, which contains New England States, and those of the Middle, which east of the mountains, was occupied by two great nations of Indians, from whom had descended numberless tribes. But, as the original distinctions between these nations were marked by a difference in language, as well as repeated and bloody wars, they never were known to amalgamate, until after the power and inroads of the whites had reduced some of the tribes to a state of dependence, that rendered not only their political, but, considering the wants and habits of a savage, their animal existence also, extremely precarious.

These two great divisions consisted, on the one side, of the Five, or as they were afterward called, the Five Nations, and their allies; and, on the other, of the Lenape, or Delawares, with the numerous and powerful tribes that owned that nation as their Grandfather. The former were generally called, by the Anglo-Americans, the Iroquois, or the Six Nations, and sometimes Mingos. Their appellation, among their rivals, seems generally

21 two . . . Indians, the Iroquois and the Delawares, as Cooper explains shortly. This simple division is not accepted by present ethnologists, although Cooper was right in believing the Six Nations formed a distinct culture group. His knowledge of the Indians has been shown to have been second-hand—the Indian had already passed from the Cooperstown frontier when he was a boy—and to have been largely derived from an *Account of the History, Manners, Customs of the Indian Nations* by J. G. E. Heckewelder (1743-1806). This account first appeared in the *Transactions of the Historical and Literary Committee of the American Philosophical Society*, 1 (1807). Most important, perhaps, is Cooper's acceptance of Heckewelder's glorification of the vanishing Delawares.

have been the Mengwe, or Maqua. They consisted of the tribes, or, as their allies were fond of asserting, in order to raise their consequence, of the several nations of the Mohawks, the Oneidas, the Onondagas, Cayugas, and Senecas; who ranked, in the confederation, in the order in which they are named. The Tuscaroras were admitted to this union, near a century after its formation, and thus completed the number to six.

Of the Lenni Lenape, or as they were called by the whites, from the circumstance of their holding their great council-fire on the banks of that river, the Delaware nation, the principal tribes, besides that which bore the generic name, were, the Mahicanni, Mohicans, or Mohegans, and the Nanticokes, or Nentigoes. Of these, the latter held the country along the waters of the Chesapeake and the sea-shore; while the Mohegans occupied the district between the Hudson and the ocean, including much of New England. Of course, these two tribes were the first who were dispossessed of their lands by the Europeans.

The wars of a portion of the latter are celebrated among us, as the wars of King Philip; but the peaceful policy of William Penn, or Miquon, as he was termed by the natives, effected its object with less difficulty, though not with less certainty. As the natives gradually disappeared from the country of the Mohegans, some scattering families sought a refuge around the council-fire of the mother tribe, or the Delawares.

This people had been induced to suffer themselves to be called *women*, by their old enemies, the Mingoes, or Iroquois, after the latter, having in vain tried the effects of hostility, had recourse to artifice, in order to prevail over their rivals. According to this declaration, the Delawares were to cultivate the arts of peace, and to intrust their defence entirely to the *men*, or warlike tribes of the Six Nations.

This state of things continued until the war of the revolution, when the Lenni Lenape formally asserted their independence, and fearlessly declared that they were again men. But in a government so peculiarly republican as the Indian polity, it was not at all times an easy task to restrain its members within the rules of the nation. Several fierce and renowned warriors of the Mohegans, finding the conflict with the whites to be in vain, sought a refuge with their Grandfather, and brought with them the feelings and principles that had so long distinguished

them in their own tribe. These chieftains kept alive, in some measure, the martial spirit of the Delawares, and would, at times, lead small parties against their ancient enemies, or such other foes as incurred their resentment.

Among these warriors was one race particularly famous for their prowess, and for those qualities that render an Indian hero celebrated. But war, time, disease, and want, had conspired to thin their number, and the sole representative of this once renowned family now stood in the hall of Marmaduke Temple. He had for a long time been an associate of the white men, particularly in their wars, and having been, at a season when his services were of importance, much noticed and flattered, he had turned Christian, and was baptized by the name of John. He had suffered severely in his family during the recent war, having had every soul to whom he was allied cut off by an inroad of the enemy, and when the last, lingering remnant of his nation extinguished their fires, among the hills of the Delaware, he alone had remained, with a determination of laying his bones in that country, where his fathers had so long lived and governed.

It was only, however, within a few months, that he had appeared among the mountains that surrounded Templeton. To the hut of the old hunter he seemed peculiarly welcome, and, as the habits of the "Leather-stocking" were so nearly assimilated to those of the savages, the conjunction of their interests excited no surprise. They resided in the same cabin, ate of the same food, and were chiefly occupied in the same pursuits.

We have already mentioned the baptismal name of this ancient chief, but in his conversation with Natty, held in the language of the Delawares, he was heard uniformly to call himself Chingachgook, which, interpreted, means the "Great Snake." This name he had acquired in youth, by his skill and prowess in war; but when his brows began to wrinkle with time, and he stood alone, the last of his family and his particular tribe, the few Delawares, who yet continued about the head-waters of their river, gave him the mournful appellation of Mohegan.

22 wars . . . Philip, in 1675-1678 • 55 the sole representative. Chingachgook, or Indian John, is a much nobler figure in the other novels of the Leather-Stocking series than he is here. In *The Last of the Mohicans* (1826) Cooper provided him with a son, Uncas, who is perhaps the most idealized Indian in fiction.

Perhaps there was something of deep feeling excited in the bosom of this inhabitant of the forest by the sound of a name that recalled the idea of his nation in ruins, for he seldom used it himself—never indeed, excepting on the most solemn occasions, but the settlers had united, according to the Christian custom, his baptismal with his national name, and to them he was generally known as John Mohegan, or, more familiarly, as Indian John.

From his long association with the white men, the habits of Mohegan were a mixture of the civilized and savage states, though there was certainly a strong preponderance in favor of the latter. In common with all his people, who dwelt within the influence of the Anglo-Americans, he had acquired new wants, and his dress was a mixture of his native and European fashions. Notwithstanding the intense cold without, his head was uncovered, but a profusion of long, black, coarse hair concealed his forehead, his crown, and even hung about his cheeks, so as to convey the idea, to one who knew his present and former conditions, that he encouraged its abundance, as a willing veil, to hide the shame of a noble soul, mourning for glory once known. His forehead, when it could be seen, appeared lofty, broad, and noble. His nose was high, and of the kind called Roman, with nostrils that expanded, in his seventieth year, with the freedom that had distinguished them in youth. His mouth was large, but compressed, and possessing a great share of expression and character, and, when opened, it discovered a perfect set of short, strong, and regular teeth. His chin was full, though not prominent, and his face bore the infallible mark of his people, in its square, high cheekbones. The eyes were not large, but their black orbs glittered in the rays of the candles, as he gazed intently down the hall, like two balls of fire.

The instant that Mohegan observed himself to be noticed by the group around the young stranger, he dropped the blanket, which covered the upper part of his frame, from his shoulders, suffering it to fall over his leggings of untanned deer-skin, where it was retained by a belt of bark that confined it to his waist.

As he walked slowly down the long hall, the dignified and deliberate tread of the Indian surprised the spectators. His shoulders, and body to his waist, were entirely bare, with the exception of a silver medallion of Washington, that was suspended from his neck by a thong of buckskin, and rested on his high chest, amidst many scars. His

shoulders were rather broad and full; but the arm, though straight and graceful, wanted the muscular pearance that labor gives to a race of men. The medal was the only ornament he wore, although enormous in the rim of either ear, which suffered the cartilage fall two inches below the members, had evidently been used for the purposes of decoration in other days. In his hand he held a small basket of the ash-wood slips, colored in divers fantastical conceits, with red and black pattered mingled with the white of the wood.

As this child of the forest approached them, the whole party stood aside and allowed him to confront the object of his visit. He did not speak, however, but stood fixed his glowing eyes on the shoulder of the young hunter, and then turning them intently on the countenance of the Judge. The latter was a good deal astonished at this unusual departure from the ordinarily subdued and quiet manner of the Indian, but he extended his hand, and said—

"Thou art welcome, John. This youth entertains a high opinion of thy skill, it seems, for he prefers the dress of his wound even to our good friend, Dr. Todd."

Mohegan now spoke, in tolerable English, but in a monotonous, guttural tone —

"The children of Miquon do not love the sight of blood, and yet the Young Eagle has been struck by the hand that should do no evil!"

"Mohegan! old John!" exclaimed the Judge, "thinkest thou that my hand has ever drawn human blood unjustly? For shame! for shame, old John! thy religion should have taught thee better."

"The evil spirit sometimes lives in the best heart," returned John, "but my brother speaks the truth; my hand has never taken life, when awake; no! not even when the children of the great English Father were numbering the waters red with the blood of his people."

"Surely John," said Mr. Grant, with much earnestness, "you remember the divine command of our Saviour, 'Judge not, lest ye be judged.' What motive could Judge Temple have for injuring a youth like this? one to whom he is unknown, and from whom he can receive neither injury nor favor!"

John listened respectfully to the divine, and when he had concluded, he stretched out his arm, and said with energy—

"He is innocent—my brother has not done this."

Marmaduke received the offered hand of the other with a smile, that showed, however he might be astonished at his suspicion, he had ceased to resent it; while the wounded youth stood, gazing from his red friend to his host, with interest powerfully delineated in his countenance. No sooner was this act of pacification exchanged, than John proceeded to discharge the duty on which he had come. Dr. Todd was far from manifesting any displeasure at this invasion of his rights, but made way for the new leech, with an air that expressed a willingness to gratify the humors of his patient, now that the all-important part of the business was so successfully performed, and nothing remained to be done but what any child might effect. Indeed, he whispered as much to Monsieur Le Quoi, when he said—

"It was fortunate that the ball was extracted before this Indian came in; but any old woman can dress the wound. The young man, I hear, lives with John and Natty Bumpo, and it's always best to humor a patient, when it can be done discreetly—I say, discreetly, Monsieur "

"Certainement," returned the Frenchman, "you seem ver happy, mister Todd, in your pratique. I tink the elder lady might ver well finish vat you so skeelfully begin."

But Richard had, at the bottom, a great deal of veneration for the knowledge of Mohegan, especially in external wounds; and retaining all his desire for a participation in glory, he advanced nigh the Indian, and said—

"Sago, sago, Mohegan! sago, my good fellow! I am glad you have come, give me a regular physician, like Dr Todd, to cut into flesh, and a native to heal the wound. Do you remember, John, the time when I and you set the bone of Natty Bumpo's little finger after he broke it by falling from the rock, when he was trying to get the partridge that fell on the cliffs? I never could tell yet, whether it was I or Natty who killed that bird: he fired first, and the bird stooped, and then it was rising again as I pulled trigger. I should have claimed it, for a certainty, but Natty said the hole was too big for shot, and he fired a single ball from his rifle, but the piece I carried then didn't scatter, and I have known it to bore a hole through a board, when I've been shooting at a mark, very much like rifle bullets. Shall I help you, John? You know I have a knack at these things."

Mohegan heard this disquisition quite patiently, and when Richard concluded, he held out the basket which

contained his specifics, indicating, by a gesture, that he might hold it. Mr. Jones was quite satisfied with this commission, and, ever after, in speaking of the event, was used to say, that "Doctor Todd and I cut out the bullet, and I and Indian John dressed the wound."

The patient was much more deserving of that epithet, while under the hands of Mohegan, than while suffering under the practice of the physician. Indeed, the Indian gave him but little opportunity for the exercise of a forbearing temper, as he had come prepared for the occasion. His dressings were soon applied, and consisted only of some pounded bark, moistened with a fluid that he had expressed from some of the simples of the woods.

Among the native tribes of the forest, there were always two kinds of leeches to be met with. The one placed its whole dependence on the exercise of a supernatural power, and was held in greater veneration than their practice could at all justify, but the other was really endowed with great skill in the ordinary complaints of the human body, and was more particularly, as Natty had intimated, "curous in cuts and bruises."

While John and Richard were placing the dressings on the wound, Elnathan was acutely eyeing the contents of Mohegan's basket, which Mr. Jones, in his physical ardor, had transferred to the Doctor, in order to hold, himself, one end of the bandages. Here he was soon enabled to detect sundry fragments of wood and bark, of which he, quite coolly, took possession, very possibly without any intention of speaking at all upon the subject; but when he beheld the full blue eye of Marmaduke watching his movements, he whispered to the Judge—

"It is not to be denied, Judge Temple, but what the savages are knowing in small matters of physic. They hand these things down in their traditions. Now in cancers and hydrophoby, they are quite ingenious. I will just take this bark home and analyze it, for, though it can't be worth sixpence to the young man's shoulder, it may be good for the toothache, or rheumatism, or some of them complaints. A man should never be above learning, even if it be from an Indian."

It was fortunate for Dr. Todd that his principles were

29 *Sago*, or *sego*, explained in Cooper's Preface of 1831 as "the ordinary term of salutation used by the Indians of this region." *Otsego*, he said, acquired its name from having been a meeting place for the tribes of that neighborhood.

so liberal, as, coupled with his practice, they were the means by which he acquired all his knowledge, and by which he was gradually qualifying himself for the duties of his profession. The process to which he subjected the specific, differed, however, greatly from the ordinary rules of chemistry; for, instead, of separating, he afterward united the component parts of Mohegan's remedy, and thus was able to discover the tree whence the Indian had taken it.

10 Some ten years after this event, when civilization and its refinements had crept, or rather rushed, into the settlements among these wild hills, an affair of honor occurred, and Elnathan was seen to apply a salve to the wound received by one of the parties, which had the flavor that was peculiar to the tree, or root, that Mohegan had used. Ten years later still, when England and the United States were again engaged in war, and the hordes of the western parts of the State of New York were rushing to the field. Elnathan, presuming on the reputation obtained by these
20 two operations, followed in the rear of a brigade of militia as its surgeon.

When Mohegan had applied the bark, he freely relinquished to Richard the needle and thread that were used in sewing the bandages, for these were implements of which the native but little understood the use; and, stepping back with decent gravity, awaited the completion of the business by the other.

"Reach me the scissors," said Mr. Jones, when he had finished, and finished for the second time, after tying the
30 linen in every shape and form that it could be placed; "reach me the scissors, for here is a thread that must be cut off, or it might get under the dressings, and inflame the wound. See, John, I have put the lint I scraped between two layers of the linen; for though the bark is certainly best for the flesh, yet the lint will serve to keep the cold air from the wound. If any lint will do it good, it is this lint; I scraped it myself, and I will not turn my back at scraping lint to any man on the Patent. I ought to know how, if anybody ought, for my grandfather was
40 a doctor, and my father had a natural turn that way."

"Here, Squire, is the scissors," said Remarkable, producing from beneath her petticoat of green moreen a pair of dull looking shears, "well, upon my say-so, you *have* sewed on the rags as well as a woman."

"As well as a woman!" echoed Richard, with indignation, "what do women know of such matters? and you

are proof of the truth of what I say. Who ever saw such a pair of shears used about a wound? Dr. Todd, I thank you for the scissors from the case. Now, you man, I think you'll do. The shot has been very near taken out, although perhaps, seeing I had a hand in it, I ought not to say so; and the wound is admirably dressed. You will soon be well again; though the jerk you gave my leaders must have a tendency to inflame the shoulder, yet you will do, you will do. You were rather flurried, I suppose, and not used to horses; but I forgive the accident for the motive —no doubt you had the best of your rivals,—yes, now you will do."

"Then, gentlemen," said the wounded stranger, rising and resuming his clothes, "it will be unnecessary for me to trespass longer on your time and patience. There remains but one thing more to be settled, and that is, our respective rights to the deer, Judge Temple."

"I acknowledge it to be thine," said Marmaduke, "and much more deeply am I indebted to thee than for this piece of venison. But in the morning thou wilt call here, and we can adjust this, as well as more important matters. Elizabeth,"—for the young lady, being apprised that her wound was dressed, had re-entered the hall,—"thou wilt order a repast for this youth before we proceed to church; and Aggy will have a sleigh prepared, to convey him to his friend."

"But, sir, I cannot go without a part of the deer," returned the youth, seemingly struggling with his own feelings, "I have already told you that I needed the venison for myself."

"Oh! we will not be particular," exclaimed Richard; "the Judge will pay you in the morning for the whole deer, and Remarkable, give the lad all the animal excepting the saddle; so, on the whole, I think you may consider yourself as a very lucky young man;—you have been shot without being disabled, have had the wound dressed in the best possible manner here in the woods, as well as it would have been done in the Philadelphia hospital if not better; have sold your deer at a high price, and you can keep most of the carcase, with the skin in the bargain. Markey, tell Tom to give him the skin, too, and the morning bring the skin to me, and I will give you half a dollar for it, or at least three and sixpence. I want just such a skin to cover the pillion that I am making for my cousin Bess."

"I thank you, sir, for your liberality, and, I trust, a

also thankful for my escape," returned the stranger; "but you reserve the very part of the animal that I wished for my own use. I must have the saddle myself."

"Must!" echoed Richard, "must is harder to be swallowed than the horns of the buck."

"Yes, must," repeated the youth: when, turning his head proudly around him, as if to see who would dare to controvert his rights, he met the astonished gaze of Elizabeth, and proceeded more mildly—"that is, if a man is allowed the possession of that which his hand hath killed, and the law will protect him in the enjoyment of his own."

"The law will do so," said Judge Temple, with an air of mortification mingled with surprise. "Benjamin, see that the whole deer is placed in the sleigh, and have this youth conveyed to the hut of Leather-stocking. But, young man, thou hast a name, and I shall see you again, in order to compensate thee for the wrong I have done thee?"

"I am called Edwards," returned the hunter; "Oliver Edwards. I am easily to be seen, sir, for I live nigh by, and am not afraid to show my face, having never injured any man."

"It is we who have injured you, sir," said Elizabeth; "and the knowledge that you decline our assistance would give my father great pain. He would gladly see you in the morning."

The young hunter gazed at the fair speaker until his earnest look brought the blood to her temples; when, recollecting himself, he bent his head, dropping his eyes to the carpet, and replied—

"In the morning, then, will I return, and see Judge Temple; and I will accept his offer of the sleigh, in token of amity."

"Amity!" repeated Marmaduke; "there was no malice in the act that injured thee, young man; there should be none in the feelings which it may engender."

"Forgive our trespasses as we forgive those who trespass against us," observed Mr. Grant, "is the language used by our Divine Master himself, and it should be the golden rule of us, his humble followers."

The stranger stood a moment, lost in thought, and then glancing his dark eyes rather wildly around the hall, he bowed low to the divine, and moved from the apartment, with an air that would not admit of detention.

"'Tis strange that one so young should harbor such

feelings of resentment," said Marmaduke, when the door closed behind the stranger, "but while the pain is recent, and the sense of the injury so fresh, he must feel more strongly than in cooler moments. I doubt not we shall see him in the morning more tractable."

Elizabeth, to whom this speech was addressed, did not reply, but moved slowly up the hall, by herself, fixing her eyes on the little figure of the English ingrained carpet that covered the floor, while, on the other hand, Richard gave a loud crack with his whip, as the stranger disappeared, and cried—

"Well, 'duke, you are your own master, but I would have tried law for the saddle, before I would have given it to the fellow. Do you not own the mountains as well as the valleys? are not the woods your own? what right has this chap, or the Leather-stocking, to shoot in your woods, without your permission? Now, I have known a farmer in Pennsylvania order a sportsman off his farm with as little ceremony as I would order Benjamin to put a log in the stove. By the by, Benjamin, see how the thermometer stands. Now, if a man has a right to do this on a farm of a hundred acres, what power must a landlord have who owns sixty thousand—aye, for the matter of that, including the late purchases, a hundred thousand? There is Mohegan, to be sure, he may have some right, being a native; but it's little the poor fellow can do now with his rifle. How is this managed in France, Monsieur Le Quor? Do you let everybody run over your land in that country, helter-skelter, as they do here, shooting the game, so that a gentleman has but little or no chance with his gun?"

"Bah! diable, no, Meester Deeck," replied the Frenchman; "we give, in France, no liberty, except to the lady."

"Yes, yes, to the women, I know," said Richard, "that is your Salic law. I read, sir, all kinds of books; of France, as well as England; of Greece, as well as Rome. But if I were in 'duke's place, I would stick up advertisements

81 Salic law, the ancient code of the Frankish monarchs which had as one provision that women could not inherit land. Richard's use of the term is completely inappropriate. • 83 advertisements. Richard's suggestion is of interest because in 1837 Cooper became bitterly unpopular with his fellow townsmen over just such a notice forbidding trespass on Three Mile Point, a property long used as a park by Cooperstown people. The incident, which had far-reaching effects on Cooper's life and thinking, was used as the basis for *Home as Found* (1838).

to-morrow morning, forbidding all persons to shoot, or trespass in any manner, on my woods. I could write such an advertisement myself, in an hour, as would put a stop to the thing at once."

"Richard," said Major Hartmann, very coolly knocking the ashes from his pipe into the spitting-box by his side, "now when, I have lived seventy-five years on ter Mohawk, and in ter woods—You hat petter mettle as mit ter deyvel, as mit ter hunters. Tey live mit ter gun, and a
10 rifle is petter as ter law."

"A'nt Marmaduke a Judge?" said Richard, indignantly. "Where is the use of being a judge, or having a Judge, if there is no law? Damn the fellow! I have a great mind to sue him in the morning myself, before Squire Doolittle, for meddling with my leaders. I am not afraid of his rifle. I can shoot too. I have hit a dollar many a time at fifty rods."

"Thou hast missed more dollars than ever thou hast hit, Dickon," exclaimed the cheerful voice of the Judge.
20 —"But we will now take our evening's repast, which, I perceive by Remarkable's physiognomy, is ready. Monsieur Le Quoi, Miss Temple has a hand at your service. Will you lead the way, my child?"

"Ah! ma chère Mam'selle, comme je suis enchanté!" said the Frenchman. "Il ne manque que les dames de faire un paradis de Templeton."

Mr. Grant and Mohegan continued in the hall, while the remainder of the party withdrew to an eating parlor, if we except Benjamin, who civilly remained, to close the
30 rear after the clergyman, and to open the front door for the exit of the Indian.

"John," said the divine, when the figure of Judge Temple disappeared, the last of the group, "to-morrow is the festival of the nativity of our blessed Redeemer, when the church has appointed prayers and thanksgiving to be offered up by her children, and when all are invited to partake of the mystical elements. As you have taken up the cross, and become a follower of good and an eschewer of evil, I trust I shall see you before the altar, with a con-
40 trite heart and a meek spirit."

"John will come," said the Indian, betraying no surprise, though he did not understand all the terms used by the other.

"Yes," continued Mr. Grant, laying his hand gently on the tawny shoulder of the aged chief, "but it is not enough to be there in the body, you must come in the

spirit and in truth. The Redeemer died for all, for poor Indian as well as for the white man. Heaven knows no difference in color; nor must earth witness a separation of the church. It is good and profitable, John, to freshen the understanding, and support the wavering observance of our holy festivals, but all form is stench in the nostrils of the Holy One, unless it be accompanied by a devout and humble spirit."

The Indian stepped back a little, and, raising his head to its utmost powers of erection, he stretched his right arm on high, and dropped his forefinger downward, pointing from the heavens, then striking his other hand on his naked breast, he said, with energy—

"The eye of the Great Spirit can see from the cloud the bosom of Mohegan is bare!"

"It is well, John, and I hope you will receive profit and consolation from the performance of this duty. The Great Spirit overlooks none of his children, and the man of woods is as much an object of his care as he who dwells in a palace. I wish you a good-night, and pray God to bless you."

The Indian bent his head, and they separated—the one to seek his hut, and the other to join the party at supper-table. While Benjamin was opening the door for the passage of the chief, he cried, in a tone that meant to be encouraging—

"The parson says the word that is true, John. If so that they took count of the color of the skin in heaven, why they might refuse to muster on their books a Christian-born, like myself, just for the matter of a little snow from cruising in warm latitudes, though, for the matter of that, this damned norwester is enough to whiten the skin of a blackamore. Let the reef out of your blanched man, or your red hide will hardly weather the night, without a touch from the frost."

[CHAPTER VIII. The story now halts for further exposition. Monsieur Le Quoi is revealed to be a refugee from the French Revolution who has become a prosperous stock-keeper in the Judge's "Patent," as the grant of land in Otsego County is known locally. Major Hartmann identified as the descendant of a German immigrant.]

24 Ah! . . . Templeton. Ah! my dear young lady, how pleasant! Only ladies are lacking to make Templeton a paradise.

had settled early in the century on the Mohawk River; he visits his friend the Judge four times a year, staying precisely a week each time. Mr. Grant, it appears, has just arrived as a missionary of the Protestant Episcopal Church; his first public service is scheduled for this very evening, Christmas Eve. It will be held in the great room of the Academy, a structure built by Richard Jones, Hiram Doolittle, and the local Freemasons at a time when Templeton had ambitions for an institution of higher learning. The Academy, now a common country school, is used for unusual trials at law, balls, and other meetings, including church services. When no itinerant preacher appears on a Sunday, Richard Jones is accustomed to read one of Laurence Sterne's sermons.

CHAPTER IX. The Judge and his friends have dinner, and their food is described at mouth-watering length. Conversation turns upon the mysterious young stranger who has been living with Natty Bumppo for nearly three weeks. Elizabeth shows that he has interested her, Richard inclines to be critical of him and of his ancestry. Dinner over, the party prepare to leave for the church service.

CHAPTER X. The Judge, Elizabeth, Mr. Grant, and Major Hartmann walk through the streets, Elizabeth looking out for familiar houses and persons. At the "Bold Dagoon," a tavern on one of the principal corners, they encounter Captain and Mrs. Hollister, the proprietors. When they have entered the Academy, Richard Jones and Monsieur Le Quoi appear and discuss with Hiram Doolittle, who comes on the scene for the first time, the church which is being built opposite the Academy. Richard is trying, none too successfully, to make New St. Paul's, as the church is called, Episcopalian. The Judge has decreed that when it is completed the people shall decide for themselves what denomination it shall be.

CHAPTER XI. The interior of the Academy, the seating of the congregation, and Mr. Grant's service and sermon are described.

CHAPTER XII. The service over, Elizabeth is introduced to Louisa Grant, the clergyman's daughter; the two girls take an immediate fancy to each other. After the Temples go, Chingachgook, Natty Bumppo, Oliver Edwards, and the Grants remain. The Indian and Natty express themselves on religion, and Oliver reveals that he has been baptized an Episcopalian and has never attended worship in any other church. Mr. Grant is moved to invite him and his friends to the Grant home; Chingachgook and

Oliver accept. There, Oliver reveals a strong antipathy to Judge Temple, which the clergyman deprecates, attributing it to Oliver's Delaware blood, of which he has spoken proudly. After an hour's conversation, Oliver and the Indian leave.]

CHAPTER XIII

On one of the corners, where the two principal streets of Templeton intersected each other, stood, as we have already mentioned, the inn called the "Bold Dagoon." In the original plan, it was ordained that the village should stretch along the little stream that rushed down the valley, and the street which led from the lake to the academy was intended to be its western boundary. But convenience frequently frustrates the best regulated plans. The house of Mr., or as, in consequence of commanding the militia of that vicinity, he was called, Captain Hollister, had, at an early day, been erected directly facing the main street, and ostensibly interposed a barrier to its further progress. Horsemen, and subsequently teamsters, however, availed themselves of an opening, at the end of the building to shorten their passage westward, until, in time, the regular highway was laid out along this course, and houses were gradually built on either side, so as effectually to prevent any subsequent correction of the evil.

Two material consequences followed this change in the regular plans of Marmaduke. The main street, after running about half its length, was suddenly reduced to precisely that difference in its width, and the "Bold Dagoon" became, next to the Mansion-house, by far the most conspicuous edifice in the place.

This conspicuousness, aided by the characters of the host and hostess, gave the tavern an advantage over all its future competitors, that no circumstances could conquer. An effort was, however, made to do so, and at the corner diagonally opposite, stood a new building that was intended, by its occupants, to look down all opposition. It was a house of wood, ornamented in the prevailing style of architecture, and about the roof and balustrades was one of the three imitators of the Mansion-house. The upper windows were filled with rough boards secured by nails, to keep out the cold air—for the edifice was far from finished, although glass was to be seen in the lower apartments, and the light of the

powerful fires within denoted that it was already inhabited. The exterior was painted white on the front, and on the end which was exposed to the street; but in the rear, and on the side which was intended to join the neighboring house, it was coarsely smeared with Spanish brown. Before the door stood two lofty posts, connected at the top by a beam, from which was suspended an enormous sign, ornamented around its edges with certain curious carvings in pine boards, and on its
10 faces loaded with masonic emblems. Over these mysterious figures was written, in large letters, "The Templeton Coffee-House, and Travellers' Hotel," and beneath them, "By Habakkuk Foote and Joshua Knapp." This was a fearful rival to the "Bold Dragoon," as our readers will the more readily perceive, when we add that the same sonorous names were to be seen over the door of a newly erected store in the village, a hatter's shop, and the gates of a tan-yard. But, either because too much was attempted to be executed well, or that the "Bold
20 Dragoon" had established a reputation which could not be easily shaken, not only Judge Temple and his friends, but most of the villagers also, who were not in debt to the powerful firm we have named, frequented the inn of Captain Hollister, on all occasions where such a house was necessary.

On the present evening the lumping veteran and his consort were hardly housed after their return from the academy, when the sounds of stamping feet at their threshold announced the approach of visitors, who were
30 probably assembling with a view to compare opinions on the subject of the ceremonies they had witnessed.

The public, or as it was called, the "bar-room," of the "Bold Dragoon," was a spacious apartment, lined on three sides with benches, and on the fourth by fireplaces. Of the latter there were two of such size as to occupy, with their enormous jambs, the whole of that side of the apartment where they were placed, excepting room enough for a door or two, and a little apartment in one corner, which was protected by miniature palisadoes, and
40 profusely garnished with bottles and glasses. In the entrance to this sanctuary, Mrs. Hollister was seated, with great gravity in her air, while her husband occupied himself with stirring the fires, moving the logs with a large stake burnt to a point at one end.

"There, Sargeant, dear," said the landlady, after she thought the veteran had got the logs arranged in the

most judicious manner, "give over poking, for it's good ye'll be doing, now that they burn so convanient. There's the glasses on the table there, and the mug the Doctor was taking his cider and ginger in, but the fire here—just put them in the bar, will ye? for be having the Jooge, and the Major, and Mr. . . . down the night, without reckoning Benjamin Poole and the lawyers—so ye'll be fixing the room tidy, put both flip irons in the coals, and tell Jude, the black baste, that if she's no be claneing up the kit I'll turn her out of the house, and she may live with jontlemen that kape the 'Coffee-house,' good luck 'em. Och! Sargeant, sure it's a great privilege to get a mateing where a body can sit asy, without joompin' and down so often, as this Mr. Grant is doing that so."

"It's a privilege at all times, Mrs. Hollister, while we stand or be seated; or, as good Mr. Whitefield used to do after he had made a wearisome day's march on our knees and pray, like Moses of old, with a fist to the right and left, to lift his hands to heaven, turned her husband, who composedly performed what she had directed to be done. "It was a very pretty Betty, that the Israelites had on that day with the Amalekites. It seems that they fought on a plain, for Moses mentioned as having gone on to the heights to oversee the battle, and wrestle in prayer, and if I should judge with my little learning, the Israelites depended mainly on their horse, for it is written that Joshua cut up his enemy with the edge of the sword, from which I infer not only that they were horse, but well-disciplined troops. Indeed, it says as much as that they were citizens, quite likely volunteers, for raw dragoons seldom strike with the *edge* of their swords, particularly if a weapon be anyway crooked."

"Pshaw! why do ye bother yourself with tattle, about so small a matter," interrupted the landlady, "it was the Lord who was with 'em; for he always went with the Jews, before they fell away; and it's but a matter of what kind of men Joshua commanded, so

6 Spanish brown, a reddish brown • 63 Mr. Whitefield, (1714-1770), English evangelist. Mrs. Hollister's loaves are divided among her Methodism (in which her present husband shares), the memory of the first Captain (whose likeness, in the shape of a dragon, is the sign of the "Bold Dragoon"), and the present Captain Hollister • 69 Israelites . . . Amalekites. See Exodus 17

he was doing the right bidding. Aven them cursed millaishy, the Lord forgive me for swearing, that was the death of him, wid their cowardice, would have carried the day in old times. There's no rason to be thinking that the soldiers were used to the drill."

"I must say, Mrs. Hollister, that I have not often seen raw troops fight better than the left flank of the militia, at the time you mention. They rallied handsomely, and that without beat of drum, which is no easy thing to do under fire, and were very steady till he fell. But the Scriptures contain no unnecessary words; and I will maintain that horse, who know how to strike with the edge of the sword, must be well disciplyn'd. Many a good sarmon has been preached about smaller matters than that one word! If the text was not meant to be particular, why wasn't it written with the sword, and not with the edge? Now, a backhanded stroke, on the edge, takes long practice. Goodness! what an argument would Mr. Whitefield make of that word edge! As to the Captain, if he had only called up the guard of dragoons when he rallied the foot, they would have shown the inimy what the edge of a sword was, for, although there was no commissioned officer with them, yet I think I may say," the veteran continued, stiffening his cravat about the throat, and raising himself up, with the air of a drill-sergeant, "they were led by a man who know'd how to bring them on, in spite of the ravine."

"Is it lade on ye would," cried the landlady, "when we know yourself, Mr. Hollister, that the baste he rode was but little able to joomp from one rock to another, and the animal was as spry as a squirrel? Och! but it's useless to talk, for he's gone this many a year. I would that he had lived to see the true light, but there's mercy for a brave sowl, that died in the saddle, fighting for liberty. It is a poor tombstone they have given him, anyway, and many a good one that died like himself; but the sign is very like, and I will be kapeing it up, while the blacksmith can make a hook for it to swing on, for all the 'coffee-houses' betwane this and Albany."

There is no saying where this desultory conversation would have led the worthy couple, had not the men who were stamping the snow off their feet, on the little platform before the door, suddenly ceased their occupation, and entered the bar-room.

For ten or fifteen minutes, the different individuals, who intended either to bestow or receive edification,

before the fires of the "Bold Dragoon," on that evening, were collecting, until the benches were nearly filled with men of different occupations. Dr. Todd and a slovenly looking, shabby-genteel young man, who took tobacco ⁵⁰ profusely, wore a coat of imported cloth, cut with something like a fashionable air, frequently exhibited a large French silver watch, with a chain of woven hair and a silver key, and who, altogether, seemed as much above the artisans around him as he was himself inferior to the real gentleman, occupied a high-back wooden settee, in the most comfortable corner in the apartment.

Sundry brown mugs, containing cider or beer, were placed between the heavy andirons, and little groups were formed among the guests, as subjects arose, or the ⁶⁰ liquor was passed from one to the other. No man was seen to drink by himself, nor in any instance was more than one vessel considered necessary for the same beverage; but the glass, or the mug, was passed from hand to hand, until a chasm in the line, or a regard to the rights of ownership, would regularly restore the dregs of the potation to him who defrayed the cost.

Toasts were uniformly drunk, and, occasionally, some one, who conceived himself peculiarly endowed by nature to shine in the way of wit, would attempt some such ⁷⁰ sentiment as "hoping that he" who treated, "might make a better man than his father;" or, "live till all his friends wished him dead," while the more humble pot-companion contented himself by saying, with a most imposing gravity in his air, "come, here's luck," or by expressing some other equally comprehensive desire. In every instance, the veteran landlord was requested to imitate the custom of the cupbearers to kings, and taste the liquor he presented, by the invitation of "after you is manners," with which request he ordinarily complied, ⁸⁰ by wetting his lips, first expressing the wish of "here's hoping," leaving it to the imagination of the hearers to fill the vacuum by whatever good each thought most desirable. During these movements, the landlady was busily occupied with mixing the various compounds required by her customers, with her own hands, and occasionally exchanging greetings and inquiries concerning the conditions of their respective families, with such of the villagers as approached the bar.

At length the common thirst being in some measure ⁹⁰ assuaged, conversation of a more general nature became the order of the hour. The physician, and his companion,

who was one of the two lawyers of the village, being considered the best qualified to maintain a public discourse with credit, were the principal speakers. though a remark was hazarded, now and then, by Mr Doolittle, who was thought to be their inferior only in the enviable point of education. A general silence was produced on all but the two speakers by the following observation from the practitioner of the law.—

“So, Dr. Todd, I understand that you have been performing an important operation, this evening, by cutting a charge of buckshot from the shoulder of the son of Leather-stocking?”

“Yes, sir,” returned the other, elevating his little head with an air of importance “I had a small job up at the Judge’s in that way, it was, however, but a trifle to what it might have been, had it gone through the body. The shoulder is not a very vital part, and I think the young man will soon be well. But I did not know that the patient was a son of Leather-stocking: it is news to me to hear that Natty had a wife.”

“It is by no means a necessary consequence,” returned the other, winking, with a shrewd look around the bar-room, “there is such a thing, I suppose you know, in law, as a ‘filius nullius.’”

“Spake it out, man,” exclaimed the landlady, “spake it out in king’s English, what for should ye be talking Indian in a room full of Christian folks, though it is about a poor hunter, who is but a little better in his ways than the wild savages themselves? Och! it’s to be hoped that the missionaries will, in his own time, make a convarson of the poor divils, and then it will matter little of what color is the skin, or wedder there be wool or hair on the head.”

“Oh, it is Latin, not Indian, Miss Hollister,” returned the lawyer, repeating his winks and shrewd looks, “and Dr. Todd understands Latin, or how would he read the labels on his gallipots and drawers? No, no, Miss Hollister, the Doctor understands me, don’t you, Doctor?”

“Hem,—why I guess I am not far out of the way,” returned Elnathan, endeavoring to imitate the expression of the other’s countenance by looking jocular “Latin is a queer language, gentlemen; now I rather guess there is no one in the room except Squire Lippet, who can believe that ‘Far. Av.’ means oatmeal, in English.”

The lawyer in his turn was a good deal embarrassed by this display of learning, for, although he actually had

taken his first degree at one of the eastern univers he was somewhat puzzled with the terms used by companion. It was dangerous, however, to appear outdone in learning in a public bar-room, and before many of his clients; he therefore put the best face on matter, and laughed knowingly, as if there were a joke concealed under it, that was understood only by physician and himself. All this was attentively observed by the listeners, who exchanged looks of approbation and the expressions of “tonguey man,” and “I guess Squire Lippet knows, if anybody doos,” were heard in different parts of the room, as vouchers for the attention of his auditors. Thus encouraged, the lawyer from his chair, and turning his back to the fire, and facing the company, he continued—

“The son of Natty, or the son of nobody, I hope the young man is not going to let the matter drop. This is a country of laws; and I should like to see it fairly tried, whether a man who owns, or says he owns, a hundred thousand acres of land, has any more right to shoot a body than another. What do you think of it, Dr. Todd?”

“Oh! sir, I am of opinion that the gentleman will be well, as I said before, the wound isn’t in a vital part, and as the ball was extracted so soon, and the shot was what I call well attended to, I do not think there is as much danger as there might have been.”

“I say, Squire Doolittle,” continued the attorney, raising his voice, “you are a magistrate, and know what is law, and what is not law. I ask you, sir, if shooting a man is a thing that is to be settled so very easily? I suppose, sir, that the young man had a wife and family, and suppose that he was a mechanic like you, sir, and suppose that his family depended on him for bread, and suppose that the ball, instead of merely going through the flesh, had broken the shoulder-blade, crippled him forever; I ask you all, gentlemen, supposing this to be the case, whether a jury wouldn’t award what I call handsome damages?”

As the close of this suppositious case was addressed to the company generally, Hiram did not, at first, consider himself called on for a reply, but finding that the eyes of the listeners bent on him in expectation, he remembered his character for judicial discrimination, and stepped

24 *filius nullius*, son of nobody

observing a due degree of deliberation and dignity.

"Why, if a man should shoot another," he said, "and if he should do it on purpose, and if the law took notice on't, and if a jury should find him guilty, it would be likely to turn out a state-prison matter."

"It would so, sir," returned the attorney. "The law, gentlemen, is no respecter of persons in a free country. It is one of the great blessings that has been handed down to us from our ancestors, that all men are equal in the eye of the law as they are by nature. Though some may get property, no one knows how, yet they are not privileged to transgress the laws any more than the poorest citizen in the state. This is my notion, gentlemen; and I think that if a man had a mind to bring this matter up, something might be made out of it that would help pay for the salve—ha! Doctor?"

"Why, sir," returned the physician, who appeared a little uneasy at the turn the conversation was taking, "I have the promise of Judge Temple before men—not but what I would take his word as soon as his note of hand—but it was before men. Let me see—there was Mounshier Ler Quow, and Squire Jones, and Major Hartmann, and Miss Pettibone, and one or two of the blacks by, when he said that his pocket would amply reward me for what I did."

"Was the promise made before or after the service was performed?" asked the attorney.

"It might have been both," returned the discreet physician; "though I'm certain he said so before I undertook the dressing."

"But it seems that he said his pocket should reward you, Doctor," observed Hiram. "Now I don't know that the law will hold a man to such a promise, he might give you his pocket with sixpence in't, and tell you to take your pay out on't."

"That would not be a reward in the eye of the law," interrupted the attorney—"not what is called a 'quid pro quo,' nor is the pocket to be considered as an agent, but as part of a man's own person, that is, in this particular. I am of opinion that an action would lie on that promise, and I will undertake to bear him out, free of costs, if he don't recover."

To this proposition the physician made no reply; but he was observed to cast his eyes around him, as if to enumerate the witnesses, in order to substantiate this promise also, at a future day, should it prove necessary.

A subject so momentous as that of suing Judge Temple was not very palatable to the present company in so public a place, and a short silence ensued, that was only interrupted by the opening of the door, and the entrance of Natty himself.

The old hunter carried in his hand his never-failing companion, the rifle, and although all of the company were uncovered excepting the lawyer, who wore his hat on one side, with a certain dam'ne air, Natty moved to the front of one of the fires, without in the least altering any part of his dress or appearance. Several questions were addressed to him, on the subject of the game he had killed, which he answered readily, and with some little interest, and the landlord, between whom and Natty there existed much cordiality, on account of their both having been soldiers in youth, offered him a glass of a liquid, which, if we might judge from its reception, was no unwelcome guest. When the forester had got his potation also, he quietly took his seat on the end of one of the logs that lay nigh the fires, and the slight interruption produced by his entrance seemed to be forgotten.

"The testimony of the blacks could not be taken, sir," continued the lawyer, "for they are all the property of Mr. Jones, who owns their time. But there is a way by which Judge Temple, or any other man, might be made to pay for shooting another, and for the cure in the bargain—There is a way, I say, and that without going into the 'court of errors,' too."

"And a mighty big error ye would make of it, Mister Todd," cried the landlady, "should ye be putting the matter into the law at all, with Joodge Temple, who has a purse as long as one of them pines on the hill, and who is an asy man to dale wid, if yees but mind the humor of him. He's a good man is Joodge Temple, and a kind one, and one who will be no the likelier to do the pratty thing, becuse ye would wish to tarrify him wid the law. I know of but one objection to the same, which is an over carelessness about his sowl. It's neither a Methodist, nor a Papish, nor Prاسبetyrian, that he is, but just nothing at all, and it's hard to think that he, 'who will not fight the good fight, under the banners of a rig'lar church, in this world, will be mustered among the chosen in heaven,' as my husband, the captain there, as ye call him, says—though there is but one captain that I know, who desaves the name. I hopes, Lather-stock-ing, ye'll no be foolish, and putting the boy up to try

the law in the matter, for 'twill be an evil day to ye both, when ye first turn the skin of so paceable an animal as a sheep into a bone of contention. The lad is wilcome to his drink for nothing, until his shoulther will bear the rifle ag'in"

"Well, that's gin'rous," was heard from several mouths at once, for this was a company in which a liberal offer was not thrown away; while the hunter, instead of expressing any of that indignation which he might be
10 supposed to feel, at hearing the hurt of his young companion alluded to, opened his mouth, with the silent laugh for which he was so remarkable, and after he had indulged his humor, made this reply.—

"I know'd the Judge would do nothing with his smooth-bore when he got out of his sleigh. I never saw but one smooth-bore that would carry at all, and that was a French-ducking-piece, upon the big lakes it had a barrel half as long ag'in as my rifle, and would throw fine shot into a goose, at 100 yards, but it made dreadful
20 work with the game, and you wanted a boat to carry it about in. When I went with Sir William ag'in the French, at Fort Niagara, all the rangers used the rifle, and a dreadful weapon it is, in the hands of one who knows how to charge it, and keep a steady aim. The Captain knows, for he says he was a soldier in Shirley's; and though they were nothing but baggonet-men, he must know how we cut up the French and Iroquois in the skimmages in that war. Chingachgook, which means 'Big Serpent' in English, old John Mohegan, who lives
30 up at the hut with me, was a great warrior then, and was out with us, he can tell all about it, too, though he was overhand for the tomahawk, never firing more than once or twice, before he was running in for the scalps. Ah! times is dreadfully altered since then. Why, Doctor, there was nothing but a footpath, or at the most a track for pack-horses, along the Mohawk, from the Jarman Flats up to the forts. Now, they say, they talk of running one of them wide roads with gates on it along the river, first making a road, and then fencing
40 it up! I hunted one season back of the Kaatskills, nigh-hand to the settlements, and the dogs often lost the scent, when they came to them highways, there was so much travel on them; though I can't say that the brutes was of a very good breed. Old Hector will wind a deer in the fall of the year, across the broadest place in the Otsego, and that is a mile and a half, for I paced it my-

self on the ice, when the tract was first surveyed, un the Indian grant."

"It sames to me, Natty, but a sorry compliment, call your comrad after the evil one," said the landla "and it's no much like a snake that old John is look now. Nimrod would be a more besameing name the lad, and a more Christian, too, seeing that it cor from the Bible. The sargeant read me the chapter ab him, the night before my christening, and a mig asement it was, to listen to anything from the book."

"Old John and Chingachgook were very different n to look on," returned the hunter, shaking his head his melancholy recollections.—"In the 'fifty-eighth v he was in the middle of manhood, and taller than r by three inches. If you had seen him, as I did, the mc ing we beat Dieskau, from behind our log walls, ; would have called him as comely a red-skin as ye e set eyes on. He was naked all to his breech-cloth ; leggins, and you never seed a creater so handsom painted. One side of his face was red, and the ot black. His head was shaved clean, all to a few hairs the crown, where he wore a tuft of eagle's feathers bright as if they had come from a peacock's tail had colored his sides so that they looked like an ato ribs and all, for Chingachgook had a great taste in s things, so that, what with his bold, fiery countenai his knife, and his tomahawk, I have never seen a fier warrior on the ground. He played his part, too, lik man; for I saw him next day, with thirteen scalps his pole. And I will say this for the 'Big Snake,' t he always dealt fair, and never scalped any that he di kill with his own hands."

"Well, well," cried the landlady; "fighting is fight anyway, and there is different fashions in the thi

22 Fort Niagara, captured by a large force of British and Ind under the command of Sir William Johnson, on July 7, 1759 • 25 : ley's, William Shirley (1694-1771), royal governor of Massachu from 1741 until 1757, and commander of the British forces in Ame from Braddock's death in 1755 until he was superseded in the follo year. He led an unsuccessful expedition against Fort Niagara in 175 37 Jarman Flats, German Flatts, a settlement on the present sit Herkimer, New York, made by Germans from the Palatinate in 172 52 Nimrod. See Genesis 10 8-9 • 59 fifty-eighth war, the Fr and Indian War • 62 Dieskau, Ludwig August Dieskau (1701-1 German baron and general who served under the French in Can He was taken prisoner by Johnson and his men near Fort Edwar the upper Hudson on September 8, 1755

though I can't say that I relish mangling a body after the breath is out of it; neither do I think it can be upheld by doctrine. I hope, sargeant, ye niver was helping in sich evil worrek."

"It was my duty to keep my ranks, and to stand or fall by the baggonet or lead," returned the veteran. "I was then in the fort, and seldom leaving my place, saw but little of the savages, who kept on the flanks or in front, skirmishing. I remember, howsomever, to have heard mention made of the 'Great Snake,' as he was called, for he was a chief of renown, but little did I ever expect to see him enlisted in the cause of Christianity, and civilized like old John."

"Oh! he was Christianized by the Moravians, who were always over intimate with the Delawares," said Leatherstocking. "It's my opinion that, had they been left to themselves, there would be no such doings now, about the head waters of the two rivers, and that these hills might have been kept as good hunting-ground by their right owner, who is not too old to carry a rifle, and whose sight is as true as a fish-hawk hovering——"

He was interrupted by more stamping at the door, and presently the party from the Mansion-house entered, followed by the Indian himself.

CHAPTER XIV

Some little commotion was produced by the appearance of the new guests, during which the lawyer slunk from the room. Most of the men approached Marmaduke, and shook his offered hand, hoping "that the Judge was well," while Major Hartmann, having laid aside his hat and wig, and substituted for the latter a warm, peaked woollen night-cap, took his seat very quietly on one end of the settee, which was relinquished by its former occupants. His tobacco-box was next produced, and a clean pipe was handed him by the landlord. When he had succeeded in raising a smoke, the Major gave a long whiff, and turning his head toward the bar, he said—

"Petty, pring in ter toddy."

In the mean time the Judge had exchanged his salutations with most of the company, and taken a place by the side of the Major, and Richard had hustled himself into the most comfortable seat in the room. Mr. Le Quoi was the last seated, nor did he venture to place his chair finally until by frequent removals he had ascertained that

he could not possibly intercept a ray of heat from any individual present. Mohegan found a place on an end of one of the benches, and somewhat approximated to the bar. When these movements had subsided, the Judge remarked pleasantly—

"Well, Betty, I find you retain your popularity through all weathers, against all rivals, and among all religions. How liked you the sermon?"

"Is it the sarmon?" exclaimed the landlady. "I can't say but it was rasonable, but the prayers is mighty unasy. It's no small a matter for a body in their fifty-nint' year, to be moving so much in church. Mr Grant sames a godly man, anyway, and his garrel is a hoomble one, and a devout—Here, John, is a mug of cider, laced with whiskey. An Indian will drink cider, though he niver be athirst."

"I must say," observed Hiram, with due deliberation, "that it was a tonguey thing, and I rather guess that it gave considerable satisfaction. There was one part, though, which might have been left out, or something else put in, but then I s'pose that, as it was a written discourse, it is not so easily altered as where a minister preaches without notes."

"Ay! there's the rub, Joodge," cried the landlady. "How can a man stand up and be praching his word, when all that he is saying is written down, and he is as much tied to it as iver a thaving dragoon was to the pickets?"

"Well, well," cried Marmaduke, waving his hand for silence, "there is enough said; as Mr Grant told us, there are different sentiments on such subjects, and in my opinion he spoke most sensibly.—So, Jotham, I am told you have sold your betterments to a new settler, and have moved into the village, and opened a school. Was it cash or dicker?"

The man who was thus addressed occupied a seat immediately behind Marmaduke; and one who was ignorant of the extent of the Judge's observation, might have thought he would have escaped notice. He was of a thin, shapeless figure, with a discontented expression of countenance, and with something extremely shiftless in his whole air. Thus spoken to, after turning and twisting a little, by way of preparation, he made a reply.

14 Moravians, or United Brethren, a German Protestant sect active after 1734 in Indian missions. Heckewelder, from whom Cooper derived much of his Indian lore, was a Moravian missionary.

"Why, part cash, and part dicker. I sold out to a Pumfret-man who was so'thin forehanded. He was to give me ten dollars an acre for the clearin', and one dollar an acre over the first cost on the woodland, and we agreed to leave the buildin's to men. So I tuck Asa Montagu, and he tuck Absalom Bement, and they two tuck old Squire Napthali Green. And so they had a meetin', and made out a vardict of eighty dollars for the buildin's. There was twelve acres of clearin', at ten
10 dollars, and eighty-eight at one, and the whull came to two hundred and eighty-six dollars and a half, after paying the men."

"Hum," said Marmaduke: "what did you give for the place?"

"Why, besides what's comin' to the Judge, I gi'n my brother Tim a hundred dollars for his bargain, but then there's a new house on't, that cost me sixty more, and I paid Moses a hundred dollars, for choppin', and loggin', and sowin', so that the whull stood me in about two
20 hundred and sixty dollars. But then I had a great crop off on't, and as I got twenty-six dollars and a half more than it cost, I conclude I made a pretty good trade on't."

"Yes, but you forgot that the crop was yours without the trade, and you have turned yourself out of doors for twenty-six dollars."

"Oh! the Judge is clean out," said the man, with a look of sagacious calculation, "he turned out a span of horses, that is wuth a hundred and fifty dollars of any man's money, with a bran new wagon, fifty dollars in cash;
30 and a good note for eighty more; and a side-saddle that was valued at seven and a half—so there was jist twelve shillings betwixt us. I wanted him to turn out a set of harness, and take the cow and the sap troughs. He wouldn't—but I saw through it, he thought I should have to buy the tacklin' afore I could use the wagon and horses; but I know'd a thing or two myself, I should like to know of what use is the tacklin' to him! I offered him to trade back ag'in, for one hundred and fifty-five. But my woman said she wanted a churn, so I tuck a
40 churn for the change"

"And what do you mean to do with your time this winter? you must remember that time is money."

"Why, as the master is gone down country, to see his mother, who, they say, is going to make a die on't, I agreed to take the school in hand till he comes back. If times doesn't get worse in the spring, I've some notion

of going into trade, or maybe I may move off to the Genesee, they say they are carryin' on a great stroke of business that-a-way. If the wust comes to the wust, I can but work at my trade, for I was brought up in a shoe manufactory."

It would seem that Marmaduke did not think his society of sufficient value to attempt inducing him to remain where he was, for he addressed no further discourse to the man, but turned his attention to other subjects. After a short pause, Hiram ventured a question.

"What news does the Judge bring us from the Legislature? it's not likely that Congress has done much this session or maybe the French haven't fit any more battles lately?"

"The French, since they have beheaded their king, have done nothing but fight," returned the Judge. "The character of the nation seems changed. I knew many French gentlemen, during our war, and they all appeared to me to be men of great humanity and goodness of heart, but these Jacobins are as bloodthirsty as bull-dogs."

"There was one Roshambow wid us, down at Yorrek-town," cried the landlady; "a mighty pratty man he was too; and their horse was the very same. It was there that the sargeant got the hurt in the leg, from the English batteries, bad luck to 'em."

"Ah! mon pauvre Roi!" murmured Monsieur Le Quoi.

"The Legislature have been passing laws," continued Marmaduke, "that the country much required. Among others, there is an act prohibiting the drawing of seines at any other than proper seasons, in certain of our streams and small lakes, and another, to prohibit the killing of deer in the teeming months. These are laws that were loudly called for, by judicious men, nor do I despair of
5 getting an act to make the unlawful felling of timber a criminal offence."

The hunter listened to this detail with breathless attention, and when the Judge had ended, he laughed in open derision.

"You may make your laws, Judge," he cried, "but who

48 Genesee, a river which runs across New York State from south to north, almost on a line with the present city of Rochester. • 67 Roshambow, Jean Baptiste Donatien de Vimeur, Count Rochambeau (1725-1807), commander of the French forces in the action ended by the surrender of Cornwallis at Yorktown, 1781.

will you find to watch the mountains through the long summer days, or the lakes at night? Game is game, and he who finds may kill, that has been the law in these mountains for forty years, to my sartain knowledge; and I think one old law is worth two new ones. None but a green-one would wish to kill a doe with a fa'n by its side, unless his moccasins were getting old, or his leggins ragged, for the flesh is lean and coarse. But a rifle rings among the rocks along the shore, sometimes, as if fifty pieces were fired at once—it would be hard to tell where the man stood who pulled the trigger."

"Armed with the dignity of the law, Mr Bumpo," returned the Judge, gravely, "a vigilant magistrate can prevent much of the evil that has hitherto prevailed, and which is already rendering the game scarce. I hope to live to see the day when a man's rights in his game shall be as much respected as his title to his farm."

"Your titles and your farms are all new together," cried Natty; "but laws should be equal, and not more for one than another. I shot a deer, last Wednesday was a fortnight, and it floundered through the snow-banks till it got over a brush fence, I catch'd the lock of my rifle in the twigs in following, and was kept back, until finally the creater got off. Now I want to know who is to pay me for that deer; and a fine buck it was. If there hadn't been a fence I should have gotten another shot into it, and I never draw'd upon anything that hadn't wings three times running, in my born days—No, no, Judge, it's the farmers that makes the game scarce, and not the hunters."

"Ter teer is not so plenty as in ter old war, Pumpo," said the Major, who had been an attentive listener, amidst clouds of smoke, "put ter lant is not mate as for ter teer to live on, put for Christians."

"Why, Major, I believe you're a friend to justice and he right, though you go so often to the grand house, but it's a hard case to a man to have his honest calling or a livelihood stopped by laws, and that too when, if ight was done, he mought hunt or fish on any day in the week, or on the best flat in the Patent, if he was so minded."

"I unsterant you, Letter-stockint," returned the Major, xing his black eyes, with a look of peculiar meaning, n the hunter; "put you didn't use to be so prutent, as o look aheth mit so much care."

"Maybe there wasn't so much occasion," said the

hunter, a little sulkily; when he sank into a silei from which he was not roused for some time.

"The Judge was saying so'thin about the Frenc Hiram observed, when the pause in the conversation h continued a decent time.

"Yes, sir," returned Marmaduke, "the Jacobins France seem rushing from one act of licentiousness another. They continue those murders which are di nified by the name of executions. You have heard th they have added the death of their Queen to the lor list of their crimes."

"Les monstres!" again murmured Monsieur Le Qu turning himself suddenly in his chair, with a convulsiv start.

"The province of La Vendée is laid waste by the troop of the republic, and hundreds of its inhabitants, who a royalists in their sentiments, are shot at a time. I Vendée is a district in the southwest of France th continues yet much attached to the family of th Bourbons; doubtless Monsieur Le Quoi is acquainte with it, and can describe it more faithfully."

"Non, non, non, mon cher ami," returned the French man, in a suppressed voice, but speaking rapidly, an gesticulating with his right hand, as if for mercy, whil with his left he concealed his eyes.

"There have been many battles fought lately," cor tinued Marmaduke, "and the infuriated republicans ar too often victorious. I cannot say, however, that I an sorry they have captured Toulon from the English, fo it is a place to which they have a just right."

"Ah—ha!" exclaimed Monsieur Le Quoi, springing or his feet, and flourishing both arms with great animation "ces Anglais!"

The Frenchman continued to move about the room with great alacrity for a few minutes, repeating his exclamations to himself, when, overcome by the contradictory nature of his emotions, he suddenly burst out of the house, and was seen wading through the snow toward his little shop, waving his arms on high, as if to pluck down honor from the moon. His departure excited but little surprise, for the villagers were used to his manner; but Major Hartmann laughed outright, for the first time during his visit, as he lifted the mug, and observed—

"Ter Frenchman is mat—put he is goot as for notting to trink; he is trunk mit joy."

"The French are good soldiers," said Captain Hollister; "they stood us in hand a good turn, down at Yorktown; nor do I think, although I am an ignorant man about the great movements of the army, that his Excellency would have been able to march against Cornwallis, without their reinforcements."

"Ye spake the trut', sargeant," interrupted his wife, "and I would iver have ye be doing the same. It's varry pratty men is the French; and jist when I stopt the
10 cart, the time when ye was pushing on in front it was, to kape the rig'lers in, a rigiment of the jontlemen marched by, and so I dealt them out to their liking. Was it pay I got? sure did I, in good solid crowns. the divil a bit of continental could they muster among them all, for love nor money. Och! the Lord forgive me for swearing and spakeing of such vanities. but this I will say for the French, that they paid in good silver; and one glass would go a great way wid 'em, for they gin'rally handed it back wid a drop in the cup; and that's a brisk
20 trade, Joodge, where the pay is good, and the men not over partic'lar."

"A thriving trade, Mrs. Hollister," said Marmaduke. "But what has become of Richard? he jumped up as soon as seated, and has been absent so long that I am fearful he has frozen."

"No fear of that, cousin 'duke," cried the gentleman himself, "business will sometimes keep a man warm the coldest night that ever snapt in the mountains. Betty, your husband told me, as we came out of church, that
30 your hogs were getting mangy, so I have been out to take a look at them, and found it true. I stepped across, Doctor, and got your boy to weigh me out a pound of salts, and have been mixing it with their swill. I'll bet a saddle of venison against a gray squirrel, that they are better in a week. And now, Mrs. Hollister, I'm ready for a hissing mug of flip."

"Sure I know'd yee'd be wanting that same," said the landlady; "it's mixt and ready to the boiling. Sargeant, dear, be handing up the iron, will ye?—no the one in
40 the far fire, it's black, ye will see. Ah! you've the thing now; look if it's not as red as a cherry."

The beverage was heated, and Richard took that kind of draught which men are apt to indulge in, who think that they have just executed a clever thing, especially when they like the liquor.

"Oh! you have a hand, Betty, that was formed to

mix flip," cried Richard, when he paused for "The very iron has a flavor in it. Here, John man, drink. I and you and Dr. Todd have done thing with the shoulder of that lad this very 'Duke, I made a song while you were gone—when I had nothing to do; so I'll sing you a verse though I haven't really determined on the tune ye

What is life but a scene of care,

Where each one must toil in his way?

Then let us be jolly, and prove that we are
A set of good fellows, who seem very rare

And can laugh and sing all the day.

Then let us be jolly,

And cast away folly,

For grief turns a black head to gray.

There, 'duke, what do you think of that? I another verse of it, all but the last line. I have a rhyme for the last line yet. Well, old John, do you think of the music? as good as one of your songs, ha?"

"Good!" said Mohegan, who had been sharing in the potations of the landlady, besides paying a respect to the passing mugs of the Major and Mary.

"Pravo! pravo! Richard," cried the Major, whose eyes were beginning to swim in moisture; "pravo! it is a goot song, put Natty Pumpppo hast a petter stockint, vilt sing? olt poy, vilt sing ter song, a ter woots?"

"No, no, Major," returned the hunter, with a choly shake of the head, "I have lived to see thought eyes could never behold in these hills have no heart left for singing. If he, that has a be master and ruler here, is forced to squinch his when a-dry, with snow-water, it ill becomes th have lived by his bounty to be making merry, as was nothing in the world but sunshine and sumr

When he had spoken, Leather-stocking again put his head on his knees, and concealed his wrinkled features with his hands. The change from excessive cold without, to the heat of the bar-room, filled with the depth and frequency of Richard's drink, had already levelled whatever inequality there might have existed between him and the other guests, on the spirits, and he now held out a pair of swimming eyes of foaming flip toward the hunter, as he cried—

"Merry! ay! merry Christmas to you, old boy! Sunshine and summer! no! you are blind, Leather-stockings, 'tis moonshine and winter;—take these spectacles, and open your eyes—

So let us be jolly,
And cast away folly,
For grief turns a black head to gray

"Hear how old John turns his quavers. What damned dull music an Indian song is after all, Major! I wonder if they ever sing by note."

While Richard was singing and talking, Mohegan was uttering dull, monotonous tones, keeping time by a gentle motion of his head and body. He made use of but few words, and such as he did utter were in his native language, and consequently only understood by himself and Natty. Without heeding Richard, he continued to sing a kind of wild, melancholy air, that rose, at times, in sudden and quite elevated notes, and then fell again into the low, quavering sounds that seemed to compose the character of his music.

The attention of the company was now much divided, the men in the rear having formed themselves into little groups, where they were discussing various matters; among the principal of which were the treatment of mangy hogs, and Parson Grant's preaching, while Dr. Todd was endeavoring to explain to Marmaduke the nature of the hurt received by the young hunter. Mohegan continued to sing, while his countenance was becoming vacant, though, coupled with his thick bushy hair, it was assuming an expression very much like brutal ferocity. His notes were gradually growing louder, and soon rose to a height that caused a general cessation in the discourse. The hunter now raised his head again, and addressed the old warrior, warmly, in the Delaware language, which, for the benefit of our readers, we shall render freely into English.

"Why do you sing of your battles, Chingachgook, and of the warriors you have slain, when the worst enemy of all is near you, and keeps the Young Eagle from his rights? I have fought in as many battles as any warrior in your tribe, but cannot boast of my deeds at such a time as this."

"Hawk-eye," said the Indian, tottering with a doubtful step from his place, "I am the Great Snake of the Delawares. I can track the Mingoes like an adder that is

stealing on the whip-poor-will's eggs, and strike them like a rattlesnake, dead at a blow. The white man made the tomahawk of Chingachgook bright as the water of Otsego, when the last sun is shining; but it is red with the blood of the Maquas "

"And why have you slain the Mingo warriors? Was it not to keep these hunting grounds and lakes to your father's children? and were they not given in solemn council to the Fire-eater? and does not the blood of a warrior run in the veins of the young chief, who should speak aloud, where his voice is now too low to be heard?"

The appeal of the hunter seemed in some measure to recall the confused faculties of the Indian, who turned his face toward the listeners and gazed intently on the Judge. He shook his head, throwing his hair back from his countenance, and exposed eyes that were glaring with an expression of wild resentment. But the man was not himself. His hand seemed to make a fruitless effort to release his tomahawk, which was confined by its handle to his belt, while his eyes gradually became vacant. Richard at that instant thrusting a mug before him, his features changed to the grin of idiocy, and seizing the vessel with both hands, he sank backward on the bench and drank until satiated, when he made an effort to lay aside the mug with the helplessness of total inebriety

"Shed not blood!" exclaimed the hunter, as he watched the countenance of the Indian in its moment of ferocity; "but he is drunk, and can do no harm. This is the way with all the savages, give them liquor, and they make dogs of themselves. Well, well—the time will come when right will be done, and we must have patience."

Natty still spoke in the Delaware language, and of course was not understood. He had hardly concluded, before Richard cried—

"Well, old John is soon sowed up. Give him a berth, Captain, in the barn, and I will pay for it. I am rich to-night, ten times richer than 'duke, with all his lands, and military lots, and funded debts, and bonds, and mortgages.

Come let us be jolly,
And cast away folly,
For grief—

Drink, King Hiram—drink, Mr. Doo-nothing—drink, sir, I say. This is a Christmas eve, which comes, you know, but once a year."

"He! he! he! the squire is quite moosical to-night,"

said Hiram, whose visage began to give marvellous signs of relaxation. "I rather guess we shall make a church on't yet, Squire?"

"A church, Mr. Doolittle! we will make a cathedral of it! bishops, priests, deacons, wardens, vestry, and choir-organ, organist, and bellows! By the Lord Harry, as Benjamin says, we will clap a steeple on the other end of it, and make two churches of it. What say you, 'duke, will you pay? ha! my cousin Judge, wil't pay!'"

10 "Thou makest such a noise, Dickon," returned Marmaduke, "it is impossible that I can hear what Dr Todd is saying,—I think thou observed'st, it is probable the wound will fester, so as to occasion danger to the limb in this cold weather?"

"Out of nater, sir, quite out of nater," said Elnathan, attempting to expectorate, but succeeding only in throwing a light, frothy substance, like a flake of snow, into the fire—"quite out of nater, that a wound so well dressed, and with the ball in my pocket, should fester.

20 I s'pose, as the Judge talks of taking the young man into his house, it will be most convenient if I make but one charge on't."

"I should think one would do," returned Marmaduke, with that arch smile that so often beamed on his face; leaving the beholder in doubt whether he most enjoyed the character of his companion, or his own covert humor. The landlord had succeeded in placing the Indian on some straw in one of his outbuildings, where, covered with his own blanket, John continued for the remainder
30 of the night.

In the mean time, Major Hartmann began to grow noisy and jocular, glass succeeded glass, and mug after mug was introduced, until the carousal had run deep into the night, or rather morning, when the veteran German expressed an inclination to return to the Mansion-house. Most of the party had already retired, but Marmaduke knew the habits of his friend too well to suggest an earlier adjournment. So soon, however, as the proposal was made, the Judge eagerly availed himself of it, and
40 the trio prepared to depart. Mrs. Hollister attended them to the door in person, cautioning her guests as to the safest manner of leaving her premises.

"Lane on Mister Jones, Major," said she, "he's young, and will be a support to ye. Well, it's a charming sight to see ye, any way, at the Bould Dragoon; and sure it's no harm to be kaping a Christmas eve wid a light heart,

for it's no telling when we may have sorrow come upo us. So good night, Joodge, and a merry Christmas to y all, to-morrow morning."

The gentlemen made their adieus as well as they coul and taking the middle of the road, which was a fine, wid and well-beaten path, they did tolerably well until the reached the gate of the Mansion-house but on enterin the Judge's domains, they encountered some slight di ficulties. We shall not stop to relate them, but will ju mention that, in the morning, sundry diverging pat were to be seen in the snow, and that once during the progress to the door, Marmaduke, missing his con panions, was enabled to trace them, by one of the paths, to a spot where he discovered them with nothin visible but their heads. Richard singing in a mo vivacious strain,

"Come, let us be jolly,

And cast away folly,

For grief turns a black head to gray."

[CHAPTER XV. Meanwhile, back at the mansion-house there have been conversations between Elizabeth and Remarkable Pettibone, and between Remarkable and Be Pump after Elizabeth has gone to bed. The latter dialogue is considerably the warmer for the steady consumption of a bottle of rum. It grows clear that the housekeeper likely to resent Elizabeth's assumption of the rôle of mistress and that Ben enjoys talking about his seafaring pas

CHAPTER XVI. Before breakfast on Christmas mornin Elizabeth steps out for some fresh air, meets Richard Jones and gets him his Christmas present—a commission as sheriff of Otsego County. Walking out to observe the "improvements" of Templeton, the two encounter Olive Edwards, Natty Bumppo, and Chingachgook, who are debating which shall spend the single shilling they have among them for the entry fee in the traditional Christmas turkey shoot. Elizabeth offers another shilling, and Natty agrees to shoot for her; but Oliver, who shows great anxiety to win the bird, claims the right to precede his friend

CHAPTER XVII. It seems that Natty has long had a rival in marksmanship, a woodchopper named Billy Kirby. They prepare for the test, which is to hit the head of a turkey at the distance of one hundred yards. Kirby misses; Olive misses; Natty's gun snaps but does not fire. After some argument Natty is ruled to have had his chance. Kirby

misses again; Oliver declines a second shot, Natty, taking great care this time, kills the turkey, which Elizabeth asks Oliver to accept as a peace offering. As she and Richard turn back toward the mansion-house they meet Judge Temple, who wishes to speak to Oliver.

CHAPTER XVIII. The Judge has decided that he needs a new assistant, now that Richard is to be sheriff, and he asks Oliver to take the post. Oliver at first refuses; then, after some discussion in which Chingachgook takes the Judge's part, agrees to undertake the task as an experiment. The Temples go home, discussing Oliver's strange reluctance to accept such a promising post; the other party likewise discuss the event, Oliver remarking that he could not have foreseen a month earlier even a tentative acceptance of living and serving in the "dwelling of the greatest enemy of my race." Natty is most uncertain of the experiment, although he is aware that times are changing. Chingachgook is sure that the days when one could live by hunting are at an end. That afternoon there is a heavy rain and the snow disappears.

CHAPTER XIX. At night, however, the wind shifts, the weather turns suddenly severe; and in the morning all Templeton is covered with a sheet of ice. Oliver, in civilized clothing, arrives to take up his work, Major Hartmann departs. Three months pass as Oliver learns his duties. To the mystification of the Templeton folk, however, he spends all his leisure moments and many of his nights in Natty Bumpo's hut.

CHAPTER XX. Spring comes gradually. At the end of March Richard proposes an excursion to see Billy Kirby's "sugar bush" and a magnificent view of the valley which he has discovered. Elizabeth, Louisa Grant, Oliver, Monsieur Le Quoi, the Judge, and Richard all go on horseback. The Judge has already shown his determination to preserve the maple trees and encourage the maple-sugar industry, which is described in detail.

CHAPTER XXI. On the way to the "view" the Judge is led to reminiscence of his first travels in the region and his first meeting with Natty Bumpo. Oliver shows keen interest in the Judge's acquisition of the land and in Natty's views of the Indian rights, a subject which the Judge does not take to kindly. On the return to the village a tree falls across the path, and Oliver saves Louisa by grasping her horse's bridle. "Now, Mr. Edwards," she remarks at the end of the chapter, "both father and daughter owe their lives to you."

CHAPTER XXII. Thaws and freezes alternate until the close of April. Then one day the pigeons arrive from the south. They fly over the valley in such numbers that even the children can kill them, and are so ruthlessly destroyed that the villagers cover the ground with dead and dying birds. Natty Bumpo is disgusted at the wastefulness, but when the chance comes to humiliate Billy Kirby by bringing down a single pigeon he cannot resist the temptation and again displays incredible skill with his rifle.

CHAPTER XXIII. The season now advances rapidly. Fishing having begun, Richard organizes a night expedition to seine for bass; the first cast brings in two thousand fish. The Judge perceives that such methods are "a fearful expenditure of the choicest gifts of Providence."

CHAPTER XXIV. Elizabeth and Louisa, strolling along the shore of the lake, observe a fire on the farther side, where Natty has his cabin. The light approaches and a canoe appears, manned by Natty and Chingachgook. Natty refuses a gift of fish acquired by "such a sinful kind of fishing"; he then takes Elizabeth out in the canoe and exhibits his skill with the spear. Their expedition ends suddenly when Ben Pump, handling the seine, is knocked into the lake from Billy Kirby's boat. Ben cannot swim, but he is rescued by Natty, who entwines his spear in Ben's clothing and hair.

CHAPTER XXV. Next morning Richard expects to take the Judge to a spot where he hints coal may be found, but discovers that the Judge has spent a sleepless night after having received a letter from London. The letter is read by Richard and makes little sense to the reader; it appears, however, to convey the news of the loss of a ship which sailed from Falmouth in England about the first of September 1792. For some mysterious reason this is most upsetting to the Judge. He sends for his lawyer, Dirk Van der School, and spends the day drawing up confidential papers. Oliver is excluded from this business and is very curious; his questioning of Elizabeth and the lawyer is of no avail. For many days the Judge is uneasy and melancholy, but early in July he agrees to accompany Richard on the excursion relating to mines.

CHAPTER XXVI. As Richard and the Judge start off, Elizabeth and Louisa are ready to go out walking. The Judge warns them of the heat and suggests that they be careful not to stray too far into the forest. Oliver, who has planned to go fishing, offers to accompany the girls as their protector and is snubbed for his pains; they take

the mastiff Brave instead. Oliver then rows across the lake to Natty's cabin, where he is somewhat surprised to find Hiram Doolittle lurking in the bushes. He secures the cabin with a padlock and returns to the lake. The story then goes on as follows:]

. . . There were several places in the Otsego that were celebrated fishing-grounds for perch. One was nearly opposite to the cabin, and another, still more famous, was near a point, at the distance of a mile and a half above it, under the brow of the mountain, and on the same side of the lake with the hut. Oliver Edwards pulled his little skiff to the first, and sat, for a minute, undecided whether to continue there, with his eyes on the door of the cabin, or to change his ground, with a
10 view to get superior game. While gazing about him, he saw the light-colored bark canoe of his old companions, riding on the water, at the point we have mentioned, and containing two figures, that he at once knew to be Mohegan and the Leather-stocking. This decided the matter, and the youth pulled, in a very few minutes, to the place where his friends were fishing, and fastened his boat to the light vessel of the Indian.

The old men received Oliver with welcoming nods, but neither drew his line from the water, nor in the least
20 varied his occupation. When Edwards had secured his own boat, he baited his hook and threw it into the lake, without speaking.

"Did you stop at the wigwam, lad, as you rowed past?" asked Natty.

"Yes, and I found all safe; but that carpenter and justice of the peace, Mr., or as they call him, Squire, Doolittle, was prowling through the woods. I made sure of the door before I left the hut, and I think he is too great a coward to approach the hounds."

30 "There's little to be said in favor of that man," said Natty, while he drew in a perch and baited his hook. "He craves dreadfully to come into the cabin, and has as good as asked me as much to my face, but I put him off with unsartain answers so that he is no wiser than Solomon. This comes of having so many laws that such a man may be called on to intarpret them."

"I fear he is more knave than fool," cried Edwards; "he makes a tool of that simple man, the Sheriff, and I dread that his impertinent curiosity may yet give us
40 much trouble."

"If he harbors too much about the cabin, lad, I'll sh the creater," said the Leather-stocking, quite simply.

"No, no, Natty, you must remember the law," said Edwards, "or we shall have you in trouble; and th old man, would be an evil day, and sore tidings us all."

"Would it, boy!" exclaimed the hunter, raising eyes with a look of friendly interest, toward the youth. "You have the true blood in your veins, Mr. Oliver, and I'll support it to the face of Judge Temple, or in court in the country. How is it, John? Do I speak true word? Is the lad staunch, and of the right blood?"

"He is a Delaware," said Mohegan, "and my brother. The young Eagle is brave, and he will be a chief. No harm can come."

"Well, well," cried the youth, impatiently, "say more about it, my good friends; if I am not all that you partiality would make me, I am yours through life, prosperity as in poverty. We will talk of other matters."

The old hunters yielded to his wish, which seemed to be their law. For a short time a profound silence prevailed, during which each man was very busy with hook and line, but Edwards, probably feeling that it remained with him to renew the discourse, soon observed with the air of one who knew not what he said—

"How beautifully tranquil and glassy the lake is! See you it ever more calm and even than at this moment, Natty?"

"I have known the Otsego water for five and forty years," said Leather-stocking, "and I will say that for which is, that a cleaner spring or better fishing is to be found in the land. Yes, yes; I had the place myself once, and a cheerful time I had of it. The game was plenty as heart could wish, and there was none to meddle with the ground, unless there might have been a hunting party of the Delawares crossing the hills, maybe, a rifling scout of them thieves, the Iroquois. There was one or two Frenchmen that squatted in flats, further west, and married squaws, and some of Scotch-Irishers, from the Cherry-Valley, would come to the lake, and borrow my canoe to take a mess parch, or drop a line for salmon-trout, but, in the mean

80 Cherry-Valley, a settlement made in 1740 about ten miles north of Cooperstown. It was the scene of a massacre by Indians and Tories in 1778.

it was a cheerful place, and I had but little to disturb me in it. John would come, and John knows."

Mohegan turned his dark face at this appeal; and, moving his hand forward with a graceful motion of assent, he spoke, using the Delaware language—

"The land was owned by my people, we gave it to my brother, in council—to the Fire-eater; and what the Delawares give lasts as long as the waters run. Hawk-eye smoked at that Council, for we loved him."

"No, no, John," said Natty; "I was no chief, seeing that I know'd nothing of scholarship, and had a white skin. But it was a comfortable hunting-ground then, lad, and would have been so to this day, but for the money of Marmaduke Temple, and the twisty ways of the law."

"It must have been a sight of melancholy pleasure indeed," said Edwards, while his eye roved along the shores and over the hills, where the clearings, groaning with the golden corn, were cheering the forests with the signs of life, "to have roamed over these mountains, and along this sheet of beautiful water, without a living soul to speak to, or to thwart your humor."

"Haven't I said it was cheerful?" said Leather-stocking. "Yes, yes, when the trees began to be covered with leaves, and the ice was out of the lake, it was a second paradise. I have travelled the woods for fifty-three years, and have made them my home for more than forty; and I can say that I have met but one place that was more to my liking, and that was only to eyesight, and not for hunting or fishing."

"And where was that?" asked Edwards.

"Where? why up on the Catskills. I used often to go up into the mountains after wolves' skins and bears, once they paid me to get them a stuffed painter, and so I often went. There's a place in them hills that I used to climb to when I wanted to see the carryings on of the world, that would well pay any man for a barked shin or a torn moccasin. You know the Catskills, lad, for you must have seen them on your left, as you followed the river up from York, looking as blue as a piece of clear sky, and holding the clouds on their tops, as the smoke curls over the head of an Indian chief at the council fire. Well, there's the High-peak and the Round-top, which lay back like a father and mother among their children, seeing they are far above all the other hills. But the place I mean is next to the river, where one of the ridges

juts out a little from the rest, and where the rocks fall, for the best part of a thousand feet, so much up and down, that a man standing on their edges is fool enough to think he can jump from top to bottom."

"What see you when you get there?" asked Edwards.

"Creation," said Natty, dropping the end of his rod into the water, and sweeping one hand around him in a circle: "all creation, lad. I was on that hill when Vaughan burned 'Sopus in the last war, and I saw the vessels come out of the Highlands as plain as I can see that lime-scow rowing into the Susquehanna, though one was twenty times further from me than the other. The river was in sight for seventy miles, looking like a curled shaving under my feet, though it was eight long miles to its banks. I saw the hills in the Hampshire grants, the highlands of the river, and all that God had done, or man could do, far as eye could reach—you know that the Indians named me for my sight, lad, and from the flat on the top of that mountain, I have often found the place where Albany stands. And as for 'Sopus, the day the royal troops burnt the town, the smoke seemed so nigh, that I thought I could hear the screeches of the women."

"It must have been worth the toil to meet with such a glorious view."

"If being the best part of a mile in the air, and having men's farms and houses at your feet, with rivers looking like ribbons, and mountains bigger than the 'Vision,' seeming to be hay-stacks of green grass under you, gives any satisfaction to a man, I can recommend the spot. When I first came into the woods to live, I used to have weak spells when I felt lonesome, and then I would go into the Catskills, and spend a few days on that hill to look at the ways of man; but it's now many a year since I felt any such longings, and I am getting too old for rugged rocks. But there's a place, a short two miles back of that very hill, that in late times I relished better than the mountain, for it was more covered with the trees, and nateral."

35 a place . . . hills. Cooper is almost certainly describing North Point, the site of the Catskill Mountain House, built in 1823. It is about halfway between Albany and Kingston, on the west bank of the Hudson. • 54 when . . . 'Sopus. Kingston, settled by the Dutch under the name of Esopus, was burned by the British under the command of General Sir John Vaughan (1748?-1795) on October 16, 1777

"And where was that?" inquired Edwards, whose curiosity was strongly excited by the simple description of the hunter.

"Why, there's a fall in the hills where the water of two little ponds, that lie near each other, breaks out of their bounds and runs over the rocks into the valley. The stream is, maybe, such a one as would turn a mill, if so useless a thing was wanted in the wilderness. But the hand that made that 'Leap' never made a mill. There
10 the water comes crooking and winding among the rocks; first so slow that a trout could swim in it, and then starting and running like a crater that wanted to make a far spring, till it gets to where the mountain divides, like the cleft hoof of a deer, leaving a deep hollow for the brook to tumble into. The first pitch is nigh two hundred feet, and the water looks like flakes of driven snow afore it touches the bottom; and there the stream gathers itself together again for a new start, and maybe
20 flutters over fifty feet of flat rock before it falls for another hundred, when it jumps about from shelf to shelf, first turning this-away and then turning that-away, striving to get out of the hollow, till it finally comes to the plain."

"I have never hear of this spot before; it is not mentioned in the books."

"I never read a book in my life," said Leather-stockings; "and how should a man who has lived in towns and schools know anything about the wonders of the woods? No, no lad; there has that little stream of water been
30 playing among the hills since He made the world, and not a dozen white men have ever laid eyes on it. The rock sweeps like mason-work, in a half-round, on both sides of the fall, and shelves over the bottom for fifty feet, so that when I've been sitting at the foot of the first pitch, and my hounds have run into the caverns behind the sheet of water, they've looked no bigger than so many rabbits. To my judgment, lad, it's the best piece of work that I've met with in the woods; and none know how often the hand of God is seen in the wilderness,
40 but them that rove it for a man's life."

"What becomes of the water? In which direction does it run? Is it a tributary of the Delaware?"

"Anan!" said Natty.

"Does the water run into the Delaware?"

"No, no; it's a drop for the old Hudson, and a merry time it has till it gets down off the mountain. I've sat

on the shelving rock many a long hour, boy, and watch the bubbles as they shot by me, and thought how long would be before that very water, which seemed made for the wilderness, would be under the bottom of a vessel, and tossing in the salt sea. It is a spot to make a man solemnize. You can see right down into the valley that lies to the east of the High Peak, where, in the course of the year, thousands of acres of woods are before your eyes, in the deep hollow, and along the side of the mountain, painted like ten thousand rainbows, by no human hand, though without the ordering of God's providence.

"You are eloquent, Leather-stockings," exclaimed the youth.

"Anan!" repeated Natty.

"The recollection of the sight has warmed your blood, old man. How many years is it since you saw the place?"

The hunter made no reply, but, bending his ear to the water, he sat holding his breath, and listening tentatively as if to some distant sound. At length he raised his head, and said—

"If I hadn't fastened the hounds with my own hands with a fresh leash of green buckskin, I'd take a B oath that I heard old Hector ringing his cry on the mountain."

"It is impossible," said Edwards; "it is not an Anan since I saw him in his kennel."

By this time the attention of Mohegan was attracted to the sounds; but, notwithstanding the youth was listening so silent and attentive, he could hear nothing but the low of some cattle from the western hills. He looked at the old men, Natty sitting with his hand to his ear, like a trumpet, and Mohegan bending forward, with an ear raised to a level with his face, holding the forefinger elevated as a signal for attention, and laughed aloud at what he deemed to be their imaginary sounds.

"Laugh if you will, boy," said Leather-stockings; "but the hounds be out, and are hunting a deer. No man can deceive me in such a matter. I wouldn't have had the time happen for a beaver's skin. Not that I care for the skin, but the venison is lean now, and the dumb things are eating the flesh off their own bones for no good. Now do you hear the hounds?"

43 Anan, a dialectal variation of anon, in the sense of "I beg pardon" or "What did you say?"

Edwards started, as a full cry broke on his ear, changing from the distant sounds that were caused by some intervening hill, to confused echoes that rang among the rocks that the dogs were passing, and then directly to a deep and hollow baying that pealed under the forest on the lake shore. These variations in the tones of the hounds passed with amazing rapidity, and while his eyes were glancing along the margin of the water, a tearing of the branches of the alder and dogwood caught his attention, at a spot near them, and at the next moment a noble buck sprang on the shore, and buried himself in the lake. A full-mouthed cry followed, when Hector and the slut shot through the opening in the bushes, and darted into the lake also, bearing their breasts gallantly against the water

CHAPTER XXVII

"I know'd it—I know'd it!" cried Natty, when both deer and hounds were in full view.—"the buck has gone by them with the wind, and it has been too much for the poor rogues, but I must break them of these tricks, or they'll give me a deal of trouble. He-ere, he-ere—shore with you, rascals—shore with you—will ye?—Oh! off with you, old Hector, or I'll hatchel your hide with my ramrod when I get ye."

The dogs knew their master's voice, and after swimming in a circle, as if reluctant to give over the chase, and yet afraid to persevere, they finally obeyed, and returned to the land, where they filled the air with their cries

In the meantime the deer, urged by his fears, had swum over half the distance between the shore and the boats, before his terror permitted him to see the new danger. But at the sounds of Natty's voice, he turned short in his course, and for a few moments seemed about to rush back again, and brave the dogs. His retreat in this direction was, however, effectually cut off, and turning a second time, he urged his course obliquely for the centre of the lake, with an intention of landing on the western shore. As the buck swam by the fishermen, raising his nose high into the air, curling the water before his slim neck like the beak of a galley, the Leather-stocking began to sit very uneasy in his canoe

"'Tis a noble creater!" he exclaimed; "what a pair of horns! a man might hang up all his garments on the

branches. Let me see—July is the last month, and the flesh must be getting good." While he was talking, Natty had instinctively employed himself in fastening the inner end of the bark rope, that served him for a cable, to a paddle, and rising suddenly on his legs, he cast this buoy away, and cried—"Strike out, John! let her go. The creater's a fool to tempt a man in this way."

Mohegan threw the fastening of the youth's boat from the canoe, and with one stroke of his paddle sent the light bark over the water like a meteor

"Hold!" exclaimed Edwards. "Remember the law, my old friends. You are in plain sight of the village, and I know that Judge Temple is determined to prosecute all indiscriminately, who kill deer out of season."

The remonstrance came too late. The canoe was already far from the skiff, and the two hunters were too much engaged in the pursuit to listen to his voice

"Natty . . . passed his knife across the throat of the animal. . . ."

The buck was now within fifty yards of his pursuers, cutting the water gallantly, and snorting at each breath with terror and his exertions, while the canoe seemed to dance over the waves, as it rose and fell with the undulations made by its own motion. Leather-stocking raised his rifle and freshened the priming, but stood in suspense whether to slay his victim or not.

"Shall I, John, or no?" he said. "It seems but a poor advantage to take of the dumb thing too. I won't; it has taken to the water on its own nater, which is the

reason that God has given to a deer, and I'll give it the lake play; so, John, lay out your arm, and mind the turn of the buck, it's easy to catch them, but they'll turn like a snake."

The Indian laughed at the conceit of his friend, but continued to send the canoe forward with a velocity that proceeded much more from his skill than his strength. Both of the old men now used the language of the Delawares when they spoke.

10 "Hugh!" exclaimed Mohegan; "the deer turns his head Hawk-eye, lift your spear."

Natty never moved abroad without taking with him every implement that might, by possibility, be of service in his pursuits. From his rifle he never parted, and although intending to fish with the line, the canoe was invariably furnished with all of its utensils, even to its grate. This precaution grew out of the habits of the hunter, who was often led, by his necessities or his sports, far beyond the limits of his original destination.

20 A few years earlier than the date of our tale, the Leatherstocking had left his hut on the shores of the Otsego, with his rifle and his hounds, for a few days' hunting in the hills, but before he returned he had seen the waters of Ontario. One, two, or even three hundred miles had once been nothing to his sinews, which were now a little stiffened by age. The hunter did as Mohegan advised, and prepared to strike a blow, with the barbed weapon, into the neck of the buck.

30 "Lay her more to the left, John," he cried, "lay her more to the left; another stroke of the paddle, and I have him."

While speaking, he raised the spear, and darted it from him like an arrow. At that instant the buck turned, the long pole glanced by him, the iron striking against his horn, and buried itself, harmlessly, in the lake.

"Back water," cried Natty, as the canoe glided over the place where the spear had fallen, "hold water, John."

The pole soon reappeared, shooting upward from the lake, and as the hunter seized it in his hand, the Indian

40 whirled the light canoe round, and renewed the chase. But this evolution gave the buck a great advantage; and it also allowed time for Edwards to approach the scene of action.

"Hold your hand, Natty!" cried the youth, "hold your hand! remember it is out of season."

This remonstrance was made as the bateau arrived

close to the place where the deer was struggling with water, his back now rising to the surface, now sink beneath it, as the waves curled from his neck, the animal still sustaining itself nobly against the odds.

"Hurrah!" shouted Edwards, inflamed beyond endurance at the sight, "mind him as he doubles—mind him as he doubles, sheer more to the right, Mohegan, mind to the right, and I'll have him by the horns, I'll throw rope over his antlers."

The dark eye of the old warrior was dancing in his head, with a wild animation, and the sluggish repose in which his aged frame had been resting in the canoe was now changed to all the rapid inflections of pent-up agility. The canoe whirled with each cunning evolution of the chase, like a bubble floating in a whirlpool, and when the direction of the pursuit admitted of a straight course, the little bark skimmed the lake with a velocity that urged the deer to seek its safety in a new turn.

It was the frequency of these circuitous movements that, by confining the action to so small a compass, enabled the youth to keep near his companions. More than twenty times both the pursued and the pursuers glided by him, just without the reach of his oars, until he thought the best way to view the sport was to remain stationary, and, by watching a favorable opportunity, assist as much as he could in taking the victim.

He was not required to wait long, for no sooner had he adopted this resolution, and risen in the boat, than he saw the deer coming bravely toward him, with an apparent intention of pushing for a point of land at a distance from the hounds, who were still barking and howling on the shore. Edwards caught the painter of his skiff, and, making a noose, cast it from him with all his force, and luckily succeeded in drawing its loop close around one of the antlers of the buck.

For one instant, the skiff was drawn through the water, but in the next, the canoe glided before it, Natty, bending low, passed his knife across the throat of the animal, whose blood followed the wound, down the waters. The short time that was passed in the struggles of the animal was spent by the hunter in bringing their boats together, and securing them in position, when Leatherstocking drew the deer from the water, and laid its lifeless form in the bottom of the canoe. He placed his hands on the ribs, and on different

parts of the body of his prize, and then, raising his head, he laughed in his peculiar manner.

"So much for Marmaduke Temple's law!" he said. "This warms a body's blood, old John; I haven't killed a buck in the lake afore this, sin' many a year. I call that good venison, lad, and I know them that will relish the creater's streaks, for all the betterments in the land."

The Indian had long been drooping with his years, and perhaps under the calamities of his race, but this invigorating and exciting sport caused a gleam of sunshine to cross his swarthy face that had long been absent from his features. It was evident the old man enjoyed the chase more as a memorial of his youthful sports and deeds, than with any expectation of profiting by the success. He felt the deer, however, lightly, his hand already trembling with the reaction of his unusual exertions, and smiled with a nod of approbation, as he said, in the emphatic and sententious manner of his people—"Good."

"I am afraid, Natty," said Edwards, when the heat of the moment had passed, and his blood began to cool, "that we have all been equally transgressors of the law. But keep your own counsel, and there are none here to betray us. Yet, how came those dogs at large? I left them securely fastened, I know, for I felt the thongs, and examined the knots, when I was at the hut."

"It has been too much for the poor things," said Natty, "to have such a buck take the wind of them. See, lad, the pieces of the buckskin are hanging from their necks yet. Let us paddle up, John, and I will call them in, and look a little into the matter."

When the old hunter landed, and examined the thongs that were yet fast to the hounds, his countenance sensibly changed, and he shook his head doubtingly.

"Here has been a knife at work," he said—"this skin was never torn, nor is this the mark of a hound's tooth. No, no,—Hector is not in fault, as I feared."

"Has the leather been cut?" cried Edwards.

"No, no—I didn't say it had been cut, lad; but this is a mark that was never made by a jump or a bite."

"Could that rascally carpenter have dared!"

"Ay! he durst to do anything where there is no danger," said Natty. "he is a curious body, and loves to be helping other people on with their consarns. But he had best not harbor so much near the wigwam!"

In the meantime, Mohegan had been examining, with

an Indian's sagacity, the place where the leather thong had been separated. After scrutinizing it closely, he said, in Delaware—

"It was cut with a knife—a sharp blade and a long handle—the man was afraid of the dogs."

"How is this, Mohegan?" exclaimed Edwards "you saw it not! how can you know these facts?"

"Listen, son," said the warrior. "The knife was sharp, for the cut is smooth,—the handle was long, for a man's arm would not reach from this gash to the cut that did not go through the skin—he was a coward, or he would have cut the thongs around the necks of the hounds."

"On my life," cried Natty, "John is on the scent! It was the carpenter, and he has got on the rock back of the kennel, and let the dogs loose by fastening his knife to a stick. It would be an easy matter to do it, where a man is so minded."

"And why should he do so?" asked Edwards "who has done him wrong, that he should trouble two old men like you?"

"It's a hard matter lad, to know men's ways, I find, since the settlers have brought in their new fashions. But is there nothing to be found out in the place? and may be he is troubled with his longings after other people's business, as he often is."

"Your suspicions are just. Give me the canoe. I am young and strong, and will get down there yet, perhaps, in time to interrupt his plans. Heaven forbid that we should be at the mercy of such a man!"

His proposal was accepted, the deer being placed in

"... the old hunter landed, and examined the thongs. . . ."

the skiff in order to lighten the canoe, and in less than five minutes the little vessel of bark was gliding over the glassy lake, and was soon hid by the points of land, as it shot close along the shore

Mohegan followed slowly with the skiff, while Natty called his hounds to him, bade them keep close, and, shouldering his rifle, he ascended the mountain, with an intention of going to the hut by land

[CHAPTER XXVIII. Elizabeth and Louisa walk to a point above Natty's hut, talking about the mysterious association of the three friends and speculating on Oliver's ancestry:]

. . . By this time they had gained the summit of the mountain, where they left the highway, and pursued their course under the shade of the stately trees that crowned the eminence. The day was becoming warm, and the girls plunged more deeply into the forest, as they found its invigorating coolness agreeably contrasted to the excessive heat they had experienced in the ascent. The conversation, as if by mutual consent, was entirely changed to the little incidents and scenes of their walk, and every tall pine, and every shrub or flower, called forth some simple expression of admiration

20 In this manner they proceeded along the margin of the precipice, catching occasional glimpses of the placid Otsego, or pausing to listen to the rattling of wheels and the sounds of hammers, that rose from the valley, to mingle the signs of men with the scenes of nature, when Elizabeth suddenly started, and exclaimed—

"Listen! there are the cries of a child on this mountain! is there a clearing near us? or can some little one have strayed from its parents?"

30 "Such things frequently happen," returned Louisa. "Let us follow the sounds—it may be a wanderer starving on the hill"

Urged by this consideration, the females pursued the low, mournful sounds, that proceeded from the forest, with quick and impatient steps. More than once, the ardent Elizabeth was on the point of announcing that she saw the sufferer, when Louisa caught her by the arm, and pointing behind them, cried—

"Look at the dog!"

40 Brave had been their companion, from the time the voice of his young mistress lured him from his kennel, to the present moment. His advanced age had long be-

fore deprived him of his activity, and when his companions stopped to view the scenery, or to add to the bouquets, the mastiff would lay his huge frame on the ground, and await their movements, with his eyes closed, and a listlessness in his air that ill accorded with the character of a protector. But when, aroused by the cry from Louisa, Miss Temple turned, she saw the dog with his eyes keenly set on some distant object, his head bent near the ground, and his hair actually rising on his body, through fright or anger. It was most probably the latter, for he was growling in a low key, and occasionally showing his teeth, in a manner that would have terrified his mistress, had she not so well known his good qualities.

"Brave!" she said, "be quiet, Brave! what do you see, fellow?"

At the sounds of her voice, the rage of the mastiff instead of being at all diminished, was very sensibly increased. He stalked in front of the ladies, and seated himself at the feet of his mistress, growling louder than before, and occasionally giving vent to his ire by a short, surly barking.

"What does he see?" said Elizabeth. "there must be some animal in sight."

Hearing no answer from her companion, Miss Temple turned her head, and beheld Louisa, standing with her face whitened to the color of death, and her finger pointing upward, with a sort of flickering, convulsive motion. The quick eye of Elizabeth glanced in the direction indicated by her friend, where she saw the fierce front and glaring eyes of a female panther, fixed on them in horrid malignity, and threatening to leap.

"Let us fly!" exclaimed Elizabeth, grasping the arm of Louisa, whose form yielded like melting snow.

There was not a single feeling in the temperament of Elizabeth Temple that could prompt her to desert her companion in such an extremity. She fell on her knees by the side of the inanimate Louisa, tearing from the person of her friend, with instinctive readiness, such part of her dress as might obstruct her respiration, and encouraging their only safeguard, the dog, at the same time by the sounds of her voice.

"Courage, Brave!" she cried, her own tones beginning to tremble, "courage, courage, good Brave!"

A quarter-grown cub, that had hitherto been unseen, now appeared, dropping from the branches of a sapling that grew under the shade of the beech which held it

dam. This ignorant, but vicious creature, approached the dog, imitating the actions and sounds of its parent, but exhibiting a strange mixture of the playfulness of a kitten with the ferocity of its race. Standing on its hind legs, it would rend the bark of a tree with its fore paws, and play the antics of a cat, and then, by lashing itself with its tail, growling, and scratching the earth, it would attempt the manifestations of anger that rendered its parent so terrific

0 All this time Brave stood firm and undaunted, his short tail erect, his body drawn backward on its haunches, and his eyes following the movements of both dam and cub. At every gambol played by the latter, it approached nigher to the dog, the growling of the three becoming more horrid at each moment, until the younger beast overleaping its intended bound, fell directly before the mastiff. There was a moment of fearful cries and struggles, but they ended almost as soon as commenced, by the cub appearing in the air, hurled from the jaws
1 of Brave, with a violence that sent it against a tree so forcibly as to render it completely senseless.

Elizabeth witnessed the short struggle, and her blood was warming with the triumph of the dog, when she saw the form of the old panther in the air, springing twenty feet from the branch of the beech to the back of the mastiff. No words of ours can describe the fury of the conflict that followed. It was a confused struggle on the dry leaves, accompanied by loud and terrific cries. Miss Temple continued on her knees, bending over the form of Louisa, her eyes fixed on the animals, with an interest so horrid, and yet so intense, that she almost forgot her own stake in the result. So rapid and vigorous were the bounds of the inhabitant of the forest, that its active frame seemed constantly in the air, while the dog nobly faced his foe at each successive leap. When the panther lighted on the shoulders of the mastiff, which was its constant aim, old Brave, though torn with her talons, and stained with his own blood, that already flowed from a dozen wounds, would shake off his furious foe like a feather, and rearing on his hind legs, rush to the fray again, with jaws distended, and a dauntless eye. But age, and his pampered life, greatly disqualified the noble mastiff for such a struggle. In everything but courage, he was only the vestige of what he had once been. A higher bound than ever raised the wary and furious beast far beyond the reach of the dog, who was making

a desperate but fruitless dash at her, from which she alighted in a favorable position, on the back of her aged foe. For a single moment only could the panther remain there, the great strength of the dog returning with a con- 50
vulsive effort. But Elizabeth saw, as Brave fastened his teeth in the side of his enemy, that the collar of brass around his neck, which had been glittering throughout the fray, was of the color of blood, and directly, that his frame was sinking to the earth, where it soon lay prostrate and helpless. Several mighty efforts of the wild-cat to extricate herself from the jaws of the dog followed, but they were fruitless, until the mastiff turned on his back, his lips collapsed, and his teeth loosened, when the short convulsions and stillness that succeeded, an- 60
nounced the death of poor Brave.

Elizabeth now lay wholly at the mercy of the beast. There is said to be something in the front of the image of the Maker that daunts the hearts of the inferior beings of his creation; and it would seem that some such power, in the present instance, suspended the threatened blow. The eyes of the monster and the kneeling maiden met for an instant, when the former stooped to examine her fallen foe; next to scent her luckless cub. From the latter examination, it turned, however, with its eyes apparently 70
emitting flashes of fire, its tail lashing its sides furiously, and its claws projecting inches from her broad feet.

Miss Temple did not or could not move. Her hands were clasped in the attitude of prayer, but her eyes were still drawn to her terrible enemy—her cheeks were blanched to the whiteness of marble, and her lips were slightly separated with horror.

The moment seemed now to have arrived for the fatal termination, and the beautiful figure of Elizabeth was bowing meekly to the stroke, when a rustling of leaves 80
behind seemed rather to mock the organs than to meet her ears.

"Hist! hist!" said a low voice, "stoop lower, gal, your bonnet hides the creater's head."

It was rather the yielding of nature than a compliance with this unexpected order, that caused the head of our heroine to sink on her bosom; when she heard the report of the rifle, the whizzing of the bullet, and the enraged cries of the beast, who was rolling over on the earth biting its own flesh, and tearing the twigs and branches 90
within its reach. At the next instant the form of the Leather-stocking rushed by her, and he called aloud—

"Come in, Hector, come in, old fool; 'tis a hard-lived animal, and may jump ag'in."

Natty fearlessly maintained his position in front of the females, notwithstanding the violent bounds and threatening aspect of the wounded panther, which gave several indications of returning strength and ferocity, until his rifle was again loaded, when he stepped up to the enraged animal, and placing the muzzle close to its head, every spark of life was extinguished by the
10 discharge

The death of her terrible enemy appeared to Elizabeth like a resurrection from her own grave. There was an elasticity in the mind of our heroine that rose to meet the pressure of instant danger, and the more direct it had been, the more her nature had struggled to overcome them. But still she was a woman. Had she been left to herself in her late extremity, she would probably have used her faculties to the utmost, and with discretion, in protecting her person, but encumbered with her
20 inanimate friend, retreat was a thing not to be attempted. Notwithstanding the fearful aspect of her foe, the eye of Elizabeth had never shrunk from its gaze, and long after the event her thoughts would recur to her passing sensations, and the sweetness of her midnight sleep would be disturbed, as her active fancy conjured, in dreams, the most trifling movements of savage fury that the beast had exhibited in its moment of power.

We shall leave the reader to imagine the restoration of Louisa's senses, and the expressions of gratitude which
30 fell from the young women. The former was effected by a little water, that was brought from one of the thousand springs of those mountains, in the cap of the Leather-stocking, and the latter were uttered with the warmth that might be expected from the character of Elizabeth. Natty received her vehement protestations of gratitude with a simple expression of good-will, and with indulgence for her present excitement, but with a carelessness that showed how little he thought of the service he had rendered.

40 "Well, well," he said, "be it so, gal; let it be so, if you wish it—we'll talk the thing over another time. Come, come—let us get into the road, for you've had terror enough to make you wish yourself in your father's house ag'in."

This was uttered as they were proceeding, at a pace that was adapted to the weakness of Louisa, toward the highway on reaching which the ladies separated from

their guide declaring themselves equal to the remain of the walk without his assistance, and feeling encouraged by the sight of the village which lay beneath their feet like a picture, with its limpid lake in front, the wind stream along its margin, and its hundred chimneys whitened bricks.

The reader need not to be told the nature of emotions which two youthful, ingenuous, and well-educated girls would experience at their escape from death so horrid as the one which had impended on them, while they pursued their way in silence along the track on the side of the mountain, nor how deep were their mental thanks to that Power which had given them their existence, and which had not deserted them in their extremity, neither how often they pressed each other's arms, as the assurance of their present safety came, a healing balm athwart their troubled spirits, when their thoughts were recurring to the recent moments of horror.

Leather-stocking remained on the hill, gazing at their retiring figures, until they were hidden by a bend in the road, when he whistled in his dogs, and shouldering his rifle, he returned into the forest.

"Well, it was a skeary thing to the young creature," said Natty, while he retrod the path toward the place. "It might frighten an older woman, to see a she panther so near her, with a dead cub by its side. I wonder what he had aimed at the varmint's eye, if I shouldn't have touched the life sooner than in the forehead, but they are hard-lived animals, and it was a good shot, considering that I could see nothing but the head and the peak of its tail. Hah! who goes there?"

"How goes it, Natty?" said Mr. Doolittle, stepping out of the bushes, with a motion that was a good deal accelerated by the sight of the rifle, that was already lowered in his direction. "What! shooting this winter! mind, old man, the law don't get hold on you."

"The law, squire! I have shook hands with the law these forty year," returned Natty; "for what has a man who lives in the wilderness to do with the ways of the law?"

"Not much, may be," said Hiram, "but you sometin' trade in venison. I s'pose you know, Leather-stock, that there is an act passed to lay a fine of five pounds currency, or twelve dollars and fifty cents, by decimals, every man who kills a deer betwixt January and August. The Judge had a great hand in getting the law through."

"I can believe it," returned the old hunter; "I

believe that, or anything, of a man who carries on as he does in the country."

"Yes, the law is quite positive, and the Judge is bent on putting it in force—five pounds penalty. I thought I heard your hounds out on the scent of so'thing this morning. I didn't know but they might get you in difficulty."

"They know their manners too well," said Natty, carelessly. "And how much goes to the state's evidence, squire?"

"How much!" repeated Hiram, quailing under the honest but sharp look of the hunter—"the informer gets half I—I believe;— yes, I guess it's half. But there's blood on your sleeve, man—you haven't been shooting anything this morning?"

"I have, though," said the hunter, nodding his head significantly to the other, "and a good shot I made of it"

"H-e-m!" ejaculated the magistrate, "and where is the game? I s'pose it's of a good nater, for your dogs won't hunt at anything that isn't choice."

"They'll hunt anything I tell them to, squire," cried Natty, favoring the other with his laugh "They'll hunt you, if I say so He-e-e-re, he-e-e-re, Hector—he-e-e-re, slut—come this away, pups—come this away—come hither."

"Oh! I have always heard a good character of the dogs," returned Mr Doolittle, quickening his pace by raising each leg in rapid succession, as the hounds scented around his person. "And where is the game, Leather-stocking?"

During this dialogue, the speakers had been walking at a very fast gait, and Natty swung the end of his rifle round, pointing through the bushes, and replied—

"There lies one How do you like such meat?"

"This!" exclaimed Hiram, "why this is Judge Temple's dog Brave Take care, Leather-stocking, and don't make an enemy of the Judge I hope you haven't harmed the animal?"

"Look for yourself, Mr. Doolittle," said Natty, drawing his knife from his girdle, and wiping it, in a knowing manner, once or twice across his garment of buckskin; "does his throat look as if I had cut it with this knife?"

"It is dreadfully torn! it's an awful wound—no knife never did this deed. Who could have done it?"

"The painters behind you, squire"

"Painters!" echoed Hiram, whirling on his heel with an agility that would have done credit to a dancing-master.

"Be easy, man," said Natty, "there's two of the venomous things; but the dog finished one, and I have fastened the other's jaws for her, so don't be frightened, so squire, they won't hurt you"

"And where's the deer?" cried Hiram, staring about him with a bewildered air.

"Anan! deer!" repeated Natty.

"Sartain, an't there venison here, or didn't you kill a buck?"

"What! when the law forbids the thing, squire!" said the old hunter "I hope there's no law ag'in killing the painters."

"No, there's a bounty on the scalps—but—will your dogs hunt painters, Natty?"

"Anything, didn't I tell you they'd hunt a man? He-e-re, he-e-re, pups—"

"Yes, yes, I remember Well, they are strange dogs, I must say—I am quite in a wonderment"

Natty had seated himself on the ground, and having laid the grim head of his late ferocious enemy in his lap, was drawing his knife with a practised hand around the ears, which he tore from the head of the beast in such a manner as to preserve their connexion, when he answered—

"What at, squire? did you never see a painter's scalp afore? Come, you are a magistrate, I wish you'd make me out an order for the bounty."

"The bounty!" repeated Hiram, holding the ears on the end of his finger, for a moment, as if uncertain how to proceed. "Well, let us go down to your hut, where you can take the oath, and I will write out the order I suppose you have a Bible? all the law wants is the four evangelists and the Lord's prayer."

"I keep no books," said Natty a little coldly. "not such a Bible as the law needs"

"Oh! there's but one sort of Bible that's good in law," returned the magistrate: "and you'n will do as well as another's Come, the carcasses are worth nothing, man; let us go down and take the oath."

"Softly, softly, squire," said the hunter, lifting his trophies very deliberately from the ground, and shouldering his rifle; "why do you want an oath at all, for a thing that your own eyes has seen? won't you believe yourself, that another man must swear to a fact that you know to be true? You have seen me scalp the creators, and if I must swear to it, it shall be before Judge Temple, who needs an oath"

"But we have no pen or paper here, Leather-stocking, we must go to the hut for them, or how can I write the order?"

Natty turned his ample features on the cunning magistrate with another of his laughs, as he said—

"And what should I be doing with scholars' tools? I want no pens or paper, not knowing the use of either, and I keep none. No, no, I'll bring the scalps into the village, squire, and you can make out the order on one
10 of your law-books, and it will be all the better for it. The deuce take this leather on the neck of the dog, it will strangle the old fool. Can you lend me a knife, squire?"

Hiram, who seemed particularly anxious to be on good terms with his companion, unhesitatingly complied. Natty cut the thong from the neck of the hound, and, as he returned the knife to its owner, carelessly remarked—

"'Tis a good bit of steel, and has cut such leather as
20 this very same, before now, I dare say."

"Do you mean to charge me with letting your hounds loose?" exclaimed Hiram, with a consciousness that disarmed his caution.

"Loose!" repeated the hunter—"I let them loose myself. I always let them loose before I leave the hut."

The ungovernable amazement with which Mr Doolittle listened to this falsehood, would have betrayed his agency in the liberation of the dogs, had Natty wanted
30 any further confirmation, and the coolness and management of the old man now disappeared in open indignation.

"Look you here, Mr Doolittle," he said, striking the breech of his rifle violently on the ground, "what there is in the wigwam of a poor man like me, that one like you can crave, I don't know, but this I tell you to your face, that you never shall put foot under the roof of my cabin with my consent, and that if you harbor round the spot as you have done lately, you may meet with treatment that you will little relish."

40 "And let me tell you, Mr. Bumpo," said Hiram, retreating, however, with a quick step, "that I know you've broke the law, and that I'm a magistrate, and will make you feel it too, before you are a day older."

"That for you and your law too," cried Natty, snapping his fingers at the justice of the peace:—"away with you, you varmint, before the devil tempts me to give you

your desarts. Take care, if I ever catch your prow face in the woods ag'in, that I don't shoot it for an o'

There is something at all times commanding in his indignation, and Hiram did not stay to provoke the will of the old hunter to extremities. When the intruder was out of sight, Natty proceeded to the hut, where he found all quiet as the grave. He fastened his dogs, and tapped at the door, which was opened by Edwards, asked—

"Is all safe, lad?"

"Everything," returned the youth. "Some one attempted the lock, but it was too strong for him."

"I know the creature," said Natty, "but he'll not trouble himself within reach of my rifle very soon—" No more was uttered by the Leather-stocking, in his view of the cabin, was rendered inaudible by the closing of the door of the cabin.

[CHAPTER XXIX. In the meantime Richard and the Judge have been together, not, as it turns out, investigating possible coal deposits, but in order that Richard can demonstrate to the Judge a theory which he, Hiram Doolittle and Jotham Riddel have concocted. This theory, to state it briefly—which Richard does not do—is that Natty Chingachgook, and Oliver are secretly mining silver, smelting it in the hut which is so carefully guarded from prying eyes. Richard takes the Judge to a cave on the mountain back of the hut, where he shows digging tools and an excavation. There is no sign of ore, but the Judge's curiosity is roused to the point that he determines to interview Natty. Returning home, however, he meets Eliza and Louisa and hears their story; "and when the imagination Natty again crossed his recollection, it was not as a lawless and depredating squatter, but as the preserver of his child."

CHAPTER XXX At home, as Elizabeth and her father discuss the panther episode, Hiram Doolittle makes his appearance and, after much circumlocution, says that he thinks Natty has a deer in his cabin. The Judge asks Hiram to issue a search warrant himself, but Hiram evidently wants support and intimates to the Judge that the latter is showing partiality. The Judge then agrees to the warrant, calming Elizabeth by telling her that the matter will be no great matter. He goes to his office to make the paper. Returning, he meets Oliver, and in their mutual relief at the escape of the girls, they reach a friendlier status than ever before. Oliver goes to pay his respects

to the Gronts. Meanwhile, however, another and highly serious cause of friction is developing:]

... When Hiram Doolittle had obtained his search-warrant, his first business was to procure a proper officer to see it executed. The sheriff was absent, summoning in person the grand inquest for the county, the deputy who resided in the village, was riding on the same errand, in a different part of the settlement; and the regular constable of the township had been selected for his station from motives of charity, being lame of a leg. Hiram intended to accompany the officer as a spectator, but he felt no very strong desire to bear the brunt of the battle. It was, however, Saturday, and the sun was already turning the shadows of the pines toward the east, on the morrow the conscientious magistrate could not engage in such an expedition at the peril of his soul, and long before Monday, the venison, and all vestiges of the death of the deer, might be secreted or destroyed. Happily, the lounging form of Billy Kirby met his eye, and Hiram, at all times fruitful in similar expedients, saw his way clear at once. Jotham, who was associated in the whole business, and who had left the mountain in consequence of a summons from his coadjutor, but who failed, equally with Hiram, in the unfortunate particular of nerve, was directed to summon the wood-chopper to the dwelling of the magistrate.

When Billy appeared, he was very kindly invited to take the chair in which he had already seated himself, and was treated in all respects as if he were an equal.

"Judge Temple has set his heart on putting the deer law in force," said Hiram, after the preliminary civilities were over, "and a complaint has been laid before him that a deer has been killed. He has issued a search-warrant, and sent for me to get somebody to execute it."

Kirby, who had no idea of being excluded from the deliberative part of any affair in which he was engaged, drew up his bushy head in a reflecting attitude, and, after musing a moment, replied by asking a few questions.

"The Sheriff is gone out of the way?"

"Not to be found."

"And his deputy too?"

"Both gone on the skirts of the Patent."

"But I saw the constable hobbling about town an hour ago."

"Yes, yes," said Hiram with a coaxing smile and knowing nod, "but this business wants a man—not a cripple."

"Why," said Billy, laughing, "will the chap make fight?"

"He's a little quarrelsome at times, and thinks he's the best man in the country at rough and tumble."

"I heard him brag once," said Jotham, "that there 50 wasn't a man 'twixt the Mohawk Flats and the Pennsylvania line that was his match at a close hug."

"Did you?" exclaimed Kirby, raising his huge frame in his seat, like a lion stretching in his lair, "I rather guess he never felt a Varmounter's knuckles on his backbone. But who is the chap?"

"Why," said Jotham, "it's—"

"It's ag'in law to tell," interrupted Hiram, "unless you'll qualify to sarve. You'd be the very man to take him, Bill, and I'll make out a special deputation in a 60 minute, when you will get the fees."

"What's the fees?" said Kirby, laying his large hand on the leaves of a statute-book, that Hiram had opened in order to give dignity to his office, which he turned over, in his rough manner, as if he were reflecting on a subject about which he had, in truth, already decided, "will they pay a man for a broken head?"

"They'll be something handsome," said Hiram.

"Damn the fees," said Billy, again laughing—"does the fellow think he's the best wrestler in the county, 70 though? what's his inches?"

"He's taller than you be," said Jotham, "and one of the biggest—"

Talkers, he was about to add, but the impatience of Kirby interrupted him. The wood-chopper had nothing fierce or even brutal in his appearance, the character of his expression was that of good-natured vanity. It was evident he prided himself on the powers of the physical man, like all who have nothing better to boast of, and, stretching out his broad hand, with the palm downward, 80 he said, keeping his eyes fastened on his own bones and sinews—

"Come, give us a touch of the book. I'll swear, and you'll see that I'm a man to keep my oath."

Hiram did not give the wood-chopper time to change his mind, but the oath was administered without unnecessary delay. So soon as this preliminary was completed, the three worthies left the house, and proceeded by the nearest road toward the hut. They had reached the bank

of the lake, and were diverging from the route of the highway, before Kirby recollected that he was now entitled to the privilege of the initiated, and repeated his question as to the name of the offender.

"Which way, which way, Squire?" exclaimed the hardy wood-chopper; "I thought it was to search a house that you wanted me, not the woods. There is nobody lives on this side of the lake, for six miles, unless you count the Leather-stocking and old John for settlers.
10 Come, tell me the chap's name, and I warrant me that I lead you to his clearing by a straighter path than this, for I know every sapling that grows within two miles of Templetown."

"This is the way," said Hiram, pointing forward and quickening his step, as if apprehensive that Kirby would desert, "and Bumpo is the man"

Kirby stopped short, and looked from one of his companions to the other in astonishment. He then burst into a loud laugh, and cried—

20 "Who? Leather-stocking! he may brag of his aim and his rifle, for he has the best of both, as I will own myself, for sin' he shot the pigeon I knock under to him; but for a wrestle! why, I would take the creatur' between my finger and thumb, and tie him in a bow-knot around my neck for a Barcelony. The man is seventy, and was never anything particular for strength."

"He's a deceiving man," said Hiram, "like all the hunters, he is stronger than he seems; besides, he has his rifle."

30 "That for his rifle!" cried Billy: "he'd no more hurt me with his rifle than he'd fly. He is a harmless creater, and I must say that I think he has as good right to kill deer as any man on the Patent. It's his main support, and this is a free country, where a man is privileged to follow any calling he likes."

"According to that doctrine," said Jotham, "anybody may shoot a deer."

"This is the man's calling, I tell you," returned Kirby, "and the law was never made for such as he."

40 "The law was made for all," observed Hiram, who began to think that the danger was likely to fall to his own share, notwithstanding his management; "and the law is particular in noticing parjury."

"See here, Squire Doolittle," said the reckless wood-chopper; "I don't care the valie of a beetlering for you and your parjury too. But as I have come so far, I'll go

down and have a talk with the old man, and ma we'll fry a steak of the deer together."

"Well, if you can get in peaceably, so much the better said the magistrate. "To my notion, strife is very popular; I prefer, at all times, clever conduct to ugly temper."

As the whole party moved at a great pace, they soon reached the hut, where Hiram thought it prudent to sit on the outside of the top of the fallen pine, which formed a chevaux-de-frise, to defend the approach to the fort on the side next the village. The delay was not relished by Kirby, who clapped his hands to his mouth and gave a loud halloo that brought the dogs out of the kennel and, almost at the same instant, the scarred head of Natty from the door.

"Lie down, old fool," cried the hunter; "do you think there's more painters about you?"

"Ha! Leather-stocking, I've an arrand with you," cried Kirby, "here's the good people of the state have been writing you a small letter, and they're hired me to post."

"What would you have with me, Billy Kirby?" Natty, stepping across his threshold, and raising his hand over his eyes to screen them from the rays of the setting sun, while he took a survey of his visitor. "I've nothing to clear; and heaven knows I would set out six trees if I would cut down one. Down, Hector, I say, into the kennel with ye."

"Would you, old boy?" roared Billy; "then so much the better for me. But I must do my arrand. Here's a letter for you, Leather-stocking. If you can read it all well, and if you can't, here's Squire Doolittle at hand to let you know what it means. It seems you miss the twentieth of July for the first of August, that's all."

By this time Natty had discovered the lank profile of Hiram, drawn up under the cover of a high stool, and all that was complacent in his manner instantly changed to marked distrust and dissatisfaction. He placed his head within the door of his hut, and said a few words in an undertone, when he again appeared, and continued

"I've nothing for ye; so away, afore the evil one

25 *Barcelony*, Barcelona, a silk neckerchief • 56 *chevaux-de-frise*, literally "horses of Friesland", large, six-sided joists studded with long iron spikes, used to block breaches in fortifications or to resist cavalry charges

me to do you harm. I owe you no spite, Billy Kirby, and what for should you trouble an old man, who has done you no harm?"

Kirby advanced through the top of the pine, to within a few feet of the hunter, where he seated himself on the end of a log with great composure, and began to examine the nose of Hector, with whom he was familiar, from their frequently meeting in the woods, where he sometimes fed the dog from his own basket of provisions

12 "You've outshot me, and I'm not ashamed to say it," said the wood-chopper, "but I don't owe you a grudge for that, Natty! though it seems that you've shot once too often, for the story goes that you've killed a buck"

"I've fired but twice to-day, and both times at the painters," returned the Leather-stocking, "see, here are the scalps! I was just going in with them to the Judge's to ask the bounty"

While Natty was speaking, he tossed the ears to Kirby, who continued playing with them, with a careless
13 air, holding them to the dogs, and laughing at their movements when they scented the unusual game

But Hiram, emboldened by the advance of the deputed constable, now ventured to approach also, and took up the discourse with the air of authority that became his commission. His first measure was to read the warrant aloud, taking care to give due emphasis to the most material parts, and concluding with the name of the Judge in very audible and distinct tones

"Did Marmaduke Temple put his name to that bit of paper?" said Natty, shaking his head,—"well, well, that man loves the new ways, and his betterments, and his lands, afore his own flesh and blood. But I won't mistrust the gal—she has an eye like a full-grown buck! poor thing she didn't choose her father, and can't help it. I know but little of the law, Mr Doolittle, what is to be done, now you've read your commission?"

"Oh! it's nothing but form, Natty," said Hiram, endeavoring to assume a friendly aspect. "Let's go in, and talk the thing over in reason; I dare say that the money can be easily found, and I partly conclude, from what passed, that Judge Temple will pay it himself."

The old hunter had kept a keen eye on the movements of his three visitors, from the beginning, and had maintained his position, just without the threshold of his cabin, with a determined manner, that showed he was not to be easily driven from his post. When Hiram drew

nigher, as if expecting his proposition would be accepted, Natty lifted his hand, and motioned for him to retreat.

"Haven't I told you more than once, not to tempt me?" he said. "I trouble no man; why can't the law
5 leave me to myself? Go back—go back, and tell your Judge that he may keep his bounty, but I won't have his wasty ways brought into my hut"

This offer, however, instead of appeasing the curiosity of Hiram, seemed to inflame it the more, while Kirby cried—

"Well, that's fair, squire, he forgives the county his demand, and the county should forgive him the fine, it's what I call an even trade, and should be concluded on the spot. I like quick dealings, and what's fair 'twixt
60 man and man"

"I demand entrance into this house," said Hiram, summoning all the dignity he could master to his assistance, "in the name of the people, and by virtue of this warrant, and of my office and with this peace-officer"

"Stand back, stand back, squire, and don't tempt me," said the Leather-stocking, motioning for him to retire, with great earnestness

"Stop us at your peril," continued Hiram. "Billy! Jotham! close-up—I want testimony"

70

Hiram had mistaken the mild but determined air of Natty for submission, and had already put his foot on the threshold to enter, when he was seized unexpectedly by his shoulders, and hurled over the little bank toward the lake, to the distance of twenty feet. The suddenness of the movement, and the unexpected display of strength on the part of Natty, created a momentary astonishment in his invaders, that silenced all noises, but at the next instant Billy Kirby gave vent to his mirth in peals of laughter, that he seemed to heave up from his very
80 soul.

"Well done, old stub!" he shouted. "the squire know'd you better than I did. Come, come, here's a green spot, take it out like men, while Jotham and I see fair play."

"William Kirby, I order you to do your duty," cried Hiram, from under the bank, "seize that man; I order you to seize him in the name of the people."

But the Leather-stocking now assumed a more threatening attitude; his rifle was in his hand, and its muzzle was directed toward the wood-chopper.

90

"Stand off, I bid ye," said Natty, "you know my aim, Billy Kirby; I don't crave your blood, but mine and

yourn both shall turn this green grass red, afore you put foot into the hut."

While the affair appeared trifling, the wood-chopper seemed disposed to take sides with the weaker party, but when the fire-arms were introduced, his manner very sensibly changed. He raised his large frame from the log, and facing the hunter with an open front, he replied—

"I didn't come here as your enemy, Leather-stocking, but I don't value the hollow piece of iron in your hand
10 so much as a broken axe-helve, so, squire, say the word, and keep within the law, and we'll soon see who's the best man of the two."

But no magistrate was to be seen! The instant the rifle was produced, Hiram and Jotham vanished, and when the wood-chopper bent his eyes about him in surprise at receiving no answer, he discovered their retreating figures moving toward the village at a rate that sufficiently indicated that they had not only calculated the velocity of a rifle-bullet, but also its probable range.

20 "You've scared the creators off," said Kirby, with great contempt expressed on his broad features, "but you are not going to scare me, so, Mr Bumpo, down with your gun, or there'll be trouble 'twixt us."

Natty dropped his rifle, and replied—

"I wish you no harm, Billy Kirby, but I leave it to yourself, whether an old man's hut is to be run down by such varmint. I won't deny the buck to you, Billy, and you may take the skin in, if you please, and show it as testimony. The bounty will pay the fine, and that
30 ought to satisfy any man."

"'Twill, old boy, 'twill," cried Kirby, every shade of displeasure vanishing from his open brow at the peace-offering, "throw out the hide, and that shall satisfy the law."

Natty entered the hut, and soon re-appeared, bringing with him the desired testimonial, and the wood-chopper departed, as thoroughly reconciled to the hunter as if nothing had happened. As he paced along the margin of the lake he would burst into frequent fits of
40 laughter, while he recollected the sunset of Hiram, and, on the whole, he thought the affair a very capital joke.

Long before Billy reached the village, however, the news of his danger, and of Natty's disrespect of the law, and of Hiram's discomfiture, were in circulation. A good deal was said about sending for the Sheriff, some hints were given about calling out the posse comitatus

to avenge the insulted laws; and many of the citizens were collected, deliberating how to proceed. The rival of Billy with the skin, by removing all grounds a search, changed the complexion of things material. Nothing now remained but to collect the fine, and assert the dignity of the people; all of which, it unanimously agreed, could be done as well on the succeeding Monday as on Saturday night,—a time sacred by a large portion of the settlers. Accordingly further proceedings were suspended for six-and-eight hours.

[CHAPTER XXXI. Oliver, at the Grants, knows nothing of the encounter at the hut until, returning to the center of the town, he sees the villagers dispersing. Chester Lipsett the lawyer, tells him what has happened, and Oliver retains Lippett to defend Natty. He then goes in search of the Judge. At the mansion-house he finds Elizabeth secretly sure that the search warrant will bring no harm; she is quickly disillusioned by her father, who appears and declares that Natty's obstinate resistance to the law must be punished. At this announcement Oliver loses his temper and accuses the Judge of being responsible for the impoverishment of Natty and Chingachgook. The Judge rightly regards the accusation as an attack on the validity of his title to the lands and discharges his assistant. Oliver then bids farewell to Elizabeth, who tells him to let Natty know that she is his friend.]

CHAPTER XXXII. Late the following evening Richard turns from an expedition to arrest a gang of counterfeiters. He extracts the story of events from Ben Pump, after great difficulty, and at once assembles a posse to take Natty into custody. When they arrive at the hut, they find a heap of ashes and smoldering logs. As they gaze on the embers Natty appears, to say that those who have driven the wild beasts from the wilderness have now driven an old man from the home that has been his for forty years. Richard apologizes for his duty, but takes Natty to the jail.]

CHAPTER XX

The long days and early sun of July allowed time for the gathering of the interested, before the little bell of the academy announced that the appointed hour had arrived for administering right to the wronged, and punishment to the guilty. Ever since the dawn of day,

highways and wood-paths that, issuing from the forests, and winding along the sides of the mountains, centred in Templeton, had been thronged with equestrians and footmen, bound to the haven of justice. There was to be seen a well-clad yeoman, mounted on a sleek, switch-tailed steed, ambling along the highway with his red face elevated in a manner that said, "I have paid for my land, and fear no man;" while his bosom was swelling with the pride of being one of the grand inquest for the county. At his side rode a companion, his equal in independence of feeling, perhaps, but his inferior in thrift, as in property and consideration. This was a professed dealer in lawsuits,—a man whose name appeared in every calendar,—whose substance, gained in the multifarious expedients of a settler's changeable habits, was wasted in feeding the harpies of the courts. He was endeavoring to impress the mind of the grand juror with the merits of a cause now at issue. Along with these was a pedestrian, who, having thrown a rifle frock over his shirt, and placed his best wool hat above his sunburnt visage, had issued from his retreat in the woods by a footpath, and was striving to keep company with the others, on his way to hear and to decide the disputes of his neighbors, as a petit juror. Fifty similar little knots of countrymen might have been seen, on that morning, journeying toward the shire-town on the same errand.

By ten o'clock the streets of the village were filled with busy faces, some talking of their private concerns, some listening to a popular expounder of political creeds, and others gaping in at the open stores, admiring the finery, or examining scythes, axes, and such other manufactures as attracted their curiosity or excited their admiration. A few women were in the crowd, most carrying infants, and followed, at a lounging, listless gait, by their rustic lords and masters. There was one young couple, in whom connubial love was yet fresh, walking at a respectful distance from each other, while the swain directed the timid steps of his bride, by a gallant offering of a thumb!

At the first stroke of the bell, Richard issued from the door of the "Bold Dragoon," flourishing a sheathed sword, that he was fond of saying his ancestors had carried in one of Cromwell's victories, and crying, in an authoritative tone, to "clear the way for the court." The order was obeyed promptly, though not servilely, the members of the crowd nodding familiarly to the mem-

bers of the procession as it passed. A party of constables with their staves followed the Sheriff, preceding Marmaduke, and four plain, grave-looking yeomen, who were his associates on the bench. There was nothing to distinguish these subordinate judges from the better part of the spectators, except gravity, which they affected a little more than common, and that one of their number was attired in an old-fashioned military coat, with skirts that reached no lower than the middle of his thighs, and bearing two little silver epaulettes, not half so big as a modern pair of shoulder-knots. This gentleman was a colonel of the militia, in attendance on a court-martial, who found leisure to steal a moment from his military to attend to his civil jurisdiction, but this incongruity excited neither notice nor comment. Three or four clean-shaved lawyers followed, as meekly as if they were lambs going to the slaughter. One or two of their number had contrived to obtain an air of scholastic gravity by wearing spectacles. The rear was brought up by another posse of constables, and the mob followed the whole into the room where the court held its sittings.

The edifice was composed of a basement of squared logs, perforated here and there with small grated windows, through which a few wistful faces were gazing at the crowd without. Among the captives were the guilty, downcast countenances of the counterfeiters, and the simple but honest features of the Leather-stocking. The dungeons were to be distinguished, externally, from the debtors' apartments only by the size of the apertures, the thickness of the grates, and by the heads of the spikes that were driven into the logs as a protection against the illegal use of edge tools. The upper story was of framework, regularly covered with boards, and contained one room decently fitted up for the purposes of justice. A bench, raised on a narrow platform to the height of a man above the floor, and protected in front by a light railing, ran along one of its sides. In the centre was a seat, furnished with rude arms, that was always filled by the presiding judge. In front, on a level with the floor of the room, was a large table covered with green baize, and surrounded by benches; and at either of its ends were rows of seats, rising one over the other, for jury boxes. Each of these divisions was surrounded by a railing. The

44 Cromwell's Richard's remark does not jibe with his staunch Episcopalianism

remainder of the room was an open square, appropriated to the spectators.

When the judges were seated, the lawyers had taken possession of the table, and the noise of moving feet had ceased in the area, the proclamations were made in the usual form, the jurors were sworn, the charge was given, and the court proceeded to hear the business before them.

We shall not detain the reader with a description of the captious discussions that occupied the court for the first two hours. Judge Temple had impressed on the jury, in his charge, the necessity for despatch on their part, recommending to their notice, from motives of humanity, the prisoners in the jail, as the first objects of their attention. Accordingly, after the period we have mentioned had elapsed, the cry of the officer to "clear the way for the grand jury," announced the entrance of that body. The usual forms were observed, when the foreman handed up to the bench two bills, on both of which the Judge observed, at the first glance of his eye, the name of Nathaniel Bumpo. It was a leisure moment with the court, some low whispering passed between the bench and the Sheriff, who gave a signal to his officers, and in a very few minutes the silence that prevailed was interrupted by a general movement in the outer crowd, when presently the Leather-stocking made his appearance, ushered into the criminals bar under the custody of two constables. The hum ceased, the people closed into the open space again, and the silence became so deep, that the hard breathing of the prisoner was audible.

Natty was dressed in his buckskin garments, without his coat, in place of which he wore only a shirt of coarse linen-check, fastened at his throat by the sinew of a deer, leaving his red neck and weather-beaten face exposed and bare. It was the first time that he had ever crossed the threshold of a court of justice, and curiosity seemed to be strongly blended with his personal feelings. He raised his eyes to the bench, thence to the jury-boxes, the bar, and the crowd without, meeting everywhere looks fastened on himself. After surveying his own person, as searching the cause of this unusual attraction, he once more turned his face around the assemblage, and opened his mouth in one of his silent and remarkable laughs.

"Prisoner, remove your cap," said Judge Temple.

The order was either unheard or unheeded.

"Nathaniel Bumpo, be uncovered," repeated the Judge.

Natty started at the sound of his name, and raising face earnestly toward the bench, he said—

"Anan!"

Mr. Lippert arose from his seat at the table, and whispered in the ear of the prisoner; when Natty gave him a nod of assent, and took the deerskin covering from his head.

"Mr. District Attorney," said the Judge, "the prisoner is ready, we wait for the indictment."

The duties of public prosecutor were discharged by Dirck Van der School, who adjusted his spectacles, cast a cautious look around him at his brethren of the bar, and then, after a glance over the glasses, when he proceeded to read the bill aloud. It was the usual charge for an assault with a dangerous weapon on the person of Hiram Doolittle, and couched in the ancient language of such instruments of justice, especial care having been taken by the scribe not to omit the name of a single offensive weapon known to the law. When he had done, Mr. Van der School removed his spectacles, which he closed and placed in his pocket, seemingly for the pleasure of again opening and replacing them on his nose. After this evolution was repeated once or twice, he handed the bill over to Mr. Lippert, with a cavalier air, that said as much as "Pick a hole in the wall if you can."

Natty listened to the charge with great attention, leaning forward toward the reader with an earnestness that denoted his interest; and when it was ended, he raised his tall body to the utmost, and drew a long sigh. His eyes were turned to the prisoner, whose voice was vainly expected to break the stillness of the room.

"You have heard the presentment that the grand jury have made, Nathaniel Bumpo," said the Judge, "do you plead to the charge?"

The old man dropped his head for a moment in a dejected attitude, and then raising it, he laughed before he answered—

"That I handled the man a little rough or so, is not to be denied; but that there was occasion to make use of the things that the gentleman has spoken of, is downright untrue. I am not much of a wrestler, seeing that I'm getting old; but I was out among the Scotch-Irishers—let me see—it must have been as long ago as the first year of the old war—"

"Mr. Lippert, if you are retained for the prisoner," in-

rupted Judge Temple, "instruct your client how to plead, if not, the court will assign him counsel."

Aroused from studying the indictment by this appeal, the attorney got up, and after a short dialogue with the hunter in a low voice, he informed the court that they were ready to proceed.

"Do you plead guilty or not guilty?" said the Judge

"I may say not guilty with a clean conscience," returned Natty, "for there's no guilt in doing what's right, and I'd rather died on the spot, than had him put foot in the hut at that moment"

Richard started at this declaration, and bent his eyes significantly on Hiram, who returned the look with a slight movement of his eyebrows.

"Proceed to open the cause, Mr. District Attorney," continued the Judge "Mr. Clark, enter the plea of not guilty"

After a short opening address from Mr. Van der School, Hiram was summoned to the bar to give his testimony. It was delivered to the letter, perhaps, but with all that moral coloring which can be conveyed under such expressions as, "thinking no harm," "feeling it my bounden duty as a magistrate," and "seeing that the constable was back'ard in the business." When he had done, and the district attorney declined putting any further interrogatories, Mr. Lippert arose, with an air of keen investigation, and asked the following questions:

"Are you a constable of this county, sir?"

"No, sir," said Hiram, "I'm only a justice-peace"

"I ask you, Mr. Doolittle, in the face of this court, putting it to your conscience and your knowledge of the law, whether you had any right to enter that man's dwelling?"

"Hem!" said Hiram, undergoing a violent struggle between his desire for vengeance and his love of legal fame, "I do suppose—that in—that is—strict law—that supposing—maybe I hadn't a real—lawful right,—but as the case was—and Billy was so back'ard—I thought I might come for'ard in the business"

"I ask you again, sir," continued the lawyer, following up his success, "whether this old, this friendless old man, did or did not repeatedly forbid your entrance?"

"Why, I must say," said Hiram, "that he was considerable cross-grained; not what I call clever, seeing that it was only one neighbor wanting to go into the house of another."

"Oh! then you own it was only meant for a neighborly visit on your part, and without the sanction of law. Remember, gentlemen, the words of the witness, 'one neighbor wanting to enter the house of another' Now, sir, I ask you if Nathaniel Bumppo did not again and again order you not to enter?"

"There was some words passed between us," said Hiram, "but I read the warrant to him aloud."

"I repeat my question, did he tell you not to enter his habitation?"

"There was a good deal passed betwixt us—but I've the warrant in my pocket; maybe the court would wish to see it?"

"Witness," said Judge Temple, "answer the question directly, did or did not the prisoner forbid your entering his hut?"

"Why, I some think—"

"Answer without equivocation," continued the Judge, sternly

"He did"

"And did you attempt to enter after this order?"

"I did, but the warrant was in my hand"

"Proceed, Mr. Lippert, with your examination"

But the attorney saw that the impression was in favor of his client, and, waving his hand with a supercilious manner, as if unwilling to insult the understanding of the jury with any further defence, he replied—

"No, sir; I leave it for your honor to charge, I rest my case here"

"Mr. District Attorney," said the Judge, "have you anything to say?"

Mr. Van der School removed his spectacles, folded them, and replacing them once more on his nose, eyed the other bill which he held in his hand, and then said, looking at the bar over the top of his glasses—

"I shall rest the prosecution here, if the court please."

Judge Temple arose and began the charge.

"Gentlemen of the jury," he said, "you have heard the testimony, and I shall detain you but a moment. If an officer meet with resistance in the execution of a process he has an undoubted right to call any citizen to his assistance; and the acts of such assistant come within the protection of the law. I shall leave you to judge, gentlemen, from the testimony, how far the witness in this prosecution can be so considered, feeling less reluctance to submit the case thus informally to your decision, because

there is yet another indictment to be tried, which involves heavier charges against the unfortunate prisoner."

The tone of Marmaduke was mild and insinuating, and as his sentiments were given with such apparent impartiality, they did not fail of carrying due weight with the jury. The grave-looking yeomen who composed this tribunal, laid their heads together for a few minutes, without leaving the box, when the foreman arose, and after the forms of the court were duly observed, he pronounced
10 the prisoner to be—

"Not guilty."

"You are acquitted of this charge, Nathaniel Bumpo," said the Judge

"Anan!" said Natty

"You are found not guilty of striking and assaulting Mr Doolittle "

"No, no, I'll not deny that I took him a little roughly by the shoulders," said Natty, looking about him with great simplicity, "and that I—"

20 "You are acquitted," interrupted the Judge, "and there is nothing further to be said or done in the matter "

A look of joy lighted up the features of the old man, who now comprehended the case, and placing his cap eagerly on his head again, he threw up the bar of his little prison, and said feelingly—

"I must say this for you, Judge Temple, that the law has not been so hard on me as I dreaded I hope God will bless you for the kind things you've done to me this day "

But the staff of the constable was opposed to his
30 egress, and Mr Lippert whispered a few words in his ear, when the aged hunter sank back into his place, and, removing his cap, stroked down the remnants of his gray and sandy locks, with an air of mortification mingled with submission

"Mr District Attorney," said Judge Temple, affecting to busy himself with his minutes, "proceed with the second indictment "

Mr. Van der School took great care that no part of the presentment, which he now read, should be lost on his
40 auditors It accused the prisoner of resisting the execution of a search-warrant, by force of arms, and particularized, in the vague language of the law, among a variety of other weapons, the use of the rifle. This was indeed a more serious charge than an ordinary assault and battery, and a corresponding degree of interest was manifested by the spectators in its result. The prisoner was duly ar-

raigned, and his plea again demanded. Mr. Lippert anticipated the answers of Natty, and in a whisper advised him how to lead. But the feelings of the old hunter were awakened by some of the expressions of the indictment, and, forgetful of his caution, he exclaimed—

" 'Tis a wicked untruth; I crave no man's blood. I thieves, the Iroquois, won't say it to my face, that I thirsted after man's blood. I have fou't as a soldier feared his Maker and his officer, but I never pulled trigger on any but a warrior that was up and awake No one can say that I ever struck even a Mingo in his blood. I believe there's some who thinks there's no God in the wilderness!"

"Attend to your plea, Bumpo," said the Judge; "hear that you are accused of using your rifle against an officer of justice? are you guilty or not guilty?"

By this time the irritated feelings of Natty had flared up, and he rested on the bar for a moment, in a militant posture, when he lifted his face, with his silent lips and, pointing to where the wood-chopper stood, he said

"Would Billy Kirby be standing there, d'ye think he had used the rifle?"

"Then you deny it," said Mr. Lippert; "you plead guilty?"

"Sartain," said Natty, "Billy knows that I never fired all Billy, do you remember the turkey last winter. I shot me! that was better than common firing; but I can't say as I used to could "

"Enter the plea of not guilty," said Judge Temple, strongly affected by the simplicity of the prisoner.

Hiram was again sworn, and his testimony given the second charge He had discovered his former prisoner and proceeded more cautiously than before. He remembered very distinctly, and for the man, with amazing terse-ness, the suspicion against the hunter, the complaint, the issuing of the warrant, and the swearing in of Kirby; and which, he affirmed, were done in due form of law. He then added the manner in which the constable had been received, and stated distinctly, that Natty had pointed his rifle at Kirby, and threatened his life, if he attempted to execute his duty. All this was confirmed by Jotham, who was observed to adhere closely to the story of the matter. Mr. Lippert conducted an artful cross-examination of these two witnesses, but after consuming much time was compelled to relinquish the attempt to obtain an advantage, in despair.

At length the district attorney called the wood-chopper to the bar. Billy gave an extremely confused account of the whole affair, although he evidently aimed at the truth, until Mr. Van der School aided him, by asking some direct questions:—

"It appears from examining the papers, that you demanded admission into the hut legally, so you were put in bodily fear by his rifle and threats?"

"I didn't mind them that, man," said Billy, snapping his fingers; "I should be a poor stick to mind old Leather-stocking."

"But I understood you to say (referring to your previous words (as delivered here in court) in the commencement of your testimony) that you thought he meant to shoot you?"

"To be sure I did; and so would you too, squire, if you had seen the chap dropping a muzzle that never misses, and cocking an eye that has a natural squint by long practice. I thought there would be a dust on't, and my back was up at once; but Leather-stocking gi'n up the skin, and so the matter ended."

"Ah! Billy," said Natty, shaking his head, "'twas a lucky thought in me to throw out the hide, or there might have been blood spilt, and I'm sure, if it had been yourn, I should have mourn'd it sorely the little while I have to stay."

"Well, Leather-stocking," returned Billy, facing the prisoner with a freedom and familiarity that utterly disregarded the presence of the court, "as you are on the subject, it may be that you've no—"

"Go on with your examination, Mr. District Attorney"

That gentleman eyed the familiarity between his witness and the prisoner with manifest disgust, and indicated to the court that he was done.

"Then you didn't feel frightened, Mr. Kirby?" said the counsel for the prisoner.

"Me! no," said Billy, casting his eyes over his own huge frame with evident self-satisfaction; "I'm not to be skeared so easy."

"You look like a hardy man; where were you born, sir?"

"Varmount state; 'tis a mountaynious place, but there's a stiff soil, and it's pretty much wooded with beech and maple."

"I have always heard so," said Mr. Lippert, soothingly. "You have been used to the rifle yourself, in that country?"

"I pull the second best trigger in this county. I knock

under to Natty Bunippo there, sin' he shot the pigeon."

Leather-stocking raised his head, and laughed again, when he abruptly thrust out a wrinkled hand, and said—

"You're young yet, Billy, and hav'n't seen the matches that I have, but here's my hand; I bear no malice to you, I don't"

Mr. Lippert allowed this conciliatory offering to be accepted, and judiciously paused, while the spirit of peace was exercising its influence over the two, but the Judge interposed his authority

"This is an improper place for such dialogues," he said "Proceed with your examination of this witness, Mr. Lippert, or I shall order the next"

The attorney started, as if unconscious of any impriority, and continued—

"So you settled the matter with Natty amicably on the spot, did you?"

"He gi'n me the skin, and I didn't want to quarrel with an old man, for my part, I see no such mighty matter in shooting a buck!"

"And you parted friends? and you would never have thought of bringing the business up before a court, hadn't you been subpoenaed?"

"I don't think I should, he gi'n the skin, and I didn't feel a hard thought, though Squire Doolittle got some affronted"

"I have done, sir," said Mr. Lippert, probably relying on the charge of the Judge, as he again seated himself, with the air of a man who felt that his success was certain.

When Mr. Van der School arose to address the jury, he commenced by saying—

"Gentlemen of the jury, I should have interrupted the leading questions put by the prisoner's counsel (by leading questions I mean telling him what to say), did I not feel confident that the law of the land was superior to any advantages (I mean legal advantages) which he might obtain by his art. The counsel for the prisoner, gentlemen, has endeavored to persuade you, in opposition to your own good sense, to believe that pointing a rifle at a constable (elected or deputed) is a very innocent affair; and that society (I mean the commonwealth, gentlemen) shall not be endangered thereby. But let me claim your attention, while we look over the particulars of this heinous offence." Here Mr. Van der School favored the jury with an abridgment of the testimony, recounted in such a manner as utterly to confuse the faculties of his worthy

listeners After this exhibition he closed as follows:—
"And now, gentlemen, having thus made plain to your senses the crime of which this unfortunate man has been guilty (unfortunate both on account of his ignorance and his guilt), I shall leave you to your own consciences, not in the least doubting that you will see the importance (notwithstanding the prisoner's counsel (doubtless relying on your former verdict) wishes to appear so confident of success) of punishing the offender, and asserting
10 the dignity of the laws."

It was now the duty of the Judge to deliver his charge. It consisted of a short, comprehensive summary of the testimony, laying bare the artifice of the prisoner's counsel, and placing the facts in so obvious a light, that they could not well be misunderstood "Living as we do, gentlemen," he concluded, "on the skirts of society, it becomes doubly necessary to protect the ministers of the law If you believe the witnesses, in their construction of the acts of the prisoner, it is your duty to convict him;
20 but if you believe that the old man, who this day appears before you, meant not to harm the constable, but was acting more under the influence of habit than by the instigations of malice, it will be your duty to judge him, but to do it with lenity"

As before, the jury did not leave their box; but, after a consultation of some little time, their foreman arose, and pronounced the prisoner—

"Guilty"

There was but little surprise manifested in the court
30 room at this verdict, as the testimony, the greater part of which we have omitted, was too clear and direct to be passed over The judges seemed to have anticipated this sentiment, for a consultation was passing among them also, during the deliberation of the jury, and the preparatory movements of the "bench" announced the coming sentence

"Nathaniel Bumpo," commenced the Judge, making the customary pause

The old hunter, who had been musing again, with his
40 head on the bar, raised himself, and cried, with a prompt, military tone—

"Here."

The Judge waved his hand for silence, and proceeded—

"In forming their sentence, the court have been governed as much by the consideration of your ignorance of the laws, as by a strict sense of the importance of punish-

ing such outrages as this of which you have been found guilty. They have therefore passed over the obvious punishment of whipping on the bare back, in mercy to you years; but as the dignity of the law requires an open exhibition of the consequences of your crime, it is ordered that you be conveyed from this room to the public stock where you are to be confined for one hour, that you pay a fine to the state of one hundred dollars; and that you be imprisoned in the jail of this county for one calendar month, and furthermore, that your imprisonment do not cease until the said fine shall be paid. I feel it my duty Nathaniel Bumpo—"

"And where should I get the money?" interrupted Leather-stocking, eagerly;" where should I get the money you'll take away the bounty on the painters, because I cut the throat of a deer; and how is an old man to find much gold or silver in the woods? No, no, judge the better of it, and don't talk of shutting me up in a jail the little time I have to stay"

"If you have anything to urge against the passing of sentence, the court will yet hear you," said the Judge mildly.

"I have enough to say ag'in it," cried Natty, grasping the bar on which his fingers were working with a convulsed motion. "Where am I to get the money? Let me go out into the woods and hills, where I've been used to breathe the clear air, and though I'm threescore and if you've left game enough in the country, I'll travel night and day but I'll make you up the sum afore the season over. Yes, yes—you see the reason of the thing, and the wickedness of shutting up an old man, that has spent his days, as one may say, where he could always look into the windows of heaven"

"I must be governed by the law—"

"Talk not to me of law, Marmaduke Temple," interrupted the hunter. "Did the beast of the forest mind your laws, when it was thirsty and hungering for the blood of your own child? She was kneeling to her God for a greater favor than I ask, and he heard her; and if you now say no to my prayers, do you think he will be de-

"My private feelings must not enter into—"

"Hear me, Marmaduke Temple," interrupted the man, with melancholy earnestness, "and hear reason I travelled these mountains when you was no judge, but an infant in your mother's arms; and I feel as if I had a right and a privilege to travel them ag'in afore I die. Have

forgot the time that you come on to the lake-shore, when there wasn't even a jail to lodge in; and didn't I give you my own bear-skin to sleep on, and the fat of a noble buck to satisfy the cravings of your hunger? Yes, yes—you thought it no sin then to kill a deer! And this I did, though I had no reason to love you, for you had never done anything but harm to them that loved and sheltered me. And now, will you shut me up in your dungeons to pay me for my kindness? A hundred dollars! where should I get the money? No, no—there's them that says hard things of you, Marmaduke Temple, but you an't so bad as to wish to see an old man die in a prison, because he stood up for the right. Come, friend, let me pass, it's long sin' I've been used to such crowds, and I crave to be in the woods ag'in. Don't fear me, Judge—I bid you not to fear me; for if there's beaver enough left on the streams, or the buckskins will sell for a shilling a-piece, you shall have the last penny of the fine. Where are ye, pups! come away, dogs! come away! we have a grievous 20 toil to do for our years, but it shall be done—yes, yes, I've promised it, and it shall be done!”

It is unnecessary to say, that the movement of the Leather-stocking was again intercepted by the constable, but before he had time to speak, a bustling in the crowd, and a loud hem, drew all eyes to another part of the room.

Benjamin had succeeded in edging his way through the people, and was now seen balancing his short body, with one foot in a window and the other on a railing of the jury-box. To the amazement of the whole court, the 30 steward was evidently preparing to speak. After a good deal of difficulty, he succeeded in drawing from his pocket a small bag, and then found utterance.

“If-so-be,” he said, “that your honor is agreeable to trust the poor fellow out on another cruise among the beasts, here's a small matter that will help to bring down the risk, seeing that there's just thirty-five of your Spaniards in it; and I wish, from the bottom of my heart, that they was raal British guineas, for the sake of the old boy. But 'tis as it is; and if Squire Dickens will just be so good 40 as to overhaul this small bit of an account, and take enough from the bag to settle the same, he's welcome to hold on upon the rest, till such time as the Leather-stocking can grapple with them said beaver, or, for that matter, forever, and no thanks asked”

As Benjamin concluded, he thrust out the wooden register of his arrears to the “Bold Dragoon” with one hand,

The prisoners.

while he offered his bag of dollars with the other. Astonishment at this singular interruption produced a profound stillness in the room, which was only interrupted by the Sheriff, who struck his sword on the table, and cried— 5 “Silence!”

“There must be an end of this,” said the Judge, struggling to overcome his feelings. “Constable, lead the prisoner to the stocks. Mr Clerk, what stands next on the calendar?”

Natty seemed to yield to his destiny, for he sank his head on his chest, and followed the officer from the courtroom in silence. The crowd moved back for the passage of the prisoner, and when his tall form was seen descending from the outer door, a rush of the people to the 60 scene of his disgrace followed.

[CHAPTER XXXIV Ben Pump, much incensed at the verdict, insists on taking the empty place in the stocks next to Natty Bumpo. When Hiram Doolittle unwarily comes near, Ben seizes one of his legs and gives him a drubbing, as a result Ben and Natty return to the jail together. Just before nightfall they are visited by Oliver, who apparently brings words of comfort, for by eight o'clock they have ostensibly retired for the night.]

CHAPTER XXXV. An hour later Elizabeth and Louisa come to the jail, with a pocketbook containing two hundred dollars for Natty. Outside they meet Oliver, disguised as a teamster and driving a yoke of oxen. Inside

they find that Natty already has a hole in the log wall and is ready to escape. Elizabeth agrees to buy powder for Natty's rifle and deliver it next day to the Vision, the mountain which overlooks Templeton. Then circumstances force her to take an active part in the jail break; amid much excitement and comings and goings she directs Oliver and Natty to the Judge's boat, and they escape across the lake. Billy Kirby, whose ox team Oliver had appropriated, delivers Ben Pump from the searching parties which, with torches blazing, scour the forest during the night.

CHAPTER XXXVI. Next morning, having purchased the powder from Monsieur Le Quoi, Elizabeth and Louisa start up the mountain. Remembering the panther, Louisa cannot go on, so Elizabeth leaves her at the edge of the woods. Natty is not on the mountaintop, but Elizabeth hears a faint cry and, following the sound, discovers Chingachgook on a small rocky terrace, watered by a spring, about a hundred feet below. He is bitterly reviewing the wrongs done his race, but is about to tell Elizabeth of Oliver's identity when they are startled by immense volumes of smoke and the noise of flames. A voice is heard crying for Chingachgook, and an instant later Oliver joins them.

CHAPTER XXXVII. Oliver has been searching for the old Indian to take him out of the way of the swiftly spreading forest fire. He and Elizabeth quickly discover that they are surrounded by flames and cannot escape; Chingachgook is wholly reconciled to dying. As Oliver, thinking the end has come, declares his love for Elizabeth, Natty Bumppo's voice is heard, the can of powder explodes, and, a moment later, Natty appears by the spring.

CHAPTER XXXVIII. It appears that he has learned from Louisa of their position on the mountain. He has explained to her the origin of the fire—carelessly dropped torches from the night search—and sent her to the village to give the alarm. He produces a buckskin to wrap around Elizabeth's flimsy clothing, straps the uncooperative Chingachgook to his back, and leads the way to safety along the crevice which is the course of the spring. They come to a rocky platform over the cavern which has excited so much curiosity and are joined there by Ben Pump and, to their surprise, Mr. Grant, who has been searching for Louisa Chingachgook, after a dramatic farewell to the world, dies to the accompaniment of a great flash of lightning. Rain begins to fall, and not long after voices are heard

calling Elizabeth. Oliver takes her to the road, promising that all will be explained on the morrow, and leaves to be found and taken home by her father.

CHAPTER XXXIX. Next morning many miles of woods are black and smoking, but the fire is at a stop. The lagers are sure that it was set by Oliver and Natty and urged on by curiosity as much as by wrath, gather a large force to besiege the mysterious cavern, now stoutly beleaguered. There is much slapstick parleying and blood fighting, but the defenders of the cave are about to be overwhelmed when Judge Temple appears and orders the fighting halted. At almost the same moment Oliver and Major Hartmann come down the mountain, having shouted that all shall be yielded and the cave opened.

CHAPTER XL. Five or six minutes later an old man with snow-white hair and a vacant eye is carried from the cavern on a deerskin chair. Major Hartmann and Oliver stand beside him. Judge Temple begins to suspect the truth, and when Oliver announces that the feeble oldster was once the rightful proprietor of the very soil on which now stand the Judge's recognitions, Major Effingham, the father of his one-time friend and partner. Oliver is revealed as his grandson, Edward Oliver Effingham, whose father had been drowned at sea in the ship whose loss had led Judge Temple to call in Dirck Van der School. The villagers sent home and explanations begun. Major Hartmann vouched to Oliver for Judge Temple's honest dealings, is now justified by the Judge's representations that he never regarded the estates as his own and has sought constantly for an opportunity of restoring to the Effinghams the property which he has held as trustee. Back at the mansion-house the Judge's will is produced, completely sustaining his explanations, and Oliver is promised that the Temple properties as soon as the transfer can be arranged.

CHAPTER XLI. Early in September Elizabeth and Oliver are married, and a few days later Major Effingham dies. After a brief stay in jail, Natty and Ben Pump are pardoned by the governor. Hiram Doolittle has been appeased and has left Templeton for opportunities farther west. Richard Jones has grown humble by the discovery that his silver mining theory had been based upon Jotham Riddel's faith in a diviner, and by the revelation that the mystery was demanded by the concealment of a major. Monsieur Le Quoi has returned to Paris. It is now a mild October morning, and Elizabeth and Oliver

taking a walk. She informs him that her father has procured a call from one of the towns on the Hudson for Mr. Grant; there Louisa will find society which may well lead to a suitable marriage. They approach the object of their walk:]

. . . The place at which they arrived was the little spot of level ground, where the cabin of the Leather-stocking had so long stood. Elizabeth found it entirely cleared of rubbish, and beautifully laid down in turf, by the removal of sods, which, in common with the surrounding country, had grown gay, under the influence of profuse showers, as if a second spring had passed over the land. This little place was surrounded by a circle of mason-work, and they entered by a small gate, near which, to the surprise of both, the rifle of Natty was leaning against the wall. Hector and the slut reposed on the grass by its side, as if conscious that, however altered, they were lying on the ground, and were surrounded by objects with which they were familiar. The hunter himself was stretched on the earth, before a headstone of white marble, pushing aside with his fingers the long grass that had already sprung up from the luxuriant soil around its base, apparently to lay bare the inscription. By the side of this stone, which was a simple slab at the head of a grave, stood a rich monument, decorated with an urn, and ornamented with the chisel.

Oliver and Elizabeth approached the graves with a light tread, unheard by the old hunter, whose sunburnt face was working, and whose eyes twinkled as if something impeded their vision. After some little time, Natty raised himself slowly from the ground, and said aloud—

"Well, well—I'm bold to say it's all right! There's something that I suppose is reading; but I can't make anything of it; though the pipe, and the tomahawk, and the moccasins be pretty well—pretty well, for a man that, I dares to say, never seed 'ither of the things. Ah's me! 'ere they lie, side by side, happy enough! Who will there be to put me in the 'arth when my time comes?"

When that unfortunate hour arrives, Natty, friends shall not be wanting to perform the last offices for you," said Oliver, a little touched at the hunter's soliloquy.

The old man turned, without manifesting surprise, for he had got the Indian habits in this particular, and running his hand under the bottom of his nose, seemed to wipe away his sorrow with the action.

"You've come out to see the graves, children, have ye?" he said, "well, well, they're wholesome sights to young as well as old."

"I hope they are fitted to your liking," said Effingham; "no one has a better right than yourself to be consulted in the matter."

"Why, seeing that I ain't used to fine graves," returned the old man, "it is but little matter consarning my taste. Ye laid the Major's head to the west, and Mohegan's to the east, did ye, lad?"

"At your request it was done."

"It's so best," said the hunter, "they thought they had to journey different ways. Children, though there is One greater than all, who'll bring the just together, at his own time, and who'll whiten the skin of a black-moor, and place him on a footing with princes."

"There is but little reason to doubt that," said Elizabeth, whose decided tones were changed to a soft, melancholy voice, "I trust we shall all meet again, and be happy together."

"Shall we, child, shall we?" exclaimed the hunter, with unusual fervor, "there's comfort in that thought too. But before I go, I should like to know what 'tis you tell these people, that be flocking into the country like pigeons in the spring, of the old Delaware, and of the bravest white man that ever trod the hills."

Effingham and Elizabeth were surprised at the manner of the Leather-stocking, which was unusually impressive and solemn, but, attributing it to the scene, the young man turned to the monument, and read aloud—

"Sacred to the memory of Oliver Effingham, Esquire, formerly a Major in his B. Majesty's 60th Foot, a soldier of tried valor, a subject of chivalrous loyalty; and a man of honesty. To these virtues, he added the graces of a Christian. The morning of his life was spent in honor, wealth, and power, but its evening was obscured by poverty, neglect, and disease, which were alleviated only by the tender care of his old, faithful, and upright friend and attendant, Nathaniel Bumpo. His descendants rear this stone to the virtues of the master, and to the enduring gratitude of the servant."

The Leather-stocking stared at the sound of his own name, and a smile of joy illumined his wrinkled features, as he said—

"And did ye say it, lad? have you then got the old man's name cut in the stone, by the side of his master's? God

bless ye, children! 'twas a kind thought, and kindness goes to the heart as life shortens "

Elizabeth turned her back to the speakers. Effingham made a fruitless effort before he succeeded in saying—

"It is there cut in plain marble; but it should have been written in letters of gold!"

"Show me the name, boy," said Natty, with simple eagerness; "let me see my own name placed in such honor. 'Tis a gin'rous gift to a man who leaves none of
10 his name and family behind him, in a country where he has tarried so long "

Effingham guided his finger to the spot, and Natty followed the windings of the letters to the end with deep interest, when he raised himself from the tomb, and said—

"I suppose it's all right, and it's kindly thought, and kindly done! But what have ye put over the red-skin?"

"You shall hear—

" 'This stone is raised to the memory of an Indian Chief, of the Delaware tribe, who was known by the sev-
20 eral names of John Mohegan, Mohican—' "

"Mo-hee-can, lad, they call theirselves! 'he-can."

" 'Mohican; and Chingagook—' "

" 'Gach, boy,—' gach-gook, Chingachgook, which, interpreted, means Big-sarpent. The name should be set down right, for an Indian's name has always some meaning in it."

"I will see it altered 'He was the last of his people who continued to inhabit this country, and it may be said of him, that his faults were those of an Indian, and his virtues those of a man' "

30 "You never said truer word, Mr. Oliver, ah's me! if you had know'd him as I did, in his prime, in that very battle where the old gentleman, who sleeps by his side, saved his life, when them thieves, the Iroquois, had him at the stake, you'd have said all that, and more too. I cut the thongs with this very hand, and gave him my own tomahawk and knife, seeing that the rifle was always my favorite weapon. He did lay about him like a man! I met him as I was coming home from the trail, with eleven Mingo scalps on his pole. You needn't shudder, Madam
40 Effingham, for they was all from shaved heads and warriors. When I look about me, at these hills, where I used to could count sometimes twenty smokes, curling over the tree-tops, from the Delaware camps, it raises mournful thoughts, to think that not a red-skin is left of them all; unless it be a drunken vagabond from the Oneidas, or them Yankee Indians, who, they say, be moving up from

the sea-shore; and who belong to none of God's cre to my seeming, being, as it were, neither fish nor flet neither white man nor savage. Well, well! the time come at last, and I must go—"

"Go!" echoed Edwards, "whither do you go?"

The Leather-stocking, who had imbibed, unconsciously many of the Indian qualities, though he always thought himself as of a civilized being, compared with even Delawares, averted his face to conceal the workings of his muscles, as he stooped to lift a large pack from beneath the tomb, which he placed deliberately on his shoulder.

"Go!" exclaimed Elizabeth, approaching him with hurried step; "you should not venture so far in the valley alone, at your time of life, Natty; indeed, it is improper. He is bent, Effingham, on some distant hunting "

"What Mrs Effingham tells you is true, Leatherstocking," said Edwards, "there can be no necessity for submitting to such hardships now! So throw aside your pack, and confine your hunt to the mountains near which you will go "

"Hardship! 'tis a pleasure, children, and the greatest that is left me on this side the grave "

"No, no; you shall not go to such a distance," Elizabeth, laying her white hand on his deer-skin park. "I am right! I feel his camp-kettle, and a canister of powder! he must not be suffered to wander so far from Oliver. remember how suddenly Mohegan disappeared away "

"I know'd the parting would come hard, children know'd it would!" said Natty, "and so I got aside to sit at the graves by myself, and thought if I left ye the valley for the sake which the Major gave me when we first parted the woods, ye wouldn't take it unkind, but would kindly that, let the old man's body go where it might, his belongings stayed behind him."

"This means something more than common!" exclaimed the youth; "where is it, Natty, that you put going?"

The hunter drew nigh him with a confident, reassuring air, as if what he had to say would silence all objection and replied—

"Why, lad, they tell me, that on the big lakes there is the best of hunting, and a great range, without a white man on it, unless it may be one like myself. I'm weary of living in clearings, and where the hammer is sounding in my ears from sunrise to sundown. And though

much bound to ye both, children—I wouldn't say it if it was not true—I crave to go into the woods ag'in, I do."

"Woods!" echoed Elizabeth, trembling with her feelings; "do you not call these endless forests woods?"

"Ah! child, these be nothing to a man that's used to the wilderness. I have took but little comfort sin' your father come on with his settlers, but I wouldn't go far, while the life was in the body that lies under the sod there. But now he's gone, and Chingachgook is gone, and you be both young and happy. Yes! the big house has rung with merriment this month past! And now, I thought, was the time to try to get a little comfort in the close of my days. Woods! indeed! I doesn't call these woods, Madam Effingham, where I lose myself every day of my life in the clearings."

"If there be anything wanting to your comfort, name it, Leather-stocking, if it be attainable it is yours."

"You mean all for the best, lad, I know it, and so does Madam, too, but your ways isn't my ways. 'Tis like the dead there, who thought, when the breath was in them, that one went east, and one went west, to find their heavens, but they'll meet at last, and so shall we, children. Yes, and as you've begun, and we shall meet in the land of the just at last."

"This is so new! so unexpected!" said Elizabeth, in almost breathless excitement, "I had thought you meant to live with us and die with us, Natty."

"Words are of no avail," exclaimed her husband, "the habits of forty years are not to be dispossessed by the ties of a day. I know you too well to urge you further, Natty, unless you will let me build you a hut on one of the distant hills, where we can sometimes see you, and know that you are comfortable."

"Don't fear for the Leather-stocking, children, God will see that his days be provided for, and his ind happy. I know you mean all for the best, but our ways doesn't agree. I love the woods, and ye relish the face of man, I eat when hungry, and drink when a-dry, and ye keep stated hours and rules—nay, nay, you even over-feed the dogs, lad, from pure kindness, and hounds should be gaunty to run well. The meanest of God's creators be made for some use, and I'm formed for the wilderness, if ye love me, let me go where my soul craves to be ag'in!"

The appeal was decisive; and not another word of en-

treaty for him to remain was then uttered, but Elizabeth bent her head to her bosom and wept, while her husband dashed away the tears from his eyes; and, with hands that almost refused to perform their office, he produced his pocket-book, and extended a parcel of bank-notes to the hunter.

"Take these," he said, "at least take these; secure them about your person, and in the hour of need, they will do you good service."

The old man took the notes, and examined them with a curious eye.

"This, then, is some of the new-fashioned money that they've been making at Albany, out of paper! It can't be worth much to they that hasn't larning! No, no, lad—take back the stuff, it will do me no sarvice. I took kear to get all the Frenchman's powder afore he broke up, and they say lead grows where I'm going. It isn't even fit for wads, seeing that I use none but leather!—Madam Effingham, let an old man kiss your hand, and wish God's choicest blessings on you and your'n."

"Once more let me beseech you, stay!" cried Elizabeth. "Do not, Leather-stocking, leave me to grieve for the man who has twice rescued me from death, and who has served those I love so faithfully. For my sake, if not for your own, stay. I shall see you in those frightful dreams that still haunt my nights, dying in poverty and age, by the side of those terrific beasts you slew. There will be no evil, that sickness, want, and solitude can inflict, that my fancy will not conjure as your fate. Stay with us, old man, if not for your own sake, at least for ours."

"Such thoughts and bitter dreams, Madam Effingham," returned the hunter, solemnly, "will never haunt an innocent parson long. They'll pass away with God's pleasure. And if the cat-a-mounts be yet brought to your eyes in sleep, 'tis not for my sake, but to show you the power of Him that led me there to save you. Trust in God, Madam, and your honorable husband, and the thoughts for an old man like me can never be long nor bitter. I pray that the Lord will keep you in mind—the Lord that lives in clearings as well as in the wilderness—and bless you, and all that belong to you, from this time till the great day when the whites shall meet the red-skins in judgment, and justice shall be the law, and not power."

Elizabeth raised her head, and offered her colorless cheek to his salute, when he lifted his cap and touched it respectfully. His hand was grasped with convulsive

fervor by the youth, who continued silent. The hunter prepared himself for his journey, drawing his belt tighter, and wasting his moments in the little reluctant movements of a sorrowful departure. Once or twice he essayed to speak, but a rising in his throat prevented it. At length he shouldered his rifle, and cried with a clear huntsman's call that echoed through the woods—

"He-e-e-re, he-e-e-re, pups—away, dogs, away,—ye'll be footsore afore ye see the end of the journey!"

10 The hounds leaped from the earth at this cry, and scenting around the graves and the silent pair, as if conscious of their own destination, they followed humbly at the heels of their master. A short pause succeeded, during which even the youth concealed his face on his grandfather's tomb. When the pride of manhood, however, had suppressed the feelings of nature, he turned to renew his

entreaties, but saw that the cemetery was occupied only by himself and his wife.

"He is gone!" cried Effingham

Elizabeth raised her face, and saw the old hunter standing, looking back for a moment, on the verge of the wood. As he caught their glances, he drew his hand hastily across his eyes again, waved it on high for adieu, and uttering a forced cry to his dogs, who were crouching at his feet, he entered the forest.

This was the last that they ever saw of the Leath stocking, whose rapid movements preceded the pursuit which Judge Temple both ordered and conducted. He had gone far toward the setting sun,—the foremost of that band of pioneers who are opening the way for the march of the nation across the continent

1822-11

POE

Edgar Allan Poe

1809 • 1849

Probably more than any other American author, Edgar Allan Poe—as a personality—has appealed to popular imagination. Generally, people think of him as a figure who might have emerged from one of his stories or poems—mysterious, wild, abnormal. There are, to be sure, elements of strangeness in the life of this neurotic genius. But it is dangerous to guess that his tales were merely autobiographical exploitations of his weird way of living. For one thing, it is easy to see that he deliberately tried to make people look upon him as a Byronic, enigmatic poet. For another, his highly logical criticisms and the tales themselves show that he used his extraordinary mind to work out his literary effects with almost mathematical exactitude.

Poe's tragic life was a product of bad luck and instability. The son of a wandering theatrical family, he was orphaned at two and became the ward of the John Allan family of Richmond, Virginia. Never legally adopted, he could not live quite the normal life of a member of a well-to-do family. Although in his early years both Mr. and Mrs. Allan did what they could to spoil him, friction grew between him and his foster father until he was withdrawn from the University of Virginia at less than a year of attendance. There followed a period of service in the army (1827-1829), an unhappy brief career at West Point (1830-1831), and a final break with Allan (1832).

Before the break Poe had published three books

poetry—*Tamerlane and Other Poems* (1827), *Al Aaraaf, Tamerlane, and Minor Poems* (1829), and *Poems* (Second Edition, 1831)—none very successful financially. Now driven to try to make a living with his pen, he began writing tales. A sign that he had some success was that one of them, "The MS Found in a Bottle," won a one-hundred-dollar prize in 1833. Befriended by one of the contest judges, John Pendleton Kennedy (p. 1115), he began a career as editor, serving on the staff of the *Southern Literary Messenger* (1835-1837), *Burton's Gentleman's Magazine* (1839), *Graham's Magazine* (1841-1842), and other periodicals. Other tales won reputes for him, and he was an alert and canny editor, but his fiery temper and his instability worked against his success.

Although Poe was not at all times the brooding, gloomy person tradition has painted, his life was on the whole an unhappy one. In 1831 he found a home with Mrs. Maria Clemm, mother of Poe's cousin, Virginia—a home in which poverty and sickness had made life hard. In 1835 he married thirteen-year-old Virginia, a fragile child who suffered from a devastating illness destined to end her life when she was twenty-six. To forget home troubles or what seemed bad treatment by the world, Poe periodically went on drinking sprees which completely disorganized his high-strung nerves. Between such outbreaks there were periods of sorrowful remorse. Proud because of his aristocratic upbringing and because of the high opinion he had of his abilities, he was bitter about not doing better in the world. Even in

1845, after he had won wide popularity, a collection of his verse, *The Raven and Other Poems*, and a volume of his stories, *Tales of the Grotesque and Arabesque*, did not have much financial success. He died, in mysterious circumstances, in Baltimore, October 7, 1849.

When Poe was about to start his career as a writer of tales, he evidently studied successful magazine stories with great care to find a formula for marketable fiction. He saw that, because of a complicated international copyright situation, the most remunerative market was the one for short narratives. He also found that in all the magazines—even the delicate *Godey's Lady's Book*—the tale of terror was thriving. Using the keen mind which eventually was to make him the outstanding journalistic critic of his day, he figured out a highly successful way of contriving such tales. This formula was that of the single effect, set forth in his "Review of *Twice-Told Tales*." The writer of a tale, Poe held, should subordinate everything in it to the effect he wanted the narrative to have upon the reader. This formula he employed so well that the tales he wrote have outlasted all the less skillful narratives which originally had been his models. Two elements in the tales chiefly accounted for their success: the climactic arrangement of happenings in them and a poetic style appropriate to their unfolding.

This poetic style and a similar "single effect" formula were also important in molding Poe's poems. Using words carefully chosen for their connotations and making the most of his mastery of rhythm and tone color, he wrote a number of memorable lyrics. Some of these are too showy in technique, too deliberately blurred in meaning to satisfy modern taste, but others, such as

"Romance," "To Helen," "Israfel," and "To One in P
dise," still stand as masterpieces of their kind.

Review of "Twice-Told Tales"

Since Poe's critical writings are of peculiar value in explaining the nature of his works, and are particularly useful for the study of his technical skill, they are presented before the selections from the creative writings themselves. The tales and then the poems follow, each group chronologically arranged

The criticism of Hawthorne's book typifies Poe's overwhelming interest in "effect"—the impact which a work has upon the reader—an interest which leads him not only to rank Hawthorne as an essayist in exactly the way he does but also to give essays, poems, and tales their respective ranks in a literary hierarchy. Even the talk about originality is talk about effect, since Poe thought of originality—as he said elsewhere—as "the reader's sense of the new." And clearly, poems are given their preeminent place because they have the greatest effect upon the highest faculty of the reader.

The most famous passage in this essay is the paragraph beginning with the words, "A skilful literary artist has constructed a tale"—a passage almost inevitably quoted in any book on the short story. Here, very specifically, Poe asserts that everything in a tale—every incident, every combination of events, every word—must aid the author in achieving a preconceived emotional effect. In a revision of the passage five years later, Poe was to make the second sentence even more specific by revising it to

read in part: "He then invents such incidents, he combines such events, and discusses them in such ton may best serve him in establishing this preconce effect" (The darker type indicates the addition.) What means by "tone" perhaps was indicated in an earlier article in which he noted that Hawthorne's "tone singularly effective—wild, plaintive, thoughtful, and full accordance with his themes"

This review was published in *Graham's Magazine* May 1842. Parts of it were revised and included in an article, "Tale-Writing," in *Godey's Lady's Book*, November 1847, which shows some interesting modification of Poe's judgments of Hawthorne.

WE said a few hurried words about Mr Hawthorne in our last number, with the design of speaking more in the present. We are still, however, pressed for room and must necessarily discuss his volumes more briefly and more at random than their high merits deserve.

The book professes to be a collection of *tales*, yet in two respects, misnamed. These pieces are now in their third republication, and, of course, are thrice-Moreover, they are by no means *all* tales, either in ordinary or in the legitimate understanding of the term. Many of them are pure essays; for example, "Sights from a Steeple," "Sunday at Home," "Little Annie's Ramble," "A Rill from the Town Pump," "The Toll-Gate"

In a few . . . words, in a notice published in the April 1851 issue of *Graham's Magazine*, now available in *Works*, ed. Harrison (hereafter referred to as *Works*), XI, 102-104. The earlier review makes use of the same points made by the later one. It is notable, however, in the first review Poe says that, despite its fame, "A Rill from the Town Pump" is "the least meritorious" of Hawthorne's compositions and that the best include, in addition to those cited in this second review, "David Swan"

Day," "The Haunted Mind," "The Sister Years," "Snow-Flakes," "Night Sketches," and "Foot-Prints on the Sea-Shore." We mention these matters chiefly on account of their discrepancy with that marked precision and finish by which the body of the work is distinguished.

Of the essays just named, we must be content to speak in brief. They are each and all beautiful, without being characterised by the polish and adaptation so visible in the tales proper. A painter would at once note their leading or predominant feature, and style it *repose*. There is no attempt at effect. All is quiet, thoughtful, subdued. Yet this repose may exist simultaneously with high originality of thought, and Mr Hawthorne has demonstrated the fact. At every turn we meet with novel combinations; yet these combinations never surpass the limits of the quiet. We are soothed as we read; and withal is a calm astonishment that ideas so apparently obvious have never occurred or been presented to us before. Herein our author differs materially from Lamb or Hunt or Hazlitt—who, with vivid originality of manner and expression, have less of the true novelty of thought than is generally supposed, and whose originality, at best, has an uneasy and meretricious quaintness, replete with startling effects unfounded in nature, and inducing trains of reflection which lead to no satisfactory result. The Essays of Hawthorne have much of the character of Irving, with more of originality, and less of finish; while, compared with the Spectator, they have a vast superiority at all points. The Spectator, Mr. Irving, and Mr. Hawthorne have in common that tranquil and subdued manner which we have chosen to denominate *repose*; but, in the case of the two former, this repose is attained rather by the absence of novel combination, or of originality, than otherwise, and consists chiefly in the calm, quiet, unostentatious expression of common-place thoughts, in an unambitious, unadulterated Saxon. In them, by strong effort, we are made to conceive the absence of all. In the essays before us the absence of effort is too obvious to be mistaken, and a strong under current of *suggestion* runs continuously beneath the upper stream of the tranquil thesis. In short, these effusions of Mr Hawthorne are the product of a truly imaginative intellect, restrained, and in some measure repressed, by fastidiousness of taste, by constitutional melancholy and by indolence.

But it is of his tales that we desire principally to

speak. The tale proper, in our opinion, affords unquestionably the fairest field for the exercise of the loftiest talent, which can be afforded by the wide domains of mere prose. Were we bidden to say how the highest genius could be most advantageously employed for the best display of its own powers, we should answer, without hesitation—in the composition of a rhymed poem, not to exceed in length what might be perused in an hour. Within this limit alone can the highest order of true poetry exist. We need only here say, upon this topic, that, in almost all classes of composition, the unity of effect or impression is a point of the greatest importance. It is clear, moreover, that this unity cannot be thoroughly preserved in productions whose perusal cannot be completed at one sitting. We may continue the reading of a prose composition, from the very nature of prose itself, much longer than we can persevere, to any good purpose, in the perusal of a poem. This latter, if truly fulfilling the demands of the poetic sentiment, induces an exaltation of the soul which cannot be long sustained. All high excitements are necessarily transient. Thus a long poem is a paradox. And, without unity of impression, the deepest effects cannot be brought about. Epics were the offspring of an imperfect sense of Art, and their reign is no more. A poem too brief may produce a vivid, but never an intense or enduring impression. Without a certain continuity of effort—without a certain duration or repetition of purpose—the soul is never deeply moved. There must be the dropping of the water upon the rock. De Beranger has wrought brilliant things—pungent and spirit-stirring—but, like all immassive bodies, they lack *momentum*, and thus fail to satisfy the Poetic Sentiment. They sparkle and excite, but, from want of continuity, fail deeply to impress. Extreme brevity will degenerate into epigrammatism; but the sin of extreme length is even more unpardonable. *In medio tutissimus ibis*.

Were we called upon, however, to designate that class of composition which, next to such a poem as we have suggested, should best fulfil the demands of high genius—should offer it the most advantageous field of exertion—we should unhesitatingly speak of the prose tale,

76 De Beranger, Pierre Jean de Béranger (1780-1857), a French poet

• 83 *In medio . . . ibis*. You will go most safely in the middle path

as Mr. Hawthorne has here exemplified it. We allude to the short prose narrative, requiring from a half-hour to one or two hours in its perusal. The ordinary novel is objectionable, from its length, for reasons already stated in substance. As it cannot be read at one sitting, it deprives itself, of course, of the immense force derivable from *totality*. Worldly interests intervening during the pauses of perusal, modify, annul, or counteract, in a greater or less degree, the impressions of the book. But simple
 10 cessation in reading, would, of itself, be sufficient to destroy the true unity. In the brief tale, however, the author is enabled to carry out the fullness of his intention, be it what it may. During the hour of perusal the soul of the reader is at the writer's control. There are no external or extrinsic influences—resulting from weariness or interruption.

A skilful literary artist has constructed a tale. If wise, he has not fashioned his thoughts to accommodate his incidents; but having conceived, with deliberate care,
 20 a certain unique or single *effect* to be wrought out, he then invents such incidents—he then combines such events as may best aid him in establishing this preconceived effect. If his very initial sentence tend not to the outbringing of this effect, then he has failed in his first step. In the whole composition there should be no word written, of which the tendency, direct or indirect, is not to the one preestablished design. And by such means, with such care and skill, a picture is at length
 30 painted which leaves in the mind of him who contemplates it with a kindred art, a sense of the fullest satisfaction. The idea of the tale has been presented unblemished, because undisturbed, and this is an end unattainable by the novel. Undue brevity is just as exceptional here as in the poem, but undue length is yet more to be avoided.

We have said that the tale has a point of superiority even over the poem. In fact, while the *rhythm* of this latter is an essential aid in the development of the poet's highest idea—the idea of the Beautiful—the artificialities of this rhythm are an inseparable bar to the
 40 development of all points of thought or expression which have their basis in *Truth*. But Truth is often, and in very great degree, the aim of the tale. Some of the finest tales are tales of ratiocination. Thus the field of this species of composition, if not in so elevated a

region on the mountain of Mind, is a table-land of vaster extent than the domain of the mere poem. products are never so rich, but infinitely more numerous, and more appreciable by the mass of mankind. writer of the prose tale, in short, may bring to his th a vast variety of modes or inflections of thought expression—(the ratiocinative, for example, the satiric, or the humorous) which are not only antagonistic to the nature of the poem, but absolutely forbidden one of its most peculiar and indispensable adjuncts allude, of course, to rhythm. It may be added here, *parenthèse*, that the author who aims at the purely beautiful in a prose tale is laboring at great disadvantage. Beauty can be better treated in a poem. Not so terror, or passion, or horror, or a multitude of such points. And here it will be seen how full of prejudice are the usual animadversions against those *tales of* many fine examples of which were found in the early numbers of Blackwood. The impressions produced wrought in a legitimate sphere of action, and constitute a legitimate although sometimes an exaggerated interest. They were relished by every man of genius; although there were found many men of genius who condemned them without just ground. The true critic will but demand that the design intended be accomplished, to the fullest extent, by the means most advantageously applicable.

We have very few American tales of real merit—may say, indeed, none, with the exception of "The Teller of a Traveller" of Washington Irving, and these "Told Tales" of Mr. Hawthorne. Some of the pieces Mr. John Neal abound in vigor and originality, but in general, his compositions of this class are excessively diffuse, extravagant, and indicative of an imperfect talent of Art. Articles at random are, now and then, met with in our periodicals which might be advantageously compared with the best effusions of British Magazines; but, upon the whole, we are behind our progenitors in this department of literature.

Of Mr. Hawthorne's Tales we would say, emphatically that they belong to the highest region of Art—an

56 *par parenthèse*, by way of parenthesis • 64 Blackwood, a magazine in which Poe found a great deal of Gothic fiction. A tale he wrote 'à la Blackwood' parodied the Gothic technique • 7 John Neal (1793-1876), an American fiction writer

subservient to genius of a very lofty order. We had supposed, with good reason for so supposing, that he had been thrust into his present position by one of the impudent *cliques* which beset our literature, and whose pretensions it is our full purpose to expose at the earliest opportunity, but we have been most agreeably mistaken. We know of few compositions which the critic can more honestly commend than these "Twice-Told Tales." As Americans, we feel proud of the book.

10 Mr. Hawthorne's distinctive trait is invention, creation, imagination, originality—a trait which, in the literature of fiction, is positively worth all the rest. But the nature of originality, so far as regards its manifestation in letters, is but imperfectly understood. The invective or original mind as frequently displays itself in novelty of *tone* as in novelty of matter. Mr. Hawthorne is original at all points.

It would be a matter of some difficulty to designate the best of these tales, we repeat that, without exception, they are beautiful. "Wakefield" is remarkable for 20 the skill with which an old idea—a well-known incident—is worked up or discussed. A man of whims conceives the purpose of quitting his wife and residing *incognito*, for twenty years, in her immediate neighborhood. Something of this kind actually happened in London. The force of Mr. Hawthorne's tale lies in the analysis of the motives which must or might have impelled the husband to such folly, in the first instance, with the possible causes of his perseverance. Upon this thesis a sketch of 30 singular power has been constructed.

"The Wedding Knell" is full of the boldest imagination—an imagination fully controlled by taste. The most captious critic could find no flaw in this production.

"The Minister's Black Veil" is a masterly composition of which the sole defect is that to the rabble its exquisite skill will be *caviare*. The *obvious* meaning of this article will be found to smother its insinuated one. The *moral* put into the mouth of the dying minister will be supposed to convey the *true* import of the narrative, and 40 that a crime of dark dye (having reference to the "young lady"), has been committed, is a point which only minds congenial with that of the author will perceive.

"Mr. Higginbotham's Catastrophe" is vividly original and managed most dexterously.

"Dr. Heidegger's Experiment" is exceedingly well

imagined, and executed with surpassing ability. The artist breathes in every line of it.

"The White Old Maid" is objectionable, even more than the "Minister's Black Veil," on the score of its mysticism. Even with the thoughtful and analytic, there will be much trouble in penetrating its entire import.

"The Hollow of the Three Hills" we would quote in full, had we space,—not as evincing higher talent than any of the other pieces, but as affording an excellent example of the author's peculiar ability. The subject is commonplace. A witch subjects the Distant and the Past to the view of a mourner. It has been the fashion to describe, in such cases, a mirror in which the images of the absent appear, or a cloud of smoke is made to arise, and thence the figures are gradually unfolded. Mr. 6 Hawthorne has wonderfully heightened his effect by making the ear, in place of the eye, the medium by which the fantasy is conveyed. The head of the mourner is enveloped in the cloak of the witch, and within its magic folds there arise sounds which have an all-sufficient intelligence. Throughout this article also, the artist is conspicuous—not more in positive than in negative merits. Not only is all done that should be done, but (what perhaps is an end with more difficulty attained) there is nothing done which should not be. Every word 7 tells, and there is not a word that does *not* tell. . . .

In the way of objection we have scarcely a word to say of these tales. There is, perhaps, a somewhat too general or prevalent *tone*—a tone of melancholy and mysticism. The subjects are insufficiently varied. There is not so much of *versatility* evinced as we might well be warranted in expecting from the high powers of Mr. Hawthorne. But beyond these trivial exceptions we have really none to make. The style is purity itself. Force 80 abounds. High imagination gleams from every page. Mr. Hawthorne is a man of the truest genius. We only regret that the limits of our Magazine will not permit us to pay him that full tribute of commendation, which, under other circumstances, we should be so eager to pay.

1842

70 Every word . . . tell The omitted passage hints that Hawthorne plagiarized from Poe in "Howe's Masquerade." The accusation is unfounded.

The Philosophy of Composition

What the "Review of Twice-Told Tales" does for Poe's theory of the tale, this essay does for his theory of the poem. Here is his account of the way he composed his most famous poem, "The Raven." Critics have argued interminably about the accuracy of this account, and of course there is no way of settling the dispute. Three points perhaps are worthy of emphasis: (1) that in the essay Poe himself labels irrelevant the primary circumstance or the necessity of composing the poem, thus dismissing in a curt paragraph an aspect of the poetic process with which literary historians are frequently most concerned; (2) that the account is perfectly in harmony with Poe's theories about the nature of artistic creations; (3) that, as Mr. Hervey Allen points out in his biography of Poe, *Israfel*: "The long period over which the composition of 'The Raven' stretched, a period of four years at least, shows that into the arrangement and composition of it went a great deal of critical thinking, artistic analysis, a logical arrangement of effects, and a painstaking construction of the spinal narrative which no mere emotion could have provided."

Whether the account is factual or not, it does suggest what its author was likely to have in mind as he composed or studied a poem: the relationship between happenings, details, rhythms, refrains—everything in the poem—and the effect. Moreover, this essay, which Poe called "my best specimen of analysis," offers an excellent example of his critical mind at work.

Charles Dickens, in a note now lying before me, alluding to an examination I once made of the mechanism of "Barnaby Rudge," says—"By the way, are you aware that Godwin wrote his 'Caleb Williams' backwards? He first involved his hero in a web of difficulties, forming

the second volume, and then, for the first, cast about for some mode of accounting for what had been done

I cannot think this the *precise* mode of procedure the part of Godwin—and indeed what he himself acknowledges is not altogether in accordance with Dickens's idea; but the author of "Caleb Williams" is too good an artist not to perceive the advantage derivable from at least a somewhat similar process. Nothing more clear than that every plot, worth the name, must be elaborated to its *dénouement* before anything be tempted with the pen. It is only with the *dénouement* constantly in view that we can give a plot its indisputable air of consequence, or causation, by making the incidents, and especially the tone at all points, tend to development of the intention.

There is a radical error, I think, in the usual mode of constructing a story. Either history affords a thesis, one is suggested by an incident of the day, or, at best, the author sets himself to work, in the combination of striking events to form merely the basis of his narrative; designing, generally, to fill in with description, dialogue or authorial comment whatever crevices of fact or action may from page to page render themselves apparent.

I prefer commencing with the consideration of *effect*. Keeping originality *always* in view—for he is false to himself who ventures to dispense with so obvious and so easily attainable a source of interest—I say to myself, in the first place,—“Of the innumerable effects, impressions, of which the heart, the intellect, or (more generally) the soul is susceptible, what one shall I, on the present occasion, select?” Having chosen a novel first, and secondly a vivid effect, I consider whether it can be best wrought by incident or tone—whether by ordinary incidents and peculiar tone, or the converse or by peculiarity both of incident and tone—afterward

2 an examination . . . made, "a prospective review," published 1841, of *Barnaby Rudge*, when the novel was still coming out serially. Poe guessed the identity of the murderer and thus proved that Dickens had not deceived the reader as the author of a ratiocinative tale should do. • 4 Godwin. William Godwin testifies in the Preface to *Caleb Williams* that he wrote the book thus: "I formed the concept of a book of fictitious adventure, that should in some way be distinguished by a very powerful interest. Pursuing this idea, I invented the third volume of my tale, then the second, and last of all the first." • 15 *dénouement*, from the French *dénouer*—to unravel, hence, the unraveling of a plot.

looking about me (or rather within) for such combinations of event, or tone, as shall best aid me in the construction of the effect

I have often thought how interesting a magazine paper might be written by any author who would—that is to say, who could—detail, step by step, the processes by which any one of his compositions attained its ultimate point of completion. Why such a paper has never been given to the world, I am much at a loss to say, but, perhaps, the authorial vanity has had more to do with the omission than any one other cause. Most writers—poets in especial—prefer having it understood that they compose by a species of fine frenzy—an ecstatic intuition; and would positively shudder at letting the public take a peep behind the scenes at the elaborate and vacillating crudities of thought, at the true purposes seized only at the last moment, at the innumerable glimpses of idea that arrived not at the maturity of full view, at the fully matured fancies discarded in despair as unmanageable, at the cautious selections and rejections, at the painful erasures and interpolations—in a word, at the wheels and pinions, the tackle for scene-shifting, the step-ladders and demon-traps, the cock's feathers, the red paint and the black patches, which in ninety-nine cases out of the hundred constitute the properties of the literary *histrion*.

I am aware, on the other hand, that the case is by no means common in which an author is at all in condition to retrace the steps by which his conclusions have been attained. In general, suggestions, having arisen pell-mell, are pursued and forgotten in a similar manner.

For my own part, I have neither sympathy with the repugnance alluded to, nor at any time the least difficulty in recalling to mind the progressive steps of any of my compositions, and, since the interest of an analysis, or reconstruction, such as I have considered a *desideratum*, is quite independent of any real or fancied interest in the thing analyzed, it will not be regarded as a breach of decorum on my part to show the *modus operandi* by which some one of my own works was put together. I select "The Raven" as most generally known. It is my design to render it manifest that no one point in its composition is referable either to accident or intuition; that the work proceeded, step by step, to its completion with the precision and rigid consequence of a mathematical problem.

Let us dismiss, as irrelevant to the poem *per se*, the circumstance—or say, the necessity—which in the first place gave rise to the intention of composing a poem that should suit at once the popular and the critical taste. 50

We commence, then, with this intention

The initial consideration was that of extent. If any literary work is too long to be read at one sitting, we must be content to dispense with the immensely important effect derivable from unity of impression, for, if two sittings be required, the affairs of the world interfere, and everything like totality is at once destroyed. But since, *ceteris paribus*, no poet can afford to dispense with *anything* that may advance his design, it but remains to be seen whether there is, in extent, any advantage to counterbalance the loss of unity which attends it. Here I say no, at once. What we term a long poem is, in fact, merely a succession of brief ones—that is to say, of brief poetical effects. It is needless to demonstrate that a poem is such, only inasmuch as it intensely excites, by elevating, the soul, and all intense excitements are, through a psychal necessity, brief. For this reason, at least one half of the "Paradise Lost" is essentially prose—a succession of poetical excitements interspersed, *inevitably*, with corresponding depressions—the whole being deprived, through the extremeness of its length, of the vastly important artistic element, totality, or unity, of effect. 60

It appears evident, then, that there is a distinct limit, as regards length, to all works of literary art—the limit of a single sitting, and that, although in certain classes of prose composition, such as "Robinson Crusoe" (demanding no unity), this limit may be advantageously overpassed, it can never properly be overpassed in a poem. Within this limit, the extent of a poem may be made to bear mathematical relation to its merit—in other words, to the excitement or elevation—again, in other words, to the degree of the true poetical effect which it is capable of inducing, for it is clear that the brevity must be in direct ratio of the intensity of the intended effect—this, with one proviso—that a certain 80

26 *histrion*, actor • 39 *modus operandi*, method of working • 47 *per se*, by itself • 58 *ceteris paribus*, other things being equal • 67 *psychal*, psychological. The necessity for brevity in poetry, for the reason suggested in this sentence, is one of Poe's favorite ideas

degree of duration is absolutely requisite for the production of any effect at all.

Holding in view these considerations, as well as that degree of excitement which I deemed not above the popular while not below the critical taste, I reached at once what I conceived the proper *length* for my intended poem—a length of about one hundred lines. It is, in fact, a hundred and eight.

My next thought concerned the choice of an impression, or effect, to be conveyed—and here I may as well observe that, throughout the construction, I kept steadily in view the design of rendering the work *universally* appreciable. I should be carried too far out of my immediate topic were I to demonstrate a point upon which I have repeatedly insisted, and which with the poetical stands not in the slightest need of demonstration—the point, I mean, that Beauty is the sole legitimate province of the poem. A few words, however, in elucidation of my real meaning, which some of my friends have evinced a disposition to misrepresent. That pleasure which is at once the most intense, the most elevating, and the most pure, is, I believe, found in the contemplation of the beautiful. When, indeed, men speak of Beauty, they mean, precisely, not a quality, as is supposed, but an effect; they refer, in short, just to that intense and pure elevation of *soul*—not of intellect, or of heart—upon which I have commented, and which is experienced in consequence of contemplating “the beautiful.” Now I designate Beauty as the province of the poem, merely because it is an obvious rule of Art that effects should be made to spring from direct causes—that objects should be attained through means best adapted for their attainment—on one as yet having been weak enough to deny that the peculiar elevation alluded to is *most readily* attained in the poem. Now the object, Truth, or the satisfaction of the intellect, and the object, Passion, or the excitement of the heart, are, although attainable to a certain extent in poetry, far more readily attainable in prose. Truth, in fact, demands a precision, and Passion a *homeliness* (the truly passionate will comprehend me), which are absolutely antagonistic to that Beauty which, I maintain, is the excitement or pleasurable elevation, of the soul. It by no means follows from anything here said that passion, or even truth, may not be introduced, and even profitably introduced, into a poem—for they may serve in elucidation, or aid the general effect, as do

discords in music, by contrast; but the true artist always contrive, first, to tone them into proper servience to the predominant aim, and, secondly, to veil them, as far as possible, in that Beauty which is atmosphere and the essence of the poem.

Regarding, then, Beauty as my province, my question referred to the *tone* of its highest manifestation, and all experience has shown that this tone is of *sadness*. Beauty of whatever kind, in its sup development, invariably excites the sensitive soul to tears. Melancholy is thus the most legitimate of poetical tones.

The length, the province, and the tone, being determined, I betook myself to ordinary induction, the view of obtaining some artistic piquancy which might serve me as a key-note in the construction of a poem—some pivot upon which the whole structure might turn. In carefully thinking over all the artistic effects—I did not fail to perceive immediately that no one had been so universally employed as that of the *refrain*. The universality of its employment seemed to assure me of its intrinsic value, and spared the necessity of submitting it to analysis. I considered it, however, with regard to its susceptibility of improvement, and soon saw it to be in a primitive condition commonly used, the *refrain*, or burden, not only limited to lyric verse, but depends for its impression on the force of monotone—both in sound and thought. The pleasure is deduced solely from the sense of identity—of repetition. I resolved to diversify, and so heighten the effect, by adhering, in general, to the monotone sound, while I continually varied that of thought. In other words, to say, I determined to produce continuously novel effects by the variation of the *application* of the *refrain*—the *refrain* itself remaining, for the most part, unvaried.

These points being settled, I next bethought myself of the *nature* of my *refrain*. Since its application would be repeatedly varied, it was clear that the *refrain* must be brief, for there would have been an insurmountable difficulty in frequent variations of application.

17 *Beauty* . . . Compare Poe's statement, in "The Poetic Principle," which would define, in brief, the Poetry of words as *The Rhythmical Creation of Beauty*. Its sole arbiter is Taste. With the Intellect or with the Conscience, it has only collateral relations. Unless incidentally, it has no concern whatever either with Duty or with Truth."

any sentence of length. In proportion to the brevity of the sentence, would, of course, be the facility of the variation. This led me at once to a single word as the best *refrain*.

The question now arose as to the *character* of the word. Having made up my mind to a *refrain*, the division of the poem into stanzas was, of course, a corollary, the *refrain* forming the close to each stanza. That such a close, to have force, must be sonorous and susceptible of protracted emphasis, admitted no doubt, and these considerations inevitably led me to the long *o* as the most sonorous vowel in connection with *r* as the most producible consonant.

The sound of the *refrain* being thus determined, it became necessary to select a word embodying this sound and at the same time in the fullest possible keeping with that melancholy which I had predetermined as the tone of the poem. In such a search it would have been absolutely impossible to overlook the word "Nevermore"
In fact, it was the very first which presented itself

The next desideratum was a pretext for the continuous use of the one word "Nevermore." In observing the difficulty which I at once found in inventing a sufficiently plausible reason for its continuous repetition, I did not fail to perceive that this difficulty arose solely from the pre-assumption that the word was to be so continuously or monotonously spoken by a *human* being, I did not fail to perceive, in short, that the difficulty lay in the reconciliation of this monotony with the exercise of reason on the part of the creature repeating the word. Here, then, immediately arose the idea of a *non-reasoning* creature capable of speech, and, very naturally, a parrot, in the first instance, suggested itself, but was superseded forthwith by a Raven as equally capable of speech, and infinitely more in keeping with the intended *tone*.

I had now gone so far as the conception of a Raven—the bird of ill-omen—monotonously repeating the one word, "Nevermore," at the conclusion of each stanza, in a poem of melancholy tone, and in length about one hundred lines. Now, never losing sight of the object *supremacy*, or perfection, at all points, I asked myself—"Of all melancholy topics, what, according to the *universal* understanding of mankind, is the *most* melancholy?" Death—was the obvious reply. "And when," I said, "is this most melancholy of topics most poetical?"

From what I have already explained at some length, the answer here also is obvious—"When it most closely allies itself to *Beauty*: the death, then, of a beautiful woman, is unquestionably, the most poetical topic in the world—and equally is it beyond doubt that the lips best suited for such a topic are those of a bereaved lover."

I had now to combine the two ideas, of a lover lamenting his deceased mistress and a Raven continuously repeating the word "Nevermore." I had to combine these, bearing in mind my design of varying at every turn the *application* of the word repeated, but the only intelligible mode of such combination is that of imagining the Raven employing the word in answer to the queries of the lover. And here it was that I saw at once the opportunity afforded for the effect on which I had been depending—that is to say, the effect of the *variation of application*. I saw that I could make the first query propounded by the lover—the first query to which the Raven should reply "Nevermore"—that I could make this first query a commonplace one, the second less so, the third still less, and so on, until at length the lover, startled from his original nonchalance by the melancholy character of the word itself, by its frequent repetition and by a consideration of the ominous reputation of the fowl that uttered it, is at length excited to superstition, and wildly propounds queries of a far different character—queries whose solution he has passionately at heart—propounds them half in superstition and half in that species of despair which delights in self-torture—propounds them, not altogether because he believes in the prophetic or demoniac character of the bird (which, reason assures him, is merely repeating a lesson learned by rote), but because he experiences a frenzied pleasure in so modelling his questions as to receive from the *expected* "Nevermore" the most delicious because the most intolerable of sorrow. Perceiving the opportunity thus afforded me—or, more strictly, thus forced upon me in the progress of the construction—I first established in mind the climax, or concluding query—that query to which "Nevermore" should be in the last place an answer—that query in reply to which this word "Nevermore" should involve the utmost conceivable amount of sorrow and despair.

Here then the poem may be said to have its beginning—at the end, where all works of art should begin—for it was here, at this point of my preconsiderations,

that I first put pen to paper in the composition of the stanza

"Prophet," said I, "thing of evil! prophet still if bird or devil"

By that heaven that bends above us—by that God we both adore,

Tell this soul with sorrow laden, if within the distant Aidenn,

It shall clasp a sainted maiden whom the angels name Lenore—

Clasp a rare and radiant maiden whom the angels name Lenore"

Quoth the Raven, "Nevermore"

I composed this stanza, at this point, first, that by establishing the climax, I might the better vary and graduate, as regards seriousness and importance, the preceding queries of the lover, and secondly, that I might definitely settle the rhythm, the meter, and the length and general arrangement of the stanza,—as well as graduate the stanzas which were to precede, so that none of them might surpass this in rhythmical effect. Had I been able, in the subsequent composition, to construct more vigorous stanzas, I should, without scruple, have purposely enfeebled them, so as not to interfere with the climacteric effect.

And here I may as well say a few words of the versification. My first object (as usual) was originality. The extent to which this has been neglected, in versification, is one of the most unaccountable things in the world. Admitting that there is little possibility of variety in mere *rhythm*, it is still clear that the possible varieties of meter and stanza are absolutely infinite—and yet, for centuries, no man, in verse, has ever done, or ever seemed to think of doing, an original thing. The fact is, that originality (unless in minds of very unusual force) is by no means a matter, as some suppose, of impulse or intuition. In general, to be found, it must be elaborately sought, and although a positive merit of the highest class, demands in its attainment less of invention than negation.

Of course, I pretend to no originality in either the rhythm or meter of *The Raven*. The former is trochaic—the latter is octameter acatelectic, alternating with heptameter catalectic repeated in the refrain of the fifth verse, and terminating with tetrameter catalectic. Less pedantically—the feet employed throughout (trochees) consist of a long syllable followed by a short. the first

line of the stanza consists of eight of these feet—the end of seven and a half (in effect two-thirds)—the rest of eight—the fourth of seven and a half—the fifth same—the sixth three and a half. Now, each of the lines, taken individually, has been employed before, what originality *The Raven* has, is in their combination into stanza; nothing even remotely approaching this combination has ever been attempted. The effect of this originality of combination is aided by other unusual, and altogether novel effects, arising from an extension of application of the principles of rhyme and alliteration.

The next point to be considered was the mode of bringing together the lover and the Raven—and the branch of this consideration was the *locale*. For the most natural suggestion might seem to be a forest, or fields—but it has always appeared to me that a *circumscription of space* is absolutely necessary to the effect of insulated incident—it has the force of a flash to a picture. It has an indisputable moral power in bringing concentrated the attention, and, of course, must be confounded with mere unity of place.

I determined, then, to place the lover in his chamber—in a chamber rendered sacred to him by memory of her who had frequented it. The room is represented richly furnished—this in mere pursuance of the ideal I have already explained on the subject of Beauty, a sole true poetical thesis.

The *locale* being thus determined, I had now to introduce the bird—and the thought of introducing through the window, was inevitable. The idea of making the lover suppose, in the first instance, that the flap of the wings of the bird against the shutter, is a "tap" at the door, originated in a wish to increase, by prolonging, the reader's curiosity, and in a desire to admit an incidental effect arising from the lover's throwing open the door, finding all dark, and thence adopting the fancy that it was the spirit of his mistress that knocked.

I made the night tempestuous, first, to account for the Raven's seeking admission, and secondly, for the effect of contrast with the (physical) serenity within the chamber.

I made the bird alight on the bust of Pallas, also, to produce the effect of contrast between the marble and the page—it being understood that the bust was absolutely

57 *circumscription of space*, i.e., a limitation of the scene

suggested by the bird—the bust of *Pallas* being chosen, first, as most in keeping with the scholarship of the lover, and secondly, for the sonorousness of the word, *Pallas*, itself.

About the middle of the poem, also, I have availed myself of the force of contrast, with a view of deepening the ultimate impression. For example, an air of the fantastic—approaching as nearly to the ludicrous as was admissible—is given to the Raven's entrance. He comes in "with many a flirt and flutter."

Not the *least obeisance made he*—not a moment stopped or stayed he,
But with *mien of lord or lady*, perched above my chamber door

In the two stanzas which follow, the design is more obviously carried out:—

Then this ebony bird beguiling my sad fancy into smiling
By the *grave and stern decorum of the countenance it wore*,

"Though thy *crest be shorn and shaven* thou," I said, "art sure no craven,

Ghastly grim and ancient Raven wandering from the nightly shore—

Tell me what thy lordly name is on the Night's Plutonian shore?"

Quoth the Raven, "Nevermore."

Much I marvelled *this ungainly fowl* to hear discourse so plainly

Though its answer little meaning—little relevancy bore,
For we cannot help agreeing that no living human being
Ever yet was blessed with seeing bird above his chamber door—

And or beast upon the sculptured bust above his chamber door,

With such name as "Nevermore."

The effect of the *dénouement* being thus provided for, I immediately drop the fantastic for a tone of the most profound seriousness—this tone commencing in the stanza directly following the one last quoted, with the line, But the Raven, sitting lonely on that placid bust, spoke only, etc.

From this epoch the lover no longer jests—no longer sees any thing even of the fantastic in the Raven's de-

meanor. He speaks of him as a "grim, ungainly, ghastly, gaunt, and ominous bird of yore," and feels the "fiery eyes" burning into his "bosom's core." This revolution of thought, or fancy, on the lover's part, is intended to induce a similar one on the part of the reader—to bring the mind into a proper frame for the *dénouement*—which is now brought about as rapidly and as directly as possible

With the *dénouement* proper—with the Raven's reply, "Nevermore," to the lover's final demand if he shall meet his mistress in another world—the poem, in its obvious phase, that of a simple narrative, may be said to have its completion. So far, every thing is within the limits of the accountable—of the real. A raven, having learned by rote the single word "Nevermore," and having escaped from the custody of its owner, is driven at midnight, through the violence of a storm, to seek admission at a window from which a light still gleams—the chamber-window of a student, occupied half in poring over a volume, half in dreaming of a beloved mistress deceased. The casement being thrown open at the fluttering of the bird's wings, the bird itself perches on the most convenient seat out of the immediate reach of the student, who, amused by the incident and the oddity of the visitor's demeanor, demands of it, in jest and without looking for a reply, its name. The raven addressed, answers with its customary word, "Nevermore"—a word which finds immediate echo in the melancholy heart of the student, who, giving utterance aloud to certain thoughts suggested by the occasion, is again startled by the fowl's repetition of "Nevermore." The student now guesses the state of the case, but is impelled, as I have before explained, by the human thirst for self-torture, and in part by superstition, to propound such queries to the bird as will bring him, the lover, the most of the luxury of sorrow, through the anticipated answer "Nevermore." With the indulgence, to the extreme, of this self-torture, the narration, in what I have termed its first or obvious phase, has a natural termination, and so far there has been no overstepping of the limits of the real

But in subjects so handled, however skillfully, or with however vivid an array of incident, there is always a certain hardness or nakedness, which repels the artistical eye. Two things are invariably required—first, some amount of complexity, or more properly, adaptation; and, secondly, some amount of suggestiveness—some under-

current, however indefinite, of meaning. It is this latter, in especial, which imparts to a work of art so much of that *richness* (to borrow from colloquy a forcible term) which we are too fond of confounding with *the ideal*. It is the *excess* of the suggested meaning—it is the rendering this the upper instead of the under current of the theme—which turns into prose (and that of the very flattest kind) the so-called poetry of the so-called transcendentalists.

Holding these opinions, I added the two concluding¹⁰ stanzas of the poem—their suggestiveness being thus made to pervade all the narrative which has preceded them. The undercurrent of meaning is rendered first apparent in the lines—

"Take thy beak from out *my heart*, and take thy form
from off my door!"

Quoth the Raven, "Nevermore!"

It will be observed that the words, "from out my heart,"

involve the first metaphorical expression in the poem. They, with the answer, "Nevermore," dispose the reader to seek a moral in all that has been previously narrated. The reader begins now to regard the Raven as emblematic—but it is not until the very last line of the very stanza, that the intention of making him emblematic of *Mournful and Never-ending Remembrance* is permitted distinctly to be seen.

And the Raven, never flitting, still is sitting, still is sitting
On the pallid bust of Pallas, just above my chamber door;
And his eyes have all the seeming of a demon's that dream,
And the lamplight o'er him streaming throws his shadow on the floor,

And my soul from out *that shadow* that lies floating on the floor
Shall be lifted—never

And my soul from out *that shadow* that lies floating on the floor
Shall be lifted—never

Shall be lifted—never

The Fall of the House of Usher

Some of the things Poe said in "The Philosophy of Composition" imply something about his methods in this most famous of his tales. "It is an obvious rule of art," he said, "that effects should be made to spring from direct causes—that objects should be attained through means best adapted for their attainment. . . ." It might be said, therefore, that, in modern psychological terms, he regarded the work of art as a stimulus setting up a response in the reader. How does this relationship come about? Another passage suggests that the reader reacts in certain ways in sympathy with a character in the story. ("This revolution of thought, or fancy, on the lover's part," said Poe, "is intended to induce a similar one on the part of the reader. . . .")

Thus a chain is set up: incidents in the narrative cause the character to have certain emotions, and the reader experiences similar emotions. When the character's emotion changes or develops, so does that of the reader. That a story may be climactic, Poe may "vary and grate, as regards seriousness and importance," the parallel in his narrative. Thus a story may have two interrelated narrative strands, each climactically arranged—a series of incidents or stimuli and a set of effects or responses to those stimuli by the character and consequently by the sympathetic reader.

These details about Poe's method of constructing a story, applied to "The Fall of the House of Usher," indicate that the reader may well notice its two interrelated strands of narrative—the one dealing with the emotions of the "affected" character and the one dealing with incidents which have the effects. Studying the character (here undoubtedly the narrator), the reader will find, though, at the beginning of the tale, the "I" of the story is disturbed by "a sense of insufferable gloom," he stands aside, as it were, and detachedly attempts to discover why he feels as he does. But as the happenings unfold, his uneasiness changes to fear, his fear grows, his detachment decreases, until at the end he "flees aghast" and his "brain reels" as the "walls of the house

asunder." Poe's assumption probably is that the record of this developing emotion arcades "in the mind of him who contemplates it with a kindred art" a similarly developing emotion.

Now the incidents in the tale, of course, should be appropriate causes for such a developing emotion. As one examines the tale, one may see in the strange appearance of the house, the actions of its mad inmate, Usher, the strange burial and return to life of Madeline, and the dissolution of the house, incidents likely to stimulate mounting terror. But a more subtle and unified thread of narrative, some of it connoted by the "tone" of the story, does even more to suggest the reason for increasing terror. This is made up of a series of increasingly weird identifications. There is an identification, for instance, between the house and its inmates, at first detachedly called by the narrator a "quaint" identification by the "peasantry" but later discovered to be something much more weird than a mere "equivocal appellation." There are the identifications between Usher and his sister, between works of art and actual happenings, and finally between the madness of Usher and the (at least momentary) madness of the narrator. These, more than the explicitly detailed incidents, account for the crescendo of horror which ends the tale

*Son coeur est un luth suspendu;
 Sitôt qu'on le touche il résonne.*—BÉRANGER

During the whole of a dull, dark, and soundless day in the autumn of the year, when the clouds hung oppressively low in the heavens, I had been passing alone, on horseback, through a singularly dreary tract of country, and at length found myself, as the shades of the evening drew on, within view of the melancholy House of Usher. I know not how it was, but, with the first glimpse of the building, a sense of insufferable gloom pervaded my spirit. I say insufferable; for the feeling was unrelieved by any of that half pleasurable, because poetic, sentiment with which the mind usually receives even the sternest natural images of the desolate or terrible. I looked upon the scene before me—upon the mere house, and the simple landscape features of the domain, upon the bleak

walls, upon the vacant eyelike windows, upon a few rank sedges, and upon a few white trunks of decayed trees—with an utter depression of soul which I can compare to no earthly sensation more properly than to the afterdream of the reveler upon opium—the bitter lapse into everyday life, the hideous dropping off of the veil. There was an 20 iciness, a sinking, a sickening of the heart, an unredeemed dreariness of thought, which no goading of the imagination could torture into aught of the sublime. What was it—I paused to think—what was it that so unnerved me in the contemplation of the House of Usher? It was a mystery all insoluble, nor could I grapple with the shadowy fancies that crowded upon me as I pondered. I was forced to fall back upon the unsatisfactory conclusion that while, beyond doubt, there are combinations of very simple natural objects which have the power of thus 30 affecting us, still the analysis of this power lies among considerations beyond our depth. It was possible, I reflected, that a mere different arrangement of the particulars of the scene, of the details of the picture, would be sufficient to modify, or perhaps to annihilate, its capacity for sorrowful impression, and, acting upon this idea, I reined my horse to the precipitous brink of a black and lurid tarn that lay in unruffled luster by the dwelling, and gazed down—but with a shudder even more thrilling than before—upon the remodeled and inverted images 40 of the gray sedge, and the ghastly tree-stems, and the vacant and eyelike windows

Nevertheless, in this mansion of gloom I now proposed to myself a sojourn of some weeks. Its proprietor, Roderick Usher, had been one of my boon companions in boyhood, but many years had elapsed since our last meeting. A letter, however, had lately reached me in a distant part of the country—a letter from him—which in its wildly importunate nature had admitted of no other than a personal reply. The MS gave evidence of nervous agitation. 50 The writer spoke of acute bodily illness, of a mental disorder which oppressed him, and of an earnest desire to see me, as his best and indeed his only personal friend, with a view of attempting, by the cheerfulness of my society, some alleviation of his malady. It was the manner in which all this, and much more, was said—it was the

Son coeur . . . His heart is a suspended lute which resounds as soon as it is touched. The quotation is from the poem, "Le Refus," by Pierre Jean de Béranger

apparent *heart* that went with his request—which allowed me no room for hesitation, and I accordingly obeyed forthwith what I still considered a very singular summons.

Although as boys we had been even intimate associates, yet I really knew little of my friend. His reserve had been always excessive and habitual. I was aware, however, that his very ancient family had been noted, time out of mind, for a peculiar sensibility of temperament, displaying itself, through long ages, in many works of exalted art, and manifested of late in repeated deeds of munificent yet unobtrusive charity, as well as in a passionate devotion to the intricacies, perhaps even more than to the orthodox and easily recognizable beauties, of musical science. I had learned, too, the very remarkable fact that the stem of the Usher race, all time-honored as it was, had put forth at no period any enduring branch; in other words, that the entire family lay in the direct line of descent, and had always, with a very trifling and very temporary variation, so lain. It was this deficiency, I considered, while running over in thought the perfect keeping of the character of the premises with the accredited character of the people, and while speculating upon the possible influence which the one, in the long lapse of centuries, might have exercised upon the other—it was this deficiency, perhaps, of collateral issue, and the consequent undeviating transmission from sire to son of the patrimony with the name, which had at length so identified the two as to merge the original title of the estate in the quaint and equivocal appellation of the "House of Usher"—an appellation which seemed to include, in the minds of the peasantry who used it, both the family and the family mansion.

I have said that the sole effect of my somewhat childish experiment, that of looking down within the tarn, had been to deepen the first singular impression. There can be no doubt that the consciousness of the rapid increase of my superstition—for why should I not so term it?—served mainly to accelerate the increase itself. Such, I have long known, is the paradoxical law of all sentiments having terror as a basis. And it might have been for this reason only, that, when I again uplifted my eyes to the house itself from its image in the pool, there grew in my mind a strange fancy—a fancy so ridiculous, indeed, that I but mention it to show the vivid force of the sensations which oppressed me. I had so worked upon my imagination as really to believe that about the whole mansion and domain there hung an atmosphere peculiar to them-

selves and their immediate vicinity: an atmosphere which had no affinity with the air of heaven, but which reeked up from the decayed trees, and the gray wall, the silent tarn; a pestilent and mystic vapor, dull, dingy, faintly discernible, and leaden-hued.

Shaking off from my spirit what *must* have been a dream, I scanned more narrowly the real aspect of the building. Its principal feature seemed to be that of excessive antiquity. The discoloration of ages had been great. Minute fungi overspread the whole exterior, hanging in a fine tangled webwork from the eaves. Yet all was apart from any extraordinary dilapidation. No portion of the masonry had fallen, and there appeared no wild inconsistency between its still perfect adaptation of parts and the crumbling condition of the individual stones. In this there was much that reminded me of the specious totality of old woodwork which has rotted for long years in some neglected vault, with no disturbance from the breath of the external air. Beyond this impression of extensive decay, however, the fabric gave no token of instability. Perhaps the eye of a scrutinizing observer might have discovered a barely perceptible fissure, which, extending from the roof of the building in front, made its way down the wall in a zigzag direction until it became lost in the sullen waters of the tarn.

Noticing these things, I rode over a short causeway to the house. A servant in waiting took my horse, and entered the Gothic archway of the hall. A pale, stealthy step, thence conducted me in silence through many dark and intricate passages in my progress to the *studio* of his master. Much that I encountered on the way contributed, I know not how, to heighten the impressions and sentiments of which I have already spoken. While the objects around me—while the carvings of the ceiling, the somber tapestries of the walls, the ebon blackness of the floors, and the phantasmagoric armorial trophies which rattled as I strode, were but matters to which, or to the consideration of which, I had been accustomed from my infancy, while I hesitated not to acknowledge how familiar all this, I still wondered to find how unfamiliar were the fancies which ordinary images were stirring up. On the staircase I met the physician of the family; and, countenance, I thought, wore a mingled expression of cunning and perplexity. He accosted me with trepidation and passed on. The valet now threw open a door and ushered me into the presence of his master.

The room in which I found myself was very large and lofty. The windows were long, narrow, and pointed, and at so vast a distance from the black oaken floor as to be altogether inaccessible from within. Feeble gleams of encrimsoned light made their way through the trellised panes, and served to render sufficiently distinct the more prominent objects around; the eye, however, struggled in vain to reach the remoter angles of the chamber, or the recesses of the vaulted and fretted ceiling. Dark draperies hung upon the walls. The general furniture was profuse, comfortless, antique, and tattered. Many books and musical instruments lay scattered about, but failed to give any vitality to the scene. I felt that I breathed an atmosphere of sorrow. An air of stern, deep, and irredeemable gloom hung over and pervaded all.

Upon my entrance, Usher arose from a sofa on which he had been lying at full length, and greeted me with a vivacious warmth which had much in it, I at first thought, of an overdone cordiality—of the constrained effort of the *ennuye* man of the world. A glance, however, at his countenance, convinced me of his perfect sincerity. We sat down; and for some moments, while he spoke not, I gazed upon him with a feeling half of pity, half of awe. Surely man had never before so terribly altered, in so brief a period, as had Roderick Usher! It was with difficulty that I could bring myself to admit the identity of the wan being before me with the companion of my early boyhood. Yet the character of his face had been at all times remarkable. A cadaverousness of complexion, an eye large, liquid, and luminous beyond comparison; lips somewhat thin and very pallid, but of a surpassingly beautiful curve, a nose of a delicate Hebrew model, but with a breadth of nostril unusual in similar formations, a finely-molded chin, speaking, in its want of prominence, of a want of moral energy, hair of a more than weblike softness and tenuity,—these features, with an inordinate expansion above the regions of the temple, made up altogether a countenance not easily to be forgotten. And now in the mere exaggeration of the prevailing character of these features, and of the expression they were wont to convey, lay so much of change that I doubted to whom I spoke. The now ghastly pallor of the skin, and the now miraculous luster of the eye, above all things startled and even awed me. The silken hair, too, had been suffered to grow all unheeded, and as, in its wild gossamer texture, it floated rather than fell about the face, I could not, even

with effort, connect its arabesque expression with any idea of simple humanity.

In the manner of my friend I was at once struck with an incoherence, an inconsistency; and I soon found this to arise from a series of feeble and futile struggles to overcome an habitual trepidancy, an excessive nervous agitation. For something of this nature I had indeed been prepared, no less by his letter than by reminiscences of certain boyish traits, and by conclusions deduced from his peculiar physical conformation and temperament. His action was alternately vivacious and sullen. His voice varied rapidly from a tremulous indecision (when the animal spirits seemed utterly in abeyance) to that species of energetic concision—that abrupt, weighty, unhurried, and hollow-sounding enunciation, that leaden, self-balanced, and perfectly modulated guttural utterance—which may be observed in the lost drunkard, or the irclaimable eater of opium, during the periods of his most intense excitement.

It was thus that he spoke of the object of my visit, of his earnest desire to see me, and of the solace he expected me to afford him. He entered at some length into what he conceived to be the nature of his malady. It was, he said, a constitutional and a family evil, and one for which he despaired to find a remedy—a mere nervous affection, he immediately added, which would undoubtedly soon pass off. It displayed itself in a host of unnatural sensations. Some of these, as he detailed them, interested and bewildered me, although, perhaps, the terms and the general manner of the narration had their weight. He suffered much from a morbid acuteness of the senses, the most insipid food was alone endurable, he could wear only garments of certain texture, the odors of all flowers were oppressive, his eyes were tortured by even faint light; and there were but peculiar sounds, and these from stringed instruments, which did not inspire him with horror.

To an anomalous species of terror I found him a bounden slave. "I shall perish," said he, "I *must* perish in this deplorable folly. Thus, thus, and not otherwise, shall I be lost. I dread the events of the future, not in themselves, but in their results. I shudder at the thought of

28 the character . . . face. As critics have noted, the description of Usher is remarkably like one appropriate for Poe. The "inordinate expansion," according to phrenologists of the day, indicated "ideality"

any, even the most trivial, incident, which may operate upon this intolerable agitation of soul. I have, indeed, no abhorrence of danger, except in its absolute effect,—in terror. In this unnerved, in this pitiable condition, I feel that the period will sooner or later arrive when I must abandon life and reason together in some struggle with the grim phantasm, FEAR."

I learned moreover at intervals, and through broken and equivocal hints, another singular feature of his mental condition. He was enchained by certain superstitious impressions in regard to the dwelling which he tenanted, and whence for many years he had never ventured forth, in regard to an influence whose supposititious force was conveyed in terms too shadowy here to be restated,—an influence which some peculiarities in the mere form and substance of his family mansion had, by dint of long suffering, he said, obtained over his spirit; an effect which the *physique* of the gray walls and turrets, and of the dim tarn into which they all looked down, had at length brought about upon the *morale* of his existence.

He admitted, however, although with hesitation, that much of the peculiar gloom which thus afflicted him could be traced to a more natural and far more palpable origin,—to the severe and long-continued illness, indeed to the evidently approaching dissolution, of a tenderly beloved sister, his sole companion for long years, his last and only relative on earth. "Her decease," he said, with a bitterness which I can never forget, "would leave him (him, the hopeless and the frail) the last of the ancient race of the Ushers." While he spoke, the lady Madeline (for so was she called) passed slowly through a remote portion of the apartment, and, without having noticed my presence, disappeared. I regarded her with an utter astonishment not unmingled with dread, and yet I found it impossible to account for such feelings. A sensation of stupor oppressed me, as my eyes followed her retreating steps. When a door, at length, closed upon her, my glance sought instinctively and eagerly the countenance of the brother; but he had buried his face in his hands, and I could only perceive that a far more than ordinary wanness had overspread the emaciated fingers through which trickled many passionate tears.

The disease of the lady Madeline had long baffled the skill of her physicians. A settled apathy, a gradual wasting away of the person, and frequent although transient affections of a partially cataleptical character, were the

unusual diagnosis. Hitherto she had steadily borne against the pressure of her malady, and had not been herself finally to bed; but, on the closing-in of the night of my arrival at the house, she succumbed (a brother told me at night with inexpressible agitation the prostrating power of the destroyer; and I learned the glimpse I had obtained of her person would probably be the last I should obtain,—that the least while living, would be seen by me no more.

For several days ensuing, her name was unmentioned by either Usher or myself; and during this period I was busied in earnest endeavors to alleviate the melancholy of my friend. We painted and read together, or listened, as if in a dream, to the wild improvisations of a speaking guitar. And thus, as a closer and still closer intimacy admitted me more unreservedly into the recesses of his spirit, the more bitterly did I perceive the futility of all attempt at cheering a mind from which darkness, if an inherent positive quality, poured forth upon all objects of the moral and physical universe, in an incessant radiation of gloom.

I shall ever bear about me a memory of the solemn hours I thus spent alone with the master of the House of Usher. Yet I should fail in my attempt to convey an idea of the exact character of the studies, the occupations, in which he involved me, or led me away. An excited and highly distempered ideality imparted a sulphureous luster over all. His long, impenetrable dirges will ring forever in my ears. Among other things I hold painfully in mind a certain singular perversion and amplification of the wild air of the last waltz of Weber. From the paintings over which his elaborate fancy brooded, and which grew, touch by touch, vaguenesses at which I shuddered the more thrilling because I shuddered knowing not why,—from the paintings (vivid as their images now are before me) I would in vain endeavor to educe more than a small portion which should lie within the compass of my written words. By the utter simplicity, by the nakedness of his designs, he arrested and over-awed attention. Never mortal painted an idea, that mortal was Rochester Usher. For me at least, in the circumstances there

77 the last . . . Von Weber, No. 5 of *Dances brillantes* by Gottlieb Reissiger (1798-1859), based on Von Weber's last waltz

rounding me, there arose, out of the pure abstractions which the hypochondriac contrived to throw upon his canvas, an intensity of intolerable awe, no shadow of which felt I ever yet in the contemplation of the certainly glowing yet too concrete reveries of Fuseli

One of the phantasmagoric conceptions of my friend, partaking not so rigidly of the spirit of abstraction, may be shadowed forth, although feebly, in words. A small picture presented the interior of an immensely long and rectangular vault or tunnel, with low walls, smooth, white, and without interruption or device. Certain accessory points of the design served well to convey the idea that this excavation lay at an exceeding depth below the surface of the earth. No outlet was observed in any portion of its vast extent, and no torch, or other artificial source of light, was discernible, yet a flood of intense rays rolled throughout, and bathed the whole in a ghastly and inappropriate splendor

I have just spoken of that morbid condition of the auditory nerve which rendered all music intolerable to the sufferer, with the exception of certain effects of stringed instruments. It was, perhaps, the narrow limits to which he thus confined himself upon the guitar, which gave birth, in great measure, to the fantastic character of his performances. But the fervid *facility* of his *impromptus* could not be so accounted for. They must have been, and were, in the notes as well as in the words of his wild fantasias (for he not unfrequently accompanied himself with rimed verbal improvisations), the result of that intense mental collectedness and concentration to which I have previously alluded as observable only in particular moments of the highest artificial excitement. The words of one of these rhapsodies I have easily remembered. I was, perhaps, the more forcibly impressed with it as he gave it, because, in the under or mystic current of its meaning, I fancied that I perceived, and for the first time, a full consciousness, on the part of Usher, of the tottering of his lofty reason upon her throne. The verses, which were entitled "The Haunted Palace," ran very nearly, if not accurately, thus:—

I

In the greenest of our valleys
By good angels tenanted,
Once a fair and stately palace—
Radiant palace—reared its head.

In the monarch Thought's dominion,
It stood there,
Never seraph spread a pinion
Over fabric half so fair

II

Banners yellow, glorious, golden,
On its roof did float and flow
(This—all this—was in the olden
Time long ago),
And every gentle air that dallied,
In that sweet day,
Along the ramparts plumed and pallid,
A winged odor went away.

III

Wanderers in that happy valley
Through two luminous windows saw
Spirits moving musically
To a lute's well-tuned law,
Round about a throne, where sitting,
Porphyrogene,
In state his glory well befitting,
The ruler of the realm was seen.

IV

And all with pearl and ruby glowing
Was the fair palace door,
Through which came flowing, flowing, flowing,
And sparkling evermore,
A troop of Echoes, whose sweet duty
Was but to sing,
In voices of surpassing beauty,
The wit and wisdom of their king.

V

But evil things, in robes of sorrow,
Assailed the monarch's high estate;
(Ah, let us mourn, for never morrow
Shall dawn upon him, desolate!)
And, round about his home, the glory

5 Fuseli, Heinrich Fuseli, a Swiss painter who was taught in the Royal Academy at London • 8 A small picture Compare the vault in which the body of Madeline is placed later in the story • 39 "The Haunted Palace." Poe said this poem was intended "to imply a mind haunted by phantoms." It should be compared with the description of Usher in the eighth paragraph of the story • 62 Porphyrogene, a name meaning "born to the purple"

That blushed and bloomed
Is but a dim-remembered story
Of the old time entombed.

VI

And travelers now within that valley
Through the red-litten windows see
Vast forms that move fantastically
To a discordant melody,
While, like a ghastly rapid river,
Through the pale door,
10 A hideous throng rush out forever,
And laugh—but smile no more

I well remember that suggestions arising from this ballad led us into a train of thought, wherein there became manifest an opinion of Usher's which I mention, not so much on account of its novelty (for other men have thought thus) as on account of the pertinacity with which he maintained it. This opinion, in its general form, was that of the sentience of all vegetable things. But in his disordered fancy, the idea had assumed a more daring character, and trespassed, under certain conditions, upon the kingdom of inorganization. I lack words to express the full extent or the earnest *abandon* of his persuasion. The belief, however, was connected (as I have previously hinted) with the gray stones of the home of his forefathers. The conditions of the sentience had been here, he imagined, fulfilled in the method of collocation of these stones,—in the order of their arrangement, as well as in that of the many fungi which over-
30 spread them, and of the decayed trees which stood around; above all, in the long undisturbed endurance of this arrangement, and in its reduplication in the still waters of the tarn. Its evidence—the evidence of the sentience—was to be seen, he said (and I here started as he spoke), in the gradual yet certain condensation of an atmosphere of their own about the waters and the walls. The result was discoverable, he added, in that silent yet importunate and terrible influence which for centuries had molded the destinies of his family, and which made *him* what I now saw him,—what he was. Such opinions
40 need no comment, and I will make none.

Our books—the books which for years had formed no small portion of the mental existence of the invalid—were, as might be supposed, in strict keeping with this character of phantasm. We pored together over such

works as the *Ververt* and *Chartreuse* of Gresset, *Belphegor* of Machiavelli; the *Heaven and Hell* of Swedenborg, the *Subterranean Voyage* of Nick Kimm by Holberg, the *Chiromancy* of Robert Flud, Jean D'Indagine, and of *De la Chambre*, the *Journey the Blue Distance* of Tieck, and the *City of the Sun* of Campanella. One favorite volume was a small old edition of the *Directorium Inquisitorum*, by the Dominican Eymeric de Gironne, and there were passages from Pomponius Mela, about the old African Satyr Aegipans, over which Usher would sit dreaming hours. His chief delight, however, was found in the perusal of an exceedingly rare and curious book in quarto Gothic,—the manual of a forgotten church,—the *Vigiliae Mortuorum secundum Chorum Ecclesie Maguntine*.

I could not help thinking of the wild ritual of the work, and of its probable influence upon the hypochondriac, when one evening, having informed me abruptly that the lady Madeline was no more, he stated his intention of preserving her corpse for a fortnight, (previ-

15 other men "Watson, Dr. Percival, Spallanzani, and especially the Bishop of Llandaff"—Poe. See *Chemical Essays*, Vol. 45. *Ververt and Chartreuse*, anticlerical and licentious poem by Jean Baptiste Gresset (1709-1777). • 46 *Belphegor*, a novel by Machiavelli (1469-1527) which tells how the archdemon Belphegor visits earth and then returned to hell. • 47 *Swedenborg*, Emmanuel Swedenborg, Swedish mystic (1688-1772). • 48 *Holberg*, Ludvig Holberg (1684-1754), who published the book mentioned, in Latin, in 1741. The title brings in another mention of a journey into supernatural realms. • 48 *Chiromancy*, palmistry. • 48 *Robert Flud* (1547-1637), English physician and writer on pseudo-science. • 49 *Jean D'Indagine*, or *De la Chambre* (1522), a work on palmistry. • 49 *De la Chambre*, Maria Ciraue de la Chambre (1594-1669), French writer on palmistry. • 50 *Tieck*, Ludwig Tieck (1773-1853), German writer. Tieck is not known to have written any such book. Perhaps Poe invented the title so as to repeat the motif of the journey from one world to another, thus shadowing Madeline's revival after death. • 51 *Campanella*, Tommaso Campanella (1568-1639), an Italian philosopher. His *Civitas Solis*, actually a Utopian treatise, serves here, by title, to connote the beyond. • 52 *Directorium Inquisitorum* (1503) was by Niccolò Eymeric de Gironne, inquisitor-general for Castile in 1536. The book gives in detail an account of the tortures of the Inquisition, and the title not only augments the suggestion of the exoticism of Usher's story but also foreshadows the torture Madeline is to undergo. • 54 *Pomponius Mela* (first century A.D.), author of a geography often concerned with strange beasts. Here a journey into distant lands, instead of a journey into the other world, is suggested. • 55 *Aegipans*, god Pan. • 58 *Vigiliae Mortuorum* . . . , "The Watches of the Dead," according to the Choir of the Church of Mayence. As the context points out, this title is definitely related to what happens in the paragraph. It is also related to the nightly torments of Usher at the close of the tale.

to its final interment) in one of the numerous vaults within the main walls of the building. The worldly reason, however, assigned for this singular proceeding was one which I did not feel at liberty to dispute. The brother had been led to his resolution (so he told me) by consideration of the unusual character of the malady of the deceased, of certain obtrusive and eager inquiries on the part of her medical men, and of the remote and exposed situation of the burial ground of the family. I will not deny that when I called to mind the sinister countenance of the person whom I met upon the staircase, on the day of my arrival at the house, I had no desire to oppose what I regarded as at best but a harmless, and by no means an unnatural, precaution.

At the request of Usher, I personally aided him in the arrangement for the temporary entombment. The body having been encoffined, we two alone bore it to its rest. The vault in which we placed it (and which had been so long unopened that our torches, half smothered in its oppressive atmosphere, gave us little opportunity for investigation) was small, damp, and entirely without means of admission for light; lying, at great depth, immediately beneath that portion of the building in which was my own sleeping apartment. It had been used apparently, in remote feudal times, for the worst purposes of a donjon keep, and in later days as a place of deposit for powder, or some other highly combustible substance, as a portion of its floor, and the whole interior of a long archway through which we reached it, were carefully sheathed with copper. The door, of massive iron, had been also similarly protected. Its immense weight caused an unusually sharp grating sound as it moved upon its hinges.

Having deposited our mournful burden upon tressels within this region of horror, we partially turned aside the yet unscrewed lid of the coffin, and looked upon the face of the tenant. A striking similitude between the brother and sister now first arrested my attention, and Usher, divining, perhaps, my thoughts, murmured out some few words from which I learned that the deceased and himself had been twins, and that sympathies existed between them. Our glances, however, rested not long upon the dead, for we could not regard her unawed. The disease which had thus entombed the lady in the maturity of youth, had left, as usual in all maladies of a strictly cataleptical character, the mockery of a faint

blush upon the bosom and the face, and that suspiciously lingering smile upon the lip which is so terrible in death. We replaced and screwed down the lid, and having secured the door of iron, made our way, with toil, into the scarcely less gloomy apartments of the upper portion of the house.

And now, some days of bitter grief having elapsed, an observable change came over the features of the mental disorder of my friend. His ordinary manner had vanished. His ordinary occupations were neglected or forgotten. He roamed from chamber to chamber with hurried, unequal, and objectless step. The pallor of his countenance had assumed, if possible, a more ghastly hue, but the luminousness of his eye had utterly gone out. The once occasional huskiness of his tone was heard no more, and a tremulous quavor, as if of extreme terror, habitually characterized his utterance. There were times, indeed, when I thought his unceasingly agitated mind was laboring with some oppressive secret, to divulge which he struggled for the necessary courage. At times, again, I was obliged to resolve all into the mere inexplicable vagaries of madness, for I beheld him gazing upon vacancy for long hours, in an attitude of the profoundest attention, as if listening to some imaginary sound. It was no wonder that his condition terrified—that it infected me. I felt creeping upon me, by slow yet certain degrees, the wild influences of his own fantastic yet impressive superstitions.

It was, especially, upon retiring to bed late in the night of the seventh or eighth day after the placing of the lady Madeline within the donjon, that I experienced the full power of such feelings. Sleep came not near my couch, while the hours waned and waned away. I struggled to reason off the nervousness which had dominion over me. I endeavored to believe that much if not all of what I felt was due to the bewildering influence of the gloomy furniture of the room,—of the dark and tattered draperies which, tortured into motion by the breath of a rising tempest, swayed fitfully to and fro

14 precaution. The medical man, briefly glimpsed at the start of the story, at this point serves his sole purpose in the narrative. Usher's fear of "body-snatching" causes the temporary entombment of Madeline within the House of Usher. The earlier characterization of the doctor is meager but sufficient; his "mingled expression of perplexity and cunning" motivates Usher's apprehension.

upon the walls, and rustled uneasily about the decorations of the bed. But my efforts were fruitless. An irrepressible tremor gradually pervaded my frame, and at length there sat upon my very heart an incubus of utterly causeless alarm. Shaking this off with a gasp and a struggle, I uplifted myself upon the pillows, and, peering earnestly within the intense darkness of the chamber, hearkened—I know not why, except that an instinctive spirit prompted me—to certain low and indefinite sounds which came, through the pauses of the storm, at long intervals, I knew not whence. Overpowered by an intense sentiment of horror, unaccountable yet unendurable, I threw on my clothes with haste (for I felt that I should sleep no more during the night), and endeavored to arouse myself from the pitiable condition to which I had fallen, by pacing rapidly to and fro through the apartment

I had taken but few turns in this manner, when a light step on an adjoining staircase arrested my attention. I presently recognized it as that of Usher. In an instant afterward he rapped with a gentle touch at my door, and entered, bearing a lamp. His countenance was, as usual, cadaverously wan—but, moreover, there was a species of mad hilarity in his eyes,—an evidently restrained hysteria in his whole demeanor. His air appalled me—but anything was preferable to the solitude which I had so long endured, and I even welcomed his presence as a relief

"And you have not seen it?" he said abruptly, after having stared about him for some moments in silence,— "you have not then seen it?—but, stay! you shall." Thus speaking, and having carefully shaded his lamp, he hurried to one of the casements, and threw it freely open to the storm

The impetuous fury of the entering gust nearly lifted us from our feet. It was, indeed, a tempestuous yet sternly beautiful night, and one wildly singular in its terror and its beauty. A whirl wind had apparently collected its force in our vicinity, for there were frequent and violent alterations in the direction of the wind, and the exceeding density of the clouds (which hung so low as to press upon the turrets of the house) did not prevent our perceiving the lifelike velocity with which they flew careering from all points against each other, without passing away into the distance. I say that even their exceeding density did not prevent our perceiving this; yet

we had no glimpse of the moon or stars, nor was there any flashing forth of the lightning. But the underfaces of the huge masses of agitated vapor, as well as the terrestrial objects immediately around us, were glowing in the unnatural light of a faintly luminous and distinctly visible gaseous exhalation which hung about and shrouded the mansion.

"You must not—you shall not behold this!" said he, shudderingly, to Usher, as I led him with a gentle pressure from the window to a seat. "These appearances which bewilder you, are merely electrical phenomena—uncommon—or it may be that they have their ghastly origin in the rank miasma of the tarn. Let us close the casement, the air is chilling and dangerous to the frame. Here is one of your favorite romances. I will read to you, and you shall listen,—and so we will pass away this terrible night together."

The antique volume which I had taken up was "Mad Trist" of Sir Launcelot Canning, but I had chosen it a favorite of Usher's more in sad jest than in earnest; for, in truth, there is little in its uncouth and unimaginative prolixity which could have had interest for the lofty and spiritual ideality of my friend. It was, however, the only book immediately at hand; and I indulged in a vague hope that the excitement which now agitated the hypochondriac might find relief (for the historical mental disorder is full of similar anomalies) even in the extremeness of the folly which I should read. Convinced, indeed, by the wild, overstrained vivacity with which he hearkened, or apparently hearkened, to the words of the tale, I might well have gratulated myself upon the success of my design.

I had arrived at that well-known portion of the story where Ethelred, the hero of the Trist, having sought in vain for peaceable admission into the dwelling of the hermit, proceeds to make good an entrance by force. Here, it will be remembered, the words of the narrative run thus:—

"And Ethelred, who was by nature of a doughty knight and who was now mighty withal on account of the powerfulness of the wine which he had drunken, was no longer to hold parley with the hermit, who, in the meantime, was of an obstinate and malicious turn, but, feeling the rain upon his shoulders, and fearing the rising of the tempest, uplifted his mace outright, and with a sudden blow made quickly room in the plankings of the door for

gauntleted hand; and now, pulling therewith sturdily, he so cracked, and ripped, and tore all asunder, that the noise of the dry and hollow-sounding wood alarumed and reverberated throughout the forest."

At the termination of this sentence I started, and for a moment paused; for it appeared to me (although I at once concluded that my excited fancy had deceived me)—it appeared to me that from some very remote portion of the mansion there came, indistinctly, to my ears, what might have been in its exact similarity of character the echo (but a stifled and dull one certainly) of the very cracking and ripping sound which Sir Launcelot had so particularly described. It was, beyond doubt, the coincidence alone which had arrested my attention; for amid the rattling of the sashes of the casements, and the ordinary commingled noises of the still increasing storm, the sound, in itself, had nothing, surely, which should have interested or disturbed me. I continued the story.—

"But the good champion Ethelred, now entering within the door, was sore enraged and amazed to perceive no signal of the malicious hermit; but, in the stead thereof, a dragon of a scaly and prodigious demeanor, and of a fiery tongue, which sate in guard before a palace of gold with a floor of silver, and upon the wall there hung a shield of shining brass with this legend enwritten:—

*Who entereth herein, a conqueror hath bin;
Who slayeth the dragon, the shield he shall win.*

And Ethelred uplifted his mace, and struck upon the head of the dragon, which fell before him, and gave up his pesty breath, with a shriek so horrid and harsh, and withal so piercing, that Ethelred had fain to close his ears with his hands against the dreadful noise of it, the like whereof was never before heard."

Here again I paused abruptly, and now with a feeling of wild amazement, for there could be no doubt whatever that, in this instance, I did actually hear (although from what direction it proceeded I found it impossible to say) a low and apparently distant, but harsh, protracted, and most unusual screaming or grating sound,—the exact counterpart of what my fancy had already conjured up for the dragon's unnatural shriek as described by the romancer.

Oppressed as I certainly was, upon the occurrence of this second and most extraordinary coincidence, by a thousand conflicting sensations, in which wonder and

extreme terror were predominant, I still retained sufficient presence of mind to avoid exciting, by any observation, the sensitive nervousness of my companion. I was by no means certain that he had noticed the sounds in question; although, assuredly, a strange alteration had during the last few minutes taken place in his demeanor. From a position fronting my own, he had gradually brought round his chair, so as to sit with his face to the door of the chamber, and thus I could but partially perceive his features, although I saw that his lips trembled as if he were murmuring inaudibly. His head had dropped upon his breast; yet I knew that he was not asleep, from the wide rigid opening of the eyes as I caught a glance of it in profile. The motion of his body, too, was at variance with this idea, for he rocked from side to side with a gentle yet constant and uniform sway. Having rapidly taken notice of all this, I resumed the narrative of Sir Launcelot, which thus proceeded:—

"And now the champion, having escaped from the terrible fury of the dragon, bethinking himself of the brazen shield, and of the breaking up of the enchantment which was upon it, removed the carcass from out of the way before him, and approached valorously over the silver pavement of the castle to where the shield was upon the wall; which in sooth tarried not for his full coming, but fell down at his feet upon the silver floor, with a mighty great and terrible ringing sound."

No sooner had these syllables passed my lips than—as if a shield of brass had indeed, at the moment, fallen heavily upon a floor of silver—I became aware of a distinct, hollow, metallic, and clangorous yet apparently muffled reverberation. Completely unnerved, I leaped to my feet; but the measured rocking movement of Usher was undisturbed. I rushed to the chair in which he sat. His eyes were bent fixedly before him, and throughout his whole countenance there reigned a stony rigidity. But, as I placed my hand upon his shoulder, there came a strong shudder over his whole person; a sickly smile quivered about his lips, and I saw that he spoke in a low, hurried, and gibbering murmur, as if unconscious of my presence. Bending closely over him, I at length drank in the hideous import of his words.

"Not hear it?—yes, I hear it, and have heard it. Long—long—long—many minutes, many hours, many days, have I heard it, yet I dared not—oh, pity me, miserable wretch that I am!—I dared not—I dared not speak! We

have put her living in the tomb! Said I not that my senses were acute? I now tell you that I have heard her first feeble movements in the hollow coffin. I heard them—many, many days ago—yet I dared not—I *dared not speak!* And now—tonight—Ethelred—ha! ha!—the breaking of the hermit's door, and the deathcry of the dragon, and the clangor of the shield!—say, rather, the rending of her coffin, and the grating of the iron hinges of her prison, and her struggles within the coppered archway of the vault! Oh, whither shall I fly? Will she not be here anon? Is she not hurrying to upbraid me for my haste? Have I not heard her footstep on the stair? Do I not distinguish that heavy and horrible beating of her heart? Madman!"—here he sprang furiously to his feet, and shrieked out his syllables, as if in the effort he were giving up his soul—"Madman! I tell you that she now stands without the door!"

As if in the superhuman energy of his utterance there had been found the potency of a spell, the huge antique panels to which the speaker pointed threw slowly back, upon the instant, their ponderous and ebony jaws. It was the work of the rushing gust—but then without those doors there *did* stand the lofty and enshrouded figure of the lady Madeline of Usher! There was blood upon her white robes, and the evidence of some bitter struggle

upon every portion of her emaciated frame. For a moment she remained trembling and reeling to and upon the threshold—then, with a low moaning cry heavily inward upon the person of her brother, in her violent and now final death agonies, bore him to the floor a corpse, and a victim to the terrors he anticipated

From that chamber and from that mansion I fled in aghast. The storm was still abroad in all its wrath when I found myself crossing the old causeway. Suddenly shot along the path a wild light, and I turned to whence a gleam so unusual could have issued; for the vast house and its shadows were along behind me. The radiance was that of the full, setting, and blood-moon, which now shone vividly through that once but scarcely discernible fissure, of which I have before spoken as extending from the roof of the building, in a zigzag direction, to the base. While I gazed, this fissure rapidly widened—there came a fierce breath of the whirlwind, the entire orb of the satellite burst at once upon my vision—my brain reeled as I saw the mighty walls rushing asunder—there was a long, tumultuous shouting, such as like the voice of a thousand waters—and the deep dank tarn at my feet closed sullenly and silently the fragments of the "*House of Usher.*"

Ligeia

Poe believed that this was his best story, and at least some readers who are at times distressed by Poe's lack of subtlety may share his preference. One problem he faced (one he had previously tried to cope with in a similar story, "Morella") was that of unifying a narrative which tended to break into two disunited parts—one telling of the life and death of his chief character; and another telling of

her return, several years later, to the world of the living.

He did this by (1) creating, in the first part, the character of Ligeia, whose characteristics were of exactly the sort to give fictional probability to her strange conquest of the narrator in the second part; (2) emphasizing throughout the story the theme of metempsychosis—the belief in transmigration of the soul; (3) "discussing"—as he might have put it—his intention "in such tone as best served him in establishing the conceived effect." In making subtle use of this last device, Poe caused a series of highly suggestive words and images, associated with Ligeia in the first portion of the narrative, to prepare for and slowly build up to her return in the second.

This story was published in the *American Museum* in September 1838, and was included in *Tales of the Grotesque and Arabesque* (1840). Since some of the revisions in the last half of the tale interestingly suggest

Poe improved his narrative, a few are pointed out in the footnotes.

And the will therein lieth, which dieth not. Who knoweth the mysteries of the will, with its vigor? For God is but a great will pervading all things by nature of its intentness. Man doth not yield himself to the angels, nor unto death utterly, save only through the weakness of his feeble will—JOSEPH GLANVILL

I cannot, for my soul, remember how, when, or even precisely where, I first became acquainted with the lady Ligeia. Long years have since elapsed, and my memory is feeble through much suffering. Or, perhaps, I cannot *now* bring these points to mind, because, in truth, the character of my beloved, her rare learning, her singular yet placid cast of beauty, and the thrilling and enthralling eloquence of her low musical language, made their way into my heart by paces so steadily and stealthily progressive that they have been unnoticed and unknown. Yet I believe that I met her first and most frequently in some large, old decaying city near the Rhine. Of her family—I have surely heard her speak. That it is of a remotely ancient date cannot be doubted. Ligeia! Ligeia! Buried in studies of a nature more than all else adapted to deaden impressions of the outward world, it is by that sweet word alone—by Ligeia—that I bring before mine eyes in fancy the image of her who is no more. And now, while I write, a recollection flashes upon me that I have *never known* the paternal name of her who was my friend and my betrothed, and who became the partner of my studies, and finally the wife of my bosom. Was it a playful charge on the part of my Ligeia? or was it a test of my strength of affection, that I should institute no inquiries upon this point? or was it rather a caprice of my own—a wildly romantic offering on the shrine of the most passionate devotion? I but indistinctly recall the fact myself—what wonder that I have utterly forgotten the circumstances which originated or attended it? And, indeed, if ever that spirit which is entitled *Romance*—if ever she, the wan and the misty-winged *Ashtophet* of idolatrous Egypt, presided, as they tell, over marriages ill-omened, then most surely she presided over mine.

There is one dear topic, however, on which my memory fails me not. It is the *person* of Ligeia. In stature she was tall, somewhat slender, and, in her latter days, ever emaciated. I would in vain attempt to portray the majesty, the quiet ease, of her demeanor, or the incomprehensible lightness and elasticity of her footfall. She came and departed as a shadow. I was never made aware of her entrance into my closed study save by the dear music of her low sweet voice, as she placed her marble hand upon my shoulder. In beauty of her face no maiden ever equalled her. It was the radiance of an opium dream—an airy and spirit-lifting vision more wildly divine than the phantasies which hovered about the slumbering souls of the daughters of Delos. Yet her features were not of that regular mould which we have been falsely taught to worship in the classical labors of the heathen. "There is no exquisite beauty," says Bacon, Lord Verulam, speaking truly of all the forms and *genera* of beauty, "without some *strangeness* in the proportion." Yet, although I saw that the features of Ligeia were not of a classic regularity—although I perceived that her loveliness was indeed "exquisite," and felt that there was much of "strangeness" pervading it, yet I have tried in vain to detect the irregularity and to trace home my own perception of "the strange." I examined the contour of the lofty and pale forehead—it was faultless—how cold indeed that word when applied to a majesty so divine!—the skin rivalling the purest ivory, the commanding extent and repose, the gentle prominence of the regions above the temples, and then the raven-black, the glossy, the luxuriant and naturally-curling tresses, setting forth the full force of the Homeric epithet, "hyacinthe"! I looked at the delicate outlines of the nose—and nowhere but in the graceful medallions of the Hebrews had I beheld a similar perfection. There were the same luxurious smoothness of sur-

Text: the revised version printed in the *Broadway Journal*, September 27, 1845 • Joseph Glanvill, English philosopher (1636-1680), associated with the Cambridge Platonists. The quotation has not been located • 31 *Ashtophet*, probably *Ashtoreth*, a Canaanitish deity who, after adoption in Egypt, had the significance Poe suggests • 47 *daughters of Delos*, an obscure reference, perhaps to Greek maidens who made offerings in the temple on the island of Delos • 50 *Bacon*, a slight misquotation, since Bacon's word is not "exquisite" but "excellent" • 62 *gentle . . . temples*, in Poe's day, according to phrenological lore, signified "love of life" • 67 *medallions . . . Hebrews*, the Roman bas-reliefs of the Jews

face, the same scarcely perceptible tendency to the aquiline, the same harmoniously curved nostrils speaking the free spirit. I regarded the sweet mouth. Here was indeed the triumph of all things heavenly—the magnificent turn of the short upper lip—the soft, voluptuous slumber of the under—the dimples which sported, and the color which spoke—the teeth glancing back, with a brilliancy almost startling, every ray of the holy light which fell upon them in her serene and placid, yet most exultingly
 10 radiant of all smiles. I scrutinized the formation of the chin—and here, too, I found the gentleness of breadth, the softness and the majesty, the fullness and the spirituality, of the Greek—the contour which the God Apollo revealed but in a dream, to Cleomenes, the son of the Athenian. And then I peered into the large eyes of Ligeia.

For eyes we have no models in the remotely antique. It might have been, too, that in these eyes of my beloved lay the secret to which Lord Verulam alludes. They were, I must believe, far larger than the ordinary eyes of our
 20 own race. They were even fuller than the fullest of the gazelle eyes of the tribe of the valley of Nourjahad. Yet it was only at intervals—in moments of intense excitement—that this peculiarity became more than slightly noticeable in Ligeia. And at such moments was her beauty—in my heated fancy thus it appeared perhaps—the beauty of being either above or apart from the earth—the beauty of the Fabulous Houri of the Turk. The hue of the orbs was the most brilliant of black, and, far over them, hung jetty lashes of great length. The brows,
 30 slightly irregular in outline, had the same tint. The "strangeness," however, which I found in the eyes, was of a nature distinct from the formation, or the color, or the brilliancy of the features, and must, after all, be referred to the *expression*. Ah, word of no meaning! behind whose vast latitude of mere sound we intrench our ignorance of so much of the spiritual. The expression of the eyes of Ligeia! How for long hours have I pondered upon it! How have I, through the whole of a midsummer night, struggled to fathom it! What was it—that some-
 40 thing more profound than the well of Democritus—which lay far within the pupils of my beloved? What was it? I was possessed with a passion to discover. Those eyes! those large, those shining, those divine orbs! they became to me twin stars of Leda, and I to them devoutest of astrologers.

There is no point, among the many incomprehensible

anomalies of the science of mind, more thrilling than the fact—never, I believe, noticed in the—that, in our endeavors to recall to memory so long forgotten, we often find ourselves upon the verge of remembrance, without being able, in time to remember. And thus how frequently, in my scrutiny of Ligeia's eyes, have I felt approaching knowledge of their expression—felt it approach yet not quite be mine—and so at length entirely. And (strange, oh strangest mystery of all!) I found commonest objects of the universe, a circle of all to that expression. I mean to say that, subsequent period when Ligeia's beauty passed into my spirit dwelling as in a shrine, I derived, from many examples in the material world, a sentiment such as I felt aroused within me by her large and luminous or not the more could I define that sentiment, or analyze even steadily view it. I recognized it, let me sometimes in the survey of a rapidly-growing vine, the contemplation of a moth, a butterfly, a chrys stream of running water. I have felt it in the oscillation of the falling of a meteor. I have felt it in the glance of unusually aged people. And there are one or two in heaven—(one especially, a star of the sixth magnitude double and changeable, to be found near the belt in Lyra) in a telescopic scrutiny of which I have made aware of the feeling. I have been filled with certain sounds from stringed instruments, and frequently by passages from books. Among innumerable other instances, I well remember something in a play of Joseph Glanvill, which (perhaps merely for its quaintness—who shall say?) never failed to inspire with the sentiment;—"And the will therein lieth dieth not. Who knoweth the mysteries of the will, its vigor? For God is but a great will pervading all by nature of its intentness. Man doth not yield to the angels, nor unto death utterly, save only through weakness of his feeble will."

14 Cleomenes, an Athenian sculptor whose most famous work was the *Venus de' Medici*. There is no legend of a revelation by Cleomenes. • 21 Nourjahad refers to an Oriental novel, *Tales of Nourjahad* (1767) by Mrs. Frances Sheridan. • 27 Fabulous the beautiful women who inhabit the Mohammedan heaven. Democritus, a Greek philosopher who said that truth lies in the well. • 72 Lyra, a constellation containing a binary star Epsilon Lyra.

Length of years, and subsequent reflection, have enabled me to trace, indeed, some remote connection between this passage in the English moralist and a portion of the character of Ligeia. An *intensity* in thought, action, or speech, was possibly, in her, a result, or at least an index of that gigantic volition which, during our long intercourse, failed to give other and more immediate evidence of its existence. Of all the women whom I have ever known, she, the outwardly calm, the ever-placid Ligeia, was the most violently a prey to the tumultuous vultures of stern passion. And of such passion I could form no estimate, save by the miraculous expansion of those eyes which at once so delighted and appalled me—by the almost magical melody, modulation, distinctness, and placidity of her very low voice—and by the fierce energy (rendered doubly effective by contrast with her manner of utterance) of the wild words which she habitually uttered.

I have spoken of the learning of Ligeia—it was immense—such as I have never known in woman. In the classical tongues was she deeply proficient, and as far as my own acquaintance extended in regard to the modern dialects of Europe, I have never known her at fault. Indeed upon any theme of the most admired, because simply the most abstruse of the boasted erudition of the academy, have I *ever* found Ligeia at fault? How singularly—how thrillingly, this one point in the nature of my wife forced itself, at this late period only, upon my attention! I said her knowledge was such as I have never known in woman—but where breathes the man who has traversed, and successfully, *all* the wide areas of moral, physical, and mathematical science? I saw not then what I now clearly perceive, that the acquisitions of Ligeia were gigantic, were astounding; yet I was sufficiently aware of her infinite supremacy to resign myself, with a child-like confidence, to her guidance through the chaotic world of metaphysical investigation at which I was most busily occupied during the earlier years of our marriage. With how vast a triumph—with how vivid a delight—with how much of all that is ethereal in hope—did I *feel*, as she bent over me in studies but little sought—but less known—that delicious vista by slow degrees expanding before me, down whose long, gorgeous, and all untrodden path, I might at length pass onward to the goal of a wisdom too divinely precious not to be forbidden!

How poignant, then, must have been the grief with

which, after some years, I beheld my well-grounded expectations take wings to themselves and fly away! With out Ligeia I was but as a child groping benighted. Her presence, her readings alone, rendered vividly luminous the many mysteries of the transcendentalism in which we were immersed. Wanting the radiant lustre of her eyes, letters, lambent and golden, grew duller than Saturnian lead. And now those eyes shone less and less frequently upon the pages over which I pored. Ligeia grew ill. The wild eyes blazed with a too-too glorious effulgence; the pale fingers became of the transparent waxen hue of the grave, and the blue veins upon the lofty forehead swelled and sank impetuously with the tides of the most gentle emotion. I saw that she must die—and I struggled desperately in spirit with the grim Azrael. And the struggles of the passionate wife were, to my astonishment, even more energetic than my own. There had been much in her stern nature to impress me with the belief that, to her, death would have come without its terrors,—but not so. Words are impotent to convey any just idea of the fierceness of resistance with which she wrestled with the Shadow. I groaned in anguish at the pitiable spectacle. I would have soothed—I would have reasoned, but, in the intensity of her wild desire for life,—for life—*but* for life—solace and reason were alike the utmost of folly. Yet not until the last instance, amid the most convulsive writhings of her fierce spirit, was shaken the external placidity of her demeanor. Her voice grew more gentle—grew more low—yet I would not wish to dwell upon the wild meaning of the quietly uttered words. My brain reeled as I hearkened entranced, to a melody more than mortal—to assumptions and aspirations which mortality had never before known.

That she loved me I should not have doubted, and I might have been easily aware that, in a bosom such as hers, love would have reigned no ordinary passion. But in death only, was I fully impressed with the strength of her affection. For long hours, detaining my hand, would she pour out before me the overflowing of a heart whose more than passionate devotion amounted to idolatry. How had I deserved to be so blessed by such confessions?

51 transcendentalism refers less to the specific beliefs of the Concord school than to the vague, the strange, in philosophy • 53 Saturnian, pertaining to Saturn, Roman god renowned in fable as a king during a golden age • 61 Azrael, the angel of death, who separates the soul from the body

—how had I deserved to be so cursed with the removal of my beloved in the hour of her making them? But upon this subject I cannot bear to dilate. Let me say only, that in Ligeia's more than womanly abandonment to a love, alas! all unmerited, all unworthily bestowed, I at length recognized the principle of her longing with so wildly earnest a desire for the life which was now fleeing so rapidly away. It is this wild longing—it is this eager vehemence of desire for life—*but* for life—that I have
10 no power to portray—no utterance capable of expressing.

At high noon of the night in which she departed, beckoning me, peremptorily, to her side, she bade me repeat certain verses composed by herself not many days before. I obeyed her.—They were these

Lo! 'tis a gala night
Within the lonesome latter years!
An angel throng, bewinged, bedight
In veils, and drowned in tears,
Sit in a theatre, to see
20 A play of hopes and fears,
While the orchestra breathes fitfully
The music of the spheres.

Mimes, in the form of God on high,
Mutter and mumble low,
And hither and thither fly—
Mere puppets they, who come and go
At bidding of vast formless things
That shift the scenery to and fro,
Flapping from out their Condor wings
30 Invisible Woe!

That motley drama!—oh, be sure
It shall not be forgot!
With its Phantom chased forevermore,
By a crowd that seized it not,
Through a circle that ever returneth in
To the self-same spot,
And much of madness and more of Sin
And Horror the soul of the plot.

But see, amid the mimic rout,
40 A crawling shape intrude!
A blood-red thing that writhes from out
The scenic solitude!

It writhes!—it writhes!—with mortal pain
The mimes become its food,
And the seraphs sob at vermin fangs
In human gore imbued.

Out—out are the lights—out all!
And over each quivering form,
The curtain, a funeral pall,
Comes down with the rush of a storm,
And the angels, all pallid and wan,
Uprising, unveiling, affirm
That the play is the tragedy, 'Man,'
And its hero the Conqueror Worm

"O God!" half shrieked Ligeia, leaping to her
extending her arms aloft with a spasmodic moan
as I made an end of these lines—"O God! O Di-
ther!—shall these things be undeviatingly so?—
Conqueror be not once conquered? Are we not
parcel of Thee? Who—who knoweth the mys-
tery of the will with its vigor? Man doth not yield him
angels, *nor unto death utterly* save only thro
weakness of his feeble will."

And now, as if exhausted with emotion, she
her white arms to fall, and returned solemnly to
of death. And as she breathed her last sighs, the
mingled with them a low marmur from her lip
to them my ear and distinguished, again, the con-
words of the passage in Glanville—"Man doth
him to the angels, nor unto death utterly, save
through the weakness of his feeble will."

She died:—and I, crushed into the very dust
row, could no longer endure the lonely desolatic
dwelling in the dim and decaying city by the I

11 At high noon marks the beginning of a passage, in
poem and the two paragraphs following the poem, which re-
paragraph telling of Ligeia's death in the first version of

unto death utterly, save only through the weakness of his fee

had no lack of what the world calls wealth. Ligeia had brought me far more, very far more than ordinarily falls to the lot of mortals. After a few months, therefore, of weary and aimless wandering, I purchased, and put in some repair, an abbey, which I shall not name, in one of the wildest and least frequented portions of fair England. The gloomy and dreary grandeur of the building, the almost savage aspect of the domain, the many melancholy and time-honored memories connected with both, had much in unison with the feelings of utter abandonment which had driven me into that remote and unsocial region of the country. Yet although the external abbey, with its verdant decay hanging about it, suffered but little alteration, I gave way, with a childlike perversity, and perchance with a faint hope of alleviating my sorrows, to a display of more than regal magnificence within—For such follies, even in childhood, I had imbibed a taste and now they came back to me as if in the dotage of grief. Alas, I feel how much even of incipient madness might have been discovered in the gorgeous and fantastic diaphanities, in the solemn carvings of Egypt, in the wild cornices and furniture, in the Bedlam patterns of the carpets of tufted gold! I had become a bounden slave in the trainmels of opium, and my labors and my orders had taken a coloring from my dreams. But these absurdities I must not pause to detail. Let me speak only of that one chamber, ever accursed whither in a moment of mental alienation, I led from the altar as my bride—as the successor of the unforgotten Ligeia—the fair-haired and blue-eyed Lady Rowena Trevanion, of Tremaine.

There is no individual portion of the architecture and decoration of that bridal chamber which is not now visibly before me. Where were the souls of the haughty family of the bride, when, through thirst of gold, they permitted to pass the threshold of an apartment so bedecked, a maiden and a daughter so beloved? I have said that I minutely remember the details of the chamber—yet I am sadly forgetful on topics of deep moment—and here there was no system, no keeping, in the fantastic display, to take hold upon the memory. The room lay in a high turret of the castellated abbey, was pentagonal in shape, and of capacious size. Occupying the whole southern face of the pentagon was the sole window—an immense sheet of unbroken glass from Venice—a single pane and tinted of a leaden hue, so that the rays of either the sun or moon, passing through it, fell with a ghastly

lustre on the objects within. Over the upper portion of this huge window, extended the trellis-work of an aged vine, which clambered up the massy walls of the turret. The ceiling, of gloomy-looking oak, was excessively lofty vaulted, and elaborately fretted with the wildest and most grotesque specimens of a semi-Gothic, semi-Druidical device. From out the most central recess of this melancholy vaulting, depended, by a single chain of gold with long links, a huge censer of the same metal, Saracenic in pattern, and with many perforations so contrived that there writhed in and out of them, as if endued with a serpent vitality, a continual succession of parti-colored fires.

Some few ottomans and golden candelabra, of Eastern figure, were in various stations about—and there was the couch, too—the bridal couch—of an Indian model, and low, and sculptured of solid ebony, with a pall-like canopy above. In each of the angles of the chamber stood on end a gigantic sarcophagus of black granite, from the tombs of the kings over against Luxor, with their aged lids full of immemorial sculpture. But in draping of the apartment lay, alas! the chief phantasy of all. The lofty walls, gigantic in height—even unproportionably so—were hung from summit to foot, in vast folds, with a heavy and massive-looking tapestry—tapestry of a material which was found alike as a carpet on the floor, as a covering for the ottomans and the ebony bed, as a canopy for the bed, and as the gorgeous volutes of the curtains which partially shaded the window. The material was the richest cloth of gold. It was spotted all over, at irregular intervals, with arabesque figures, about a foot in diameter, and wrought upon the cloth in patterns of the most jetty black. But these figures partook of the true character of the arabesque only when regarded from a single point of view. By a contrivance now common, and indeed traceable to a very remote period of antiquity, they were made changeable in aspect. To one entering the room, they bore the appearance of simple monstrosities; but upon a farther advance, this appearance gradually departed, and step by step, as the visitor moved his station in the chamber, he saw himself surrounded by an endless succession of the ghastly forms which belong to the superstition of the Norman, or arise in the guilty

22 *Bedlam*, insane, derived from *Bedlam*, an asylum in London. • 62 *pall-like*, added to the earlier version, which spoke simply of "a canopy". • 65 *Luxor*, a center of archeological research near Thebes.

slumbers of the monk. The phantasmagoric effect was vastly heightened by the artificial introduction of a strong continual current of wind behind the draperies—giving a hideous and uneasy animation to the whole.

In halls such as these—in a bridal chamber such as this—I passed, with the lady of Tremaine, the unhallowed hours of the first month of our marriage—passed them with but little disquietude. That my wife dreaded the fierce moodiness of my temper—that she shunned
10 me and loved me but little—I could not help perceiving, but it gave me rather pleasure than otherwise. I loathed her with a hatred belonging more to demon than to man. My memory flew back (oh, with what intensity of regret!) to Ligeia, the beloved, the august, the beautiful, the entombed. I revelled in recollections of her purity, of her wisdom, of her lofty, her ethereal nature, of her passionate, her idolatrous love. Now, then, did my spirit fully and freely burn with more than all the fires of her own. In the excitement of my opium dreams (for I was
20 habitually fettered in the shackles of the drug) I would call aloud upon her name, during the silence of the night, or among the sheltered recesses of the glens by day, as if, through the wild eagerness, the solemn passion, the consuming ardor of my longing for the departed, I could restore her to the pathway she had abandoned—ah, *could* it be forever?—upon the earth.

About the commencement of the second month of the marriage, the Lady Rowena was attacked with sudden illness, from which her recovery was slow. The fever
30 which consumed her rendered her nights uneasy, and in her perturbed state of half-slumber, she spoke of sounds, and of motions in and about the chamber of the turret, which I concluded had no origin save in the distemper of her fancy, or perhaps in the phantasmagoric influences of the chamber itself. She became at length convalescent—finally well. Yet but a brief period elapsed, ere a second more violent disorder again threw her upon a bed of suffering, and from this attack her frame, at all times feeble, never altogether recovered. Her illnesses were,
40 after this epoch, of alarming character, and of more alarming recurrence, defying alike the knowledge and the great exertions of her physicians. With the increase of the chronic disease which had thus, apparently, taken too sure hold upon her constitution to be eradicated by human means, I could not fail to observe a similar increase in the nervous irritation of her temperament, and

in her excitability by trivial causes of fear. She again, and now more frequently and pertinaciously the sounds—of the slight sounds—and of the motions among the tapestries, to which she had alluded.

One night, near the closing in of September, I pressed this distressing subject with more than ordinary phasis upon my attention. She had just awakened from an unquiet slumber, and I had been watching, during half of anxiety, half of vague terror, the woe upon her emaciated countenance. I sat by the side of the ebony bed, upon one of the ottomans of India. She arose, and spoke, in an earnest low whisper, words which she *then* heard, but which I could not perceive of motions which she *then* saw, but which I could not perceive. The wind was rushing hurriedly behind the tapestries, and I wished to show her (what, I confess it, I could not *all* believe) that those almost lifeless figures upon the wall, were but the natural effect of the customary rushing of the wind. But a deadly pallor spreading her face, had proved to me that my endeavor to reassure her would be fruitless. She appeared terrified, and no attendants were within call. I remembered where was deposited a decanter of light wine which had been ordered by her physicians, and hastened to the chamber to procure it. But, as I stepped beneath the eaves of the censer, two circumstances of a startling nature attracted my attention. I had felt that some powerful though invisible object had passed lightly by me, and I saw that there lay upon the golden carpet, in the very middle of the rich lustre thrown from the chandelier, a shadow—a faint, indefinite shadow of an angel, such as might be fancied for the shadow of a saint. I was wild with the excitement of an immoderate passion for opium, and heeded these things but little, not giving them to Rowena. Having found the wine, I returned to the chamber and poured out a goblet-ful, which I placed in the lips of the fainting lady. She had now partially recovered, however, and took the vessel herself, with

14 the august, added in the later version • 47 fear, for the earlier version with the sentence, "Indeed reason seemed to be ebbing from her throne." By cutting out the sentence, the author doubt upon the perceptions of Lady Rowena, thus more effectively preparing for the reincarnation of Ligeia.

upon an ottoman near me, with my eyes fastened upon her person. It was then that I became distinctly aware of a gentle foot-fall upon the carpet, and near the couch; and in a second thereafter, as Rowena was in the act of raising the wine to her lips, I saw, or may have dreamed that I saw, fall within the goblet, as if from some invisible spring in the atmosphere of the room, three or four large drops of a brilliant and ruby colored fluid. If this I saw—not so Rowena. She swallowed the wine unhesitatingly, and I forbore to speak to her of a circumstance which must, after all, I considered, have been but the suggestion of a vivid imagination, rendered morbidly active by the terror of the lady, by the opium, and by the hour.

Yet I cannot conceal it from my own perception that, immediately subsequent to the fall of the ruby-drops, a rapid change for the worse took place in the disorder of my wife, so that, on the third subsequent night, the hands of her menials prepared her for the tomb, and on the fourth, I sat alone, with her shrouded body, in that fantastic chamber which had received her as my bride. Wild visions, opium-engendered, flitted, shadow-like, before me. I gazed with unquiet eye upon the sarcophagi in the angles of the room, upon the varying figures of the drapery, and upon the writhing of the parti-colored fires in the censer overhead. My eyes then fell, as I called to mind the circumstances of a former night, to the spot beneath the glare of the censer where I had seen the faint traces of the shadow. It was there, however, no longer, and breathing with greater freedom, I turned my glances to the pallid and rigid figure upon the bed. Then rushed upon me a thousand memories of Ligeia—and then came back upon my heart, with the turbulent violence of a flood, the whole of that unutterable woe with which I had regarded *her* thus enshrouded. The night waned; and still, with a bosom full of bitter thoughts of the one only and supremely beloved, I remained gazing upon the body of Rowena.

It might have been midnight, or perhaps earlier, or later, for I had taken no note of time, when a sob, low, gentle, but very distinct, startled me from my reverie—I felt that it came from the bed of ebony—the bed of death. I listened in an agony of superstitious terror—but there was no repetition of the sound. I strained my vision to detect any motion in the corpse—but there was not the slightest perceptible. Yet I could not have been de-

ceived. I *had* heard the noise, however faint, and my soul was awakened within me. I resolutely and perseveringly kept my attention riveted upon the body. Minutes elapsed before any circumstance occurred tending to throw light upon the mystery. At length became evident that a slight, a very feeble, and barely noticeable tinge of color had flushed up within the cheeks; and along the sunken small veins of the eyelids. Through a species of unutterable horror and awe, for which the language of mortality has no sufficiently energetic expression, I felt my heart cease to beat, my limbs grow rigid where I sat. Yet a sense of duty finally operated to restore my self-possession. I could no longer doubt that we had been precipitate in our preparations—that Rowena still lived. It was necessary that some immediate exertion be made, yet the turret was altogether apart from the portion of the abbey tenanted by the servants—there were none within call—I had no means of summoning them to my aid without leaving the room for many minutes—and this I could not venture to do. I therefore struggled alone in my endeavors to call back the spirit still hovering. In a short period it was certain, however, that a relapse had taken place, the color disappeared from both eyelid and cheek, leaving a wanness even more than that of marble; the lips became doubly shriveled and pinched up in the ghastly expression of death, a repulsive clamminess and coldness overspread rapidly the surface of the body, and all the usual rigorous stiffness immediately supervened. I fell back with a shudder upon the couch from which I had been so startlingly aroused, and again gave myself up to passionate waking visions of Ligeia.

An hour thus elapsed when (could it be possible?) I was a second time aware of some vague sound issuing from the region of the bed. I listened—in extremity of horror. The sound came again—it was a sigh. Rushing to the corpse, I saw—distinctly saw—a tremor upon the lips. In a minute afterward they relaxed, disclosing a bright line of the pearly teeth. Amazement now struggled in my bosom with the profound awe which had hitherto reigned there alone. I felt that my vision grew dim, that my reason wandered, and it was only by a violent effort that I at length succeeded in nerving myself to the task which duty thus once more had pointed out. There was now a partial glow upon the forehead and upon the cheek and throat; a perceptible warmth pervaded the

whole frame, there was even a slight pulsation at the heart. The lady *lived*; and with redoubled ardor I betook myself to the task of restoration. I chafed and bathed the temples and the hands, and used every exertion which experience, and no little medical reading, could suggest. But in vain. Suddenly, the color fled, the pulsation ceased, the lips resumed the expression of the dead, and in an instant afterward, the whole body took upon itself the icy chilliness, the livid hue, the intense rigidity, the
 10 sunken outline, and all the loathsome peculiarities of that which has been, for many days, a tenant of the tomb.

And again I sunk into visions of Ligeia—and again (what marvel that I shudder while I write?), *again* there reached my ears a low sob from the region of the ebony bed. But why shall I minutely detail the unspeakable horrors of that night? Why shall I pause to relate how, time after time, until near the period of the gray dawn, this hideous drama of revivification was repeated, how
 20 each terrific relapse was only into a sterner and apparently more irredeemable death, how each agony wore the aspect of a struggle with some invisible foe, and how each struggle was succeeded by I know not what wild change in the personal appearance of the corpse? Let me hurry to a conclusion.

The greater part of the fearful night had worn away, and she who had been dead, once again stirred—and now more vigorously than hitherto, although arousing from a dissolution more appalling in its utter hopelessness than any. I had long ceased to struggle or to move, and
 30 remained sitting rigidly upon the ottoman, a helpless prey to a whirl of violent emotions, of which extreme awe was perhaps the least terrible, the least consuming. The corpse, I repeat, stirred and now more vigorously than before. The hues of life flushed up with unwonted energy into the countenance—the limbs relaxed—and save that the eyelids were yet pressed heavily together and that the bandages and draperies of the grave still imparted their charnel character to the figure, I might

have dreamed that Rowena had indeed shaken off the fetters of Death. But if this idea was not, altogether adopted, I could at least doubt no longer arising from the bed, tottering, with feeble, closed eyes, and with the manner of one bewildered dream, the thing that was enshrouded advanced and palpably into the middle of the apartment.

I trembled not—I stirred not—for a crowd of utterable fancies connected with the air, the staid demeanor of the figure, rushing hurriedly through the brain, had paralyzed—had chilled me into stone. I not—but gazed upon the apparition. There was disorder in my thoughts—a tumult unappeasable. It, indeed, be the *living* Rowena who confronted me? Could it indeed be Rowena *at all*—the fair-haired, blue-eyed Lady Rowena Trevanion of Tremaine? *Why* should I doubt it? The bandage lay heavily upon the mouth—but then might it not be the mouth of the breathing Lady of Tremaine? And the cheeks were the roses as in her noon of life—yes, the cheeks indeed be the fair cheeks of the living Lady of Tremaine. And the chin, with its dimples, as in health, might be hers?—but *had she then grown taller since she died*? What inexpressible madness seized me with the thought? One bound, and I had reached her feet. Rising from my touch, she let fall from her head the ghastly cerements which had confined her. There streamed forth, into the rushing atmosphere of the chamber, huge masses of long and dishevelled hair *black*er than the raven wings of the midnight. Now slowly opened *the eyes* of the figure which I beheld before me. Here then, at least, I shrieked aloud. I never—can I never be mistaken—these are the eyes of the black, and the wild eyes—of my lost love, the Lady Ligeia!"

1

20 now each agony, and the remainder of this sentence appeared in the earlier version of the story. • 26 she . . . of the later version, replaced "the corpse of Rowena." By making "the corpse" and the one next recorded, Poe prepared for the reappearance of Ligeia by using ambiguous words to refer to the corpse. • 4

• enshrouded, in the later version, replaced "the Lady of the earlier version." • 47 the stature, added in the second version, perhaps to indicate more definitely that the change had taken place. • 53 Could it indeed, and the remainder of this sentence, are revised versions. This emphasizes the contrast, which is no longer important.

The Murders in the Rue Morgue

Mr. Howard Haycraft, in his history of detective fiction, *Murder for Pleasure*, calls this "the world's first detective story," and in 1941 many authors and lovers of this kind of narrative paid a centenary tribute to Poe as the inventor of the form. Besides originating the general form, in his experiment Poe originated practically all the important technical devices constantly used in narratives of crime and detection. Among such devices, Mr. Haycraft lists "the transcendent and eccentric detective, the admiring and slightly stupid foil, the well-intentioned blundering and unimaginativeness of the official guardians of the law, the locked room convention, the pointing finger of unjust suspicion, the solution by surprise, deduction by putting one's self in another's position (now called psychology), concealment by means of the ultra-obvious, the staged ruse to force the culprit's hand; even the expansive and condescending explanation when the chase is done."

The technique of the story is clearly related to that of Poe's horror stories. Here, too, events have an effect upon a sympathetic character, the narrator, and supposedly a similar effect upon the reader. Here, however, the events—Dupin's acts and deductions—presumably have their chief effect not on the "soul" or "heart" but on the "mind." The rather slow start, with its emphasis upon the deductive process, is therefore appropriate.

What song the Sirens sang, or what name Achilles assumed when he hid himself among women, although puzzling questions, are not beyond all conjecture.—SIR THOMAS BROWNE

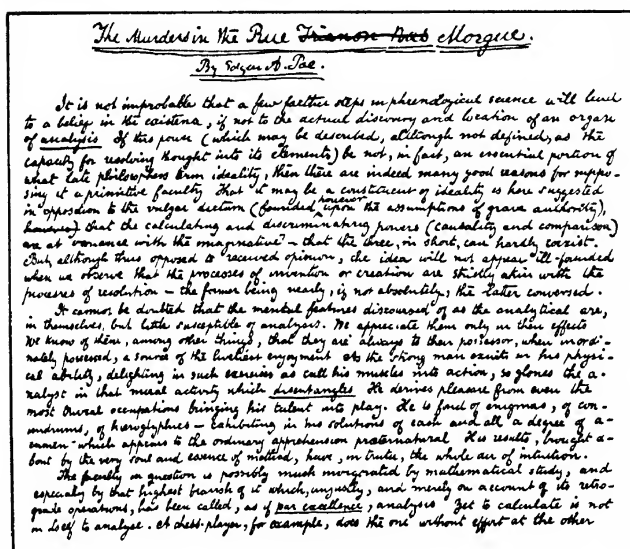

The mental features discoursed of as the analytical, are, in themselves, but little susceptible of analysis. We appreciate them only in their effects. We know of them,

among other things, that they are always to their possessor, when inordinately possessed, a source of the liveliest enjoyment. As the strong man exults in his physical ability, delighting in such exercises as call his muscle into action, so glories the analyst in that moral activity which *disentangles*. He derives pleasure from even the most trivial occupations bringing his talent into play. He is fond of enigmas, of conundrums, of hieroglyphic exhibiting in his solutions of each a degree of *acumen* which appears to the ordinary apprehension *præternatural*. His results, brought about by the very soul and essence of method, have, in truth, the whole air of intuition.

The faculty of re-solution is possibly much invigorated by mathematical study, and especially by that highest branch of it which, unjustly, and merely on account of its retrograde operations, has been called, as if *par excellence*, analysis. Yet to calculate is not in itself to analyze. A chess-player, for example, does the one without effort at the other. It follows that the game of chess, and its effects upon mental character, is greatly misunderstood. I am not writing a treatise, but simply prefacing a somewhat peculiar narrative by observations very much at random. I will, therefore, take occasion to assert that the higher powers of the reflective intellect are more decidedly and more usefully tasked by the unostentatious game of draughts than by all the elaborate frivolity of chess. In this latter, where the pieces have different and *bizarre* motions, with various and variable values, what is only complex is mistaken (a not unusual error) for what is profound. The *attention* is here called powerfully into play. If it flag for an instant, an oversight is committed, resulting in injury or defeat. The possible moves being not only manifold but involute, the chance of such oversights are multiplied, and in nine cases out of ten it is the more concentrative rather than the more acute player who conquers. In draughts, on the contrary, where the movers are *unique* and have but little variation, the probabilities of inadvertence are diminished, and the mere attention being left comparatively unemployed, what advantages are obtained by either party are obtained by superior *acumen*. To be less abstract—Let us suppose a game of draughts where the pieces are reduced to four kings, and where, of course, no oversight

What song. . . . The quotation is from Chap. 5 of *Hydriotaphia, or Urn-Burial* (1658) • 19 *par excellence*, preeminently

is to be expected. It is obvious that here the victory can be decided (the players being at all equal) only by some *recherche* movement, the result of some strong exertion of the intellect. Deprived of ordinary resources, the analyst throws himself into the spirit of his opponent, identifies himself therewith, and not unfrequently sees thus, at a glance, the sole methods (sometimes indeed absurdly simple ones) by which he may seduce into error or hurry into miscalculation.

Opening paragraphs of Poe's original manuscript.

- 10 Whist has long been noted for its influence upon what is termed the calculating power, and men of the highest order of intellect have been known to take an apparently unaccountable delight in it, while eschewing chess as frivolous. Beyond doubt there is nothing of a similar nature so greatly tasking the faculty of analysis. The best chess-player in Christendom *may* be little more than the best player of chess; but proficiency in whist implies capacity for success in all those more important undertakings where mind struggles with mind. When I say
- 20 proficiency, I mean that perfection in the game which includes a comprehension of *all* the sources whence legitimate advantage may be derived. These are not only manifold but multiform, and lie frequently among recesses of thought altogether inaccessible to the ordinary understanding. To observe attentively is to remember distinctly; and, so far, the concentrative chess-player will do very well at whist; while the rules of Hoyle (them-

selves based upon the mere mechanism of the game sufficiently and generally comprehensible. Thus a retentive memory, and to proceed by "the book points commonly regarded as the sum total of gaming. But it is in matters beyond the limits of mere book that the skill of the analyst is evinced. He maintains silence, a host of observations and inferences. He consults his companions; and the difference in the quality of the information obtained, lies not so much in the validity of the inference as in the quality of the information. The necessary knowledge is that of *what* to do. Our player confines himself not at all; nor, because the game is the object, does he reject deductions from external to the game. He examines the counter of his partner, comparing it carefully with that of his opponents. He considers the mode of assorting cards in each hand; often counting trump by truth or honor by honor, through the glances bestowed upon each. He notes every variation of the play progresses, gathering a fund of thought from the differences in the expression of certainty, of triumph, or chagrin. From the manner of giving up a trick he judges whether the person taking it will make another in the suit. He recognises what is through feint, by the air with which it is thrown upon the table. A casual or inadvertent word; the accidental dropping or turning of a card, with the accompanying anxiety or carelessness in regard to its concealment, counting of the tricks, with the order of their play, embarrassment, hesitation, eagerness, or confusion—all afford, to his apparently intuitive perception, indications of the true state of affairs. The first three rounds having been played, he is in full possession of the contents of each hand, and thenceforward he lays down his cards with as absolute a precision of position as if the rest of the party had turned outward to view of their own.

The analytical power should not be confounded with simple ingenuity, for while the analyst is not ingenious, the ingenious man is often remarkable for his analysis. The constructive or combining power by which ingenuity is usually manifested, and the phrenologists (I believe erroneously) have regarded as a separate organ, supposing it a primitive faculty, has been so frequently seen in those whose intellect is otherwise upon idiocy, as to have attracted gen-

servation among writers on morals. Between ingenuity and the analytic ability there exists a difference far greater indeed, than that between the fancy and the imagination, but of a character very strictly analogous. It will be found, in fact, that the ingenious are always fanciful, and the *truly* imaginative never otherwise than analytic.

The narrative which follows will appear to the reader somewhat in the light of a commentary upon the propositions just advanced.

12 Residing in Paris during the spring and part of the summer of 18—, I there became acquainted with a Monsieur C. Auguste Dupin. This young gentleman was of an excellent—indeed of an illustrious family, but, by a variety of untoward events, had been reduced to such poverty that the energy of his character succumbed beneath it, and he ceased to bestir himself in the world, or to care for the retrieval of his fortunes. By courtesy of his creditors, there still remained in his possession a small remnant of his patrimony; and, upon the income arising
27 from this, he managed, by means of a rigorous economy, to procure the necessities of life, without troubling himself about its superfluities. Books, indeed, were his sole luxuries, and in Paris these are easily obtained.

Our first meeting was at an obscure library in the Rue Montmartre, where the accident of our both being in search of the same very rare and very remarkable volume, brought us into closer communion. We saw each other again and again. I was deeply interested in the little family history which he detailed to me with all that
31 candor which a Frenchman indulges whenever mere self is his theme. I was astonished, too, at the vast extent of his reading; and, above all, I felt my soul enkindled within me by the wild fervor, and the vivid freshness of his imagination. Seeking in Paris the objects I then sought, I felt that the society of such a man would be a treasure beyond price; and this feeling I frankly confided to him. It was at length arranged that we should live together during my stay in the city; and as my worldly circumstances were somewhat less embarrassed
35 than his own, I was permitted to be at the expense of renting, and furnishing in a style which suited the rather fantastic gloom of our common temper, a time-eaten and grotesque mansion, long deserted through superstitions into which we did not inquire, and tottering to its fall in a retired and desolate portion of the Faubourg St. Germain

Had the routine of our life at this place been known to the world, we should have been regarded as madmen—although, perhaps, as madmen of a harmless nature. Our seclusion was perfect. We admitted no visitors. Indeed the locality of our retirement had been carefully kept a secret from my own former associates; and it had been many years since Dupin had ceased to know or be known in Paris. We existed within ourselves alone.

It was a freak of fancy in my friend (for what else shall I call it?) to be enamored of the Night for her own sake, and into this *bizarerie*, as into all his others, quietly fell, giving myself up to his wild whims with perfect *abandon*. The sable divinity would not herself dwell with us always, but we could counterfeit her presence. At the first dawn of the morning we closed all the massy shutters of our old building, lighting a couple of tapers which, strongly perfumed, threw out only the ghastliest and feeblest of rays. By the aid of these we then busied our souls in dreams—reading, writing, or conversing, until warned by the clock of the advent of the true Darkness. Then we sallied forth into the streets arm in arm, continuing the topics of the day, or roaming far and wide until a late hour, seeking amid the wild lights and shadows of the populous city, that infinity of mental excitement which quiet observation can afford.

At such times I could not help remarking and admiring (although from his rich ideality I had been prepared to expect it) a peculiar analytic ability in Dupin. He seemed, too, to take an eager delight in its exercise—not exactly in its display—and did not hesitate to confess the pleasure thus derived. He boasted to me, with a low chuckling laugh, that most men, in respect to himself wore windows in their bosoms, and was wont to follow up such assertions by direct and very startling proofs of his intimate knowledge of my own. His manner at these moments was frigid and abstract; his eyes were vacant in expression; while his voice, usually a rich tenor, rose into a treble which would have sounded petulantly but for the deliberateness and entire distinctness of the enun-

12 Dupin. There was in France at the time "an illustrious family" bearing this name. André Marie Jean Jacques Dupin, president of the Chamber of Deputies in 1840 and a writer on French criminal procedure, may have suggested the name to Poe. • 45 Faubourg St. Germain, a fashionable district on the south bank of the Seine

ciation. Observing him in these moods, I often dwelt meditatively upon the old philosophy of the Bi-Part Soul, and amused myself with the fancy of a double Dupin—the creative and the resolvent.

Let it not be supposed, from what I have just said, that I am detailing any mystery, or penning any romance. What I have described in the Frenchman, was merely the result of an excited, or perhaps of a diseased intelligence. But of the character of his remarks at the periods in ques-

10 tion an example will best convey the idea

We were strolling one night down a long dirty street, in the vicinity of the Palais Royal. Being both, apparently, occupied with thought, neither of us had spoken a syllable for fifteen minutes at least. All at once Dupin broke forth with these words:

"He is a very little fellow, that's true, and would do better for the *Théâtre des Variétés*."

"There can be no doubt of that," I replied unwittingly and not at first observing (so much had I been absorbed
20 in reflection) the extraordinary manner in which the speaker had chimed in with my meditations. In an instant afterward I recollected myself, and my astonishment was profound.

"Dupin," said I, gravely, "this is beyond my comprehension. I do not hesitate to say that I am amazed, and can scarcely credit my senses. How was it possible you should know I was thinking of—?" Here I paused, to ascertain beyond a doubt whether he really knew of whom I thought.

30 "—of Chantilly," said he, "why do you pause? You were remarking to yourself that his diminutive figure unfitted him for tragedy."

This was precisely what had formed the subject of my reflections. Chantilly was a *quondam* cobbler of the Rue St. Denis, who, becoming stage-mad, had attempted the role of Xerxes, in Crébillon's tragedy so called, and been notoriously Pasquinaded for his pains.

"Tell me, for Heaven's sake," I exclaimed, "the method—if method there is—by which you have been enabled
40 to fathom my soul in this matter." In fact I was even more startled than I would have been willing to express.

"It was the fruiterer," replied my friend, "who brought you to the conclusion that the mender of soles was not of sufficient height for Xerxes *et id genus omne*."

"The fruiterer!—you astonish me—I know no fruiterer whomsoever."

"The man who ran up against you as we entered the street—it may have been fifteen minutes ago."

I now remembered that, in fact, a fruiterer, upon his head a large basket of apples, had nearly run me down, by accident, as we passed from the boulevard into the thoroughfare where we stood; but what to do with Chantilly I could not possibly understand.

There was not a particle of *charlatanerie* about "I will explain," he said, "and that you may understand all clearly, we will first retrace the course of my meditations, from the moment in which I spoke until that of the *rencontre* with the fruiterer in the street. The larger links of the chain run thus—Chantilly, Dr. Nichols, Epicurus, Stereotomy, the street, and the fruiterer."

There are few persons who have not, at some time of their lives, amused themselves in retracing the path by which particular conclusions of their own mind have been attained. The occupation is often full of interest, and he who attempts it for the first time is as much interested by the apparently illimitable distance and incalculable delay between the starting-point and the goal. What must have been my amazement when I heard the man speak what he had just spoken, and when he did not help acknowledging that he had spoken of himself? He continued:

"We had been talking of horses, if I remember right, just before leaving the Rue C— This was the subject we discussed. As we crossed into the street, the fruiterer, with a large basket upon his head, brushing past us, thrust you upon a pile of paving-stones, and at a point where the causeway is undergoing repair, stepped upon one of the loose fragments, slipped, and strained your ankle. appeared vexed or sulky, and after a few words, turned to look at the pile, and then succeeded in silence. I was not particularly attentive to what you did, but observation has become with me, late, a species of necessity.

"You kept your eyes upon the ground—and I looked up with a petulant expression, at the holes and ruts

17 *Théâtre des Variétés*, French vaudeville theater • 3 *Rue St. Denis*, a street in Paris • 36 *Crébillon*, Prosper Jolyot de (1674-1762), a French tragic dramatist. His *Xerxes* was written in 1702 • 44 *et . . . omne*, and all of that sort • 59 *Orion*, a constellation • 60 *Epicurus*, Greek philosopher (342?-270 B.C.)

pavement (so that I saw you were still thinking of the stones), until we reached the little alley called Lamartine, which has been paved, by way of experiment, with the overlapping and riveted blocks. Here your countenance brightened up, and, perceiving your lips move, I could not doubt that you murmured the word 'stercotomy' a term very affectedly applied to this species of pavement. I knew that you could not say to yourself 'stereotomy' without being brought to think of atomies, and thus of the theories of Epicurus; and since, when we discussed this subject not very long ago, I mentioned to you how singularly, yet with how little notice, the vague guesses of that noble Greek had met with confirmation in the late nebular cosmogony, I felt that you could not avoid casting your eyes upward to the great *nebula* in Orion, and I certainly expected that you would do so. You did look up, and I was assured that I had correctly followed your steps. But in that bitter *trade* upon Chantilly, which appeared in yesterday's '*Musee*,' the satirist, making some disgraceful allusions to the cobbler's change of name upon assuming the buskin, quoted a Latin line about which we have often conversed. I mean the line

Perdidit antiquum litera prima sonum.

I had told you that this was in reference to Orion, formerly written Urion, and from certain puns connected with this explanation, I was aware that you could not have forgotten it. It was clear, therefore, that you would not fail to combine the two ideas of Orion and Chantilly. That you did combine them I saw by the character of the smile which passed over your lips. You thought of the poor cobbler's immolation. So far you had been stooping in your gait, but now I saw you draw yourself up to your full height. I was then sure that you reflected upon the diminutive figure of Chantilly. At this point I interrupted your meditations to remark that as, in fact, he was a very little fellow—that Chantilly—he would do better at the *Théâtre des Variétés*."

Not long after this, we were looking over an evening edition of the *Gazette des Tribunaux*, when the following paragraphs arrested our attention.

"EXTRAORDINARY MURDERS—This morning, about three o'clock, the inhabitants of the Quartier St. Roch were aroused from sleep by a succession of terrific shrieks, issuing, apparently, from the fourth story of a

house in the Rue Morgue, known to be in the so occupancy of one Madame L'Espanaye, and her daughter Mademoiselle Camille L'Espanaye. After some delay occasioned by a fruitless attempt to procure admittance in the usual manner, the gateway was broken in with crowbar, and eight or ten of the neighbors entered, accompanied by two *gendarmes*. By this time the crying had ceased, but as the party rushed up the first flight of stairs, two or more rough voices, in angry contention were distinguished, and seemed to proceed from the upper part of the house. As the second landing was reached these sounds, also, had ceased, and everything remained perfectly quiet. The party spread themselves, and hurried from room to room. Upon arriving at a large back chamber in the fourth story (the door of which, being found locked, with the key inside, was forced open,) a spectacle presented itself which struck every one present not less with horror than with astonishment.

The apartment was in the wildest disorder—the furniture broken and thrown about in all directions. There was only one bedstead, and from this the bed had been removed, and thrown into the middle of the floor. On a chair lay a razor, besmeared with blood. On the hearth were two or three long and thick tresses of grey human hair, also dabbled in blood, and seeming to have been pulled out by the roots. On the floor were found four Napoleons, an ear-ring of topaz, three large silver spoons, three smaller of *metal d'Alger*, and two bags, containing nearly four thousand francs in gold. The drawers of a *bureau*, which stood in one corner, were open, and had been, apparently, rifled, although many articles still remained in them. A small iron safe was discovered under the *bed* (not under the bedstead). It was open, with the key still in the door. It had no contents beyond a few old letters, and other papers of little consequence.

"Of Madame L'Espanaye no traces were here seen; but an unusual quantity of soot being observed in the fire-place, a search was made in the chimney, and (horrible to relate!) the corpse of the daughter, head downward, was dragged therefrom; it having been thus forced up the narrow aperture for a considerable distance. The body was quite warm. Upon examining it, many exco-

24 *Perdidit*. . . *sonum*. The first letter destroys the antique sound. •
73 *metal d'Alger*, an alloy used in imitation of silver.

riations were perceived, no doubt occasioned by the violence with which it had been thrust up and disengaged. Upon the face were many severe scratches, and, upon the throat, dark bruises, and deep indentations of fingernails, as if the deceased had been throttled to death.

"After a thorough investigation of every portion of the house, without farther discovery, the party made its way into a small paved yard in the rear of the building, where lay the corpse of the old lady, with her throat so
10 entirely cut that, upon an attempt to raise her, the head fell off. The body, as well as the head, was fearfully mutilated—the former so much so as scarcely to retain any semblance of humanity.

"To this horrible mystery there is not as yet, we believe, the slightest clew."

The next day's paper had these additional particulars.

"*The Tragedy in the Rue Morgue.* Many individuals have been examined in relation to this most extraordinary and frightful affair" [the word '*affaire*' has not yet,
20 in France, that levity of import which it conveys with us], "but nothing whatever has transpired to throw light upon it. We give below all the material testimony elicited.

"*Pauline Dubourg*, laundress, deposes that she has known both the deceased for three years, having washed for them during that period. The old lady and her daughter seemed on good terms—very affectionate towards each other. They were excellent pay. Could not speak in regard to their mode or means of living. Believed that Madame L. told fortunes for means of living. Was re-
30 puted to have money put by. Never met any persons in the house when she called for the clothes or took them home. Was sure that they had no servant in employ. There appeared to be no furniture in any part of the building except in the fourth story.

"*Pierre Moreau*, tobacconist, deposes that he has been in the habit of selling small quantities of tobacco and snuff to Madame L'Espanaye for nearly four years. Was born in the neighborhood, and has always resided there. The deceased and her daughter had occupied the house
40 in which the corpses were found, for more than six years. It was formerly occupied by a jeweller, who under-let the upper rooms to various persons. The house was the property of Madame L. She became dissatisfied with the abuse of the premises by her tenant, and moved into them herself, refusing to let any portion. The old lady was childish. Witness had seen the daughter some five or

six times during the six years. The two lived exceedingly retired life—were reputed to have monied it said among the neighbors that Madame L. and her daughter did not believe it. Had never seen any person enter the door except the old lady and her daughter, a porter once or twice, and a physician some eight times.

"Many other persons, neighbors, gave evidence to the same effect. No one was spoken of as frequenting the house. It was not known whether there were any connexions of Madame L. and her daughter. The doors of the front windows were seldom opened. The doors in the rear were always closed, with the exception of the door of the back room, fourth story. The house was a good one, but not very old.

"*Isidore Muset*, *gendarme*, deposes that he was at the house about three o'clock in the morning, attending some twenty or thirty persons at the gateway, endeavoring to gain admittance. Forced it open, at length with a bayonet—not with a crowbar. Had but little success in getting it open, on account of its being a double folding gate, and bolted neither at bottom nor top. The shrieks were continued until the gate was forced open, then suddenly ceased. They seemed to be screams of a single person (or persons) in great agony—were long and drawn out, not short and quick. Witness led the way up the stairs. Upon reaching the first landing, heard two voices in loud and angry contention—the one a gruff voice, the other much shriller—a very strange voice. Could not distinguish some words of the former, which was a Frenchman. Was positive that it was not a French voice. Could distinguish the words '*sacré*' and '*diabole*'. The shrill voice was that of a foreigner. Could not be sure whether it was the voice of a man or of a woman. Could not make out what was said, but believed the language to be Spanish. The state of the room in which the bodies were described by this witness as we saw it yesterday.

"*Henri Duval*, a neighbor, and by trade a silversmith, deposes that he was one of the party who first entered the house. Corroborates the testimony of Muset in all particulars. As soon as they forced an entrance, they receded into the door, to keep out the crowd, which collected in the street notwithstanding the lateness of the hour. The voice, this witness thinks, was that of an Italian. Was certain it was not French. Could not be sure that

a man's voice. It might have been a woman's. Was not acquainted with the Italian language. Could not distinguish the words, but was convinced by the intonation that the speaker was an Italian. Knew Madame L. and her daughter. Had conversed with both frequently. Was sure that the shrill voice was not that of either of the deceased.

13 "—*Odenheimer, restaurateur*. This witness volunteered his testimony. Not speaking French, was examined through an interpreter. Is a native of Amsterdam. Was passing the house at the time of the shrieks. They lasted for several minutes—probably ten. They were long and loud—very awful and distressing. Was one of those who entered the building. Corroborated the previous evidence in every respect but one. Was sure that the shrill voice was that of a man—of a Frenchman. Could not distinguish the words uttered. They were loud and quick—unequal—spoken apparently in fear as well as in anger. The voice was harsh—not so shrill as harsh. Could not call it a shrill voice. The gruff voice said repeatedly 'sacré,' 'diable,' and once 'mon Dieu.'

"*Jules Mignaud*, banker, of the firm of Mignaud et Fils, Rue Deloraine. Is the elder Mignaud. Madame L'Espanaye had some property. Had opened an account with his banking house in the spring of the year—(eight years previously). Made frequent deposits in small sums. Had checked for nothing until the third day before her death, when she took out in person the sum of 4000 francs. This sum was paid in gold, and a clerk sent home with the money.

"*Adolphe Le Bon*, clerk to Mignaud et Fils, deposes that on the day in question, about noon, he accompanied Madame L'Espanaye to her residence with the 4000 francs, put up in two bags. Upon the door being opened, Mademoiselle L. appeared and took from his hands one of the bags, while the old lady relieved him of the other. He then bowed and departed. Did not see any person in the street at the time. It is a byestreet—very lonely.

4 "William Bird, tailor, deposes that he was one of the party who entered the house. Is an Englishman. Has lived in Paris two years. Was one of the first to ascend the stairs. Heard the voices in contention. The gruff voice was that of a Frenchman. Could make out several words, but cannot now remember all. Heard distinctly 'sacré,' and 'mon Dieu.' There was a sound at the moment as if of several persons struggling—a scraping and

scuffling sound. The shrill voice was very loud—louder than the gruff one. Is sure that it was not the voice of an Englishman. Appeared to be that of a German. Might have been a woman's voice. Does not understand German.

"Four of the above-named witnesses, being recalled, deposed that the door of the chamber in which was found the body of Mademoiselle L. was locked on the inside when the party reached it. Every thing was perfectly silent—no groans or noises of any kind. Upon forcing the door no person was seen. The windows, both of the back and the front room, were down and firmly fastened from within. A door between the two rooms was closed, but not locked. The door leading from the front room into the passage was locked, with the key on the inside. A small room in the front of the house, on the fourth story, at the head of the passage was open, the door being ajar. This room was crowded with old beds, boxes, and so forth. These were carefully removed and searched. There was not an inch of any portion of the house which was not carefully searched. Sweeps were sent up and down the chimneys. The house was a four story one, with garrets (*mansardes*). A trap door on the roof was nailed down securely—did not appear to have been opened for years. The time elapsing between the hearing of the voices in contention and the breaking open of the room door, was variously stated by the witnesses. Some made it as short as three minutes—some as long as five. The door was opened with difficulty.

"*Alfonzo Garcio*, undertaker, deposes that he resides in the Rue Morgue. Is a native of Spain. Was one of the party who entered the house. Did not proceed up stairs. Is nervous, and was apprehensive of the consequences of agitation. Heard the voices in contention. The gruff voice was that of a Frenchman. Could not distinguish what was said. The shrill voice was that of an Englishman—is sure of this. Does not understand the English language, but judges by the intonation.

"*Alberto Montani*, confectioner, deposes that he was among the first to ascend the stairs. Heard the voices in question. The gruff voice was that of a Frenchman. Distinguished several words. The speaker appeared to be expostulating. Could not make out the words of the shrill voice. Spoke quick and unevenly. Thinks it the voice of a Russian. Corroborates the general testimony. Is an Italian. Never conversed with a native of Russia.

"Several witnesses, recalled, here testified that the chimneys of all the rooms on the fourth story were too narrow to admit the passage of a human being. By 'sweeps' were meant cylindrical sweeping-brushes, such as are employed by those who clean chimneys. These brushes were passed up and down every flue in the house. There is no back passage by which any one could have descended while the party proceeded upstairs. The body of Mademoiselle L'Espanaye was so firmly wedged in the chimney that it could not be got down until four or five of the party united their strength.

"Paul Dumas, physician, deposes that he was called to view the bodies about day-break. They were both then lying on the sacking of the bedstead in the chamber where Mademoiselle L. was found. The corpse of the young lady was much bruised and excoriated. The fact that it had been thrust up the chimney would sufficiently account for these appearances. The throat was greatly chafed. There were several deep scratches just below the chin, together with a series of livid spots which were evidently the impressions of fingers. The face was fearfully discolored and the eye-balls protruded. The tongue had been partially bitten through. A large bruise was discovered upon the pit of the stomach, produced, apparently, by the pressure of a knee. In the opinion of M. Dumas, Mademoiselle L'Espanaye had been throttled to death by some person or persons unknown. The corpse of the mother was horribly mutilated. All the bones of the right leg and arm were more or less shattered. The left tibia much splintered, as well as all the ribs of the left side. Whole body dreadfully bruised and discolored. It was not possible to say how the injuries had been inflicted. A heavy club of wood, or a broad bar of iron—a chair—any large, heavy, and obtuse weapon would have produced such results, if wielded by the hands of a very powerful man. No woman could have inflicted the blows with any weapon. The head of the deceased, when seen by witness, was entirely separated from the body, and was also greatly shattered. The throat had evidently been cut with some very sharp instrument,—probably with a razor.

"Alexandre Etienne, surgeon, was called with M. Dumas to view the bodies. Corroborated the testimony and opinions of M. Dumas.

"Nothing farther of importance was elicited, although several other persons were examined. A murder so

mysterious, and so perplexing in all its particulars, never before committed in Paris—if indeed a murder has been committed at all. The police are entirely at fault—an unusual occurrence in affairs of this kind. There is not, however, the shadow of a clew ap-

The evening edition of the paper stated that the greatest excitement still continued in the Quarter of St. Roch—that the premises in question had been carefully re-searched, and fresh examinations of witnesses conducted, but all to no purpose. A postscript, however, mentioned that Adolphe Le Bon had been arrested and imprisoned—although nothing appeared to criminate beyond the facts already detailed.

Dupin seemed singularly interested in the proceedings of this affair—at least so I judged from his manner. He made no comments. It was only after the announcement that Le Bon had been imprisoned, that he asked for an opinion respecting the murders.

I could merely agree with all Paris in considering them an insoluble mystery. I saw no means by which it would be possible to trace the murderer.

"We must not judge of the means," said Dupin, in this shell of an examination. The Parisian police are much extolled for *acumen*, are cunning, but are not methodical. There is no method in their proceedings, beyond the method of the moment. They make a vast number of measures; but, not unfrequently, these are so ill adapted to the objects proposed, as to put us in mind of the *sieur Jourdain's* calling for his *robe-de-chambre* to *mieux entendre la musique*. The results attained are not unfrequently surprising, but, for the most part, are brought about by simple diligence and industry. When these qualities are unavailing, their scheme fails. Vidocq, for example, was a good guesser and a very ingenious man. But, without educated thought, he continually by the very intensity of his investigation impaired his vision by holding the object too close to his eyes. He might see, perhaps, one or two points with clearness, but in so doing he, necessarily, lost sight

74 Monsieur Jourdain, a naïve character in Molière's *Le bourgeois gentilhomme*, who, as the quotation indicates, is wearing a dressing gown "in order that he may listen better to the music." Vidocq, Eugène François Vidocq (1775-1857), a French criminal whose picturesque *Mémoires* (1829) were doubtless of great service to Poe in suggesting methods of writing about crime.

matter as a whole. Thus there is such a thing as being too profound. Truth is not always in a well. In fact, as regards the more important knowledge, I do believe that she is invariably superficial. The depth lies in the valleys where we seek her, and not upon the mountain-tops where she is found. The modes and sources of this kind of error are well typified in the contemplation of the heavenly bodies. To look at a star by glances—to view it in a side-long way, by turning toward it the exterior portions of the *retina* (more susceptible of feeble impressions of light than the interior), is to behold the star distinctly—is to have the best appreciation of its lustre—a lustre which grows dim just in proportion as we turn our vision *fully* upon it. A greater number of rays actually fall upon the eye in the latter case, but, in the former, there is the more refined capacity for comprehension. By undue profundity we perplex and enfeeble thought, and it is possible to make even Venus herself vanish from the firmament by a scrutiny too sustained, too concentrated, or too direct.

"As for these murders, let us enter into some examinations for ourselves, before we make up an opinion respecting them. An inquiry will afford us amusement" [I thought this an odd term, so applied, but said nothing], "and, besides, Le Bon once rendered me a service for which I am not ungrateful. We will go and see the premises with our own eyes. I know G—, the Prefect of Police, and shall have no difficulty in obtaining the necessary permission."

The permission was obtained, and we proceeded at once to the Rue Morgue. This is one of those miserable thoroughfares which intervene between the Rue Richelieu and the Rue St. Roch. It was late in the afternoon when we reached it; as this quarter is at a great distance from that in which we resided. The house was readily found, for there were still many persons gazing up at the closed shutters, with an objectless curiosity, from the opposite side of the way. It was an ordinary Parisian house, with a gateway, on one side of which was a glazed watchbox, with a sliding panel in the window, indicating a *loge de concierge*. Before going in we walked up the street, turned down an alley, and then, again turning, passed in the rear of the building—Dupin, meanwhile, examining the whole neighborhood, as well as the house, with a minuteness of attention for which I could see no possible object.

Retracing our steps, we came again to the front of the dwelling, rang, and, having shown our credentials, were admitted by the agents in charge. We went up stairs—into the chamber where the body of Mademoiselle L'Espanaye had been found, and where both the deceased still lay. I saw nothing beyond what had been stated in the *Gazette des Tribunaux*. Dupin scrutinized every thing—not excepting the bodies of the victims. We then went into the other rooms, and into the yard, *gendarme* accompanying us throughout. The examination occupied us until dark, when we took our departure. On our way home my companion stepped in for a moment at the office of one of the daily papers. I have said that the whims of my friend were manifold, and *Je les ménageais*;—for this phrase there is no English equivalent. It was his humor, now, to decline all conversation on the subject of the murder, until about noon the next day. He then asked me, suddenly, if I had observed anything *peculiar* at the scene of the atrocity.

There was something in his manner of emphasizing the word "peculiar," which caused me to shudder, without knowing why.

"No, nothing *peculiar*," I said, "nothing more, at least than we both saw stated in the paper."

"The *Gazette*," he replied, "has not entered, I fear into the unusual horror of the thing. But dismiss the idle opinions of this print. It appears to me that this mystery is considered insoluble, for the very reason which should cause it to be regarded as easy of solution—I mean for the *outré* character of its features. The police are confounded by the seeming absence of motive—not for the murder itself—but for the atrocity of the murder. They are puzzled, too, by the seeming impossibility of reconciling the voices heard in contention, with the facts that no one was discovered upstairs but the assassinated Mademoiselle L'Espanaye, and that there was no means of egress without the notice of the party ascending. The wild disorder of the room, the corpse thrust, with the head downward, up the chimney, the frightful mutilation of the body of the old lady; these considerations, with those just mentioned, and others which I need not mention, have sufficed to paralyze the powers, by putting

41 *loge de concierge*, janitor's lodge • 61 *Je les ménageais*, I humored them cautiously

completely at fault the boasted *acumen*, of the government agents. They have fallen into the gross but common error of confounding the unusual with the abstruse. But it is by these deviations from the plane of the ordinary, that reason feels its way, if at all, in its search for the true. In investigations such as we are now pursuing, it should not be so much asked 'what has occurred,' as 'what has occurred that has never occurred before.' In fact, the facility with which I shall arrive, or have arrived, at the solution of this mystery, is in the direct ratio of its apparent insolubility in the eyes of the police."

I stared at the speaker in mute astonishment.

"I am now awaiting," continued he, looking toward the door of our apartment—"I am now awaiting a person who, although perhaps not the perpetrator of these butcheries, must have been in some measure implicated in their perpetration. Of the worst portion of the crimes committed, it is probable that he is innocent. I hope that I am right in this supposition, for upon it I build my expectation of reading the entire riddle. I look for the man here—in this room—every moment. It is true that he may not arrive, but the probability is that he will. Should he come, it will be necessary to detain him. Here are pistols; and we both know how to use them when occasion demands their use."

I took the pistols, scarcely knowing what I did, or believing what I heard, while Dupin went on, very much as if in a soliloquy. I have already spoken of his abstract manner at such times. His discourse was addressed to myself; but his voice, although by no means loud, had that intonation which is commonly employed in speaking to some one at a great distance. His eyes, vacant in expression, regarded only the wall.

"That the voices heard in contention," he said, "by the party upon the stairs, were not the voices of the women themselves, was fully proved by the evidence. This relieves us of all doubt upon the question whether the old lady could have first destroyed the daughter, and afterward have committed suicide. I speak of this point chiefly for the sake of method; for the strength of Madame L'Espanaye would have been utterly unequal to the task of thrusting her daughter's corpse up the chimney as it was found; and the nature of the wounds upon her own person entirely preclude the idea of self-destruction. Murder, then, has been committed by some third party; and the voices of this third party were those

heard in contention. Let me now advert—not to the whole testimony respecting these voices—but to what was *peculiar* in that testimony. Did you observe anything peculiar about it?"

I remarked that, while all the witnesses supposed the gruff voice to be that of a Frenchman, there was much disagreement in regard to the name of the individual termed it, the harsh voice.

"That was evidence itself," said Dupin, "but not the peculiarity of the evidence. You have nothing distinctive. Yet there *was* something observed. The witnesses, as you remark, agreed to the gruff voice; they were here unanimous. But as to the shrill voice, the peculiarity is—not disagreed—but that, while an Italian, an Englishman, a Spaniard, a Hollander, and a Frenchman attempted to describe it, each one spoke of it as that of a Frenchman. Each is sure that it was not the voice of one of his countrymen. Each likens it—not to the voice of any individual of any nation with whose language he was conversant—but to the converse of the Frenchman. The Frenchman su-
posed the voice of a Spaniard, and might have distinguished some words '*had he been acquainted with the language*.' The Dutchman maintains it to have been that of a Frenchman; but we find it stated that '*not understanding French this witness was examined through the aid of an interpreter*.' The Englishman thinks it is the voice of a German, and '*does not understand German*.' The Spaniard '*is sure*' that it was that of an Englishman, but '*judges by the intonation*' altogether, '*as he knows the intonation of the English*.' The Italian believed it to be the voice of a Russian, but '*has never conversed with a Russian*.' A second Frenchman differs, more or less from the first, and is positive that the voice was that of an Italian, but, '*not being cognizant of that tongue*,' the Spaniard, '*convinced by the intonation*.' No one of the five great nations of Europe could recognize nothing familiar! I will say that it might have been the voice of an African. Neither Asiatics nor Africans are heard in Paris; but, without denying the inference, I will call your attention to three points. The voice is termed by one witness '*harsh rather than shrill*.' It is suggested by two others to have been '*quick and*

No words—no sound resembling words—were by any witness mentioned as distinguishable.

"I know not," continued Dupin, "what impression I may have made so far, upon your own understanding; but I do not hesitate to say that legitimate deductions even from this portion of the testimony—the portion respecting the gruff and shrill voices—are in themselves sufficient to engender a suspicion which should give direction to all farther progress in the investigation of the mystery. I said 'legitimate deductions;' but my meaning is not thus fully expressed. I designed to imply that the deductions are the *sole* proper ones, and that the suspicion arise *inevitably* from them as the single result. What the suspicion is, however, I will not say just yet. I merely wish you to bear in mind that, with myself, it was sufficiently forcible to give a definite form—a certain tendency—to my inquiries in the chamber.

"Let us now transport ourselves, in fancy, to this chamber. What shall we first seek here? The means of egress employed by the murderers. It is not too much to say that neither of us believe in præternatural events. Madame and Mademoiselle L'Espanaye were not destroyed by spirits. The doers of the deed were material, and escaped materially. Then how? Fortunately, there is but one mode of reasoning upon the point, and that mode *must* lead to a definite decision.—Let us examine, each by each, the possible means of egress. It is clear that the assassins were in the room where Mademoiselle L'Espanaye was found, or at least in the room adjoining, when the party ascended the stairs. It is then only from these two apartments that we have to seek issues. The police have laid bare the floors, the ceilings, and the masonry of the walls, in every direction. No *secret* issues could have escaped their vigilance. But not trusting to *their* eyes, I examined with my own. There were, then, *no* secret issues. Both doors leading from the rooms into the passage were securely locked, with the keys inside. Let us turn to the chimneys. These, although of ordinary width for some eight or ten feet above the hearths, will not admit, throughout their extent, the body of a large cat. The impossibility of egress, by means already stated, being thus absolute, we are reduced to the windows. Through those of the front room no one could have escaped without the notice of the crowd in the street. The murderers *must* have passed, then, through those

of the back room. Now, brought to this conclusion in so unequivocal manner as we are, it is not our part as reasoners, to reject it on account of apparent impossibilities. It is only left for us to prove that these apparent 'impossibilities' are, in reality, not such.

"There are two windows in the chamber. One of them is unobstructed by furniture, and is wholly visible. The lower portion of the other is hidden from view by the head of the unwieldy bedstead which is thrust close up against it. The former was found securely fastened from within. It resisted the utmost force of those who endeavored to raise it. A large gimlet-hole had been pierced in its frame to the left, and a very stout nail was found fitted therein, nearly to the head. Upon examining the other window, a similar nail was seen similarly fitted in it, and a vigorous attempt to raise this sash, failed also. The police were now entirely satisfied that egress had not been in these directions. And, *therefore*, it was thought a matter of supererogation to withdraw the nails and open the windows.

"My own examination was somewhat more particular and was so for the reason I have just given—because here it was, I knew, that all apparent impossibilities *must* be proved to be not such in reality.

"I proceeded to think thus—a *posteriori*. The murderers *did* escape from one of these windows. This being so, they could not have re-fastened the sashes from the inside, as they were found fastened,—the consideration which put a stop, through its obviousness, to the scrutiny of the police in this quarter. Yet the sashes *were* fastened. They *must*, then, have the power of fastening themselves. There was no escape from this conclusion. I stepped to the unobstructed casement, withdrew the nail with some difficulty, and attempted to raise the sash. It resisted all my efforts, as I had anticipated. A concealed spring must, I now knew, exist; and this corroboration of my idea convinced me that my premises, at least, were correct, however mysterious still appeared the circumstances attending the nails. A careful search soon brought to light the hidden spring. I pressed it, and satisfied with the discovery, forbore to upraise the sash.

"I now replaced the nail and regarded it attentively. A person passing out through this window might have reclosed it, and the spring would have caught—but the nail could not have been replaced. The conclusion was plain, and again narrowed in the field of my investiga-

tions. The assassins *must* have escaped through the other window. Supposing, then, the springs upon each sash to be the same, as was probable, there *must* be found a difference between the nails, or at least between the modes of their fixture. Getting upon the sacking of the bedstead, I looked over the head-board minutely at the second casement. Passing my hand down behind the board, I readily discovered and pressed the spring, which was, as I had supposed, identical in character with its
10 neighbor. I now looked at the nail. It was as stout as the other, and apparently fitted in the same manner—driven in nearly up to the head.

"You will say that I was puzzled, but, if you think so, you must have misunderstood the nature of the inductions. To use a sporting phrase, I had not been once 'at fault.' The scent had never for an instant been lost. There was no flaw in any link of the chain. I had traced the secret to its ultimate result,—and that result was *the nail*. It had, I say, in every respect, the appearance of its fellow
20 in the other window, but this fact was an absolute nullity (conclusive as it might seem to be) when compared with the consideration that here, at this point, terminated the clew. 'There *must* be something wrong,' I said, 'about the nail.' I touched it; and the head, with about a quarter of an inch of the shank, came off in my fingers. The rest of the shank was in the gimlet-hole where it had been broken off. The fracture was an old one (for its edges were incrustured with rust), and had apparently been accomplished by the blow of a hammer, which
30 had partially imbedded, in the top of the bottom sash, the head portion of the nail. I now carefully replaced this head portion in the indentation whence I had taken it, and the resemblance to a perfect nail was complete—the fissure was invisible. Pressing the spring, I gently raised the sash for a few inches; the head went up with it, remaining firm in its bed. I closed the window, and the semblance of the whole nail was again perfect.

"The riddle, so far, was now unriddled. The assassin had escaped through the window which looked upon the
40 bed. Dropping of its own accord upon his exit (or perhaps purposely closed), it had become fastened by the spring; and it was the retention of this spring which had been mistaken by the police for that of the nail,—farther inquiry being thus considered unnecessary.

"The next question is that of the mode of descent. Upon this point I had been satisfied in my walk with

you around the building. About five feet and from the casement in question there runs a 1 rod. From this rod it would have been impossible any one to reach the window itself, to say nothing of entering it. I observed, however, that the shutters of the fourth story were of the peculiar kind of Parisian carpenters *ferrades*—a kind rarely employed on the present day, but frequently seen upon the mansions at Lyons and Bordeaux. They are in the form of an ordinary door (a single, not a folding door) in that the upper half is latticed or worked in open work—thus affording an excellent hold for the hand. In the present instance these shutters are fully 7 feet high and a half broad. When we saw them from the street, of the house, they were both about half open. To say, they stood off at right angles from the wall, it is probable that the police, as well as myself, looking from the back of the tenement, but, if so, in looking at the *ferrades* in the line of their breadth, (as they now stood), they did not perceive this great breach in the wall, or, at all events, failed to take it into due consideration. In fact, having once satisfied themselves that a robbery could have been made in this quarter, the police naturally bestowed here a very cursory examination. It was clear to me, however, that the shutter fastened to the window at the head of the bed, would, if raised fully back to the wall, reach to within two feet of the lightning-rod. It was also evident that, by exerting a very unusual degree of activity and courage, an assassin might enter into the window, from the rod, might have been effected—By reaching to the distance of two feet and a half (we now suppose the shutter open to its full extent) a robber might have taken a firm grasp upon the trellis-work. Letting go, then, his hold upon the wall, placing his feet securely against the wall, and springing boldly from it, he might have swung the shutter open, closed it, and, if we imagine the window open at the time, might even have swung himself into the room.

"I wish you to bear especially in mind the fact that I have spoken of a *very* unusual degree of activity as necessary to success in so hazardous and so difficult a feat. My design to show you, first, that the thing might possibly have been accomplished—but, secondly, and more especially, I wish to impress upon your understanding the *extraordinary*—the almost præternatural character of that agility which could have accomplished it

"You will say, no doubt, using the language of the law, that 'to make out my case' I should rather under-value, than insist upon a full estimation of the activity required in this matter. This may be the practice in law, but it is not the usage of reason. My ultimate object is only the truth. My immediate purpose is to lead you to place in juxtaposition that *very unusual* activity of which I have just spoken, with that *very peculiar* shrill (or harsh) and *unequal* voice, about whose nationality no two persons could be found to agree, and in whose utterance no syllabification could be detected."

At these words a vague and half-formed conception of the meaning of Dupin flitted over my mind. I seemed to be upon the verge of comprehension, without power to comprehend—as men, at times, find themselves upon the brink of remembrance, without being able, in the end, to remember. My friend went on with his discourse.

"You will see," he said, "that I have shifted the question from the mode of egress to that of ingress. It was my design to suggest that both were effected in the same manner, at the same point. Let us now revert to the interior of the room. Let us survey the appearances here. The drawer of the bureau, it is said, had been rifled, although many articles of apparel still remained in them. The conclusion here is absurd. It is a mere guess—a very silly one—and no more. How are we to know that the articles found in the drawers were not all these drawers had originally contained? Madame L'Espanaye and her daughter lived an exceedingly retired life—saw no company—seldom went out—had little use for numerous changes of habiliment. Those found were at least of as good quality as any likely to be possessed by these ladies. If a thief had taken any, why did he not take the best, why did he not take all? In a word, why did he abandon four thousand francs in gold to encumber himself with a bundle of linen? The gold *was* abandoned. Nearly the whole sum mentioned by Monsieur Mignaud, the banker, was discovered, in bags, upon the floor. I wish you, therefore, to discard from your thoughts the blundering idea of *motive*, engendered in the brains of the police by that portion of the evidence which speaks of money delivered at the door of the house. Coincidences ten times as remarkable as this (the delivery of the money, and the murder committed within three days upon the party receiving

it), happen to all of us every hour of our lives, without attracting even momentary notice. Coincidences, in general, are great stumbling-blocks in the way of the class of thinkers who have been educated to know nothing of the theory of probabilities—that theory to which most of the most glorious objects of human research are indebted for the most glorious of illustration. In the present instance, had the gold been gone the fact of its delivery three days before would have formed something more than a coincidence. It would have been corroborative of this idea of motive. But under the real circumstances of the case, if we are to suppose gold the motive of this outrage, we must also imagine the perpetrator so vacillating an idiot as to have abandoned his gold and his motive together.

"Keeping now steadily in mind the points to which I have drawn your attention—that peculiar voice, that unusual agility, and that startling absence of motive in a murder so singularly atrocious as this—let us glance at the butchery itself. Here is a woman strangled to death by manual strength, and thrust up a chimney, head downward. Ordinary assassins employ no such modes of murder such as this. Least of all, do they thus dispose of the murdered. In the manner of thrusting the corpse up the chimney, you will admit that there was something *excessively outre*—something altogether irreconcilable with our common notions of human action, even when we suppose the actors the most depraved of men. Think, too, how great must have been that strength which could have thrust the body *up* such an aperture so forcibly that the united vigor of several persons was found barely sufficient to drag it *down*!

"Turn, now, to other indications of the employment of a vigor most marvellous. On the hearth were thick tresses—very thick tresses—of grey human hair. These had been torn out by the roots. You are aware of the great force necessary in tearing thus from the head even twenty or thirty hairs together. You saw the locks in question as well as myself. Their roots (a hideous sight!) were clotted with fragments of the flesh of the scalp—sure token of the prodigious power which had been exerted in uprooting perhaps half a million of hairs at a time. The throat of the old lady was not merely cut, but the head absolutely severed from the body; the instrument was a mere razor. I wish you also to look at the *brutal* ferocity of these deeds. Of the

bruises upon the body of Madame L'Espanaye I do not speak. Monsieur Dumas, and his worthy coadjutor Monsieur Etienne, have pronounced that they were inflicted by some obtuse instrument; and so far these gentlemen are very correct. The obtuse instrument was clearly the stone pavement in the yard, upon which the victim had fallen from the window which looked in upon the bed. This idea, however simple it may seem, escaped the police for the same reason that the breadth of the
10 shutters escaped them—because, by the affair of the nails, their perceptions had been hermetically sealed against the possibility of the windows having ever been opened at all

"If now, in addition to all these things, you have properly reflected upon the odd disorder of the chamber, we have gone so far as to combine the ideas of an agility astounding, a strength super-human, a ferocity brutal, a butchery without a motive, a *grotesquerie* in horror absolutely alien from humanity, and a voice foreign in
20 tone to the ears of men of many nations, and devoid of all distinct or intelligible syllabification. What result, then, has ensued? What impression have I made upon your fancy?"

I felt a creeping of the flesh as Dupin asked me the question. "A madman," I said, "has done this deed—some raving maniac, escaped from a neighboring *Maison de Sante*."

"In some respects," he replied, "your idea is not irrelevant. But the voices of madmen, even in their
30 wildest paroxysms, are never found to tally with that peculiar voice heard upon the stairs. Madmen are of some nation, and their language, however incoherent in its words, has always the coherence of syllabification. Besides, the hair of a madman is not such as I now hold in my hand. I disentangled this little tuft from the rigidly clutched fingers of Madame L'Espanaye. Tell me what you can make of it"

"Dupin!" I said, completely unnerved; "this hair is most unusual—this is no *human* hair"

40 "I have not asserted that it is," said he; "but, before we decide this point, I wish you to glance at the little sketch I have here traced upon this paper. It is a *fac-simile* drawing of what has been described in one portion of the testimony as 'dark bruises, and deep indentations of finger nails,' upon the throat of Mademoiselle L'Espanaye, and in another (by Messrs. Dumas and

Etienne), as a 'series of livid spots, evidently precession of fingers.'

"You will perceive," continued my friend, "that the paper upon the table before us, "that the drawing gives the idea of a firm and fixed hold. no *slipping* apparent. Each finger has retained its position until the death of the victim—the fearful place which it originally imbedded itself. Attempt to place all your fingers, at the same time, in the impressions as you see them"

I made the attempt in vain.

"We are possibly not giving this matter a fair trial," he said. "The paper is spread out upon a plan but the human throat is cylindrical. Here is a piece of wood, the circumference of which is about that of the throat. Wrap the drawing around it and try the experiment again."

I did so; but the difficulty was even more than before

"This," I said, "is the mark of no human hand."

"Read now," replied Dupin, "this passage from Cuvier."

It was a minute anatomical and generally correct account of the large fulvous Ourang-Outang of the Indian Islands. The gigantic stature, the prodigious strength and activity, the wild ferocity, and the propensities of these mammalia are sufficiently known to all. I understood the full horror of the murder at once.

"The description of the digits," said I, as I ended my reading, "is in exact accordance with that which I see that no animal but an Ourang-Outang of the species here mentioned, could have impressed such indentations as you have traced them. This tuft of hair, too, is identical in character with that of the hair of Cuvier. But I cannot possibly comprehend the particulars of this frightful mystery. Besides, there are two voices heard in contention, and one of them unquestionably the voice of a Frenchman."

"True; and you will remember an expression almost unanimously, by the evidence, to that effect, the expression, '*mon Dieu!*' This, under the

68 Cuvier, Georges Léopold Chrétien Frédéric Dagobert (1795-1832), French naturalist

stances, has been justly characterized by one of the witnesses (Montani, the confectioner), as an expression of remonstrance or expostulation. Upon these two words, therefore, I have mainly built my hopes of a full solution of the riddle. A Frenchman was cognizant of the murder. It is possible—indeed it is far more than probable—that he was innocent of all participation in the bloody transactions which took place. The Ourang-Outang may have escaped from him. He may have traced it to the chamber; but, under the agitating circumstances which ensued, he could never have re-captured it. It is still at large. I will not pursue these guesses—for I have no right to call them more—since the shades of reflection upon which they are based are scarcely of sufficient depth to be appreciable by my own intellect, and since I could not pretend to make them intelligible to the understanding of another. If the Frenchman in question is indeed, as I suppose, innocent of this atrocity, this advertisement, which I left last night, upon our return home, at the office of *Le Monde* (a paper devoted to the shipping interest, and much sought by sailors), will bring him to our residence.”

He handed me a paper, and I read thus:

CAUGHT—*In the Bois de Boulogne, early this morning of the — inst. (the morning of the murder), a very large, tawny Ourang-Outang of the Bornese species. The owner (who is ascertained to be a sailor, belonging to a Maltese vessel), may have the animal again, upon identifying it satisfactorily and paying a few charges arising from its capture and keeping. Call at No. —, Rue —, Faubourg, St. Germain — au troisieme.*

“How was it possible,” I asked, “that you should know the man to be a sailor, and belonging to a Maltese vessel?”

“I do *not* know it,” said Dupin. “I am not *sure* of it. Here, however, is a small piece of ribbon, which from its form, and from its greasy appearance, has evidently been used in tying the hair in one of those long *queues* of which sailors are so fond. Moreover, this knot is one which few besides sailors can tie, and is peculiar to the Maltese. I picked the ribbon up at the foot of the lightning-rod. It could not have belonged to either of the deceased. Now if, after all, I am wrong in my induction from this ribbon, that the Frenchman was a sailor

belonging to a Maltese vessel, still I can have done no harm in saying what I did in the advertisement. If I am in error, he will merely suppose that I have been misled by some circumstance into which he will not take the trouble to inquire. But if I am right, a great point is gained. Cognizant although innocent of the murder, the Frenchman will naturally hesitate about replying to the advertisement—about demanding the Ourang-Outang. He will reason thus:—‘I am innocent; I am poor; my Ourang-Outang is of great value—to one in my circumstances a fortune of itself—why should I lose it through idle apprehensions of danger? Here it is within my grasp. It was found in the Bois de Boulogne—at a vast distance from the scene of that butchery. How can it ever be suspected that a brute beast should have done the deed? The police are at fault—they have failed to procure the slightest clew. Should they ever trace the animal, it would be impossible to prove me cognizant of the murder, or to implicate me in guilt on account of that cognizance. Above all, *I am known*. The advertiser designates me as the possessor of the beast. I am not sure to what limit his knowledge may extend. Should I avoid claiming a property of so great value which it is known that I possess, I will render the animal, at least, liable to suspicion. It is not my policy to attract attention either to myself or to the beast. I will answer the advertisement, get the Ourang-Outang, and keep it close until this matter has blown over.’”

At this moment we heard a step upon the stairs.

“Be ready,” said Dupin, “with your pistols, but neither use them nor show them until at a signal from myself.”

The front door of the house had been left open, and the visitor had entered, without ringing, and advanced several steps upon the staircase. Now, however, he seemed to hesitate. Presently we heard him descending. Dupin was moving quickly to the door, when we again heard him coming up. He did not turn back a second time, but stepped up with decision, and rapped at the door of our chamber.

“Come in,” said Dupin, in a cheerful and hearty tone.

A man entered. He was a sailor, evidently,—a tall, stout, and muscular-looking person, with a certain dare-devil expression of countenance, not altogether unprepossessing. His face, greatly sunburnt, was more than half hidden by whisker and *mustachio*. He had with him a huge oaken cudgel, but appeared to be

otherwise unarmed. He bowed awkwardly, and bade us "good evening," in French accents, which, although somewhat Neufchatelish, were still sufficiently indicative of a Parisian origin.

"Sit down, my friend," said Dupin. "I suppose you have called about the Ourang-Outang. Upon my word, I almost envy you the possession of him, a remarkably fine, and no doubt a very valuable animal. How old do you suppose him to be?"

10 The sailor drew a long breath, with the air of a man relieved of some intolerable burden, and then replied, in an assured tone.

"I have no way of telling—but he can't be more than four or five years old. Have you got him here?"

"Oh no, we had no conveniences for keeping him here. He is at a livery stable in the Rue Dubourg, just by. You can get him in the morning. Of course you are prepared to identify the property?"

"To be sure I am, sir."

20 "I shall be sorry to part with him," said Dupin.

"I don't mean that you should be at all this trouble for nothing, sir," said the man. "Couldn't expect it. Am very willing to pay a reward for the finding of the animal—that is to say, anything in reason."

"Well," replied my friend, "that is all very fair, to be sure. Let me think!—what shall I have? Oh! I will tell you. My reward shall be this. You shall give me all the information in your power about these murders in the Rue Morgue."

30 Dupin said the last words in a very low tone, and very quietly. Just as quietly, too, he walked toward the door, locked it, and put the key in his pocket. He then drew a pistol from his bosom and placed it, without the least flurry, upon the table.

The sailor's face flushed up as if he were struggling with suffocation. He started to his feet and grasped his cudgel; but the next moment he fell back into his seat, trembling violently, and with the countenance of death itself. He spoke not a word. I pitied him from
40 the bottom of my heart.

"My friend," said Dupin, in a kind tone, "you are alarming yourself unnecessarily—you are indeed. We mean you no harm whatever. I pledge you the honor of a gentleman and of a Frenchman, that we intend you no injury. I perfectly well know that you are innocent of the atrocities in the Rue Morgue. It will not do,

however, to deny that you are in some measure implicated in them. From what I have already must know that I have had means of informing this matter—means of which you could not have dreamed. Now the thing stands thus. You had nothing which you could have avoided—not certainly, which renders you culpable. You were guilty of robbery, when you might have robbed with impunity. You have nothing to conceal. You have a reason for concealment. On the other hand, bound by every principle of honor to confess what you know. An innocent man is now imprisoned with that crime of which you can point out the perpetrator."

The sailor had recovered his presence of mind in a great measure, while Dupin uttered these words. His original boldness of bearing was all gone.

"So help me God," said he, after a brief pause, "I will tell you all I know about this affair,—but I do not ask you to believe one half I say—I would be a fool if I did. Still, I *am* innocent, and I will make my breast if I die for it."

What he stated was, in substance, this. He had made a voyage to the Indian Archipelago. At the end of which he formed one, landed at Borneo, and penetrated into the interior on an excursion of pleasure. His companion had captured the Ourang-Outang. While the companion dying, the animal fell into his own possession. After great trouble, occasioned by the intractable ferocity of his captive during the hunt, he at length succeeded in lodging it safely at a residence in Paris, where, not to attract toward it the unpleasant curiosity of his neighbors, he had carefully secluded, until such time as it should be removed from a wound in the foot, received from a soldier on board ship. His ultimate design was to sell it.

Returning home from some sailors' frolic one night, or rather in the morning of the murder, he had taken the beast occupying his own bed-room, into which he had broken from a closet adjoining, where it had, as was thought, securely confined. Razor fully lathered, it was sitting before a looking-glass, tempting the operation of shaving, in which

3 Neufchatelish, characteristic of Neuchâtel, a city in no

doubt previously watched its master through the key-hole of the closet. Terrified at the sight of so dangerous a weapon in the possession of an animal so ferocious, and so well able to use it, the man, for some moments, was at a loss what to do. He had been accustomed however, to quiet the creature, even in its fiercest moods, by the use of a whip, and to this he now resorted. Upon sight of it, the Ourang-Outang sprang at once through the door of the chamber, down the stairs, and thence, through a window, unfortunately open, into the street.

The Frenchman followed in despair; the ape, razor still in hand, occasionally stopping to look back and gesticulate at its pursuer, until the latter had nearly come up with it. It then again made off. In this manner the chase continued for a long time. The streets were profoundly quiet, as it was nearly three o'clock in the morning. In passing down an alley in the rear of the Rue Morgue, the fugitive's attention was arrested by a light gleaming from the open window of Madame L'Espanaye's chamber, in the fourth story of her house. Rushing to the building, it perceived the lightning-rod, clambered up with inconceivable agility, grasped the shutter, which was thrown fully back against the wall, and, by its means, swung itself directly upon the head-board of the bed. The whole feat did not occupy a minute. The shutter was kicked open again by the Ourang-Outang as it entered the room.

The sailor, in the meantime, was both rejoiced and perplexed. He had strong hopes of now recapturing the brute, as it could scarcely escape from the trap into which it had ventured, except by the rod, where it might be intercepted as it came down. On the other hand, there was much cause for anxiety as to what it might do in the house. This latter reflection urged the man still to follow the fugitive. A lightning-rod is ascended without difficulty, especially by a sailor; but, when he had arrived as high as the window, which lay far to his left, his career was stopped; the most that he could accomplish was to reach over so as to obtain a glimpse of the interior of the room. At this glimpse he nearly fell from his hold through excess of horror. Now it was that those hideous shrieks arose upon the night, which had startled from slumber the inmates of the Rue Morgue. Madame L'Espanaye and her daughter, habited in their night clothes, had apparently been occupied in arranging some papers in the iron chest already mentioned, which had

been wheeled into the middle of the room. It was open and its contents lay beside it on the floor. The victim must have been sitting with their backs toward the window; and, from the time elapsing between the ingress of the beast and the screams, it seems probable that it was not immediately perceived. The flapping of the shutter would naturally have been attributed to the wind.

As the sailor looked in, the gigantic animal had seized Madame L'Espanaye by the hair (which was loose, as she had been combing it), and was flourishing the razor about her face, in imitation of the motions of a barber. The daughter lay prostrate and motionless; she had swooned. The screams and struggles of the old lady (during which the hair was torn from her head) had the effect of changing the probably pacific purposes of the Ourang-Outang into those of wrath. With one determined sweep of its muscular arm it nearly severed her head from her body. The sight of blood inflamed its anger into frenzy. Gnashing its teeth, and flashing fire from its eyes, it flew upon the body of the girl, and imbedded its fearful talons in her throat, retaining its grasp until she expired. Its wandering and wild glances fell at this moment upon the head of the bed, over which the face of its master, rigid with horror, was just discernible. The fury of the beast, who no doubt bore still in mind the dreaded whip, was instantly converted into fear. Conscious of having deserved punishment, it seemed desirous of concealing its bloody deeds, and skipped about the chamber in an agony of nervous agitation; throwing down and breaking the furniture as it moved, and dragging the bed from the bedstead. In conclusion, it seized first the corpse of the daughter, and thrust it up the chimney, as it was found; then that of the old lady, which it immediately hurled through the window headlong.

As the ape approached the casement with its mutilated burden, the sailor shrank aghast to the rod, and, rather gliding than clambering down it, hurried at once home—dreading the consequences of the butchery, and gladly abandoning, in his terror, all solicitude about the fate of the Ourang-Outang. The words heard by the party upon the staircase were the Frenchman's exclamations of horror and affright, commingled with the fiendish jabberings of the brute.

I have scarcely anything to add. The Ourang-Outang

must have escaped from the chamber, by the rod, just before the breaking of the door. It must have closed the window as it passed through it. It was subsequently caught by the owner himself, who obtained for it a very large sum at the *Jardin des Plantes*. Le Bon was instantly released, upon our narration of the circumstances (with some comments from Dupin) at the *bureau* of the Prefect of Police. This functionary, however well disposed to my friend, could not altogether conceal his chagrin at the turn which affairs had taken, and was fain to indulge in a sarcasm or two, about the propriety of every person minding his own business.

"Let him talk," said Dupin, who had not thought it necessary to reply. "Let him discourse, it will ease his conscience. I am satisfied with having defeated him in

his own castle. Nevertheless, that he failed in the of this mystery, is by no means that matter for which he supposes it; for, in truth, our friend is somewhat too cunning to be profound. In him is no *stamen*. It is all head and no body, like that of the Goddess Laverna,—or, at best, all shoulders, like a codfish. But he is a good creature all. I like him especially for one master stroke by which he has attained his reputation for I mean the way he has '*de nier ce qui est, et de ce qui n'est pas*.'"

The Masque of the Red Death

Once the exposition has been presented in the opening three paragraphs, this story of the masque so orders its happenings as to make them increasingly horrifying. The prince and his associates are given only enough characteristics to show increasingly contagious reactions of terror. The account of the ball falls into three climactically arranged parts, each terrifying in its own peculiar way—paragraphs four and five, then paragraphs six and seven, and then the remainder of the tale. The "tone" is handled to give different emotional significance to each of these sections. The tone, by repeating symbols of death and of fleeting time, also adds to allegorical implications concerning the inevitable triumph of death over mankind.

The "Red Death" had long devastated the country. No pestilence had ever been so fatal, or so hideous. Blood was its avatar and its seal—the redness and the horror

of blood. There were sharp pains, and sudden and then profuse bleeding at the pores, with death. The scarlet stains upon the body, and especially upon the face, of the victim were the pest ban which shut out from the aid and from the sympathy of his fellow-men. And the whole seizure, progress, and termination of the disease were the incidents of half an hour.

But the Prince Prospero was happy and dauntless and sagacious. When his dominions were half desolated he summoned to his presence a thousand hale and hardy and hearty friends from among the knights and squire of his court, and with these retired to the deep seclusion of one of his castellated abbeys. This was an ancient and magnificent structure, the creation of the taste of his own eccentric yet august taste. A strong and lofty wall girdled it in. This wall had gates of iron. The king had never entered, brought furnaces and massy iron and welded the bolts. They resolved to leave their realm neither of ingress or egress to the sudden intrusion of the Red Death, nor of despair or of frenzy from within. The abbey was well provisioned. With such precautions the court could bid defiance to contagion. The external world could take care of itself. In the meantime it was folly to mind or to think. The prince had provided all the

Text: the *Broadway Journal*, July 19, 1845

of pleasure. There were buffoons, there were improvisatori, there were ballet-dancers, there were musicians, there was Beauty, there was wine. All these and security were within. Without was the Red Death.

It was toward the close of the fifth or sixth month of his seclusion, and while the pestilence raged most furiously abroad, that the Prince Prospero entertained his thousand friends at a masked ball of the most unusual magnificence.

It was a voluptuous scene, that masquerade. But first let me tell of the rooms in which it was held. There were seven—an imperial suite. In many palaces, however, such suites form a long and straight vista, while the sliding doors slide back nearly to the walls on either hand, so that the view of the whole extent is scarcely impeded. Here the case was very different, as might have been expected from the prince's love of the bizarre. The apartments were so irregularly disposed that the vision embraced but little more than one at a time. There was a sharp turn at every twenty or thirty yards, and at each turn a novel effect. To the right and left, in the middle of each wall, a tall and narrow Gothic window looked out upon a closed corridor which pursued the windings of the suite. These windows were of stained glass, whose color varied in accordance with the prevailing hue of the decorations of the chamber into which it opened. That at the eastern extremity was hung, for example, in blue—and vividly blue were its windows. The second chamber was purple in its ornaments and tapestries, and here the panes were purple. The third was green throughout, and so were the case-ments. The fourth was furnished and lighted with orange, the fifth with white, the sixth with violet. The seventh apartment was closely shrouded in black velvet tapestries that hung all over the ceiling and down the walls, falling in heavy folds upon a carpet of the same material and hue. But, in this chamber only, the color of the windows failed to correspond with the decorations. The panes here were scarlet—a deep blood-color. Now in no one of the seven apartments was there any lamp or candelabrum, amid the profusion of golden ornaments that lay scattered to and fro or depended from the roof. There was no light of any kind emanating from lamp or candle within the suite of chambers. But in the corridors that followed the suite there stood, opposite to each window, a heavy tripod, bearing a brazier of fire,

that projected its rays through the tinted glass and glaringly illumined the room. And thus were produced a multitude of gaudy and fantastic appearances. But in the western or black chamber the effect of the firelight that streamed upon the dark hanging through the blood-tinted panes was ghastly in the extreme, and produced so wild a look upon the countenances of those who entered that there were few of the company bold enough to set foot within its precincts at all.

It was in this apartment, also, that there stood against the western wall a gigantic clock of ebony. Its pendulum swung to and fro with a dull, heavy, monotonous clang; and when the minute hand made the circuit of the face, and the hour was to be stricken, there came from the brazen lungs of the clock a sound which was clear and loud and deep and exceedingly musical, but of so peculiar a note and emphasis that, at each lapse of an hour, the musicians of the orchestra were constrained to pause, momentarily, in their performance, to hearken to the sound, and thus the waltzers perforce ceased their evolutions; and there was a brief disconcert of the whole gay company; and, while the chimes of the clock yet rang, it was observed that the giddiest grew pale, and the more aged and sedate passed their hands over their brows as if in confused reverie or meditation. But when the echoes had fully ceased, a light laughter at once pervaded the assembly; the musicians looked at each other and smiled as if at their own nervousness and folly, and made whispering vows, each to the other, that the next chiming of the clock should produce in them no similar emotion and then, after the lapse of sixty minutes (which embrace three thousand and six hundred seconds of the Time that flies) there came yet another chiming of the clock, and then were the same disconcert and tremulousness and meditation as before.

But, in spite of these things, it was a gay and magnificent revel. The tastes of the prince were peculiar. He had a fine eye for colors and effects. He disregarded the *decora* of mere fashion. His plans were bold and fiery, and his conceptions glowed with barbaric luster. There are some who would have thought him mad. His fol-

1 improvisatori, composers and singers of extemporaneous songs • 18
irregularly disposed. The arrangement of the rooms is of a sort to
distress anyone with a tendency toward claustrophobia

lowers felt that he was not. It was necessary to hear and see and touch him to be *sure* that he was not.

He had directed, in great part, the movable embellishments of the seven chambers, upon occasion of this great fete; and it was his own guiding taste which had given character to the masqueraders. Be sure they were grotesque. There were much glare and glitter and piquancy and phantasm—much of what has been since seen in *Hernani*. There were arabesque figures with 10⁵ unsuited limbs and appointments. There were delirious fancies such as the madman fashions. There was much of the beautiful, much of the wanton, much of the bizarre, something of the terrible, and not a little of that which might have excited disgust. To and fro in the seven chambers there stalked, in fact, a multitude of dreams. And these—the dreams—writhe in and about, taking hue from the rooms, and causing the wild music of the orchestra to seem as the echo of their steps. And, anon, there strikes the ebony clock which stands in 20 the hall of the velvet. And then, for a moment, all is still, and all is silent save the voice of the clock. The dreams are stiff frozen as they stand. But the echoes of the chime die away—they have endured but an instant—and a light, half-subdued laughter floats after them as they depart. And now again the music swells, and the dreams live, and writhe to and fro more merrily than ever, taking hue from the many-tinted windows through which stream the rays from the tripods. But to the chamber which lies most westwardly of the seven, there 30 are now none of the maskers who venture; for the night is waning away, and there flows a ruddier light through the blood-colored panes; and the blackness of the sable drapery appals; and to him whose foot falls upon the sable carpet, there comes from the near clock of ebony a muffled peal more solemnly emphatic than any which reaches their ears who indulge in the more remote gaieties of the other apartments.

But these other apartments were densely crowded, and in them beat feverishly the heart of life. And the 40 revel went whirlingly on, until at length there commenced the sounding of midnight upon the clock. And then the music ceased, as I have told; and the evolutions of the waltzers were quieted; and there was an uneasy cessation of all things as before. But now there were twelve strokes to be sounded by the bell of the clock; and thus it happened, perhaps, that before the last echoes

of the last chime had utterly sunk into silence, there were many individuals in the crowd who had found it to become aware of the presence of a masker which had arrested the attention of no single individual before. And the rumor of this new presence spread itself whisperingly around, there arose from the whole company a buzz, or murmur, expressive of disapprobation and surprise—then, finally, a cry of horror, and of disgust.

In an assembly of phantasms such as I have described it may well be supposed that no ordinary appearance could have excited such sensation. In truth the masquerade license of the night was nearly unlimited; the figure in question had outHeroded Herod, beyond the bound of even the prince's indefinable decorum. There are chords in the hearts of the most virtuous which cannot be touched without emotion. In the jest which cannot be touched without emotion, there are matters of which no jest can make light. The whole company, indeed, seemed now deep in the costume and bearing of the strange creature; wit nor propriety existed. The figure was tall and shrouded from head to foot in the habiliments of the grave. The mask which concealed the visage was made so nearly to resemble the countenance of a dead corpse that the closest scrutiny must have had in detecting the cheat. And yet all this might have endured, if not approved, by the mad reveler. But the mummer had gone so far as to assume the aspect of the Red Death. His vesture was dabbled in blood, and his broad brow, with all the features of his face, was besprinkled with the scarlet horror.

When the eyes of Prince Prospero fell upon the spectral image (which with a slow and solemn movement, as if more fully to sustain its role, stalked to and fro among the waltzers) he was seen to be, in the first moment, with a strong shudder, seized with terror or distaste; but, in the next, his brow was dark with rage.

9 *Hernani* (1830), a lavishly costumed, romantic play by Victor Hugo. 43 the waltzers. It is important to know that, since it was considered the waltz an immoral dance, mention of waltzing was the depiction of revelry. 60 had outHeroded Herod, from Hamlet's speech to the players, meaning, in this case, gone beyond the extremes of this orgy."

"Who dares?" he demanded hoarsely of the courtiers who stood near him—"who dares insult us with this blasphemous mockery? Seize him and unmask him—that we may know whom we have to hang at sunrise, from the battlements!"

It was in the eastern or blue chamber in which stood the Prince Prospero as he uttered these words. They rang throughout the seven rooms loudly and clearly—for the prince was a bold and robust man, and the music had become hushed at the waving of his hand.

It was in the blue room where stood the prince, with a group of pale courtiers by his side. At first, as he spoke, there was a slight rushing movement of this group in the direction of the intruder, who at the moment was also near at hand, and now, with deliberate and stately step, made closer approach to the speaker. But from a certain nameless awe with which the mad assumptions of the mummer had inspired the whole party, there were found none who put forth hand to seize him; so that, unimpeded, he passed within a yard of the prince's person; and while the vast assembly as if with one impulse, shrank from the centers of the rooms to the walls, he made his way uninterruptedly, but with the same solemn and measured step which had distinguished him from the first, through the blue chamber to the purple—through the purple to the green—through the green to the orange—through this again to the white—and even thence to the violet, ere a decided movement had been

made to arrest him. It was then, however, that the Prince Prospero, maddening with rage and the shame of his own momentary cowardice, rushed hurried through the six chambers, while none followed him on account of a deadly terror that had seized upon all. He bore aloft a drawn dagger, and had approached, in rapid impetuosity, to within three or four feet of the retreating figure, when the latter, having attained the extremity of the velvet apartment, turned suddenly and confronted his pursuer. There was a sharp cry—and the dagger dropped gleaming upon the sable carpet, upon which instantly afterwards, fell prostrate in death the Prince Prospero. Then, summoning the wild courage of despair, a throng of the revelers at once threw themselves into the black apartment, and, seizing the mummer, whose tall figure stood erect and motionless within the shadow of the ebony clock, gasped in unutterable horror at finding the grave ceremonies and corpselike mask, which they handled with so violent a rudeness, untenanted by any tangible form.

And now was acknowledged the presence of the Red Death. He had come like a thief in the night. And one by one dropped the revelers in the blood-bedewed hall: of their revel, and died each in the despairing posture of his fall. And the life of the ebony clock went out with that of the last of the gay. And the flames of the tripod expired. And Darkness and Decay and the Red Death held illimitable dominion over all.

1842

The Cask of Amontillado

The thousand injuries of Fortunato I had borne as I best could; but when he ventured upon insult, I vowed revenge. You, who so well know the nature of my soul,

will not suppose, however, that I gave utterance to a threat. *At length* I would be avenged, this was a point definitely settled—but the very definitiveness with which it was resolved precluded the idea of risk. I must not only punish, but punish with impunity. A wrong is unredressed when retribution overtakes its redresser. It is equally unredressed when the avenger fails to make himself felt as such to him who has done the wrong.

It must be understood that neither by word nor deed had I given Fortunato cause to doubt my good will. I continued, as was my wont, to smile in his face, and he did not perceive that my smile *now* was at the thought of his immolation.

He had a weak point—this Fortunato—although in

other regards he was a man to be respected and even feared. He prided himself on his connoisseurship in wine. Few Italians have the true virtuoso spirit. For the most part their enthusiasm is adopted to suit the time and opportunity—to practice imposture upon the British and Austrian millionaires. In painting and gemmary, Fortunato, like his countrymen, was a quack—but in the matter of old wines he was sincere. In this respect I did not differ from him materially. I was skill-
10 ful in the Italian vintages myself, and bought largely whenever I could.

It was about dusk, one evening during the supreme madness of the carnival season, that I encountered my friend. He accosted me with excessive warmth, for he had been drinking much. The man wore motley. He had on a tight-fitting parti-striped dress, and his head was surmounted by the conical cap and bells. I was so pleased to see him that I thought I should never have done wringing his hand.

20 I said to him, "My dear Fortunato, you are luckily met. How remarkably well you are looking today! But I have received a pipe of what passes for Amontillado, and I have my doubts."

"How?" said he. "Amontillado? A pipe? Impossible! And in the middle of the carnival!"

"I have my doubts," I replied, "and I was silly enough to pay the full Amontillado price without consulting you in the matter. You were not to be found, and I was fearful of losing a bargain."

30 "Amontillado!"

"I have my doubts."

"Amontillado!"

"And I must satisfy them."

"Amontillado!"

"As you are engaged, I am on my way to Luchresi. If any one has a critical turn, it is he. He will tell me—"

"Luchresi cannot tell Amontillado from Sherry."

"And yet some fools will have it that his taste is a match for your own."

40 "Come, let us go."

"Whither?"

"To your vaults."

"My friend, no; I will not impose upon your good nature. I perceive you have an engagement. Luchresi—"

"I have no engagement;—come."

"My friend, no. It is not the engagement, but the severe cold with which I perceive you are afflicted. The

vaults are insufferably damp. They are incrust-
niter."

"Let us go, nevertheless. The cold is merely Amontillado! You have been imposed upon. For Luchresi, he cannot distinguish Sherry from tillado."

Thus speaking, Fortunato possessed himself of my arm. Putting on a mask of black silk, and drawing his *roquelaire* closely about my person, I suffered my hurrying companion to lead me to my palazzo.

There were no attendants at home, they had all gone out to make merry in honor of the time. I had told them that I should not return until the morning, and I had given them explicit orders not to stir from the house. These orders were sufficient, I well knew, to insure their immediate disappearance, one and all, as my back was turned.

I took from their sconces two flambeaus, and descended into the vaults. I bowed him through several rooms to the archway that led into the vaults, and I went down a long and winding staircase, requesting him to be cautious as he followed. We came at length to the foot of the descent, and stood together on the bare ground of the catacombs of the Montresors.

The gait of my friend was unsteady, and upon his cap jingled as he strode.

"The pipe," said he

"It is farther on," said I, "but observe the work which gleams from these cavern walls"

He turned towards me, and looked into my two filmy orbs that distilled the rheum of intoxication.

"Niter?" he asked at length.

"Niter," I replied. "How long have you suffered from this cough?"

"Ugh! ugh! ugh!—ugh! ugh! ugh!—ugh! ugh! ugh!—ugh! ugh! ugh!—ugh! ugh! ugh!"

My poor friend found it impossible to utter a word for many minutes.

"It is nothing," he said, at last.

"Come," I said, with decision, "we will go back to the house. Your health is precious. You are rich, respected, beloved; you are happy, as once I was. You are too good to be missed. For me it is no matter. We will

you will be ill, and I cannot be responsible. Besides, there is Luchresi—"

"Enough," he said; "the cough is a mere nothing; it will not kill me. I shall not die of a cough."

"True—true," I replied; "and, indeed, I had no intention of alarming you unnecessarily—but you should use all proper caution. A draught of this Medoc will defend us from the damp."

Here I knocked off the neck of a bottle which I drew from a long row of its fellows that lay upon the mold.

"Drink," I said, presenting him the wine.

He raised it to his lips with a leer. He paused and nodded to me familiarly, while his bells jingled.

"I drink," he said, "to the buried that repose around us."

"And I to your long life."

He again took my arm, and we proceeded.

"These vaults," he said, "are extensive."

"The Montresors," I replied, "were a great and numerous family."

"I forget your arms."

"A huge human foot d'or, in a field azure; the foot crushes a serpent rampant whose fangs are embedded in the heel."

"And the motto?"

"*Nemo me impune lacessit.*"

"Good!" he said.

The wine sparkled in his eyes and the bells jingled. My own fancy grew warm with the Medoc. We had passed through long walls of piled skeletons, with casks and puncheons intermingling, into the inmost recesses of the catacombs. I paused again, and this time I made bold to seize Fortunato by an arm above the elbow.

"The niter!" I said; "see, it increases. It hangs like moss upon the vaults. We are below the river's bed. The drops of moisture trickle among the bones. Come, we will go back ere it is too late. Your cough—"

"It is nothing," he said; "let us go on. But first, another draught of the Medoc."

I broke and reached him a flagon of De Grève. He emptied it at a breath. His eyes flashed with a fierce light. He laughed and threw the bottle upwards with a gesticulation I did not understand.

I looked at him in surprise. He repeated the movement—a grotesque one.

"You do not comprehend?" he said.

"Not I," I replied.

"Then you are not of the brotherhood."

"How?"

"You are not of the masons."

"Yes, yes," I said, "yes, yes."

"You? Impossible! A mason?"

"A mason," I replied.

"A sign," he said, "a sign."

"It is this," I answered, producing from beneath the folds of my *roquelane*, a trowel.

"You jest," he exclaimed, recoiling a few paces. "But let us proceed to the Amontillado."

"Be it so," I said, replacing the tool beneath the cloak and again offering him my arm. He leaned upon it heavily. We continued our route in search of the Amontillado. We passed through a range of low arches, descended, passed on, and, descending again, arrived at a deep crypt, in which the foulness of the air caused our flambeaus rather to glow than flame.

At the most remote end of the crypt there appeared another less spacious. Its walls had been lined with human remains, piled to the vault overhead, in the fashion of the great catacombs of Paris. Three sides of this interior crypt were still ornamented in this manner. From the fourth the bones had been thrown down, and lay promiscuously upon the earth, forming at one point a mound of some size. Within the wall thus exposed by the displacing of the bones, we perceived a still interior recess, in depth about four feet, in width three, in height six or seven. It seemed to have been constructed for no especial use within itself, but formed merely the interval between two of the colossal supports of the roof of the catacombs, and was backed by one of their circumscribing walls of solid granite.

It was in vain that Fortunato, uplifting his dull torch, endeavored to pry into the depth of the recess. Its termination the feeble light did not enable us to see.

"Proceed," I said, "herein is the Amontillado. As for Luchresi—"

"He is an ignoramus," interrupted my friend, as

7 Medoc, wine from a particular region in France • 21 arms, coat of arms. The coat of arms described by the narrator—a golden foot on a blue field, crushing a serpent—is symbolic, from his point of view, of the action of his story • 26 Nemo . . . lacessit. No one attacks me with impunity—a reiteration of the vengeful attitude of the narrator • 41 De Grève, more accurately, Grèves, a Bordeaux wine

he stepped unsteadily forward, while I followed immediately at his heels. In an instant he had reached the extremity of the niche, and finding his progress arrested by the rock stood stupidly bewildered. A moment more and I had fettered him to the granite. In its surface were two iron staples, distant from each other about two feet, horizontally. From one of these depended a short chain, from the other a padlock. Throwing the links about his waist, it was but the work of a few
10 seconds to secure it. He was too much astounded to resist. Withdrawing the key, I stepped back from the recess.

"Pass your hand," I said, "over the wall; you cannot help feeling the niter. Indeed it is *very* damp. Once more let me *implore* you to return. No? Then I must positively leave you. But I must first render you all the little attentions in my power."

"The Amontillado!" ejaculated my friend, not yet recovered from his astonishment.

20 "True," I replied; "the Amontillado."

As I said these words I busied myself among the pile of bones of which I have before spoken. Throwing them aside, I soon uncovered a quantity of building stone and mortar. With these materials and with the aid of my trowel, I began vigorously to wall up the entrance of the niche.

I had scarcely laid the first tier of the masonry when I discovered that the intoxication of Fortunato had in a great measure worn off. The earliest indication I had
30 of this was a low moaning cry from the depth of the recess. It was *not* the cry of a drunken man. There was then a long and obstinate silence. I laid the second tier, and the third, and the fourth; and then I heard the furious vibrations of the chain. The noise lasted for several minutes, during which, that I might hearken to it with the more satisfaction, I ceased my labors and sat down upon the bones. When at last the clanking subsided, I resumed the trowel, and finished without interruption the fifth, the sixth, and the seventh tier.
40 The wall was now nearly upon a level with my breast. I again paused, and holding the flambeaus over the mason work, threw a few feeble rays upon the figure within.

A succession of loud and shrill screams, bursting suddenly from the throat of the chained form, seemed to thrust me violently back. For a brief moment I hesi-

tated—I trembled. Unsheathing my rapier, I began to grope with it about the recess; but the thought instant reassured me. I placed my hand upon the fabric of the catacombs, and felt satisfied. I reaped the wall. I replied to the yells of him who cried I re-echoed—I aided—I surpassed them in volume of strength. I did this, and the clamor grew still.

It was now midnight, and my task was drawing to a close. I had completed the eighth, the ninth, tenth tier. I had finished a portion of the last eleventh; there remained but a single stone to set and plastered in. I struggled with its weight; I placed it partially in its destined position. But now from out the niche a low laugh that erected icicles upon my head. It was succeeded by a sad voice in which I had difficulty in recognizing as that of the Fortunato. The voice said—

"Ha! ha! ha!—he! he! he!—a very good joke—an excellent jest. We will have many a riot about it at the palazzo—he! he! he!—over our heads! he! he! he!"

"The Amontillado!" I said.

"He! he! he!—he! he! he!—yes, the Amontillado is it not getting late? Will not they be awaiting the palazzo,—the Lady Fortunato and the rest—be gone."

"Yes," I said, "let us be gone."

"For the love of God, Montresor!"

"Yes," I said, "for the love of God!"

But to these words I hearkened in vain for I grew impatient. I called aloud—

"Fortunato!"

No answer. I called again—

"Fortunato!"

No answer still. I thrust a torch through the opening aperture and let it fall within. There came in return only a jingling of the bells. My head sick—on account of the dampness of the catacombs—I hastened to make an end of my labor. I forced the stone into its position; I plastered it up. Against the new masonry I re-erected the old rampart of bones. For the half of a century no mortal has disturbed it.
pace requiescat.

First published in 1829, this poem, like many by Poe, underwent a great deal of revision. In 1831 it was extended to about three times its original length; then, in later versions (1843, 1845), it returned to approximately its first form. Professor Killis Campbell says that the passages added in 1831 "are largely personal in nature—a fact which probably explains their omission in subsequent editions." Equally important, perhaps, is the fact that they were unduly repetitious. In a letter to John Neal, Poe characterized this poem as the "best thing," in every respect save "sound," in the 1829 volume. He was "certain," he said, that the five opening lines of the second stanza had "never been surpassed." The theme is much like that of Byron's "To Romance": in each poem the author renounces romance and swears allegiance to truth.

Romance, who loves to nod and sing,
 With drowsy head and folded wing,
 Among the green leaves as they shake
 Far down within some shadowy lake,
 To me a painted paroquet
 Hath been—a most familiar bird—
 Taught me my alphabet to say,
 To lisp my very earliest word,
 While in the wild wood I did lie,
 A child—with a most knowing eye.

10

Of late, eternal Condor years
 So shake the very Heaven on high
 With tumult as they thunder by,
 I have no time for idle cares
 Through gazing on the unquiet sky.
 And when an hour with calmer wings
 Its down upon my spirit flings—
 That little time with lyre and rhyme
 To while away—forbidden things!
 My heart would feel to be a crime
 Unless it trembled with the strings.

20

1829

Probably composed in the spring or summer of 1829, "Sonnet—To Science" echoes ideas of John Keats and Samuel Taylor Coleridge. "Do not all charms fly," asked Keats, in "Lamia," "at the merest touch of cold philosophy?" The opening lines of "Lamia" show some interesting parallels to lines 9-14 of this poem. Similarly, in Chapter XIV of his *Biographia Literaria*, Coleridge had discoursed on science versus poetry.

Science' true daughter of Old Time thou art!
 Who alterest all things with thy peering eyes,
 Why preyest thou thus upon the poet's heart,
 Vulture, whose wings are dull realities?
 How should he love thee? or how deem thee wise,
 Who wouldst not leave him in his wandering
 To seek for treasure in the jewelled skies,
 Albeit he soared with an undaunted wing?
 Hast thou not dragged Diana from her car?
 And driven the Hamadryad from the wood
 To seek a shelter in some happier star?
 Hast thou not torn the Naiad from her flood,
 The Elfin from the green grass, and from me
 The summer dream beneath the tamarind tree?

1829

To Helen

Although Poe tacitly sanctioned the claim that this poem was written when he was only fourteen, it seems more likely that it was produced between 1829 and the year when it was published, 1831. It is, nevertheless, a tribute to Poe's boyhood idol, Mrs. Jane Stith Stanard of Richmond, who died in 1824, and whom he called "the first pure ideal love of my soul." As the notes suggest, some lines were felicitously revised in the 1845 edition, here reproduced.

The unity of this poem derives from both its feeling and its metaphorical expression. The imagery not only makes its heroine a haven for a desperate wanderer in darkness; it also increasingly associates Helen's type of classical beauty with the immortal splendor of Greece and Rome. In the first stanza, Helen's beauty is like "barks of yore," which carried the wanderer to his homeland, and the words "Nicean," "perfumed," and "weary, wayworn wanderer" (Ulysses) vaguely connote classical associations. In stanza two the classical quality of Helen's beauty is more clearly suggested, and "home" becomes "the glory that was Greece and the grandeur that was Rome." These opening stanzas hark back to the past; the third stanza, in the present tense, likens Helen to a statue standing in a lighted window-niche, thus attributing to her not only physical beauty but also immortal beauty of soul.

Helen, thy beauty is to me
 Like those Nicean barks of yore,
 That gently, o'er a perfumed sea,
 The weary, wayworn wanderer bore
 To his own native shore.

On desperate seas long wont to roam,
 Thy hyacinth hair, thy classic face,
 Thy Naiad airs, have brought me home
 To the Glory that was Greece
 And the grandeur that was Rome.

Lo! in yon brilliant window-niche
 How statue-like I see thee stand,
 The agate lamp within thy hand!
 Ah, Pysche, from the regions which
 Are Holy Land!

1829?•1831

The City in the Sea

Lo! Death has reared himself a throne
 In a strange city lying alone
 Far down within the dim West,
 Where the good and the bad and the worst
 and the best

Have gone to their eternal rest.
 There shrines and palaces and towers
 (Time-eaten towers that tremble not)
 Resemble nothing that is ours.
 Around, by lifting winds forgot,
 Resignedly beneath the sky
 The melancholy waters lie.

No rays from the holy heaven come down
 On the long night-time of that town,
 But light from out the lurid sea
 Streams up the turrets silently,
 Gleams up the pinnacles far and free:
 Up domes, up spires, up kingly halls;
 Up fanes, up Babylon-like walls,
 Up shadowy long-forgotten bowers
 Of sculptured ivy and stone flowers,
 Up many and many a marvelous shrine
 Whose wreathed friezes intertwine
 The viol, the violet, and the vine.

Resignedly beneath the sky
 The melancholy waters lie.
 So blend the turrets and shadows there
 That all seem pendulous in air,
 While from a proud tower in the town
 Death looks gigantically down.

There open fanes and gaping graves
 Yawn level with the luminous waves;
 But not the riches there that lie
 In each idol's diamond eye,—
 Not the gayly-jewelled dead,
 Tempt the waters from their bed;
 For no ripples curl, alas,

To Helen • 2 Nicean, a word about which there has scholarly argument. The suggestion of Mr. J. J. Jones that from the Latin poetry of Catullus seems likely • 7 hyacinth to "Hyacinthine," a Homeric epithet for hair, probably meaning • 9 To the Glory . . . Rome, read, in the 1831 version beauty of fair Greece and the grandeur of old Rome" • window-niche, in the original version, was "that little win The change set off the heroine in light from the poet in d agate lamp, in the original, was "golden scroll." The more of an impression of permanence and adds to the lig with the figure of the woman

Along that wilderness of glass;
 No swellings tell that winds may be
 Upon some far-off happier sea;
 No heavings hint that winds have been
 On seas less hideously serene!

40

But lo, a stir is in the air!
 The wave—there is a movement there!
 As if the towers had thrust aside,
 In slightly sinking, the dull tide;
 As if their tops had feebly given
 A void within the filmy Heaven!
 The waves have now a redder glow,
 The hours are breathing faint and low;
 And when, amid no earthly moans,
 Down, down that town shall settle hence,
 Hell, rising from a thousand thrones,
 Shall do it reverence.

1831

Israfel

Poe, in the motto, took a few liberties with the description of Israfel in Sale's "Preliminary Discourse" on the Koran, thereby making the phrases of the motto more appropriate than the original phrases had been. The words added in this revision, "whose heart-strings are a lute," were probably suggested by a passage in a poem by Béranger, also used as a motto for "The Fall of the House of Usher."

The song embodies some of Poe's theories about poetry—that a true poet writes from his heart, that his song is melodious and inspiring. The final stanzas voice despair concerning a poet's hampering environment.

And the angel Israfel, whose heart-strings are a lute, and who has the sweetest voice of all God's creatures.—KORAN

In Heaven a spirit doth dwell
 "Whose heart-strings are a lute;"
 None sing so wildly well

As the angel Israfel,
 And the giddy stars (so legends tell)
 Ceasing their hymns, attend the spell
 Of his voice, all mute.

Tottering above
 In her highest noon,
 The enamoured moon
 Blushes with love,
 While, to listen, the red levin
 (With the rapid Pleiads, even,
 Which were seven,)
 Pauses in Heaven.

And they say (the starry choir
 And the other listening things)
 That Israfeli's fire
 Is owing to that lyre
 By which he sits and sings—
 The trembling living wire
 Of those unusual strings.

21

But the skies that angel trod,
 Where deep thoughts are a duty—
 Where Love's a grown-up God—
 Where the Houri glances are
 Imbued with all the beauty
 Which we worship in a star.

Therefore, thou art not wrong,
 Israfeli, who despisest
 An unimpassioned song,
 To thee the laurels belong,
 Best bard, because the wisest!
 Merrily live, and long!

30

The ecstasies above
 With thy burning measures suit—
 Thy grief, thy joy, thy hate, thy love,
 With the fervour of thy lute—
 Well may the stars be mute!

Yes, Heaven is thine; but this
 Is a world of sweets and sour;

40

Our flowers are merely—flowers,
And the shadow of thy perfect bliss
Is the sunshine of ours.

If I could dwell
Where Israfel
Hath dwelt, and he where I,
He might not sing so wildly well
A mortal melody,
While a bolder note than this might swell 50
From my lyre within the sky.

1831

The Coliseum

This poem, which was at one time a soliloquy of the hero of Poe's drama, *Politian*, was first published in *The Visitor* in 1833. It is interesting in two ways: as evidence of Byron's influence on Poe and as the earliest known example of Poe's use of blank verse. The first two stanzas announce the spell to be worked by the ancient ruin; the second two show the "silence, desolation, and dim night" with a series of appropriate images; and the final stanza evokes the light and the melody which give the scene immortal power.

Type of the antique Rome! Rich reliquary
Of lofty contemplation left to Time
By buried centuries of pomp and power!
At length—at length—after so many days
Of weary pilgrimage and burning thirst
(Thirst for the springs of lore that in thee lie),
I kneel, an altered and an humble man,
Amid thy shadows, and so drink within
My very soul thy grandeur, gloom, and glory!

Vastness! and Age! and Memories of Eld!
Silence! and Desolation! and dim Night!
I feel ye now—I feel ye in your strength—
O spells more sure than e'er Judaen king
Taught in the gardens of Gethsemane!

O charms more potent than the rapt Chaldee
Ever drew down from out the quiet stars!

Here, where a hero fell, a column falls!
Here, where the mimic eagle glared in gold,
A midnight vigil holds the swarthy bat!
Here, where the dames of Rome their gilded hair
Waved to the wind, now wave the reed and the
Here, where on golden throne the monarch lolled
Glides, spectre-like, unto his marble home,
Lit by the wan light of the horned moon,
The swift and silent lizard of the stones!

But stay! these walls—these ivy-clad arcades—
These mouldering plinths—these sad and black
sh

These vague entablatures—this crumbling frieze
These shattered cornices—this wreck—this ruin
These stones—alas! these gray stones—are they
All of the famed and the colossal left
By the corrosive Hours to Fate and me?

"Not all"—the Echoes answer me—"not all!
Prophetic sounds and loud, arise forever
From us, and from all Ruin, unto the wise,
As melody from Memnon to the Sun.
We rule the hearts of mightiest men—we rule
With a despotic sway all giant minds.
We are not impotent—we pallid stones.
Not all our power is gone—not all our fame—
Not all the magic of our high renown—
Not all the wonder that encircles us—
Not all the mysteries that in us lie—
Not all the memories that hang upon
And cling around about us as a garment,
Clothing us in a robe of more than glory."

1 Type, emblem • 13 Judaen king, Christ • 14 Gethsemane garden near Jerusalem which was the scene of the agony of Christ, as recorded in Matthew 26 36 • 15 Chaldee, the fame of the Chaldeans as astrologers and wizards • 18 the standard of the Roman legions • 20 gilded hair, the gilt wigs worn by fashionable Roman ladies, and continuation of departed gold with the vanished folk of the ancient 36 Memnon. See note, p. 504. His statue was reputed to harplike sound when touched by the rays of the rising sun

This song first appeared, without title, in a story published in January 1834. After numerous revisions, it appeared in 1845 with the present text and title. The most fortunate revision discarded this final stanza which had reduced a melodious and moving poem to the level of sentimentality:

Alas! for that accursed time
They bore thee o'er the billow,
From Love to titled age and crime,
And an unholy pillow—
From me, and from our misty clime,
Where weeps the silver willow!

Thou wast all that to me, love,
For which my soul did pine:
A green isle in the sea, love,
A fountain and a shrine,
All wreathed with fairy fruits and flowers,
And all the flowers were mine.

Ah, dream too bright to last!
Ah, starry Hope, that didst arise
But to be overcast!
A voice from out the Future cries,
"On! on!"—but o'er the Past
(Dim gulf!) my spirit hovering lies
Mute, motionless, aghast!

For, alas! alas! with me
The light of Life is o'er!
No more—no more—no more—
(Such language holds the solemn sea
To the sands upon the shore)
Shall bloom the thunder-blasted tree,
Or the stricken eagle soar!

And all my days are trances,
And all my nightly dreams
Are where thy gray eye glances,
And where thy footstep gleams—
In what ethereal dances,
By what eternal streams.

1833-1834

About the phrase "the corporate Silence" in line 10 of the irregular sonnet, Professor Campbell wrote this illuminating note: "That is, I take it, the physical death, the death which we can perceive with the senses. His shadow (l. 10) incorporate Silence, is, then, to be construed as the tyrant that rules in the nether world, in which the spirits of the unrighteous remain till the Day of Judgment."

There are some qualities—some incorporate things,
That have a double life, which thus is made
A type of that twin entity which springs
From matter and light, evinced in solid and shade.
There is a two-fold *Silence*—sea and shore—
Body and soul. One dwells in lonely places,
Newly with grass o'ergrown, some solemn graces,
Some human memories and tearful lore,
Render him terrorless: his name's "No More."
He is the corporate Silence: dread him not!
No power hath he of evil in himself;
But should some urgent fate (untimely lot!)
Bring thee to meet his shadow (nameless elf,
That haunteth the lone regions where hath trod
No foot of man), commend thyself to God!

1841

Dream-Lana

In this poem, published in *Graham's Magazine*, June 1, 1844, Poe hit upon what critics called his later manner—the repetitive and rhythmic style of such lyrical works as "The Raven" and "Ulalume." The romantic depiction of a land "out of space, out of time" is representative of many

of Poe's poetic descriptions. The identification of the land as the kingdom of death adds a touch highly characteristic of the author.

By a route obscure and lonely,
Haunted by ill angels only,
Where an Eidolon, named NIGHT,
On a black throne reigns upright
I have reached these lands but newly
From an ultimate dim Thule—
From a wild weird clime that lieth, sublime
Out of SPACE—out of TIME

Bottomless vales and boundless floods
And chasms, and caves, and Titan woods
With forms that no man can discover
For the tears that drip all over
Mountains toppling evermore
Into seas without a shore,
Seas that restlessly aspire,
Surging, unto skies of fire;
Lakes that endlessly outspread
Their lone waters, lone and dead,—
Their still waters, still and chilly
With the snows of the lolling lily.

10

By the lakes that thus outspread
Their lone waters, lone and dead,—
Their sad waters, sad and chilly
With the snows of the lolling lily,—
By the mountains—near the river
Murmuring lowly, murmuring ever,—
By the grey woods,—by the swamp
Where the road and the newt encamp,—
By the dismal tarns and pools

Where dwell the Ghouls,—
By each spot the most unholy—
In each nook most melancholy,—
There the traveller meets, aghast,
Sheeted Memories of the Past—
Shrouded forms that start and sigh
As they pass the wanderer by—
White-robed forms of friends long given,
In agony, to the Earth—and Heaven

For the heart whose woes are legion
'Tis a peaceful, soothing region—
For the spirit that walks in shadow
'Tis—oh, 'tis an Eldorado!
But the traveller, travelling through it,
May not—dare not openly view it,
Never its mysteries are exposed
To the weak human eye unclosed,
So wills its King, who hath forbid
The uplifting of the fringed lid.
And thus the sad Soul that here passes
Beholds it but through darkened glasses

By a route obscure and lonely,
Haunted by ill angels only,
Where an Eidolon, named NIGHT,
On a black throne reigns upright.
I have wandered home but newly
From this ultimate dim Thule

3 Eidolon, phantom • 3 Night, here personified, as in
by Poe and others, as Death • 6 ultimate dim Thule
ultima Thule, the farthest land • 10 Titan, gigantic an
30 Ghouls, demons which rob graves and feed upon corps
dorado, a legendary place abounding in gold

20

The Raven

When, in 1841, Poe reviewed Dickens' *Barnaby Rudge*, he said: "The raven [in this novel], too, intensely amusing as it is, might have been made, more than we now see it, a portion of the conception of the fantastic Barnaby. Its croakings might have been prophetically heard in the course of the drama. Its character might have performed, in regard to that of the idiot, much the same part as does, in music, the accompaniment in respect to the air." This passage has led to the suggestion that, as early as 1841, Poe had some inklings of the sort of story told in his most famous poem. The best deduction from contradictory data regarding the time he composed the poem, however, sets the date of beginning composition not earlier than 1842 and the date of completion not before the middle of 1844.

"The Philosophy of Composition," regardless of its literal accuracy as an account of the writing of the poem, offers most illuminating suggestions about the structure and the thought.

Once upon a midnight dreary, while I pondered, weak
and weary,
Over many a quaint and curious volume of forgotten
lore—
While I nodded, nearly napping, suddenly there came
a tapping,
As of some one gently rapping, rapping at my chamber
door.
"Tis some visitor," I muttered, "tapping at my chamber
door—
Only this and nothing more."

Ah, distinctly I remember it was in the bleak December;
And each separate dying ember wrought its ghost upon
the floor.
Eagerly I wished the morrow;—vainly I had sought to
borrow
From my books surcease of sorrow—sorrow for the lost
Lenore—

For the rare and radiant maiden whom the angels name
Lenore—
Nameless *here* for evermore.

And the silken, sad, uncertain rustling of each purple
curtain
Thrilled me—filled me with fantastic terrors never felt
before;
So that now, to still the beating of my heart, I stood
repeating
"Tis some visitor entreating entrance at my chamber
door,
Some late visitor entreating entrance at my chamber
door;
This it is and nothing more."

Presently my soul grew stronger, hesitating then no
longer,
"Sir," said I, "or Madam, truly your forgiveness
implore
But the fact is I was napping, and so gently you came
rapping,
And so faintly you came tapping, tapping at my chamber
door,
That I scarce was sure I heard you"—here I opened wide
the door,—
Darkness there and nothing more.

Deep into that darkness peering, long I stood there
wondering, fearing,
Doubting, dreaming dreams no mortals ever dared to
dream before:
But the silence was unbroken, and the stillness gave no
token,
And the only word there spoken was the whispered
word, "Lenore?"
This I whispered, and an echo murmured back the word,
"Lenore!"
Merely this and nothing more.

Back into the chamber turning, all my soul within me
burning,
Soon again I heard a tapping somewhat louder than
before.

Text: the 1845 version as corrected by the author in his personal copy

"Surely," said I, "surely that is something at my window
lattice;
Let me see, then, what thereat is, and this mystery explore;
Let my heart be still a moment and this mystery explore:
'Tis the wind and nothing more!"

Open here I flung the shutter, when, with many a flirt
and flutter,
In there stepped a stately Raven of the saintly days of
yore;
Not the least obeisance made he; not a minute stopped
or stayed he,
But with mien of lord or lady, perched above my
chamber door,
Perched upon a bust of Pallas just above my chamber
door:
Perched, and sat, and nothing more.

Then this ebon bird beguiling all my fancy into smiling
By the grave and stern decorum of the countenance it
wore,
"Though thy crest be shorn and shaven, thou," I said, "art
sure no craven,
Ghastly grim and ancient Raven wandering from the
Nightly shore—
Tell me what thy lordly name is on the Night's Plutonian
shore!"
Quoth the Raven "Nevermore."

Much I marveled this ungainly fowl to hear discourse
so plainly,
Though its answer little meaning—little relevancy bore, ⁵⁰
For we cannot help agreeing that no living human being
Ever yet was blessed with seeing bird above his chamber
door,
Bird or beast upon the sculptured bust above his chamber
door,
With such name as "Nevermore."

But the Raven, sitting lonely on the placid bust, spoke
only
That one word, as if his soul in that one word he did
outpour,
Nothing further then he uttered, not a feather then he
fluttered,
Till I scarcely more than muttered,—“Other friends
have flown before;

On the morrow *he* will leave me, as my Hope
flown before."

Then the bird said "Nevermore."

Startled at the stillness broken by reply so aptly
"Doubtless," said I, "what it utters is its only
store,
Caught from some unhappy master whom un-
Disaster
Followed fast and followed faster till his
burden bore—
Till the dirges of his Hope that melancholy bur-
Of 'Never—nevermore.'"

But the Raven still beguiling all my fancy into
Straight I wheeled a cushioned seat in front of
bust and door;
Then, upon the velvet sinking, I betook myself
Fancy unto fancy, thinking what this ominous
yore,
What this grim, ungainly, ghastly, gaunt, and
bird of yore
Meant in croaking "Nevermore."

This I sat engaged in guessing, but no syllable
To the fowl whose fiery eyes now burned into my
core;
This and more I sat divining, with my head
reclining
On the cushion's velvet lining that the lamp-light
o'er,
But whose velvet violet lining with the lamp-light
ing o'er
She shall press, ah, nevermore!

Then, methought, the air grew denser, perfum'd
an unseen censer
Swung by Seraphim whose foot-falls tinkled on
floor.

41 *Pallas*, Pallas Athene, the goddess of wisdom • 43 *c*
substituted for the "all my sad soul" of an earlier ver-
gloated. "Gloat" has as one of its unusual meanings
light" • 80 *Seraphim whose foot-falls*, a correction
whose faint foot-falls" • 80 *tinkled*, defended by Po-
description of foot-falls, "because I saw that it had
gested to my mind by the sense of the supernatural
was, at the moment, filled"

"Wretch," I cried, "thy God hath lent thee—by these
angels he hath sent thee
Respite—respite and nepenthe, from thy memories of
Lenore,
Quaff, oh quaff this kind nepenthe and forget this lost
Lenore!"
Quoth the Raven "Nevermore."

"Prophet!" said I, "thing of evil! prophet still, if bird
or devil!
Whether Tempter sent, or whether tempest tossed thee
here ashore,
Desolate yet all undaunted, on this desert land enchanted—
On this home by Horror haunted—tell me truly, I
implore
Is there—*is* there balm in Gilead?—tell me—tell me. I
implore!"
Quoth the Raven "Nevermore."

90

"Prophet!" said I, "thing of evil—prophet still, if bird
or devil!
By that Heaven that bends above us, by that God we
both adore,
Tell this soul with sorrow laden if, within the distant
Aidenn,
It shall clasp a sainted maiden whom the angels name
Lenore—

Clasp a rare and radiant maiden whom the angels name
Lenore!"

Quoth the Raven "Nevermore."

"Be that word our sign of parting, bird or fiend
shrieked, up-starting

"Get thee back into the tempest and the Night's Plutonian
shore!"

Leave no black plume as a token of that lie thy soul hath
spoken!

Leave my loneliness unbroken! quit the bust above
door!

Take thy beak from out my heart, and take thy foot
from off my door!"

Quoth the Raven "Nevermore."

And the Raven, never flitting, still is sitting, *still* is sitting
On the pallid bust of Pallas just above my chamber door
And his eyes have all the seeming of a demon's that
dreaming,

And the lamplight o'er him streaming throws his shadow
on the floor,

And my soul from out that shadow that lies floating
on the floor

Shall be lifted—nevermore!

11

Ulalume

For a time after the first publication of "Ulalume" (*American Whig Review*, December 1847), Poe liked the poem best without the tenth stanza. In his final published version of the poem, however, the last ten lines were included, and they therefore appear in this text.

The first nine stanzas build up admirably the tale of growing uneasiness, and a growing perception of the

89 balm in Gilead. See Jeremiah 8:22 • 93 Aidenn, a place of pleasure—variant of Eden or Aden • 106 shadow, justified by Poe thus: "For the purposes of poetry it is quite sufficient that a thing possible, or at least that the improbability be not offensively glaring. It is true that in several ways, the lamp might have thrown the bird's shadow on the floor. My conception was that of the bracket candelabrum affixed against the wall, high up above the door and bust. . . ."

cause of that uneasiness, on the part of the narrator. Then comes a stanza which, so far as a large number of readers are concerned, hovers so close to the ridiculous as to spoil the effect. Perhaps Poe added the final stanza, as he said he did the final stanzas of "The Raven," to avoid repelling "the artistical eye" with "a certain hardness and nakedness." Whatever his reason for writing the last stanza, many will feel that his impulse to drop it was sounder than his final impulse.

The skies they were ashen and sober,
 The leaves they were crisped and sere,
 The leaves they were withering and sere,
 It was night in the lonesome October
 Of my most immemorial year,
 It was hard by the dim lake of Auber,
 In the misty mid region of Weir,
 It was down by the dank tarn of Auber,
 In the ghoul-haunted woodland of Weir.

Here once, through an alley Titanic
 Of cypress, I roamed with my Soul—
 Of cypress, with Psyche, my Soul.
 These were days when my heart was volcanic
 As the scoriac rivers that roll,
 As the lavas that restlessly roll
 Their sulphurous currents down Yaanek
 In the ultimate climes of the Pole,
 That groan as they roll down Mount Yaanek
 In the realms of the Boreal Pole

Our talk had been serious and sober,
 But our thoughts they were palsied and sere,
 Our memories were treacherous and sere,
 For we knew not the month was October,
 And we marked not the night of the year,
 (Ah, night of all nights in the year!)
 We noted not the dim lake of Auber
 (Though once we had journeyed down here),
 Remembered not the dank tarn of Auber,
 Nor the ghoul-haunted woodland of Weir.

And now, as the night was senescent
 And star-dials pointed to morn,
 As the star-dials hinted of morn,

At the end of our path a liquescent
 And nebulous lustre was born,
 Out of which a miraculous crescent
 Arose, with a duplicate horn,
 Astarte's bediamonded crescent
 Distinct with its duplicate horn.

And I said—"She is warmer than Dian:
 She rolls through an ether of sighs,
 She revels in a region of sighs
 She has seen that the tears are not dry on
 These cheeks, where the worm never dies,
 And has come past the stars of the Lion
 To point us the path to the skies,
 To the Lethean peace of the skies.
 Come up, in despite of the Lion,
 To shine on us with her bright eyes:
 Come up through the lair of the Lion,
 With love in her luminous eyes."

But Psyche, uplifting her finger,
 Said—"Sadly this star I mistrust,
 Her pallor I strangely mistrust:
 Oh, hasten!—oh, let us not linger!
 Oh, fly!—let us fly!—for we must."
 In terror she spoke, letting sink her
 Wings till they trailed in the dust;
 In agony sobbed, letting sink her
 Plumes till they trailed in the dust,
 Till they sorrowfully trailed in the dust.

I replied—"This is nothing but dreaming:
 Let us on by this tremulous light!
 Let us bathe in this crystalline light!

6 *Auber*, a geographic name, like *Weir* and *Yaanek* in the 1 follow, evidently invented by Poe • 11 *cypress*, a species often planted about tombs. The occurrence of an alley of anticipates the narrator's grim discovery • 14 *scoriac*, a word harking back to "ashen," "crisped," and "sere" in stanza, words suggestive of burning • 19 *Boreal*, northern, the suggestion of the blighting cold of October with the burniness of the aurora borealis • 37 *Astarte*, or *Ashtoreth*, Phoenician goddess associated with earthly love. See note, p. 667 • 39 *Dian*, goddess of the moon, with the Romans, the chaste huntress of pure love • 43 *where . . . dies*. See Isaiah 66:24 • 44 constellation of Leo, here used to signify danger • 52 *I* This phrase of *Psyche* forecasts the distressing discovery at the poem

Its sibyllic splendor is beaming
 With hope and in beauty tonight:
 See, it flickers up the sky through the night!
 Ah, we safely may trust to its gleaming,
 And be sure it will lead us aright:
 We safely may trust to a gleaming
 That cannot but guide us aright,
 Since it flickers up to Heaven through the night."

70

Thus I pacified Psyche and kissed her,
 And tempted her out of her gloom,
 And conquered her scruples and gloom;
 And we passed to the end of the vista,
 But were stopped by the door of a tomb,
 By the door of a legended tomb,
 And I said—"What is written, sweet sister,
 On the door of this legended tomb?"
 She replied—"Ulalume—Ulalume—
 'Tis the vault of thy lost Ulalume!"

80

Then my heart it grew ashen and sober
 As the leaves that were crisped and sere,
 As the leaves that were withering and sere,
 And I cried—"It was surely October
 On this very night of last year
 That I journeyed—I journeyed down here!—
 That I brought a dread burden down here—
 On this night of all nights in the year,
 Ah, what demon has tempted me here?
 Well I know, now, this dim lake of Auber,
 This misty mid region of Weir:
 Well I know, now, this dank tarn of Auber,
 This ghoulish-woodland of Weir.

90

Said we, then—the two, then: "Ah can it
 Have been that the woodlandish ghouls—
 The pitiful, the merciful ghouls—
 To bar up our way and to ban it
 From the secret that lies in these wolds—
 From the thing that lies hidden in these wolds—
 Have drawn up the spectre of a planet
 From the limbo of lunar souls—
 This sinfully scintillant planet
 From the Hell of the planetary souls?"

1847

Written in the late winter or early spring of 1849, poem was first published in *Flag of Our Union*, April 1849. Eldorado was a fabulously rich city which explorers of the Western world vainly sought. In 1 the name was frequently applied to California gold fie

Gayly bedight,
 A gallant knight,
 In sunshine and in shadow,
 Had journeyed long,
 Singing a song,
 In search of Eldorado.

But he grew old,
 This knight so bold,
 And o'er his heart a shadow
 Fell as he found
 No spot of ground
 That looked like Eldorado.

And, as his strength
 Failed him at length,
 He met a pilgrim shadow—
 "Shadow," said he,
 "Where can it be,
 This land of Eldorado?"

"Over the Mountains
 Of the Moon,
 Down the Valley of the Shadow,
 Ride, boldly ride,"
 The shade replied,
 "If you seek for Eldorado!"

184

64 sibyllic, oracular In this stanza the narrator is attempting to prove that this "crystalline light" promises good fortune. Yet his talk of "tremulous light" which "flickers" actually admits distrust. Here perhaps, as in "The Raven," at about the middle of the poem, the author "availed himself of the force of contrast, with a view to deepening the ultimate impression"

Chapter Three

The American Renaissance

The American Renaissance 1829 • 1860

WE WILL SPEAK OUR OWN MINDS. "We will walk
on our own feet; we will work with our own hands; we
will speak our own minds." — Emerson

I. Intellectual Currents

Between the triumph of the frontier in Jackson's election and the days of the Civil War, the United States emerged a flourishing nation—a nation for the common man, a nation with a culture, a nation of promises.

This was the period of renaissance, the period of awakening and development, when Americans at last were to begin to speak their own minds. The writers of the era represented in this chapter belong mostly to New England; and indeed the New England writers are so large in any survey of American literature during the years from 1829 to 1860. The greatest writer—possibly the very greatest of the period—was outside the New England area. Herman Melville was born in New York and educated in the South Seas. Yet he was entirely outside—on the periphery rather, for Melville was influenced by the New England writers, especially by Hawthorne.

The New England influence was far-reaching. It extended into the Middle West, where Emerson lectured repeatedly in the 1850's. It was evident even in the South, though largely in opposition. Aesthetic writers like Poe challenged the vogue of moral literature, defenders of the social structure of the South opposed New England abolitionism, and lusty raconteurs on plantation and frontier flouted puritanic restraints.

NEW ENGLAND in ITS GOLDEN DAY

The period of 1829-1860 in New England has had applied to it a variety of happy designations: Barrett Wendell called it "The Renaissance of New England." "The Golden Day" is Lewis Mumford's phrase. But by whatever name it is known—whether by one of these or by some other—it was the greatest literary period in the history of New England. This was a rich period, and in their writings the men of Boston and Cambridge, Concord and Salem set forth their all-embracing ideas and attitudes—ideas and attitudes on religion and the conception of human nature, democracy and the common man, industry and the expanding frontier, slavery and the Civil War, science and human progress.

Changing Concepts of God and Man

The most important factor in the religious thought of New England in this period was the break with Calvinism. Boston clergymen had become increasingly liberal in the eighteenth century (as shown in the opposition between Chauncy and Edwards), but it was not until the beginning of the nineteenth century that Unitarianism was strongly established. The appointment in 1805 of an avowed Unitarian to the chair of Divinity at Harvard, hitherto occupied by staunch Calvinists, may be taken as marking the transition. And yet the change from Calvinism to Unitarianism was perhaps not so complete, even in eastern Massachusetts, as some have supposed. That William Ellery Channing, the most influential of the early Unitarians, should have delivered his famous "Moral Argument Against Calvinism" as late as 1821 would seem to suggest the tenacity of the old orthodox beliefs. Preaching from his Unitarian

pulpit in 1831, Emerson designated the Calvinistic and Unitarian groups as the "rigid" and the "liberal" parties, respectively, and urged his hearers to "borrow something of each truth from both of these opinions."

The chief points of difference between Calvinism and Unitarianism as expounded by Channing and his successors can be summarized briefly: (1) The two beliefs differed in their conceptions of the Deity. Calvinism emphasized God's inexorable justice; Unitarianism stressed His benevolence. The Unitarians questioned the justice of the doctrine of election: a God who says (according to Wigglesworth) "I do save none but mine own elect" seems arbitrary and capricious. (2) The two beliefs differed in their conceptions of Christ. According to Calvinism, Christ is literally the Son of God, the second member of the Holy Trinity. According to Unitarianism, Christ is divine only in the sense in which all men are divine or have an element, however small, of divinity in their nature. The difference between Christ and other mortals becomes one of degree, not of kind. (3) The two beliefs differed in their conceptions of man. Calvinism asserted the innate depravity of man, his predestination, and the necessity of his salvation through the atoning death of Christ. Unitarianism insisted upon man's inherent goodness and his spiritual freedom. The Atonement became unnecessary to Unitarians; they preferred to point to Christ's life as an example to be emulated by men already potentially good.

As a young man Channing lived for two years in Virginia, where he presumably absorbed the French romantic philosophy. From Rousseau and writers of his school, Channing probably derived, and imported into the Boston of the early 1800's, the ideas of the excellence of human nature and its infinite perfectibility. The inscription on the base of Channing's statue in Cambridge aptly summarizes his contribution to the religious thought of New England: "He breathed a humane spirit into theology and proclaimed anew the divinity of man." In his *Flowering of New England* Van Wyck Brooks declares justly, "By raising the general estimate of human nature

which the old religion had despised, Channing gave a prodigious impulse to the creative life

By 1820 Channing could say, "Calvinism is giving place to better views. We think the decline of Calvinism one of the most encouraging facts in our passing history." Unitarianism became the religion particularly of the fashionable and the well-to-do in and around Boston. "Whoever clung to the older faith," remarks Barrett Wendell, "did so at his social peril." Unitarianism, however, did not conquer the whole of New England. There were scattered Unitarian outposts, such as the parish of Sylvester Judd in Augusta, Maine, but the older faith continued dominant in the regions west and north of Boston.

Apart from both Calvinists and Unitarians, the Quakers were a comparatively small but important group. In early New England, Quakers were apt to be obstreperously fanatical (witness the Quakeress in Hawthorne's "Gentle Boy," p. 982); but by the time of John Woolman (1720-1772) their fanaticism had diminished, and in nineteenth-century New England they were, in the words of one historian, "inconspicuous and inoffensive."

Like the Calvinists, the Quakers believed in the divinity of Christ and in the Bible as the inspired word of God. Like the Calvinists, too, they insisted upon the essential sinfulness of man: "Too dark ye cannot paint the sin," Whittier, their chief representative in literature, said in "The Eternal Goodness," his best poetical statement of the Quaker belief. But Whittier in the poem objects to the "iron creeds" of the Calvinists and to their emphasis upon God's wrath; he prefers to think of "our Lord's beatitudes." The Quakers emphasized the "inner light," which God, they believed, gave to all human beings and which afforded an infallible guide to righteous life. Quakerism was more benevolent and humanitarian than Calvinism, and more pietistic than Unitarianism. A mere layman might experience some difficulty in distinguishing between the doctrine of the inner light and the Emersonian doctrine of intuition.

After less than three years in the Unitarian ministry, Emerson resigned his pulpit in 1832 because of a growing dissatisfaction with the official rôle of the clergyman and the formalities

of the church. Unitarianism, he felt, was good as far as it went; but it did not go far enough toward the rehabilitation of the individual. The new doctrine of which Emerson became chief interpreter is known as Transcendentalism. Emerson's *Nature*, published in 1849, was the bible of the early Transcendentalists. The "Transcendental Club" was, from 1840 until about 1844, a center of activity. Another focus was a quarterly magazine, *The Dial* (edited by Margaret Fuller, 1840-1842, and by Emerson, 1842-1844), which published many contributions by Transcendentalists during its lifetime of four years. The group as a whole was greatly influenced by the idealistic philosophies of other lands and ages: by the Romantics and the Neo-Platonists, by the Oriental Scriptures, by Kant and other German idealists, and particularly as interpreted by Coleridge and Carlyle.

Transcendentalism has been defined philosophically as "the recognition in man of his capacity of knowing truth intuitively, or of attaining knowledge transcending the reach of the senses." It has been defined historically as follows: "New England Transcendentalism was produced by the importing of German idealism into American Unitarianism." The last definition indicates an important relation between Transcendentalism and Unitarianism and requires consideration of the similarities and differences between the two.

Unitarianism prepared the way for Transcendentalism by insisting that man is essentially good and that man may trust his own perceptions of religious truth. Channing spoke of "a confidence which is due to our rational and moral faculties in religion" and said that "the ultimate reliance of a human being is and must be on his own mind." But it is important to note two points of difference: (1) Channing, the Unitarian, expressed confidence in "our rational faculties." Emerson, the Transcendentalist, drew a sharp distinction between the "Understanding," by which he meant the rational faculty, and the "Reason," by which he meant the intuitive or rational faculty; and he regarded the "Reason" as much more authoritative in religious matters than the "Understanding." (2) The Transcendentalists carried this reliance

the intuitive perceptions of the individual much further than conventional Unitarianism would warrant—carried it so far as to set aside even the authority of the Christian Bible. “Make your own Bible,” said Emerson. “Select and collect all the words and sentences that in all your reading have been to you like the blast of a trumpet, out of Shakespeare, Seneca, Moses, John, and Paul.” Emerson would renounce all authority, all standards and laws externally imposed. “Nothing is at last sacred but the integrity of your own mind.” He proclaimed this glorification of intuition and the repudiation of all external religious authority to a Unitarian audience at Harvard in 1838: “Thank God for these good men [meaning the Saints and the Prophets] but say ‘I also am a man.’ ” The result was a storm of protest. Emerson’s Transcendentalism had gone far beyond the bounds of even liberal Unitarianism.

Transcendental thought in the abstract can be best studied in Emerson. His disciples, of whom there were many, were usually interested more in practice than in theory and attempted to apply Emerson’s individualistic doctrines in various practical ways. George Ripley, for example, organized the famous utopian community at Brook Farm. Theodore Parker militantly espoused reforms in church and state. Margaret Fuller advocated the emancipation of women. Henry Thoreau made a famous experiment in living at Walden Pond.

Many passages in Thoreau seem echoes of Emerson, though Thoreau’s expression of the thought is always more concrete than Emerson’s. “The fact is,” Thoreau wrote in his journal in 1853, “I am a mystic, a transcendentalist, and a natural philosopher to boot”—meaning by “natural philosopher” a scientific student of nature. The emphasis in the statement is significant. Mystical, transcendental passages abound in Thoreau, especially in his earlier writings, as they abound everywhere in Emerson. But as Thoreau grew older, his interest in the observation and description of the world of nature became more and more absorbing. He became—as his journals of the 1850’s attest—more of the natural philosopher and somewhat less of the Transcendentalist.

Transcendental ideas scarcely touched the writers of Boston and Cambridge. Influenced by his medical studies, Dr. Holmes approached religious problems from the scientific point of view. He objected to the Calvinistic condemnation of sinners because he believed that evil-doing is often the result of an unfortunate heredity. Bad men, he thought, should be treated as if they were insane. On the positive side, he had no transcendental ardor, but only a rationalistic belief in the ability of the soul, in favorable circumstances, to "build more mansions." Longfellow's religious thought—such as it was—was mildly Unitarian, pleasantly optimistic about life and death. And although Lowell could write appreciatively of the exhilarating effect of Emerson ("... he made us conscious of the supreme and everlasting origin of whatever bit of soul might be in any of us"), he was not a disciple; nor was he in sympathy with Transcendental ideas. "The word 'transcendental,'" he declared in the unsympathetic *Atlantic*, "is Thoreau, 'was the maid of all work for those who could not think.'" The men of Boston and Cambridge found the Concord air too rarefied for their mundane needs.

The chief spokesman of the opposition to Transcendentalism, however, was Hawthorne, who returned, in part at least, to the Calvinist position. He satirized utopian reforms on the ground that superficial reform measures avail nothing so long as the human heart, which is inherently sinful, remains unregenerated. "Purify that inward sphere," he advised in "Earth's Crucible," "and the many shapes of evil that haunt the outward will vanish of their own accord." He satirized Unitarianism and Transcendentalism in "The Celestial Railroad" (p. 109). Bunyan's arduous pilgrimage seemed to him still the best way of reaching the Celestial City. In stories and novels he showed that evil is an ever-present reality, not an illusion to be brushed aside, and that self-reliant individualism alone does not save man from evil. Hawthorne is a striking example of the persistence of the Puritan point of view in an age of liberalism and progressivism.

But it would be a mistake to suppose that the Puritan inheritance affected Hawthorne

alone. It was everywhere present, giving native roots and indigenous strength to New England flowering. The religious emphasis was a Puritan trait, as was the emphasis on books and reading. The Transcendental pursuit of perfection was the old Puritan pursuit of perfection in a new guise and on different terms. The diaries of Emerson, Thoreau, and Hawthorne continued an old Puritan practice; and the searchings of soul in Emerson and Thoreau recall passages in Cotton Mather and Jonathan Edwards. When Emerson said that the poet "must drink water out of a wooden bowl," he was quoting the austere of English Puritans, John Milton. The austerity of Emerson and Thoreau, and of Hawthorne, too, was of the essence of Puritanism. If the Puritan essence was considerably diluted in the other writers of the period, it nevertheless made itself felt. It came out in the ethical earnestness of Longfellow and Lowell and in their native attachments. In sum, the great period of New England literature would have been impossible without the two centuries of Puritan inheritance. It is hardly an accident that the three New England writers of the period whose works seem most likely to endure—Emerson, Thoreau, and Hawthorne—are the writers whose roots were deepest in New England's Puritan past.

DEMOCRACY, INDUSTRIALISM, EXPANSION

From 1829 to 1860 the two major political parties in the United States were known as the Whigs and the Democrats. Conservative men of property in New England were likely to be Whigs; liberals and men of little or no property were likely to be Democrats.

The election of Andrew Jackson of Tennessee by the Democrats in 1828 is one of the great landmarks in the evolution of American democracy. The common man, whether backwoodsman, farmer, or small merchant, regarded Jackson, the conqueror of the Creek Indians and the hero of New Orleans, as a popular champion. Jackson's Whig opponent, the "aristocratic" John Quincy Adams, carried only New England and the North Atlantic states; the South and West went solidly for "Old Hickory." During the Jacksonian period, government in America became more democratic. The movement toward democracy, which had begun with the War of Inde-

pendence and which had been arrested somewhat in the 1790's owing to a certain apprehension caused among the more conservative citizenry by the excesses of the French Revolution resumed its onward course. State constitutions were liberalized. Religious tests and property qualifications for office were removed. Manhood suffrage was adopted generally.

New England Looks at the New Democracy

To many New Englanders Jackson and his supporters seemed the dregs of democracy. Emerson wrote to Carlyle, "A most unfit person in the Presidency has been doing the things; and the worse he grew, the more popular." But it would not be fair to Emerson to suppose that this snobbish statement represents his real attitude. Like most educated men he doubted at times the wisdom of the uneducated masses. "The mass," he wrote in a sketch of the moment, "are animal, in state of pupillage, and nearer the chimpanzee." But despite momentary skepticism, he held firmly to his faith in the ultimate wisdom of the people. The belief that "God is in every man" was to him "the highest revelation." And he said in another passage on the subject, "The great mass understand what's what." It should be remembered that Emerson took sharp issue with his friend Carlyle on the subject of democracy: when Carlyle advocated what we today should call a fascist doctrine, Emerson vigorously dissented. He thought of many benefits that might come from even the "rank rabble party, the Jacksonism of this country." For one thing, this new democracy of the West might cure America of its slavish dependence upon Old World literature and Old World traditions, might "root out the dilettantism of our cultivation." And he came ultimately to an admiration of Jackson himself. Writing in 1862 of the truly memorable things which he associated with the national capital, he mentioned along with the eloquence of Webster and the "sublime behaviour" of John C. Adams "the fine military energy of Jackson in his presidency."

Jackson's fine military energy appealed also to James Russell Lowell, who wrote "Latest Views of Mr. Biglow":

Ole Hick'ry wouldn't ha' stood see-saw
 'Bout doin' things till they wuz done with,—
H'd smashed the tables o' the Law
 In time o' need to load his gun with;
He couldn't see but jest one side,—
 Ef his, 'twuz God's, an' thet wuz plenty;
An' so his '*Forrards*' multiplied
 An army's fightin' weight by twenty.

It must have required great effort for the New England mind to appreciate a man like Andrew Jackson; but the point is that the minds of Emerson and Lowell were capable of making such an accommodation. No violent adjustment was necessary, however, for a third New Englander Nathaniel Hawthorne, for he alone among the major New England writers was a loyal member of the Democratic party and a staunch supporter of Jackson. Late in life he recorded in his journal the considered judgment, "Surely Jackson was a great man." But despite the personal challenge of Jackson himself, Emerson spoke for the generality of educated New Englanders when he said that the Whig party had the "best men"; the Democratic party, he added, had the "best cause."

The "best cause" became more and more pervasive in the literature of the period. An earlier democratic impetus had been supplied by the English Romantic Movement. When Emerson, in *The American Scholar* (p. 874), hailed as one of the "auspicious signs" the exploring and poetizing of "the near, the low, the common," he was thinking particularly of the English Romantic poets. And when Longfellow celebrated the village blacksmith, and Whittier, the barefoot boy, the inspiration was at least partly derived from Burns and Wordsworth. Thus initiated, the democratic movement in literature was broadened and deepened and made more American by the fresh impetus of Jacksonian Democracy. Lowell affords a good illus-

After the War of 1812, business capital and initiative in New England were diverted from commerce to manufacturing, and the abundance of water power and skilled labor guaranteed the success of the factory system. The most striking new feature of the New England landscape about 1820 was the factory village, built near some waterfall and consisting of mills and houses for the "operatives." Conditions were much more agreeable in the new factory villages of New England than in the older manufacturing centers of England. Workers in the New England factories were mostly farmers' daughters from the surrounding country. Hawthorne in one of his rambles about the countryside remarked on the bright, cheerful faces looking out through the factory windows. A notable instance was Lowell, Massachusetts (founded in 1822), where the factory girls dressed neatly, were properly chaperoned, and published a literary weekly. By 1840 there were some 1200 cotton factories in the United States, two thirds of which were in New England.

One result of the industrial revolution in New England was the accumulation of wealth, a good deal of which was used for cultural purposes. Many New Englanders studied in Europe. The colleges of New England grew in resources and prestige. Almost every town had its free public library and its Lyceum, where an instructive course of lectures was given during the winter. Emerson, and even Thoreau, lectured on many Lyceum platforms. In the cities, mechanics' institutes offered vocational training. The Lowell family might be cited as illustrating the happy marriage of wealth and culture: one uncle of James Russell Lowell founded the manufacturing city which bears his name; another uncle established the famous Lowell Institute in Boston, where lectures have been given for more than a century by distinguished scientists, scholars, and men of letters.

To most New England writers of the period the industrial revolution no doubt seemed more beneficent than otherwise. One major writer, however, spoke out, loud and bold, against the mechanization of American life. Thoreau's objection was based upon the fundamental prin-

ciple, Emerson's principle, of self-reliance. A man ought to do for himself the things more and more were being done by machines: he ought to walk instead of riding on the horse, he ought to build his own house, make his own clothes, bake his own bread. The result was brought on the division of labor which reduced men from integers to fractions. "Where does the division of labor end?" Thoreau cried in *Walden*, and he added a statement the force of which is only today becoming apparent: "No doubt another *may* also think for me; but it is no more desirable that he should do so to the exclusion of my thinking for myself."

Compared with Thoreau's, the comments of other writers on the advancing machinery seem less decisive. Emerson entered a mild demurrer in *Self-Reliance* (p. 892), saying that "the harm of the improved machinery may compensate its good"; but, in the long run, he was willing to accept the machine as part of the "beneficent tendency." Hawthorne seems to have been apprehensive of evil results; to him, apparently, the machine was a malignant monster. One finds in his journal the following note for a story: "A steam engine in a factory is to be supposed to possess a malignant spirit; it catches one man's arm and pulls it off, catches another by the coat-tails, and almost grapples him bodily; catches a girl by the hair, and crushes her; and finally draws a man and crushes him to death." Here was a conception out of which Hawthorne might have developed a tale of Gothic horror, and perhaps of social prophecy.

A conspicuous and characteristic product of the industrial revolution in America was the man of big business, the captain of industry. The subject received scant attention in the literature of the period. One passage, however, is of particular interest—a passage in Emerson's *Journals* which expresses the writer's great admiration of John M. Forbes, a builder of railroads in the West in the 1860's:

Forbes is an American to be proud of. Never was such force of meaning, good sense, good action, combined with such domestic behaviour. . . . Wherever he moves, he is the benefactor. It is c

that he should shoot well, ride well, sail well, administer railroads well, carve well, keep house well, but he was the best talker also in the company. . . .

The type has suffered at the hands of later writers. Perhaps Emerson was naïve; or possibly the type deteriorated in the post-Civil War period; or, quite likely, the American businessman was given less than justice by the satirists and “debunkers” of the 1920’s.

New England Looks West with Mixed Feelings

Thinking in New England along political, economic, and social lines was conditioned not only by Jacksonian Democracy and the industrial revolution; it was conditioned also by the Westward movement. Some of the details of the movement are reserved for a later chapter. Our concern here is with its effect upon New England attitudes.

In the early years of the century New Englanders had settled in western New York and Ohio; by the 1840’s they not only had occupied Indiana, Illinois, and southern Michigan, but had ventured as far as Wisconsin, Minnesota, and Iowa. A popular song summed up the invitation to the West:

Come all ye Yankee farmers who wish to change your lot,
Who’ve spunk enough to travel beyond your native spot. . . .

The Westward migration gave an outlet to the discontented elements, to those who wished to change their lot.

Despite the ties between New England and the West, conservative New Englanders were inclined to deprecate the Westward migration. There were economic reasons for this attitude: the draining off of energetic young people tended to keep high the price of factory labor, and the revenue from the sale of public lands in the West furnished an argument to Southerners for lowering the tariff. There were moral reasons also. The appeal to “spunk” to leave “your native spot” in the song quoted above was reversible since one might argue

that more spunk was required to succeed in one's native place, particularly if that place was a New England farm. "The wise man stays at home," said Emerson. And possibly Hawthorne was thinking of those who were tempted by the West when he emphasized the nobility of life in New England:

Then ask not why to these bleak hills
I cling, as clings the tufted moss . . .
Better with naked nerve to bear
The needles of this goading air,
Than, in the lap of sensual ease, forego
The godlike power to do, the godlike aim to know.

By many high-minded New Englanders, migration to the West was regarded, no doubt, as a decline to a lower level. Some reformers, on the other hand, made the point that Western migration might be checked if certain improvements were made at home. Sylvester Judson, in his fictional utopia, described in *Margaret: A Tale of the Real and Ideal* (1845), the mania for removing to the West, which prevails all over New England, has here subsided.

The Western theme does not bulk very large in the writings and memoirs of the New England Renaissance, but a few details may be of interest to suggest their scope and attitudes.

Hawthorne was interested in the West, although his knowledge of the subject was not very great. In the 1830's he traveled by stagecoach and canal boat as far as Niagara Falls and recorded his observations in a few slight but revealing sketches. While American consul at Buffalo, he met more Westerners than he had ever seen in Salem or Concord, some of whom he viewed with disapproval. A Mr. Lilley from Ohio, for example, he described in his notes as "a very unfavorable specimen of American manners—an outrageous tobacco chewer and an atrocious spitter on carpets." But some years later in Concord he met young William

Howells, an Ohioan, whose manners were irreproachable. Hawthorne was (as Howells corded) "curious about the West, which he seemed to fancy much more purely American, and said he would like to see some part of the country on which the damned shadow of Europe had not fallen."

To Lowell, as to Hawthorne, the West seemed more purely American because it was free from European influences. (The same point was to be made at the end of the century by the historian Frederick Jackson Turner.) When "Nature" made Lincoln, Lowell said in his "Commemoration Ode" (p. 865),

For him her Old-World moulds aside she threw,
And choosing sweet clay from the breast
Of the unexhausted West,
With stuff untainted shaped a hero new . . .
Nothing of Europe here. . . .

The great Americans in the early history of the Republic—Franklin, Washington, Jefferson and the rest—possessed a culture which was largely European; but the culture of Lincoln was "untainted" by the Old World. Lowell's appreciation of this fact is all the more remarkable because, as a lifelong student of the Romance languages and literatures, he himself was an embodiment of European culture. Such an insight into the significance of the West was beyond the reach of another devotee of European literature, Longfellow, whose conception of the subject, as revealed in *Hiawatha* and *Evangeline*, was literary and romantic.

Unlike Longfellow, Thoreau was a tough, realistic writer who was qualified by temperament and personal habits to appreciate the values of the Western frontier. From Thoreau's point of view, life in New England had become too sophisticated; he spoke repeatedly of "these degenerate days." "We need the tonic of wildness," he declared in *Walden* (p. 951); and in "Walking" (p. 961), he said, "The West is but another name for the Wild." He praised the

sturdy self-reliance of the pioneer. If the race is to retain its vigor, men must live "a pioneer and frontier life." Such a life had been lived by the settlers of New England, and Thoreau liked to quote from the colonial historians, particularly from Edward Johnson, who wrote how the first inhabitants of Concord were forced to live in a cave and "cut their bread very hard." Such a Spartan existence was enjoyed also, he supposed, by the Western frontiersman. "A frontier Paradise," he declared, "was not so favorably situated on the whole as is the backwoods of America." The backwoodsman whom Thoreau envisaged, we may be sure, was not of the idle or mercenary sort; rather he was the sober New Englander dedicated to plain living and high thinking on a farm in Michigan or Illinois. The gold rush to California was quite another matter. The greed and the gambling instinct therein displayed, he thought, were a "disgrace to mankind." The California spectacle of 1849, he said, made of God "a moneyed gentleman who scatters a handful of pennies in order to see mankind scramble for them."

If Thoreau praised the West for its primitive qualities, Emerson praised it for its amazingly rapid acquisition of culture. He lectured many times throughout the Middle West in the 1850's. He went as far as Beloit, Wisconsin, where on January 9, 1856, he found an attentive audience despite a temperature of thirty degrees below zero. The spread of culture to the frontier was to him indeed remarkable. Having heard piano music on one of his travels, he wrote:

Witness the mute all hail
The joyful traveller gives, when on the verge
Of craggy Indian wilderness he hears
From a log cabin stream Beethoven's notes
On the piano, played with master's hand.

The college in Evanston blew down one night (Emerson recorded in his journal in 1856) so great were the energy and progressivism of the founders of Northwestern that "they

again the next day, or built another." To Emerson, the West seemed the country of the future. He warned his Eastern readers that some day the sturdy Westerner would "gather all the laurels in his strong hands." Emerson's treatment of the West (which one finds chiefly in *Journals*) emphasizes his identification not only with New England but with America as well.

Slavery and Civil War

Still another influence on New England thought about political, economic, and social problems was the growing controversy over Negro slavery in the South and the tragic climax of the Civil War. The details of the antislavery movement and the rôle of Whittier as New England's chief abolitionist in literature are reserved for a later chapter, where the two sides—Northern and Southern—may more conveniently be brought together. Here we are concerned with the movement as a stimulus to thought and with the reactions of the major New England writers, Whittier excepted, to that stimulus.

Longfellow, as we might expect, was only mildly responsive. His sentiments were broad and sincerely humanitarian; he believed that slavery was a great evil. But he was not active in reform; he disliked controversy, and he preferred to write his poems on other subjects. Longfellow did, however, compose a few poems on slavery, of which "The Slave's Dream" (p. 775) may be regarded as typical of his attitude and method of treatment. The slave in the poem falls asleep in a rice field and dreams of his former life in Africa, where he had been a king and had ridden a spirited horse bridled with golden reins. The description would be more applicable to a knight of medieval romance and it reflects Longfellow's preoccupation with European romantic literature. When the Union was threatened by the sectional dispute, he wrote the noble and justly famous poem "The Building of the Ship" (1849), which was a poetical plea—matching Webster's plea in prose—for the preservation of the Union:

Thou too sail on, O Ship of State!

Sail on, O Union, strong and great!

Lowell was much more vocal than his fellow Cantabrigian. He had pretty political convictions, and he enjoyed being in the thick of the fray. In the first series *Biglow Papers* (p. 841), he vigorously opposed the Mexican War, which Northern nationalists unanimously regarded as having been precipitated by Southern strategists with aim of extending slave territory in the Southwest:

They jest want this Californy

So's to lug new slave states in. . . .

He declared himself opposed to all war, "Ez fer war, I call it murder. . . ," and preferred separation of the North and South to slavery:

Ef I'd my way I hed ruther

We should go to work an' part. . . .

In the second series of the *Biglow Papers* (p. 858), written in 1862 when the A the Potomac had met with ill success, he abandoned his early pacifism and argued for vigorous prosecution of the War by the North:

Oh for three weeks o' Crommle an' the Lord!

Up, Isr'el to your tents an' grind the sword!

After the Civil War, however, Lowell directed his best poetical efforts toward reunion. ' in 1875 in commemoration of the one hundredth anniversary of Washington's taking command of the colonial army, he extended the hand of reconciliation from Massachusetts to V

Virginia gave us this imperial man . . .

She gave us this unblemished gentleman.

What shall we give her back but love and praise

As in the dear old unestranged days. . . .

Ever responsive to changing conditions, Lowell's attitudes show, it seems fair

his flexibility, adaptability, and capacity for growth in his thinking on political questions.

It so happened that Lowell was usually on the side of the majority; Thoreau had a predilection for the side of the minority, often a minority of one. He had the rare personal courage to carry his convictions to their logical conclusion, even if that conclusion meant the defiance of civil law. He refused to pay taxes to a government which allowed slavery, and as a consequence spent a night in the Concord jail. The record of this episode is given in "Civil Disobedience" (p. 940). He records in his journal that, contrary to the Fugitive Slave Law, on at least one occasion he helped a slave escape into Canada. While John Brown was in prison awaiting execution, Thoreau made a speech in Brown's behalf at Concord, and again at Boston and Worcester to unsympathetic audiences. In his famous "Plea for Captain John Brown" he said: "It was his peculiar doctrine that a man has a perfect right to interfere by force with the slaveholder, in order to rescue the slave. I agree with him." Thoreau is the best example in American literature of the extremely individualistic position: that a man must do what he believes to be right with utter disregard for the conventions of society and the laws of the state.

Emerson was as individualistic in theory, though in practice a good deal more amenable to laws and conventions. Nor did he have the crusading spirit of Thoreau. He was nevertheless an active opponent of slavery after 1850, and, like Thoreau, he spoke publicly in defense of John Brown. The high point in his participation in public affairs came on January 1, 1863, when he read the "Boston Hymn" at a meeting to celebrate the Emancipation Proclamation and was interrupted by the cheering crowd at the famous lines:

Who is the owner? The slave is owner,
And ever was. Pay *him*.

Alone among the great New England writers, Hawthorne did not give his approval to the antislavery movement. Possibly, from the Calvinistic point of view, chattel slavery seemed not

was distrustful of reforms and reformers: reformers were likely to be impractical fanatics; reforms were superficial and as often as not proposed remedies which were worse than the disease. After the manner of the old Puritans, he believed that an inscrutable Providence would provide about the needed reform "at some brighter period, when the world should have grown ready for it." Furthermore, as a loyal member of the Democratic party of James K. Polk and F. Pickens, Hawthorne subscribed to the conventional party arguments that (1) slavery was essential to recognition and protection under the Constitution; (2) the Union was threatened with dissolution by the activities of the abolitionists; and (3) the welfare and happiness of the Negro himself would be jeopardized by his emancipation. During the Civil War he found his position as a Northern Democrat embarrassing; he was looked at askance by friends and neighbors. He did not, however, join those Northern Democrats, known as Copperheads, who opposed the continuation of the War and advocated a return to the *status quo ante bellum*. "I always thought the War should have been avoided," he wrote in 1863, "although since it has broken out I have longed for military success as much as any man or woman of the North." Devoted to the older Union established by the founding fathers, he felt in 1863 that the permanent separation of North and South was inevitable, and persuaded himself "to be content with the soil that was once our broad inheritance." He did not live to see the end of the War.

SCIENCE and HUMAN PROGRESS

Natural science advanced with remarkable rapidity in the nineteenth century, and its effects came more and more pervasive. In England—to mention only two of many notable publications in the scientific field—Sir Charles Lyell's *Principles of Geology* (1830) established the authority of the earth and the gradual evolution of its surface, and Charles Darwin's *Origin of the Species* (1859) presented the theory of the evolution of man through a process of natural selection. In New England, as well as elsewhere in America, scientific activity in all of the fields kept

with developments in the Old World. Benjamin Silliman at Yale published his *Elements Chemistry* in 1830; Asa Gray at Harvard brought out a notable *Survey of Botany in the Northern United States* in 1847; Louis Agassiz of Switzerland began in 1846 a distinguished career at Harvard in the field of comparative zoölogy. The Harvard Astronomical Observatory in 1847 was equipped with the world's largest telescope; and in 1847 the American Association for the Advancement of Science was organized in Boston in order "to promote intercourse between American scientists, to give a strong and more systematic impulse to research, and to procure for the labors of scientific men increased facilities and wider usefulness." New England writers were aware of scientific developments, and their writings reflect, in various ways and degrees, the influence of the new facts and the new theories of experimental science.

Emerson greeted the scientific movement with enthusiasm. "One of the distinctions of our century," he wrote, "has been the devotion of cultivated men to natural science; the benefit thence derived to the arts and to civilization are signal and immense." Late in life he declared "If absolute leisure were offered me, I should run to the college or the scientific school which offered the best lectures on Geology, Chemistry, Minerals, and Botany." Although one cannot be sure that Emerson read all of the scientists to whom he refers in his writings, his scientific reading was remarkably wide and certainly included, among other things, the works of Newton, Linnæus, Buffon, Lamarck, Lyell, Gray, Agassiz, and Darwin. But Emerson was not himself a scientist, nor was he interested in science for its own sake. Science was of value to him for the moral and spiritual implications which scientific fact and theory suggested to his mind—a quite unscientific reason. He liked to draw illustrations of spiritual truth from physical phenomena ("The axioms of physics translate the law of ethics," he said), and his pages abound in analogies between natural and spiritual laws. He was delighted, furthermore, by the doctrine of evolution, particularly by the earlier evolutionary theory of Lamarck, which seemed to him to confirm his optimistic hope for mankind. Paraphrasing Lamarck, he wrote as a motto for *Nature*:

Mounts through all the spires of form.

If the worm might become man, if the caterpillar might evolve into a philosopher, the future of the constantly evolving human race became glorious to contemplate.

Thoreau's relation to science was much more intimate than Emerson's. Thoreau was interested in nature for its own sake quite as much as for its Transcendental meanings. As a student of botany and zoology, he liked to use the Latin names of plants and animals when he wrote about them. He sent to Agassiz for identification specimens of fishes and turtles, some of which were unknown to the Harvard professor. Thoreau did not have, however, either the equipment or the temperament of the genuine scientist. He did not go beyond description of behavior and classification. He would not murder to dissect. A hawk could be best studied, he maintained, "dead specimen," but free and soaring above the fields. In short, Thoreau was, to use the words of his friend Ellery Channing (a nephew of William Ellery Channing), "the *poet-naturalist*."

Among the Brahmins, Longfellow and Lowell gave little attention to science, but Longfellow shared the general faith in the contributions of science to human progress. On one occasion, he twitted the Darwinians upon their arrogant assumption that evolution had replaced God in the modern world (see his "Credidimus Jovem Regnare"). A third Brahmin, however, achieved a real distinction in science. Oliver Wendell Holmes studied medicine in Paris. From 1847 to 1882 he was professor of anatomy and physiology in the Harvard Medical School. His most famous contribution to medical science was his essay on "The Connection of Puerperal Fever" (1843), which materially aided the efforts of the medical profession to reduce the mortality of women in childbirth. Holmes' medical training gave him a scientific approach to his literary subjects. He became particularly interested in the problem of the influence of heredity upon moral responsibility, which is the subject of his novel *Elsie Venner* (1859) and of other writings. He stated the problem as follows in the Preface to the novel:

Was Elsie Venner, poisoned by the venom of a crotalus [rattlesnake] before she was born, morally responsible for the 'volitional' aberrations which translated into acts become what is known as sin, and, it may be what is punished as crime? If, on presentation of the evidence, she becomes by the verdict of the human conscience a proper object of divine pity and not of divine wrath, as a subject of moral poisoning, wherein lies the difference between her position at the bar of judgment, human or divine, and that of the unfortunate victim who received a moral poison from a remote ancestor before he drew his first breath?

Holmes anticipated by at least a generation the approach of modern neurology. The author of many volumes of novels, essays, and verse, he nevertheless considered his article on childbed fever his best title to fame.

Hawthorne, once again, is found perversely at odds with this self-confident, progressive, optimistic age. He discovered a danger in the new emphasis upon experimental science. In "Rappaccini's Daughter" (p. 1025), in "Ethan Brand," and elsewhere, he examined the scientist and discovered that the scientist had been dehumanized. Of Dr. Rappaccini, "as true a man of science as ever distilled his own heart in an alembic," Hawthorne wrote: "His patients are interesting to him only as subjects for some new experiment. He would sacrifice human life, his own among the rest, or whatever else was dearest to him, for the sake of adding so much as a grain of mustard seed to the great heap of his accumulated knowledge." Likewise, Ethan Brand, a scientist in the field of experimental psychology, became "a cold observer, looking on mankind as the subject of his experiment"; he "lost his hold of the magnetic chain of humanity"; he became "a fiend." Hawthorne seemed to think that the exclusive cultivation of the scientific faculty produces atrophy of soul, and creates and lets loose in the world an agent which is "fiendish" because utterly unmoral and irresponsible. The mid-nineteenth century did not take

the warning seriously, failed sometimes even to recognize it. Now, a hundred years Hawthorne's point becomes more plainly perceptible.

HERMAN MELVILLE: EXPLORER of the WORLD and ENIGMAS

After a boyhood in New York City and Albany, a voyage to Liverpool, three years in the S Seas, a brief second residence in New York City, and a journey to London and Paris, the n traveled Herman Melville settled in 1850, at the age of thirty-one, at "Arrowhead" near field, Massachusetts. Obviously he was not a product of Massachusetts or a part of the lit movement of New England. But his Massachusetts residence, which lasted, with interrup for other travels, for more than twenty years, brought him within the sphere of influence c New England Renaissance. He met in the Berkshires many of the New England writer: struck up a stimulating and sympathetic friendship with Hawthorne, who in 1850-1851 re at near-by Lenox. It is significant that Melville wrote his greatest book, *Moby Dick*, durin months of his close association with Hawthorne and that he dedicated the book to Hawth

For, like Hawthorne, Melville was concerned with the darker side of human fate. insisted upon the reality of evil in the world; both were skeptical of the optimism of Em and his benevolent theory of the Universe; both presented the tragedies of the mind and Hawthorne agreed with Bunyan's *Pilgrim's Progress*, where man is represented as going thr life weighed down by a burden of sin. Melville called Ecclesiastes "the truest of all books . . fine hammered steel of woe."

Melville dwelt much upon the evil in the world. He had seen at first hand the brutali ship captains, the depravity of Old World cities, the vices brought to the South Sea islan by "civilized" invaders. More than that, evil appeared triumphant (as in *Pierre*), even v man's motives were virtuous. Why, Melville asked, did a good God—if indeed He is goo permit evil in His world? Melville could not accept the Universe with as much resignation a friend Hawthorne. He persisted in challenging the sphinx riddle, courageously, defiantly.

In *Moby Dick*, which is a compendium of Melville's metaphysical speculation, Captain Ahab relentlessly pursues the White Whale only to be destroyed in the end. The allegory is susceptible of many interpretations. To Ahab "all evil was visibly personified and made practically assailable in *Moby Dick*." Ahab, however, is not the embodiment of unmixed good: his conduct is irrational and foolhardy; it is contrary to the well-being of others; it is motivated by revenge. Elsewhere, Ahab (and perhaps Melville) saw in *Moby Dick* "outrageous strength with an inscrutable malice sinewing it," and he hated chiefly the *inscrutability* of the whale. The story perhaps represents man's hopeless but heroic attempt to search out the inscrutable, to know the unknowable; the tragedy of man becomes the tragedy of his limited comprehension. But whatever the interpretation—and each reader must make his own, for the allegory with its countless ramifications is too complex to admit of a simple, categorical definition—Melville's Ahab, like Ethan Brand and other characters of Hawthorne, becomes completely obsessed with this one pursuit and sacrifices everything else to it. If the tragedy of man is his inability to possess complete knowledge of himself and his destiny, Ahab's tragedy is his monomania, the narrow range of his interests.

Melville's chief concern was with the profound enigmas—the nature of God and man, the mystery of "Providence, Foreknowledge, Will and Fate"—and like Milton's philosophers he 'found no end, in wandering mazes lost.' He was not, however, indifferent to the more mundane problems of modern society, and scattered through his works one finds abundant evidence of his awareness of contemporary social questions.

His own observation of tyranny on shipboard and the exploitation of the native population in the Pacific islands had awakened in him a flaming passion for social justice in a truly democratic society. This passion expressed itself angrily in *White Jacket*, where he condemned the naval practice of flogging, and philosophically and satirically in *Mardi* (p. 1066), where he surveyed the governments, beliefs, and manners of much of the nineteenth-century world.

The latter book is of special importance for the student of Melville's social ideas with reference to his own country. He was critical of America's faults. "Vivenza [the United States] a braggadocio": boastfulness was getting to be a national habit; after all, God should be given some credit for our mountains and rivers. The existence of slavery nullified our noble *Declaration of Independence*. The war against Mexico was foisted upon the nation by the imperial action of the President. The California of the gold rush was a "golden Hell." And speaking more radically, Melville pointed out the incompleteness of our freedom: political freedom alone was not enough. For "freedom is more social than political." But despite these and many other imperfections, the young American democracy inspired in Melville an ardent faith. The West was a source of fresh hope—Westerners "were a fine young tribe; like strong new wine [they] worked violently in becoming clear." "In its better aspect," he declared, "Vivenza was a new land": "Like a young tropic tree she stood, laden down with greenness, myriad blossoms, the ripened fruit thick hanging from one bough. She was promising as the morning. Vivenza might be likened to St. John, feeding on locusts and wild honey, and with prophetic voice, crying to the nations from the wilderness. Or, childlike, standing among the robed kings and emperors of the Archipelago, Vivenza seemed a young Messiah, to whom the bearded Rabbis bowed."

Like Hawthorne, Melville was a philosophical pessimist and a political optimist. It was possible to believe in original sin and still be a democrat.

THE OLD SOUTH—in OPPOSITION

Religious questions were not nearly so vital in Southern literature as in the literature of New England and in the writings of Melville. Southern writers, in general, did not concern themselves with spiritual laws, like Emerson; or with the remorse for sin, like Hawthorne; or with metaphysical speculation, like Melville. Indeed, in religious matters the cultivated Southerner was likely to be tolerant to the point of indifference. John Pendleton Kenne-

account of Frank Meriwether in *Swallow Barn* (p. 1116) may be regarded as fairly typical of the gentry of the Old South:

If my worthy cousin be somewhat over-argumentative as a politician, he restores the equilibrium of his character by a considerable coolness in religious matters. He piques himself upon being a high churchman, but is not the most diligent frequenter of places of worship and very seldom permits himself to get into a dispute upon points of faith. If Mr. Chub, the Presbyterian tutor in the family, ever succeeds in drawing him into this field, as he occasionally has the address to do Meriwether is sure to fly the course: he gets puzzled with scripture names, and makes some odd mistakes between Peter and Paul, and then generally turns the parson over to his wife, who, he says, has an astonishing memory.

Good form, however, required a decent respect for the outward observances of religion. Among the aristocracy, the Episcopal Church was the best form; the Presbyterian, though less good was socially acceptable; the revivalistic evangelism of the Methodists and Baptists flourished on the frontiers west of Charleston and Richmond.

The Puritan, as in *The Yemassee*, was likely to be thought a disagreeable fellow—crabbed in temperament, morbid in the pursuit of virtue. William Gilmore Simms preferred the Cavalier type. If religious ideas became articulate in the Charleston of Simms or the Baltimore of Kennedy, they were likely to take on a rationalistic, eighteenth-century flavor. The following statement by Kennedy, written on his sixty-fifth birthday, might have come from Franklin or Jefferson: "I endeavor to avoid the uncharitableness of sectarian opinion, and maintain an equal mind toward the various forms in which an earnest piety shapes the divisions of the world of believers,—tolerating honest differences as the right of all sincere

thinkers, and looking only to the kindly nature of Christian principle as it influences personal lives and conduct of men, as the substantial and true test of a sound religion.”

Politics, however, were quite another matter. The Old South had a genius for politics, nothing delighted the Charleston lawyer or the Virginia planter more than a political discussion. The hero of *Swallow Barn* was a Jeffersonian Democrat who supported the rights of the state against “the ambitious designs of the general government” and preferred the agrarianism of the South to the mercantilism and industrialism of the North. In early life Kennedy doubtless agreed with his hero; but he later opposed the new Jacksonian Democracy, satirizing it vividly in *Quodlibet*. As a result of his growing connections with the business interests of Baltimore, he abandoned his early Jeffersonian principles, became a Whig advocate of the protective tariff for manufactures, and ended as a staunch Unionist and Republican.

Simms’ political course was the reverse of Kennedy’s. Whereas the latter began as a states’ rights man and became a Unionist, Simms began as a Unionist and became an ardent champion of states’ rights. New occasions teach new duties, Simms might have said. When he opposed nullification in South Carolina in 1832, he was supporting Old Hickory and the issue was tariff. When he advocated nullification in South Carolina twenty years later, he was supporting Calhoun and the issue was slavery.

Although Simms was more democratic in his sympathies than Kennedy—possibly because of his youthful experiences on the Southwestern frontier, the Jackson country—the two were agreed in the belief that the business of government belonged in the abler hands of the ruling class, which was ordinarily the planter aristocracy. Considerations of wisdom, prudence and efficiency seemed to them to dictate such a view. As to the subject races—the Indian and Negro—writers like Kennedy and Simms believed that their state of subjection argued their intrinsic inferiority to the whites and that the white superiors of the blacks should maintain them in humane tutelage until some distant time when emancipation might prove feasible.

Kennedy no doubt agreed with his Virginia planter who said in the 1820's, "The question of emancipation is exclusively our own, and every intermeddling with it from abroad will but make its chance of success." He painted a disarming picture of the master-slave relationship at Swallow Barn, where he found "an air of contentment and good humor and kind family attachment." He looked forward to gradual emancipation and the possible success of colonizing experiments. Simms' view was substantially the same in 1835, as his treatment of the subject in *The Yemassee* suggests. His later violent championship of slavery as "a wisely devised institution of heaven" can be understood only in the light of the sectional controversy of the 1850's, the literature of which is deferred until the next chapter.

Despite democratic sympathies discoverable in the works of Emerson, Hawthorne, Melville, Simms, and other writers of the period, the complete champion of the common man, irrespective of race, does not appear in American literature before Whitman. R.S.

II. Literary Trends

FOREIGN and DOMESTIC IMPULSES

The period of 1829-1860 was rich not only in ideas but also in artistic expression. Although New England produced more than its share of great artists, other sections also nurtured authors of whom they might well have been proud. The South was represented notably by two fiction writers, John Pendleton Kennedy and William Gilmore Simms; the Southwest (as we shall see later) by a great group of humorists. Both the South and the East were the background for Edgar Allan Poe, who, though he has been considered in the preceding chapter as a transitional figure, flourished in the 1830's and 1840's. New York was represented by Herman Melville, whose best fiction ranks with the finest our country has produced, and also by a preëminent poet, Walt Whitman. The consideration of Whitman, whose no-

table career began near the end of this period, in 1855, and extended until 1892, we postpone until later.

In designating this period the American Renaissance, critics have had in mind, doubtless, certain similarities it had to the English Renaissance. The English period, which preceded the American by about two and a half centuries, had produced a host of great writers and literary masterpieces. In the literary productions, whether they were created by giants such as Marlowe, Spenser, and Shakespeare or by lesser men, two impulses had been operative, one foreign and the other native. The exciting discovery of foreign literary works, both old and new, had accounted in part for such works as Shakespeare's *Julius Caesar*, based upon the *Lives* by the Greek biographer-historian Plutarch (translated by North in 1579), and for his *Othello*, derived from an Italian *novella* by Cinthio which had first appeared during Shakespeare's lifetime. The patriotic enthusiasm of the day, which had soared during the reign of Queen Elizabeth, found expression in Shakespeare's historical plays such as *Henry IV* and *Henry V* as well as in many of his dramas with foreign settings.

Similarly, during the American Renaissance both foreign and domestic influences, old and new, were notable. Respectful study of ancient and contemporary foreign works and travel abroad, which acquainted authors with European culture, left their marks upon not only the stuff but also the form of our literature. At the same time, proud of their unique democratic system and of the vast nation whose beauty and strength they were coming to know, many authors recounted the history of their land and attempted to depict accurately native scenes and characters.

THE ESSAY—A STANDARD FORM TAKES ON NEW QUALITIES

In this period, as in the preceding one, the essay was an important literary form; but a combination of old and new influences, as well as the personal predilections of each author, gave the type distinctive qualities.

Of the famous Massachusetts men, perhaps the nearest to traditional essayists was James Russell Lowell. Yet the patterns he followed obviously were not those of abstract, relatively impersonal essays such as some British authors had written in the eighteenth century. What he wrote was, as a rule, quite personal. A large share of his prose, that which dealt with issues of the day—candidacies, governmental policies, political theories—might have appeared in newspapers and did appear in magazines which took stands on current affairs.

Such prose, however, though it served its purpose well in its time, has interest now for political rather than literary historians. The prose by Lowell most important as literature is critical or reminiscent—"Shakespeare," "Keats" (p. 849), "Emerson" (p. 853), or "A Good Word for Winter," "Cambridge Thirty Years Ago," and the like. In both critical and reminiscent essays an important factor is the revelation of Lowell's personality—his wit, his learning, his enthusiasm, his sensitivity, his novel way of putting things. One of his volumes bore a title which might have been used for many—"Fireside Travels." He wrote as if he were putting down on paper the sort of talk an informed professor, blessed with a good sense of humor, might deliver to an intelligent college student who had dropped in for an evening chat by the library fire in Elmwood. Lowell poured out enthusiasms, drove home points by unctuously quoting now and then from old books pulled down from towering tiers of shelves, frolicked with classical allusions or Latin quotations, rolled felicitous phrases over his tongue. In particular, Lowell was a master of the epigram—a condensation of his observation and judgment into witty or striking phrases and sentences. Despite some unevenness in his achievements, Lowell did admirable work in the field of the personal essay.

Holmes: Conversational, Spectator-like

Holmes, like Lowell, wrote much prose of a frankly utilitarian kind, in his case prose which made use of the doctor's scientific interests and training. (See "Mechanism in Thought and

Morals," p. 825.) Whatever such writing contributed to the thought of the period—and many believe that it contributed a great deal—the work in prose which showed Holmes at his inimitable best was more like the informal talk of a New England drawing room or boarding house than like a lecture delivered in the medical school. Such work took the unique form employed in the *Breakfast-Table* series (p. 816).

Literature which Holmes knew as a boy did its part to shape his essays. He was fond of remarking how much it had meant to him to have been born and reared "among books and those who knew what was in books," to have had a chance, as a youngster, to page through first editions of eighteenth-century classics in the large library which his forbears had collected. "All men are afraid of books," he claimed, "who have not handled them from infancy." The form of his essays had its parallels with those written in the period with which he felt a spiritual kinship—the eighteenth century. This had been the period of his boyhood idols, Addison and Steele, authors of *The Spectator*, which as *The New Yorker* of its day reviewed, laughed at, or philosophized about people and events of eighteenth-century London.

The Autocrat, the Professor, and the Poet of Holmes' series were Spectators commenting upon contemporary manners; and boarding-house society, like the club to which the Spectator had belonged, was "very luckily composed of such persons as were engaged in different ways of life, and deputed as it were out of the most conspicuous classes of mankind." Sketches introduced characters in such a way as to catch *Spectator*-like types—the landlady's daughter, for instance: "(Aet. 19+. Tender-eyed blonde. Long ringlets. Cameo pin. Gold pencil-case on a chain. Locket. Bracelet. Album. Autograph book. Accordeon. Reads Byron, Tupper, and Sylvanus Cobb, Junior, while her mother makes the puddings. Says 'Yes?' when you tell her anything.)" Essays in the form of conversation—dialogues—had been used frequently in the eighteenth century: by Shaftesbury to comment upon ethics; by Berkeley, on philosophy; by Hume, on natural religion; and by Franklin, on a variety of subjects. (See "Dialogue Between Franklin and the Gout," p. 280.) In a similar manner the *Autocrat* papers record

many conversations of the boarding-house members. James Boswell (1740-1795) had reported the sparkling talk and what Holmes called the "bow-wow manner" of autocratic Samuel Johnson; and Holmes acknowledged indebtedness to this model in the subtitle of the *Autocrat*—"Every Man His Own Boswell." In *Tristram Shandy* (1759) Laurence Sterne had recorded meandering talk interspersed with personal essays and punctuated with dashes in a manner foreshadowing Holmes' eccentric punctuation.

Nineteenth-century publications, nevertheless, probably suggested several devices which gave the *Autocrat* papers novelty. Possibly the magazine or the annual (which first achieved remarkable popularity in this period), with its alternation of story, essay, and poems, suggested a similar intermingling of types. The dramatic interplay of personalities common to fiction may have suggested the author's habit of giving his conversations a dramatic quality and of running a plot (like one in a magazine serial story) through his papers. Like Lowell, Holmes no doubt followed the example of nineteenth-century English essayists—such as Lamb and Hazlitt—in talking intimately of his life, his personal prejudices, his feelings. His *Autocrat* is, in effect, Holmes airing many of his own views to fellow boarders. "He was a well-behaved gentleman at table," testified the *Autocrat's* landlady, "only talked a good deal, and pretty loud sometimes, and had a way of turnin' up his nose when he didn't like what folks said. . . . Many's the time I've seen that gentleman keepin' two or three of the boarders settin' round the breakfast table after the rest had swallowed their meal, and things was cleared off . . . and there the little man would set . . . a-talkin' and a-talkin',—and sometimes he would laugh, and sometimes the tears would come into his eyes. . . . He was a master hand to talk when he got a-goin'."

Thoreau and Emerson: Philosophical, Transcendental

A kind of discourse distantly related to informal talk left its imprint upon Thoreau's prose works, whether short pieces, such as "Walking" (p. 961), or longer ones in which numerous essays were linked, such as *Walden* (p. 951). For Thoreau kept a detailed journal in which, from day to day, he set down his experiences, observations, and thoughts; from this he drew

materials relevant to his essays, as needed. These diaries were written with artistic care, the passages in them were carefully integrated with other parts of essays in which they were used and the sentences were scrupulously polished, so that in the end there was less improvisation than there perhaps appeared to be. In learning to shape sentences to his needs—by studying the metaphysical poets, by translating Greek dramas and passages from Greek poets, by aping English prose masters—Thoreau became indebted to earlier authors. “Every sentence,” he wrote with these models in mind, “is the result of long probation, and should be read as if its author had he held a plough instead of a pen, could have drawn a furrow deep and straight to the end.”

Since the conveying of rich personal experience and meaning by straight furrow expressions was, in Thoreau's opinion, the chief task of the writer, what shaped his prose style more than anything else was his philosophy. To see what Thoreau was trying to do, the reader must understand that, despite all his accumulations of scientific data in his journal, Thoreau's way of thinking led him to care little for strictly scientific writing. He attempted, instead, in his finished works, to write in the rôle of a philosopher. The scientist, according to Transcendental beliefs, recorded the workings of the mere intellect—the “Understanding.” The great writer the man of vision, by contrast, recorded the discoveries of a faculty above mind and more important—the “Imagination” or the “Reason,” which intuitively perceived in natural objects the truth of which they were symbols. Said Thoreau:

It is the subject of the vision, the truth alone, that concerns me. The philosopher for whom rainbows, etc., can be explained never saw them. With regard to such objects, I find that it is not they themselves (with which men of science deal) that concern me; the point of interest is somewhere *between* me and them (i.e., the objects)

Seeing the inner meanings of natural phenomena, the great writer employed those phenomena. Thoreau believed, to communicate those meanings. “My thought,” he explained, “is a part of

the meaning of the world, and hence I use a part of the world to express my thought."

When he filled his pages with vivid details, he attempted to present them so as to make them illuminating in the Transcendental sense: he wanted to see and set down particular instances of the universal law so that readers might find his own sense of "reality"—the higher kind—in them. His stay at Walden was a search for basic truths, "for the essential facts of life," and his circumstantial record of the stay (or more precisely of an ideal stay based upon sixteen years of records in his journal) was an attempt to convey his insights in meaningful symbols. And elsewhere than in *Walden* his constant practice was to show the eternally true in terms of the particular. "There was an excellent wisdom in him, proper to a rare class of men, which showed him the material world as a means and a symbol," wrote Emerson. "To him there was no such thing as size. The pond was a small ocean; the Atlantic, a large Walden Pond." Thus certain that the small stood for the large, Thoreau expounded higher meanings here and there in his writings by using paradoxes or philosophical generalizations, but for the most part he trusted minutely recorded concrete details on page after page to convey his meaning.

Emerson, though extraordinarily concrete for a philosopher, was more abstract than Thoreau. "In reading Thoreau," he said, "I find the same thought, the same spirit that is in me, but he takes a step beyond and illustrates by excellent images that which I should have conveyed in a sleepy generality." Trained in the composition of sermons and lectures, Emerson, in speeches such as "The Divinity School Address" and in essays often largely derived from his lectures, had the interest that preachers and lecturers frequently have in generalizing, in following lines of reasoning. Perhaps it is not inaccurate to say that while Thoreau's emphasis was particularly upon concrete things, Emerson's emphasis was upon philosophical relationships.

Emerson set forth what he conceived to be the task of the philosopher in his study of his idol Plato: it was to follow the natural course of the mind as it related the One which was the Oversoul to the Many, or as it related the Many to the One.

The mind [he wrote] is urged to ask for one cause of many effects; then for the cause of that; and again the cause . . . self-assured that it will arrive at an absolute and sufficient one,—a one that shall be all . . . Urged by an opposite necessity, the mind returns from the one to the many which is not one, but . . . many; from cause to effect; and affirms the necessary existence of variety, the self-existence of both, as each is involved in the other. These strictly-blended elements it is the problem of thought to separate and reconcile.

Such was the idea Emerson had of the method of his essays, and a reader who has a great deal of patience and some skill in dialectic can, indeed, see that the essays are constructed according to this pattern.[☆] Most readers, however, will not care to follow the involvements of his peculiar Transcendental structure. They will find that, though some of Emerson's essays have organizations such as they have seen in other compositions, most appear to lack coherence and unity. These readers will agree with Carlyle's remarks to Emerson in a letter about the *First Series of Essays*:

The sentences . . . did not . . . always entirely cohere for me. Pure genuine Saxon; strong and simple; of a clearness, of a beauty—But they do not, sometimes, rightly stick to their foregoers and their followers: a paragraph not as a beaten *ingot*, but as a beautiful square *bag of dulcannon* shot held together by canvas!

For them, the virtue of the essays will be found chiefly in individual sentences—sentences excellent for their extraordinary proverbial quality, for their compact expression of profound thoughts. Even such small units as sentences, however, show that Emerson, like other essayists

☆
For some analyses of Emerson's essays according to this principle, see W. T. Harris, "Ralph Waldo Emerson," *Atlantic*, 1882, CL, 238-252 • W. Blair and Clarence Faust, "Emerson's Literary Method," *Modern Philology*, 1944, XLII, 79-95

of his day, combined old materials and methods with newly discovered ones which particularly appealed to him, thereby making his purposeful writing seem a new thing.

AMERICAN FICTION COMES into ITS OWN

When authors of the prewar period wrote fiction, they were inclined to consider carefully whether the setting of their narratives should be remote or near at hand in both time and space. Both kinds of settings were popular in the literature which was generally admired. German and British Gothic romances—or tales of terror—utilizing exotic backgrounds were extremely popular; so were Sir Walter Scott's historical novels, the last of which appeared in 1832. Across the ocean, in addition, flourished fiction which portrayed the manners and talk of common folk. This fiction had a large audience in the United States: England's Maria Edgeworth (1767-1849) and Charles Dickens (1812-1870), who wrote about common folk, were perhaps the most popular authors in this country—native authors included—during this period. When our authors told stories, they adapted both types of settings and characterizations to their own purposes.

Hawthorne: Romance and Allegory

Poe's aim, to create "a certain unique or single effect," led him, it will be recalled, to subordinate everything in the tale to the effect—setting, characterization, incidents, and tone or style. In so doing, he skillfully utilized characteristic backgrounds, characters, and incidents of Gothic romance. But Poe believed that the most soul-stirring effect could be achieved by blurred rather than precise details. Here, of course, he differed from Hawthorne, whom he greatly admired and at times rather badly misread—differed, as a matter of fact, from most New Englanders. In this period, one who saw a Yankee village from a distance noticed first of all the tidy white-spired churches which were an important and recurrent motif in the quiet green landscape—a motif which stood for a great force in the life of the section. Founded by zealots, New England for decades had produced moralizing literature, and it continued to produce it even when its authors

wrote fiction. For Hawthorne, preëminent among New England fictionists, the theme of tale was tremendously important. Although the Gothic influence was almost as pronounced with Hawthorne as it was with Poe and though sentimental fiction and allegorical narrative shaped his fiction, these devices were subordinated to Hawthorne's own New England purpose.

As has frequently been noticed, paraphernalia of the tale of terror—animated ancestral portraits, fiendlike villains, men who sold their souls to the devil, witches, unnatural portents figured notably in this author's tales and novels. The influence of sentimental fiction, too, is clear—even in such a masterpiece as *The Scarlet Letter*. The penalty of seduction, a cliché stock-in-trade of the sentimentalists (see p. 488), is the chief substance of this great romance. A typical character of the fiction of sensibility—a child bringing sunshine into a gloomy home and gently leading parents to virtue—is little Pearl, an important character in the work. The misled feminist and the ministering angel popular in fourth-rate novels are combined in the portrayal of Hester. Calvinistic villainy common in sentimental fiction was bestowed upon Chillingworth. The sensibility of the minister and his dying glimpses of heavenly glory are hackneyed motifs in the sentimental pattern. And in the tales, as in the longer works, one familiar with the fiction of feeling will see its stuff used by Hawthorne.

From childhood, in addition, Hawthorne had read with much pleasure a type of fiction not of his own time so much as of the distant past—the allegorical narrative. When in 1843 he listed the authors he considered most notable, it is significant that along with such conventional choices as Homer, Cervantes, Shakespeare, and Milton he named masters of fable and allegory: Aesop, Ariosto, Spenser, and "Bunyan, moulded of homeliest clay, but instinct with celestial fire." Other influences in addition to his liking for these authors encouraged him to borrow from them. Like Emerson, he had philosophical ideas about the artist's duty to give meaning to natural objects when he depicts them. The artist, he felt, cannot exactly reproduce the grandeur of nature which itself suggested truth. His "only resource," he decided, was to substitute something "that may stand instead of and suggest the truth." His Preface to *T*

House of the Seven Gables (p. 1053) suggested that a great advantage of a Romance was that it "has fairly a right to present . . . truth under circumstances, to a great extent, of the author's own choosing or creation." This truth, moreover, might be the unifying element. "In all my stories, I think," he remarked, "there is one idea running through them like an iron rod, and to which all other ideas are referred and subordinate. . . ." Lowell's comment noted the same sort of ideational unity: "It is commonly true of Hawthorne's romances," he said, "that the interest centres in one strongly defined protagonist,—perhaps we should rather say a ruling Idea, of which all the characters are fragmentary embodiments."

Subtly adapted devices of allegorical fiction—for the portrayal of background, the depiction of character, and the selection of incidents—made possible Hawthorne's amalgamation of Gothic and sentimental elements in truly impressive fiction. Reminiscent of Spenser's *Forest of Error* or *Bower of Bliss*, in which many details of background are made to stand for the author's concepts, are Hawthorne's descriptions of the Pearson cottage in "The Gentle Boy" and of the exotic garden in "Rappaccini's Daughter" (p. 1025). Characters, too, are made embodiments of ideas according to allegorical formulas. Sometimes older allegorists, for instance, associated significant articles or details of dress with a character: in *Pilgrim's Progress* Christian always labors under his heavy burden; in *The Faerie Queene* the knight has his "bloudie crosse." In "The Minister's Black Veil" (p. 997) Hooper wears his puzzling but meaningful bit of crepe. Again, older allegorists at times showed physical deformities which betokened spiritual deformities, as in the cases of Bunyan's Giant Despair and Spenser's Malbecco. Similarly, Hawthorne made the boy who alone could not yield to the "gentle boy's" influence a twisted cripple. Hawthorne ingeniously conceived many other symbolic attributes of characters to signify their import: the gleaming smile of Minister Hooper and the perfume of Beatrice, to cite only two examples.

"The Artist of the Beautiful" (p. 1013) both embodies and expounds Hawthorne's critical theory. The story treats, as its author says, "the troubled life of those who strive to

create the beautiful,” and the opening paragraph establishes a contrast—between the artist working in bright light, and the thwarters of the artist, standing in darkness—which is important throughout the tale. Warland, who is given the attributes of the eternal artist, is the creator of a butterfly in the beauty of which is “represented the intellect, the sensibility, the soul” of such a creator. Each of the other characters is, in one way or another, a thwarter of the artist, and each is so presented as to signify one of the hostile forces which work against art. All details, images, and happenings in the tale are richly fused with the meaning—and this fusion is highly typical of the unique art which Hawthorne discovered for himself.

Melville: Symbol and Actual

In 1850 Hawthorne and Melville, living a few miles apart but not yet personally acquainted, read one another’s writings and found them good. What each author said about the other indicates likenesses and differences. Melville admired Hawthorne for confronting the darker aspects of life. Hawthorne wrote: “I have read Melville’s works with progressive appreciation of the author. No writer ever put reality before the reader more unflinchingly than he does in *Redburn* and *White Jacket*. *Mardi* is a rich book, with depths here and there that compel a man to struggle for his life. It is so good that one scarcely pardons the writer for not having brooded longer over it, so as to make it a good deal better.”

Clearly there was a kinship between Melville and Hawthorne in artistry as well as in philosophy. Both thought that the theme of a fictional work—that which is more than surface meaning—was very important. Both thought that an author should manipulate imagery, characterization, and plot to convey his ideas. But Hawthorne indicated a difference when he complained that his neighbor had not “brooded” enough over his material. Melville’s fiction, if it may employ Hawthorne’s terms, did not subdue “the Actual.” “He felt instinctively,” William Ellery Sedgwick asserts in *Herman Melville*, “that the effective use of a fact as symbol, having both inward and outward reference, depended on the preservation of its outward reality.” Melville’s aim—comparable with the way of writing which Hawthorne contra-

with his own achievement in the Preface to *The Scarlet Letter*—was “to diffuse thought and imagination through the opaque substance of today, and thus to make it a bright transparency . . . to seek, resolutely, the true and indestructible value that lay hidden in the petty and wearisome incidents, and ordinary characters. . . .” Though Hawthorne could not write thus, could not thus simultaneously convey meaning and a sense of actuality, he could admire others who were able to, since he recognized that writing of this type achieved an objective similar to his own in a contrasting fashion.

Mardi is perhaps not the best illustration of Melville’s typical procedure. Despite Hawthorne’s criticism, this work is probably closer to the New Englander’s conception of “the Romance” (p. 1053) than anything else Melville wrote. Romance though it is, it includes many more earthy details (see the description of Congress, p. 1067) than Hawthorne would ever have been likely to insert into a typical piece of fiction. And when one turns to other, more typical works by Melville—works in which he presents many particular and vivid details, based on fact and experience, representing the everyday lives of seamen—the contrast becomes very clear. His selection and presentation of such facts made them actual, near at hand rather than remote, and at the same time meaningful. “Benito Cereno” (p. 1076)—not only one of Melville’s most typical stories but also one of his best—is a good example. Based as it is upon a first-hand account of Captain Delano’s real experience, it loses little of its factuality when it is transformed into fiction. At the same time the changes in the nature of the details and in the structure of the narrative make possible the development of a significant theme.

Kennedy and Simms: Romance and Reality

The portrayal of real life without much philosophizing was the purpose of several fictionists contemporary with Melville. Some of these clearly patterned their work after Washington Irving and his school—notably Caroline Kirkland, a native of New York, in the sprightly letters of *A New Home* (p. 1150), and John Pendleton Kennedy of Baltimore, in *Swallow Barn*. Something like the romantic quality of Irving’s picture of England entered,

however, into Kennedy's mellow depiction of the ante-bellum plantation. As F. P. Ga asserts in *The Southern Plantation*: "He threw the glamour of romantic coloring over all: over the century old brick mansion with its ornate approaches, its wings, its doors, its great hall, its spacious rooms, its antique furniture; over the characters, their dress, conversations, point of view; over the meals . . . ; over the Negro quarters . . . ; over the whole conduct of life. . . ."

William Gilmore Simms, too, according to his own avowal, tried to adhere to "realism" in presenting "man in all his phases." Influenced by Cooper and Scott, however, in many of his novels he turned his attention to the past. Furthermore he unfortunately followed the example of his models in creating a number of colorless heroines and stuffy heroes. Nevertheless, in presenting the comic Porgy and a scattering of poor whites and in describing Southern scenery he did manage to infuse a good deal of reality into his pages.

HORSE SENSE and HUMOR

Still it remained for the humorists of the day, both Northern and Southwestern, to get the largest amount of common life into their depictions. Their technique for showing scenes of ordinary life was, in important ways, the freshest of the period. So far did the humorists of the Southwest move in the direction of realism, as a matter of fact, that the editors have placed it in Volume II, where its value in preparing for postwar realism may be clearly shown.

The ancestry of the New England humorists of the day, a notable group, is to be traced less directly to the eighteenth-century wits who inspired Holmes than to the portrayals of American character in almanacs, tales, and travel books of the nineteenth century. Scott's fiction, too, with its representation of low characters by the depiction of manners, dress, and speech, had some value as a model for these limners of folk indigenous to a particular part of the country.

Preachments figured in the writings of almost all the most notable Northern humorists. Seba Smith led the group to see the great possibilities of humorous writing with a purpose when, in 1830, he launched his creation, Jack Downing, upon a career destined to last (with some interruptions) until the eve of the Civil War. In letters which he wrote to the home-

or to newspaper editors, Smith's character Jack told of his adventures in politics, and now and then one of the family would write Jack news of how things were going back in Downingville. Since Jack purportedly spent a great deal of time with leading public men in Washington, on the battle front during the Mexican War, and in the European capitals, many interesting things about current controversies turned up in the letters.

So wide a following did Jack gain that C. A. Davis, a commercial man in New York, deliberately stole the character (simply renaming him J. Downing) and used him to help Financier Nicholas Biddle in the fight against Andrew Jackson's United States Bank policy. Davis' J. Downing had a brief career and fought a losing battle, but Biddle was sure that Downing had been a good fighter. And when, in the days of the Mexican War, James Russell Lowell was looking around for a way of preaching his views to a wide public, he, like Smith and Davis, hit upon the idea of letting one Hosea Biglow speak for him. The result was that this scion of a Brahmin family wrote some of the most memorable examples of this kind of humor.

Written to appeal chiefly to the relatively uneducated Yankee farmers and mechanics, humorous pieces had to dramatize the way of thinking prevalent in that class. According to that way of thinking the best person to point out the path to what was true and what was right was one with sound common sense—a person who had been born with a sound head, who had had experiences in the world of men rather than of books, and who arrived at his solutions of current problems on the basis of those experiences.

This philosophy, given new prestige by its triumphs in Jacksonian politics, determined the nature of the characters to appear in these papers—either horse-sense characters such as Jack Downing or Hosea Biglow, fool characters such as Birdofredum Sawin, or both. The characters blessed with common sense offered sound solutions to current problems; the chump characters urged actions which were patently muddleheaded. Since the earmarks of either kind of character would be his background, his way of thinking, his way of talking, it was necessary to show something about his environment and to let him talk a good deal. But since

the pieces had to appear in the columns of the rather skimpy newspapers of the day, they had to be short.

These factors largely determined the nature of the Yankee humorous writings of Smiley Davis, Lowell, and dozens of others such as George E. Foxcroft, Tobias H. Miller, Matthew Whittier, and Thomas Chandler Haliburton. The characters divided sharply on the basis of their being either common-sensible or the opposite, and various devices were used to make clear to which class they belonged. Their talk was that of the uneducated—the native dialect which more and more, as time passed, was to shape the style of American literature. They showed, in brief snatches, what kind of minds they had, what their background and experience had been, what they had figured out on the basis of their experience. Often, if they were strong on common sense, they uttered aphorisms of the sort favored by ordinary men in America ever since the days of Poor Richard. (Examples are Jack Downing's "Sometimes it gets folks so they can't see at all—so do the newspapers"; or Hosea Biglow's "The moral question's always plain enough; it's jes' the human-natur' side ther's tough.") Often, too, if the creators knew well the background and characteristics appropriate for them, these characters were portrayed with an abundance of authentic detail—and the matter as well as the manner of the fiction about them was both native and novel.

POETRY: A COMBINATION of the OLD and the NEW

The nearest approach in this period to such humor in poetry—by authors other than Lowell of course—is offered by the songs of the Singers of the West (pp. 1156-1161). These were in the tradition of ancient and modern balladry—composed by the people (or by an artist who thought as they did), for the people, and kept alive by the people. At this time, little attention was paid to such crude poems, but in a later period many serious poets learned much about art and life from these earthy and vigorous songs.

For the most part, the poetry of this prewar period had more of the elegance and remoteness characteristic of Poe than of the simplicity and immediacy of the author of "Hell in Texas."

The background of the cultured New England poets led them to think of poetry as the height of elegance. Among the books which Holmes listed as obligatory reading for a boy of a good Boston or Cambridge family was "Pope, original edition, 15 volumes, London, 1717." Not only Holmes but others as well who had learned to like literature as youngsters in ancestral libraries had a natural tendency to worship somewhat old-fashioned literary gods. Bowdoin and Harvard were likely to encourage this tendency with their classical curriculums and their courses in writing based upon Blair's old-fashioned, square-toed *Rhetoric*. When Emerson was in Latin school, his favorite declamation was from the "Pleasures of Hope," a typical eighteenth-century philosophizing poem written by Campbell in heroic couplets. When he versified an old nursery story for his brother, Emerson wrote:

So erst two brethren climb'd the cloud capp'd hill,
Ill-fated Jack and long-lamented Jill,
Snatched from the crystal font its lucid store,
And in full pails the precious treasure bore.
But ah! by dull forgetfulness oppress'd
(Forgive me, Edward), I've forgot the rest.

Many gems of expression in these lines might have been by polished Alexander Pope. The superstition that this same Pope was "the greatest poet that ever lived" was, Lowell confessed, inculcated in him by childhood teachers; and, similarly, the other famous New England authors from babyhood to manhood listened to encomiums of the older poets.

But the tradition of culture, though it fostered approval of old ideas and models, also fostered the discovery and development of new ones. The new forces it put to work in Massachusetts made certain that the prominent authors would modify, in various fashions, the ways of looking at things and the ways of voicing attitudes. Literary men of Massachusetts might be sketchily informed about the nation to the West and to the South, but in this period they were likely to widen their horizons by traveling extensively in the Old World. As

Parrington has noticed, the New England Renaissance "involved three major strands: social Utopianism that came from revolutionary France; the idealistic metaphysics that emerged from revolutionary Germany; and the new culture that spread with the development of literary romanticism . . . these strands . . . are but different, new world phases of a comprehensive European movement. . . ." The widespread revolutionary spirit invaded both quiet Cambridge libraries and the woods by Walden Pond.

From the old and new books which they discovered abroad and at home, the New England authors took hints about poetic techniques. They learned procedures in writing from modern writers such as Goethe, Wordsworth, Coleridge, and Keats and from those of other times, such as the writers of Norse epic poems, the authors of ancient Oriental works, and Plato and the Neo-Platonists. In much of the poetry of the section, as a result, there was a combination of the old and the new—and each author's conception of poetry determined the nature of combinations he made.

Holmes: "Florist in Verse"

Much of Holmes' poetry had a periwig-and-velvet-breeches quality about it. In such verse there were so many similarities in form and substance to that of Goldsmith, Pope, Gray, Campbell, Gay, and others of their century that Holmes appeared, in the words of one critic, to be "less a revival of the eighteenth century than its latest survival."

Holmes' kinship with the coffee-house gentry was in part the result of his paying tribute to the tribute of imitation, in part the consequence of his seeing poetry, as they often had, as a graceful social accomplishment. "I'm a florist in verse," he sang, "and what would people say, if I came to a banquet without my bouquet?" So successful was he at writing "by request of friends" that around Boston, almost invariably, first-class celebrations, anniversaries, banquet receptions, and professional meetings were likely to list on the program an appearance by Dr. Holmes, poem in hand. Again, he wrote verse appropriate for reading at more informal gatherings, "at the breakfast table," perhaps, or "over the teacups."

All this meant a good deal about his poems. For *vers de société* or *vers d'occasion*, he saw as well as had the Neoclassicists, had to have certain qualities of tone and form. In it deep emotion was as much out of place as it would be in a social group; the tone had to be light—wit and pathos were better than deep feeling. Much depended upon exactly the right phrasing—polished but conversational, graceful, witty, condensed. With these points in mind, Holmes wrote some of the finest familiar verse this country has produced.

Yet Holmes himself in the end considered his most typical poems evidences of his talent rather than of his genius. Eventually he came to feel that his earliest conception of poetry, that of a young man “trained after the schools of classical English verse,” had represented “simple and partial views,” since it had dealt too exclusively with “the constructive side of the poet’s function.” “I should rather say,” he continued, “if I were called upon now to define that which makes a poet, it is the power of transfiguring the experience and shows of life into an aspect which comes from his imagination and kindles that of others.” His occasional poems, he told Lowell, were “for the most part to poetry as the beating of a drum or tinkling of a triangle is to the harmony of a band.” True poetry, he believed, was inspired: its thought and to some extent its form came to a poet in an intuitive flash (see p. 810). Only once during his career did he feel sure that he had written such poetry—in “The Chambered Nautilus” (p. 814).

This romantic concept of the inspired poet was shared by all the famous New England literary men, both those of Cambridge and those of Concord. These men differed only in their ideas about the extent to which a poem was inspired as compared with the extent to which it was consciously contrived. The Brahmins rather tended, with Holmes, to see careful artistry playing an important part. They also joined him in allowing the older conception of poet as teacher to shape their writings.

Longfellow: Master of Words and Accents

Longfellow in particular has been praised by recent scholars for his technique and scolded for his didacticism. His prosodic skill was developed most definitely, perhaps, by his achieve-

ment of the exacting task of changing over to English, without signs of painful effort, *chansons* of French troubadours, the *lieder* of German lyricists, the *terza rima* and sonnet Italians, the eclogues of Latin poets, the sagas of Finnish bards. However he acquired skill, as Professor Shepard says, "Together with his thought, he had at the same moment a clear notion of the form in which it could be expressed most effectively . . . and it is for this reason that in his better work the thought seems to fill the form without crowding or inflation."

Longfellow's art concealed art largely because of its simple naturalness. Unlike most poets, he managed to get both rhyme and rhythm without using many unusual words and, moreover, without changing the normal order of phrases and sentences. What Professor Allen, in *American Prosody*, says about the hackneyed poem "The Village Blacksmith" hints at simple compliments which might be paid to more important achievements: "Its severe simplicity of diction and regularity of rhythm is likely to make us underestimate the technical achievement . . . There are only two inversions in the whole piece: 'a mighty man is he' and 'onward through life he goes.' The natural speech and syntax . . . was practically unique in American versification in 1839." The fifteen representative poems by Longfellow in this volume (pp. 771-8) show his simple diction and natural grammatical arrangement. Also, it happens, they show him using without ostentation or evident difficulty each of the ordinary meters (iambic, trochaic, dactylic, and anapestic), some of them in unusual ways, and combining them with several metrical devices which are quite extraordinary. (Note the refrain of "My Lost Youth," and the spacing of accented syllables in "The Skeleton in Armor," "Jugurtha," and "The Tide Rises and the Tide Falls.")

This master of words and accents could, at times, make each word, each line do its duty. The plots of his best narratives he developed in excellent order. His best lyrics—what might be said against their preachments—at least have the unity which development of a single thought or sentiment gives them. The unity of thought in such poems as "The Rainy Day," "The Arrow and the Song," and "Jugurtha," cannot be surpassed; in each the first part offers some image, and the second part suggests, usually with the aid of incremental repetition.

spiritual connotation in a detailed parallel. Similarly, "The Bridge" starts with a description of a scene, then passes to the meaning of the scene to the poet, and ends by applying the meaning to all men. In such simple structures, there is integration of the sort important in sonnets, a form particularly well handled by Longfellow.

Despite such prosodic skill and such unity and coherence of thought, Longfellow often failed to please for three reasons. The thought which held together a lyric of his was too often platitudinous. Secondly, more even than Holmes or Lowell, he was a bookish, library poet. One sees why Whitman complained of Longfellow's poetry being "reminiscent, polish'd, elegant, with the air of finest conventional library, picture-gallery or parlor, with ladies and gentlemen in them. . . ." Finally, although his poems were logically constructed, they were likely to be badly put together emotionally—or connotatively. That similes and metaphors should be more than handsome ornaments—that they should be as organic to the poem as the thought—he apparently did not conceive. Hence in many of his poems he used imagery which modern readers find incongruous, and in only a few did he avoid jarring connotations.

Lowell: Pioneer in Freedom of Verse Form

Professor Howard Mumford Jones has noticed that "readers do not turn to Lowell as they do to Longfellow, for a body of verse; and though certain lyrics are individual favorites, they are such as two or three other poets might have written. 'To the Dandelion' is Keatsian; many readers confuse 'The First Snowfall' with Bryant's poem on the same theme, and 'The Present Crisis' inevitably suggests Whittier." This comparison can be carried further: *A Fable for Critics* (p. 834), with its Pope-like critiques, suggests Holmes; and "Auspex" (p. 871) might well have been written by Longfellow. Lowell perhaps busied himself too much with other matters to develop a poetic style all his own.

Yet in some of Lowell's work there are merits not discoverable in Holmes or Longfellow. His *Biglow Papers* are the most effective political satire in verse yet written in America, and *A Fable for Critics* combined sharply phrased wit with shrewd

literary judgments as no other poetry in this country has. In his famous "Commemorative Ode" he showed ability in shaping a long contemplative poem beyond the skill of his fellow Brahmins. He had exactly the perception of the emotional relationship that Longfellow lacked. "My notion of a true lyric," he said, "is that the meaning should float steadfast in the center of every stanza, while the vapory emotions . . . float up to it and over it, and wreath it with an opal halo which seems their own, but is truly its own work. The shades of emotion on which there floats the meaning, clear and sole and sharp-cut in its luminous integrity. . . ." Lowell wrote some poems in which the figurative language thus related the emotion to the meaning as a whole: "To the Dandelion" (p. 833), "The Courtin'" (p. 858), "Auspex" are instances. Finally, Lowell did make the sort of technical contribution to American versification best suggested by his irregular "Ode Recited at the Harvard Commemoration." In Professor Allen's words, this poet's prosody "introduced into American poetry the freedom which we find in the first two or three decades of nineteenth-century English poetry. . . . This freedom includes a more varied placing of accents and the combination of different kinds of feet to produce a suggestiveness of tone and cadence. . . . Yet . . . Lowell's versification is more important for the lessons it teaches than for the poetic beauty it achieves."

Emerson and Thoreau: Rebels Against Nineteenth-Century Formalism

Some free verse lines of the Transcendentalist, Ralph Waldo Emerson, serve to set off his attitude in poetry from those of the Brahmins who have just been considered:

I will not read a pretty tale
To pretty people in a nice saloon
Borrowed from their expectation,
But I will sing aloud and free
From the heart of the world.

Thoreau, another Transcendentalist, also stated a view of writing at variance with that of the genteel Cambridge men when he wrote: "Enough has been said in these days of the cha-

of fluent writing. . . . The surliness with which the woodchopper speaks of his woods, handling them as indifferently as his axe, is better than the mealy-mouthed enthusiasm of the lover of nature. Better that the primrose by the river's brim be a yellow primrose, and nothing more, than that it be something less." In some ways, so far as form and substance were concerned, the most radical of the ante-bellum New England versifiers were the Transcendentalists, Emerson in a few great poems and Thoreau in even fewer.

"The form [of Transcendental poetry]," Cooke notes, "is often rugged, the verse is halting and defective. The metres stumble, and . . . rhymes are not correct. The poems are . . . metaphysical, subtle, and complicated in their thought. . . ." Unlike Longfellow, who acquired his free and easy ways with verse by echoing foreign metrical schemes, or Lowell, who came late enough to learn lessons from Shelley, the Transcendentalists found their chief models in a seventeenth-century school of unorthodox versifiers. From the metaphysical poets—Marvell, Crashaw, Donne, and others—who had rebelled against the dulcet melodiousness of Elizabethan lyricists, these rebels against the nineteenth-century saccharinity learned something about the forcefulness which results from breaking up regular patterns. It may be true, as some critics claim, that the very infrequency of the Concord men's excursions into verse had something to do with the harshness of their songs. But the most important cause for their radicalism, probably, was that the nature of Transcendental poetry, like that of Transcendental prose, was influenced strongly by the philosophy of its creators.

According to this philosophy the matter and the expression of a poem, one and inseparable, were both spontaneously inspired. Theoretically, this would lead a Transcendentalist, trusting his "instinct," to set down his songs without change; actually, it did cause them to tinker with initial expressions less than other poets did. And the intuitive expression, in their opinion, would carry to others the message the poets themselves had been vouchsafed. It would do this because the poets would pass on to readers the same symbols which originally had suggested eternal verities to the poets. "Things," said Emerson, "admit of being used as symbols, because

nature is a symbol, in the whole, and in every part." The whole theory of Emerson and his group has been admirably summarized by Miss Gorely (in "Emerson's Theory of Poetry," *Poetry Review*, July-August 1931, XXII, 272-273):

Emerson . . . believed that poetry . . . comes into being as the result of inspiration. In that moment the poet sees the very essence of things. . . . The poet makes the unseen visible by means of language. But he is not the conscious creator. Vision, also, shows him the symbols and the thought takes its own form in language that is rhythmical. Because of this, there is a certain indwelling beauty of poetry . . . poetry is spiritual and forms a link between the visible and invisible worlds.

Thus the symbols were important, and the ideas of deep perceptions for which the symbols stood were even more important—so significant that, as in earlier metaphysical poetry, they controlled everything else in a poem. The sentiment often cultivated by the Brahmin poets was practically crowded out by the thought. Since only imagery which developed such a thought was relevant, merely ornamental imagery was avoided. And the concept being expressed determined the general structure of the poem. "It is not metres, but metre-making argument," said Emerson, "that makes a poem,—a thought so passionate and alive, that, like the spirit of a plant or an animal, it has an architecture of its own and adorns nature with a new thing." This theory suggested the four chief methods for ordering material used by Emerson and Thoreau: (1) as in "The Snow-storm" (p. 929) or "Though All the Fates" (p. 979), the poet might give a description of an object or scene which embodied and implied meaning; (2) as in "Brahma" (p. 936) or "The Summer Rain" (p. 977), the poet might list a number of parallel phenomena; (3) as in "Each and All" (p. 927) or "Inspiration" (p. 978), the poet might record the process by which he arrived at a great truth; (4) as in "Rumors from an Æolian Harp" (p. 976), the poet might record a state of inspiration.

Logically, the meter in such poems should be appropriate for the emphasis of both

symbols and the truths for which the symbols stand. "There is a soberness," wrote Thoreau, "in a rough aspect, as of unhewn granite, which addresses a depth in us, but a polished surface hits only the ball of the eye." And Emerson, in "Merlin" (p. 930), pointed out that:

The kingly bard
Must strike the chords rudely and hard,
As with hammer or with mace;
That they may render back
Artful thunder, which conveys
Secrets of the solar track. . . .

In these ways, the Transcendental poetry of Emerson and Thoreau looked backward to seventeenth-century metaphysical poetry, forward to the type of poetry admired most in the third and fourth decades of the present century.

Thus in the essay, in fiction, and in poetry, the authors of the period 1829-1860 combined old and new materials and techniques. As a result, these writers gave memorable expression to the ideas about which our countrymen were excited during the American Renaissance, one of the richest periods in our literary history.

W.B.

Chronological Table of Literature and History

1829

Poe's *Al Aaraaf, Tamerlane, and Minor Poems* • Irving's *Conquest of Granada* • Bryant became editor of the *New York Evening Post*

Andrew Jackson inaugurated seventh President •
The first locomotive was used in America

1830

Holmes' "Old Ironsides" • Godey's *Lady's Book* founded • *The Book of Mormon* • Benjamin Silliman's *Elements of Experimental Chemistry*, one of the first scientific textbooks in America • Lyell's *Principles of Geology*, a

pioneer work in England • Victor Hugo's *Hernani*, a landmark in French romanticism

Webster-Hayne debate on the issue of the Union •
The settled frontier reached Independence, Missouri

1831

Poe's *Poems* (second edition) • Whittier's *Legends of New England* • W. L. Garrison established the *Liberator*, an antislavery journal, at Boston

Nat Turner's slave insurrection in Virginia, in which over fifty whites were murdered, and for which the *Liberator* was blamed by slaveholders

1832

Bryant's *Poems* • Irving's *Alhambra* • Kennedy's *Swallow Barn*

Death of Freneau • Oregon Trail in general use • Black Hawk War, in which Lincoln served as captain • Clay's tariff, which removed some of the "abominations" of the 1828 tariff • Nullification of the tariff by South Carolina • Jackson's proclamation against nullification • New York City established free public schools • The Reform Bill in England, which extended the franchise and eliminated many of the "rotten boroughs"

1833

Poe's "MS Found in a Bottle" • Seba Smith's *Life and Writings of Major Jack Downing* • Carlyle's *Sartor Resartus*

The English Oxford Movement, a revival of Romanism within the English Church, initiated by John Keble's sermon at Oxford • Jackson's second inauguration • Cyrus H. McCormick's reaper • Oberlin became the first co-educational college • Abolition of slavery in the British colonies • The English Factory Act, which improved working conditions in English factories

1834

Narrative of the Life of David Crockett of West Tennessee

1835

Irving's *Tour on the Prairies* • Poe began his contributions to the *Southern Literary Messenger* in Richmond • Kennedy's *Horse-Shoe Robinson* • Simms' *Yemassee* and *Partisan* • Longstreet's *Georgia Scenes* • James Gordon Bennett founded the *New York Herald*

Colt patented the revolver

1836

Irving's *Astoria* • Emerson's *Nature*

Fall of the Alamo; defeat of Mexicans by Texans under Sam Houston at San Jacinto • Roger B. Taney succeeded John Marshall as chief justice • Arkansas, the twenty-fifth state, admitted with slavery • Mt. Holyoke founded, the first of the women's colleges

1837

Irving's *Adventures of Captain Bonneville, U. S. A.* • Emerson's *American Scholar* • Hawthorne's *Twice-Told Tales*

Inauguration of Van Buren, the eighth President 4 March • Financial panic • Republic of Texas with Houston as president, recognized by the United States 3 March • Elijah P. Lovejoy, editor of an abolitionist paper in Alton, Illinois, killed by a mob • Admission to the Union of Michigan, the twenty-sixth state

1838

Kennedy's *Rob of the Bowl* • Emerson's "Divinity School Address" • Cooper's *American Democrat*

Atlantic crossing by steamships

1839

Longfellow's *Voices of the Night*

First lectures at the Lowell Institute in Boston • Benjamin Silliman, Yale chemist

1840

Poe's *Tales of the Grotesque and Arabesque* • Cooper's *Pathfinder* • Dana's *Two Years Before the Mast* • Dial (1840-1844), Transcendental magazine edited by Emerson and Margaret Fuller • Bronson Alcott's *Orations and Sayings*

1200 cotton factories in the United States, two thirds being in New England • United States Census: 17,000,000 free whites, 400,000 free Negroes and 2,500,000 slaves

1841

Cooper's *Deerslayer* • Emerson's *Essays* (First Series) • Melville shipped on the *Acushnet* for the South • Longfellow's *Ballads and Other Poems* • Thorpe's *Big Bear of Arkansas* • Carlyle's *On Heroes, Hero-Worship, and the Heroic in History* • Browning's *Poems*

Hawthorne at Brook Farm • Harrison inaugurated as ninth President; died one month later; Tyler inaugurated as tenth President • Act for preemption of public land: settlers could preempt 160 acres at \$1.25 per acre

1842

Hawthorne's *Twice-Told Tales* (second edition); his marriage and residence at the Old Manse • Longfellow's *Poems on Slavery* • Thoreau's "Natural History of Winter"

sachusetts" in *The Dial* • *Thoughts on the Present Collegiate System of the United States* by President Wayland of Brown University, anticipating the "elective" system later popularized by Charles W. Eliot • Charles Dickens' *American Notes*

Webster-Ashburton Treaty with Great Britain, settling the northeastern boundary between the United States and Canada • Dorr Rebellion in Rhode Island, which resulted in manhood suffrage in that state, the last state of the original thirteen to achieve it • Fremont's explorations in the far West • Trade unions declared lawful by Chief Justice Shaw of Massachusetts

1843

Holmes' "The Contagiousness of Puerperal Fever," revealing a medical discovery which the author later regarded as his chief title to fame • Thompson's *Major Jones's Courtship* • Carlyle's *Past and Present*

1844

Emerson's *Essays* (Second Series) • Lowell's *Poems*

Driven out of Illinois, the Mormons migrated to the Great Salt Lake • Morse's telegraph used between Washington and Baltimore • Goodyear patented process of vulcanizing rubber

1845

Poe's "Raven" • Cooper's *Satanstoe* • Simms' *Life of Francis Marion*, South Carolina hero in the Revolution • Hooper's *Adventures of Simon Suggs*, a "tall tale" book of the old Southwest

Florida, the twenty-seventh state, admitted to the Union with slavery • Texas, the twenty-eighth state, annexed to the Union with slavery, making fifteen slave states to thirteen free • Polk inaugurated eleventh President • The *Rainbow*, first of the clipper ships which became famous in the following decade, built in New York

1846

Poe's *Literati*, profiles of New York writers • Hawthorne's *Mosses from an Old Manse*; Hawthorne in the Salem Custom House • Whittier's *Voices of Freedom* • Melville's *Typee* • Thorpe's *Mysteries of the Backwoods* • Margaret Fuller was literary critic for Horace Greeley's *New York Tribune*

Louis Agassiz became professor of zoology at Harvard • Joseph Henry became the first director of the Smithsonian Institution in Washington • Great famine in Ireland, after which Irish immigration to the United States reached a new high • Treaty with Great Britain determined the Oregon boundary line • War with Mexico, "by act of Mexico" • Wilmot Proviso—prohibiting slavery in any territory to be acquired from Mexico—passed the House but was defeated in the Senate • Iowa, the twenty-ninth state, admitted as a free state • Howe patented the sewing machine • Ether first used successfully as an anesthetic in Boston

1847

Poe's "Ulalume" • Emerson's *Poems* • Longfellow's *Evangeline* • Thoreau's "Thomas Carlyle and His Works" in *Graham's Magazine* • Melville's *Omoo* • Emily Bronte's *Wuthering Heights* • Charlotte Bronte's *Jane Eyre*

Emily Dickinson attended the South Hadley Female Seminary (Mt. Holyoke) • Lincoln elected to Congress from Illinois • Hoe invented the rotary printing press

1848

Poe's *Eureka* • Lowell's *Fable for Critics*, *Biglow Papers*, *First Series*, and *Vision of Sir Launfal*—his "annus mirabilis" • Thackeray's *Vanity Fair*

Emerson lectured in England • Whitman sojourned in New Orleans • Mexican cession of what is now California, Nevada, Utah, and Arizona • Gold discovered in California, resulting in the famous "rush" • Wisconsin, the thirtieth state, admitted as a free state; the balance of free and slave states restored • The founding of the University of Wisconsin • Widespread revolutions in Europe

1849

Thoreau's *Week on the Concord and Merrimack Rivers*, and "Civil Disobedience" in Elizabeth Peabody's *Aesthetic Papers* • Melville's *Mardi* and *Redburn* • Parkman's *Oregon Trail*

Death of Poe • Taylor inaugurated twelfth President • Hawthorne lost his job in the Salem Custom House

1850

Emerson's *Representative Men* • Hawthorne's *Scarlet*

Letter • Whittier's *Songs of Labor and Other Poems* • Melville's *White Jacket* • Calhoun's *Speech on the Slavery Question* • Webster's *Seventh of March Speech* • Dickens' *David Copperfield* • Tennyson's *In Memoriam*

Death of President Taylor; succeeded by Fillmore, thirteenth President • Death of Margaret Fuller • Compromise of 1850: admission of California, the thirty-first state, as free state • A drastic Fugitive Slave Law • First act of Congress making land grants to aid in construction of railroads—in this case, the Illinois Central • United States Census 23,000,000

1851

Hawthorne's *House of the Seven Gables* • Melville's *Moby Dick*

Death of Cooper • Hawthorne and Melville in the Berkshires • Erie Railroad completed from New York to Buffalo • Clipper ship *Flying Cloud* made record of eighty-nine days from New York to San Francisco • Prohibition of liquor in Maine

1852

Hawthorne's *Blithedale Romance* and *Life of Franklin Pierce* • Melville's *Pierre*, his darkest tragedy • Mrs. Stowe's *Uncle Tom's Cabin*, greatest of all literary stimuli to the antislavery movement

Pennsylvania Railroad completed from Philadelphia to Pittsburgh

1853

Baldwin's *Flush Times of Alabama and Mississippi*, one of Lincoln's favorites • Ruskin's *Stones of Venice* • Matthew Fontaine Maury's *Lanes for Steamers Crossing the Atlantic*, pioneer work in oceanography

Pierce inaugurated fourteenth President • Hawthorne went to Liverpool as United States consul • Commodore Matthew C. Perry "opened" Japan to the Western World • Baltimore and Ohio Railroad completed from Baltimore to Wheeling • Chicago connected by railroad with New York and Boston

1854

Thoreau's *Walden*

Kansas-Nebraska Act establishing "squatter sovereignty" in those territories; bloody conflicts there between

free-state and slave-state settlers; emergence of Brown • Republican Party organized as protest against the Kansas-Nebraska Act • Anthony Burns, fugitive slave captured in Boston and returned to his owner despite efforts of a Boston mob to rescue him from the police • Preston Brooks of South Carolina assaulted Senator Charles Sumner of Massachusetts in the Senate chamber

1855

Longfellow's *Hiawatha* • Simms' *Forayers* • Whitman's "Barefoot Boy" • Whitman's *Leaves of Grass* • Melville's *Benito Cereno* • Browning's *Men and Women* • Kingsley's *Westward Ho!* • Matthew Arnold's *Poems*

1856

Emerson's *English Traits* • Simms' *Eutaw* • Melville's *Piazza Tales* • Whitman's *Leaves of Grass* (second edition, containing Emerson's letter) • Motley's *Rise of the Dutch Republic* • Flaubert's *Madame Bovary*

Illinois Central Railroad completed from Chicago to Cairo

1857

Founding of the *Atlantic Monthly* in Boston, with Louis Agassiz as editor • Founding of *Russell's Magazine* (1857-1858) in Charleston, with Paul Hamilton Hayne as editor • Trollope's *Barchester Towers* • Baudelaire's *Fleurs du Mal*

Inauguration of Buchanan as fifteenth President • Mark Twain piloted steamboats on the Mississippi (1857-1861) • Chief Justice Taney's *Dred Scott Decision*, a Negro was not a citizen and therefore had no right to bring a case in a Federal court • Financial panic

1858

Longfellow's *Courtship of Miles Standish* • Holmes' *Autocrat of the Breakfast-Table*

Hawthorne in Italy • The Lincoln-Douglas debate in Illinois on the questions arising from the slavery issue • Admission of Minnesota, thirty-second state • Federal troops compelled the subjection of the Mormons to the Federal government

1859

Irving's *Life of Washington* • Thackeray's *Virginians* • Meredith's *Ordeal of Richard Feverel* • George Eliot's *Adam Bede* • Fitzgerald's *Rubáiyát of Omar Khayyám*

- Darwin's *On the Origin of Species by Natural Selection*, the most influential scientific work of the century
- Death of Irving • Oregon admitted, thirty-third state • Silver discovered in the Comstock lode, Nevada
- First oil well, Oil Creek, Pennsylvania • John Brown's raid on Harper's Ferry

1860

Emerson's *Conduct of Life* • Hawthorne's *Marble Faun* • Thoreau's "Plea for John Brown" • Whitman's *Leaves of Grass* (third edition) • Howells' campaign biography of Lincoln

First Japanese embassy received at Washington • United States Census: 31,500,000, including 450,000 free Negroes and 4,000,000 slaves • South Carolina seceded from the Union

1861

Timrod's "Ethnogenesis" • Holmes' *Elsie Venner* • Reade's *Cloister and the Hearth* • George Eliot's *Silas Marner*

Howells went to Venice as United States consul (1861-1865) • Henry Adams went to London as secretary to Charles Francis Adams, minister to England (1861-1865) • Telegraphic communication opened across the continent • Kansas admitted as a free state, thirty-fourth state • Mississippi, Florida, Alabama, Georgia, Louisiana, and Texas seceded from the Union • Confederate States of America organized at Montgomery with Jefferson Davis president • Lincoln inaugurated sixteenth President of the United States • The Civil War began when the Confederates fired on Fort Sumter, 12 April • Virginia, Arkansas, Tennessee, and North Carolina joined the Confederacy • Great Britain and France recognized the belligerency of the Confederate States • The First Battle of Bull Run • Unification of a large part of Italy under the leadership of Cavour

1862

Lowell's *Biglow Papers, Second Series* • Holmes' *Songs in Many Keys* • Timrod's "Cotton Boll" • Victor Hugo's *Les Misérables*

Death of Thoreau • Merrimac-Monitor engagement in Hampton Roads, first battle of ironclads • The Battles of Shiloh, Seven Days, Second Bull Run, Antietam, Murfreesboro • The Lancashire cotton famine in England • Pacific Railway Act to promote by land grants the construction of a railroad between Missouri points and California • Morrill Agricultural College Act granting public land to states for the founding and support of colleges of agriculture and the mechanical arts

1863

Hawthorne's *Our Old Home* • Longfellow's *Tales of a Wayside Inn* • Whittier's "Barbara Frietchie" • Lincoln's Emancipation Proclamation and "Gettysburg Address" • Lyell's *Geological Evidence of the Antiquity of Man* • Huxley's *Man's Place in Nature*, chief precipitant of the debate between religion and science

Whitman served in the Washington hospitals • Admission of West Virginia, formed by secession from Virginia, thirty-fifth state • Death of Stonewall Jackson, great Confederate general, at Battle of Chancellorsville • Battle of Gettysburg (1-3 July) and surrender of Vicksburg (4 July), the turning point of the War

1864

Bryant's *Thirty Poems*

Death of Hawthorne • Battles of the Wilderness, Spotsylvania Courthouse, Cold Harbor • Grant versus Lee in Virginia • Farragut at Mobile Bay • Sherman's March to the Sea • Nevada admitted, thirty-sixth state

1865

Lincoln's *Second Inaugural* • Whittier's *Snow-Bound* • Lowell's "Commemoration Ode" • Whitman's *Drum-Taps*, including "When Lilacs Last in the Dooryard Bloomed," the greatest poem on Lincoln • Mark Twain's *Celebrated Jumping Frog of Calaveras County* • Ruskin's *Sesame and Lilies* • Lewis Carroll's *Alice's Adventures in Wonderland*

Surrender of Lee to Grant at Appomattox, 9 April • Assassination of Lincoln, 14 April; Andrew Johnson became seventeenth President

Henry Wadsworth Longfellow

1807 • 1882

During his lifetime Henry Wadsworth Longfellow was the best-loved American poet, and even today his poetry is popular because it says what many people want to be told in ways generally considered "poetic." Critics who disapprove of a large share of Longfellow's verse do so because they feel that its thought is commonplace, its mood sentimental, and its form not well related to its substance. Such critics are likely to admit, however, that at his infrequent best he wrote poetry which deserves to be treasured by fastidious readers.

Longfellow was born in Portland, Maine, on February 27, 1807. He was educated at Bowdoin and abroad, and he taught modern languages at Bowdoin (1829-1835) and then, after a second trip abroad, at Harvard (1837-1854). Meanwhile, his fame, which had begun to flourish when *Voices of the Night* was published in 1839, was augmented by such books as *Ballads and Other*

Poems (1841) and *Erangeline* (1847). Works published after his retirement from Harvard—*Hiawatha* (1855), *The Courtship of Miles Standish* (1858), *Tales of a Wayside Inn* (1863), and *Christus: A Mystery* (1872)—brought still greater appreciation. Careful sheltered in childhood and early manhood, never worried by poverty, the poet lived most of his days in a peaceful old Craigie House in Cambridge. Professor Shepard has pictured him there as "he sat by the fire side writing verse on his knee with his eyes closed, now and then striding to the window to look down the vista of bristling elms to where the River Charles was 'writing the last letter of his name'" When Howells saw

Panel (l to r) Title page of *Tales of a Wayside Inn*, 1863 • Cambridge in 1831 • Craigie House, Longfellow's home • Henry Wadsworth Longfellow at 33 • "Hiawatha's Wedding Journey"

him at the height of fame, he thought he was perfectly characterized as "the white Mr. Longfellow."

These and other similar details have long caused scholars to think of Longfellow's life as always sheltered and placid. Recent study by Lawrance Thompson, however, has shown that Longfellow won such peacefulness only after a youth full of storm and struggle. His fight, against odds, to become an author, his desperate sorrow following the death of his first wife in 1835, and his torture of spirit during the seven-year courtship of his second wife, Frances Appleton, all left their imprint on his life and work.

Because Europe was the background for some of his deepest emotional experiences and because he discovered new possibilities in literature during his study there, Longfellow was impelled to acquaint his countrymen with the Old World as he saw it. Culture-starved, painfully aware of their crudeness as European travel-book writers showed it, Americans were delighted with Longfellow's translations of European poems and his romantic depictions of the picturesque Old World. When he turned to the depiction of the America of the past (as he frequently did), one of his services was, in a sense, to "Europeanize" it—to show that this country, too, had mellow legends which might be given something like Old World treatments.

A Psalm of Life

When, in 1838, Longfellow gave a new course on "Literature and the Literary Life" at Harvard, his study of Goethe was particularly useful in helping him to formulate a workable philosophy. The period was a trying one in Longfellow's life. His first wife's death had been and still was the cause of much sorrow. His courtship of Frances Appleton seemed doomed to failure. In Goethe, Longfellow found a suggestion for living when "the time is out of joint"—"to bear one's self doughtily in Life's battle: and make the best of things." This was the message expressed in "A Psalm of Life." "I kept it some time in manuscript," he wrote, "unwilling to show it to any one, it being a voice from my inmost heart, and expressing my feelings at a time when I was rallying from the depression

Much of Longfellow's verse has a simple pattern: a story is told, an object or scene is described, and then a moral which figuratively makes use of the story, object, or scene concludes the poem. The morals, some derived from German authors, have popular appeal, typical ones are "Fight on", "Others sorrow, too", and "Sorrow must end." Many times there are striking figures of speech not only in the closing lines but also in earlier lines, but too often these are not related to one another or—in a basic way, at least—to the poem as a whole. The poems are written in relatively simple (sometimes prosaic) words and in memorable rhythms. When Longfellow avoids obvious preachments, sentimental tone, flat words, and loosely related figures, he does his best work. Sometimes, as in *The Courtship of Miles Standish*, he tells a story masterfully and employs a gentle sort of humor with excellent effect. At other times, as in some sonnets and in some lyrics—"Hymn to the Night" and "The Tide Rises," for instance—his economically managed imagery, his emotional restraint, his sure diction, and his masterfully handled rhythms create memorable verse.

Complete Poetical Works, ed. H. E. Scudder, Boston, 1893 • Samuel Longfellow, *The Life of Henry Wadsworth Longfellow*, 2 vols., Boston, 1885-1886 • Lawrance Thompson, *Young Longfellow (1807-1843)*, New York, 1938

of disappointment." Many repetitions have robbed the poem of its early fire, but it is important to remember that at the time it appeared this attack on acquiescence fostered by either dreamy romanticism or Calvinistic fatalism said something important to many readers.

Tell me not, in mournful numbers,
Life is but an empty dream!
For the soul is dead that slumbers,
And things are not what they seem

Life is real! Life is earnest!
And the grave is not its goal,
Dust thou art, to dust returnest,
Was not spoken of the soul.

Not enjoyment, and not sorrow,
Is our destined end or way;

But to act, that each to-morrow
Find us farther than today

Art is long, and Time is fleeting,
And our hearts, though stout and brave,
Still, like muffled drums, are beating
Funeral marches to the grave

In the world's broad field of battle,
In the bivouac of Life,
Be not like dumb, driven cattle!
Be a hero in the strife!

Trust no Future, howe'er pleasant!
Let the dead Past bury its dead!
Act,—act in the living Present!
Heart within, and God o'erhead!

Lives of great men all remind us
We can make our lives sublime,
And, departing, leave behind us
Footprints on the sands of time;

Footprints, that perhaps another,
Sailing o'er life's solemn main,
A forlorn and shipwrecked brother,
Seeing, shall take heart again

Let us, then, be up and doing,
With a heart for any fate,
Still achieving, still pursuing,
Learn to labor and to wait.

1838

I heard the trailing garments of the Night
Sweep through her marble halls!
I saw her sable skirts all fringed with light
From the celestial walls!

I felt her presence, by its spell of might,
Stoop o'er me from above;
The calm, majestic presence of the Night,
As of the one I love.

I heard the sounds of sorrow and delight,
The manifold, soft chimes,
That fill the haunted chambers of the Night,
Like some old poet's rhymes.

From the cool cisterns of the midnight air
My spirit drank repose,
The fountain of perpetual peace flows there,—
From those deep cisterns flows.

O holy Night! from thee I learn to bear
What man has borne before!
Thou layest thy finger on the lips of Care,
And they complain no more

Peace! Peace! Orestes-like I breathe this prayer!
Descend with broad-winged flight,
The welcome, the thrice-prayed for, the most fair,
The best-beloved Night!

183

Hymn to the Night

Ἕσπρας, τριλλιστος

Longfellow said he wrote this poem in the summer of 1839, "while sitting at my chamber window, on one of the balmy nights of the year I endeavored to reproduce the impression of the hour and scene." The poem offers a way of coping with sorrow contrasting with the one suggested in "Psalm of Life." Here nighttime reveries, rather than heroic action, bring surcease of sorrow

772 Longfellow

The Skeleton in Armor

In a letter to his father written in December 1840, Longfellow announced that he had prepared this ballad, "which has been lying by me for some time," for the press. "It is connected," he said, "with the old Round Tower at New

Hymn . . . • Ἕσπρας, τριλλιστος • Welcome, three times prayed for • 21 Orestes-like refers to the character Orestes in the plays of Aeschylus. At the end of the tragedy *The Choephores* Orestes, having avenged his father by murdering his mother, is pursued by the Furies. In a sequel he finds peace

port. The skeleton in armor really exists. It was dug up near Fall River, where I saw it some two years ago. I suppose it to be the remains of one of the old Northern searovers. . . . Of course, I make the tradition myself, and I think I have succeeded in giving the whole a Northern air."

Reviewing *Ballads and Other Poems* (1841), in which the ballad was published, Poe said "In 'The Skeleton in Armor' we find a pure and perfect thesis artistically treated. . . . The metre is simple, sonorous, well-balanced, and fully adapted to the subject." Scholars have pointed out Longfellow's indebtedness in this ballad to Michael Drayton's poem on the battle of Agincourt and to Shelley's "The Fugitives."

"Speak! speak! thou fearful guest!
Who, with thy hollow breast,
Still in rude armor drest,
Comest to daunt me!
Wrapt not in Eastern balms,
But with thy fleshless palms
Stretched, as if asking alms,
Why dost thou haunt me?"

Then from those cavernous eyes
Pale flashes seemed to rise,
As when the Northern skies
Gleam in December;
And, like the water's flow
Under December's snow,
Came a dull voice of woe
From the heart's chamber.

"I was a Viking old!
My deeds, though manifold,
No Skald in song has told,
No Saga taught thee!
Take heed that in thy verse
Thou dost the tale rehearse.
Else dread a dead man's curse;
For this I sought thee

"Far in the Northern Land,
By the wild Baltic's strand,
I, with my childish hand,
Tamed the gerfalcon;

And, with my skates fast-bound,
Skimmed the half-frozen Sound,
That the poor whimpering hound
Trembled to walk on.

"Oft to his frozen lair
Tracked I the grisly bear,
While from my path the hare
Fled like a shadow;
Oft through the forest dark
Followed the were-wolf's bark,
Until the soaring lark
Sang from the meadow.

"But when I older grew,
Joining a corsair's crew,
O'er the dark sea I flew
With the marauders.
Wild was the life we led;
Many the souls that sped,
Many the hearts that bled,
By our stern orders.

"Many a wassail-bout
Wore the long winter out;
Often our midnight shout
Set the cocks crowing,
As we the Berserk's tale
Measured in cups of ale,
Draining the oaken pail
Filled to o'erflowing

"Once as I told in glee
Tales of the stormy sea,
Soft eyes did gaze on me,
Burning yet tender,
And as the white stars shine
On the dark Norway pine,
On that dark heart of mine
Fell their soft splendor

"I wooed the blue-eyed maid,
Yielding, yet half afraid,
And in the forest's shade
Our vows were plighted.
Under its loosened vest

Fluttered her little breast,
Like birds within their nest
By the hawk frightened.

"Bright in her father's hall
Shields gleamed upon the wall,
Loud sang the minstrels all,
Chanting his glory,
When of old Hildebrand
I asked his daughter's hand,
Mute did the minstrels stand
To hear my story

"While the brown ale he quaffed,
Loud then the champion laughed,
And as the wind-gusts waft
The sea-foam brightly,
So the loud laugh of scorn
Out of those lips unshorn,
From the deep drinking-horn
Blew the foam lightly.

"She was a Prince's child,
I but a Viking wild,
And though she blushed and smiled,
I was discarded'
Should not the dove so white
Follow the sea-mew's flight?
Why did they leave that night
Her nest unguarded?

"Scarce had I put to sea,
Bearing the maid with me,
Fairest of all was she
Among the Norsemen!
When on the white sea-strand,
Waving his armed hand,
Saw we old Hildebrand,
With twenty horsemen.

"Then launched they to the blast,
Bent like a reed each mast,
Yet we were gaining fast,
When the wind failed us;
And with a sudden flaw
Came round the gusty Skaw,

70 So that our foe we saw
Laugh as he hailed us.

"And as to catch the gale
Round veered the flapping sail,
'Death!' was the helmsman's hail,
'Death without quarter!'
Midships with iron keel
Struck we her ribs of steel;
Down her black hulk did reel
Through the black water!

80 "As with his wings aslant,
Sails the fierce cormorant,
Seeking some rocky haunt,
With his prey laden,—
So toward the open main,
Beating to sea again,
Through the wild hurricane,
Bore I the maiden.

"Three weeks we westward bore,
And when the storm was o'er,
90 Cloud-like we saw the shore
Stretching to leeward;
There for my lady's bower
Built I the lofty tower,
Which, to this very hour,
Stands looking seaward.

"There lived we many years;
Time dried the maiden's tears;
She had forgot her fears,
She was a mother;
100 Death closed her mild blue eyes;
Under that tower she lies;
Ne'er shall the sun arise
On such another!

"Still grew my bosom then,
Still as a stagnant fen!
Hateful to me were men,
The sunlight hateful;

110 Skaw, Cape Skogen, the northern point of Jutland in Denmark

In the vast forest here,
Clad in my warlike gear,
Fell I upon my spear,
Oh, death was grateful!

"Thus, seamed with many scars,
Bursting these prison bars
Up to its native stars
My soul ascended!
There from the flowing bowl
Deep drinks the warrior's soul,
Skoal! to the Northland! *skoal!*"
Thus the tale ended.

1840-1841

The Slave's Dream

Returning from a trip abroad in 1842, Longfellow had a stormy journey. "I was not out of my berth more than twelve hours for the first twelve days," he recorded. "I was in the forward part of the vessel, where all the great waves struck and broke with voices of thunder. There, 'cribbed, cabined, and confined,' I passed fifteen days. During this time I wrote seven poems on slavery; I meditated upon them in the stormy, sleepless nights, and wrote them down with a pencil in the morning."

Shortly after arriving in America, he published these poems and one other in a volume called *Poems on Slavery*—his contribution to the antislavery crusade. In a period when most of the New Englanders of good family were saying as little as possible about this controversy, it was rather brave for him thus to speak out.

Beside the ungathered rice he lay,
His sickle in his hand;
His breast was bare, his matted hair
Was buried in the sand.
Again, in the mist and shadow of sleep,
He saw his Native Land.

Wide through the landscape of his dreams
The lordly Niger flowed;

Beneath the palm-trees on the plain
Once more a king he strode;
And heard the tinkling caravans
Descend the mountain road.

He saw once more his dark-eyed queen
Among her children stand;
They clasped his neck, they kissed his cheeks,
They held him by the hand!—
A tear burst from the sleeper's lids
And fell into the sand.

And then at furious speed he rode
Along the Niger's bank;
His bridle-reins were golden chains,
And, with a martial clank,
At each leap he could feel his scabbard of steel
Smiting his stallion's flank.

Before him, like a blood-red flag,
The bright flamingoes flew,
From morn till night he followed their flight,
O'er plains where the tamarind grew,
Till he saw the roofs of Caffre huts,
And the ocean rose to view.

At night he heard the lion roar,
And the hyena scream,
And the river-horse, as he crushed the reeds
Beside some hidden stream;
And it passed, like a glorious roll of drums,
Through the triumph of his dream.

The forests, with their myriad tongues,
Shouted of liberty;
And the Blast of the Desert cried aloud,
With a voice so wild and free,
That he started in his sleep and smiled
At their tempestuous glee.

He did not feel the driver's whip,
Nor the burning heat of day;

The Skeleton . . . • 159 *Skoal*, "the customary salutation for drinking a health in Scandinavia"—Longfellow

For Death had illumined the Land of Sleep,
And his lifeless body lay
A worn-out fetter, that the soul
Had broken and thrown away!

1842

The Rainy Day

The day is cold, and dark, and dreary,
It rains, and the wind is never weary,
The vine still clings to the mouldering wall,
But at every gust the dead leaves fall,
And the day is dark and dreary.

My life is cold, and dark, and dreary,
It rains, and the wind is never weary,
My thoughts still cling to the mouldering Past,
But the hopes of youth fall thick in the blast,
And the days are dark and dreary

10

Be still, sad heart! and cease repining,
Behind the clouds is the sun still shining;
Thy fate is the common fate of all,
Into each life some rain must fall,
Some days must be dark and dreary.

1842

The Bridge

I stood on the bridge at midnight
As the clocks were striking the hour,
And the moon rose o'er the city,
Behind the dark church-tower.

I saw her bright reflection
In the waters under me,
Like a golden goblet falling
And sinking into the sea.

And far in the hazy distance
Of that lovely night in June,

10

The blaze of the flaming furnace
Gleamed redder than the moon.

Among the long, black rafters
The wavering shadows lay,
And the current that came from the ocean
Seemed to lift and bear them away;

As sweeping and eddying through them,
Rose the belated tide,
And, streaming into the moonlight,
The seaweed floated wide.

And like those waters rushing
Among the wooden piers,
A flood of thoughts came o'er me
That filled my eyes with tears.

How often, oh how often,
In the days that had gone by,
I had stood on that bridge at midnight
And gazed on that wave and sky!

How often, oh how often,
I had wished that the ebbing tide
Would bear me away on its bosom
O'er the ocean wild and wide!

For my heart was hot and restless,
And my life was full of care,
And the burden laid upon me
Seemed greater than I could bear.

But now it has fallen from me,
It is buried in the sea;
And only the sorrow of others
Throws its shadow over me.

Yet whenever I cross the river
On its bridge with wooden piers,
Like the odor of brine from the ocean
Comes the thought of other years.

And I think how many thousands
Of care-encumbered men,

Each bearing his burden of sorrow
Have crossed the bridge since then.

I see the long procession
Still passing to and fro,
The young heart hot and restless,
And the old subdued and slow!

And forever and forever,
As long as the river flows,
As long as the heart has passions,
As long as life has woes;

The moon and its broken reflection
And its shadows shall appear,
As the symbol of love in heaven,
And its wavering image here.

50

The Jewish Cemetery at Newport

An entry in Longfellow's journal for June 9, 1852, tells of the visit to the cemetery which suggested this poem. "There are few graves," he wrote, "nearly all are low tombstones of marble, with Hebrew inscriptions, and a few words added in English or Portuguese . . . It is a shady nook, at the corner of two dusty, frequented streets . . ."

Professor Odell Shepard comments: "The poem . . . is written in the difficult stanza of Gray's 'Elegy' and in the mood of that poem. Comparison will show that Longfellow is as much superior to Gray in thought-structure and 'sense of the whole' as he is inferior in vividness and intensity of phrase and image."

60

1845

The Arrow and the Song

The following is Longfellow's account of the writing of this poem: "October 16, 1845. Before church, wrote 'The Arrow and the Song,' which came into my mind as I stood with my back to the fire, and glanced onto the paper with an arrow's speed. Literally an improvisation."

I shot an arrow into the air,
It fell to earth, I knew not where;
For, so swiftly it flew, the sight
Could not follow it in its flight.

I breathed a song into the air,
It fell to earth, I knew not where;
For who has sight so keen and strong,
That it can follow the flight of song?

Long, long afterward, in an oak
I found the arrow, still unbroke;
And the song, from beginning to end,
I found again in the heart of a friend.

10

1845

How strange it seems! These Hebrews in their graves,
Close by the street of this fair seaport town,
Silent beside the never-silent waves,
At rest in all this moving up and down!

The trees are white with dust, that o'er their sleep
Wave their broad curtains in the south-wind's breath,
While underneath these leafy tents they keep
The long, mysterious Exodus of Death

And these sepulchral stones, so old and brown,
That pave with level flags their burial-place,
Seem like the tablets of the Law, thrown down
And broken by Moses at the mountain's base.

10

The very names recorded here are strange,
Of foreign accent, and of different climes;
Alvares and Rivera interchange
With Abraham and Jacob of old times.

"Blessed be God, for he created Death!"
The mourners said, "and Death is rest and peace;"
Then added, in the certainty of faith,
"And giveth Life that nevermore shall cease."

20

The Jewish Cemetery . . . • 8 Exodus refers to the Book of Exodus, which recounts the journey of the Israelites from Egypt under Moses

Closed are the portals of their Synagogue,
 No Psalms of David now the silence break,
 No Rabbi reads the ancient Decalogue
 In the grand dialect the Prophets spake.

Gone are the living, but the dead remain,
 And not neglected; for a hand unseen,
 Scattering its bounty, like a summer rain,
 Still keeps their graves and their remembrance green.

How came they here? What buist of Christian hate,
 What persecution, merciless and blind, 30
 Drove o'er the sea—that desert desolate—
 These Ishmaels and Hagars of mankind?

They lived in narrow streets and lanes obscure,
 Ghetto and Judenstrass, in mirk and mire;
 Taught in the school of patience to endure
 The life of anguish and the death of fire

All their lives long, with the unleavened bread
 And bitter herbs of exile and its fears,
 The wasting famine of the heart they fed,
 And slaked its thirst with marah of their tears. 40

Anathema maranatha! was the cry
 That rang from town to town, from street to street:
 At every gate the accursed Mordecai
 Was mocked and jeered, and spurned by Christian feet.

Pride and humiliation hand in hand
 Walked with them through the world where'er they
 went;

Trampled and beaten were they as the sand,
 And yet unshaken as the continent.

For in the background figures vague and vast
 Of patriarchs and of prophets rose sublime, 50
 And all the great traditions of the Past
 They saw reflected in the coming time.

And thus forever with reverted look
 The mystic volume of the world they read,
 Spelling it backward, like a Hebrew book,
 Till life became a Legend of the Dead.

But ah! what once has been shall be no more!
 The groaning earth in travail and in pain
 Brings forth its races, but does not restore,
 And the dead nations never rise again.

1

My Lost You

During a visit to Portland in 1846 Longfellow took a long walk around Munjoy's hill and down to old Fort Lawrer. Then, he says, "I lay down in one of the embrasures and listened to the lashing, lulling sound of the sea just at my feet. It was a beautiful afternoon, and the harbor was full of white sails, coming and departing." He considered writing a poem at the time, but not until 1855 did the two entries in his journal record its composition:

"March 29. A day of pain; cowering over the fire. At night, as I lie in bed, a poem comes into my mind,—a memory of Portland,—my native town, the city by the sea. . .

"March 30. Wrote the poem, and am rather pleased with it, and with the bringing in of the two lines of the Lapland song. . . ."

The song may be found in a book by John Scheff: *The History of Lapland* (1674). The important passage

"A youth's desire is the desire of the wind,
 All his essays
 Are long delays,
 No issue can they find."

Often I think of the beautiful town
 That is seated by the sea;
 Often in thought go up and down
 The pleasant streets of that dear old town,

The Jewish Cemetery . . . • 32 Ishmael. See Genesis 16, 21 • Hagar, a concubine of Abraham who was driven into the desert with Ishmael, her son • 34 Ghetto and Judenstrass, quarters in which Jews are segregated • 41 Anathema maranatha, an expression found in I Corinthians, formerly thought to be a double curse • Mordecai, the cousin of Esther See the Book of Esther • 55 Spelling it backward. Hebrew is printed so as to be read from right to left in contrast with other languages reading from left to right

And my youth comes back to me.
And a verse of a Lapland song
Is haunting my memory still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the shadowy lines of its trees,
And catch, in sudden gleams,
The sheen of the far-surrounding seas,
And islands that were the Hesperides
Of all my boyish dreams
And the burden of that old song,
It murmurs and whispers still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the black wharves and the slips,
And the sea-tides tossing free,
And Spanish sailors with bearded lips,
And the beauty and mystery of the ships,
And the magic of the sea.
And the voice of that wayward song
Is singing and saying still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the bulwarks by the shore,
And the fort upon the hill;
The sunrise gun, with its hollow roar,
The drumbeat repeated o'er and o'er,
And the bugle wild and shrill.
And the music of that old song
Throbs in my memory still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the sea-fight far away,
How it thundered o'er the tide!
And the dead captains, as they lay
In their graves, o'erlooking the tranquil bay
Where they in battle died.
And the sound of that mournful song
Goes through me with a thrill:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the breezy dome of groves,
The shadows of Deering's Woods;
And the friendships old and the early loves
Come back with a Sabbath sound, as of doves
In quiet neighborhoods.
And the verse of that sweet old song,
It flutters and murmurs still
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the gleams and glooms that dart
Across the schoolboy's brain;
The song and the silence in the heart,
That in part are prophecies, and in part
Are longings wild and vain
And the voice of that fitful song
Sings on, and is never still
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

There are things of which I may not speak;
There are dreams that cannot die;
There are thoughts that make the strong heart weak,
And bring a pallor into the cheek,
And a mist before the eye.
And the words of that fatal song
Come over me like a chill:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

Strange to me now are the forms I meet,
When I visit the dear old town,
But the native air is pure and sweet,
And the trees that o'ershadow each well-known street,
As they balance up and down,
Are singing the beautiful song,
Are singing and whispering still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

And Deering's Woods are fresh and fair,
And with joy that is almost pain
My heart goes back to wander there,
And among the dreams of the days that were,
I find my lost youth again.

And the strange and beautiful song,
 Sings on, and is never still.
 "A boy's will is the wind's will,
 And the thoughts of youth are long, long thoughts " 90
 1855

The Courtship of Miles Standish

Longfellow recorded that he began to write this "idyll of the Old Colony times" in December 1857; he finished his revisions on June 3, 1858. It was very successful, twenty-five thousand copies selling in the week following its publication in October 1858.

This representation of Longfellow's longer narrative poems does not, to be sure, embody the sentiment so appealing to the taste of Victorian readers so well as *Evangeline* does. Its lighter, more playful tone, however, appeals to more modern readers; and as well as any such poem, it suggests the author's really considerable skill as a teller of stories. Professor Howard Mumford Jones perceptively emphasizes the skill shown in the way Longfellow's verse narratives are put together—"with what deft devices the poet has knitted his plot, and how beautifully the descriptive passages are made to melt into the steady flow of the narrative." The characterization, too, it should be noted, is of exactly the sort to make probable all the actions in this amusing narrative. Lowell's review of the poem, printed hereafter (p. 851), makes some interesting comments.

MILES STANDISH

In the Old Colony days, in Plymouth the land of the
 Pilgrims,
 To and fro in a room of his simple and primitive
 dwelling,
 Clad in doublet and hose, and boots of Cordovan leather,
 Strode, with a martial air, Miles Standish the Puritan
 Captain.
 Buried in thought he seemed, with his hands behind
 him, and pausing

Ever and anon to behold his glittering weapons
 warfare,
 Hanging in shining array along the walls of
 chamber,—
 Cutlass and corselet of steel, and his trusty sword
 Damascus,
 Curved at the point and inscribed with its myst
 Arabic sentence,
 While underneath, in a corner, were fowling-piece, r
 ket, and matchlock.
 Short of stature he was, but strongly built and athlet
 Broad in the shoulders, deep-chested, with muscles ;
 sinews of iron;
 Brown as a nut was his face, but his russet beard
 already
 Flaked with patches of snow, as hedges sometimes
 November.
 Near him was seated John Alden, his friend, and ho
 hold companion,
 Writing with diligent speed at a table of pine by
 window;
 Fair-haired, azure-eyed, with delicate Saxon complex
 Having the dew of his youth, and the beauty thereof,
 the captives
 Whom Saint Gregory saw, and exclaimed, "Not Ang
 but Angels."
 Youngest of all was he of the men who came in
 Mayflower.

Suddenly breaking the silence, the diligent scri
 interrupting,
 Spake, in the pride of his heart, Miles Standish the Ca
 tain of Plymouth.
 "Look at these arms," he said, "the warlike weap
 that hang here
 Burnished and bright and clean, as if for parade
 inspection'
 This is the sword of Damascus I fought with in Flande
 this breastplate,
 Well I remember the day! once saved my life in
 skirmish;
 Here in front you can see the very dint of the bullet

19 Saint Gregory is reputed to have made this remark about so
 captive Anglo-Saxons

Fired point-blank at my heart by a Spanish arcabucero.
 Had it not been of sheer steel, the forgotten bones of
 Miles Standish
 Would at this moment be moulded, in their grave in the
 Flemish morasses."³⁰
 Thereupon answered John Alden, but looked not up
 from his writing.
 "Truly the breath of the Lord hath slackened the speed
 of the bullet;
 He in his mercy preserved you, to be our shield and
 our weapon!"
 Still the Captain continued, unheeding the words of the
 stripling:
 "See, how bright they are burnished, as if in an arsenal
 hanging;
 That is because I have done it myself, and not left it to
 others.
 Serve yourself, would you be well served, is an ex-
 cellent adage;
 So I take care of my arms, as you of your pens and
 your inkhorn.
 Then, too, there are my soldiers, my great, invincible
 army,
 Twelve men, all equipped, having each his rest and his
 matchlock,⁴⁰
 Eighteen shillings a month, together with diet and pillage,
 And, like Caesar, I know the name of each of my
 soldiers!"
 This he said with a smile, that danced in his eyes, as
 the sunbeams
 Dance on the waves of the sea, and vanish again in
 a moment
 Alden laughed as he wrote, and still the Captain
 continued:
 "Look! you can see from this window my brazen
 howitzer planted
 High on the roof of the church, a preacher who speaks
 to the purpose,
 Steady, straightforward, and strong, with irresistible
 logic,
 Orthodox, flashing conviction right into the hearts of
 the heathen.
 Now we are ready, I think, for any assault of the
 Indians;⁵⁰
 Let them come, if they like, and the sooner they try it
 the better,—

Let them come, if they like, be it sagamore, sachem,
 or pow-wow,
 Aspinet, Samoset, Corbitant, Squanto, or Tokamahamon!"

 Long at the window he stood, and wistfully gazed on
 the landscape,
 Washed with a cold gray mist, the vapory breath of the
 east-wind,
 Forest and meadow and hill, and the steel-blue rim of
 the ocean,
 Lying silent and sad, in the afternoon shadows and
 sunshine.
 Over his countenance flitted a shadow like those on
 the landscape,
 Gloom intermingled with light; and his voice was sub-
 dued with emotion,
 Tenderness, pity, regret, as after a pause he proceeded: ⁶⁰
 "Yonder there, on the hill by the sea, lies buried Rose
 Standish,
 Beautiful rose of love, that bloomed for me by the
 wayside!
 She was the first to die of all who came in the Mayflower!
 Green above her is growing the field of wheat we have
 sown there,
 Better to hide from the Indian scouts the graves of
 our people,
 Lest they should count them and see how many already
 have perished!"
 Sadly his face he averted, and strode up and down, and
 was thoughtful.

 Fixed to the opposite wall was a shelf of books, and
 among them
 Prominent three, distinguished alike for bulk and for
 binding,
 Bariffe's *Artillery Guide*, and the *Commentaries of*
 *Caesar*⁷⁰
 Out of the Latin translated by Arthur Goldinge of
 London,
 And, as if guarded by these, between them was standing
 the *Bible*.
 Musing a moment before them, Miles Standish paused,
 as if doubtful

53 Aspinet . . . Tokamahamon, Indian chieftains

Which of the three he should choose for his consolation
and comfort,
Whether the wars of the Hebrews, the famous campaigns
of the Romans,
Or the Artillery practice, designed for belligerent
Christians.
Finally down from its shelf he dragged the ponderous
Roman,
Seated himself at the window, and opened the book, and
in silence
Turned o'er the well-worn leaves, where thumb-marks
thick on the margin,
Like the trample of feet, proclaimed the battle was
hottest. 80
Nothing was heard in the room but the hurrying pen of
the stripling,
Busily writing epistles important, to go by the
Mayflower,
Ready to sail on the morrow, or next day at least, God
willing!
Homeward bound with the tidings of all that terrible
winter,
Letters written by Alden, and full of the name of
Priscilla!
Full of the name and the fame of the Puritan maiden
Priscilla!

||

LOVE AND FRIENDSHIP

Nothing was heard in the room but the hurrying pen of
the stripling,
Or an occasional sigh from the laboring heart of the
Captain,
Reading the marvellous words and achievements of
Julius Caesar
After a while he exclaimed, as he smote with his hand,
palm downwards, 90
Heavily on the page: "A wonderful man was this Caesar!
You are a writer, and I am a fighter, but here is a fellow
Who could both write and fight, and in both was equally
skilful!"
Straightway answered and spake John Alden, the comely,
the youthful:

"Yes, he was equally skilled, as you say, with his pen
his weapons.
Somewhere have I read, but where I forget, he co
dictate
Seven letters at once, at the same time writing
memoirs."
"Truly," continued the Captain, not heeding or hear
the other,
"Truly a wonderful man was Caius Julius Caesar!
Better be first, he said, in a little Iberian village,
Than be second in Rome, and I think he was right w
he said it.
Twice was he married before he was twenty, and m
times after;
Battles five hundred he fought, and a thousand cities
conquered;
He, too, fought in Flanders, as he himself has recorde
Finally he was stabbed by his friend, the orator Brutu
Now, do you know what he did on a certain occasion
Flanders,
When the rear-guard of his army retreated, the front g
ing way too,
And the immortal Twelfth Legion was crowded
closely together
There was no room for their swords? Why, he seized
shield from a soldier,
Put himself straight at the head of his troops, and co
manded the captains,
Calling on each by his name, to order forward t
ensigns;
Then to widen the ranks, and give more room for th
weapons;
So he won the day, the battle of something-or-other.
That's what I always say; if you wish a thing to
well done,
You must do it yourself, you must not leave it
others!"
All was silent again; the Captain continued his readin
Nothing was heard in the room but the hurrying pen
the stripling
Writing epistles important to go next day by t
Mayflower,
Filled with the name and the fame of the Puritan maid
Priscilla;
Every sentence began or closed with the name
Priscilla,

1

Till the treacherous pen, to which he confided the secret,
Strove to betray it by singing and shouting the name of
Priscilla!

Finally closing his book, with a bang of the ponderous cover,

Sudden and loud as the sound of a soldier grounding his musket,

Thus to the young man spake Miles Standish the Captain of Plymouth:

"When you have finished your work, I have something important to tell you.

Be not however in haste; I can wait, I shall not be impatient!"

Straightway Alden replied, as he folded the last of his letters,

Pushing his papers aside, and giving respectful attention

"Speak; for whenever you speak, I am always ready to listen,

Always ready to hear whatever pertains to Miles Standish."

Thereupon answered the Captain, embarrassed, and culling his phrases.

"'T is not good for a man to be alone, say the Scriptures
This I have said before, and again and again I repeat it,
Every hour in the day, I think it, and feel it, and say it.
Since Rose Standish died, my life has been weary
and dreary;

Sick at heart have I been, beyond the healing of friendship;

Oft in my lonely hours have I thought of the maiden Priscilla.

She is alone in the world; her father and mother and brother

Died in the winter together; I saw her going and coming,

Now to the grave of the dead, and now to the bed of the dying,

Patient, courageous, and strong, and said to myself,
that if ever

There were angels on earth, as there are angels in heaven,
Two have I seen and known; and the angel whose name
is Priscilla

Holds in my desolate life the place which the other
abandoned.

Long have I cherished the thought, but never have dared
to reveal it,

Being a coward in this, though valiant enough for the most part.

Go to the damsel Priscilla, the loveliest maiden of Plymouth,

Say that a blunt old Captain, a man not of words but of actions,

Offers his hand and his heart, the hand and heart of a soldier

Not in these words, you know, but this in short is my meaning;

I am a maker of war, and not a maker of phrases.

You, who are bred as a scholar, can say it in elegant language,

Such as you read in your books of the pleadings and wooings of lovers,

Such as you think best adapted to win the heart of a maiden "

When he had spoken, John Alden, the fair-haired, taciturn stripling,

All aghast at his words, surprised, embarrassed, bewildered,

Trying to mask his dismay by treating the subject with lightness,

Trying to smile, and yet feeling his heart stand still in his bosom,

Just as a timepiece stops in a house that is stricken by lightning,

Thus made answer and spake, or rather stammered than answered

"Such a message as that, I am sure I should mangle and mar it,

If you would have it well done,—I am only repeating your maxim,—

You must do it yourself, you must not leave it to others!"

But with the air of a man whom nothing can turn from his purpose,

Gravely shaking his head, made answer the Captain of Plymouth

"Truly the maxim is good, and I do not mean to gain-say it,

But we must use it discreetly, and not waste powder for nothing

Now, as I said before, I was never a maker of phrases.

I can march up to a fortress and summon the place to surrender.

But march up to a woman with such a proposal, I
dare not.
I'm not afraid of bullets, nor shot from the mouth of
a cannon,
But of a thundering 'No!' point-blank from the mouth
of a woman,
That I confess I'm afraid of, nor am I ashamed to con-
fess it!
So you must grant my request, for you are an elegant
scholar,
Having the graces of speech, and skill in the turning
of phrases."
Taking the hand of his friend, who still was reluctant
and doubtful,
Holding it long in his own, and pressing it kindly,
he added.
"Though I have spoken thus lightly, yet deep is the
feeling that prompts me;
Surely you cannot refuse what I ask in the name of
our friendship!"
Then made answer John Alden: "The name of friend-
ship is sacred;
What you demand in that name, I have not the power to
deny you!"
So the strong will prevailed, subduing and moulding
the gentler,
Friendship prevailed over love, and Alden went on his
errand.

III

THE LOVER'S ERRAND

So the strong will prevailed, and Alden went on his
errand,
Out of the street of the village, and into the paths of
the forest,
Into the tranquil woods, where bluebirds and robins
were building
Towns in the populous trees, with hanging gardens of
verdure,
Peaceful, aerial cities of joy and affection and freedom
All around him was calm, but within him commotion
and conflict,
Love contending with friendship, and self with each
generous impulse.

To and fro in his breast his thoughts were heaving
dashing,
As in a foundering ship, with every roll of the ve-
Washes the bitter sea, the merciless surge of the oce
"Must I relinquish it all," he cried with a wild larr
tation,—
"Must I relinquish it all, the joy, the hope, the illu-
Was it for this I have loved, and waited, and worship
in silence?
Was it for this I have followed the flying feet and
shadow
Over the wintry sea, to the desolate shores of N
England?
Truly the heart is deceitful, and out of its depths
corruption
Rise, like an exhalation, the misty phantoms of passi
Angels of light they seem, but are only delusions
Satan
All is clear to me now, I feel it, I see it distinctly!
This is the hand of the Lord. it is laid upon me
anger,
For I have followed too much the heart's desires :
devices,
Worshipping Astaroth blindly, and impious idols of B.
This is the cross I must bear; the sin and the sw
retribution."

So through the Plymouth woods John Alden went
his errand;
Crossing the brook at the ford, where it brawled o
pebble and shallow,
Gathering still, as he went, the May-flowers bloom
around him.
Fragrant, filling the air with a strange and wonder
sweetness,
Children lost in the woods, and covered with leaves
their slumber
"Puritan flowers," he said, "and the type of Purit
maidens,
Modest and simple and sweet, the very type of Priscil
So I will take them to her, to Priscilla the Mayflower
Plymouth,

206 Astaroth, Ashtoreth See notes, pp 667 and 708 • 206 Baal,
local deity of the ancient Semitic races In the context, both deities
are "heathen"

Modest and simple and sweet, as a parting gift will I
 take them;
 Breathing their silent farewells, as they fade and wither
 and perish,
 Soon to be thrown away as is the heart of the giver."
 So through the Plymouth woods John Alden went on
 his errand;
 Came to an open space, and saw the disk of the
 ocean, 220
 Sailless, sombre and cold with the comfortless breath
 of the east-wind;
 Saw the new-built house and people at work in the
 meadow;
 Heard, as he drew near the door, the musical voice of
 Priscilla
 Singing the hundredth Psalm, the grand old Puritan
 anthem,
 Music that Luther sang to the sacred words of the
 Psalmist,
 Full of the breath of the Lord, consoling and comforting
 many.
 Then, as he opened the door, he beheld the form of the
 maiden
 Seated beside her wheel, and the carded wool like a snow-
 drift
 Piled at her knee, her white hands feeding the ravenous
 spindle,
 While with her foot on the treadle she guided the wheel
 in its motion. 230
 Open wide on her lap lay the well-worn psalm-book of
 Ainsworth,
 Printed in Amsterdam, the words and the music
 together,
 Rough-hewn, angular notes, like stones in the wall of
 a churchyard,
 Darkened and overhung by the running vine of the
 verses
 Such was the book from whose pages she sang the old
 Puritan anthem,
 She, the Puritan girl, in the solitude of the forest,
 Making the humble house and the modest apparel of
 home-spun
 Beautiful with her beauty, and rich with the wealth of
 her being!
 Over him rushed, like a wind that is keen and cold
 and relentless,

Thoughts of what might have been, and the weight and
 woe of his errand; 240
 All the dreams that had faded, and all the hopes that
 had vanished,
 All his life henceforth a dreary and tenantless mansion,
 Haunted by vain regrets, and pallid, sorrowful faces.
 Still he said to himself, and almost fiercely he said it,
 "Let not him that putteth his hand to the plough look
 backwards;
 Though the ploughshare cut through the flowers of life
 to its fountains,
 Though it pass o'er the graves of the dead and the
 hearths of the living,
 It is the will of the Lord; and his mercy endureth
 forever!"

So he entered the house and the hum of the wheel
 and the singing
 Suddenly ceased; for Priscilla, aroused by his step on
 the threshold, 250
 Rose as he entered, and gave him her hand, in signal
 of welcome,
 Saying, "I knew it was you, when I heard your step in
 the passage;
 For I was thinking of you, as I sat there singing and
 spinning."
 Awkward and dumb with delight, that a thought of him
 had been mingled
 Thus in the sacred psalm, that came from the heart of
 the maiden,
 Silent before her he stood, and gave her the flowers
 for an answer,
 Finding no words for his thought He remembered that
 day in the winter,
 After the first great snow, when he broke a path from
 the village,
 Reeling and plunging along through the drifts that en-
 cumbered the doorway,
 Stamping the snow from his feet as he entered the
 house, and Priscilla 260
 Laughed at his snowy locks, and gave him a seat by the
 fireside,
 Grateful and pleased to know he had thought of her in
 the snow-storm.
 Had he but spoken then! perhaps not in vain had he
 spoken;

Now it was all too late; the golden moment had vanished!
So he stood there abashed, and gave her the flowers for
an answer.

Then they sat down and talked of the birds and the
beautiful Spring-time,
Talked of their friends at home, and the Mayflower
that sailed on the morrow.

"I have been thinking all day," said gently the Puritan
maiden,

"Dreaming all night, and thinking all day, of the hedge-
rows of England,—

They are in blossom now, and the country is all like
a garden."

270

Thinking of lanes and fields, and the song of the lark
and the linnet,

Seeing the village street, and familiar faces of neighbors
Going about as of old, and stopping to gossip together,
And, at the end of the street, the village church, with
the ivy

Climbing the old gray tower, and the quiet graves in the
churchyard.

Kind are the people I live with, and dear to me my
religion;

Still my heart is so sad, that I wish myself back in Old
England.

You will say it is wrong, but I cannot help it. I almost
Wish myself back in Old England, I feel so lonely and
wretched."

Thereupon answered the youth: "Indeed I do not con-
demn you;

280

Stouter hearts than a woman's have quailed in this
terrible winter.

Yours is tender and trusting, and needs a stronger to
lean on;

So I have come to you now, with an offer and proffer
of marriage

Made by a good man and true, Miles Standish the
Captain of Plymouth!"

Thus he delivered his message, the dexterous writer
of letters,—

Did not embellish the theme, nor array it in beautiful
phrases,

But came straight to the point, and blurted it out like
a school-boy;

"If I am not worth the wooing, I surely am not worth the winning!"

Even the Captain himself could hardly have said
more bluntly.

Mute with amazement and sorrow, Priscilla the Puritan
maiden

Looked into Alden's face, her eyes dilated with
wonder,

Feeling his words like a blow, that stunned her and
rendered her speechless;

Till at length she exclaimed, interrupting the ominous
silence:

"If the great Captain of Plymouth is so very eager to
wed me,

Why does he not come himself, and take the trouble to
woo me?

If I am not worth the wooing, I surely am not worth the
winning!"

Then John Alden began explaining and smoothing
the matter,

Making it worse as he went, by saying the Captain was
busy,—

Had no time for such things;—such things! the words
grating harshly

Fell on the ear of Priscilla; and swift as a flash she made answer:

"Has he no time for such things, as you call it, before he is married,

Would he be likely to find it, or make it, after the wedding? ³⁰⁰

That is the way with you men; you don't understand us, you cannot.

When you have made up your minds, after thinking of this one and that one,

Choosing, selecting, rejecting, comparing one with another,

Then you make known your desire, with abrupt and sudden avowal,

And are offended and hurt, and indignant perhaps, that a woman

Does not respond at once to a love that she never suspected,

Does not attain at a bound the height to which you have been climbing.

This is not right nor just: for surely a woman's affection

Is not a thing to be asked for, and had for only the asking. ³¹⁰

When one is truly in love, one not only says it, but shows it.

Had he but waited awhile, had he only showed that he loved me,

Even this Captain of yours—who knows?—at last might have won me,

Old and rough as he is; but now it never can happen."

Still John Alden went on, unheeding the words of Priscilla,

Urging the suit of his friend, explaining, persuading, expanding;

Spoke of his courage and skill, and of all his battles in Flanders,

How with the people of God he had chosen to suffer affliction;

How, in return for his zeal, they had made him Captain of Plymouth;

He was a gentleman born, could trace his pedigree plainly ³²⁰

Back to Hugh Standish of Duxbury Hall, in Lancashire, England,

Who was the son of Ralph, and the grandson of Thurston de Standish;

Heir unto vast estates, of which he was basely defrauded,

Still bore the family arms, and had for his crest a cock argent

Combed and wattled gules, and all the rest of the blazon.

He was a man of honor, of noble and generous nature; Though he was rough, he was kindly; she knew how during the winter

He had attended the sick, with a hand as gentle as woman's;

Somewhat hasty and hot, he could not deny it, and headstrong,

Stern as a soldier might be, but hearty, and placable always, ³³⁰

Not to be laughed at and scorned, because he was little of stature;

For he was great of heart, magnanimous, courtly, courageous;

Any woman in Plymouth, nay, any woman in England, Might be happy and proud to be called the wife of Miles Standish!

But as he warmed and glowed, in his simple and eloquent language,

Quite forgetful of self, and full of the praise of his rival, Archly the maiden smiled, and, with eyes overrunning with laughter,

Said, in a tremulous voice, "Why don't you speak for yourself, John?"

IV

JOHN ALDEN

Into the open air John Alden, perplexed and bewildered,

Rushed like a man insane, and wandered alone by the sea-side; ³⁴⁰

Paced up and down the sands, and bared his head to the east-wind,

Cooling his heated brow, and the fire and fever within him.

Slowly as out of the heavens, with apocalyptic splendors,

Sank the City of God, in the vision of John the Apostle,
 So, with its cloudy walls of chrysolite, jasper, and
 sapphire,
 Sank the broad red sun, and over its turrets up-
 lifted
 Glimmered the golden reed of the angel who measured
 the city.

"Welcome, O wind of the East!" he exclaimed in his
 wild exultation,
 "Welcome, O wind of the East, from the caves of the
 misty Atlantic!
 Blowing o'er fields of dulse, and measureless meadows
 of sea-grass, 350
 Glowing o'er rocky wastes, and the grottos and gardens
 of ocean!
 Lay thy cold, moist hand on my burning forehead, and
 wrap me
 Close in thy garments of mist, to allay the fever within
 me!"

Like an awakened conscience, the sea was moaning
 and tossing,
 Beating remorseful and loud the mutable sands of the
 sea-shore.
 Fierce in his soul was the struggle and tumult of
 passions contending;
 Love triumphant and crowned, and friendship wounded
 and bleeding,
 Passionate cries of desire, and importunate pleadings
 of duty!
 "Is it my fault," he said, "that the maiden has chosen
 between us?
 Is it my fault that he failed,—my fault that I am the
 victor?" 360
 Then within him there thundered a voice, like the voice
 of the Prophet:
 "It hath displeased the Lord!"—and he thought of
 David's transgression,
 Bathsheba's beautiful face, and his friend in the front
 of the battle!
 Shame and confusion of guilt, and abasement and self-
 condemnation,
 Overwhelmed him at once; and he cried in the deepest
 contrition:
 "It hath displeased the Lord! It is the temptation of
 Satan!"

Then, uplifting his head, he looked at the sea:
 beheld there
 Dimly the shadowy form of the Mayflower riding
 anchor,
 Rocked on the rising tide, and ready to sail to-
 morrow;
 Heard the voices of men through the mist, the rattle
 of cordage
 Thrown on the deck, the shouts of the mate, and
 sailors' "Ay, ay, Sir!"
 Clear and distinct, but not loud, in the dripping
 twilight.
 Still for a moment he stood, and listened, and stared
 at the vessel,
 Then went hurriedly on, as one who, seeing a phan-
 tom, stops, then quickens his pace, and follows the beck-
 oning shadow.
 "Yes, it is plain to me now," he murmured; "the
 will of the Lord is
 Leading me out of the land of darkness, the bondage
 of error,
 Through the sea, that shall lift the walls of its
 towers around me,
 Hiding me, cutting me off, from the cruel thoughts
 that pursue me.
 Back will I go o'er the ocean, this dreary land
 abandon,
 Her whom I may not love, and him whom my heart
 offended
 Better to be in my grave in the green old church
 in England,
 Close to my mother's side, and among the dust of
 kindred;
 Better be dead and forgotten, than living in shame
 and dishonor;
 Sacred and safe and unseen, in the dark of the na-
 tive chamber
 With me my secret shall lie, like a buried jewel
 glimmers
 Bright on the hand that is dust, in the chamber
 of silence and darkness,—
 Yes, as the marriage ring of the great espousal
 after!"

344 vision refers to a passage in the Book of Revelation, attrib-
 uted to the name of John the Apostle, brother of James, son of Zebedee.

Thus as he spake, he turned, in the strength of his
 strong resolution,
 Leaving behind him the shore, and hurried along in the
 twilight,
 Through the congenial gloom of the forest silent and
 sombre,
 Till he beheld the lights in the seven houses of Plymouth,
 Shining like seven stars in the dusk and mist of the
 evening.
 Soon he entered his door, and found the redoubtable
 Captain
 Sitting alone, and absorbed in the martial pages of
 Caesar,
 Fighting some great campaign in Hainault or Brabant
 or Flanders.
 "Long have you been on your errand," he said with a
 cheery demeanor,
 Even as one who is waiting an answer, and fears not
 the issue.
 "Not far off is the house, although the woods are be-
 tween us;
 But you have lingered so long, that while you were
 going and coming
 I have fought ten battles and sacked and demolished a
 city.
 Come, sit down, and in order relate to me all that has
 happened."

Then John Alden spake, and related the wondrous
 adventure,
 From beginning to end, minutely, just as it happened,
 How he had seen Priscilla, and how he had sped in his
 courtship,
 Only smoothing a little, and softening down her refusal.
 But when he came at length to the words Priscilla had
 spoken,
 Words so tender and cruel: "Why don't you speak for
 yourself, John?"
 Up leaped the Captain of Plymouth, and stamped on the
 floor, till his armor
 Clanged on the wall, where it hung, with a sound of
 sinister omen
 All his pent-up wrath burst forth in a sudden
 explosion,
 E'en as a hand-grenade, that scatters destruction around it.
 Wildly he shouted, and loud: "John Alden! you have
 betrayed me!"

Me, Miles Standish, your friend! have supplanted, de-
 frauded, betrayed me!
 One of my ancestors ran his sword through the heart of
 Wat Tyler,
 Who shall prevent me from running my own through
 the heart of a traitor?
 Yours is the greater treason, for yours is a treason to
 friendship!
 You, who lived under my roof, whom I cherished and
 loved as a brother;
 You, who have fed at my board, and drunk at my cup,
 to whose keeping
 I have intrusted my honor, my thoughts the most sacred
 and secret,—
 You too, Brutus! ah woe to the name of friendship
 hereafter!
 Brutus was Caesar's friend, and you were mine, but
 henceforward
 Let there be nothing between us save war, and impla-
 cable hatred!"

So spake the Captain of Plymouth, and strode about
 in the chamber,
 Chafing and choking with rage; like cords were the
 veins on his temples.
 But in the midst of his anger a man appeared at the
 doorway,
 Bringing in uttermost haste a message of urgent
 importance,
 Rumors of danger and war and hostile incursions of
 Indians!
 Straightway the Captain paused, and without further
 question or parley,
 Took from the nail on the wall his sword with its
 scabbard of iron,
 Buckled the belt round his waist, and, frowning fiercely,
 departed
 Alden was left alone. He heard the clank of the scabbard
 Growing fainter and fainter, and dying away in the
 distance
 Then he arose from his seat, and looked forth into the
 darkness,
 Felt the cool air blow on his cheek, that was hot with
 the insult,

415 Wat Tyler (2.1381), leader of the Peasants' Revolt in England

Lifted his eyes to the heavens, and, folding his hands as
in childhood,
Prayed in the silence of night to the Father who seeth
in secret.

Meanwhile the choleric Captain strode wrathful away
to the council,
Found it already assembled, impatiently waiting his
coming,
Men in the middle of life, austere and grave in de-
portment, 440
Only one of them old, the hill that was nearest to heaven,
Covered with snow, but erect, the excellent Elder of
Plymouth.
God had sifted three kingdoms to find the wheat for
this planting,
Then had sifted the wheat, as the living seed of a nation;
So say the chronicles old, and such is the faith of the
people!
Near them was standing an Indian, in attitude stern and
defiant,
Naked down to the waist, and grim and ferocious in
aspect;
While on the table before them was lying unopened a
Bible,
Ponderous, bound in leather, brass-studded, printed in
Holland,
And beside it outstretched the skin of a rattlesnake
glittered, 450
Filled, like a quiver, with arrows; a signal and challenge
of warfare,
Brought by the Indian, and speaking with arrowy tongues
of defiance
This Miles Standish beheld, as he entered, and heard
them debating
What were an answer befitting the hostile message and
menace,
Talking of this and of that, contriving, suggesting,
objecting;
One voice only for peace, and that the voice of the Elder,
Judging it wise and well that some at least were con-
verted,
Rather than any were slain, for this was but Christian
behavior!
Then out spake Miles Standish, the stalwart Captain of
Plymouth,

Muttering deep in his throat, for his voice was h
with anger,

"What! do you mean to make war with milk and
water of roses?

Is it to shoot red squirrels you have your howitzer pl
There on the roof of the church, or is it to shoot
devils?

Truly the only tongue that is understood by a savag
Must be the tongue of fire that speaks from the m
of the cannon!"

Thereupon answered and said the excellent Elde
Plymouth,

Somewhat amazed and alarmed at this irreve
language:

"Not so thought St. Paul, nor yet the other Apostles
Not from the cannon's mouth were the tongues of
they spake with!"

But unheeded fell this mild rebuke on the Captain,
Who had advanced to the table, and thus contr
discoursing:

"Leave this matter to me, for to me by right it pertair
War is a terrible trade; but in the cause that is right
Sweet is the smell of powder; and thus I answer
challenge!"

Then from the rattlesnake's skin, with a sudden, c
temptuous gesture,
Jerking the Indian arrows, he filled it with powder
bullets

Full to the very jaws, and handed it back to the sav
Saying, in thundering tones: "Here, take it! this is y
answer!"

Silently out of the room then glided the glister
savage,

Bearing the serpent's skin, and seeming himself lik
serpent,

Winding his sinuous way in the dark to the depths
the forest.

THE SAILING OF THE MAYFLOW

Just in the gray of the dawn, as the mists uprose fr
the meadows,

There was a stir and a sound in the slumbering vill
of Plymouth;

Clanging and clicking of arms, and the order imperative,
"Forward!"

Given in tone suppressed, a tramp of feet, and then
silence.

Figures ten, in the mist, marched slowly out of the
village.

Standish the stalwart it was, with eight of his valorous
army,

Led by their Indian guide, by Hobomok, friend of the
white men,

Northward marching to quell the sudden revolt of the
savage.

Giants they seemed in the mist, or the mighty men of
King David;

Giants in heart they were, who believed in God and
the Bible,—

Ay, who believed in the smiting of Midianites and
Philistines.

Over them gleamed far off the crimson banners of
morning;

Under them loud on the sands, the serried billows,
advancing,

Fired along the line, and in regular order retreated.

Many a mile had they marched, when at length the
village of Plymouth

Woke from its sleep, and arose, intent on its manifold
labors.

Sweet was the air and soft; and slowly the smoke from
the chimneys

Rose over roofs of thatch, and pointed steadily eastward;
Men came forth from the doors and paused and talked
of the weather,

Said that the wind had changed, and was blowing fair
for the Mayflower;

Talked of their Captain's departure, and all the dangers
that menaced,

He being gone, the town, and what should be done in
his absence.

Merrily sang the birds, and the tender voices of women
Consecrated with hymns the common cares of the
household.

Out of the sea rose the sun, and the billows rejoiced at
his coming;

Beautiful were his feet on the purple tops of the
mountains;

Beautiful on the sails of the Mayflower riding at anchor,
Battered and blackened and worn by all the storms of
the winter

Loosely against her masts was hanging and flapping her
canvas,

Rent by so many gales, and patched by the hands of the
sailors.

Suddenly from her side, as the sun rose over the ocean,
Darted a puff of smoke, and floated seaward, anon rang
loud over field and forest the cannon's roar, and the
echoes

Heard and repeated the sound, the signal-gun of departure!
Ah! but with louder echoes replied the hearts of the
people'

Meekly, in voices subdued, the chapter was read from
the Bible,

Meekly the prayer was begun, but ended in fervent
entreaty'

Then from their houses in haste came forth the Pilgrims
of Plymouth,

Men and women and children, all hurrying down to the
sea-shore,

Eager, with tearful eyes, to say farewell to the Mayflower,
Homeward bound o'er the sea, and leaving them here in
the desert.

Foremost among them was Alden All night he had
lain without slumber.

Turning and tossing about in the heat and unrest of
his fever.

He had beheld Miles Standish, who came back late from
the council,

Stalking into the room, and heard him mutter and
murmur,

Sometimes it seemed a prayer, and sometimes it sounded
like swearing,

Once he had come to the bed, and stood there a moment
in silence;

Then he had turned away, and said: "I will not awake
him;

Let him sleep on, it is best, for what is the use of more
talking!"

Then he extinguished the light, and threw himself down
on his pallet,

Dressed as he was, and ready to start at the break of the
morning,—

Covered himself with the cloak he had worn in his
 campaigns in Flanders,—
 Slept as a soldier sleeps in his bivouac, ready for action.
 But with the dawn he arose; in the twilight Alden
 beheld him
 Put on his corselet of steel, and all the rest of his armor,
 Buckle about his waist his trusty blade of Damascus,
 Take from the corner his musket, and so stride out of
 the chamber.
 Often the heart of the youth had burned and yearned to
 embrace him,
 Often his lips had essayed to speak, imploring for
 pardon; 540
 All the old friendship came back, with its tender and
 grateful emotions;
 But his pride overmastered the nobler nature within
 him,—
 Pride, and the sense of his wrong, and the burning fire
 of the insult
 So he beheld his friend departing in anger, but spake not,
 Saw him go forth to danger, perhaps to death, and he
 spake not!
 Then he arose from his bed, and heard what the people
 were saying,
 Joined in the talk at the door, with Stephen and Richard
 and Gilbert,
 Joined in the morning prayer, and in the reading of
 Scripture,
 And, with the others, in haste went hurrying down to
 the sea-shore,
 Down to the Plymouth Rock, that had been to their feet
 as a doorstep 550
 Into a world unknown,—the corner-stone of a nation!

There with his boat was the Master, already a little
 impatient
 Lest he should lose the tide, or the wind might shift to
 the eastward,
 Square-built, hearty, and strong, with an odor of ocean
 about him,
 Speaking with this one and that, and cramming letters
 and parcels
 Into his pockets capacious, and messages mingled to-
 gether
 Into his narrow brain, till at last he was wholly be-
 wildered.

Nearer the boat stood Alden, with one foot placed
 the gunwale,
 One still firm on the rock, and talking at times with
 sailors,
 Seated erect on the thwarts, all ready and eager
 starting
 He too was eager to go, and thus put an end to
 anguish,
 Thinking to fly from despair, that swifter than keel
 or canvas,
 Thinking to drown in the sea the ghost that would
 and pursue him
 But as he gazed on the crowd, he beheld the form
 Priscilla
 Standing dejected among them, unconscious of all t
 was passing
 Fixed were her eyes upon his, as if she divined his intenti
 Fixed with a look so sad, so reproachful, imploring, a
 patient,
 That with a sudden revulsion his heart recoiled fr
 its purpose,
 As from the verge of a crag, where one step more
 destruction.
 Strange is the heart of man, with its quick, mysteri
 instincts!
 Strange is the life of man, and fatal or fated are momen
 Whereupon turn, as on hinges, the gates of the w
 adamantyne'
 "Here I remain!" he exclaimed, as he looked at
 heavens above him,
 Thanking the Lord whose breath had scattered the m
 and the madness,
 Wherein, blind and lost, to death he was stagger
 headlong.
 "Yonder snow-white cloud, that floats in the et
 above me,
 Seems like a hand that is pointing and beckoning o
 the ocean.
 There is another hand, that is not so spectral a
 ghost-like,
 Holding me, drawing me back, and clasping mine
 protection.
 Float, O hand of cloud, and vanish away in the ether
 Roll thyself up like a fist, to threaten and daunt me
 heed not
 Either your warning or menace, or any omen of evil'

There is no land so sacred, no air so pure and so
 wholesome,
 As is the air she breathes, and the soil that is pressed
 by her footsteps
 Here for her sake will I stay, and like an invisible presence
 Hover around her forever, protecting, supporting her
 weakness,
 Yes! as my foot was the first that stepped on this rock
 at the landing,
 So, with the blessing of God, shall it be the last at the
 leaving!"

Meanwhile the Master alert, but with dignified air
 and important,
 Scanning with watchful eye the tide and the wind and
 the weather, 590
 Walked about on the sands, and the people crowded
 around him
 Saying a few last words, and enforcing his careful
 remembrance.
 Then, taking each by the hand, as if he were grasping
 a tiller,
 Into the boat he sprang, and in haste shoved off to his
 vessel,
 Glad in his heart to get rid of all this worry and flurry,
 Glad to be gone from a land of sand and sickness and
 sorrow,
 Short allowance of victual, and plenty of nothing but
 Gospel!
 Lost in the sound of the oars was the last farewell of
 the Pilgrims.
 O strong hearts and true! not one went back in the
 Mayflower!
 No, not one looked back, who had set his hand to this
 ploughing! 600

Soon were heard on board the shouts and songs of the
 sailors
 Heaving the windlass round, and hoisting the ponderous
 anchor.
 Then the yards were braced, and all sails set to the west-
 wind,
 Blowing steady and strong; and the Mayflower sailed
 from the harbor,
 Rounded the point of the Gurnet, and leaving far to the
 southward

Island and cape of sand, and the Field of the First
 Encounter,
 Took the wind on her quarter, and stood for the open
 Atlantic,
 Borne on the sand of the sea, and the swelling hearts of
 the Pilgrims

Long in silence they watched the receding sail of the
 vessel,
 Much endeared to them all, as something living and
 human; 610
 Then, as if filled with the spirit, and wrapt in a vision
 prophetic,
 Baring his hoary head, the excellent Elder of Plymouth
 Said, "Let us pray!" and they prayed, and thanked the
 Lord and took courage
 Mournfully sobbed the waves at the base of the rock, and
 above them
 Bowed and whispered the wheat on the hill of death, and
 their kindred
 Seemed to awake in their graves, and to join in the prayer
 that they uttered
 Sun-illumined and white, on the eastern verge of the
 ocean
 Gleamed the departing sail, like a marble slab in a grave-
 yard,
 Buried beneath it lay forever all hope of escaping
 Lo' as they turned to depart, they saw the form of an
 Indian, 620
 Watching them from the hill, but while they spake with
 each other,
 Pointing with outstretched hands, and saying, "Look!"
 he had vanished
 So they returned to their homes, but Alden lingered a
 little,
 Musing alone on the shore, and watching the wash of
 the billows
 Round the base of the rock, and the sparkle and flash of
 the sunshine,
 Like the spirit of God, moving visibly over the waters.

VI

PRISCILLA

Thus for a while he stood, and mused by the shore of
 the ocean,

Thinking of many things, and most of all of Priscilla;
And as if thought had the power to draw to itself, like
the loadstone,
Whatsoever it touches, by subtle laws of its nature, 630
Lo! as he turned to depart, Priscilla was standing beside
him.

"Are you so much offended, you will not speak to me?"
said she.
"Am I so much to blame, that yesterday, when you were
pleading
Warmly the cause of another, my heart, impulsive and
wayward,
Pleaded your own, and spake out, forgetful perhaps of
decorum?
Certainly you can forgive me for speaking so frankly,
for saying
What I ought not to have said, yet now I can never
unsay it;
For there are moments in life, when the heart is so full
of emotion,
That if by chance it be shaken, or into its depth like a
pebble
Drops some careless word, it overflows, and its secret 640
Spilt on the ground like water, can never be gathered
together.
Yesterday I was shocked, when I heard you speak of
Miles Standish,
Praising his virtues, transforming his very defects into
virtues,
Praising his courage and strength, and even his fighting
in Flanders,
As if by fighting alone you could win the heart of a
woman,
Quite overlooking yourself and the rest, in exalting your
hero.
Therefore I spake as I did, by an irresistible impulse
You will forgive me, I hope, for the sake of the friend-
ship between us,
Which is too true and too sacred to be so easily broken!"
Thereupon answered John Alden, the scholar, the friend
of Miles Standish: 650
"I was not angry with you, with myself alone I was
angry,
Seeing how badly I managed the matter I had in my
keeping."

"No!" interrupted the maiden, with answer prompt and
decisive;

"No; you were angry with me, for speaking so frankly
and freely.

It was wrong, I acknowledge; for it is the fate of a woman
Long to be patient and silent, to wait like a ghost that
speechless,

Till some questioning voice dissolves the spell of a
silence

Hence is the inner life of so many suffering women
Sunless and silent and deep, like subterranean rivers
Running through caverns of darkness, unheard, unseen,
and unfruitful. 6

Chafing their channels of stone, with endless and profit-
less murmurs."

Thereupon answered John Alden, the young man, the
lover of women

"Heaven forbid it, Priscilla, and truly they seem to me
always

More like the beautiful rivers that watered the garden
of Eden,

More like the river Euphrates, through deserts of Havilah
flowing,

Filling the land with delight, and memories sweet of the
garden!"

"Ah, by these words, I can see," again interrupted the
maiden,

"How very little you prize me, or care for what I am
saying.

When from the depths of my heart, in pain and with
secret misgiving,

Frankly I speak to you, asking for sympathy only at
kindness,

Straightway you take up my words, that are plain and
direct and in earnest,

Turn them away from their meaning, and answer with
flattering phrases.

This is not right, is not just, is not true to the best that
is in you;

For I know and esteem you, and feel that your nature
is noble,

Lifting mine up to a higher, a more ethereal level.

Therefore I value your friendship, and feel it perhaps more
keenly

If you say aught that implies I am only as one among
many,

If you make use of those common and complimentary
phrases
Most men think so fine, in dealing and speaking with
women,
But which women reject as insipid, if not as in-
sulting."

680

Mute and amazed was Alden; and listened and looked
at Priscilla,
Thinking he never had seen her more fair, more divine
in her beauty
He who but yesterday pleaded so glibly the cause of an-
other,
Stood there embarrassed and silent, and seeking in vain
for an answer.
So the maiden went on, and little divined or imagined
What was at work in his heart, that made him so awk-
ward and speechless.
"Let us, then, be what we are, and speak what we think,
and in all things
Keep ourselves loyal to truth, and the sacred professions
of friendship.
It is no secret I tell you, nor am I ashamed to declare it:
I have liked to be with you, to see you, to speak with you
always.
So I was hurt at your words, and a little affronted to hear
you
Urge me to marry your friend, though he were the Cap-
tain Miles Standish.
For I must tell you the truth: much more to me is your
friendship
Than all the love he could give, were he twice the hero
you think him."
Then she extended her hand, and Alden, who eagerly
grasped it,
Felt all the wounds in his heart, that were aching and
bleeding so sorely,
Healed by the touch of that hand, and he said, with a
voice full of feeling:
"Yes, we must ever be friends; and of all who offer you
friendship
Let me be ever the first, the truest, the nearest and
dearest!"

Casting a farewell look at the glimmering sail of the
Mayflower,

700

Distant, but still in sight, and sinking below the
horizon,
Homeward together they walked, with a strange, indefi-
nite feeling,
That all the rest had departed and left them alone in the
desert
But, as they went through the fields in the blessing and
smile of the sunshine,
Lighter grew their hearts, and Priscilla said very archly:
"Now that our terrible Captain has gone in pursuit of
the Indians,
Where he is happier far than he would be commanding
a household,
You may speak boldly, and tell me of all that happened
between you,
When you returned last night, and said how ungrateful
you found me."
Thereupon answered John Alden, and told her the whole
of the story,—
Told her his own despair, and the direful wrath of Miles
Standish
Whereat the maiden smiled, and said between laughing
and earnest,
"He is a little chimney, and heated hot in a moment!"
But as he gently rebuked her, and told her how he had
suffered,—
How he had even determined to sail that day in the
Mayflower,
And had remained for her sake, on hearing the dangers
that threatened,—
All her manner was changed, and she said with a falter-
ing accent,
"Truly I thank you for this: how good you have been to
me always!"

710

720

Thus, as a pilgrim devout, who toward Jerusalem
journeys,
Taking three steps in advance, and one reluctantly back-
ward,
Urged by importunate zeal, and withheld by pangs of
contrition;
Slowly but steadily onward, receding yet ever advancing,
Journeyed this Puritan youth to the Holy Land of his
longings,
Urged by the fervor of love, and withheld by remorseful
misgivings.

THE MARCH OF MILES STANDISH

Meanwhile the stalwart Miles Standish was marching
 steadily northward,
 Winding through forest and swamp, and along the trend
 of the seashore,
 All day long, with hardly a halt, the fire of his anger
 Burning and crackling within, and the sulphurous odor
 of powder
 Seeming more sweet to his nostrils than all the scents
 of the forest
 Silent and moody he went, and much he revolved his
 discomfort, 730
 He who was used to success, and to easy victories
 always,
 Thus to be flouted, rejected, and laughed to scorn by a
 maiden,
 Thus to be mocked and betrayed by the friend whom
 most he had trusted!
 Ah! 't was too much to be borne, and he fretted and
 chafed in his armor!

"I alone am to blame," he muttered, "for mine was
 the folly
 What has a rough old soldier, grown grim and gray in
 the harness,
 Used to the camp and its ways, to do with the wooing
 of maidens?
 'T was but a dream,—let it pass,—let it vanish like so
 many others!
 What I thought was a flower, is only a weed, and is
 worthless;
 Out of my heart will I pluck it, and throw it away, and
 henceforward 740
 Be but a fighter of battles, a lover and wooer of dangers!"
 Thus he revolved in his mind his sorry defeat and dis-
 comfort,
 While he was marching by day or lying at night in the
 forest,
 Looking up at the trees, and the constellations beyond
 them.

After a three days' march he came to an Indian en-
 campment

Pitched on the edge of a meadow, between the sea and
 the forest;
 Women at work by the tents, and warriors, horrid with
 war-paint,
 Seated about a fire, and smoking and talking together;
 Who, when they saw from afar the sudden approach of
 the white men,
 Saw the flash of the sun on breastplate and sabre and
 musket, 7
 Straightway leaped to their feet, and two, from among
 them advancing,
 Came to parley with Standish, and offer him furs as
 present,
 Friendship was in their looks, but in their hearts there
 was hatred
 Braves of the tribe were these, and brothers, gigantic in
 stature,
 Huge as Goliath of Gath, or the terrible Og, king of Bashan
 One was Pecksuot named, and the other was called
 Wattawamat.
 Round their necks were suspended their knives in scabbards
 of wampum,
 Two-edged, trenchant knives, with points as sharp as a
 needle.
 Other arms had they none, for they were cunning and
 crafty.
 "Welcome, English!" they said,—these words they had
 learned from the traders 760
 Touching at times on the coast, to barter and chaffer for
 peltries.
 Then in their native tongue they began to parley with
 Standish,
 Through his guide and interpreter, Hobomok, friend of
 the white man,
 Begging for blankets and knives, but mostly for muskets
 and powder,
 Kept by the white man, they said, concealed, with the
 plague, in his cellars,
 Ready to be let loose, and destroy his brother the red
 man!
 But when Standish refused, and said he would give them
 the Bible,
 Suddenly changing their tone, they began to boast and
 to bluster.
 Then Wattawamat advanced with a stride in front of the
 other,

And, with a lofty demeanor, thus vauntingly spake to the Captain

770

"Now Watawamat can see, by the fiery eyes of the Captain,

Angry is he in his heart, but the heart of the brave Watawamat

Is not afraid at the sight. He was not born of a woman, But on a mountain at night, from an oak-tree riven by lightning,

Forth he sprang at a bound, with all his weapons about him,

Shouting, 'Who is there here to fight with the brave Watawamat?'"

Then he unsheathed his knife, and, whetting the blade on his left hand,

Held it aloft and displayed a woman's face on the handle, Saying, with bitter expression and look of sinister meaning

"I have another at home, with the face of a man on the handle,

780

By and by they shall marry, and there will be plenty of children!"

Then stood Pecksuot forth, self-vaunting, insulting Miles Standish

While with his fingers he patted the knife that hung at his bosom,

Drawing it half from its sheath, and plunging it back, as he muttered,

"By and by it shall see; it shall eat; ah, ha! but shall speak not!

This is the mighty Captain the white men have sent to destroy us!

He is a little man. let him go and work with the women!"

Meanwhile Standish had noted the faces and figures of Indians

Peeping and creeping about from bush to tree in the forest,

Feigning to look for game, with arrows set on their bow-strings,

790

Drawing about him still closer and closer the net of their ambush.

But undaunted he stood, and dissembled and treated them smoothly;

So the old chronicles say, that were writ in the days of the fathers

But when he heard their defiance, the boast, the taunt, and the insult,

All the hot blood of his race, of Sir Hugh and of Thurston de Standish,

Boiled and beat in his heart, and swelled in the veins of his temples

Headlong he leaped on the boaster, and, snatching his knife from its scabbard,

Plunged it into his heart, and, reeling backward, the savage

Fell with his face to the sky, and a fiendlike fierceness upon it.

Straight there arose from the forest the awful sound of the war-whoop,

800

And, like a flurry of snow on the whistling wind of December,

Swift and sudden and keen came a flight of feathery arrows

Then came a cloud of smoke, and out of the cloud came the lightning,

Out of the lightning thunder, and death unseen ran before it.

Frightened the savages fled for shelter in swamp and in thicket,

Hotly pursued and beset, but their sachem, the brave Watawamat,

Fled not, he was dead Unswerving and swift had a bullet Passed through his brain, and he fell with both hands clutching the greensward,

Seeming in death to hold back from his foe the land of his fathers.

There on the flowers of the meadow the warriors lay, and above them,

810

Silent, with folded arms, stood Hobomok, friend of the white man.

Smiling at length he exclaimed to the stalwart Captain of Plymouth:—

"Pecksuot bragged very loud, of his courage, his strength, and his stature,—

Mocked the great Captain, and called him a little man; but I see now

Big enough have you been to lay him speechless before you!"

Thus the first battle was fought and won by the stalwart Miles Standish.
 When the tidings thereof were brought to the village of Plymouth,
 And as a trophy of war the head of the brave Watawamat
 Scowled from the roof of the fort, which at once was a church and a fortress,
 All who beheld it rejoiced, and praised the Lord, and took courage. 820
 Only Priscilla averted her face from this spectre of terror,
 Thanking God in her heart that she had not married Miles Standish;
 Shrinking, fearing almost, lest, coming home from his battles,
 He should lay claim to her hand, as the prize and reward of his valor

VIII

THE SPINNING-WHEEL

Month after month passed away, and in Autumn the ships of the merchants
 Came with kindred and friends, with cattle and corn for the Pilgrims
 All in the village was peace, the men were intent on their labors,
 Busy with hewing and building, with garden-plot and with merestead,
 Busy with breaking the glebe, and mowing the grass in the meadows,
 Searching the sea for its fish, and hunting the deer in the forest. 830
 All in the village was peace; but at times the rumor of warfare
 Filled the air with alarm, and the apprehension of danger.
 Bravely the stalwart Standish was scouring the land with his forces,
 Waxing valiant in fight and defeating the alien armies,
 Till his name had become a sound of fear to the nations.
 Anger was still in his heart, but at times the remorse and contrition
 Which in all noble natures succeed the passionate outbreak,

Came like a rising tide, that encounters the rush of river,
 Staying its current awhile, but making it bitter and brackish.

Meanwhile Alden at home had built him a new habitation,
 Solid, substantial, of timber rough-hewn from the firs of the forest. 8
 Wooden-barred was the door, and the roof was covered with rushes;
 Latticed the windows were, and the window-panes were of paper,
 Oiled to admit the light, while wind and rain were excluded.
 There too he dug a well, and around it planted an orchard
 Still may be seen to this day some trace of the well and the orchard.
 Close to the house was the stall, where, safe and secure from annoyance,
 Raghorn, the snow-white bull, that had fallen to Alden's allotment
 In the division of cattle, might ruminate in the night time
 Over the pastures he cropped, made fragrant by sweet pennyroyal. 81

Oft when his labor was finished, with eager feet would the dreamer
 Follow the pathway that ran through the woods to the house of Priscilla,
 Led by illusions romantic and subtle deceptions of fancy
 Pleasure disguised as duty, and love in the semblance of friendship.
 Ever of her he thought, when he fashioned the walls of his dwelling;
 Ever of her he thought, when he delved in the soil of his garden;
 Ever of her he thought, when he read in his Bible or Sunday
 Praise of the virtuous woman, as she is described in the Proverbs,—
 How the heart of her husband doth safely trust in her always,

828 merestead, building site

How all the days of her life she will do him good, and
not evil, 860
How she seeketh the wool and the flax and worketh with
gladness,
How she layeth her hand to the spindle and holdeth the
distaff,
How she is not afraid of the snow for herself or her
household,
Knowing her household are clothed with the scarlet cloth
of her weaving!

So as she sat at her wheel one afternoon in the Autumn,
Alden, who opposite sat, and was watching her dexterous
fingers,
As if the thread she was spinning were that of his life
and his fortune,
After a pause in their talk, thus spake to the sound of the
spindle.
"Truly, Priscilla," he said, "when I see you spinning and
spinning,
Never idle a moment, but thrifty and thoughtful of
others, 870
Suddenly you are transformed, are visibly changed in a
moment;
You are no longer Priscilla, but Bertha the Beautiful
Spinner."
Here the light foot on the treadle grew swifter and
swifter, the spindle
Uttered an angry snarl, and the thread snapped short in
her fingers;
While the impetuous speaker, not heeding the mischief,
continued:
"You are the beautiful Bertha, the spinner, the queen of
Helvetia;
She whose story I read at a stall in the streets of South-
ampton,
Who, as she rode on her palfrey, o'er valley and meadow
and mountain,
Ever was spinning her thread from a distaff fixed to her
saddle.
She was so thrifty and good, that her name passed into
a proverb. 880
So shall it be with your own, when the spinning-wheel
shall no longer
Hum in the house of the farmer, and fill its chambers
with music.

Then shall the mothers, reproving, relate how it was in
their childhood,
Praising the good old times, and the days of Priscilla the
spinner!"
Straight uprose from her wheel the beautiful Puritan
maiden,
Pleased with the praise of her thrift from him whose
praise was the sweetest,
Drew from the reel on the table a snowy skein of her
spinning,
Thus making answer, meanwhile, to the flattering phrases
of Alden:
"Come, you must not be idle, if I am a pattern for house-
wives,
Show yourself equally worthy of being the model of
husbands. 890
Hold this skein on your hands, while I wind it, ready for
knitting,
Then who knows but hereafter, when fashions have
changed and the manners,
Fathers may talk to their sons of the good old times of
John Alden!"
Thus, with a jest and a laugh, the skein on his hands she
adjusted,
He sitting awkwardly there, with his arms extended be-
fore him,
She standing graceful, erect, and winding the thread from
his fingers,
Sometimes chiding a little his clumsy manner of holding,
Sometimes touching his hands, as she disentangled ex-
pertly
Twist or knot in the yarn, unawares—for how could she
help it?—
Sending electrical thrills through every nerve in his
body 900

Lo! in the midst of this scene, a breathless messenger
entered,
Bringing in hurry and heat the terrible news from the
village.
Yes; Miles Standish was dead!—an Indian had brought
them the tidings,—
Slain by a poisoned arrow, shot down in the front of the
battle,
Into an ambush beguiled, cut off with the whole of his
forces;

All the town would be burned, and all the people be
 murdered'
 Such were the tidings of evil that burst on the hearts of
 the hearers
 Silent and statue-like stood Priscilla, her face looking
 backward
 Still at the face of the speaker, her arms uplifted in
 horror;
 But John Alden, upstarting, as if the barb of the arrow 910
 Piercing the heart of his friend had struck his own, and
 had sundered
 Once and forever the bonds that held him bound as a
 captive
 Wild with excess of sensation, the awful delight of his
 freedom,
 Mingled with pain and regret, unconscious of what he
 was doing,
 Clasped, almost with a groan, the motionless form of
 Priscilla,
 Pressing her close to his heart, as forever his own, and
 exclaiming:
 "Those whom the Lord hath united, let no man put them
 asunder!"

Even as rivulets twain, from distant and separate
 sources,
 Seeing each other afar, as they leap from the rocks, and
 pursuing
 Each one its devious path, but drawing nearer and
 nearer, 920
 Rush together at last, at their trysting-place in the forest;
 So these lives that had run thus far in separate channels,
 Coming in sight of each other, then swerving and flowing
 asunder,
 Parted by barriers strong, but drawing nearer and
 nearer,
 Rushed together at last, and one was lost in the other.

IX

THE WEDDING PARTY

Forth from the curtain of clouds, from the tent of purple
 and scarlet,
 Issued the sun, the great High-Priest, in his garments
 resplendent,

Holiness unto the Lord, in letters of light, on his fo-
 head,
 Round the hem of his robe the golden bells and por-
 granates.
 Blessing the world he came, and the bars of vapor b-
 neath him
 Gleamed like a grate of brass, and the sea at his feet w-
 a laver!

This was the wedding morn of Priscilla the Purit-
 maiden
 Friends were assembled together, the Elder and Mag-
 strate also
 Graced the scene with their presence, and stood like t-
 Law and the Gospel,
 One with the sanction of earth and one with the blessin-
 of heaven.
 Simple and brief was the wedding, as that of Ruth at
 of Boaz.
 Softly the youth and the maiden repeated the words
 betrothal,
 Taking each other for husband and wife in the Mag-
 strate's presence,
 After the Puritan way, and the laudable custom of Hollan-
 Fervently then, and devoutly, the excellent Elder
 Plymouth
 Prayed for the hearth and the home, that were founde-
 that day in affection,
 Speaking of life and of death, and imploring Divin-
 benedictions.

Lo! when the service was ended, a form appeared c-
 the threshold,
 Clad in armor of steel, a sombre and sorrowful figure
 Why does the bridegroom start and stare at the strang-
 apparition?
 Why does the bride turn pale, and hide her face on h-
 shoulder?
 Is it a phantom of air,—a bodiless, spectral illusion?
 Is it a ghost from the grave, that has come to forbid th-
 betrothal?

936 wedding, as recorded in the Book of Ruth • 939 After . . . wa-
 Bradford, in his History, speaks of the Puritan belief that a marriage
 should be performed by a magistrate, "as being a civil thing . . ."
 wher found in the gospel to be layed on the ministers as a part of
 their office"

Long had it stood there unseen, a guest uninvited, un-
 welcomed;
 Over its clouded eyes there had passed at times an ex-
 pression
 Softening the gloom and revealing the warm heart hid-⁹⁵⁰
 den beneath them,
 As when across the sky the driving rack of the rain-cloud
 Grows for a moment thin, and betrays the sun by its
 brightness
 Once it had lifted its hand, and moved its lips, but was
 silent,
 As if an iron will had mastered the fleeting intention.
 But when were ended the troth and the prayer and the
 last benediction,
 Into the room it strode, and the people beheld with
 amazement
 Bodily there in his armor Miles Standish, the Captain of
 Plymouth!
 Grasping the bridegroom's hand, he said with emotion,
 "Forgive me!
 I have been angry and hurt,—too long have I cherished
 the feeling.
 I have been cruel and hard, but now, thank God! it is⁹⁶⁰
 ended
 Mine is the same hot blood that leaped in the veins of
 Hugh Standish,
 Sensitive, swift to resent, but as swift in atoning for
 error
 Never so much as now was Miles Standish the friend of
 John Alden"
 Thereupon answered the bridegroom. "Let all be for-
 gotten between us,—
 All save the dear, old friendship, and that shall grow older
 and dearer!"
 Then the Captain advanced, and, bowing, saluted Pris-
 cilla,
 Gravely, and after the manner of old-fashioned gentry in
 England,
 Something of camp and of court, of town and of country,
 commingled,
 Wishing her joy of her wedding, and loudly lauding her
 husband.
 Then he said with a smile: "I should have remembered⁹⁷⁰
 the adage,—
 If you would be well served, you must serve yourself;
 and moreover,

No man can gather cherries in Kent at the season of
 Christmas!"

Great was the people's amazement, and greater yet
 their rejoicing.
 Thus to behold once more the sunburnt face of their
 Captain,
 Whom they had mourned as dead; and they gathered
 and crowded about him,
 Eager to see him and hear him, forgetful of bride and
 of bridegroom,
 Questioning, answering, laughing, and each interrupting
 the other,
 Till the good Captain declared, being quite overpowered
 and bewildered,
 He had rather by far break into an Indian encamp-
 ment,
 Than come again to a wedding to which he had not been⁹⁸⁰
 invited

Meanwhile the bridegroom went forth and stood with
 the bride at the doorway,
 Breathing the perfumed air of that warm and beautiful
 morning.
 Touched with autumnal tints, but lonely and sad in the
 sunshine,
 Lay extended before them the land of toil and privation;
 There were the graves of the dead, and the barren waste
 of the sea-shore,
 There the familiar fields, the groves of pine, and the
 meadows,
 But to their eyes transfigured, it seemed as the Garden
 of Eden,
 Filled with the presence of God, whose voice was the
 sound of the ocean.

Soon was their vision disturbed by the noise and stir
 of departure,
 Friends coming forth from the house, and impatient of⁹⁹⁰
 longer delaying,
 Each with his plan for the day, and the work that was
 left uncompleted.
 Then from a stall near at hand, amid exclamations of
 wonder,
 Alden the thoughtful, the careful, so happy, so proud of
 Priscilla,

Brought out his snow-white bull, obeying the hand of its master,
 Led by a cord that was tied to an iron ring in its nostrils,
 Covered with crimson cloth, and a cushion placed for a saddle.
 She should not walk, he said, through the dust and heat of the noonday;
 Nay, she should ride like a queen, not plod along like a peasant.
 Somewhat alarmed at first, but reassured by the others,
 Placing her hand on the cushion, her foot in the hand of her husband,
 Gayly, with joyous laugh, Priscilla mounted her palfrey.
 "Nothing is wanting now," he said with a smile, "but the distaff;
 Then you would be in truth my queen, my beautiful Bertha!"

Onward the bridal procession now moved to their new habitation,
 Happy husband and wife, and friends conversing together.
 Pleasantly murmured the brook, as they crossed the ford in the forest,
 Pleased with the image that passed, like a dream of love through its bosom,
 Tremulous, floating in air, o'er the depths of the azure abysses.
 Down through the golden leaves the sun was pouring his splendors,
 Gleaming on purple grapes, that, from branches above them suspended,
 Mingled their odorous breath with the balm of the pine and the fir-tree,
 Wild and sweet as the clusters that grew in the valley of Eshcol.
 Like a picture it seemed of the primitive, pastoral ages,
 Fresh with the youth of the world, and recalling Rebecca and Isaac,
 Old and yet ever new, and simple and beautiful always,
 Love immortal and young in the endless succession of lovers.
 So through the Plymouth woods passed onward the bridal procession.

1857-1858 • 1858

Divina Commedia

The six sonnets under this title prefaced the three parts Longfellow's translation of Dante's masterpiece—I and the "Inferno"; III and IV, the "Purgatorio"; and V and the "Paradiso." They at once comment on Dante's poem and reveal what it meant to Longfellow when, in the year of his grief over the death of his second wife, the year also, of the Civil War, he translated the poem. The pair of sonnets have appropriateness to the respective sections which they preface—Inferno, Purgatory, and Paradise.

I

Oft have I seen at some cathedral door
 A laborer, pausing in the dust and heat,
 Lay down his burden, and with reverent feet
 Enter, and cross himself, and on the floor
 Kneel to repeat his paternoster o'er;
 Far off the noises of the world retreat;
 The loud vociferations of the street
 Become an undistinguishable roar.
 So, as I enter here from day to day,
 And leave my burden at this minster gate,
 Kneeling in prayer, and not ashamed to pray,
 The tumult of the time disconsolate
 To inarticulate murmurs dies away,
 While the eternal ages watch and wait.

186

II

How strange the sculptures that adorn these towers!
 This crowd of statues, in whose folded sleeves
 Birds build their nests, while canopied with leaves
 Parvis and portal bloom like trellised bowers,
 And the vast minster seems a cross of flowers!
 But fiends and dragons on the gargoyled eaves

Divina Commedia • 5 *paternoster*, literally, "Our Father"—the rosary • 10 *minster gate*, cathedral door • 12 *time disconsolate* refers to the Civil War • 18 *Parvis*, the church porch • 20 *fiends*, a rich allusive reference, literally to the gargoyles in the church, figuratively to man in a world of evil and to the sufferers in the "Inferno"

Watch the dead Christ between the living thieves,
 And, underneath, the traitor Judas lowers!
 Ah! from what agonies of heart and brain,
 What exultations trampling on despair,
 What tenderness, what tears, what hate of wrong,
 What passionate outcry of a soul in pain,
 Uprose this poem of the earth and air,
 This medieval miracle of song!

1865

III

I enter, and I see thee in the gloom
 Of the long aisles, O poet saturnine!
 And strive to make my steps keep pace with thine.
 The air is filled with some unknown perfume,
 The congregation of the dead make room
 For thee to pass; the votive tapers shine,
 Like rooks that haunt Ravenna's groves of pine
 The hovering echoes fly from tomb to tomb.
 From the confessionals I hear arise
 Rehearsals of forgotten tragedies,
 And lamentations from the crypts below;
 And then a voice celestial that begins
 With the pathetic words, "Although your sins
 As scarlet be," and end with "as the snow"

36

40

1866

IV

With snow-white veil and garments as of flame,
 She stands before thee, who so long ago
 Filled thy young heart with passion and the woe
 From which thy song and all its splendors came,
 And while with stern rebuke she speaks thy name,
 The ice about thy heart melts as the snow
 On mountain heights, and in swift overflow
 Comes gushing from thy lips in sobs of shame.
 Thou makest full confession; and a gleam,
 As of the dawn on some dark forest cast,
 Seems on thy lifted forehead to increase;
 Lethe and Eunoe—the remembered dream
 And the forgotten sorrow—bring at last
 That perfect pardon which is perfect peace.

50

1866

V

I lift mine eyes, and all the windows blaze
 With forms of Saints and holy men who died,
 Here martyred and hereafter glorified;

And the great Rose upon its leaves displays
 Christ's Triumph, and the angelic roundelays,
 With splendor upon splendor multiplied;
 And Beatrice again at Dante's side
 No more rebukes, but smiles her words of praise.
 And then the organ sounds, and unseen choirs
 Sing the old Latin hymns of peace and love
 And benedictions of the Holy Ghost;
 And the melodious bells among the spires
 O'er all the housetops and through heaven above
 Proclaim the elevation of the Host!

60

70

1867

VI

O star of morning and of liberty!
 O bringer of the light, whose splendor shines
 Above the darkness of the Apennines,
 Forerunner of the day that is to be!
 The voices of the city and the sea,
 The voices of the mountains and the pines,
 Repeat thy song, till the familiar lines
 Are footpaths for the thought of Italy!
 Thy flame is blown abroad from all the heights,
 Through all the nations, and a sound is heard,
 As of a mighty wind, and men devout,
 Strangers of Rome, and the new proselytes,
 In their own language hear the wondrous word,
 And many are amazed and many doubt.

80

1867

Morituri Salutamur

When he was sixty-seven, Longfellow composed this poem
 for delivery at the fiftieth-anniversary celebration of the

27 this poem . . . air, the "Inferno" Here the poet combines the
 images of the opening five lines of this sonnet with those describing
 the "friends and dragons" • 30 poet saturnine, Dante • 35 Ravenna,
 a city in Italy frequently mentioned by Dante • 44 She, Beatrice •
 54 Lethe and Eunoe. In classical mythology the Lethe is the river
 of forgetfulness and the Eunoe, the river of the memory of good At
 the summit of the mountain of Purgatory, Dante drinks from these
 rivers • 60 Rose refers not only to the windows of the cathedral but
 also to the end of Dante's journey in the "Paradiso," when he sees the
 Trinity and the Blessed in the form of a rose • 70 the . . . Host,
 the climax of the celebration of the Mass when the Host is lifted high
 before the congregation • 71 star, Dante

Class of 1825, Bowdoin College. The title, which means "We who are about to die salute you," was the legendary cry of gladiators to the emperor as they were about to enter the arena. The poem is said to have been suggested by a painting of the French artist Léon Gérôme (1824-1904). Longfellow prefixed the poem with a quotation from Ovid: "Time passes away, we grow old with the quiet years, and the days fly with no delaying check."

"O Caesar, we who are about to die
Salute you!" was the gladiators' cry
In the arena, standing face to face
With death and with the Roman populace.

O ye familiar scenes,—ye groves of pine,
That once were mine and are no longer mine,—
Thou river, widening through the meadows green
To the vast sea, so near and yet unseen,—
Ye halls, in whose seclusion and repose
Phantoms of fame, like exhalations, rose
And vanished,—we who are about to die,
Salute you; earth and air and sea and sky,
And the Imperial Sun that scatters down
His sovereign splendors upon grove and town.

Ye do not answer us! ye do not hear!
We are forgotten, and in your austere
And calm indifference, ye little care
Whether we come or go, or whence or where.
What passing generations fill these halls,
What passing voices echo from these walls,
Ye heed not; we are only as the blast,
A moment heard, and then forever past.

Not so the teachers who in earlier days
Led our bewildered feet through learning's maze,
They answer us—alas! what have I said?
What greetings come there from the voiceless dead?
What salutation, welcome, or reply?
What pressure from the hands that lifeless lie?
They are no longer here; they all are gone
Into the land of shadows,—all save one
Honor and reverence, and the good repute
That follows faithful service as its fruit,
Be unto him, whom living we salute.

The great Italian poet, when he made
His dreadful journey to the realms of shade,
Met there the old instructor of his youth,
And cried in tone of pity and of ruth:
"Oh, never from the memory of my heart
Your dear, paternal image shall depart,
Who while on earth, ere yet by death surprised,
Taught me how mortals are immortalized,
How grateful am I for that patient care
All my life long my language shall declare."

Today we make the poet's words our own,
And utter them in plaintive undertone;
Nor to the living only be they said,
But to the other living called the dead,
Whose dear, paternal images appear
Not wrapped in gloom, but roped in sunshine here;
Whose simple lives, complete and without flaw,
Were part and parcel of great Nature's law,
Who said not to their Lord, as if afraid,
"Here is thy talent in a napkin laid,"
But labored in their sphere, as men who live
In the delight that work alone can give.
Peace be to them, eternal peace and rest,
And the fulfillment of the great behest:
"Ye have been faithful over a few things,
Over ten cities shall ye reign as kings."

And ye who fill the places we once filled,
And follow in the furrows that we tilled,
Young men, whose generous hearts are beating high,
We who are old, and are about to die,
Salute you; hail you; take your hands in ours,
And crown you with our welcome as with flowers!
How beautiful is youth! how bright it gleams
With its illusions, aspirations, dreams!
Book of Beginnings, Story without End,
Each maid a heroine, and each man a friend!

Aladdin's Lamp, and Fortunatus' Purse,
That holds the treasures of the universe!

30 one, Professor A. S. Packard • 36 the old instructor, Brunetto Latini Lines 38-43 are a translation of a speech in the "Inferno" • 70 Fortunatus' Purse, an inexhaustible purse which, according to an old tale, was given to Fortunatus by Fortune

All possibilities are in its hands,
No danger daunts it, and no foe withstands;
In its sublime audacity of faith,
"Be thou removed," it to the mountain saith,
And with ambitious feet, secure and proud,
Ascends the ladder leaning on the cloud!

As ancient Priam at the Scæan gate
Sat on the walls of Troy in regal state
With the old men, too old and weak to fight,
Chirping like grasshoppers in their delight
To see the embattled hosts, with spear and shield,
Of Trojans and Achæians in the field,
So from the snowy summits of our years
We see you in the plain, as each appears,
And question of you, asking, "Who is he
That towers above the others? Which may be
Atreides, Menelaus, Odysseus,
Ajax the great, or bold Idomeneus?"

Let him not boast who puts his armor on
As he who puts it off, the battle done.
Study yourselves; and most of all note well
Wherein kind Nature meant you to excel.
Not every blossom ripens into fruit,
Minerva, the inventress of the flute,
Flung it aside, when she her face surveyed
Distorted in a fountain as she played;
The unlucky Marsyas found it, and his fate
Was one to make the bravest hesitate.
Write on your doors the saying wise and old,
"Be bold! be bold!" and everywhere, "Be bold;
Be not too bold!" Yet better the excess
Than the defect; better the more than less;
Better like Hector in the field to die,
Than like a perfumed Paris turn and fly.

And now, my classmates; ye remaining few
That number not the half of those we knew,
Ye, against whose familiar names not yet
The fatal asterisk of death is set,
Ye I salute! The horologe of Time
Strikes the half-century with a solemn chime,
And summons us together once again,
The joy of meeting not unmixed with pain.

Where are the others? Voices from the deep
Caverns of darkness answer me: "They sleep!"
I name no names; instinctively I feel
Each at some well-remembered grave will kneel,
And from the inscription wipe the weeds and moss,
For every heart best knoweth its own loss.
I see their scattered gravestones gleaming white
Through the pale dusk of the impending night;
O'er all alike the impartial sunset throws
Its golden lilies mingled with the rose;
We give to each a tender thought, and pass
Out of the graveyards with their tangled grass,
Unto these scenes frequented by our feet
When we were young, and life was fresh and sweet.

What shall I say to you? What can I say
Better than silence is? When I survey
This throng of faces turned to meet my own,
Friendly and fair, and yet to me unknown,
Transformed the very landscape seems to be;
It is the same, yet not the same to me.
So many memories crowd upon my brain,
So many ghosts are in the wooded plain,
I fain would steal away, with noiseless tread,
As from a house where someone lieth dead.
I cannot go;—I pause;—I hesitate;
My feet reluctant linger at the gate;
As one who struggles in a troubled dream
To speak and cannot, to myself I seem.

Vanish the dream! Vanish the idle fears!
Vanish the rolling mists of fifty years!
Whatever time or space may intervene,
I will not be a stranger in this scene.
Here every doubt, all indecision, ends;
Hail, my companions, comrades, classmates, friends!

Ah me! the fifty years since last we met
Seem to me fifty folios bound and set

78 As ancient Priam The incident treated in II. 78-89 occurs in the Iliad, Bk III • 98 Marsyas, a presumptuous Greek poet who challenged Apollo to a musical contest, lost, and was flayed alive • 104 Hector, a Grecian hero who bravely met his death at the hands of Achilles. For Hector's bravery, and Paris' less admirable activity, see the Iliad, Bks. III and XXII • 109 fatal asterisk, a reference to the custom of indicating which members of a college class have died by marking their names with asterisks

By Time, the great transcriber, on his shelves,
 Wherein are written the histories of ourselves.
 What tragedies, what comedies, are there;
 What joy and grief, what rapture and despair!
 What chronicles of triumph and defeat,
 Of struggle, and temptation, and retreat!
 What records of regrets, and doubts, and fears!
 What pages blotted, blistered by our tears!
 What lovely landscapes on the margin shine,
 What sweet, angelic faces, what divine
 And holy images of love and trust,
 Undimmed by age, unsoiled by damp or dust!
 Whose hand shall dare to open and explore
 These volumes, closed and clasped forevermore?
 Not mine. With reverential feet I pass;
 I hear a voice that cries, "Alas! alas!
 Whatever hath been written shall remain,
 Nor be erased nor written o'er again;
 The unwritten only still belongs to thee:
 Take heed, and ponder well what that shall be."

As children frightened by a thunder-cloud
 Are reassured if some one reads aloud
 A tale of wonder, with enchantment fraught,
 Or wild adventure, that diverts their thought,
 Let me endeavor with a tale to chase
 The gathering shadows of the time and place,
 And banish what we all too deeply feel
 Wholly to say, or wholly to conceal.

In medieval Rome, I know not where,
 There stood an image with its arm in air,
 And on its lifted finger, shining clear,
 A golden ring with the device, "Strike here!"
 Greatly the people wondered, though none guessed
 The meaning that these words but half expressed,
 Until a learned clerk, who at noonday
 With downcast eyes was passing on his way,
 Paused, and observed the spot, and marked it well,
 Whereon the shadow of the finger fell;

And, coming back at midnight, delved, and found
 A secret stairway leading underground.
 Down this he passed into a spacious hall,
 Lit by a flaming jewel on the wall;
 And opposite, in threatening attitude,

150 With bow and shaft a brazen statue stood.
 Upon its forehead, like a coronet,
 Were these mysterious words of menace set:
 "That which I am, I am; my fatal aim
 None can escape, not even yon luminous flame!"

Midway the hall was a fair table placed,
 With cloth of gold, and golden cups enchased
 With rubies, and the plates and knives were gold,
 And gold the bread and viands manifold.
 160 Around it, silent, motionless, and sad,
 Were seated gallant knights in armor clad,
 And ladies beautiful with plume and zone,
 But they were stone, their hearts within were stone;
 And the vast hall was filled in every part
 With silent crowds, stony in face and heart.

Long at the scene, bewildered and amazed,
 The trembling clerk in speechless wonder gazed;
 Then from the table, by his greed made bold,
 2 He seized a goblet and a knife of gold,
 And suddenly from their seats the guests upsprang,
 The vaulted ceiling with loud clamors rang,
 The archer sped his arrow, at their call,
 Shattering the lambent jewel on the wall,
 And all was dark around and overhead,—
 Stark on the floor the luckless clerk lay dead.

The writer of this legend then records
 Its ghostly application in these words:
 The image is the Adversary old,
 22 Whose beckoning finger points to realms of gold;
 180 Our lusts and passions are the downward stair
 That leads the soul from a diviner air;
 The archer, Death; the flaming jewel, Life;
 Terrestrial goods, the goblet and the knife;
 The knights and ladies, all whose flesh and bone
 By avarice have been hardened into stone;
 The clerk, the scholar whom the love of pelf
 Tempts from his books and from his nobler self.

The scholar and the world! The endless strife,
 230 The discord in the harmonies of life!

190

174 tale, in the famous medieval collection, *Gesta Romanorum*, Tale CVII

The love of learning, the sequestered nooks,
And all the sweet serenity of books;
The market-place, the eager love of gain,
Whose aim is vanity, and whose end is pain!

But why, you ask me, should this tale be told
To men grown old, or who are growing old?
It is too late! Ah, nothing is too late
Till the tired heart shall cease to palpitate
Cato learned Greek at eighty; Sophocles
240 Wrote his grand *Ædipus*, and Simonides
Bore off the prize of verse from his compeers,
When each had numbered more than fourscore years,
And Theophrastus, at fourscore and ten,
Had but begun his "Characters of Men."
Chaucer, at Woodstock with the nightingales,
At sixty wrote the *Canterbury Tales*,
Goethe at Weimar, toiling to the last,
Completed *Faust* when eighty years were past.
These are indeed exceptions; but they show
How far the gulf-stream of our youth may flow
Into the arctic regions of our lives,
Where little else than life itself survives.

As the barometer foretells the storm
While still the skies are clear, the weather warm,
So something in us, as old age draws near,
Betrays the pressure of the atmosphere.
The nimble mercury, ere we are aware,
Descends the elastic ladder of the air;
The telltale blood in artery and vein
Sinks from its higher levels in the brain;
Whatever poet, orator, or sage
May say of it, old age is still old age
It is the waning, not the crescent moon;
The dusk of evening, not the blaze of noon;
It is not strength, but weakness; not desire,
But its surcease; not the fierce heat of fire,
The burning and consuming element,
But that of ashes and of embers spent,
In which some living sparks we still discern,
Enough to warm, but not enough to burn.

What then? Shall we sit idly down and say
The night hath come; it is no longer day?
The night hath not yet come; we are not quite

Cut off from labor by the failing light;
Something remains for us to do or dare;
Even the oldest tree some fruit may bear;
Not *Ædipus Coloneus*, or Greek Ode,
Or tales of pilgrims that one morning rode
Out of the gateway of the Tabard Inn,
But other something, would we but begin;
For age is opportunity no less
Than youth itself, though in another dress,
And as the evening twilight fades away
The sky is filled with stars, invisible by day.

280

1874-1875

Sleep

Lull me to sleep, ye winds, whose fitful sound
Seems from some faint *Æolian* harp-string caught;
Seal up the hundred wakeful eyes of thought
As *Hermes* with his lyre in sleep profound
The hundred wakeful eyes of *Argus* bound;
For I am weary, and am overwrought
With too much toil, with too much care distraught,
And with the iron crown of anguish crowned.
Lay thy soft hand upon my brow and cheek,
O peaceful Sleep! until from pain released
10 I breathe again uninterrupted breath!
Ah, with what subtle meaning did the Greek
Call thee the lesser mystery at the feast
Whereof the greater mystery is death!

1875

Morituri Salutamus • 240 Cato, Cato the Censor (234-149 B C) •
240 Sophocles (495-405 B C) is said to have written *Oedipus at*
Colonus shortly before his death • 241 Simonides (556-467 B C),
great Greek lyric poet • 244 Theophrastus (382-297 B C), author of
Moral Characters • 246 Chaucer . . . sixty. At the time Long-
fellow wrote, it was thought that Chaucer had been born in 1320.
Modern scholars believe that 1340 was nearer the date of his birth
• 248 Goethe began work on *Faust* in 1773, but the conclusion did
not appear until 1833

270

Sleep • 4 *Hermes*, son of Jupiter and the inventor of the lyre • 5 *Argus*,
the hundred-eyed son of Zeus, who had a habit of sleeping with only
two eyes at a time. *Hermes*, by playing wonderful music, put all his eyes
to sleep at once and then slew him

Jugurtha

The Tide Rises the Tide Falls

The incident treated here is based on Plutarch's life of Marius, the Roman general. In Plutarch's account Jugurtha, a Numidian king defeated by the Romans, addresses his words to Hercules. But the name of Apollo, the god of manly youth and beauty, of poetry, music, and oracles, and of healing and sudden death, has more poetic associations for modern readers.

How cold are thy baths, Apollo!

Cried the African monarch, the splendid,
As down to his death in the hollow
Dark dungeons of Rome he descended,
Uncrowned, unthroned, unattended;
How cold are thy baths, Apollo!

How cold are thy baths, Apollo!

Cried the Poet, unknown, unbefriended,
As the vision that lured him to follow
With the mist and the darkness blended, 10
And the dream of his life was ended;
How cold are thy baths, Apollo!

1879-1880

The tide rises, the tide falls,
The twilight darkens, the curlew calls;
Along the sea-sands damp and brown
The traveller hastens toward the town,
And the tide rises, the tide falls.

Darkness settles on roofs and walls,
But the sea, the sea in the darkness calls;
The little waves, with their soft, white hands,
Efface the footprints in the sands,
And the tide rises, the tide falls.

The morning breaks; the steeds in their stalls
Stamp and neigh, as the hostler calls;
The day returns, but nevermore
Returns the traveller to the shore,
And the tide rises, the tide falls.

1879-1880

Oliver Wendell Holmes

1809 • 1894

"I have always been good company for myself," said Oliver Wendell Holmes. Because he was also good company—almost always—for others, Holmes' chief contribution to our letters probably was the infusion into them of a social grace that, in those days, flourished most

notably in Europe. For this reason historians have pointed out that, like the two other famed Cambridge authors, Longfellow and Lowell, in his own unique way Holmes helped adapt European culture to American needs.

It was Holmes who dubbed the social group to which he belonged "Brahmins." A Brahmin is defined in the dictionary as "a Hindu of the highest, or priestly, caste." That Holmes belonged to the highest caste in New England there can be no doubt. His birth and his rearing were in accord with the tradition of his class. He was born in an old house which had historical associations with important battles of the Revolution. He was what he called "a man of family"—one "who inherits family traditions and the cumulative humanities of at least five generations." He was educated at a leading private school, at Harvard, and abroad. In his profession, medicine, he won honors first as a scholar and later (1847-1882) as a noted professor at Harvard.

But there was nothing priestly about little Doctor Holmes. To be sure, in some of his poems, like "The Chambered Nautilus" and various hymns, he preached what he considered inspired truths in a fashion much like that of Longfellow. His scientific training, however, led him to hit out fiercely at older religious attitudes and to distinguish sharply between acts for which man was responsible and acts determined by heredity and environment. Unlike many religious folk of his day, he refused to blame men for the results of their inherited qualities and their upbringing. Perhaps his chief contribution to American thought was the exposition of the deterministic philosophy which stressed the way a man's nature and upbringing molded his life. Furthermore, he was enough of a conservative in his social attitude during

this great period of reform to attack vigorously any notions of human regeneration. Finally, much of his most admired verse is worldly, polished, amusing, rather than profound or preachy, and such papers as *The Autocrat of the Breakfast-Table* (1858) and *Over the Teacups* (1891) thrive chiefly because they gracefully transfer Holmes' charming talk to the printed page.

Strung together on slender threads of fiction, these collections of papers from the *Atlantic Monthly* happily combine the informal essay with informal conversation. A group of boarding-house characters who now and then voice opinions or ask questions are, for the most part, useful foils for the Autocrat, the Professor, or the Poet as each carries on his interrupted monologues. Each of the monologists, since he has various aspects of Holmes' character, can, like his creator, talk shrewdly and wittily about hosts of subjects. In books of this type, rather than in novels such as *Elsie Venner* (1861), Holmes excelled. The novels—"medicated" novels, he called them—deal more seriously but less successfully with scientific and ethical problems. Their chief interest, aside from the ideas they express, derives from their gropings toward the form of something like the psychological fiction Henry James was later to write.

Holmes' verse, like his prose, is at its best when it is most informal. With a taste for eighteenth-century

Panel (l to r) Holmes' birthplace in Cambridge • Oliver Wendell Holmes at 41 • Medical students at Harvard • Holmes' study

authors formed by childhood reading in his father's library, Holmes for a long time scoffed at the idea of poetic inspiration. Although in time he came to believe that the best poetry was inspired, as a rule he himself was content to write after the models of the sociable Neoclassical authors who flourished in England between 1660 and 1720. His numerous occasional verses, his use of the mock-heroic form, his preference for ballad stanzas and heroic couplets show his kinship with the Queen Anne "gentlemen who writ with ease." "I hold it to be a gift of a certain value," he wrote Lowell, "to give that slight passing spasm of pleasure which a few ringing

couplets often cause, read at the right moment. Though they are for the most part to poetry as the beating of a drum or the tinkling of a triangle is to the harmony of a band, yet it is not everybody who can get the limited significance out of these humble instruments."

Old Ironsides

When, in September 1830, Holmes read a newspaper report that the old and unseaworthy frigate *Constitution*, the conqueror of the *Guerrière* in the War of 1812, had been ordered destroyed, he wrote this indignant protest. Published first in the September 16, 1830 issue of the *Boston Daily Advertiser*, the poem was reprinted in many newspapers and was circulated in handbill form in Washington, D. C. The stir started by the poem caused the order to be retracted.

Ay, tear her tattered ensign down!
 Long has it waved on high,
 And many an eye has danced to see
 That banner in the sky;
 Beneath it rung the battle shout,
 And burst the cannon's roar;—
 The meteor of the ocean air
 Shall sweep the clouds no more!

Her deck, once red with heroes' blood,
 Where knelt the vanquished foe,
 When winds were hurrying o'er the flood,
 And waves were white below,
 No more shall feel the victor's tread,
 Or know the conquered knee;—
 The harpies of the shore shall pluck
 The eagle of the sea!

Oh, better that her shattered hulk
 Should sink beneath the wave;
 Her thunder shook the mighty deep,
 And there should be her grave;
 Nail to the mast her holy flag,
 Set every threadbare sail,
 And give her to the god of storms,
 The lightning and the gale!

183

The Ballad of the Oysterman

This mock-heroic poem emphasizes Holmes' indebtedness to the eighteenth-century light verse writers, such as Prior and Gray, who frequently wrote amusing poetry of this sort. An excellent example of the pretentious treatment of a nonheroic subject, it uses epic and ballad convention to emphasize the incongruous elements in some of the sentimental love poetry of the 1830's.

It was a tall young oysterman lived by the river-side,
 His shop was just upon the bank, his boat was on the
 tide;
 The daughter of a fisherman, that was so straight and
 slim,
 Lived over on the other bank, right opposite to him.

It was the pensive oysterman that saw a lovely maid,
Upon a moonlight evening, a-sitting in the shade;
He saw her wave her handkerchief as much as if to say,
"I'm wide awake, young oysterman, and all the folks
away."

Then up arose the oysterman, and to himself said he,
"I guess I'll leave the skiff at home, for fear that folks
should see; 10
I read it in the story-book, that, for to kiss his dear,
Leander swam the Hellespont,—and I will swim this
here."

And he has leaped into the waves, and crossed the
shining stream,
And he has clambered up the bank, all in the moonlight
gleam;
Oh there were kisses sweet as dew, and words as soft as
rain,—
But they have heard her father's step, and in he leaps
again!

Out spoke the ancient fisherman,—“Oh, what was that,
my daughter?”
“’Twas nothing but a pebble, sir, I threw into the water.”
“And what is that, pray tell me, love, that paddles off
so fast?”
“It’s nothing but a porpoise, sir, that’s been a-swimming
past.” 20

Out spoke the ancient fisherman,—“Now bring me my
harpoon!
I’ll get into my fishing-boat, and fix the fellow soon.”
Down fell that pretty innocent, as falls a snow-white
lamb,
Her hair drooped round her pallid cheeks, like seaweed
on a clam

Alas for those two loving ones! she waked not from her
swoond
And he was taken with the cramp, and in the waves was
drowned;
But Fate has metamorphosed them, in pity of their woe,
And now they keep an oyster-shop for mermaids down
below.

1830

My aunt! my dear unmarried aunt!
Long years have o’er her flown,
Yet still she strains the aching clasp
That binds her virgin zone;
I know it hurts her,—though she looks
As cheerful as she can,
Her waist is ampler than her life,
For life is but a span.

My aunt! my poor deluded aunt!
Her hair is almost gray, 10
Why will she train that winter curl
In such a spring-like way?
How can she lay her glasses down,
And say she reads as well,
When through a double convex lens
She just makes out to spell?

Her father—grandpapa’ forgive
This erring lip its smiles—
Vowed she should make the finest girl
Within a hundred miles, 20
He sent her to a stylish school;
’Twas in her thirteenth June,
And with her, as the rules required,
“Two towels and a spoon.”

They braced my aunt against a board,
To make her straight and tall,
They laced her up, they starved her down,
To make her light and small;
They pinched her feet, they singed her hair,
They screwed it up with pins;— 30
Oh, never mortal suffered more
In penance for her sins.

So, when my precious aunt was done,
My grandsire brought her back;

12 Leander, according to Greek legend, nightly swam the Hellespont to visit Hero, a priestess of Aphrodite. When Leander was drowned, Hero threw herself into the sea. The comparison of the humble oysterman to this character is a typical incongruous touch.

(By daylight, lest some rabid youth
Might follow on the track,)
"Ah!" said my grandsire, as he shook
Some powder in his pan,
"What could this lovely creature do
Against a desperate man!"

40

Alas! nor chariot, nor barouche,
Nor bandit cavalcade,
Tore from the trembling father's arms
His all-accomplished maid
For her how happy had it been!
And Heaven had spared to me
To see one sad, ungathered rose
On my ancestral tree.

1831

The Last Leaf

A note preceding this poem, first published in the *Amateur* for March 23, 1831, remarks that it "was suggested by the appearance in one of our streets of a venerable relic of the Revolution, said to be one of the party that threw the tea overboard in Boston Harbor." Students of American literature have been interested to learn that the subject was old Major Thomas Melville, Herman Melville's grandfather.

This is one of the most famous examples of Holmes' admirable light verse. Actually, the material might have been used in a very sentimental poem, but the exaggerated and incongruous imagery and the tripping verse form save it from mawkishness. Of the metrical scheme, Holmes said: "I do not recall any earlier example of this form of verse, which was commended by the fastidious Edgar Allan Poe, who made a copy of the poem which I have in his own handwriting."

I saw him once before,
As he passed by the door,
And again
The pavement stones resound,
As he totters o'er the ground
With his cane.

They say that in his prime,
Ere the pruning-knife of Time

Cut him down,
Not a better man was found
By the Crier on his round
Through the town.

But now he walks the streets,
And he looks at all he meets
Sad and wan,
And he shakes his feeble head,
That it seems as if he said,
"They are gone."

The mossy marbles rest
On the lips that he has prest
In their bloom,
And the names he loved to hear
Have been carved for many a year
On the tomb.

My grandmamma has said—
Poor old lady, she is dead
Long ago—
That he had a Roman nose,
And his cheek was like a rose
In the snow,

But now his nose is thin,
And it rests upon his chin
Like a staff,
And a crook is in his back,
And a melancholy crack
In his laugh.

I know it is a sin
For me to sit and grin
At him here,
But the old three-cornered hat,
And the breeches, and all that,
Are so queer!

And if I should live to be
The last leaf upon the tree
In the spring,
Let them smile, as I do now,
At the old forsaken bough
Where I cling.

1831

The Deacon's Masterpiece or, The Wonderful "One-Hoss Shay" A Logical Story

A satire on the great logical system of theology worked out by Calvinists and on the downfall of Calvinism, this poem was published in the *Atlantic Monthly* of September 1858 as part of one of the *Autocrat* papers. The date of the building of the deacon's masterpiece, 1755, was the year after the publication of Jonathan Edwards' greatest defense of Calvinism, *Freedom of the Will*; the year, too, of the Lisbon earthquake, which provoked many arguments favorable to the Calvinistic system.

Have you heard of the wonderful one-hoss shay,
That was built in such a logical way
It ran a hundred years to a day,
And then, of a sudden, it—ah, but stay,
I'll tell you what happened without delay,
Scaring the parson into fits,
Frightening people out of their wits,—
Have you ever heard of that, I say?

Seventeen hundred and fifty-five.
Georgius Secundus was then alive,—
Snuffy old drone from the German hive.
That was the year when Lisbon-town
Saw the earth open and gulp her down,
And Braddock's army was done so brown,
Left without a scalp to its crown.
It was on the terrible Earthquake-day
That the Deacon finished the one-hoss shay.

Now in building of chaises. I tell you what,
There is always *somewhere* a weakest spot,—
In hub, tire, felloe, in spring or thill,
In panel, or crossbar, or floor, or sill,
In screw, bolt, thoroughbrace,—lurking still,
Find it somewhere you must and will,—
Above or below, or within or without,—
And that's the reason, beyond a doubt,
That a chaise *breaks down*, but doesn't *wear out*.

But the Deacon swore (as Deacons do,
With an "I dew vum," or an "I tell *yeou*")
He would build one shay to beat the *taown*
'N' the keountry 'n' all the kentry raoun';
It should be so built that it *could n'* break daown;
"Fur," said the Deacon, "'t 's mighty plain
Thut the weakes' place mus' stan' the strain;
'N' the way t' fix it, uz I maintain,
Is only jest
T' make that place uz strong uz the rest."

So the Deacon inquired of the village folk
Where he could find the strongest oak,
That could n't be split nor bent nor broke,—
That was for spokes and floors and sills;
He sent for lancewood to make the thills;
The crossbars were ash, from the straightest trees,
The panels of white-wood, that cuts like cheese,
But lasts like iron for things like these,
The hubs of logs from the "Settler's ellum,"—
Last of its timber,—they could n't sell 'em,

Never an axe had seen their chips,
And the wedges flew from between their lips,
Their blunt ends frizzled like celery-tips;
Step and prop-iron, bolt and screw,
Spring, tire, axle, and linchpin too,
Steel of the finest, bright and blue;
Thoroughbrace bison-skin, thick and wide;
Boot, top, dasher, from tough old hide
Found in the pit when the tanner died.
That was the way he "put her through"
"There!" said the Deacon, "naow she'll dew!"

Do! I tell you, I rather guess
She was a wonder, and nothing less!
Colts grew horses, beards turned gray,
Deacon and deaconess dropped away,
Children and grandchildren—where were they?
But there stood the stout old one-hoss shay
As fresh as on Lisbon-earthquake-day!

EIGHTEEN HUNDRED;—it came and found
The Deacon's masterpiece strong and sound.
Eighteen hundred increased by ten;—
"Hahnsum kerridge" they called it then.
Eighteen hundred and twenty came;—

Running as usual; much the same.
Thirty and forty at last arrive,
And then come fifty, and FIFTY-FIVE.

Little of all we value here
Wakes on the morn of its hundredth year
Without both feeling and looking queer.
In fact, there 's nothing that keeps its youth,
So far as I know, but a tree and truth
(This is a moral that runs at large;
Take it.—You 're welcome.—No extra charge)

FIRST OF NOVEMBER,—the Earthquake-day,—
There are traces of age in the one-hoss shay,
A general flavor of mild decay,
But nothing local, as one may say.
There couldn't be,—for the Deacon's art
Had made it so like in every part
That there wasn't a chance for one to start.
For the wheels were just as strong as the thills.
And the floor was just as strong as the sills,
And the panels just as strong as the floor,
And the whipple-tree neither less nor more,
And the back crossbar as strong as the fore,
And spring and axle and hub *encore*.
And yet, *as a whole*, it is past a doubt
In another hour it will be *worn out*!

First of November, 'Fifty-five!
This morning the parson takes a drive.
Now, small boys, get out of the way!
Here comes the wonderful one-hoss shay,
Drawn by a rat-tailed, ewe-necked bay.
"Huddup!" said the parson.—Off went they.
The parson was working his Sunday's text,—
Had got to *fiftibly*, and stopped perplexed
At what the—Moses—was coming next.
All at once the horse stood still,
Close by the meet'n'-house on the hill.
First a shiver, and then a thrill,
Then something decidedly like a spill,—
And the parson was sitting upon a rock,
At half past nine by the meet'n'-house clock—
Just the hour of the Earthquake shock!
What do you think the parson found,
When he got up and stared around?
The poor old chaise in a heap or mound,

70 As if it had been to the mill and ground!
You see, of course, if you're not a dunce,
How it went to pieces all at once,—
All at once, and nothing first,—
Just as bubbles do when they burst.

End of the wonderful one-hoss shay.
Logic is logic. That 's all I say.

The Chambered Nautilus

90

The paragraph preceding this poem when it appears at the end of a section of *The Autocrat* gave the necessary facts about the background of the poem: "If you will look into Roget's *Bridgewater Treatise*, you will find a figure of one of these shells [the nautilus], and a section of the last will show you the series of enlarging compartments successively dwelt in by the animal that inhabits the shell, which is built in a widening spiral. Can you find no lesson in this?"

Of "The Chambered Nautilus," Holmes wrote: "I am willing to submit this to criticism as any [poem] I have written, in form as well as substance, and I have not seen any English verse of just the same pattern." It was one of his which he avowed had been inspired.

100

"The Chambered Nautilus" is unusually suggestive of Longfellow's poems. Like "Excelsior" or "The Builders," it preaches a sermon with the text "Onward and upward." The form, too, resembles Longfellow's: an object is described in the three opening stanzas, and then, in the two stanzas addressed to the nautilus at the end, the moral is drawn. Holmes seems to have been bothered very little by the incongruity—distressing to careful readers—of some of his images.

110

This is the ship of pearl, which, poets feign,
Sails the unshadowed main,—
The venturous bark that flings
On the sweet summer wind its purpled wings
In gulfs enchanted, where the Siren sings,
And coral reefs lie bare,
Where the cold sea-maids rise to sun their streaming hair.

Its webs of living gauze no more unfurl,
 Wrecked is the ship of pearl!
 Where its dim dreaming life was wont to dwell,
 As the frail tenant shaped his growing shell,
 And every chambered cell,
 Before thee lies revealed,—
 Its irised ceiling rent, its sunless crypt unsealed!

Year after year beheld the silent toil
 That spread his lustrous coil;
 Still, as the spiral grew,
 He left the past year's dwelling for the new,
 Stole with soft step its shining archway through,
 Built up its idle door,
 Stretched in his last-found home, and knew the old no
 more.

Thanks for the heavenly message brought by thee,
 Child of the wandering sea,
 Cast from her lap, forlorn!
 From thy dead lips a clearer note is born
 Than ever Triton blew from wreathed horn!
 While on mine ear it rings,
 Through the deep caves of thought I hear a voice that
 sings —

Build thee more stately mansions, O my soul,
 As the swift seasons roll!
 Leave thy low-vaulted past!
 Let each new temple, nobler than the last,
 Shut thee from heaven with a dome more vast,
 Till thou at length art free,
 Leaving thine outgrown shell by life's unresting sea!

1858

The Boys

For many years Holmes read a poem composed for the occasion at the annual dinner of the Harvard Class of 1829. This one was written for the reunion of 1859, when he and his classmates probably were about fifty years old. It shows better perhaps than any other the way Holmes gave such verses the right mingling of wit and pathos.

Even though it was written with a particular group in mind, the poem communicates its spirited humor to any reader.

Has there any old fellow got mixed with the boys?
 If there has, take him out, without making a noise.
 Hang the Almanac's cheat and the Catalogue's spite!
 Old Time is a liar! We're twenty to-night!

We're twenty! We're twenty! Who says we are more?
 He's tipsy,—young jackanapes!—show him the door!
 "Gray temples at twenty?"—Yes! *white* if we please;
 Where the snow-flakes fall thickest there's nothing can
 freeze!

Was it snowing I spoke of? Excuse the mistake!
 Look close,—you will see not a sign of a flake!
 We want some new garlands for those we have shed,—
 And these are white roses in place of the red.

We've a trick, we young fellows, you may have been told,
 Of talking (in public) as if we were old.—
 That boy we call "Doctor," and this we call "Judge";
 It's a neat little fiction,—of course it's all fudge.

That fellow's the "Speaker,"—the one on the right;
 "Mr. Mayor," my young one, how are you to-night?
 That's our "Member of Congress," we say when we chaff;
 There's the "Reverend." What's his name?—don't make
 me laugh

20

That boy with the grave mathematical look
 Made believe he had written a wonderful book,
 And the ROYAL SOCIETY thought it was *true*!
 So they chose him right in; a good joke it was, too!

There's a boy, we pretend, with a three-decker brain,
 That could harness a team with a logical chain;

The Boys • 15 Doctor, Francis Thomas • 15 Judge, George T. Bigelow, chief justice of Massachusetts • 17 Speaker, Francis B. Crowninshield, speaker of the Massachusetts House of Representatives • 18 Mr. Mayor, G. W. Richardson, mayor of Worcester, Massachusetts • 19 Member of Congress, George T. Davis, whom Thackeray described as "the most agreeable dinner-companion" that he had met during his visit to America • 20 Reverend, James Freeman Clark, a Unitarian minister and a friend of Emerson • 21 That boy, Prof. Benjamin Peirce of Harvard

When he spoke for our manhood in syllabled fire,
We called him "The Justice," but now he's "The
Squire."

And there's a nice youngster of excellent pith,—
Fate tried to conceal him by naming him Smith; 30
But he shouted a song for the brave and the free,—
Just read on his medal, "My country," "of thee!"

You hear that boy laughing?—You think he's all fun;
But the angels laugh, too, at the good he has done;
The children laugh loud as they troop to his call,
And the poor man that knows him laughs loudest of
all!

Yes, we're boys,—always playing with tongue or with
pen,—
And I sometimes have asked,—Shall we ever be men?
Shall we always be youthful, and laughing, and gay,
Till the last dear companion drops smiling away? 40

Then here's to our boyhood, its gold and its gray!
The stars of its winter, the dews of its May!
And when we have done with our life-lasting toys,
Dear Father, take care of thy children, THE BOYS!

1859

Hymn of T.

O Love Divine, that stooped to share
Our sharpest pang, our bitterest tear,
On Thee we cast each earth-born care,
We smile at pain while Thou art near!

Though long the weary way we tread,
And sorrow crown each lingering year,
No path we shun, no darkness dread,
Our hearts still whispering, Thou art near!

When drooping pleasure turns to grief,
And trembling faith is changed to fear,
The murmuring wind, the quivering leaf,
Shall softly tell us, Thou art near!

On Thee we fling our burdening woe,
O Love Divine, forever dear,
Content to suffer while we know,
Living and dying, Thou art near!

Supreme Court • 30 *Smith*, the Rev. Samuel Francis Smith, au-
thor of "America"

From

The Autocrat of the Breakfast-Table

When Holmes was nearly fifty, Lowell, urged to edit the
new *Atlantic Monthly*, "made it a condition precedent"
to his acceptance that Holmes should be "the first con-
tributor to be engaged." Since Holmes was hardly a
towering figure in the literary world, though he did have

a fine reputation in medicine, the request rather surpri-
sed him. *The Autocrat of the Breakfast-Table*, which
contributed in monthly installments, established his li-
terary reputation and did much to establish that of
the magazine.

The *Autocrat* papers, like the other series which follow
them, are unique in form. Each paper is a printed accou-
nt of a conversation, informal because of its chatty tone and
because of interruptions—the author's own asides and the
remarks of other boarders who sit at the table. In a sense
furthermore, the papers have some of the appeals of fic-
tion: they have the slightest of plots running through
them, and they reveal characters and the interplay be-
tween diverse personalities.

Since the speakers differ greatly, there is a good de-
gree of variety in the attitudes expressed. Variety is also pro-

vided by the wide range of subjects discussed. A glance at the Index to *The Autocrat* reveals that Holmes, interested in all sorts of matters, treated, among hundreds of other subjects, Aristocracy, Boating, Calamities, Drunkenness, Ears (Voluntary Movement of), Family, Hysterics, Jailers, Keats, Logical Minds, Maine (Willows in), Nerve-tapping, Old Age, Punning, Quantity, Racing (Horse), Sporting Men, Travel, Unloved, Voices, Women, and Zimmerman's Treatise on Solitude. The talk is witty and learned, allusive to both the classics and contemporary events—an excellent key to the appeal of Holmes as a talker.

A lyric conception—my friend, the Poet, said—hits me like a bullet in the forehead. I have often had the blood drop from my cheeks when it struck, and felt that I turned as white as death. Then comes a creeping as of centipedes running down the spine,—then a gasp and a great jump of the heart,—then a sudden flush and a beating in the vessels of the head,—then a long sigh,—and the poem is written.

It is an impromptu, I suppose, then, if you write it so suddenly,—I replied.

No, said he,—far from it. I said written, but I did not say *copied*. Every such poem has a soul and a body, and it is the body of it, or the copy, that men read and publishers pay for. The soul of it is born in an instant in the poet's soul. It comes to him a thought, tangled in the meshes of a few sweet words,—words that have loved each other from the cradle of the language, but have never been wedded until now. Whether it will ever fully embody itself in a bridal train of a dozen stanzas or not is uncertain, but it exists potentially from the instant that the poet turns pale with it. It is enough to stun and scare anybody, to have a hot thought come crashing into his brain, and ploughing up those parallel ruts where the wagon trains of common ideas were jogging along in their regular sequences of association. No wonder the ancients made the poetical impulse wholly external. Μῆνιν ἄειδε θεά. Goddess,—Muse,—divine afflatus,—something outside always. I never wrote any verses worth reading. I can't. I am too stupid. If I ever copied any that were worth reading, I was only a medium.

[I was talking all this time to our boarders, you understand,—telling them what this poet told me. The

company listened rather attentively, I thought, considering the literary character of the remarks.]

The old gentleman opposite all at once asked me if I ever read anything better than Pope's "Essay on Man"? Had I ever perused McFingal? He was fond of poetry when he was a boy,—his mother taught him to say many little pieces,—he remembered one beautiful hymn;—and the old gentleman began, in a clear, loud voice, for his years,—

"The spacious firmament on high,
With all the blue ethereal sky,
And spangled heavens,"—

He stopped, as if startled by our silence, and a faint flush ran up beneath the thin white hairs that fell upon his cheek. As I looked round, I was reminded of a show I once saw at the Museum,—the Sleeping Beauty, I think they called it. The old man's sudden breaking out in this way turned every face towards him, and each kept his posture as if changed to stone. Our Celtic Bridget, or Biddy, is not a foolish fat scullion to burst out crying for a sentiment. She is of the serviceable, red-handed, broad-and-high-shouldered type, one of those imported female servants who are known in public by their amorphous style of person, their stoop forwards, and a headlong and as it were precipitous walk,—the waist plunging downwards into the rocking pelvis at every heavy foot-fall. Bridget, constituted for action, not for emotion, was about to deposit a plate heaped with something upon the table, when I saw the coarse arm stretched by my shoulder arrested,—motionless as the arm of a terra-cotta caryatid, she couldn't set the plate down while the old gentleman was speaking!

He was quite silent after this, still wearing the slight flush on his cheek. Don't ever think the poetry is dead in an old man because his forehead is wrinkled, or that his manhood has left him when his hand trembles! If they ever *were* there, they *are* there still!

By and by we got talking again.—Does a poet love the verses written through him, do you think, Sir?—said the divinity-student.

So long as they are warm from his mind,—carry any

27 Μῆνιν ἄειδε θεά, the opening words of the Iliad, "Goddess, sing of the wrath [of Achilles]" • 43 The spacious firmament . . . , opening lines of "Hymn" by Joseph Addison (1672-1719)

of his animal heat about them, I *know* he loves them,—I answered. When they have had time to cool, he is more indifferent.

A good deal as it is with buckwheat cakes,—said the young fellow whom they call John.

The last words, only, reached the ear of the economically organized female in black bombazine—Buckwheat is skerce and high,—she remarked. [Must be a poor relation sponging on our landlady—pays nothing,—so she must stand by the guns and be ready to repel boarders.]

I liked the turn the conversation had taken, for I had some things I wanted to say, and so, after waiting a minute, I began again—I don't think the poems I read you sometimes can be fairly appreciated, given to you as they are in the green state.

—You don't know what I mean by the *green state*? Well, then, I will tell you. Certain things are good for nothing until they have been kept a long while, and some are good for nothing until they have been long kept and *used*. Of the first, wine is the illustrious and immortal example. Of those which must be kept and used I will name three,—meerschaum pipes, violins, and poems. The meerschaum is but a poor affair until it has burned a thousand offerings to the cloud-compelling deities. It comes to us without complexion or flavor,—born of the sea-foam, like Aphrodite, but colorless as *pallida Mors* herself. The fire is lighted in its central shrine, and gradually the juices which the broad leaves of the Great Vegetable had sucked up from an acre and curdled into a drachm are diffused through its thirsting pores. First a discoloration, then a stain, and at last a rich, glowing, umber tint spreading over the whole surface. Nature true to her old brown autumnal hue, you see,—as true in the fire of the meerschaum as in the sunshine of October! And then the cumulative wealth of its fragrant reminiscences! he who inhales its vapors takes a thousand whiffs in a single breath; and one cannot touch it without awakening the old joys that hang around it as the smell of flowers clings to the dresses of the daughters of the house of Farina!

[Don't think I use a meerschaum myself, for I *do not*, though I have owned a calumet since my childhood, which from a naked Pict (of the Mohawk species) my grandsire won, together with a tomahawk and beaded knife-sheath; paying for the lot with a bullet-mark on

his right cheek. On the maternal side I inherit the loliest silver-mounted tobacco-stopper you ever saw. It a little box-wood Triton, carved with charming liveliness and truth; I have often compared it to a figure Raphael's "Triumph of Galatea." It came to me in an ancient shagreen case,—how old it is I do not know but it must have been made since Sir Walter Raleigh's time. If you are curious, you shall see it any day. Neither will I pretend that I am so unused to the more perishable smoking contrivance that a few whiffs would make me feel as if I lay in a ground-well on the Bay of Biscay. I am not unacquainted with that fusiform, spiral-wound bundle of chopped stems and miscellaneous combustibles, the *cigar*, so called, of the shops,—which to "draw" asks the suction-power of a nursing infant Hercules and to relish, the leathery palate of an old Silenus. I cannot advise you, young man, even if my illustration strikes your fancy, to consecrate the flower of your life to painting the bowl of a pipe, for, let me assure you, the stain of a reverie-breeding narcotic may strike deeper than you think for. I have seen the green leaf of euphorbia promise grow brown before its time under such Nicotian regimen, and thought the umbered meerschaum pipe dearly bought at the cost of a brain enfeebled and will enslaved.]

Violins, too,—the sweet old Amati!—the divine Stradivarius! Played on by ancient *maestros* until the bow-hand lost its power and the flying fingers stiffened. Bequeathed to the passionate young enthusiast, who made it whisper his hidden love, and cry his inarticulate longings, and scream his untold agonies, and wail a monotonous despair. Passed from his dying hand to the cold *virtuoso*, who let it slumber in its case for a generation, till, when his hoard was broken up, it came forth once more and rode the stormy symphonies of royal orchestras, beneath the rushing bow of their lord and leader. Into lonely prisons with improvident artists into convents from which arose, day and night, the hymns with which its tones were blended; and by

28 *pallida Mors*, pale Death • 51 *Triumph of Galatea*, a fair painting. Galatea was a Naiad, a lesser goddess • 57 *Bay of Biscay*, on the Cantabrian Sea, noted for the fierce waves stirred on it by strong winds • 72 *Amati*, Nicoló Amati (1596-1684), a great violin maker, teacher of Antonio Stradivarius • 73 *Stradivarius*, Antonio Stradivarius (1644-1737), the most famous of the Stradivarius family of famous violin makers in Cremona

again to orgies in which it learned to howl and laugh as if a legion of devils were shut up in it, then again to the gentle *dilettante* who calmed it down with easy melodies until it answered him softly as in the days of the old *maestros*. And so given into our hands, its pores all full of music; stained, like the meerschaum, through and through, with the concentrated hue and sweetness of all the harmonies which have kindled and faded on its strings.

10 Now I tell you a poem must be kept *and used*, like a meerschaum, or a violin. A poem is just as porous as the meerschaum;—the more porous it is, the better. I mean to say that a genuine poem is capable of absorbing an indefinite amount of the essence of our own humanity,—its tenderness, its heroism, its regrets, its aspirations, so as to be gradually stained through with a divine secondary color derived from ourselves. So you see it must take time to bring the sentiment of a poem
20 through every thought and image our being can penetrate.

Then again as to the mere music of a new poem, why, who can expect anything more from that than from the music of a violin fresh from the maker's hands? Now you know very well that there are no less than fifty-eight different pieces in a violin. These pieces are strangers to each other, and it takes a century, more or less, to make them thoroughly acquainted. At last they learn to vibrate in harmony and the instrument becomes an
30 organic whole, as if it were a great seed-capsule which had grown from a garden-bed in Cremona, or elsewhere. Besides, the wood is juicy and full of sap for fifty years or so, but at the end of fifty or a hundred more gets tolerably dry and comparatively resonant.

Don't you see that all this is just as true of a poem? Counting each word as a piece, there are more pieces in an average copy of verses than in a violin. The poet has forced all these words together, and fastened them, and they don't understand it at first. But let the poem
40 be repeated aloud and murmured over in the mind's muffled whisper often enough, and at length the parts become knit together in such absolute solidarity that you could not change a syllable without the whole world's crying out against you for meddling with the harmonious fabric. Observe, too, how the drying process takes place in the stuff of a poem just as in that of a

The landlady's daughter.

violin Here is a Tyrolese fiddle that is just coming to its hundredth birthday,—(Pedro Klauss, Tyroli, fecit, 1760),—the sap is pretty well out of it. And here is the song of an old poet whom Neæra cheated:—

"Nox erat, et cœlo fulgebat Luna sereno
Inter minora sidera,

48 Pedro Klauss . . . fecit, 1760, made by Pedro Klauss in 1760
• 51 Nox erat . . . mea. Horace, Epodes, XV. The lines quoted have been translated thus by G. E. Bennett. " 'Twas night, and in a cloudless sky the moon was shining amid the lesser lights, when thou, soon to outrage the majesty of the mighty gods, didst pledge thy loyalty "

Cum tu magnorum numen læsura deorum
In verba jurabas mea."

Don't you perceive the sonorousness of these old dead Latin phrases? Now I tell you that every word fresh from the dictionary brings with it a certain succulence; and though I cannot expect the sheets of the "Pactolian," in which, as I told you, I sometimes print my verses, to get so dry as the crisp papyrus that held those words of Horatius Flaccus, yet you may be sure, that, while
10 the sheets are damp, and while the lines hold their sap, you can't fairly judge of my performances, and that, if made of the true stuff, they will ring better after a while.

[There was silence for a brief space, after my somewhat elaborate exposition of these self-evident analogies. Presently a *person* turned towards me—I do not choose to designate the individual—and said that he rather expected my pieces had given pretty good "sahtisfahction"—I had, up to this moment, considered this complimentary phrase as sacred to the use of secretaries of
20 lyceums, and, as it has been usually accompanied by a small pecuniary testimonial, have acquired a certain relish for this moderately tepid and unstimulating expression of enthusiasm. But as a reward for gratuitous services, I confess I thought it a little below that blood-heat standard which a man's breath ought to have, whether silent, or vocal and articulate. I waited for a favorable opportunity, however, before making the remarks which follow.]

—There are single expressions, as I have told you
30 already, that fix a man's position for you before you have done shaking hands with him. Allow me to expand a little. There are several things, very slight in themselves, yet implying other things not so unimportant. Thus, your French servant has *dévalisé* your premises and got caught. *Excusez*, says the *sergent-de-ville*, as he politely relieves him of his upper garments and displays his bust in the full day-light. Good shoulders enough,—a little marked,—traces of smallpox, perhaps,—but white. . . . *Crac!* from the *sergent-de-ville's* broad
40 palm on the white shoulder! Now look! *Vogue la galère!* Out comes the big red V—mark of the hot iron,—he had blistered it out pretty nearly,—hadn't he?—the old rascal *VOLEUR*, branded in the galleys at Marseilles! [Don't! What if he has got something like this?—nobody supposes I *invented* such a story.]

My man John, who used to drive two of those equine females which I told you I had owned,—for, I you, my friends, simple though I stand here, I am that has been driven in his "kerridge,"—not using, I term, as liberal shepherds do, for any battered old shabby genteel go-cart which has more than one wheel, meaning thereby a four-wheeled vehicle *with a pole*—my man John, I say, was a retired soldier. He retired unostentatiously, as many of Her Majesty's most servants have done before and since. John told me that when an officer thinks he recognizes one of the retiring heroes, and would know if he has really been in the service, that he may restore him, if possible, to a grateful country, he comes suddenly upon him, and says, sharply, "Strap!" If he has ever worn the shoulder strap, he has learned the reprimand for its ill adjustment. The old word of command flashes through his muscles, and his hand goes up in an instant to the place where the strap used to be.

[I was all the time preparing for my grand *coup*. You understand; but I saw they were not quite ready for it, and so continued,—always in illustration of the general principle I had laid down.]

Yes, odd things come out in ways that nobody thinks of. There was a legend, that, when the Danish pirates made descents upon the English coast, they caught a few Tartars occasionally, in the shape of Saxons, who would not let them go,—on the contrary, insisted on their staying, and, to make sure of it, treated them as Apollo treated Marsyas, or as Bartholinus has treated his fellow-creature in his title-page, and, having divested them of the one essential and perfectly fitting garment indispensable in the mildest climates, nailed the same to the church-door as we do the banners of marriage, to the *terrorem*.

[There was a laugh at this among some of the young folks; but as I looked at our landlady, I saw that "th

Holmes refers to an imaginary magazine, giving it a name which helps to develop his point. • 34 *dévalisé*, plundered. • 35 *Excusez*, beg pardon. • 35 *sergent-de-ville*, bailiff. • 40 *Vogue la galère*, Come what will! • 43 *Voleur*, thief. • 65 *coup*, stroke. • 75 *Apollo*, after defeating Marsyas in a musical contest, flayed him alive. • 75 *Bartholinus*, Thomas Bartholinus (1619-1680), Danish physician, author of a number of works on anatomy. • 79 *in terrorem*, in terror.

water stood in her eyes," as it (. . .) when the interpreter asked her about the spider, and I fancied, but wasn't quite sure that the schoolmistress blushed, as Mercy did in the same conversation, as you remember.]

That sounds like a cock-and-bull-story,—said the young fellow whom they call John. I abstained from making Hamlet's remark to Horatio, and continued.

Not long since, the church-wardens were repairing and beautifying an old Saxon church in a certain English village, and among other things thought the doors should be attended to. One of them particularly, the front-door, looked very badly, crusted, as it were, and as if it would be all the better for scraping. There happened to be a microscopist in the village who had heard the old pirate story, and he took it into his head to examine the crust on this door. There was no mistake about it, it was a genuine historical document, of the Ziska drum-head pattern,—a real *cutis humana*, stripped from some old Scandinavian filibuster, and the legend was true

20 My friend, the Professor, settled an important historical and financial question once by the aid of an exceedingly minute fragment of a similar document. Behind the pane of plate-glass which bore his name and title burned a modest lamp, signifying to the passers-by that at all hours of the night the slightest favors (or fevers) were welcome. A youth who had freely partaken of the cup which cheers and likewise inebriates, following a moth-like impulse very natural under the circumstances, dashed his fist at the light and quenched the meek luminary,—breaking through the plate-glass, of course, to reach it. Now I don't want to go into *minutiae* at table, you know, but a naked hand can no more go through a pane of thick glass without leaving some of its cuticle, to say the least, behind it, than a butterfly can go through a sausage-machine without looking the worse for it. The Professor gathered up the fragments of glass, and with them certain very minute but entirely satisfactory documents which would have identified and hanged any rogue in Christendom who had parted with them—The historical question, *Who did it?* and the financial question, *Who paid for it?* were both settled before the new lamp was lighted the next evening.

You see, my friends, what immense conclusions, touching our lives, our fortunes, and our sacred honor, may be reached by means of very insignificant premises. This is eminently true of manners and forms of speech;

a movement or a phrase often tells you all you want to know about a person. Thus, "How's your health?" (commonly pronounced *baalth*) instead of, How do you do? or, How are you? Or calling your little dark entry a "hall," and your old rickety one-horse wagon a "kerridge." Or telling a person who has been trying to please you that he has given you pretty good "sahusfahction." Or saying that you "remember of" such a thing, or that you have been "stoppin'" at Deacon Somebody's,—and other such expressions. One of my friends had a little marble statuette of Cupid in the parlor of his country-house,—bow, arrows, wings, and all complete. A visitor, indigenous to the region, looking pensively at the figure, asked the lady of the house "if that was a statoo of her deceased infant?" What a delicious, though somewhat voluminous biography, social, educational, and aesthetic, in that brief question!

[Please observe with what Machiavellian astuteness I smuggled in the particular offence which it was my object to hold up to my fellow-boarders, without too personal an attack on the individual at whose door it lay.]

That was an exceedingly dull person who made the remark, *Ex pede Herculem*. He might as well have said, "from a peck of apples you may judge of the barrel." ; *Ex PEDE*, to be sure! Read, instead, *Ex ungue minimi digiti pedis, Herculem, ejusque patrem, matrem, avos et proavos, filios, nepotes et pronepotes!* Talk to me about your δὸς ποῦ στῶ! Tell me about Cuvier's getting up a megatherium from a tooth, or Agassiz's drawing a portrait of an undiscovered fish from a single scale! As the

"O" revealed Giotto,—as the one word "moi" betrayed the Stratford atte-Bowe-taught Anglais,—so all a man's antecedents and possibilities are summed up in a single utterance which gives at once the gauge of his education and his mental organization.

Possibilities, Sir?—said the divinity-student; can't a man who says *How?* arrive at distinction?

Sir,—I replied,—in a republic all things are possible. But the man *with a future* has almost of necessity sense enough to see that any odious trick of speech or manners must be got rid of. Doesn't Sydney Smith say that a public man in England never gets over a false quantity uttered in early life? *Our* public men are in little danger of this fatal misstep, as few of them are in the habit of introducing Latin into their speeches,—for good and sufficient reasons. But they are bound to speak decent English,—unless, indeed, they are rough old campaigners, like General Jackson or General Taylor; in which case, a few scars on Priscian's head are pardoned to old fellows who have quite as many on their own, and a constituency of thirty empires is not at all particular, provided they do not swear in their Presidential Messages.

However, it is not for me to talk. I have made mistakes enough in conversation and print. I never find them out until they are stereotyped, and then I think they rarely escape me. I have no doubt I shall make half a dozen slips before this breakfast is over, and remember them all before another. How one does tremble with rage at his own intense momentary stupidity about things he knows perfectly well, and to think how he lays himself open to the impertinences of the *captatores verborum*, those useful but humble scavengers of the language, whose business it is to pick up what might offend or injure, and remove it, hugging and feeding on it as they go! I don't want to speak too slightly of these verbal critics;—how can I, who am so fond of talking about errors and vulgarisms of speech? Only there is a difference between those clerical blunders which almost every man commits, knowing better, and that habitual grossness or meanness of speech which is unendurable to educated persons, from anybody that wears silk or broadcloth.

[I write down the above remarks this morning, January 26th, making this record of the date that nobody may think it was written in wrath, on account of any particular grievance suffered from the invasion of any *individual scarabæus grammaticus*.]

—I wonder if anybody ever finds fault with anything

I say at this table when it is repeated? I hope they I am sure. I should be very certain that I had something of much significance, if they did not.

Did you never, in walking in the fields, come across a large flat stone, which had lain, nobody knows how long, just where you found it, with the grass forming a little hedge, as it were, all round it, close to its edges,—and have you not, in obedience to a kind of feeling that told you it had been lying there long enough, insinuated your stick or your foot or your fingers under its edge and turned it over as a housewife turns a cake, when she says to herself, "It's done brown enough by this time"? Well, an odd revelation, and what an unforeseen and a pleasant surprise to a small community, the very existence of which you had not suspected, until the sudden dismay and scattering among its members produced your turning the old stone over! Blades of grass flatten down, colorless, ironed; hideous crawling creatures, some of them coleopterous or horny-shelled,—turtle-bugs or what you will, wants to call them, some of them softer, but cunningly spread out and compressed like Lepine watches; (Nature never loses a crack or a crevice, mind you, or a joint in a tavern bedstead, but she always has one of her flat-pattens live timekeepers to slide into it); black glossy crickets with their long filaments sticking out like the whips of four-horse stage-coaches; motionless, slug-like creatures young larvæ, perhaps more horrible in their pulpy sturdiness than even in the infernal wriggle of maturity. But no sooner is the stone turned and the wholesome light of day let upon this compressed and blinded community of creeping things, than all of them which enjoy the luxury of legs—and some of them have a good many—run

1 Giotto (1276?-1337?), Florentine painter and architect who reputedly could draw, free hand, a perfect circle • 2 Stratford . . . Anglais. The reference is to the prioress in the *Canterbury Tales*, of whom Chaucer said

And Frenssh she spok ful faire and fetisshly [neatly]

After the acole [school] of Stratford-atte-Bowe . . .

Stratford-atte-Bowe was a Benedictine nunnery at Stratford, London, where The French taught there was Anglo-French, which differed from that of Paris. Therefore, the way she pronounced "moi" would show her training • 11 Sydney Smith (1771-1845), English divine, writer and wit • 18 General Jackson, Andrew Jackson (1767-1845), seventh President (1829-1837) of the United States • 18 General Taylor Zachary Taylor (1784-1850), twelfth President (1849-1850) • 19 Priscian Latin grammarian of the sixth century • 31 *captatores verborum* word hunters • 46 *scarabæus grammaticus*, grammar beetle, or bookworm • 66 coleopterous, belonging to the beetle species of insects

round wildly, butting each other and everything in their way, and end in a general stampede for underground retreats from the region poisoned by sunshine. *Next year* you will find the grass growing tall and green where the stone lay; the ground-bird builds her nest where the beetle had his hole; the dandelion and the buttercup are growing there, and the broad fans of insect-angels open and shut over their golden disks, as the rhythmic waves of blissful consciousness pulsate through their glorified
10 being.

—The young fellow whom they call John saw fit to say, in his very familiar way,—at which I do not choose to take offence, but which I sometimes think it necessary to repress, that I was coming it rather strong on the butterflies.

No, I replied; there is meaning in each of those images,—the butterfly as well as the others. The stone is ancient error. The grass is human nature borne down and bleached of all its colour by it. The shapes which are
20 found beneath are the crafty beings that thrive in darkness, and the weaker organisms kept helpless by it. He who turns the stone over is whosoever puts the staff of truth to the old lying incubus, no matter whether he do it with a serious face or a laughing one. The next year stands for the coming time. Then shall the nature which had lain blanched and broken rise in its full stature and native hues in the sunshine. Then shall God's minstrels build their nests in the hearts of a newborn humanity. Then shall beauty—Divinity taking outlines and color—light upon the souls of men as the butterfly, image of the beatified spirit rising from the dust, soars from the shell that held a poor grub, which would never have found wings, had not the stone been lifted.

You never need think you can turn over any old falsehood without a terrible squirming and scattering of the horrid little population that dwells under it.

—Every real thought on every subject knocks the wind out of somebody or other. As soon as his breath comes back, he very probably begins to expend it in hard words. These are the best evidence a man can have that he has said something it was time to say. Dr. Johnson was disappointed in the effect of one of his pamphlets. "I think have not been attacked enough for it," he said;—"attack s the reaction; I never think I have hit hard unless it ebounds."

—If a fellow attacked my opinions in print, would I eply? Not I. Do you think I don't understand what my

friend, the Professor, long ago called *the hydrostatic paradox of controversy?*

Don't know what that means?—Well, I will tell you. You know, that, if you had a bent tube, one arm of which was of the size of a pipe-stem, and the other big enough to hold the ocean, water would stand at the same height in one as in the other. Controversy equalizes fools and wise men in the same way,—and the fools know it.

The young fellow whom they call John.

—No, but I often read what they say about other people. There are about a dozen phrases which all come tumbling along together, like the tongs, and the shovel, and the poker, and the brush, and the bellows, in one of those domestic avalanches that everybody knows. If you
40 get one, you get the whole lot.

What are they?—Oh, that depends a good deal on

latitude and longitude. Epithets follow the isothermal lines pretty accurately. Grouping them in two families, one finds himself a clever, genial, witty, wise, brilliant, sparkling, thoughtful, distinguished, celebrated, illustrious scholar and perfect gentleman, and first writer of the age; or a dull, foolish, wicked, pert, shallow, ignorant, insolent, traitorous, black-hearted outcast, and disgrace to civilization.

What do I think determines the set of phrases a man gets?—Well, I should say a set of influences something like these:—1st. Relationships, political, religious, social, domestic. 2nd. Oysters, in the form of suppers given to gentlemen connected with criticism. I believe in the school, the college, and the clergy; but my sovereign logic, for regulating public opinion—which means commonly the opinion of half a dozen of the critical gentry—is the following. *Major proposition.* Oysters *au naturel*. *Minor proposition.* The same "scalloped." *Conclusion.* That—(here insert entertainer's name) is clever, witty, wise, brilliant,—and the rest.

—No, it isn't exactly bribery. One man has oysters, and another epithets. It is an exchange of hospitalities; one gives a "spread" on linen, and the other on paper,—that is all. Don't you think you and I should be apt to do just so, if we were in the critical line? I am sure I couldn't resist the softening influences of hospitality. I don't like to dine out, you know,—I dine so well at our own table, [our landlady looked radiant,] and the company is so pleasant [a rustling movement of satisfaction among the boarders]; but if I did partake of a man's salt, with such additions as that article of food requires to make it palatable, I could never abuse him, and if I had to speak of him, I suppose I should hang my set of jingling epithets round him like a string of sleigh-bells. Good feeling helps society to make liars of most of us,—not absolute liars, but such careless handlers of truth that its sharp corners get terribly rounded. I love truth as chiefest among the virtues; I trust it runs in my blood; but I would never be a critic, because I know I could not always tell it. I might write a criticism of a book that happened to please me; that is another matter.

—Listen, Benjamin Franklin! This is for you, and such others of tender age as you may tell it to.

When we are as yet small children, long before the time when those two grown ladies offer us the choice of Hercules, there comes up to us a youthful angel, holding

in his right hand cubes like dice, and in his left spheres like marbles. The cubes are of stainless ivory, and on each is written in letters of gold—TRUTH. The spheres are veined and streaked and spotted beneath, with a crimson flush above, where the light falls on them, in a certain aspect you can make out upon every one of them the three letters L, I, E. The child to whom they are offered very probably clutches at both. The spheres are the most convenient things in the world; they are taken up with the least possible impulse just where the child wants them. The cubes will not roll at all; they have great talent for standing still, and always keep right side up. But very soon the young philosopher finds that things which roll so easily are very apt to roll into the wrong corner, and to get out of his way when he needs them, while he always knows where to find the others, which stay where they are left. Thus he learns that we learn—to drop the streaked and speckled globe of falsehood and to hold fast the white angular blocks of truth. But then comes Timidity, and after her Gloom, and last of all Polite-behavior, all insisting that truth must *roll*, or nobody can do anything with it, so the first with her coarse rasp, and the second with her broad file, and the third with her silken sleeve, do round off and smooth and polish the snow-white cubes of truth, that, when they have got a little dingy by use, it becomes hard to tell them from the rolling spheres of falsehood.

The schoolmistress was polite enough to say that she was pleased with this, and that she would read it to the little flock the next day. But she should tell the children that she said, that there were better reasons for truth than could be found in mere experience of its convenience and the inconvenience of lying.

Yes,—I said,—but education always begins through the senses, and works up to the idea of absolute right and wrong. The first thing the child has to learn about this matter is, that lying is unprofitable,—afterwards, that it is against the peace and dignity of the universe.

17 *au naturel*, in a natural state • 45 choice of Hercules. As youth, according to legend, Hercules had to choose, at a meeting of the ways, between two women—Pleasure and Duty

From

Mechanism in Thought and Morals

"Mechanism in Thought and Morals," an address delivered June 29, 1870, before the Phi Beta Kappa Society of Harvard University, summarizes as well as any other single piece by Holmes his ideas, radical for the time, on moral responsibility. Conservative in his social attitudes, in his conception of what was worth while in literature, Holmes was led by scientific study and speculation to attack fiercely the current attitudes toward sin and its punishment. The deterministic doctrines here advanced figure importantly in many of his writings—in some of his breakfast-table papers, in several essays, and in his "medicated" novels, the most notable of which is *Elsie Venner*. It was perhaps in the advocacy of these views that Holmes had his most profound and widespread effect upon the thought of his time.

Limitations of space have made it necessary to present this wandering essay in a somewhat abbreviated form. The opening two paragraphs and other passages, at the points indicated, have been omitted.

I ask your attention to some considerations on the true mechanical relations of the thinking principle, and to a few hints as to the false mechanical relations which have intruded themselves into the sphere of moral self-determination

I call that part of mental and bodily life mechanical which is independent of our volition. The beating of our hearts and the secretions of our internal organs will go on, without and in spite of any voluntary effort of ours, as long as we live. Respiration is partially under our control: we can change the rate and special mode of breathing, and even hold our breath for a time; but the most determined suicide cannot strangle himself without the aid of a noose or other contrivance

which shall effect what his mere will cannot do. The flow of thought is, like breathing, essentially mechanical and necessary, but incidentally capable of being modified to a greater or less extent by conscious effort. Our natural instincts and tastes have a basis which can no more be reached by the will than the sense of light and darkness, or that of heat and cold. All these things we feel justified in referring to the great First Cause; they belong to the "laws of Nature," as we call them, for which we are not accountable.

Whatever may be our opinions as to the relations between "mind" and "matter," our observation only extends to thought and emotion as connected with the living body, and, according to the general verdict of consciousness, more especially with certain parts of the body; namely, the central organs of the nervous system. . . . The brain is an instrument, necessary, so far as our direct observation extends, to thought. The "materialist" believes it to be wound up by the ordinary cosmic forces, and to give them out again as mental products: the "spiritualist" believes in a conscious entity, not interchangeable with motive force, which plays upon this instrument. But the instrument must be studied by the one as much as by the other: the piano which the master touches must be as thoroughly understood as the musical box or clock which goes of itself by a spring or weight. 46 A slight congestion or softening of the brain shows the least materialistic of philosophers that he must recognize the strict dependence of mind upon its organ in the only condition of life with which we are experimentally acquainted. And what all recognize as soon as disease forces it upon their attention, all thinkers should recognize, without waiting for such an irresistible demonstration. They should see that the study of the organ of thought, microscopically, chemically, experimentally, on the lower animals, in individuals and races, in health and 50 in disease, in every aspect of external observation, as well as by internal consciousness, is just as necessary as if mind were known to be nothing more than a function of the brain, in the same way as digestion is of the stomach. . . .

The resemblance of the act of intelligence to that of vision is remarkably shown in the terms we borrow from one to describe the other. We *see* a truth; we *throw light* on a subject; we *elucidate* a proposition; we *darken* counsel, we are *blinded* by prejudice; we take a *narrow view* of things; we look at our neighbor with a 60

jaundiced eye. These are familiar expressions; but we can go much farther. We have intellectual myopes, near-sighted specialists, and philosophers who are purblind to all but the distant abstract. We have judicial intellects as nearly achromatic as the organ of vision, eyes that are color-blind, and minds that seem hardly to have the sense of beauty. The old brain thinks the world grows worse, as the old retina thinks the eyes of needles and the fractions in the printed sales of stocks grow smaller.

10 Just as the eye seeks to refresh itself by resting on neutral tints after looking at brilliant colors, the mind turns from the glare of intellectual brilliancy to the solace of gentle dulness, the tranquillizing green of the sweet human qualities, which do not make us shade our eyes like the spangles of conversational gymnasts and *figurantes*. . . .

The more we examine the mechanism of thought, the more we shall see that the automatic, unconscious action of the mind enters largely into all its processes. Our definite ideas are stepping-stones; how we get from one to
20 the other, we do not know: something carries us; we do not take the step. A creating and informing spirit which is with us, and not of us, is recognized everywhere in real and in storied life. It is the Zeus that kindled the rage of Achilles; it is the Muse of Homer; it is the Daimon of Socrates; it is the inspiration of the seer; it is the mocking devil that whispers to Margaret as she kneels at the altar; and the hobgoblin that cried, "Sell him, sell him!" in the ear of John Bunyan. It shaped the forms that filled the soul of Michael Angelo when he saw the figure of the
30 great Lawgiver in the yet unhewn marble, and the dome of the world's yet unbuilt basilica against the blank horizon, it comes to the least of us, as a voice that will be heard; it tells us what we must believe, it frames our sentences, it lends a sudden gleam of sense or eloquence to the dullest of us all, so that, like Katterfelto with his hair on end, we wonder at ourselves, or rather not at ourselves, but at this divine visitor, who chooses our brain as his dwelling-place, and invests our naked thought with the purple of the kings of speech or song.

40 After all, the mystery of unconscious mental action is exemplified, as I have said, in every act of mental association. What happens when one idea brings up another? Some internal movement, of which we are wholly unconscious, and which we only know by its effect. What is this action, which in Dame Quickly agglutinates contiguous circumstances by their surfaces, in men of wit

and fancy, connects remote ideas by partial resemblance in men of imagination, by the vital identity which unifies phenomenal diversity; in the man of science, groups the objects of thought in sequences of maximum resemblance? Not one of them can answer. There is a Delphic and a Pythoness in every human breast.

The poet sits down to his desk with an odd corner in his brain, and presently his eyes fill with tears, thought slides into the minor key, and his heart is full of sad and plaintive melodies. Or he goes to his work, says "To-night I would have tears;" and, before he rises from his table he has written a burlesque, such as he might think fit to send to one of the comic papers, if these were not so commonly cemeteries of hilarity interspersed with cenotaphs of wit and humor. These strange hysterics of the intelligence, which make us pass from weeping to laughter, and from laughter back again to weeping, may be familiar to every impressible nature; and all is as automatic, involuntary, as entirely self-evolved by a hidden organic process, as are the changing moods of the laughing and crying woman. The poet always recognizes the dictation *ab extra*; and we hardly think it a figure of speech when we talk of his inspiration.

The mental attitude of the poet while writing, if I venture to define it, is that of the "nun breathless in adoration." Mental stillness is the first condition of listening state; and I think my friends the poets will recognize that the sense of effort, which is often felt, accompanies the mental spasm by which the mind is maintained in a state at once passive to the influx from without, and active in seizing only that which will serve purpose. It is not strange that remembered ideas should often take advantage of the crowd of thoughts, and smuggle themselves in as original. Honest thinkers are always stealing unconsciously from each other. Our minds are full of waifs and estrays which we think

24 Achilles, Trojan hero in the battle of Troy, was inspired to wrath by Zeus • 24 Daimon, Daemon—a transliteration of the Greek word for an inspiring demon • 26 Margaret, the heroine of *Faust* • 30 great Lawgiver, Moses, pictured in one of Michelangelo's most famous murals • 35 Katterfelto. See Cowper, *The Task*, Bk. IV, "With Evening," l. 86. "Katterfelto with his hair on end" • 45 Dame Quickly, scatterbrained hostess of a tavern in Eastcheap, a character in *Henry IV* and *The Merry Wives of Windsor* • 51 Delphi, the dwelling place of the Greek oracle • 52 Pythoness, the oracle of Delphi
68 *ab extra*, from without

our own. Innocent plagiarism turns up everywhere. Our best musical critic tells me that a few notes of the air of "Shoo Fly" are borrowed from a movement in one of the magnificent harmonies of Beethoven.

And so the orator,—I do not mean the poor slave of a manuscript, who takes his thought chilled and stiffened from its mould, but the impassioned speaker who pours it forth as it flows coruscating from the furnace,—the orator only becomes our master at the moment when he
 10 himself is surprised, captured, taken possession of, by a sudden rush of fresh inspiration. How well we know the flash of the eye, the thrill of the voice, which are the signature and symbol of nascent thought,—thought just emerging into consciousness, in which condition, as is the case with the chemist's elements, it has a combining force at other times wholly unknown!

But we are all more or less improvisators. We all have a double, who is wiser and better than we are, and who puts thoughts into our heads, and words into our mouths
 20 Do we not all commune with our own hearts upon our beds? Do we not all divide ourselves, and go to buffers on questions of right or wrong, of wisdom or folly? Who or what is it that resolves the stately parliament of the day, with all its forms and conventionalities and pretences, and the great Me presiding, into the committee of the whole, with Conscience in the chair, that holds its solemn session through the watches of the night? . .

The mechanical co-efficient of mental action may be therefore considered a molecular movement in the nervous centres, attended with waste of material conveyed thither in the form of blood,—not a mere tremor like the quiver of a bell, but a process more like combustion, the blood carrying off the oxidated particles, and bringing in fresh matter to take their place

This part of the complex process must, of course, enter into the category of the correlated forces. The brain must be fed in order to work, and according to the amount of waste of material will be that of the food required to repair losses. So much logic, so much beef, so much poetry, so much pudding and, as we all know that growing things are but sponges soaked full of old sunshine, Apollo becomes as important in the world of letters as ever.

But the intellectual product does not belong to the category of force at all, as defined by physicists. It does not answer their definition as "that which is expended in producing or resisting motion." It is not reconvertible

into other forms of force. One cannot lift a weight with a logical demonstration, or make a tea-kettle boil by writing an ode to it. A given amount of molecular action in two brains represents a certain equivalent of food, but by no means an equivalent of intellectual product. Bavius and Mævius were very probably as good feeders as Virgil and Horace, and wasted as much brain-tissue in producing their *carmina* as the two great masters wasted in producing theirs. It may be doubted whether the present Laureate of England consumed more oxidable material in the shape of nourishment for every page of "Maud" or of "In Memoriam" than his predecessor Nahum Tate, whose masterpiece gets no better eulogy than that it is "the least miserable of his productions," in eliminating an equal amount of verse.

As mental labor, in distinction from the passive flow of thought, implies an exercise of will, and as mental labor is shown to be attended by an increased waste, the presumption is that this waste is in some degree referable to the material requirements of the act of volition. We see why the latter should be attended by a sense of effort, and followed by a feeling of fatigue . . .

The connection between thought and the structure and condition of the brain is evidently so close that all we
 7 have to do is to study it. It is not in this direction that materialism is to be feared: we do not find Hamlet and Faust, right or wrong, the valor of men and the purity of women, by testing for albumen, or examining fibres in microscopes.

It is in the moral world that materialism has worked the strangest confusion. In various forms, under imposing names and aspects, it has thrust itself into the moral relations, until one hardly knows where to look for any first principles without upsetting everything in
 80 searching for them

The moral universe includes nothing but the exercise of choice: all else is machinery. What we can help and what we cannot help are on two sides of a line which separates the sphere of human responsibility from that

of the Being who has arranged and controls the order of things.

The question of the freedom of the will has been an open one, from the days of Milton's demons in conclave to the recent most noteworthy essay of Mr. Hazard, our Rhode Island neighbor. It still hangs suspended between the seemingly exhaustive strongest motive argument and certain residual convictions. The sense that we are, to a limited extent, self-determining; the sense of effort
10 in willing; the sense of responsibility in view of the future, and the verdict of conscience in review of the past,—all of these are open to the accusation of fallacy; but they all leave a certain undischarged balance in most minds. We can invoke the strong arm of the *Deus ex machina*, as Mr. Hazard, and Kant and others, before him, have done. Our will may be a primary initiating cause or force, as unexplainable, as unreduceable, as indecomposable, as impossible if you choose, but as real to our belief, as the *æternitas a parte ante*. The divine fore-
20 knowledge is no more in the way of delegated choice than the divine omnipotence is in the way of delegated power. The Infinite can surely slip the cable of the finite if it choose so to do.

It is one thing to prove a proposition like the doctrine of necessity in terms, and another thing to accept it as an article of faith. There are cases in which I would oppose to the *credo quia impossibile est* a paradox as bold and as serviceable,—*nego quia probatum est*. Even Mr. Huxley, who throws quite as much responsibility on protoplasm
30 as it will bear, allows that "our volition counts for something as a condition of the course of events"

I reject, therefore, the mechanical doctrine which makes me the slave of outside influences, whether it work with the logic of Edwards, or the averages of Buckle; whether it come in the shape of the Greek's destiny, or the Mahometan's fatalism; or in that other aspect, dear to the band of believers, whom Beesly of
40 Everton, speaking in the character of John Wesley, characterized as

"The crocodile crew that believe in election."

But I claim the right to eliminate all mechanical ideas which have crowded into the sphere of intelligent choice between right and wrong. The pound of flesh I will grant to Nemesis; but, in the name of human nature, not one drop of blood,—not one drop.

Moral chaos began with the idea of transmissibility. It seems the stalest of truisms to say that every moral act, depending as it does on choice, is in nature exclusively personal, that its penalty, if it be any, is payable, not to bearer, not to order, but only to creditor himself. To treat a mal-volition, which is separably involved with an internal condition, as capable of external transfer from one person to another, is similar to materialize it. When we can take dimensions of virtue by triangulation; when we can literally weigh Justice her own scales; when we can speak of specific gravity of truth, or the square root of honesty; when we can send a statesman his integrity in a package to Washington he happen to have left it behind,—then we may begin to speak of the moral character of inherited tendencies which belong to the machinery for which the Sovereign Power alone is responsible. The misfortune of perverted instincts, which adhere to us as congenital inheritance should go to our side of the account, if the books of heaven are kept, as the great Church of Christendom maintains they are, by double entry. But the absurdity which has been held up to ridicule in the nursery has been enforced as the highest reason upon older children. I ask our forefathers to tolerate Æsop among them? "I cannot trouble the water where you are," says the lamb to the wolf. "don't you see that I am farther down the stream?"—"But a year ago you called me ill names."—"Oh so a year ago I was not born"—"Sirrah," replies the wolf, "if it was not you, it was your father, and that is all one" and finishes with the usual practical application.

If a created being has no rights which his Creator is bound to respect, there is an end to all moral relations between them. Good Father Abraham thought he had and did not hesitate to give his opinion. "Far be it from Thee," he says, to do so and so. And Pascal, who

14 *Deus ex machina*, a god out of a machine, the supernatural assistant of man in classical drama • 19 *æternitas . . . ante*, before eternity • 27 *credo . . . est*. I believe because it is impossible • 28 *nego . . . est*. I disbelieve because it has been proved • 28 Huxley, Thomas Henry Huxley (1825-1895), famous exponent of the Darwinian hypothesis • 35 Buckle, Henry Thomas Buckle (1821-1862), English historian • 38 John Wesley (1703-1791), English preacher and founder of Methodism • 40 *The crocodile crew*, "Southey's *Life of Wesley* Vol. II, note 28"—Holmes • 44 Nemesis, the righteous anger of the gods • 66 *the absurdity . . . nursery*, in the fable of Æsop cited at the end of the paragraph • 80 Pascal, Blaise Pascal (1623-1662), French philosopher

reverence amounted to theophobia, could treat of the duties of the Supreme to the dependent being. If we suffer for anything except our own wrong-doing, to call it punishment is like speaking of a yard of veracity or a square inch of magnanimity.

So to rate the gravity of a mal-volition by its consequences is the merest sensational materialism. A little child takes a prohibited friction-match: it kindles a conflagration with it, which burns down the house, and 10 perishes itself in the flames. Mechanically, this child was an incendiary and a suicide; morally, neither. Shall we hesitate to speak as charitably of multitudes of weak and ignorant grown-up children, moving about on a planet whose air is a deadly poison, which kills all that breathe it four or five scores of years?

Closely allied to this is the pretence that the liabilities incurred by any act of mal-volition are to be measured on the scale of the Infinite, and not on that of the total moral capacity of the finite agent,—a mechanical application of 20 the Oriental way of dealing with offences. The sheik or sultan chops a man's head off for a look he does not like: it is not the amount of wrong, but the importance of the personage who has been outraged. We have none of those moral relations with power, as such, which the habitual Eastern modes of speech seem to imply.

The next movement in moral materialism is to establish a kind of scale of equivalents between perverse moral choice and physical suffering. Pain often cures 30 *ignorance*, as we know,—as when a child learns not to handle fire by burning its fingers,—but it does not change the moral nature. Children may be whipped into obedience, but not into virtue; and it is not pretended that the penal colony of heaven has sent back a single reformed criminal. We hang men for our convenience or safety; sometimes shoot them for revenge. Thus we come to associate the infliction of injury with offences as their satisfactory settlement,—a kind of neutralization of them, as of an acid with an alkali: so that we feel as if a jarring moral universe would be all right if only suffering enough were added to it. This scheme of chemical equivalents seems to me, I confess, a worse materialism than making protoplasm master of arts and doctor of divinity.

Another mechanical notion is that which treats moral evil as bodily disease has so long been treated,—as being 40 a distinct entity, a demon to be expelled, a load to be got

rid of, instead of a condition, or the result of a condition. But what is most singular in the case of moral disease is, that it has been forgotten that it is a living creature in which it occurs, and that all living creatures are the subjects of natural and spontaneous healing processes. A broken vase cannot mend itself; but a broken bone can. Nature, that is, the Divinity, in his every-day working methods, will soon make it as strong as ever.

Suppose the beneficent self-healing process to have repaired the wound in the moral nature: is it never to become an honest scar, but always liable to be reopened? Is there no outlawry of an obsolete self-determination? If the President of the Society for the Prevention of Cruelty to Animals impaled a fly on a pin when 50 he was ten years old, is it to stand against him, crying for a stake through his body, *in sæcula sæculorum*? The most popular hymn of Protestantism, and the "Dies Iræ" of Romanism, are based on this assumption: *Nil inultum remanebit*. So it is that a condition of a conscious being has been materialized into a purely inorganic brute fact,—not merely dehumanized, but deanimalized and devitalized.

Here it was that Swedenborg, whose whole secret I will not pretend to have fully opened, though I have 60 tried with the key of a thinker whom I love and honor,—that Swedenborg, I say, seems to have come in, if not with a new revelation, at least infusing new life into the earlier ones. *What we are* will determine the company we are to keep, and not the avoirdupois weight of our moral exuviae, strapped on our shoulders like a porter's burden.

Having once materialized the whole province of self-determination and its consequences, the next thing is, of course, to materialize the methods of avoiding these 80 consequences. We are all, more or less, idolaters, and believers in quackery. We love specifics better than regimen, and observances better than self-government. The moment our belief divorces itself from character,

1 theophobia. 'I use this term to designate a state of mind thus described by Jeremy Taylor 'There are some persons so miserable and scrupulous, such perpetual tormentors of themselves with unnecessary fears, that their meat and drink is a snare to their consciences. These persons do not believe noble things of God.'—Holmes • 62 in *sæcula sæculorum*, for ages of ages • 63 *Dies Iræ*, Day of Wrath • 64 *Nil inultum remanebit*. Nothing will remain unavenged • 69 Swedenborg, Emanuel Swedenborg. See note, p. 662

the mechanical element begins to gain upon it, and tends to its logical conclusion in the Japanese prayermill.

Brothers of the Phi Beta Kappa Society, my slight task is finished. I have always regarded these occasions as giving an opportunity of furnishing hints for future study, rather than of exhibiting the detailed results of thought. I cannot but hope that I have thrown some ray of suggestion, or brought out some clink of questionable soundness, which will justify me for appearing with the lantern and the hammer.

The hardest and most painful task of the student of to-day is to occidentalize and modernize the Asiatic modes of thought which have come down to us closely wedded to mediæval interpretations. We are called upon to assert the rights and dignity of our humanity, if it were only that our worship might be worthy the acceptance of a wise and magnanimous Sovereign. Self-abasement is the proper sign of homage to superiors with the Oriental. The Occidental demands self-respect in his inferiors as a condition of accepting their tribute to him as of any value. The *kotou* in all its forms, the pitiful acts of *creeping, crawling, fawning, like a dog at his master's feet* (which acts are signified by the word we translate *worship*, according to the learned editor of "The Comprehensive Commentary"), are offensive, not gratifying to him. Does not the man of science who accepts with true manly reverence the facts of Nature, in the face of all his venerated traditions, offer a more acceptable service than he who repeats the formulæ, and copies the gestures, derived from the language and customs of despots, and their subjects? The attitude of modern Science is erect, her aspect serene, her determination inexorable, her onward movement unflinching; because she believes herself, in the order of Providence, the true successor of the men of old who brought down the light of heaven to men. She has reclaimed astronomy and cosmogony, and is already laying a firm hand on anthropology, over which another battle must be fought, with the usual result, to come sooner or later. Humility may be taken for granted as existing in every human being; but it may be that it most truly manifests itself to-day in the readiness with which we bow to new truths as they come from the scholars, the teachers, to whom the inspiration of the Almighty giveth understanding. If a man should try to show it in the way good men did of old,—by covering himself with tow-cloth, sitting on an ash-heap, and

disfiguring his person,—we should send him straight to Worcester or Somerville; and if he began to "r his garments" it would suggest the need of a strait-jacket.

Our rocky New England and old rocky Judæa always seem to have a kind of yearning for each other. Jerusalem governs Massachusetts, and Massachusetts would like to colonize Jerusalem.

"The pine-tree dreameth of the palm,
The palm-tree of the pine."

But political freedom inevitably generates a new type of religious character, as the conclave that contemplated endowing a dotard with infallibility has found out, trust, before this time. The American of to-day now challenges for himself the noble frankness in his high relations which did honor to the courage of the Faithful . . .

Our dwellings are built on the shell-heaps, the kitchen middens of the age of stone. Inherited beliefs, as obscure in their origin as the parentage of the cave-dwellers, are stronger with many minds than the evidence of the senses and the simplest deductions of the intelligence. Persons outside of Bedlam can talk of the "dreadful depravity of lunatics,"—the sufferers whom we have learned to treat with the tenderest care, as the most to be pitied of God's children. Mr. Gosse can believe that a fossil skeleton, with the remains of food in its interiors, was never part of a living creature, but was made just as we find it—a kind of stage-property, a clever cheat, got up by the great Manager of the original Globe Theatre. All we can say of such persons is, that their "illative sense," to use Dr. Newman's phrase, seems to most of us abnormal and unhealthy. We cannot help looking at them as affected with a kind of mental Daltonism.

"Believing ignorance," said an old Scotch divine, is much better than rash and presumptuous knowledge. But which is most likely to be presumptuous, ignorance or knowledge? True faith and true philosophy ought

2 Japanese prayermill, a wheel each turn of which is supposed to substitute for an uttered prayer • 68 Bedlam, an English lunatic asylum • 71 Gosse, Philip Henry Gosse, a nineteenth-century naturalist. Holmes cites as his source "Owen, in *Encyc. Brit.* 8th edition, a 'Paleontology,' p. 124, note" • 75 Globe Theatre, a punning reference to the Elizabethan theater in which Shakespeare's plays were produced and to the deity as a theatrical producer on the globe • 79 Daltonism, congenital red-green blindness—discovered by John Dalton

be one; and those disputes,—à double vérité,—those statements, “true according to philosophy, and false according to faith,” condemned by the last Council of Lateran, ought not to find a place in the records of an age like our own. Yet so enlightened a philosopher as Faraday could say in a letter to one of his correspondents, “I claim an absolute distinction between a religious and an ordinary belief. If I am reproached for weakness in refusing to apply those mental operations, which I think good in high things, to the very highest, I am content to bear the reproach.”

We must bestir ourselves; for the new generation is upon us,—the marrow-bone-splitting descendants of the old cannibal troglodytes. Civilized as well as savage races live upon their parents and grandparents. Each generation strangles and devours its predecessor. The young Feejeean carries a cord in his girdle for his father's neck; the young American, a string of propositions or syllogisms in his brains to finish the same relative. The old

man says, “Son, I have swallowed and digested the wisdom of the past.” The young man says, “Sire, I proceed to swallow and digest thee with all thou knowest.” There never was a sandglass, nor a clepsydra, nor a horologe, that counted the hours and days and years with such terrible significance as this academic chronograph which has just completed a revolution. The prologue of life is finished here at twenty. then come five acts of a decade each, and the play is over, with now and then a pleasant or a tedious afterpiece, when half the lights are put out, and half the orchestra is gone. . . .

1870

James Russell Lowell

1819 • 1891

James Russell Lowell's background and training seemed fairly certain to make him exactly the conservative in politics and literature that his neighbor Holmes was. For several reasons, however, he diverged notably from the Brahmin pattern. Born ten years after Holmes, he belonged to a generation which was beginning to rebel against an established style of thinking and living. Moreover, his reading of foreign literature differed from that of Longfellow and Holmes and led him to form different notions about the most important tasks and methods of great writers. Finally, his acquaintanceships and friendships influenced him to depart from beaten paths in New England literature.

Lowell was born February 22, 1819, at Elmwood, a large pre-Revolutionary mansion in Cambridge, Massachusetts, on what was called “Tory Row.” A member of one of the most honored Brahmin families, he had the usual sort of education at home (dame's school and Harvard) and abroad. When Longfellow retired, Lowell took the distinguished chair which Longfellow had held at Harvard and served there from 1856 until 1877. He was not only a teacher, a critic, and a poet but also an editor of the *Atlantic Monthly* (1857-1861) and of the *North American Review* (1864-1872), a minister to Spain (1877-1880), and a minister to England (1880-1885). After his return to America, Lowell continued

to express himself in political essays, criticism, and poetry to the time of his death, at Elmwood, August 12, 1891. The wide range of activity represented in his life is paralleled by the wide range in the writings of this most versatile of the Cambridge authors.

In the years before his appointment at Harvard, Lowell, largely because of the influence of his first wife, Maria White, became a leading writer in behalf of abolition. His *Biglow Papers* (first series, 1848; second series, 1867) in Yankee dialect were his chief contribution to anti-slavery literature. These writings, in the crackerbox philosopher tradition of Jack Downing (see p. 1054) and others, effectively argued for Lowell's beliefs on the basis of common sense. Most notable of his other political writings are *On a Certain Condescension in Foreigners* (1869) and *Democracy* (1884), which have a mannered elegance strikingly different from the Yankee diatribes.

In the field of belles-lettres, Lowell wrote both criticism and poetry. His earliest criticism was largely a report of enthusiasms for various literary works. It was frankly subjective and impressionistic, deriving whatever value it had from Lowell's sensitivity and his ability to state his reactions in striking phrases. In *A Fable for Critics* (1848) brilliantly rhymed and witty commentaries on his contemporaries marked the height of this kind of criticism. Beginning in the 1850's, however, his study of the classic critics, of Goethe, and of Coleridge led him to adopt less impressionistic methods when he dealt with authors. His later criticism, stressing the relationship between the period and the author,

between the author and his work, and between the detail and the whole composition, was best represented in such collections of critical essays as *Among My Books* (first series, 1870; second series, 1876) and *My Study Windows* (1871). The essays in these volumes deal with the great authors of various lands and periods from the Middle Ages to the nineteenth century—Dante, Chaucer, Shakespeare, Milton, Wordsworth, Swinburne, and others. They not only communicate Lowell's judgments in memorable terms but also employ rather systematic tests of literary excellence and many illuminating comparisons or contrasts.

Lowell's students declare that his literary essays and his classroom talk were quite similar. Professor Will I. Howe in his "Introduction" to *Selected Literary Essays from James Russell Lowell* (Boston, 1914) quotes Barrett Wendell's testimony: "Now and again, some word or some passage would suggest to him a line of thought—sometimes very earnest, sometimes paradoxically comical—that it would never have suggested to any one else. And he would lean back in his chair and talk away across the country till he felt like stopping; or he would thrust his hands into the pockets of his rather shabby sack-coat, and pace the end of the room in his heavy laced boots, and look at nothing in particular, and discourse of things in general." A learned man, he was at ease with his learn-

Panel (l. to r.) Birdofredum Sawin, of *The Biglow Papers* • James Russell Lowell at 25 • His study at Elmwood • Sir Launfal encountering the leper

ing; a scholar, he did not let pedantry overwhelm either his sense of humor or his saltiness of phrase.

Much of the poetry which Lowell wrote might have been written by either Longfellow or Holmes: it had similar material, a similar arrangement, and a similar form. In some of his other poems, though, he showed his kinship with the new generation, which included such writers as Emily Dickinson and Walt Whitman, by departing more frequently than his famous fellow townsmen from the well-established verse patterns. His versification, for example, like that of both British and American poets of the day, often fell into lines of uneven length and of varied meters. As a poet Lowell

was versatile enough to publish the rustic Biglow verses, the sparklingly witty *Fable for Critics*, and the moralizing metrical romance, *The Vision of Sir Launfal*, all in one year. Although his versatility somewhat diffused his energies, he did write some good poetry. Lowell was at his poetic best, perhaps, in some of his nature poems and in some of his odes—notably “Ode Recited at the Harvard Commemoration” (1865).

The Writings of James Russell Lowell, 10 vols., Boston, 1890 • F. H. Underwood, *The Poet and the Man*, Boston, 1893 • H. E. Scudder, *James Russell Lowell*, Boston, 1906 • *Letters of James Russell Lowell*, ed. C. E. Norton, 2 vols., New York, 1906

To the Dandelion

America, in the early forties, developed a great passion for democracy—a passion shared by Lowell and his bride of 1844. In the early days of their marriage this couple had astonished some of their neighbors by insisting that old family servants sit at the table with them at mealtime. Lowell worked sentences praising democracy into his critical articles and into his editorials. Expressive of his current enthusiasm for democracy, this song uses the humble flower as a symbol of the glory of the common man. The choice of imagery, except perhaps in part of the fourth stanza, is highly appropriate to the development of the thought. In this poem, published in *Graham's Magazine* in January 1845, Lowell showed that now and then he could write a lyric poem which had both richness and unity.

Dear common flower, that grow'st beside the way,
ringing the dusty road with harmless gold,

First pledge of blithesome May,
Which children pluck, and, full of pride, uphold.

High-hearted buccaneers, o'erjoyed that they
In Eldorado in the grass have found,

Which not the rich earth's ample round
May match in wealth,—thou art more dear to me
Than all the prouder summer-blooms may be.

Gold such as thine ne'er drew the Spanish prow 10

Through the primeval hush of Indian seas,

Nor wrinkled the lean brow

Of age, to rob the lover's heart of ease,

'Tis the spring's largess, which she scatters now
To rich and poor alike, with lavish hand,

Though most hearts never understand

To take it at God's value, but pass by

The offered wealth with unrewarded eye.

Thou art my tropics and mine Italy;
To look at thee unlocks a warmer clime; 20

The eyes thou givest me

Are in the heart, and heed not space or time

Not in mid June the golden cuirassed bee
Feels a more summer-like warm ravishment

In the white lily's breezy tent,

His fragrant Sybaris, than I, when first

From the dark green thy yellow circles burst.

Then think I of deep shadows on the grass,
Of meadows where in sun the cattle graze,

Where, as the breezes pass, 30

The gleaming rushes lean a thousand ways,

Of leaves that slumber in a cloudy mass,

Or whiten in the wind, of waters blue

That from the distance sparkle through

Some woodland gap, and of a sky above,

Where one white cloud like a stray lamb doth move.

26 *Sybaris*, an ancient Greek city famous for its luxury and for the voluptuousness which flourished in its mild climate

My childhood's earliest thoughts are linked with thee,
 The sight of thee calls back the robin's song,
 Who, from the dark old tree
 Beside the door, sang clearly all day long, 40
 And I, secure in childish piety,
 Listened as if I heard an angel sing
 With news from heaven, which he could bring
 Fresh every day to my untainted ears,
 When birds and flowers and I were happy peers.

How like a prodigal doth nature seem,
 When thou, for all thy gold, so common art!
 Thou teachest me to deem
 More sacredly of every human heart,
 Since each reflects in joy its scanty gleam
 Of heaven and, could some wondrous secret show
 Did we but pay the love we owe,
 And with a child's undoubting wisdom look
 On all these living pages of God's book.

18

From

EMERSON

A Fable for Critics

Lowell wrote that "this *jeu d'esprit* was extemporized, I may say, so rapidly was it written . . . I sent daily installments to a friend in New York, the late Charles Briggs. He urged me to let it be printed, and I at last consented to its anonymous publication."

As Lowell said at the outset of the poem, its plot,

. . . like an icicle, 's slender and slippery,

Every moment more slender, and likely to slip away. . . .

In the main, it presents a critic explaining to Apollo what American authors of the period were like. The passages below (the titles were supplied by the editors) are the critic's remarks about the leading figures dealt with in the poem, as well as those about two minor authors famous at the time, Dana and Neal.

A long line of ancestors might be cited for the poem, notably Byron's "English Bards and Scotch Reviewers" and a poem which Lowell had enjoyed reading not long before 1847—Leigh Hunt's "Feast of the Poets." For discernment, liveliness, and wit, Lowell's poem compares very favorably with these predecessors.

"There comes Emerson first, whose rich words, even one,
 Are like gold nails in temples to hang trophies on,
 Whose prose is grand verse, while his verse, the Lord knows,

Is some of it prose—No, 't is not even prose;
 I'm speaking of metres, some poems have welled
 From those rare depths of soul that have ne'er been called,

They're not epics, but that doesn't matter a pin,
 In creating, the only hard thing's to begin;
 A grass-blade's no easier to make than an oak;
 If you've once found the way, you've achieved the grand stroke;

In the worst of his poems are mines of rich matter,
 But thrown in a heap with a crash and a clatter,
 Now it is not one thing nor another alone
 Makes a poem, but rather the general tone,
 The something pervading, uniting the whole,
 The before unconceived, unconceivable soul,
 So that just in removing this trifle or that, you
 Take away, as it were, a chief limb of the statue;
 Roots, wood, bark, and leaves singly perfect may be,
 But, clapt hodge-podge together, they don't make a tree.

"But, to come back to Emerson (whom, by the way, I believe we left waiting),—his is, we may say,

2 gold nails. See Ecclesiastes 12:11: "The words of the wise are as . . . nails fastened by the masters of assemblies . . ." • 5 metr
 a reference to Emerson's rather bumpy versification

A Greek head on right Yankee shoulders, whose range
 Has Olympus for one pole, for t'other the Exchange,
 He seems, to my thinking (although I'm afraid
 The comparison must, long ere this, have been made),
 A Plotinus-Montaigne, where the Egyptian's gold must
 And the Gascon's shrewd wit cheek-by-jowl coexist,
 All admire, and yet scarcely six converts he's got
 To I don't (nor they either) exactly know what, 30
 For though he builds glorious temples, 'tis odd
 He leaves never a doorway to get in a god
 'T is refreshing to old-fashioned people like me
 To meet such a primitive Pagan as he.
 In whose mind all creation is duly respected
 As parts of himself—just a little projected,
 And who's willing to worship the stars and the sun,
 A convert to—nothing but Emerson.
 So perfect a balance there is in his head,
 That he talks of things sometimes as if they were dead, 40
 Life, nature, love, God, and affairs of that sort,
 He looks at as merely ideas, in short,
 As if they were fossils stuck round in a cabinet,
 Of such vast extent that our earth's a mere dab in it;
 Composed just as he is inclined to conjecture her,
 Namely, one part pure earth, ninety-nine parts pure
 lecturer;
 You are filled with delight at his clear demonstration,
 Each figure, word, gesture, just fits the occasion,
 With the quiet precision of science he'll sort 'em,
 But you can't help suspecting the whole a *post mortem* 50

"There are persons, mole-blind to the soul's make and
 style,
 Who insist on a likeness 'twixt him and Carlyle,
 To compare him with Plato would be vastly fairer,
 Carlyle's the more burly, but E. is the rarer,
 He sees fewer objects, but clearer, truelier,
 If C.'s as original, E's more peculiar,
 That he's more of a man you might say of the one,
 Of the other he's more of an Emerson,
 C.'s the Titan, as shaggy of mind as of limb,—
 E. the clear-eyed Olympian, rapid and slim; 60
 The one's two thirds Norseman, the other half Greek,
 Where the one's most abounding, the other's to seek;
 C.'s generals require to be seen in the mass,—
 E.'s specialties gain if enlarged by the glass,
 C. gives nature and God his own fits of the blues,

And him common-sense things with mystical hues,—
 E. sits in a mystery calm and intense,
 And looks coolly around him with sharp common-sens
 C. shows you how every-day matters unite
 With the dim transdiurnal recesses of night,—
 While E., in a plain, preternatural way,
 Makes mysteries matters of mere every day,
 C. draws all his characters quite *a la* Fuseli,—
 Not sketching their bundles of muscles and thews ill,
 He paints with a brush so untamed and profuse,
 They seem nothing but bundles of muscles and thews,
 E. is rather like Flaxman, lines strait and severe,
 And a colorless outline, but full, round, and clear,—
 To the men he thinks worthy he frankly accords
 The design of a white marble statue in words 8
 C. labors to get at the centre, and then
 Take a reckoning from there of his actions and men,
 E. calmly assumes the said centre as granted,
 And, given himself, has whatever is wanted.

"He has imitators in scores, who omit
 No part of the man but his wisdom and wit,—
 Who go carefully o'er the sky-blue of his brain,
 And when he has skimmed it once, skim it again;
 If at all they resemble him, you may be sure it is
 Because their shoals mirror his mists and obscurities, 90
 As a mud-puddle seems deep as heaven for a minute,
 While a cloud that floats o'er is reflected within it.

BRYANT

"There is Bryant, as quiet, as cool, and as dignified,
 As a smooth, silent iceberg, that never is ignifed,
 Save when by reflection 'tis kindled o' nights

24 Olympus, dwelling place of the Grecian gods. Here Lowell is referring to Emerson's Platonic idealism • 24 Exchange, symbol of Emerson's practicality. When a typical Brahmin praised a Transcendentalist, he was likely to laud him for not being too impractical • 27 Plotinus-Montaigne repeats the claim that Emerson was a happy mixture of idealism and practicality. Plotinus (205?-270?) was the most famous of the neo-Platonic philosophers. Michel Eyquem de Montaigne (1553-1592) was a French skeptic, essayist, and moralist • 59 Titan, earth-born giant, contrasted here with the heaven-born Olympian • 63 generals, generalizations • 73 Fuseli, Heinrich Fuseli (1742?-1825), a German-Swiss painter, was noted for his distortions of form and the extravagance of his colors • 77 Flaxman, John Flaxman (1755-1826), an English sculptor who followed classic models

With a semblance of flame by the chill Northern Lights.
 He may rank (Griswold says so) first bard of your nation
 (There's no doubt that he stands in supreme ice-olation),
 Your topmost Parnassus he may set his heel on,
 But no warm applauses come, peal following peal on,—100
 He's too smooth and too polished to hang any zeal on:
 Unqualified merits, I'll grant, if you choose, he has 'em,
 But he lacks the one merit of kindling enthusiasm,
 If he stir you at all, it is just, on my soul,
 Like being stirred up with the very North Pole.

"He is very nice reading in summer, but *inter*
Nos, we don't want *extra* freezing in winter,
 Take him up in the depth of July, my advice is,
 When you feel an Egyptian devotion to ices.
 But, deduct all you can, there's enough that's right good
 in him, 110
 He has a true soul for field, river, and wood in him;
 And his heart, in the midst of brick walls, or where'er
 it is,
 Glows, softens, and thrills with the tenderest charities—
 To you mortals that delve in this trade-ridden planet?
 No, to old Berkshire's hills, with their limestone and
 granite.

If you're one who *in loco* (add *foco* here) *desipis*.
 You will get of his outermost heart (as I guess) a piece;
 But you'd get deeper down if you came as a precipice,
 And would break the last seal of its inwardest fountain,
 If you only could palm yourself off for a mountain. 120
 Mr. Quivis, or somebody quite as discerning,
 Some scholar who's hourly expecting his learning,
 Calls B. the American Wordsworth; but Wordsworth
 May be rated at more than your whole tuneful herd's
 worth.

No, don't be absurd, he's an excellent Bryant;
 But, my friends, you'll endanger the life of your client,
 By attempting to stretch him up into a giant:
 If you choose to compare him, I think there are two per-
 sons fit for a parallel—Thompson and Cowper;
 I don't mean exactly—there's something of each, 130
 There's T.'s love of nature, C.'s penchant to preach;
 Just mix up their minds so that C.'s spice of craziness
 Shall balance and neutralize T.'s turn for laziness,
 And it gives you a brain cool, quite frictionless, quiet,
 Whose internal police nips the buds of all riot,—
 A brain like a permanent straight-jacket put on
 The heart that strives vainly to burst off a button,—

A brain which, without being slow or mechanic,
 Does more than a larger less drilled, more volcanic;
 He's a Cowper condensed, with no craziness bitten, 140
 And the advantage that Wordsworth before him had
 written.

"But, my dear little bardlings, don't prick up your ears
 Nor suppose I would rank you and Bryant as peers;
 If I call him an iceberg, I don't mean to say
 There is nothing in that which is grand in its way;
 He is almost the one of your poets that knows
 How much grace, strength, and dignity lie in Repose;
 If he sometimes fall short, he is too wise to mar
 His thought's modest fulness by going too far;
 'T would be well if your authors should all make a trial 150
 Of what virtue there is in severe self-denial,
 And measure their writings by Hesiod's staff,
 Which teaches that all has less value than half.

WHITTIER

"There is Whittier, whose swelling and vehement heart
 Strains the strait-breasted drab of the Quaker apart,
 And reveals the live Man, still supreme and erect,
 Underneath the bemummifying wrappers of sect;
 There was ne'er a man born who had more of the swing
 Of the true lyric bard and all that kind of thing;
 And his failures arise (though he seem not to know it) 160
 From the very same cause that has made him a poet,—
 A fervor of mind which knows no separation
 'Twixt simple excitement and pure inspiration,
 As my Pythoness erst sometimes erred from not knowing
 If 'twere I or mere wind through her tripod was blowing.

97 Griswold, Rufus Griswold (1815-1857), a leading nineteenth-century anthologist • 106 *inter Nos*, between ourselves • 116 in . . . *desipis*. You can be foolish in a particular place. The "add *foco* here" adds a rather complicated pun, referring not only to "one's own fireside" but also to the then-famous Locofoco political party • 121 Mr. Quivis, Mr. Anybody • 129 Thompson, properly spelled Thomsen, James (1700-1748), author of *The Seasons* • 129 Cowper, William Cowper (1731-1800), author of *The Task*. At this point Lowell wrote this rhymed footnote

To demonstrate quickly and easily how per-
 versely absurd 'tis to sound his Cowper

As people in general call him named *super*

I remark that he rhymes it himself with horse-trooper.

• 152 Hesiod (fl. 766 B.C.), a Greek poet, author of *Works and Days*
 • 164 Pythoness. See note, p. 826

Let his mind once get head in its favorite direction
 And the torrent of verse bursts the dams of reflection,
 While, borne with the rush of the metre along,
 The poet may chance to go right or go wrong,
 Content with the whirl and delirium of song, 170
 Then his grammar's not always correct, nor his rhymes,
 And he's prone to repeat his own lyrics sometimes,
 Not his best, though, for those are struck off at white-
 heats

When the heart in his breast like a trip-hammer beats,
 And can ne'er be repeated again any more
 Than they could have been carefully plotted before
 Like old what's-his-name there at the battle of Hastings
 (Who, however, gave more than mere rhythmical bast-
 ings),

Our Quaker leads off metaphorical fights
 For reform and whatever they call human rights, 180
 Both singing and striking in front of the war,
 And hitting his foes with the mallet of Thor,
Anne haec, one exclaims, on beholding his knocks,
Vestis filii tui. O leather-clad Fox?
 Can that be thy son, in the battle's mid din,
 Preaching brotherly love and then driving it in
 To the brain of the tough old Goliath of sin,
 With the smoothest of pebbles from Castaly's spring
 Impressed on his hard moral sense with a sling?

"All honor and praise to the right-hearted bard 190
 Who was true to The Voice when such service was hard,
 Who himself was so free he dared sing for the slave
 When to look but a protest in silence was brave,
 All honor and praise to the women and men
 Who spoke out for the dumb and the down-trodden
 then!

It needs not to name them, already for each
 I see History preparing the statue and niche,
 They were harsh, but shall *you* be so shocked at hard
 words

Who have beaten your pruning-hooks up into swords,
 Whose rewards and hurrahs men are surer to gain 200
 By the reaping of men and of women than grain?
 Why should *you* stand aghast at their fierce wordy war, if
 You scalp one another for Bank or for Tariff?
 Your calling them cut-throats and knaves all day long
 Doesn't prove that the use of hard language is wrong;
 While the World's heart beats quicker to think of such
 men

As signed Tyranny's doom with a bloody steel-pen,
 While on Fourth-of-July's beardless orators fright one
 With hints at Harmodius and Aristogeiton,
 You need not look shy at your sisters and brothers 21
 Who stab with sharp words for the freedom of others;—
 No, a wreath, twine a wreath for the the loyal and true
 Who, for sake of the many, dared stand with the few,
 Not of blood-spattered laurel for enemies braved,
 But of broad, peaceful oak-leaves for citizens saved!

DANA

"Here comes Dana, abstractedly loitering along,
 Involved in a paulo-post-future of song,
 Who'll be going to write what'll never be written
 Till the Muse, ere he think of it, gives him the mitten,—
 Who is so well aware of how things should be done, 220
 That his own works displease him before they're begun,—
 Who so well all that makes up good poetry knows,
 That the best of his poems is written in prose,
 All saddled and bridled stood Pegasus waiting,
 He was booted and spurred, but he loitered debating;
 In a very grave question his soul was immersed,—
 Which foot in the stirrup he ought to put first,
 And, while this point and that he judicially dwelt on,
 He, somehow or other, had written Paul Felton,
 Whose beauties or faults, whichever you see there, 230
 You'll allow only genius could hit upon either
 That he once was the Idle Man none will deplore,
 But I fear he will never be anything more,
 The ocean of song heaves and glitters before him,
 The depth and the vastness and longing sweep o'er him,

177 old what's-his-name, Tailiefer, a minstrel who rode into battle at Hastings (1066) singing of Roland • 182 Thor, Norse god of war and thunder • 183 *Anne haec* . . . *tui*. Is this indeed the robe of thy son? • 184 *Fox*, George Fox (1624-1691), English founder of the Society of Friends or Quakers • 188 *Castaly's spring*, a spring on Mount Parnassus • 191 *The Voice*—of God • 203 *Bank or for Tariff*. Two of the hottest political issues of the period were the United States Bank and the protective tariff • 209 *Harmodius and Aristogeiton*, sixth-century Greeks who slew Hipparchus, tyrant of Athens • 216 *Dana*. Richard Henry Dana, Sr. (1787-1879) is an author whose fame has been eclipsed by that of his son, Richard Henry, Jr., author of *Two Years Before the Mast*. Poet and essayist, the elder Dana, somewhat too academic to win widespread fame, was important for his work on the influential *North American Review* • 229 *Paul Felton*, a tale by Dana • 232 *Idle Man*, a periodical edited by Dana in 1824 Lowell mentions the pseudonym in connection with Dana's retirement from literary work in 1840

He knows every breaker and shoal on the chart,
 He has the Coast Pilot and so on by heart,
 Yet he spends his whole life, like the man in the fable,
 In learning to swim on his library-table.

NEAL

"There swaggers John Neal, who has wasted in
 Maine

240

The sinews and cords of his pugilist brain,
 Who might have been poet, but that, in its stead, he
 Preferred to believe that he was so already;
 Too hasty to wait till Art's ripe fruit should drop,
 He must pelt down an unripe and colicky crop;
 Who took to the law, and had this sterling plea for it,
 It required him to quarrel, and paid him a fee for it;
 A man who's made less than he might have, because
 He always has thought himself more than he was,—
 Who, with very good natural gifts as a bard, 250
 Broke the strings of his lyre out by striking too hard,
 And cracked half the notes of a truly fine voice,
 Because song drew less instant attention than noise.
 Ah, men do not know how much strength is in poise,
 That he goes the farthest who goes far enough,
 And that all beyond that is just bother and stuff.
 No vain man matures, he makes too much new wood;
 His blooms are too thick for the fruit to be good;
 'Tis the modest man ripens, 'tis he that achieves,
 Just what's needed of sunshine and shade he receives; 260
 Grapes, to mellow, require the cool dark of their leaves;
 Neal wants balance; he throws his mind always too far,
 Whisking out flocks of comets, but never a star;
 He has so much muscle, and loves so to show it,
 That he strips himself naked to prove he's a poet,
 And, to show he could leap Art's wide ditch, if he tried,
 Jumps clean o'er it, and into the hedge t' other side.
 He has strength, but there's nothing about him in
 keeping;

One gets surelier onward by walking than leaping;
 He has used his own sinews himself to distress, 270
 And had done vastly more had he done vastly less;
 In letters, too soon is as bad as too late;
 Could he only have waited he might have been great;
 But he plumped into Helicon up to the waist,
 And muddled the stream ere he took his first taste.

HAWTHORN

"There is Hawthorne, with genius so shrinking and rare
 That you hardly at first see the strength that is there;
 A frame so robust, with a nature so sweet,
 So earnest, so graceful, so lithe and so fleet,
 Is worth a descent from Olympus to meet; 21
 'Tis as if a rough oak that for ages had stood,
 With his gnarled bony branches like ribs of the wood
 Should bloom, after cycles of struggle and scathe,
 With a single anemone trembly and rather;
 His strength is so tender, his wildness so meek,
 That a suitable parallel sets one to seek,—
 He's a John Bunyan Fouqué, a Puritan Tieck;
 When Nature was shaping him, clay was not granted
 For making so full-sized a man as she wanted,
 So, to fill out her model, a little she spared 29
 From some finer-grained stuff for a woman prepared,
 And she could not have hit a more excellent plan
 For making him fully and perfectly man.
 The success of her scheme gave her so much delight,
 That she tried it again, shortly after, in Dwight;
 Only, while she was kneading and shaping the clay,
 She sang to her work in her sweet childish way,
 And found, when she'd put the last touch to his soul,
 That the music had somehow got mixed with the whole

COOPER

"Here's Cooper, who's written six volumes, to show 300
 He's as good as a lord. well, let's grant that he's so;
 If a person prefer that description of praise,
 Why, a coronet's certainly cheaper than bays;
 But he need take no pains to convince us he's not
 (As his enemies say) the American Scott.
 Choose any twelve men, and let C. read aloud
 That one of his novels of which he's most proud,
 And I'd lay any bet that, without ever quitting

Neal, John Neal (1793-1876), a hasty and highly productive author famous in his time as an outspoken critic of other American writers • 287 John Bunyan Fouqué, a combination of John Bunyan (1628-1688), author of the allegorical *Pilgrim's Progress*, and Baron de la Motte Fouqué (1777-1843), who wrote imaginative romances • 287 Tieck, Ludwig Tieck. See note, p 662 • 295 Dwight, John Sullivan Dwight (1813-1893), a Boston composer and music critic

Their box, they'd be all, to a man, for acquitting.
 He has drawn you one character, though, that is new, 310
 One wildflower he's plucked that is wet with the dew
 Of this fresh Western world, and, the thing not to mince,
 He has done naught but copy it ill ever since;
 His Indians, with proper respect be it said,
 Are just Natty Bumppo, daubed over with red,
 And his very Long Toms are the same useful Nat,
 Rigged up in duck pants and a sou'wester hat
 (Though once in a Coffin, a good chance was found
 To have slipped the old fellow away underground).
 All his other men-figures are clothes upon sticks, 320
 The *dernière chemise* of a man in a fix
 (As a captain besieged, when his garrison's small
 Sets up caps upon poles to be seen o'er the wall);
 And the women he draws from one model don't vary,
 All sappy as maples and flat as a prairie.
 When a character's wanted, he goes to the task
 As a cooper would do in composing a cask;
 He picks out the staves, of their qualities heedful,
 Just hoops them together as tight as is needful,
 And, if the best fortune should crown the attempt, he 330
 Has made at the most something wooden and empty.

"Don't suppose I would underrate Cooper's abilities;
 If I thought you'd do that, I should feel very ill at ease;
 The men who have given to *one* character life
 And objective existence are not very rife,
 You may number them all, both prose-writers and singers,
 Without overrunning the bounds of your fingers,
 And Natty won't go to oblivion quicker
 Than Adams the parson or Primrose the vicar.

"There is one thing in Cooper I like, too, and that is 340
 That on manners he lectures his countrymen gratis;
 Not precisely so either, because, for a rarity,
 He is paid for his tickets in unpopularity.
 Now he may overcharge his American pictures,
 But you'll grant there's a good deal of truth in his
 strictures;

And I honor the man who is willing to sink
 Half his present repute for the freedom to think,
 And, when he has thought, be his cause strong or weak,
 Will risk t' other half for the freedom to speak,
 Caring naught for what vengeance the mob has in
 store, 350
 Let that mob be the upper ten thousand or lower.

"There comes Poe, with his raven, like Barnaby Rudge
 Three fifths of him genius and two fifths sheer fudge,
 Who talks like a book of iambs and pentameters,
 In a way to make people of common sense damn metre
 Who has written some things quite the best of their kind
 But the heart somehow seems all squeezed out by the
 mind,

Who—But hey-day! What's this? Messieurs Mathew
 and Poe,

You mustn't fling mud-balls at Longfellow so,
 Does it make a man worse that his character's such 360
 As to make his friends love him (as you think) too much?
 Why, there is not a bard at this moment alive
 More willing than he that his fellows should thrive;
 While you are abusing him thus, even now
 He would help either one of you out of a slough;
 You may say that he's smooth and all that till you're
 hoarse,

But remember that elegance also is force;
 After polishing granite as much as you will,
 The heart keeps its tough old persistency still;
 Deduct all you can, *that* still keeps you at bay; 370
 Why, he'll live till men weary of Collins and Gray.
 I'm not over-fond of Greek metres in English,
 To me rhyme's a gain, so it be not too jinglish,
 And your modern hexameter verses are no more
 Like Greek ones than sleek Mr. Pope is like Homer;
 As the roar of the sea to the coo of a pigeon is,
 So, compared to your moderns, sounds old Melesigenes;
 I may be too partial, the reason, perhaps, o't is
 That I've heard the old blind man recite his own
 rhapsodies,

And my ear with that music impregnate may be, 380
 Like the poor exiled shell with the soul of the sea,

316 Long Toms. Long Tom Coffin was the American sailor in *The Pilot* (1823) • 321 *dernière chemise*, last shirt • 339 Adams, Parson Adams, a memorable character in Fielding's *Joseph Andrews* • 339 Primrose, the amiable, garrulous Dr. Primrose in Goldsmith's *The Vicar of Wakefield* • 352 Barnaby Rudge (1841), a novel by Dickens in which a raven was important. See note, p. 650 • 358 Mathews, Cornelius Mathews (1817-1889), a New York author who, like Poe, created quite a stir by attacking Longfellow • 371 Collins, William Collins (1721-1759), English lyrical poet • 371 Gray, Thomas Gray (1716-1771), English poet, author of the famous elegy • 377 Melesigenes, Homer

Or as one can't bear Strauss when his nature is cloven
 To its deeps within deeps by the stroke of Beethoven;
 But, set that aside, and 'tis truth that I speak,
 Had Theocritus written in English, nor Greek,
 I believe that his exquisite sense would scarce change a
 line

In that rare, tender, virgin-like pastoral Evangeline.
 That's not ancient nor modern, its place is apart
 Where time has no sway, in the realm of pure Art,
 'Tis a shrine of retreat from Earth's hubbub and
 strife

As quiet and chaste as the author's own life.

390

IRVING

"What! Irving? thrice welcome, warm heart and fine
 brain,

You bring back the happiest spirit from Spain,
 And the gravest sweet humor, that ever was there
 Since Cervantes met death in his gentle despair;
 Nay, don't be embarrassed, nor look so beseeching,
 I sha'n't run directly against my own preaching,
 And having just laughed at their Raphaels and Dantes,
 Go to setting you up beside matchless Cervantes;
 But allow me to speak what I honestly feel,—

400

To a true poet-heart add the fun of Dick Steele,
 Throw in all of Addison *minus* the chill,
 With the whole of that partnership's honest good-will,
 Mix well, and while stirring, hum o'er, as a spell,
 The fine *old* English Gentleman, simmer it well,
 Sweeten just to your own private liking, then strain,
 That only the finest and clearest remain,
 Let it stand out of doors till a soul it receives
 From the warm lazy sun loitering down through green
 leaves,

And you'll find a choice nature, not wholly deserving
 A name either English or Yankee,—just Irving.

HOLMES

"There's Holmes, who is matchless among you for wit;
 A Leyden-jar always full-charged, from which flit
 The electrical tingles of hit after hit;
 In long poems 'tis painful sometimes, and invites
 A thought of the way the new Telegraph writes,
 Which pricks down its little sharp sentences spitefully

As if you got more than you'd title to rightfully,
 And you find yourself hoping its wild father Lightning
 Would flame in for a second and give you a fright'ning. 41
 He has perfect sway of what I call a sham metre,
 But many admire it, the English pentameter,
 And Campbell, I think, wrote most commonly worse,
 With less nerve, swing, and fire in the same kind of verse
 Nor e'er achieved aught in't so worthy of praise
 As the tribute of Holmes to the grand *Marseillaise*.
 You went crazy last year over Bulwer's New Timon;—
 Why, if B, to the day of his dying, should rhyme on,
 Heaping verses on verses and tomes upon tomes,
 He could ne'er reach the best point and vigor o
 Holmes.

43

His are just the fine hands, too, to weave you a lyric
 Full of fancy, fun, feeling, or spiced with satiric
 In a measure so kindly, you doubt if the toes
 That are trodden upon are your own or your foes'.

LOWELL

"There is Lowell, who's striving Parnassus to climb
 With a whole bale of *isms* tied together with rhyme,
 He might get on alone, spite of brambles and boulders
 But he can't with that bundle he has on his shoulders,
 The top of the hill he will ne'er come nigh reaching
 Till he learns the distinction 'twixt singing and
 preaching;

440

His lyre has some chords that would ring pretty well,
 But he'd rather by half make a drum of the shell,
 And rattle away till he's old as Methusalem,
 At the head of a march to the last new Jerusalem."

1847-1848 • 1848

382 Strauss, Johann Strauss (1804-1849), Viennese "Waltz King" •
 383 Beethoven, Ludwig van Beethoven (1770-1827), German composer
 • 385 Theocritus, a third-century Greek pastoral poet • 393 from
 Spain refers to Irving's return from that country in 1846 • 395 Cer-
 vantes, Miguel de Cervantes Saavedra (1547-1616), author of *Don Quix-
 ote*. Cervantes, at the time of his death, was a monk • 398 Raphael
 (1483-1520), Italian painter • 398 Dante (1265-1321), Italian poet •
 405 English Gentleman, an essay by Irving • 413 Leyden-jar, a
 glass jar which condenses electricity • 416 new Telegraph, the
 Morse code • 423 Campbell, Thomas Campbell (1777-1844), a British
 poet • Holmes' early poems are frequently reminiscent of his poems •
 426 tribute, in Section II of Holmes' *Poetry: A Metrical Essay* (1836)
 • 427 Bulwer's New Timon, a satirical poem which had appeared in
 1846 • 443 Methusalem, or Methuselah, according to Genesis, died
 at "nine hundred sixty and nine years"

From

The Biglow Papers, First Series

Written as a protest against the Mexican War and various political events connected with it, this series of poems had a success in the years of their appearance (1847-1848) which surprised and delighted their author. Lowell's earlier poems had been relatively unpopular. These he saw pinned up in workshops; he heard them quoted everywhere and their authorship debated. They were effective propaganda.

They were effective partly because, like the writings of numerous humorists of New England at the time (notably Seba Smith, creator of Jack Downing), they appealed to the Yankee liking for Down East horse-sense philosophers who could voice their ideas—ideas of any sort arrived at by down-to-earth thinking—in amusing phrases. Chief among the characters exhibited by the papers was Hosea Biglow, intended by Lowell to represent New England's "homely common-sense vivified and heated by conscience." Biglow's rural way of feeling, thinking, and expressing himself was sure-fire appeal to an audience of Americans who had supreme respect for the intelligence of common men.

Other characters developed in the papers—a pedantic parson, for instance—were invented to serve in various ways as foils for the chief character and to attack Lowell's foes in ways impossible for the puritanical and unlearned Hosea. Birdofredum Sawin, to cite one more instance, was another Yankee farmer whom Lowell invented as "a mouth-piece of the mere drollery . . . meant to embody . . . that half-conscious unmorality which I have noticed as the recoil in gross natures from . . . puritanism." Sawin, unlike Biglow, was persuaded to join the army, and both during the War and after it his horrible experiences dragged him deeper and deeper into degradation. And the Rev Homer Wilbur, Hosea's pastor, who edited his parishioner's poems, wrote in a learned, pedantic style which was amusingly incongruous with the earthy *patois* of the poems

Because of their style and their fictional excellence the verses have had an appeal more lasting than much political satire. An accomplished linguist, Lowell appreciated and reproduced accurately the native idiom, which he praised as "racy with life and vigor and originality, bucksome to our new occasions." A keen observer of life in Yankeedom, he created characters, according to critic J R Dennet, writing in the *Nation* (November 15, 1866, III, 397), "so life-like and, in the main, so true to nature—so good as individuals and as types that we know not where in literature to look for . . . others that excel them."

No. I
A LETTER

From Mr. Ezekiel Biglow of Jaalam to the
Hon. Joseph T. Buckingham, Editor of the Boston
Courier, Enclosing A Poem of His Son,
Mr. Hosea Biglow

Jaylem, june 1846

Mister Eddyter:—Our Hosea wuz down to Boston last week, and he see a cruetin Sarjunt a struttin round as popler as a hen with 1 chicking, with 2 fellers a drummin and fifin arter him like all nater. the sarjunt he thout Hosea hedn't gut his 1 teeth cut cos he looked a kindo 's though he'd jest com down, so he cal'lated to hook him in. but Hosy woodn't take none o' his sarse for all he hed much as 20 Rooster's tales stuck onto his hat and eenamost enuf brass a bobb'n up and down on his shoulders and figureed onto his coat and trousis, let alone wut nater hed sot in his featers, to make a 6 pounder out on

wal, Hosea he com home considerabal riled, and arter I'd gone to bed I heern Him a thrashin round like a short-tailed Bull in flitime. The old Woman ses she to me ses she, Zekle, ses she, our Hosse's gut the chollery or suthin anuther ses she, don't you Bee skeered, ses

2 cruetin Sarjunt, recruiting sergeant Lowell was angered into writing this paper when, like Hosea, he saw a sergeant of the sort described trying to enlist men in Boston • 4 nater, nature • 9 brass. Ezekiel is pointing out that, both literally and figuratively, the sergeant had "a lot of brass"

I, he's oney amaking pottery [*Aut insani, aut versos facit.*—H.W.] ses i, he's ollers on hand at that ere busynes like Da & martin, and shure enuf, cum mornin, Hosity he cum down stares full chizzle, hare on eend and cote tales flyin, and sot rite of to go reed his varses to Parson Wilbur bein he haint aney grate shows o' book larnin himself, bimeby he cum back and sed the parson wuz dreffle tickled with 'em as i hoop you will Be, and said they wuz True grit.

Hosea ses taint hardly fair to call 'em hisn now, cos the parson kind o' slicked off sum O' the last varses, but he told Hosee he didn't want to put his ore in to tetch to the Rest on 'em, bein they wuz verry well As thay wuz, and then Hosity ses he sed suthin a nuther about Simplex Mundishes or sum such feller, but I guess Hosea kind o' didn't hear him, for I never hearn o' nobody o' that name in this village, and I've lived here man and boy 76 year cum next tater diggin, and thair aint no wheres a kitting spryer'n I be.

If you print 'em I wish you'd jest let folks know who hosity's father is, cox my ant Keziah used to say it's nater to be curus ses she, she aint livin though and he's a likely kind o' lad

EZEKIEL BIGLOW

Thrash away, you'll *hev* to rattle
On them kittle-drums o' yourn,—
'Taint a knowin' kind o' cattle
Thet is ketched with moldy corn;
Put in stiff, you fifer feller,
Let folks see how spry you be,—
Guess you'll toot till you are yeller
'Fore you git ahold o' me!

Thet air flag's a leetle rotten,
Hope it aint your Sunday's best;—
Fact! it takes a sight o' cotton
To stuff out a soger's chest.
Sence we farmers hev to pay fer't,
Ef you must wear humps like these,
Sposin' you should try salt hay fer't,
It would du ez slick ez grease

'Twouldn't suit them Southun fellers,
They're a dreffle graspin' set,
We must ollers blow the bellers

Wen they want their irons her;
May be it's all right ez preachin',
But *my* narves it kind o' grates,
Wen I see the overreachin'
O' them nigger-drivin' States.

Them thet rule us, them slave-traders,
Haint they cut a thunderin' swarth,
(Helped by Yankee renegaders,)
Thru the vartu o' the North!
We begin to think it's nater
To take sarse an' not be riled;—
Who'd expect to see a tater
All on eend at bein' biled?

Ez fer war, I call it murder,—
There you hev it plain an' flat;
I don't want to go no funder
Than my Testyment fer thar;
God hez sed so plump an' fairly,
It's ez long ez it is broad,
An' you've gut to git up airly
If you want to take in God.

'Taint your eppyletts an' feathers
Make the thing a grain more right;
'Taint afollerin' your bell-wethers
Will excuse ye in His sight;
Ef you take a sword an' dror it,
An' go stick a feller thru,
Guv'ment aint to answer for it,
God'll send the bill to you.

Wut's the use o' meetin'-goin'
Every Sabbath, wet or dry,
Ef it's right to go amowin'
Feller-men like oats an' rye?

1 pottery, poetry Here, as elsewhere, the bad spelling makes possible a pun • 1 *Aut . . . facit.* "He is either mad or is making verses" This is a note inserted by H. W., Parson Homer Wilbur, the pedantic editor of the text for book publication • 3 *Da & martin*, Day & Martin, who published rhymed advertisements of their shoeblacking • 14 *Simplex Mundishes*, Hosea's inaccurate pronunciation of *simplex munditiis*—neat but not gaudy, unsophisticated

11 *takes . . . cotton.* The abolitionists charged that the real purpose of the Mexican War was to increase the cotton-growing territory

I dunno but wut it's pooty
Trainin' round in bobtail coats,—
But it's curus Christian dooty
This 'ere cuttin' folks's throats.

They may talk o' Freedom's airy
Tell they'er pupple in the face,—
It's a grand gret cemetary
Fer the barthrights of our race;
They jest want this Californy
So's to lug new slave-states in
To abuse ye, an' to scorn ye,
An' to plunder ye like sin.

Aint it cute to see a Yankee
Take sech everlastin' pains,
All to git the Devil's thankee,
Helpin' on 'em weld their chains:
Wy, it's jest ez clear ez figgers,
Clear ez one an' one make two,
Chaps thet make black slaves o' niggers
Want to make wite slaves o' you

Tell ye jest the eend I've come to
Arter cipherin' plaguy smart,
An' it makes a handy sum, tu,
Any gump could larn by heart;
Laborin' man an' laborin' woman
Hev one glory an' one shame,
Ev'ry thin' thet's done inhuman
Injers all on 'em the same

'Taint by turnin' out to hack folks
You're agoin' to git your right,
Nor by lookin' down on black folks
Coz you're put upon by wite,
Slavery aint o' nary color,
'Taint the hide thet makes it wus,
All it keers fer in a feller
'S jest to make him fill its pus

Want to tackle *me* in, du ye?
I expect you'll hev to wait,
Wen cold lead puts daylight thru ye
You'll begin to kal'late;
'Spose the crows wun't fall to pickin'

All the carkiss from your bones,
Coz you helped to give a lickin'
To them poor half-Spanish drones?

Jest go home an' ask our Nancy
Whether I'd be sech a goose
Ez to jine ye,—guess you'd fancy
The eternal bung was loose!
She wants me fer home consumption,
Let alone the hay's to mow,—
Ef you're arter folks o' gumption,
You've a darned long row to hoe.

Take them editors thet's crowin'
Like a cockerel three months old,—
Don't ketch any on 'em goin',
Though they *be* so blasted bold;
Aint they a prime lot o' fellers?
'Fore they think on't guess they'll sprout,
(Like a peach thet's got the yellers)
With the meanness bustin' out.

Wal, go 'long to help 'em stealin'
Bigger pens to cram with slaves,
Help the men thet's ollers dealin'
Insults on your fathers' graves,
Help the strong to grind the feeble,
Help the many agin the few,
Help the men thet call your people
Witewashed slaves an' peddlin' crew!

Massachusetts, God forgive her,
She's akneeling with the rest,
She thet ough' to ha' clung ferever
In her grand old eagle-nest,
She thet ough' to stand so fearless
Wile the wracks are round her hurled,
Holdin' up a beacon peerless
To the oppressed of all the world!

61 *want* this Californy refers to the claim that California was to be admitted to statehood only in order that more slave states might be formed • 65 *Yankee* . . . *thankee*. The Yankees had a widespread reputation for striking good bargains • 88 *pus*, purse • 92 *kal'late*, calculate • 96 *half-Spanish drones*, the Mexicans • 111 *yellers*, a disease of peach trees accompanied by the sprouting of sterile shoots

Ha'n't they sold your colored seamen?

Ha'n't they made your env'ys wi'z?

Wut'll make ye act like free men?

Wut'll git your dander riz?

Come, I'll tell ye wut I'm thinkin'

Is our dooty in this fix,

They'd ha' done 't ez quick ez winkin'

In the days o' seventy-six.

Clang the bells in every steeple,

Call all true men to disown

The tradoozers of our people,

The enslavers o' their own,

Let our dear old Bay State proudly

Put the trumpet to her mouth,

Let her ring this messidge loudly

In the ears of all the South:—

"I'll return ye good for evil

Much ez we frail mortils can,

But I won't go help the Devil

Makin' man the cus o' man,

Call me coward, call me traiter,

Jest ez suits your mean idees,—

Here I stand a tyrant-hater,

An' the friend o' God an' Peace!"

Ef I'd *my* way I hed ruther

We should go to work an' part,—

They take one way, we take t'other,—

Guess it wouldn't break my heart;

Man hed ough' to put asunder

Them thet God has noways jined;

An' I shouldn't gretly wonder

Ef there's thousands o' my mind.

[The first recruiting sergeant on record I conceive to have been that individual who is mentioned in the Book of Job as *going to and fro in the earth, and walking up and down in it*. Bishop Latimer will have him to have been a bishop, but to me that other calling would appear more congenial. The sect of Cainites is not yet extinct, who esteemed the first-born of Adam to be the most worthy, not only because of that privilege of primogeniture, but inasmuch as he was able to overcome and slay his younger brother. That was a wise saying of the famous Marquis Pescara to the Papal Legate, that *it was*

impossible for men to serve Mars and Christ at the same time. Yet in time past the profession of arms was judged to be κατ' ἐξοχήν that of a gentleman, nor does this opinion want for strenuous upholders even in our day. Must we suppose, then, that the profession of Christianity was only intended for losels, or, at best, to afford an opening for plebeian ambition? Or shall we hold with that nicely metaphysical Pomeranian, Captain Vratz, who was Count Konigsmark's chief instrument in the murder of Mr Thynne, that the Scheme of Salvation had been arranged with an especial eye to the necessities of the upper classes, and that "God would consider *a gentleman* and deal with him suitably to the condition and profession, he had placed him in"? It may be said of us all, *Exemplo plus quam ratione vivimus*.—H W]

1846

No III

WHAT MR ROBINSON THINKS

The gubernatorial campaign of 1847 in Massachusetts inspired Hosea to write these biting satirical lines. George Nixon Briggs (Guvener B. in the poem), who had been the state executive since 1844, was running for reelection. His opponent was General Caleb Cushing (Gineral C.), then a brigadier general, serving in Mexico. John P. Robinson, who had been a past supporter of Briggs, wrote an open letter to the newspapers telling of his support for Cushing

Guvener B. is a sensible man;

He stays to his home an' looks arter his folks;

He draws his furrer ez straight ez he can,

An' into nobody's tater-patch pokes,

130 env'ys wi'z, envoys whiz, a reference to the impolite treatment in the period of American envoys • 154 We . . . part, an interesting advocacy, by Lowell, of disunion

2 that individual, Satan This note is Parson Wilbur's learned commentary on the poem • 4 Bishop Latimer, Hugh Latimer See note, p. 129 • 6 Cainites, a second-century religious sect which held that Cain represented the higher power • 11 Pescara, Marquis Pescara (1489-1525), an Italian soldier • 14 κατ' ἐξοχήν, especially 19 Captain Vratz, a murderer who was executed in 1682 • 26 Exemplo . . . vivimus. We live more by example than by reason

But John P.
Robinson he
Sez he wunt vote fer Guvener B.

My' aint it terrible! Wut shall we du?
We can't never choose him o' course,—thet's flat;
Guess we shall hev to come round, (don't you?) 10
An' go in fer thunder an' guns, an' all that;
Fer John B.
Robinson he
Sez he wunt vote fer Guvener B.

General C. is a drefle smart man.
He's ben on all sides thet give places or pelf;
But consistency still wuz a part of his plan,—
He's ben true to *one* party—an' thet is himself;—
So John P.
Robinson he 20
Sez he shall vote fer General C.

General C. he goes in fer the war,
He don't vally principle more 'n an old cud;
Wut did God make us raytional creeturs fer,
But glory an' gunpowder, plunder an' blood?
So John P.
Robinson he
Sez he shall vote fer General C.

We were gittin' on nicely up here to our village,
With good old idees o' wut's right an' wut aint, 30
We kind o' thought Christ went agin war an' pillage,
An' thet eppylett's worn't the best mark of a saint,
But John P.
Robinson he
Sez this kind o' thing's an exploded idee

The side of our country must ollers be took,
An' Presidunt Polk, you know, *he* is our country.
An' the angel thet writes all our sins in a book
Puts the *debit* to him, an' to us the *per contry*;
An' John P.
Robinson he 40
Sez this is his view o' the thing to a T.

Parson Wilbur he calls all these argimunts lies;
Sez they 're nothin' on airth but jest *fee, faw, fum*:
An' thet all this big talk of our destinies

Is half on it ign'ance, an' t' other half rum;
But John P.
Robinson he
Sez it aint no sech thing, an', of course, so must we.

Parson Wilbur sez /e never heerd in his life 50
Thet th' Apostles rigged out in their swaller-tail coats,
An' marched round in front of a drum an' a fife,
To git some on 'em office, an' some on 'em votes;
But John P.
Robinson he
Sez they did n't know everythin' down in Judee.

Wal, it's a marcy we' ve git folks to tell us
The rights an' the wrongs o' these matters, I vow,—
God sends country lawyers, an' other wise fellers,
To start the world's team wen it gits in a slough, 60
Fer John P.
Robinson he
Sez the world 'll go right, ef he hollers out Gee!
1847-1848

No VIII

A SECOND LETTER
FROM B. SAWIN, ESQ.

Birdofredum Sawin was a country boy who, unlike Hosea, had been lured into army service by the rattle of a drum and had marched off to Mexico. From time to time he wrote home to Hosea, and Hosea translated his letters into verse. Sawin soon lost his illusions and became a rascal—one of the most amusing ones in American humor.

The Whig candidate for the Presidency in 1848 was Zachary Taylor, who was not very articulate on the great issues of the day—particularly slavery—but who had won fame as the hero of Buena Vista. Birdofredum Sawin likewise based his political claims upon his military record. In this letter, a take-off on Old Zach's candidacy, Birdofredum tells of his own situation after the war.

I spose you wonder ware I be; I can't tell, fer the soul
o' me,
Exactly ware I be myself,—meanin' by thet the holl
o' me.

Wen I left hum, I hed two legs, an' they worn't bad ones
 neither,
 (The scaliest trick they ever played wuz bringin' on me
 hither,)
 Now one on 'em's I dunno ware;—they thought I wuz
 adyin',
 An' sawed it off because they said 't wuz kin' o'
 mortifyin';
 I'm willin' to believe it wuz, an' yit I don't see, nuther,
 Wy one shoud take to feelin' cheap a minnit sooner
 'n t' other,
 Sence both wuz equilly to blame; but things is ez
 they be;
 It took on so they took it off, an' ther's enough fer me. 10
 There's one good thing, though, to be said about my
 wooden new one,—
 The liquor can't git into it ez 't used to in the true
 one;
 So it saves drink; an' then, besides, a feller could n't beg
 A gretter blessin' then to hev one ollers sober peg,
 It's true a chap 's in want o' two fer follerin' a drum,
 But all the march I'm up to now is jest to Kingdom
 Come.

I've lost one eye, but ther's a loss it's easy to supply
 Out o' the glory that I 've gut, fer ther is all my eye;
 An' one is big enough, I guess, by diligently usin' it,
 To see all I shall ever git by way o' pay fer losin' it; 20
 Off'cers I notice, who git paid fer all our thumps an'
 kickins,
 Du wal by keepin' single eyes arter the fattest pickins;
 So, ez the eye 's put fairly out, I'll larn to go without it,
 An' not allow *myself* to be no gret put out about it.
 Now, le' me see, ther is n't all, I used, 'fore leavin' Jaalam,
 To count things on my finger-eends, but sutthin' seems
 to ail 'em:
 Ware's my left hand? O, darn it, yes, I recollect wut 's
 come on 't;
 I haint no left arm but my right, an' ther 's gut jest a
 thumb on 't;
 It aint so hendy ez it wuz to cal'late a sum on 't.
 I've hed some ribs broke,—six (I bl'ieve),—I haint kep'
 no account on 'em; 30
 Wen pensions git to be the talk, I'll settle the amount
 on 'em.
 An' now I'm speakin' about ribs, it kin' o' brings to mind

One thet I could n't never break,—the one I lef' behind,
 Ef you should see her, jest clear out the spout o' your
 invention
 An' pour the longest sweetnin' in about an annooal
 pension,
 An' kin' o' hint (in case, you know, the critter should
 refuse to be
 Consoled) I aint so 'xpensive now to keep ez wut I used
 to be;
 There 's one arm less, ditto one eye, an' then the leg ther 's
 wooden
 Can be took off an' sot away wenever ther 's a puddin'.

 I spose you think I'm comin' back ez opperlunt ez
 thunder, 40
 With shiploads o' gold images an' varus sorts o' plunder,
 Wal, 'fore I vullinteeded, I thought this country wuz
 a sort o'
 Canaan, a reg'lar Promised Land flowin' with rum an'
 water,
 Ware propaty growed up like time, without no
 cultivation,
 An' gold wuz dug ez taters be among our Yankee nation,
 Ware nateral advantages were pufficly amazin',
 Ware every rock there wuz about with precious stuns
 wuz blazin',
 Ware mill-sites filled the country up ez thick ez you
 could cram 'em
 An' desput rivers run about a beggin' folks to dam 'em,
 Then there were meetinhouses, tu, chockful o' gold an'
 silver 50
 Thet you could take, an' no one could n't hand ye in no
 bill fer;—
 Thet's wut I thought afore I went, ther 's wut them fellers
 told us
 Thet stayed to hum an' speechified an' to the buzzards
 sold us;
 I thought ther gold-mines could be gut cheaper than
 Chiny asters,
 An' see myself acomin' back like sixty Jacob Astors,
 But sech idees soon melted down an' did n't leave a
 grease-spot;

25 Jaalam, home town of Hosea and Birdofredum • 55 Jacob Astor
 (1763-1848), a German-American merchant, one of the richest men of
 the time

I vow my holl sheer o' the spiles would n't come nigh
 a V spot;
 Although, most anywares we 've ben, you need n't break
 no locks,
 Nor run no kin' o' risks, to fill your pocket full o' rocks.
 I 'xpect I mentioned in my last some o' the nateral
 feeturrs 60
 O' this all-fiered buggy hole in th' way o' awfle creeturrs,
 But I fergut to name (new things to speak on so
 abounded)
 How one day you 'll most die o' thust, an' 'fore the next
 git drowneded.
 The clymit seems to me jest like a teapot made o'
 pewter
 Our Preudence hed, thet would n't pour (all she could
 du) to suit her;
 Fust place the leaves 'ould choke the spout, so 's not a
 drop 'ould dreen out,
 Then Prude 'ould tip an' tip an' tip, till the holl kit bust
 clean out,
 The kiver-hinge-pin bein' lost, tea-leaves an' tea an'
 kiver
 'ould all come down *kerswosh!* ez though the dam bust
 in a river.
 Jest so 't is here; holl months there aint a day o' rainy
 weather, 70
 An' jest ez th' officers 'ould be a layin' heads together
 Ez t' how they 'd mix their drink at sech a milingтары
 deepot,—
 'T would pour ez though the lid wuz off the everlastin'
 teapot.
 The cons'quence is, thet I shall take, wen I 'm allowed
 to leave here,
 One piece o' propaty along, an' thet 's the shakin' fever;
 It's reggular employment, though, an' thet aint thought
 to harm one,
 Nor 't aint so tiresome ez it wuz with t' other leg an'
 arm on;
 An' it 's a consolation, tu, although it doos n't pay,
 Fo hev it said you 're some gret shakes in any kin' o' way.
 T' worn't very long, I tell ye wut, I thought o' fortin-
 makin',— 80
 One day a reg'lar shiver-de-freeze, an' next ez good ez
 bakin',—
 One day abrin' in the sand, then smoth'rin' in the
 mashes,—

Git up all sound, be put to bed a mess o' hacks an'
 smashes.
 But then, thinks I, at any rate there 's glory to be hed,—
 Thet's an investment, arter all, thet may n't turn out
 so bad,
 But somehow, wen we'd fit an' licked, I ollers found the
 thanks
 Gut kin' o' lodged afore they come ez low down ez
 the ranks,
 The Gin'als gut the biggest sheer, the Cunnles next, an'
 so on,—
 We never gut a blasted mite o' glory ez I know on;
 An' spose we hed, I wonder how you 're goin' to contrive
 its 90
 Division so 's to give a piece to twenty thousand privits;
 Ef you should multiply by ten the portion o' the brav'st
 one,
 You would n't git more 'n half enough to speak of on
 a grave-stun;
 We git the licks,—we're jest the grist thet 's put into
 War's hoppers;
 Leftenants is the lowest grade thet helps pick up the
 coppers.
 It may suit folks thet go agin a body with a soul in 't,
 An' aint contented with a hide without a bagnet hole
 in 't;
 But glory is a kin' o' thing I sha' n't pursue no funder,
 Coz thet 's the officers parquise,—yourn 's on'y jest the
 murder.

Wal, arter I gin glory up, thinks I at least there 's one 100
 Thing in the bills we aint hed yit, an' thet 's the
 GLORIOUS FUN,
 Ef once we git to Mexico, we fairly may presume we
 All day an' night shall revel in the halls o' Montezumy.
 I'll tell ye wut *my* revels wuz, an' see how you would like
 'em;
 We never gut inside the hall. the nighest ever I come
 Wuz stan'in sentry in the sun (an', fact, it *seemed* a
 cent'ry)
 A ketchin' smells o' biled an' roast thet come out thru
 the entry,
 An' hearin' ez I sweltered thru my passes an' repasses,

97 bagnet, bayonet

A rat-tat-too o' knives an' forks, a clinkty-clink o' glasses:
I can't tell off the bill o' fare the Ginrals hed inside; 110
All I know is, thet out o' doors a pair o' soles wuz fried,
An' not a hunderd miles away frum ware this child wuz
posted,

A Massachusetts citizen wuz baked an' biled an' roasted;
The on'y thing like revellin' thet ever come to me
Wuz bein' routed out o' sleep by thet darned revelee.

They say the quarrel 's settled now, fer my part I 've
some doubt on 't,
't 'll take more fish-skin than folks think to take the rile
clean out on 't,

At any rate I 'm so used up I can't do no more fightin',
The on'y chance thet 's left to me is politics or writin';
Now, ez the people 's gut to hev a milingtary man, 120
An' I aint nothin' else jest now, I've hit upon a plan;
The canidatin' line, you know, 'ould suit me to a T,
An' ef I lose, 't wunt hurt my ears to lodge another flea;
So I 'll set up ez can'idate fer any kin' o' office,

(I mean fer any thet includes good easy-cheers an'
soffies,
Fer ez tu runnin' fer a place ware work 's the time o' day,
You know thet 's wut I never did,—except the other
way;)

Ef it 's the Presidential cheer fer wich I 'd better run,
Wut two legs anywares about could keep up with my
one?

There aint no kin' o' quality in can'idates, it 's said, 130
So useful ez a wooden leg,—except a wooden head;
There's nothin' aint so poppylar—(wy, it 's a perfect sin
To think wut Mexico hez paid fer Santy Anny's pin;)—
Then I haint gut no princerples, an', sence I wuz knee-
high,

I never *did* hev any gret, ez you can testify;
I 'm a decided peace-man, tu, an' go agin the war,—
Fer now the holl on 't 's gone an' past, wut is there to
go for?

Ef, wile you 're 'lectioneerin' round, some curus chaps
should beg

To know my views o' state affairs, jest answer WOODEN
LEG!

Ef they aint settisfied with thet, an' kin' o' pry an'
doubt 140

An' ax fer suthin' deffynit, jest say ONE EYE PUT OUT!
Thet kin' o' talk I guess you 'll find 'll answer to a charm,

An' wen you 're druv tu nigh the wall, hol' up m
missin' arm;

Ef they should nose round fer a pledge, put on a vartooou
look

An' tell 'em thet's percisely wut I never gin nor—took

Then you can call me "Timbertoes,"—thet 's wut th
people likes;

Sutthin' combinin' morril truth with phrases sech e
strikes,

Some say the people 's fond o' this, or thet, or wut yo
please,—

I tell ye wut the people want is jest correct idees;
"Old Timbertoes," you see, 's a creed it 's safe to be quit
bold on, 11

There 's nothin' in 't the other side can any ways g
hold on;

It's a good tangible idee, a suthin' to embody
Thet valooable class o' men who look thru brandy
toddy;

It gives a Party Platform, tu, jest level with the min
Of all right-thinkin', honest folks thet mean to go
blind;

Then there air other good hooraws to dror on ez yo
need 'em,

Sech ez the ONE-EYED SLARTERER, the BLOODY
BIRDOFREDUM:

Them 's wut takes hold o' folks thet think, ez well e
o' the masses,

An' makes you sartin o' the aid o' good men of al
classes.

There 's one thing I 'm in doubt about; in order to b
Presidunt, 16

It's absolutely ne'ssary to be a Southern residunt;
The Constitution settles thet, an' also thet a feller
Must own a nigger o' some sort, jet black, or brown, o
yeller.

Now I haint no objections agin particklar climes,
Nor agin ownin' anythin' (except the truth sometimes)
But, ez I haint no capital, up there among ye, maybe

BIRDOFREDUM SAWIN

1848

From

Keats

This essay on Keats was written in 1854, not long after study in Europe (1851-1852) had led Lowell to new perceptions of critical standards and procedures. He begins (in the portion of the essay not here printed) with a presentation of "those essential facts which underlie the life and make the individual man," noting particularly that Keats is a poet "in whom the moral seems to have so perfectly interfused the physical man, that you might almost say he could feel sorrow with his hands."

He then launches upon the evaluation here reprinted. In considering Keats' diction, he praises the poet for his eventual achievement of "the perfect mean of diction"—the "costly plainness" which combines richness with economy of language. Then he turns to a consideration of the poet himself, and describes his nature and his influence by contrasting him with Wordsworth and Byron. The paragraph of comparison which discriminates among the three poets offers an example of Lowell's precise though sometimes complex way of drawing distinctions. Keats, he notes, was remarkable for his "penetrative and sympathetic imagination," one which caused him, like Shakespeare, "to assimilate at a touch whatever could serve his purpose"—the things of the world as well as wisdom. Thus Keats had a sort of insight which serves a poet well. In addition, he had "the shaping faculty" which made his expression accord perfectly with his thought.

The faults of Keats' poetry are obvious enough, but it should be remembered that he died at twenty-five, and that he offends by superabundance and not poverty. That he was overlanguage at first there can be no doubt, and in this was implied the possibility of falling back to the perfect mean of diction. It is only by the rich that the costly plainness, which at once satisfies the taste and the imagination, is attainable

Whether Keats was original or not, I do not think it useful to discuss until it has been settled what originality 10 is. Lord Houghton tells us that this merit [whatever it be] has been denied to Keats, because his poems take the color of the authors he happened to be reading at the time he wrote them. But men have their intellectual ancestry, and the likeness of some one of them is forever unexpectedly flashing out in the features of a descendant; it may be after a gap of several generations. In the parliament of the present every man represents a constituency of the past. It is true that Keats has the accent of the men from whom he learned to speak, but this is to make 20 originality a mere question of externals, and in this sense the author of a dictionary might bring an action of trover against every author who used his words. It is the man behind the words that gives them value, and if Shakespeare help himself to a verse or a phrase, it is with ears that have learned of him to listen that we feel the harmony of the one, and it is the mass of his intellect that makes the other weighty with meaning. Enough that we recognize in Keats that indefinable newness and

11 Lord Houghton. Richard Monckton Milnes, Lord Houghton (1809-1885), English poet and prose writer, published his *Life of Keats* in 1848. • 25 Shakespeare was regarded by Lowell as one of the peerless poets of all time. Here Lowell notes that Shakespeare could borrow a line or a phrase from a predecessor and still give the expression new values indicative of his own personality

unexpectedness which we call genius. The sunset is original every evening, though for thousands of years it has built out of the same light and vapor its visionary cities with domes and pinnacles, and its delectable mountains which night shall utterly abase and destroy.

Three men, almost contemporaneous with each other, —Wordsworth, Keats, and Byron,—were the great means of bringing back English poetry from the sandy deserts of rhetoric, and recovering for her her triple inheritance of simplicity, sensuousness, and passion. Of these, Wordsworth was the only conscious reformer, and his hostility to the existing formalism injured his earlier poems by tingeing them with something of iconoclastic extravagance. He was the deepest thinker, Keats the most essentially a poet, and Byron the most keenly intellectual of the three. Keats had the broadest mind, or at least his mind was open on more sides, and he was able to understand Wordsworth and judge Byron, equally conscious, through his artistic sense, of the greatnes-
 20 ses of the one and the many littlenesses of the other; while Wordsworth was isolated in a feeling of his prophetic character, and Byron had only an uneasy and jealous instinct of contemporary merit. The poems of Wordsworth, as he was the most individual, accordingly reflect the moods of his own nature; those of Keats, from sensitiveness of organization, the moods of his own taste and feeling, and those of Byron, who was impressible chiefly through the understanding, the intellectual and moral wants of the time in which he lived. Wordsworth has
 30 influenced most the ideas of succeeding poets; Keats, their forms, and Byron, interesting to men of imagination less for his writings than for what his writings indicate, reappears no more in poetry, but presents an ideal to youth made restless with vague desires not yet regulated by experience nor supplied with motives by the duties of life.

Keats certainly had more of the penetrative and sympathetic imagination which belongs to the poet, of that imagination which identifies itself with the momentary
 40 object of its contemplation, than any man of these later days. It is not merely that he has studied the Elizabethans and caught their turn of thought, but that he really sees things with their sovereign eye, and feels them with their electrified senses. His imagination was his bliss and bane. Was he cheerful, he "hops about the gravel with the sparrows"; was he morbid, he "would reject a Pe-

trarcal coronation,—on account of my dying-day, because women have cancers." So impressible was as to say that he "had no nature" meaning character. But he knew what the faculty was worth, and finely, "The imagination may be compared to Adam's dream: he awoke and found it truth." He had an unerring instinct for the poetic uses of things, and for him there had no other use. We are apt to talk of the *renaissance* as of a phenomenon long past, nor ever to be renewed, and to think the Greeks and Romans alone the mighty magic to work such a miracle. To me one of the most interesting aspects of Keats is that in him we have an example of the *renaissance* going on all the time under our own eyes, and that the intellectual ferment was in him kindled by a purely English leaven. He had properly no scholarship, any more than Shakespeare had, but like him he assimilated at a touch whatever could serve his purpose. His delicate senses absorbed culture at every pore. Of the self-denial to which he trained himself [unexampled in one so young] the second dream of *Hyperion* as compared with the first is a conclusive proof. And far indeed is his "Lamia" from the lawless indiscrimination of "Endymion." In his Odes he shows a sense of form and proportion which we seek vainly in almost any other English poet, and some of his sonnets (taking all qualities into consideration) are the most perfect in our language. No doubt there is something tropical and of strange overgrowth in his sudden maturity, but it was maturity nevertheless. Happy the young person who has the saving fault of exuberance, if he have the shaping faculty that sooner or later will amend it. As every young person goes through all the world-

7 Wordsworth. William Wordsworth (1770-1850) rebelled against eighteenth-century poetry in his Preface to the 1800 edition of *Lyrical Ballads*. In 1875, Lowell was to note that throughout his two later philosophical poems, "The Prelude" and "The Excursion," Wordsworth "seems striving to bind the wizard Imagination with the scarves of dry disquisition." Nevertheless, Lowell ranked him fifth among the great English poets. • 7 Byron. George Gordon Byron, Lord Byron (1788-1824), English poet, was famous for brilliant satires upon the vices of his period. • 41 the Elizabethans, authors of the period of Queen Elizabeth of England (1533-1603)—notably Shakespeare and Spenser, both of whom Keats admired greatly. • 46 Petrarchal coronation refers to Francesco Petrarca, or Petrarch (1304-1374), Italian poet. • *Hyperion*, a poem left uncompleted, though partly revised, at Keats's death in 1821. • 68 *Lamia*, a narrative poem by Keats, published in 1820. • 69 *Endymion*, an early, rather formless poem by Keats, published in 1818.

experiences, fancying them something peculiar and personal to himself, so it is with every new generation, whose youth always finds its representatives in its poets. Keats rediscovered the delight and wonder that lay enchanted in the dictionary. Wordsworth revolted at the poetic diction which he found in vogue, but his own language rarely rises above it, except when it is upborne by the thought. Keats had an instinct for fine words, which are in themselves pictures and ideas, and had more of the power of poetic expression than any modern English poet. And by poetic expression I do not mean merely a vividness in particulars, but the right feeling which heightens or subdues a passage or a whole poem to the proper tone, and gives entireness to the effect. There is a great deal more than is commonly supposed in this choice of words. Men's thoughts and opinions are in a great degree vassals of him who invents a new phrase or reapplies an old epithet. The thought or feeling a thousand times repeated becomes his at last who utters it best. This power of language is veiled in the old legends which make the invisible powers the servants of some word. As soon as we have discovered the word for our joy or sorrow we are no longer its serfs, but its lords. We reward the discoverer of an anaesthetic for the body and make him member of all the societies, but him who finds a nepenthe for the soul we elect into the small academy of the immortals.

The poems of Keats mark an epoch in English poetry; for, however often we may find traces of it in others, in them found its most unconscious expression that

reaction against the barrel-organ style which had been reigning by a kind of sleepy divine right for half a century. The lowest point was indicated when there was such an utter confounding of the common and the uncommon sense that Dr. Johnson wrote verse and Burke prose. The most profound gospel of criticism was, that nothing was good poetry that could not be translated into good prose, as if one should say that the test of sufficient moonlight was that tallow-candles could be made of it. We find Keats at first going to the other extreme, and endeavoring to extract green cucumbers from the rays of tallow; but we see also incontestable proof of the greatness and purity of his poetic gift in the constant return toward equilibrium and repose in his later poems. And it is a repose always lofty and clear-aired, like that of the eagle balanced in incommunicable sunshine. In him a vigorous understanding developed itself in equal measure with the divine faculty; thought emancipated itself from expression without becoming in turn its tyrant; and music and meaning floated together, accordant as swan and shadow, on the smooth element of his verse. Without losing its sensuousness, his poetry refined itself and grew more inward, and the sensational was elevated into the typical by the control of that finer sense which underlies the senses and is the spirit of them.

1854

35 Dr. Johnson, Samuel Johnson (1709-1785), English author, whose verse was notable for its common sense rather than any noteworthy passion • 35 Burke, Edmund Burke (1729-1797), political writer, many of whose speeches were eloquent and poetic

A Review of "The Courtship of Miles Standish and Other Poems"

Representative of a number of considerations of contemporary authors which Lowell wrote as editor of the *Atlantic Monthly*, this review appeared in the issue for January

1858. Since Lowell, when a student, had worked under Longfellow, and since he was now a neighbor and friend of the poet, he was probably predisposed in the author's favor. Nevertheless his review shows real sensitivity and perception. He states the objections to the verse form used by Longfellow and deplores the poet's unfortunate tendency to descend now and then into prose. His estimate is favorable as a whole, though, because of the narrative skill, the characterization, and the artistic feeling with which many scenes are conceived. He praises Longfellow's poem, too, for its "simple and sustained beauty." Finally, Lowell inquires into the reasons for Longfellow's wide popularity and offers an interesting explanation.

The revival of the hexameter in modern poetry is due to Johann Heinrich Voss, a man of genius, an admirable metrist, and, Schlegel's sneer to the contrary notwithstanding, hitherto the best translator of Homer. His *Odysey*, (1783,) his *Iliad*, (1791,) and his *Luise*, (1795,) were confessedly Goethe's teachers in this kind of verse. The *Hermann and Dorothea* of the latter (1798) was the first true poem written in modern hexameters. From Germany, Southey imported that and other
 10 classic metres into England, and we should be grateful to him, at least, for having given the model for Canning's "Knifegrinder." The exotic, however, again refused to take root, and for many years after we have no example of English hexameters. It was universally conceded that the temper of our language was unfriendly to them.

It remained for a man of true poetic genius to make them not only tolerated, but popular. Longfellow's translation of *The Children of the Lord's Supper* may have softened prejudice somewhat, but *Evangeline*, (1847,)
 20 though incumbered with too many descriptive irrelevancies, was so full of beauty, pathos, and melody, that it made converts by thousands to the hitherto ridiculed measure. More than this, it made Longfellow at once the most popular of contemporary English poets. Clough's *Bothie*—a poem whose singular merit has hitherto failed of the wide appreciation it deserves—followed not long after; and Kingsley's *Andromeda* is yet damp from the press

While we acknowledge that the victory thus won by
 30 *Evangeline* is a striking proof of the genius of the author, we confess that we have never been able to overcome the feeling that the new metre is a dangerous and deceitful one. It is too easy to write, and too uniform for true pleasure in reading. Its ease sometimes leads Mr. Longfellow into prose,—as in the verse

"Combed and wattled gules and all the rest of
the blazon,"—

and into a prosaic phraseology which has now and then infected his style in other metres, as where he says

"Spectral gleam their snow-white dresses,"—

40 using a word as essentially unpoetic as *surtout* or *pea-jacket*. We think one great danger of the hexameter is,

that it gradually accustoms the poet to be content with a certain regular recurrence of accented sounds, to the neglect of the poetic value of language and intensity of phrase.

But while we frankly avow our infidelity as regards the metre, we as frankly confess our admiration of the high qualities of *Miles Standish*. In construction we think it superior to *Evangeline*; the narrative is more straightforward, and the characters are defined with a firm touch. It is a poem of wonderful picturesqueness, tenderness, and simplicity, and the situations are all conceived with the truest artistic feeling. Nothing can be better to our thinking, than the picture of Standish and Alden in the opening scene, tinged as it is with a delicate humor, which the contrast between the thoughts and characters of the two heightens almost to pathos. The pictures of Priscilla spinning, and the bridal procession are also masterly. We feel charmed to see such exquisite imaginations conjured out of the little old familiar anecdote of John Alden's vicarious wooing. We are astonished, like the fisherman in the Arabian tale, that so much genius could be contained in so small and leaderless a casket. Those who cannot associate sentiment with the fair Priscilla's maiden name of Mullins may be consoled by hearing that it is only a corruption of the Huguenot Desmoulins,—as Barnum is of the Norman Vernon.

Indifferent poets comfort themselves with the notion that contemporary popularity is no test of merit, and that true poetry must always wait for a new generation to do it justice. The theory is not true in any general sense. With hardly an exception, the poetry that was ever to receive a wide appreciation has received it at once. Popularity in itself is no test of permanent literary fame, but the kind of it is and always has been a very

1 hexameter, six-foot line • 2 Johann Heinrich Voss (1781-1826), a German poet who used the hexameter in translating the works mentioned by Lowell • 5 *Luise*, Voss' most famous poem, a long idyll written in hexameter • 9 Southey, Robert Southey (1774-1843), English poet and critic • 11 Canning's "Knifegrinder," George Canning (1770-1827) was an English statesman whose "Friend of Humanity and the Knife-Grinder," published in the *Anti-Jacobin Review*, parodied Southey and his school • 24 Clough, Arthur Hugh Clough (1819-1861), English author of "The Bothie of Tober-na-Vuolich" (1848) • 27 Kingsley, Charles Kingsley (1819-1875), who wrote *Andromeda* in English hexameters

decided one. Mr. Longfellow has been greatly popular because he so greatly deserved it. He has the secret of all the great poets,—the power of expressing universal sentiments simply and naturally. A false standard of criticism has obtained of late, which brings a brick as a sample of the house, a line or two of condensed expression as a gauge of the poem. But it is only the whole poem that is a proof of the poem, and there are twenty fragmentary poets, for one who is capable of simple and sustained beauty. Of this quality Mr. Longfellow has given repeated and striking examples, and those critics are strangely mistaken who think that what he does is easy to be done, because he has the power to make it seem so. We think his chief fault is a too great tendency to moralize, or rather, a distrust of his readers, which leads him to point out the moral which he wishes to be drawn from any special poem. We wish, for example, that the last two stanzas could be cut off from *The Two Angels*, a poem which, without them, is as perfect as anything in the language.

Many of the pieces in this volume having already shone as captain jewels in Maga's carcanet, need no comment from us, and we should, perhaps, have avoided the delicate responsibility of criticizing one of our most precious contributors, had it not been that we have seen some very unfair attempts to depreciate Mr. Longfellow, and that, as it seemed to us, for qualities which stamp him as a true and original poet. The writer who appeals to more peculiar moods of mind, to more complex or more esoteric motives of emotion, may be a greater

favorite with the few, but he whose verse is in sympathy with moods that are human and not personal, with emotions that do not belong to periods in the development of individual minds, but to all men in all years, wins the gratitude and love of whoever can read the language which he makes musical with solace and aspiration. The present volume, while it will confirm Mr. Longfellow's claim to the high rank he has won among lyric poets, deserves attention also as proving him to possess that faculty of epic narration which is rarer than all others 40 in the nineteenth century. In our love of stimulants, and our numbness of taste, which craves the red pepper of a biting vocabulary, we of the present generation are apt to overlook this almost obsolete and unobtrusive quality, but we doubt if, since Chaucer, we have had an example of more purely objective narrative than in *The Courtship of Miles Standish*. Apart from its intrinsic beauty, this gives the poem a claim to higher and more thoughtful consideration; and we feel sure that posterity will confirm the verdict of the present in regard to a poet 50 whose reputation is due to no fleeting fancy, but to an instinctive recognition by the public of that which charms now and charms always,—true power and originality, without grimace and distortion; for Apollo, and not Milo, is the artistic type of strength.

1859

21 this volume, *The Courtship of Miles Standish and Other Poems*, published in September 1858 • 54 *Apollo* . . . Milo contrasts the healthful manliness of Apollo with the seductive femininity of Venus

Emerson the Lecturer

Lowell's consideration of Emerson originated as a book review, published in the *Atlantic Monthly*, of Emerson's

The Conduct of Life. As a junior at college, Lowell heard Emerson lecture; as a senior, "rusticated" in Concord for a college escapade, he met Emerson and talked with him. Quite a conservative young man at that time, Jamie Lowell had been distressed by what he considered the "radicalism" of the Concord author. A few years later, however, under the influence of his sweetheart Maria White and her philosophical friends, Lowell came to think more highly of Emerson and other Transcendentalists. The praise in this essay typifies several of Lowell's interests in his later period as critic. He is concerned a good deal with the author's power to reconcile opposites. For example, Emerson is

seen as both Yankee and mystic, his diction is both rich and homely—"homespun cloth-of-gold"; and his thought reconciles the local with the ideal—gives "ravishing glimpses of an ideal under the dry husk of our New England." Lowell is much concerned also with the discovery of the essential man in the work: "The whole life of the man is distilled in the drop of every sentence." He is interested in the structure of literary works, and he finds that, though the form of Emerson's composition is often chaotic, even at his worst the author achieves "a chaos full of shooting stars." Finally, he is eager to set forth in memorable phrases a description of the author's essential appeal and excellence.

It is a singular fact, that Mr Emerson is the most steadily attractive lecturer in America. Into that somewhat cold-waterish region adventurers of the sensational kind come down now and then with a splash, to become disregarded King Logs before the next season. But Mr. Emerson always draws. A lecturer now for something like a third of a century, one of the pioneers of the lecturing system, the charm of his voice, his manner, and his matter has never lost its power over his earlier hearers, and continually winds new ones in its enchanting meshes. What they do not fully understand they take on trust and listen, saying to themselves, as the old poet of Sir Philip Sidney,—

"A sweet, attractive kind of grace,
A full assurance given by looks,
Continual comfort in a face,
The lineaments of gospel books."

We call it a singular fact, because we Yankees are thought to be fond of the spread-eagle style, and nothing can be more remote from that than his. We are reckoned a practical folk, who would rather hear about a new air-tight stove than about Plato, yet our favorite teacher's practicality is not in the least of the Poor Richard variety. If he have any Buncombe constituency, it is that unrealized commonwealth of philosophers which Plotinus proposed to establish; and if he were to make an almanac, his directions to farmers would be something like this. "OCTOBER: *Indian Summer*; now is the time to get in your early Vedas." What, then, is his secret? Is it not

that he out-Yankees us all? that his range includes us that he is equally at home with the potato-disease, original sin, with pegging shoes and the Over-soul? that as we try all trades, so has he tried all cultures? and above all, that his mysticism gives us a counterpoise to super-practicality?

There is no man living to whom, as a writer, so many of us feel and thankfully acknowledge so great an indebtedness for ennobling impulses,—none whom many cannot abide. What does he mean? ask these I. Where is his system? What is the use of it all? What have we to do with Brahma? I do not propose to write an essay on Emerson at this time. I will only say that one may find grandeur and consolation in a starlit night without caring to ask what it means save grandeur and consolation; one may like Montaigne, as some ten generations before us have done, without thinking him systematic as some more eminently tedious (or shall we say tediously eminent?) authors; one may think row as good in their way as cabbages, though the latter would make a better show in the witness-box if cross-examined as to their usefulness, and as for Brahma, why, he can take care of himself, and won't bite us at any rate.

The bother with Mr. Emerson is, that, though he writes in prose, he is essentially a poet. If you undertake to paraphrase what he says, and to reduce it to words, one syllable for infant minds, you will make as sad work of it as the good monk with his analysis of Homer in the *Epistolæ Obscurorum Virorum*. We look upon him as one of the few men of genius whom our age has produced, and there needs no better proof of it than his masculine faculty of fecundating other minds. Search for his eloquence in his books and you will perchance miss it

5 King Logs. Æsop tells in a fable how the frogs prayed to Jupiter for a king and accepted the ruler he sent until they found that the ruler was merely a log. • 12 old poet, Matthew Roydon (1580-1622), whose "Elegie" paid tribute to Sidney. • 13 Sir Philip Sidney (1554-1586) English poet and novelist. • 24 Buncombe derived from the name of a county in North Carolina famed in legend for empty speechmaking. Sometimes it is spelled "bunkum", it is often abbreviated to "bunk". • 25 Plotinus. See note, p. 835. • 29 Vedas, the ancient sacred literature of the Hindus. The phrase which Lowell fancifully creates combines the practical directions of the almanac with mysticism. • 4 Brahma, the first member of the Hindu trinity. See Emerson's poem "Brahma," p. 936. • 45 Montaigne. See note, p. 835. • 58 *Epistolæ Obscurorum Virorum*, Letters of Obscure Men, a book by some anonymous monk which appeared in the sixteenth century.

but meanwhile you will find that it has kindled all your thoughts. For choice and pith of language he belongs to a better age than ours, and might rub shoulders with Fuller and Browne,—though he does use that abominable word *reliable*. His eye for a fine, telling phrase that will carry true is like that of a backwoodsman for a rifle; and he will dredge you up a choice word from the mud of Cotton Mather himself. A diction at once so rich and so homely as his I know not where to match in these days of writing by the page; it is like homespun cloth-of-gold. The many cannot miss his meaning, and only the few can find it. It is the open secret of all true genius. It is wholesome to angle in those profound pools, though one be rewarded with nothing more than the leap of a fish that flashes his freckled side in the sun, and as suddenly absconds in the dark and dreamy waters again. There is keen excitement, though there be no ponderable acquisition. If we carry nothing home in our baskets, there is ample gain in dilated lungs and stimulated blood. What does he mean, quotha? He means inspiring hints, a divining-rod to your deeper nature. No doubt Emerson, like all original men, has his peculiar audience, and yet I know none that can hold a promiscuous crowd in pleased attention so long as he. As in all original men, there is something to every palate. "Would you know," says Goethe, "the ripest cherries? Ask the boys and the blackbirds."

The announcement that such a pleasure as a new course of lectures by him is coming, to people as old as I am, is something like those forebodings of spring that prepare us every year for a familiar novelty, none the less novel, when it arrives, because it is familiar. We know perfectly well what we are to expect from Mr. Emerson, and yet that he says always penetrates and stirs us, as is apt to be the case with genius, in a very unlooked-for fashion. Perhaps genius is one of the few things which we gladly allow to repeat itself,—one of the few that multiply rather than weaken the force of their impression by repetition. Perhaps some of us hear more than the mere words, are moved by something deeper than the thoughts. If it be so, we are quite right, for it is thirty years and more of "plain living and high thinking" that speak to us in this altogether unique lay-preacher. We have learned in the beneficence of this varied culture, this fearless impartiality in criticism and speculation, this unfeigned sincerity, this sweetness of nature which rather ennobles than cloy, for a generation long. If ever there

was a standing testimonial to the cumulative power and value of Character (and we need it sadly in these days), we have it in this gracious and dignified presence. What an antiseptic is a pure life! At sixty-five (or two 50 years beyond his grand climacteric, as he would prefer to call it) he has that privilege of soul which abolishes the calendar, and presents him to us always the unwasted contemporary of his own prime. I do not know if he seem old to his younger hearers, but we who have known him so long wonder at the tenacity with which he maintains himself even in the outposts of youth. I suppose it is not the Emerson of 1868 to whom we listen. For us the whole life of the man is distilled in the clear drop of every sentence, and behind each word we divine the 60 force of a noble character, the weight of a large capital of thinking and being. We do not go to hear what Emerson says so much as to hear Emerson. Not that we perceive any falling off in anything that ever was essential to the charm of Mr. Emerson's peculiar style of thought or phrase. The first lecture, to be sure, was more disjointed even than common. It was as if, after vainly trying to get his paragraphs into sequence and order, he had at last tried the desperate expedient of *shuffling* them. It was chaos come again, but it was a chaos full of shoot- 70 ing-stars, a jumble of creative forces. The second lecture, on *Criticism and Poetry*, was quite up to the level of old times, full of that power of strangely subtle association whose indirect approaches startle the mind into almost painful attention, of those flashes of mutual understanding between speaker and hearer that are gone ere one can say it lightens. The vice of Emerson's criticism seems to be, that while no man is so sensitive to what is poetical, few men are less sensible than he of what makes a poem. He values the solid meaning of thought above the subtler 80 meaning of style. He would prefer Donne, I suspect, to Spenser, and sometimes mistakes the queer for the original. To be young is surely the best, if the most precarious,

4 Fuller, Thomas Fuller (1608-1661), English essayist noted for his style • 4 Browne, Sir Thomas Browne (1605-1682), English essayist and philosopher, famed for his mannered prose • 25 Goethe, Johann Wolfgang von Goethe (1749-1832), German author and philosopher whose writing greatly influenced German literature • 41 plain . . . thinking. The phrase, used in Emerson's essay "Domestic Life," is from Wordsworth's sonnet XIII "plain living and high thinking are no more" • 81 Donne, John Donne (1573-1631), English poet and theologian, whose poetry is complex in thought • 82 Spenser, Edmund Spenser (1552?-1599), one of the most melodious of the Elizabethan poets

gift of life; yet there are some of us who would hardly consent to be young again, if it were at the cost of our recollection of Mr. Emerson's first lectures during the consulate of Van Buren. We used to walk in from the country to the Masonic Temple (I think it was), through the crisp winter night, and listen to that thrilling voice of his, so charged with subtle meaning and subtle music, as shipwrecked men on a raft to the hail of a ship that came with unhoped-for food and rescue. Cynics might say what they liked. Did our own imaginations transfigure dry remainder-biscuit into ambrosia? At any rate, he brought us *life*, which, on the whole, is no bad thing. Was it all transcendentalism? magic-lantern pictures on mist? As you will. Those, then, were just what we wanted. But it was not so. The delight and the benefit were that he put us in communication with a larger style of thought, sharpened our wits with a more pungent phrase, gave us ravishing glimpses of an ideal under the dry husk of our New England, made us conscious of the supreme and everlasting originality of whatever bit of soul might be in any of us, freed us, in short, from the stocks of prose in which we had sat so long that we had grown wellnigh contented in our cramps. And who that saw the audience will ever forget it, where every one still capable of fire, or longing to renew in them the half-forgotten sense of it, was gathered? Those faces, young and old, a gleam with pale intellectual light, eager with pleased attention, flash upon me once more from the deep recesses of the years with an exquisite pathos.

Ah, beautiful young eyes, brimming with love and hope, wholly vanished now in that other world we call the Past, or peering doubtfully through the pensive gloaming of memory, your light impoverishes these cheaper days! I hear again that rustle of sensation, as they turned to exchange glances over some pithier thought, some keener flash of that humor which always played about the horizon of his mind like heat-lightning, and it seems now like the sad whisper of the autumn leaves that are whirling around me. But would my picture be complete if I forgot that ample and vegetate countenance of Mr. R——of W——,—how, from its regular post at the corner of the front bench, it turned in ruddy triumph to the profaner audience as if he were the inexplicably appointed fugleman of appreciation? I was reminded of him by those hearty cherubs in Titian's Assumption that look at you as who should say, "Did you ever see a

Madonna like *that*? Did you ever behold one hundred and fifty pounds of womanhood mount heavenward fore like a rocket?"

To some of us that long past experience remains the most marvellous and fruitful we have ever had. Emerson awakened us, saved us from the body of death. It is the sound of the trumpet that the young soul longs for, careless what breath may fill it. Sidney heard it in the ballad of *Chevy Chase*, and we in Emerson. Nor did it blow retreat, but called to us with assurance of victory. Did they say he was disconnected? Were the stars, that seemed larger to our eyes, still kept with that excitement, as we walked homeward with prouder stride over the creaking snow. And were they not knit together by a higher logic than our mere senses could master? Were we enthusiasts? I hope and believe we were, and am thankful to the man who made worth something for once in our lives. If asked what was left? what we carried home? we should not have been careful for an answer. It would have been enough if we had said that something beautiful had passed that way. Or we might have asked in return what one brought away from a symphony of Beethoven? Enough that it had set that ferment of wholesome discontent at work in us. There is one, at least, of those old hearers, so many of whom are now in the fruition of that intellectual beauty of which Emerson gave them both the deed and the foretaste, who will always love to repeat

"Che in la mente m'è fitta, ed or m' accuora
La cara e buona immagine paterna
Di voi, quando nel mondo ad ora ad ora
M' insegnavate come l'uom s' eterna."

I am unconsciously thinking, as I write, of the third lecture of the present course, in which Mr. Emerson gave some delightful reminiscences of the intellect

4 Van Buren, Martin Van Buren (1782-1862), eighth President (1841) of the United States • 45 Titian, Tiziano Vecellio (1477-1558) Venetian painter of religious scenes "The Assumption" is a painting which shows Mary ascending to heaven while rejoicing angels look on • 55 ballad of Chevy Chase, an old English ballad Sidney said of this old song, chanted by some blind fiddler, caused him to feel heart more moved "than with a trumpet" • 75 Che . . . eternal Dante's "Inferno," Bk. XV, ll. 82-85, thus translated by Longfellow

For in my mind is fixed, and touches now
My heart, the dear and good paternal image
Of you, when in the world from hour to hour
You taught me how a man becomes eternal.

influences in whose movement he had shared. It was like hearing Goethe read some passages of the *Wahrheit aus seinem Leben*. Not that there was not a little *Dichtung*, too, here and there, as the lecturer built up so lofty a pedestal under certain figures as to lift them into a prominence of obscurity, and seem to masthead them there. Everybody was asking his neighbor who this or that recondite great man was, in the faint hope that somebody might once have heard of him. There are 10 those who call Mr. Emerson cold. Let them revise their judgment in presence of this loyalty of his that can keep warm for half a century, that never forgets a friendship, or fails to pay even a fancied obligation to the uttermost farthing. This substantiation of shadows was but incidental, and pleasantly characteristic of the man to those who know and love him. The greater part of the lecture was devoted to reminiscences of things substantial in themselves. He spoke of Everett, fresh from Greece and Germany, of Channing, of the translations of Margaret 15 Fuller, Ripley, and Dwight, of the Dial and Brook Farm. To what he said of the latter an undertone of good-humored irony gave special zest. But what every one of his hearers felt was that the protagonist in the drama was left out. The lecturer was no Æneas to babble the *quorum magna pars fui*, and, as one of his listeners, I cannot help wishing to say how each of them was commenting the story as it went along, and filling up the necessary gaps in it from his own private store of memories. His younger hearers could not know how much they owed to the benign impersonality, the quiet scorn of everything ignoble, the never sated hunger of self-culture, that were personified in the man before them. But the older knew how much the country's intellectual emancipation was due to the stimulus of his teaching and example, how constantly he had kept burning the beacon of an ideal life above our lower region of turmoil. To him more than to all other causes together did the young martyrs of our civil war owe the sustaining strength of thoughtful heroism that is so touching in every record of their lives. Those who are grateful to Mr. Emerson, as many of us are, for what they feel to be most valuable in their culture, or perhaps should say their impulse, are grateful not so much for any direct teachings of his as for that inspiring lift which only genius can give, and without which all doctrine is chaff.

This was something like the *caret* which some of us older boys wished to fill up on the margin of the master's lecture. Few men have been so much to so many, and through so large a range of aptitudes and temperaments, and this simply because all of us value manhood beyond any or all other qualities of character. We may suspect in him, here and there, a certain thinness and vagueness of quality, but let the waters go over him as they list, this masculine fibre of his will keep its lively color and its toughness of texture. I have heard some great speakers and some accomplished orators, but never any that so moved and persuaded men as he. There is a kind of undertow in that rich baritone of his that sweeps our minds from their foothold into deeper waters with a 6 drift we cannot and would not resist. And how artfully (for Emerson is a long-studied artist in these things) does the deliberate utterance, that seems waiting for the fit word, appear to admit us partners in the labor of thought, and make us feel as if the glance of humor were a sudden suggestion, as if the perfect phrase lying written there on the desk were as unexpected to him as to us! In that closely-filed speech of his at the Burns centenary dinner every word seemed to have just dropped down to him from the clouds. He looked far away over 70 the heads of his hearers, with a vague kind of expectation, as into some private heaven of invention, and the winged period came at last obedient to his spell. "My dainty Ariel!" he seemed murmuring to himself as he cast down his eyes as if in deprecation of the frenzy of approval, and caught another sentence from the Sibyl.

2 *Wahrheit . . . Leben*, Goethe's autobiography, *Aus meinem Leben. Dichtung und Wahrheit* • 4 *Dichtung*, poetry • 18 Everett, Edward Everett (1794-1865), professor of Greek at Harvard (1819-1826) • 19 Channing, William Ellery Channing (1780-1842), a leading advocate of Unitarianism (See p. 416) • 19 Margaret Fuller (1810-1850), a New England Transcendentalist, friend of the leading authors of ante-bellum New England, editor of *The Dial* (1840-1842) • 20 Ripley, George Ripley (1802-1880), Massachusetts religious leader and reformer, associated with the leading intellectuals of the period • 20 Dwight, John S. Dwight See note, p. 838 • 20 Brook Farm, a cooperative community operated by the Transcendentalists and kindred spirits near West Roxbury, Massachusetts (1841-1847) • 24 Æneas, son of Venus and Anchises, a leader on the side of the Trojans in the Trojan war • 25 *quorum . . . fui*, events in which I had a great part (*Æneid*, Bk II, l. 6) • 68 Burns, Robert Burns (1759-1796), Scottish poet Emerson had given the address on January 25, 1859 • 74 Ariel, in Shakespeare's *The Tempest*, is an airy spirit who changed shape at the will of his master, Prospero • 76 Sibylline leaves, prophetic utterances

line leaves that lay before him ambushed behind a dish of fruit and seen only by nearest neighbors. Every sentence brought down the house, as I never saw one brought down before,—and it is not so easy to hit Scotsmen with a sentiment that has no hint of native brogue in it. I watched, for it was an interesting study, how the quick sympathy ran flashing from face to face, down the long tables, like an electric spark thrilling as it went, and then exploded in a thunder of plaudits. I watched
 10 till tables and faces vanished, for I, too, found myself caught up in the common enthusiasm, and my excited fancy set me under the *bema* listening to him who fulminated over Greece. I can never help applying to him what Ben Jonson said of Bacon: "There happened in my time one noble speaker, who was full of gravity in his speaking. His language was nobly censorious. No man ever spake more neatly, more pressly, more weightily, or suffered less emptiness, less idleness, in what he uttered. No member of his speech but consisted of his own

graces. His hearers could not cough, or look aside from him, without loss. He commanded where he spoke. Those who heard him while their natures were yet plastic, and their mental nerves trembled under the slightest breath of divine air, will never cease to feel and say

"Was never eye did see that face.

Was never ear did hear that tongue.

Was never mind did mind his grace.

That ever thought the travail long,

But eyes, and ears, and every thought,

Were with his sweet perfections caught."

186

12 *bema*, rostrum • 14 Ben Jonson (1573?-1637), English dramatist and poet • 14 Bacon, Francis Bacon (1561-1626), English philosopher and essayist • 26 *Was caught*, another quotation from Roydon "Elegie

From • The Biglow Papers, Second Series

The Courtin'

This most famous of the *Biglow Papers* appeared in at least three versions. In the first, written to fill in a page of the book version of the first series, it contained what are now stanzas 2, 5, 4, 6, 14, and 15, in that order. In the second, these verses were supplemented with stanzas 16, 17, 19, 20, 21, and 24. Later, said Lowell, "I added other verses, into some of which I infused a little more sentiment in a homely way, and after a fashion completed the poem by sketching in the characters and making a connected story. Most likely I have spoiled it." The version below is the third.

The illustrations which so admirably catch the spirit of

the poem—one of Lowell's most graceful and amusing achievements in Yankee dialect—were drawn by the artist Hoppin and were reproduced with version two of the poem in *Harper's Weekly* in 1858.

God makes sech nights, all wh're an' still

Fur 'z you can look or listen,

Moonshine an' snow on field an' hill,

All silence an' all glisten.

Zekle crep' up quite unbeknown

An' peeked in thru' the winder,

An' there sot Huld' all alone,

'ith no one nigh to hender.

A fireplace filled the room's one side

With half a cord o' wood in—

There warn't no stoves (tell comfort died)

To bake ye to a puddin'.

The wa'nut logs shot sparkles out

Towards the pootiest, bless her.

"She beered a foot, an' knowed it tr"

An' leetle flames danced all about
The chiny on the dresser.

Agin the chimbley crook-necks hung,
An' in amongst 'em rusted
The ole queen's-arm ther gran'ther Young
Ferched back from Concord busted.

The very room, coz she was in,
Seemed warm from floor to ceilin',
An' she looked full ez rosy agin
Ez the apples she was peelin'.

'Twas kin' o' kingdom-come to look
On sech a blessed cretur,
A dogrose blushin' to a brook
Ain't modester nor sweeter.

He was six foot o' man, A-1,
Clear grit an' human natur',
None couldn't quicker pitch a ton
Nor dror a furrer straighter.

He'd sparked it with full twenty gals,
Hed squired 'em, danced 'em, druv 'em,

Fust this one, an' then ther, by spells—
All is, he couldn't love 'em

But long o' her his veins 'ould run
All crinkly like curled maple,
The side she breshed felt full o' sun
Ez a south slope in Ap'il

She thought no v'ice hed sech a swing
Ez hisn in the choir,
My! when he made Ole Hunderd ring,
She *knowed* the Lord was nigher

An' she'd blush scarlit, right in prayer,
When her new meetin'-bunnet
Felt somehow thru' its crown a pair
O' blue eyes sot upun it

Thet night, I tell ye, she looked *some!*
She seemed to've gut a new soul.

1. crook-necks, gourds • 19 queen's-arm, musket • 43 Ole Hunderd,
Old Hundred See note, p. 526

"'You want to see my Pa, I s'pose?'
'Wal no I come davignin'.'"

"An' . . . Wal, he up an' kist her"

For she felt sartin-sure he'd come,
Down to her very shoe-sole.

She heered a foot, an' knowed it tu,
A-raspin' on the scraper,—
All ways to once her feelin's flew
Like sparks in burnt-up paper

He kin' o' l'itered on the mat
Some doubtfe o' the sekle,
His heart kep' goin' pity-pat
But hern went pity Zekle.

60

An' yet she gin her cheer a jerk
Ez though she wished him funder,
An' on her apples kep' to work,
Parin' away like murder.

"You want to see my Pa, I s'pose?"
"Wal. . . . no. . . . I come dasignin' "—
"To see my Ma? She's sprinklin' clo'es
Agin to-morrer's i'nin'."

To say why gals acts so or so,
Or don't, 'ould be presumin';

860 Lowell

Mebby to mean *yes* an' say *no*
Comes nateral to women

He stood a spell on one foot fust,
Then stood a spell on t'other,
An' on which one he felt the wust
He couldn't ha' told ye nuther.

Says he, "I'd better call agin";
Says she, "Think likely, Mister"
Ther last word pricked him like a pin,
An'. . . Wal, he up an' kist her.

80

When Ma bimeby upon 'em slips,
Huldy sot pale ez ashes,
All kin' o' smily roun' the lips
An' teary roun' the lashes.

For she was jes' the quiet kind
Whose naturs never vary,
Like streams that keep a summet mind
Snowhid in Jenooary

The blood clost roun' her heart felt glued
Too tight for all expressin'.
Tell mother see how metters stood,
An' gin 'em both her blessin'

90

Then her red come back like the tide
Down to the Bay o' Fundy,
An' all I know is they was cried
In meetin' come nex' Sunday.

1861

Sunthin' in the Pastoral Line

Parson Wilbur, in his introductory letter, asserts that the Puritans "showed remarkable practical sagacity as statesmen and founders." Hosea's poem, after a brilliant series of descriptive passages about the New England scene,

70

93 like the tide alludes to the huge tide in the Bay of Fundy

tells of a dream In this dream he is visited by "a Pilgrim Father," his ancestor, who advises him to battle against the injustice of slavery as the Puritans of old had battled against King Charles I.

To the Editors of the Atlantic Monthly

JAALAM, 17 May, 1862

Gentlemen,—At the special request of Mr. Biglow, I intended to inclose, together with his own contribution, (into which, at my suggestion, he has thrown a little more of pastoral sentiment than usual,) some passages from my sermon on the day of the National Fast, from the text, "Remember them that are in bonds, as bound with them," *Heb. xiii. 3*. But I have not leisure sufficient at present for the copying of them, even were I altogether satisfied with the production as it stands I should prefer, I confess, to contribute the entire discourse to the pages of your respectable miscellany, if it should be found acceptable upon perusal, especially as I find the difficulty in selection of greater magnitude than I had anticipated. What passes without challenge in the fervour of oral delivery, cannot always stand the colder criticism of the closet. I am not so great an enemy of Eloquence as my friend Mr. Biglow would appear to be from some passages in his contribution for the current month I would not, indeed, hastily suspect him of overtly glancing at myself in his somewhat caustick animadversions, albeit some of the phrases he girds at are not entire strangers to my lips I am a more hearty admirer of the Puritans than seems now to be the fashion, and believe that, if they Hebraized a little too much in their speech, they showed remarkable practical sagacity as statesmen and founders. But such phenomena as Puritanism are the results rather of great religious than of merely social convulsions, and do not long survive them as soon as an earnest conviction has cooled into a phrase, as work is over, and the best that can be done with it is to bury it. *Ite, missa est*. I am inclined to agree with Mr. Biglow that we cannot settle the great political questions which are now presenting themselves to the nation by the opinions of Jeremiah or Ezekiel as to the rights and duties of the Jews in their time, nor do I believe that an entire community with their feelings and

views would be practicable or even agreeable at the present day. At the same time I could wish that their habit of subordinating the actual to the moral, the flesh to the spirit, and this world to the other, were more common They had found out, at least, the great military secret that soul weighs more than body.—But I am suddenly called to a sick-bed in the household of a valued parishioner

With esteem and respect,

Your obedient servant,

HOMER WILBUR

Once git a smell o' musk into a draw,
An' it clings hold like precedents in law:
Your gra'ma'am put it there,—when, goodness knows,—
To jes' this-worldify her Sunday-clo'es;
But the old chist wun't sarve her gran'son's wife,
(For, 'thout new funnitoo, wut good in life?)
An' so ole clawfoot, from the precinks dread
O' the spare chamber, slinks into the shed,
Where, dim with dust, it fust or last subsides
To holdin' seeds an' fifty things besides;
But better days stick fast in heart an' husk,
An' all you keep in 't gits a scent o' musk.

10

Jes' so with poets wut they've airly read
Gits kind o' worked into their heart an' head,
So 's 't they can't seem to write but jest on sheers
With furrin countries or played-out ideers,
Nor hev a feelin', ef it doos n't smack
O' wut some critter chose to feel 'way back
This makes 'em talk o' daisies, larks, an' things,
Ez though we 'd nothin' here that blows an' sings,—
(Why, I 'd give more for one live bobolink
Than a square mile o' larks in printer's ink,)—
This makes 'em think our fust o' May is May,
Which 't ain't, for all the almanicks can say.

20

O little ciry-gals, don't never go it
Blind on the word o' noospaper or poet!
They 're apt to puff, an' May-day seldom looks
Up in the country ez it doos in books;
They're no more like than hornets'-nests an' hives,
Or printed sarmons be to holy lives.

30

I, with my trousers perched on cowhide boots,
 Tuggin' my foundered feet out by the roots,
 Hev seen ye come to fling on April's hearse
 Your muslin nosegays from the milliner's,
 Puzzlin' to find dry ground your queen to choose,
 An' dance your throats sore in morocker shoes.
 I've seen ye an' felt proud, thet, come wut would.
 Our Pilgrim stock wus pethed with hardihood
 Pleasure doos make us Yankees kind o' winch,
 Ez though 't wuz sunthin' paid for by the inch;
 But yit we du contrive to worry thru,
 Ef Dooty tells us thet the thing's to du,
 An' kerry a hollerday, ef we set out,
 Ez stiddily ez though 't wuz a redoubt.

I, country-born an' bred, know where to find
 Some blooms thet make the season suit the mind,
 An' seem to metch the doubtrin' blue-bird's notes,—
 Half-vent'rin' liverworts in furry coats,
 Bloodroots, whose rolled-up leaves ef you oncurl,
 Each on 'em 's cradle to a baby-pearl,—
 But these are jes' Spring's pickets; sure ez sin,
 The rebble frosts 'll try to drive 'em in;
 For half our May 's so awfully like May n't,
 't would rile a Shaker or an evrige saint;
 Though I own up I like our back'ard springs
 Thet kind o' haggle with their greens an' things,
 An' when you 'most give up, 'thout more words
 Toss the fields full o' blossoms, leaves, an' birds—
 Thet 's Northun natur', slow an' apt to doubt,
 But when it *doos* git stirred, ther' 's no gin-out!

Fust come the blackbirds clatt'rin' in tall trees,
 An' settlin' things in windy Congresses,—
 Queer politicians, though, for I 'll be skinned
 Ef all on 'em don't head against the wind
 'fore long the trees begin to show belief,—
 The maple crimsons to a coral-reef.
 Then saffern swarms swing off from all the willers
 So plump they look like yaller caterpillars,
 Then gray hossches'nuts leetle hands unfold
 Softer 'n a baby's be at three days old
 Thet 's robin-redbreast's almanick, he knows
 Thet arter this ther' 's only blossom-snows,
 So, choosin' out a handy crotch an' spouse,
 He goes to plast'rin' his adobe house.

Then seems to come a hitch,—things lag behind,
 Till some fine mornin' Spring makes up her mind,
 An' ez, when snow-swelled rivers cresh their dams
 Heaped-up with ice thet dovetails in an' jams,
 A leak comes spirtin' thru some pin-hole cleft,
 Grows stronger, fercer, tears out right an' left,
 Then all the waters bow themselves an' come,
 Suddin, in one gret slope o' shedderin' foam,
 Jes' so our Spring gits everythin' in tune
 An' gives one leap from Aperl into June
 Then all comes crowdin', afore you think,
 Young oak-leaves mist the side-hill woods with pin
 The catbird in the laylock-bush is loud;
 The orchards turn to heaps o' rosy cloud,
 Red-cedars blossom tu, though few folks know it,
 An' look all dipt in sunshine like a poet;
 The lime-trees pile their solid stacks o' shade
 An' drows'ly simmer with the bees' sweet trade,
 In ellum-shrouds the flashin' hangbird clings
 An' for the summer vy'ge his hammock slings;
 All down the loose-walled lanes in archin' bowers
 The barb'ry droops its strings o' golden flowers,
 Whose shrinkin' hearts the school-gals love to try
 With pins,—they 'll worry yourn so, boys, bimeby!
 But I don't love your cat'logue style,—do you?—
 Ez ef to sell off Natur' by vendoo;
 One word with blood in 't 's twice ez good ez two:
 'nuff sed, June's bridesman, poet o' the year,
 Gladness on wings, the bobolink, is here;
 Half-hid in tip-top apple-blossoms he swings,
 Or climbs aginst the breeze with quiverin' wings,
 Or, givin' way to 't in a mock despair,
 Runs down, a brook o' laughter, thru the air.

I ollus feel the sap start in my veins
 In Spring, with curus heats an' prickly pains,
 Thet drive me, when I git a chance, to walk
 Off by myself to hev a privit talk
 With a queer critter thet can't seem to 'gree
 Along o' me like most folks,—Mister Me.
 Ther' 's times when I'm unsoshle ez a stone,
 An' sort o' suffercate to be alone,—
 I'm crowded jes' to think thet folks are nigh,
 An' can't bear nothin' closer than the sky;
 Now the wind 's full ez shifty in the mind
 Ez wut it is ou'-doors, ef I ain't blind,

An' sometimes, in the fairest sou'west weather,
 My innard vane pints east for weeks together,
 My natur' gits all goose-flesh, an' my sins
 Come drizzlin' on my conscience sharp ez pins:
 Wal, et sech times I jes' slip out o' sight
 An' take it out in a fair stan'-up fight
 With the one cuss I can't lay on the shelf,
 The crook'dest stick in all the heap,—Myself.

'T wuz so las' Sabbath arter meetin'-time:
 Findin' my feelin's would n't noways rhyme
 With nobody's, but off the hendle flew
 An' took things from an east-wind pint o' view,
 I started off to lose me in the hills
 Where the pines be, up back o' 'Siah's Mills.
 Pines, ef you 're blue, are the best friends I know,
 They mope an' sigh an' sheer your feelin's so,—
 They hesh the ground beneath so, tu, I swan,
 You half-forgit you 've gut a body on
 Ther' 's a small school'us' there where four roads meet,
 The door-steps hollered out by little feet.
 An' side-posts carved with names whose owners grew 140
 To gret men, some on 'em, an' deacons, tu,
 t ain't used no longer, coz the town hez gut
 A high-school, where they teach the Lord knows wut.
 Three-story larnin' 's pop'lar now; I guess
 We thriv' ez wal on jes' two stories less,
 For it strikes me ther' 's sech a thing ez sinnin'
 by overloadin' children's underpinnin'
 Wal, here it wuz I larned my A B C,
 An' it 's a kind o' favorite spot with me

We're curus critters. Now ain't jes' the minute
 het ever fits us easy while we're in it;
 ong ez 't wuz futur', 't would be perfect bliss,—
 oon ez it's past, *thet* time's wuth ten o' this;
 n' yit there ain't a man het need be told
 het Now 's the only bird lays eggs o' gold.
 knee-high lad, I used to plot an' plan
 n' think 't wuz life's cap-sheaf to be a man;
 ow, gittin' gray, there's nothin' I enjoy
 ke dreamin' back along into a boy:
 the ole school'us' is a place I choose
 fore all others, ef I want to muse;
 set down where I used to set, an' git
 y boyhood back, an' better things with it,—

120 Faith, Hope, an' sunthin', ef it is n't Cherrity,
 It's want o' guile, an' thet 's ez gret a rerrity,—
 While Fancy's cushin', free to Prince and Clown,
 Makes the hard bench ez soft ez milkweed-down.
 Now, 'fore I knowed, thet Sabbath arternoon
 When I sot out to tramp myself in tune,
 I found me in the school'us' on my seat,
 Drummin' the march to No-wheres with my feet. 170
 Thinkin' o' nothin', I've heerd ole folks say
 Is a hard kind o' dooty in its way.
 It 's thinkin' everythin' you ever knew,
 Or ever hearn, to make your feelin's blue.
 I sot there tryin' thet on for a spell
 I thought o' the Rebellion, then o' Hell,
 Which some folks tell ye now is jest a metterfor
 (A the'ry, p'raps, it wun't *feel* none the better for),
 I thought o' Reconstruction, wut we 'd win 180
 Patchin' our patent self-blow-up agin
 I thought ef this 'ere milkin' o' the wits,
 So much a month, warn't givin' Natur' fits,—
 Ef folks warn't druv, findin' their own milk fail,
 To work the cow thet hez an iron tail,
 An' ef idees 'thout ripenin' in the pan
 Would send up cream to humor ary man
 From this to thet I let my worryin' creep,
 Till finally I must ha' fell asleep

Our lives in sleep are some like streams thet glide 190
 twixt flesh an' sperrit boundin' on each side,
 Where both shores' shadders kind o' mix an' mingle
 In sunthin' thet ain't jes' like either single,
 An' when you cast off moorin's from To-day,
 An' down towards To-morrer drift away,
 The imiges thet tingle on the stream
 Make a new upside-down'ard world o' dream:
 Sometimes they seem like sunrise-streaks an' warnin's
 O' wut 'll be in Heaven on Sabbath-mornin's,
 An', mixed right in ez ef jest out o' spite, 200
 Sunthin' thet says your supper ain't gone right.
 I'm gret on dreams, an' often when I wake,
 I've lived so much it makes my mem'ry ache,
 An' can't skurce take a cat-nap in my cheer
 'thout hevin' 'em, some good, some bad, all queer.

Now I wuz settin' where I 'd ben, it seemed,
 An' ain't sure yit whether I r'ally dreamed,

Nor, ef I did, how long I might ha' slep',
 When I hearn some un stompin' up the step,
 An' lookin' 'round, ef two an' two make four, 210
 I see a Pilgrim Father in the door.
 He wore a steeple-hat, tall boots, an' spurs
 With rowels to 'em big ez ches'nut-burrs,
 An' his gret sword behind him sloped away
 Long 'z a man's speech thet dunno wut to say —
 "Ef your name 's Biglow, an' your given-name
 Hosee," sez he, "it 's arter you I came,
 I 'm your gret-gran'ther multiplied by three." —
 "My *wut*?" sez I. — "Your gret-gret-gret," sez he:
 "You would n't ha' never ben here but for me 220
 Two hundred an' three year ago this May
 The ship I come in sailed up Boston Bay;
 I 'd been a cunnle in our Civil War, —
 But wut on airth hev *you* gut up one for?
 Coz we du things in England, 't ain't for you
 To git a notion you can du 'em tu:
 I 'm told you write in public prints. ef true,
 It 's nateral you should know a thing or two." —
 "Thet air 's an argymunt I can't endorse, —
 't would prove, coz you wear spurs, you kep' a horse 230
 For brains," sez I, "wutever you may think,
 Ain't boun' to cash the draf's o' pen-an'-ink, —
 Though mos' folks write ez ef they hoped jes' quickenin'
 The churn would argoo skim-milk into thickenin',
 But skim-milk ain't a thing to change its view
 O' wut it's meant for more'n a smoky flue
 But du pray tell me, 'fore we furdur go,
 How in all Natur' did you come to know
 'bout our affairs," sez I, "in Kingdom-Come?" —
 "Wal, I worked round at sperrit-rappin' some, 240
 An' danced the tables till their legs wuz gone,
 In hopes o' larnin' wut wuz goin' on,"
 Sez he, "but mejums lie so like all-split
 Thet I concluded it wuz best to quit.
 But, come now, ef you wun't confess to knowin'.
 You 've some conjectures how the thing's a-goin'." —
 "Gran'ther," sez I, "a vane warnt never known
 Nor asked to hev a jedgment of its own;
 An' yit, ef 't ain't gut rusty in the jints,
 It 's safe to trust its say on certin pints 250
 It knows the wind's opinions to a T,
 An' the wind settles wut the weather 'll be."
 "I never thought a scion of our stock

Could grow the wood to make a weather-cock;
 When I wuz younger 'n you, skurce more 'n a shave;
 No airthly wind," sez he, "could make me waver!"
 (Ez he said this, he clinched his jaw an' forehead,
 Hitchin' his belt to bring his sword-hilt forrard.) —
 'Jes so it wuz with me," sez I, "I swow,
 When I wuz younger 'n wut you see me now, —
 Nothin' from Adam's fall to Huldys bonnet,
 Thet I warn't full-cocked with my jedgment on it,
 But now I 'm gittin' on in life, I find
 It 's a sight harder to make up my mind, —
 Nor I don't often try tu, when events
 Will du it for me free of all expense
 The moral question 's ollus plain enough, —
 It 's jes' the human-natur' side thet 's tough;
 Wut 's best to think may n't puzzle me nor you, —
 The pinch comes in decidin' wut to *du*;
 Ef you *read* History, all runs smooth ez grease,
 Coz there the men ain't nothin' more 'n idees, —
 But come to *make* it, ez we must to-day,
 Th' idees hev arms an' legs an' stop the way.
 It 's easy fixin' things in facts an' figgers, —
 They can't resist, nor warn't brought up with niggers,
 But come to try your the'ry on, — why, then
 Your facts an' figgers change to ign'ant men
 Actin' ez ugly —" — "Smite 'em hip an' thigh!"
 Sez gran'ther, "and let every man-child die!
 Oh for three weeks o' Crommle an' the Lord!
 Up, Isr'el, to your tents an' grind the sword!" —
 "Thet kind o' thing worked wal in ole Judee,
 But you forgit how long it 's ben A. D.;
 You think thet 's ellerkence, — I call it shoddy,
 A thing," sez I, "wun't cover soul nor body;
 I like the plain all-wool o' common-sense,
 Thet warms ye now, an' will a twelve-month hence.
 "*You* took to follerin' where the Prophets beckoned, :
 An', fust you knowed on, back come Charles the Secon
 Now wut I want 's to hev all *we* gain stick,
 An' not to start Millennium too quick;
 We hain't to punish only, but to keep,
 An' the cure 's gut to go a cent'ry deep."
 "Wal, milk-an'-water ain't the best o' glue,"

281 Crommle, Oliver Cromwell (1599-1658), Puritan general, Lord Protector of the commonwealth (1653-1658) during the Puritan rule • Charles the Second (1630-1685), king of Great Britain and Ireland (1660-1685) after the period of Puritan rule.

Sez he, "an' so you 'll find before you 're thru;
 Ef reshness venters sunthin', shilly-shally
 Loses ez often wut 's ten times the vally.
 Thet exe of ourn, when Charles's neck gut split,
 Opened a gap thet ain't bridged over yit: 300
 Slav'ry 's your Charles, the Lord hez gin the exe—"'
 'Our Charles," sez I, "hez gut eight million necks.
 The hardest question ain't the black man's right,
 The trouble is to 'mancipate the white;
 One's chained in body an' can be sot free,
 But t' other 's chained in soul to an idee.
 It 's a long job, but we shall worry thru it;
 Ef bagnets fail, the spellin'-book must du it."
 "Hosee," sez he, "I think you 're goin' to fail.
 The rattlesnake ain't dangerous in the tail, 310

This 'ere rebellion 's nothin but the rattle,—
 You 'll stomp on thet an' think you 've won the beetle;
 It 's Slavery thet 's the fangs an' thinkin' head,
 An' ef you want selvation, cresh it dead,—
 An' cresh it suddin, or you 'll larn by waitin'
 Thet Chance wun't stop to listen to debatin'!"—
 "God's truth!" sez I,—"**an' ef I held the club,**
 An' knowed jes' where to strike,—but there's the rub!"—
 "Strike soon," sez he, "or you 'll be deadly ailin',—
 Folks thet 's afeard to fail are sure o' failin'; 320
 God hates your sneakin' creturs thet believe
 He 'll settle things they run away an' leave!"
 He brought his foot down fercely, ez he spoke,
 An' give me sech a startle thet I woke.

1862

Ode Recited at the Harvard Commemoration

This poem was read on July 21, 1865, to a group of friends and alumni who, in a broad tent raised near the grounds of Harvard College, had gathered to pay tribute to the Harvard men who had served during the recently concluded Civil War. There can be no doubt that Lowell was speaking sincerely in the ode. Former students of his were among those honored, and he himself had lost three nephews in the war.

In what is considered his greatest serious poem Lowell grapples with a question which arises in all times of war—"What possible justification is there for the sacrifices of the men who served?" He praises the faith of men which is made whole by brave actions, and sees such faith made immortal not only in the lives of contemporaries but also in the race and the nation which such men have served. In the sixth stanza, he pays reverent tribute to Lincoln, whom he cites as a great example of American insight and bravery.

Lowell tells of experiments with verse forms and justifies the form which he employed in this account of the composition of the poem written to James B. Thayer in 1877: 'A long series of uniform stanzas (I am always speaking of public recitation) with regularly recurring rhymes produces

somnolence among the men and a desperate resort to their fans on the part of the women . . . Now, my problem was to contrive a measure which should not be tedious by uniformity, but which should vary with varying moods, in which the transitions . . . should be managed without a jar. I at first thought of mixed rhymed and blank verses of unequal measures, like those in the chorus of 'Samson Agonistes'. . . . I wrote some stanzas . . . on this theory at first, leaving some verses without a rhyme to match. But my ear was better pleased when the rhyme, coming at a longer interval, as a far-off echo rather than instant reverberation, produced the same effect almost, and yet was grateful by unexpectedly recalling an association and faint reminiscence of consonance."

I

Weak-winged is song,
 Nor aims at that clear-ethered height
 Whither the brave deed climbs for light:
 We seem to do them wrong,
 Bringing our robin's-leaf to deck their hearse
 Who in warm life-blood wrote their nobler verse,
 Our trivial song to honor those who come
 With ears attuned to strenuous trump and drum,
 And shaped in squadron-strophes their desire,
 Live battle-odes whose lines were steel and fire: 10

Yet sometimes feathered words are strong,
A gracious memory to buoy up and save
From Lethe's dreamless ooze, the common grave
Of the unventurous throng.

II

Today our Reverend Mother welcomes back
Her wisest Scholars, those who understood
The deeper teaching of her mystic tome.
And offered their fresh lives to make it good:
No lore of Greece or Rome,
No science peddling with the names of things, 20
Or reading stars to find inglorious fates,
Can lift our life with wings
Far from Death's idle gulf that for the many waits,
And lengthen out our dates
With that clear fame whose memory sings
In many hearts to come, and nerves them and dilates
Nor such thy teaching, Mother of us all!
Not such the trumpet-call
Of thy diviner mood, 30
That could thy sons entice
From happy homes and toils, the fruitful nest
Of those half-virtues which the world calls best
Into War's tumult rude,
But rather far that stern device
The sponsors chose that round thy cradle stood
In the dim, unventured wood,
The VERITAS that lurks beneath
The letter's unprolific sheath.
Life of whate'er makes life worth living,
Seed-grain of high emprise, immortal food, 40
One heavenly thing whereof earth hath the giving

III

Many loved Truth, and lavished life's best oil
Amid the dust of books to find her,
Content at last, for guerdon of their toil,
With the cast mantle she hath left behind her.
Many in sad faith sought for her,
Many with crossed hands sighed for her;
But these, our brothers, fought for her,
At life's dear peril wrought for her,
So loved her that they died for her, 50
Tasting the raptured fleetness
Of her divine completeness:

Their higher instinct knew
Those love her best who to themselves are true,
And what they dare to dream of dare to do;
They followed her and found her
Where all may hope to find,
Not in the ashes of the burnt-out mind,
But beautiful, with danger's sweetness round her.
Where faith made whole with deed
Breathes its awakening breath
Into the lifeless creed,
They saw her plumed and mailed,
With sweet, stern face unveiled,
And all-repaying eyes, look proud on them in death.

IV

Our slender life runs rippling by, and glides
Into the silent hollow of the past;
What is there that abides
To make the next age better for the last?
Is earth too poor to give us
Something to live for here that shall outlive us?
Some more substantial boon
Than such as flows and ebbs with Fortune's fickle moor
The little that we see
From doubt is never free;
The little that we do
Is but half-nobly true,
With our laborious hiving
What men call treasure, and the gods call dross,
Life seems a jest of Fate's contriving,
Only secure in every one's conniving,
A long account of nothings paid with loss,
Where we poor puppets, jerked by unseen wires,
After our little hour of strut and rave,
With all our pasteboard passions and desires,
Loves, hates, ambitions, and immortal fires,
Are tossed pell-mell together in the grave.
But stay! no age was e'er degenerate,
Unless men held it at too cheap a rate,
For in our likeness still we shape our fate
Ah, there is something here
Unfathomed by the cynic's sneer,

15 Reverend Mother, Harvard, personified as the alma mater •
Veritas, Truth—the motto of Harvard The lines describe the universi
seal

Something that gives our feeble light
 A high immunity from Night,
 Something that leaps life's narrow bars
 To claim its birthright with the hosts of heaven,
 A seed of sunshine that can leaven
 Our earthly dulness with the beams of stars,
 And glorify our clay
 With light from fountains elder than the Day; 100
 A conscience more divine than we,
 A gladness fed with secret tears,
 A vexing, forward-reaching sense
 Of some more noble permanence;
 A light across the sea,
 Which haunts the soul and will not let it be,
 Still beaconing from the heights of undegenerate years

V

Whither leads the path
 To ampler fates that leads?
 Not down through flowery meads, 110
 To reap an aftermath
 Of youth's vainglorious weeds,
 But up the steep, amid the wrath
 And shock of deadly-hostile creeds,
 Where the world's best hope and stay
 By battle's flashes gropes a desperate way,
 And every turf the fierce foot clings to bleeds.
 Peace hath her not ignoble wreath,
 Ere yet the sharp, decisive word
 Light the black lips of cannon, and the sword 120
 Dreams in its easeful sheath;
 But some day the live coal behind the thought,
 Whether from Baal's stone obscene,
 Or from the shrine serene
 Of God's pure altar brought,
 Bursts up in flame; the war of tongue and pen
 Learns with what deadly purpose it was fraught.
 And, helpless in the fiery passion caught.
 Shakes all the pillared state with shock of men
 Some day the soft Ideal that we wooed 130
 Confronts us fiercely, foe-beset, pursued,
 And cries reproachful: "Was it, then, my praise,
 And not myself was loved? Prove now thy truth;
 I claim of thee the promise of thy youth;
 Give me thy life, or cower in empty phrase,
 The victim of thy genius, not its mate!"

Life may be given in many ways,
 And loyalty to Truth be sealed
 As bravely in the closet as the field,
 So bountiful is Fate, 140
 But then to stand beside her,
 When craven churls deride her,
 To front a lie in arms and not to yield,
 This shows, methinks, God's plan
 And measure of a stalwart man,
 Limbed like the old heroic breeds,
 Who stands self-poised on manhood's solid earth,
 Not forced to frame excuses for his birth,
 Fed from within with all the strength he needs.

VI

Such was he, our Martyr-Chief, 150
 Whom late the Nation he had led,
 With ashes on her head,
 Wept with the passion of an angry grief.
 Forgive me, if from present things I turn
 To speak what in my heart will beat and burn,
 And hang my wreath on his world-honored urn
 Nature, they say, doth dote,
 And cannot make a man
 Save on some worn-out plan,
 Repeating us by rote 160
 For him her Old-World moulds aside she threw,
 And, choosing sweet clay from the breast
 Of the unexhausted West,
 With stuff untainted shaped a hero new,
 Wise, steadfast in the strength of God, and true.
 How beautiful to see
 Once more a shepherd of mankind indeed,
 Who loved his charge but never loved to lead,
 One whose meek flock the people joyed to be,
 Not lured by any cheat of birth, 170
 But by his clear-grained human worth,
 And brave old wisdom of sincerity!
 They knew that outward grace is dust;
 They could not choose but trust
 In that sure-footed mind's unfaltering skill,

123 *Baal's stone obscene*, idol worshiped by the idolatrous Baalites.
 See I Kings 18 • 150 *Martyr-Chief*, Lincoln, who had been assassi-
 nated April 14. This sixth section, perhaps the most famous in the
 poem, was added after the public recital

And supple-tempered will
 That bent like perfect steel to spring again and thrust.
 His was no lonely mountain-peak of mind,
 Thrusting to thin air o'er our cloudly bars,
 A sea-mark now, now lost in vapors blind; 180
 Broad prairie rather, genial, level-lined,
 Fruitful and friendly for all human kind,
 Yet also nigh to heaven and loved of loftiest stars.
 Nothing of Europe here,
 Or, then, of Europe fronting mornward still,
 Ere any names of Serf and Peer
 Could Nature's equal scheme deface
 And thwart her genial will;
 Here was a type of the true elder race,
 And one of Plutarch's men talked with us face to face 190
 I praise him not, it were too late,
 And some innate weakness there must be
 In him who condescends to victory
 Such as the Present gives, and cannot wait,
 Safe in himself as in a fate.
 So always firmly he
 He knew to bide his time,
 And can his fame abide,
 Still patient in his simple faith sublime,
 Till the wise years decide 200
 Great captains, with their guns and drums,
 Disturb our judgment for the hour,
 But at last silence comes,
 These all are gone, and, standing like a tower,
 Our children shall behold his fame,
 The kindly-earnest, brave, foreseeing man,
 Sagacious, patient, dreading praise, not blame,
 New birth of our new soil, the first American.

VII

Long as man's hope insatiate can discern
 Or only guess some more inspiring goal 210
 Outside of Self, enduring as the pole,
 Along whose course the flying axles burn
 Of spirits bravely-pitched, earth's manlier brood,
 Long as below we cannot find
 The meed that stills the inexorable mind,
 So long this faith to some ideal Good,
 Under whatever mortal names its masks,
 Freedom, Law, Country, this ethereal mood
 That thanks the Fates for their severer tasks,
 Feeling its challenged pulses leap 220

While others skulk in subterfuges cheap,
 And, set in Danger's van, has all the boon it asks,
 Shall win a man's praise and woman's love,
 Shall be a wisdom that we set above
 All other skills and gifts to culture dear,
 A virtue round whose forehead we enwreath
 Laurels that with a living passion breathe
 When other crowns grow, while we twine them, se
 What brings us thronging these high rites to pay,
 And seal these hours the noblest of our year,
 Save that our brothers found this better way?

VIII

We sit here in the Promised Land
 That flows with Freedom's honey and milk;
 But 'twas they won it, sword in hand,
 Making the nettle danger soft for us as silk.
 We welcome back our bravest and our best—
 Ah me! not all! some come not with the rest,
 Who went forth brave and bright as any here!
 I strive to mix some gladness with my strain,
 But the sad strings complain, 2
 And will not please the ear:
 I sweep them for a pæan, but they wane
 Again and yet again
 Into a dirge and die away in pain.
 In these brave ranks I only see the gaps,
 Thinking of dear ones whom the dumb turf wraps,
 Dark to the triumph which they died to gain
 Fittier may others greet the living,
 For me the past is unforgiving;
 I with uncovered head 25
 Salute the sacred dead,
 Who went, and who return not—Say not so!
 'Tis not the grapes of Canaan that repay,
 But the high faith that failed not by the way;
 Virtue treads paths that end not in the grave;
 No ban of endless night exiles the brave;
 And to the saner mind
 We rather seem the dead that stayed behind
 Blow, trumpets, all your exultations blow!
 For never shall their aureoled presence lack 260
 I see them muster in a gleaming row,

190 one of . . . men, a man worthy of comparison with the heroic
 Greeks and Romans celebrated in Plutarch's *Lives* (first century, B.C.)
 • 232 **Promised Land**, the land sought by the chosen people See
 Exodus 13 5

With every youthful brow that nobler show,
We find in our dull road their shining track,
In every nobler mood

We feel the orient of their spirit glow,
Part of our life's unalterable good,
Of all our saintlier aspiration,
They come transfigured back,
Secure from change in their high-hearted ways,
Beautiful evermore, and with the rays
Of morn on their white Shields of Expectation!

IX

But is there hope to save
Even this ethereal essence from the grave?
Whatever 'scaped Oblivion's subtle wrong
Save a few clarion names, or golden threads of song?
Before my musing eye

The mighty ones of old sweep by,
Disvoiced now and insubstantial things.
As noisy once as we, poor ghosts of kings,
Shadows of empire wholly gone to dust,
And many races, nameless long ago,
To darkness driven by that imperious gust
Of ever-rushing Time that here doth blow
O visionary world, condition strange,
Where naught abiding is but only Change,
Where the deep-bolted stars themselves still shift
and range!

Shall we to more continuance make pretence?
Renown builds tombs, a life-estate is Wit,
And, bit by bit,

The cunning years steal all from us but woe,
Leaves are we, whose decays no harvest sow.

But, when we vanish hence,
Shall they lie forceless in the dark below,
Save to make green their little length of sods,
Or deepen pansies for a year or two,
Who now to us are shining-sweet as gods?
Was dying all they had the skill to do?

That were not fruitless but the Soul resents
Such short-lived service, as if blind events
Ruled without her, or earth could so endure,
She claims a more divine investiture

Of longer tenure than Fame's airy rents;
Whate'er she touches doth her nature share,
Her inspiration haunts the ennobled air,

Gives eyes to mountains blind,

Ears to the deaf earth, voices to the wind,
And her clear trump sings succor everywhere
By lonely bivouacs to the wakeful mind;
For soul inherits all that soul could dare:

Yea, Manhood hath a wider span
And larger privilege of life than man.
The single deed, the private sacrifice,
So radiant now through proudly-hidden tears,
Is covered up ere long from mortal eyes
With thoughtless drift of the deciduous years,
But that high privilege that makes all men peers,
That leap of heart whereby a people rise
Up to a noble anger's height,
And, flamed on by the Fates, not shrink, but grow
more bright,

That swift validity in noble veins,
Of choosing danger and disdaining shame,
Of being set on flame
By the pure fire that flies all contact base
But wraps its chosen with angelic might,
These are imperishable gains,
Sure as the sun, medicinal as light,
These hold great futures in their lusty reins
And certify to earth a new imperial race.

X

Who now shall sneer?
Who dare again to say we trace
Our lines to a plebeian race?

Roundhead and Cavalier!
Dumb are those names erewhile in battle loud;
Dream-footed as the shadow of a cloud,
They flit across the ear

That is best blood that hath most iron in't
To edge resolve with, pouring without stint
For what makes manhood dear.

Tell us not of Plantagenets,
Hapsburgs, and Guelfs, whose thin bloods crawl
Down from some victor in a border-brawl!

How poor their outworn coronets,
Matched with one leaf of that plain civic wreath
Our brave for honor's blazon shall bequeath,

332 Roundhead and Cavalier, the Puritans and the followers of Charles I, here representing the New Englanders and the Southerners
• 339 Plantagenets, a line of English kings • 340 Hapsburgs, and Guelfs, respectively, the royal family which ruled the Holy Roman Empire and the papal party in medieval Italy

Through whose desert a rescued Nation sets
 Her heel on treason, and the trumpet hears
 Shout victory, tingling Europe's sullen ears
 With vain resentments and more vain regrets!

XI

Not in anger, not in pride,
 Pure from passion's mixture rude
 Ever to base earth allied,
 But with far-heard gratitude,
 Still with heart and voice renewed,
 To heroes living and dear martyrs dead,
 The strain should close that consecrates our brave
 Lift the heart and lift the head!
 Lofty be its mood and grave,
 Not without a martial ring,
 Not without a prouder tread
 And a peal of exultation:
 Little right has he to sing
 Through whose heart in such an hour
 Beats no march of conscious power,
 Sweeps no tumult of elation!
 'Tis no Man we celebrate,
 By his country's victories great,
 A hero half, and half the whim of Fate,
 But the pith and marrow of a Nation
 Drawing force from all her men,
 Highest, humblest, weakest, all,
 For her time of need, and then
 Pulsing it again through them,
 Till the basest can no longer cower,
 Feeling his soul spring up divinely tall,
 Touched but in passing by her mantle-hem.
 Come back, then, noble pride, for 'tis her dower!
 How could poet ever tower,
 If his passions, hopes, and fears,
 In his triumphs and his tears,
 Kept not measure with his people?
 Boom, cannon, boom to all the winds and waves!
 Clash out, glad bells, from every rocking steeple!
 Banners, advance with triumph, bend your staves!
 And from every mountain-peak
 Let beacon-fire to answering beacon speak,
 Katahdin tell Monadnock, Whiteface he,
 And so leap on in light from sea to sea,
 Till the glad news be sent

Across a kindling continent,
 Making earth feel more firm and air breathe braver: :
 "Be proud! for she is saved, and all have helped to
 save her!

She that lifts up the manhood of the poor,
 She of the open soul and open door,
 With room about her hearth for all mankind!
 The fire is dreadful in her eyes no more;
 From her bold front the helm she doth unbind,
 Sends all her handmaid armies back to spin,
 And bids her navies, that so lately hurled
 Their crashing battle, hold their thunders in,
 Swimming like birds of calm along the unharm-
 ful shore.

No challenge sends she to the elder world,
 That looked askance and hated; a light scorn
 Plays on her mouth, as round her mighty knees
 She calls her children back, and waits the morn
 Of nobler day, enthroned between her subject seas.'

XII

Bow down, dear Land, for thou hast found release!
 Thy God, in these distempered days,
 Hath taught thee the sure wisdom of His ways,
 And through thine enemies hath wrought thy peace!
 Bow down in prayer and praise!

No poorest in thy borders but may now
 Lift to the juster skies a man's enfranchised brow.
 O Beautiful! my Country! ours once more!
 Smoothing thy gold of war-dishevelled hair
 O'er such sweet brows as never other wore,
 And letting thy set lips,

Freed from wrath's pale eclipse,
 The rosy edges of their smile lay bare,
 What words divine of lover or of poet
 Could tell our love and make thee know it,
 Among the Nations bright beyond compare?

What were our lives without thee?
 What all our lives to save thee?
 We reckon not what we gave thee;
 We will not dare to doubt thee,
 But ask whatever else, and we will dare!

1865

 New Hampshire, and New York, respectively

Auspex

MY heart, I cannot still it,
Nest that had song-birds in it;
And when the last shall go,
The dreary days, to fill it,
Instead of lark or linnet,
Shall whirl dead leaves and snow.

Had they been swallows only,
Without the passion stronger

That skyward longs and sings,—
Woe's me, I shall be lonely
When I can feel no longer
The impatience of their wings!

A moment, sweet delusion,
Like birds the brown leaves hover,
But it will not be long
Before their wild confusion
Fall wavering down to cover
The poet and his song.

1879-1888

THE TRANSCENDENTALISTS: Emerson, Thoreau

Ralph Waldo Emerson

1803 • 1882

Ralph Waldo Emerson was descended from nine successive generations of ministers. His grandfather was a minister at Concord at the beginning of the American Revolution and gave encouragement to the embattled farmers who fired the shot heard around the world. His father, who was minister of the First Church, Unitarian, in Boston, Ralph Waldo's birthplace, died when Emerson was eight years old, leaving a widow and four sons in difficult financial circumstances. Nevertheless, all four sons went through Harvard, Ralph Waldo graduating in 1821. He taught school for a while, attended the Harvard Divinity School, spent a winter in Florida for his health, and, in 1829, became pastor of the Second Church of Boston and married Miss Ellen Tucker. His felicity at his time seemed perfect; in his journal he uneasily asked himself, "Can this hold?" It didn't hold, for in 1831

Ellen died, and in 1832 he resigned his pastorate because of his unwillingness to administer the Lord's Supper. In a remarkably candid sermon on the subject he said to his congregation: "It is my desire, in the office of a Christian minister, to do nothing which I cannot do with my whole heart. Having said this, I have said all. I have no hostility to this institution [the Lord's supper], I am only stating my want of sympathy with it."

Emerson at twenty-nine possibly looked like a failure; but, as Bliss Perry has happily observed, "he pulled himself together, being of the old, unbeatable Puritan stuff." In 1833 he went abroad and visited Landor in Italy, Coleridge and Wordsworth in England, and (most important of all, because the meeting was the beginning of a lifelong friendship) Carlyle in Scotland, at Craigenputtock, "amid desolate heathery hills, where the lonely

scholar nourished his mighty heart" (see *English Traits*). Upon his return to America, he bought a house and two acres of land in Concord, married Miss Lydia Jackson, and in 1836 published his first volume, *Nature*, which Henry Seidel Canby has called "the most seminal of all American books." Except among Transcendentalists, *Nature* met with a mild reception, but the two challenging addresses which followed soon after, *The American Scholar* in 1837 and *The Divinity School Address* in 1838, made Emerson famous. *Essays, First Series* appeared in 1841, and *Essays, Second Series*, in 1844. From 1840 to 1842, he assisted Margaret Fuller in editing *The Dial*, the chief magazine of New England Transcendentalism, and was himself editor from 1842 to 1844. He lectured extensively and successfully in England in 1847-1848. In 1847 *Poems* appeared, in 1850, *Representative Men*; in 1856, *English Traits*; in 1860, *The Conduct of Life*.

In the 1840's and 1850's Emerson was in ever increasing demand as a lecturer on Lyceum platforms in New England, the middle Atlantic states, and the "North-west." He met this demand heroically. An entry in his journal dated Beloit, Wisconsin, January 9, 1856, reads as follows: "Mercury varying from 20° to 30° below zero for the last week. . . . This climate and people are a new test for the wares of a man of letters. All his thin, watery matter freezes, 'tis only the smallest portion of alcohol that remains good. At the Lyceum, the stout Illinoisan, after a short trial, walks out of the hall." And

another entry dated Kalamazoo, Michigan, February 1860 "My chief adventure was the necessity of riding in a buggy forty-eight miles to Grand Rapids, then, after the lecture, twenty more on the return; and the next morning getting back to Kalamazoo in time for the train at twelve. So I saw Michigan and its forests and Wolverines pretty thoroughly." One marvels at Emerson's hardihood and adaptability. He was enthusiastic about the development of civilization in the West. When Bret Harte accused him of naiveté, Emerson replied that he "spoke from Pilgrim experience, and knew on good grounds the resistless culture that religion effects."

Emerson kept aloof from the slavery controversy in the 1830's and 1840's. Why "this incredible tenderness for black folk a thousand miles off?" he asked in 1841 and in 1846 he had "quite other slaves to free than those Negroes, to wit, imprisoned spirits, imprisoned thoughts." But later events drove him inexorably into the ranks of the radical abolitionists. When Webster, who had previously been something of a hero in Emerson's eyes, supported the Fugitive Slave Law as a part of the Compromise of 1850, Emerson wrote of him scathingly in his journal: "The word *liberty* in the mouth of Mr Webster sounds like the word *love* in the mouth of a

Panel (l. to r) "The sled and traveller stopped", from "The Snow Storm" • View of Concord in 1839 • Ralph Waldo Emerson at 51 • His Concord study

courtezan." The law itself Emerson called a "filthy enactment," and he added, "I will not obey it, by God" (the only instance of profanity in his writings). In 1859 he took his stand publicly as a champion of John Brown. From 1861 to 1865 he was caught up in the general hysteria of war; "Emerson," Hawthorne said in 1861, "is breathing slaughter like the rest of us" On January 1, 1863, he read the "Boston Hymn" in the Boston Music Hall. Henry James remembered "the momentousness of the occasion, the vast excited multitude, the crowded platform, the tall spare figure of Emerson" and "the immense effect with which his beautiful voice pronounced the lines"—lines, it may be noted, expressing the most intransigent of positions—

Pay ransom to the owner
And fill the bag to the brim.
Who is the owner? The slave is owner,
And ever was Pay him!

In April 1865 he objected in his journal that Grant's terms of surrender were "a little too easy" Perhaps the world is yet to see the philosopher whose philosophy is proof against the excitements of war.

In his personal relations, Emerson has seemed to many readers to have been a little remote. "True love," he wrote in the essay on "Friendship," "dwells and broods on the eternal"; friends "descend to meet" Because his thoughts were so habitually fixed on the ideal, "actual society" was to him "a perpetual disappointment"—an attitude sufficiently illustrated in the references in his journal to his Concord friendships. His conversations with Margaret Fuller were "strange, cold-warm, attractive-repelling." Of his long and fruitful friendship with Thoreau he wrote in 1856, "All his resources of wit and invention are lost to me, in every experiment, year after year, that I make to hold intercourse with his mind." After the death of Hawthorne, with whom he had much in common, he regretted that he had been unable to "conquer a friendship", to him, the fault seemed to lie in Hawthorne's "unwillingness and caprice" To the more worldly Hawthorne, on the other hand, Emerson was the mystic, stretching his hand out of cloud-land, in search for something real."

But whatever his human limitations and whatever the limitations of his thinking—"I could never give

much reality to evil," he frankly admitted—as an idealist who insisted always upon the "beneficent tendency" in human life and as an inspirer of youth, Emerson was unquestionably great James Russell Lowell, who was inclined to be skeptical of Emerson's philosophy as such, testified to the inspiring quality of his discourses. "He brought us *life*," Lowell said in "Emerson the Lecturer" (p. 855); "gave us ravishing glimpses of an ideal under the dry husk of our New England, made us conscious of the supreme and everlasting originality of whatever bit of soul might be in any of us." After a lecture by Emerson, his hearers "walked homeward with prouder stride over the creaking snow." To Matthew Arnold as an undergraduate at Oxford, Emerson was one of the four most stimulating contemporary "voices."

"In all my lectures," Emerson wrote, "I have taught one doctrine, namely, the infinitude of the private man." And again, he said, "I gain my point, gain all points, whenever I can reach the young man with any statement which teaches him his own worth." Emerson had a genius, in the words of Henry James ("Emerson" in *Partial Portraits*), for "seeing character as a real and supreme thing." "He serves," James continued, "and will not wear out . . . indeed, we cannot afford to drop him. . . . He did something better than anyone else, he had a particular faculty, which has not been surpassed, for speaking to the soul in a voice of direction and authority." Emerson should be judged and appreciated, then, not primarily as a metaphysical philosopher, but as a moral teacher. If his moral teachings seem to have lost some of their early force, if Emerson for almost a generation has been "unfashionable" (Mr. T. S. Eliot could speak of the essays in 1919 as "already an encumbrance"), it is by no means certain that with a change of intellectual and moral "climate"—such a change as now seems impending—Emerson may not regain much of his old authority and influence.

The American Scholar

An Oration Delivered Before the Phi Beta Kappa Society, at Cambridge, August 31, 1837

The American Scholar was the most famous literary address of the century. "This grand oration," wrote Oliver Wendell Holmes, "was our intellectual Declaration of Independence. Nothing like it had been heard in the halls of Harvard since Samuel Adams supported the affirmative of the question, 'Whether it be lawful to resist the chief magistrate, if the commonwealth cannot otherwise be preserved.'" James Russell Lowell called it "our Yankee version of a lecture by Abelard." Thomas Carlyle wrote to Emerson, after having read *The American Scholar*: "I could have wept to read that speech; the clear high melody of it went tingling through my heart; I said to my wife, 'There, woman!' She read; and charges me to return for answer 'that there has been nothing met with like it since Schiller. . . .'"

The circumstances of the delivery of *The American Scholar* have been vividly reconstructed by Bliss Perry in "Emerson's Most Famous Speech," *The Praise of Folly and Other Papers*, 1923, 81-113.

Mr. President and Gentlemen, I greet you on the commencement of our literary year. Our anniversary is one of hope, and, perhaps, not enough of labor. We do not meet for games of strength or skill, for the recitation of histories, tragedies, and odes, like the ancient Greeks, for parliaments of love and poesy, like the Troubadours, nor for the advancement of science, like our contemporaries in the British and European capitals. Thus far, our holiday has been simply a friendly sign of the survival
10 of the love of letters amongst a people too busy to give to letters any more. As such it is precious as the sign of an indestructible instinct. Perhaps the time is already come when it ought to be, and will be, something else; when the sluggish intellect of this continent will look

from under its iron lids and fill the postponed expectation of the world with something better than the exertions of mechanical skill. Our day of dependence, our long apprenticeship to the learning of other lands, draws to a close. The millions that around us are rushing into life, cannot always be fed on the stercoraceous remains of foreign harvests. Events, actions arise, that must be sung that will sing themselves. Who can doubt that poetry will revive and lead in a new age, as the star in that constellation Harp, which now flames in our zenith, astronomers announce, shall one day be the pole-star for a thousand years?

In this hope I accept the topic which not only uses but the nature of our association seem to prescribe for this day—the AMERICAN SCHOLAR. Year by year we come up hither to read one more chapter of his biography. Let us inquire what light new days and events have thrown on his character and his hopes.

It is one of those fables which out of an unknown antiquity convey an unlooked-for wisdom, that the gods, at the beginning, divided Man into men, that he might be more helpful to himself, just as the hand was divided into fingers, the better to answer its end.

The old fable covers a doctrine ever new and useful, that there is One Man,—present to all particular men only partially, or through one faculty; and that you must take the whole society to find the whole man. Man is not a farmer, or a professor, or an engineer, but he is all. Man is priest, and scholar, and statesman, and producer, and soldier. In the *divided* or social state the functions are parcelled out to individuals, each of whom aims to do his stint of the joint work, whilst each other performs his. The fable implies that the individual, to possess himself, must sometimes return from his own labor to embrace all the other laborers. But, unfortunately, this original unit, this fountain of power, has been so distributed to multitudes, has been so minutely subdivided

17 Our . . . close. Emerson's view that American literature should no longer follow European models but should be indigenous to America was by no means original with him. Other writers have been saying the same thing for a good many years. (See, for example, John C. McCloskey, "The Campaign of Periodicals after the War of 1812 for National American Literature," *Publications of the Modern Language Association*, March 1935.) Emerson has been remembered in this connection, while earlier writers have been forgotten, because Emerson expressed the view more effectively.

divided and peddled out, that it is spilled into drops, and cannot be gathered. The state of society is one in which the members have suffered amputation from the trunk, and strut about so many walking monsters,—a good finger, a neck, a stomach, an elbow, but never a man.

Man is thus metamorphosed into a thing, into many things. The planter, who is Man sent out into the field to gather food, is seldom cheered by any idea of the true dignity of his ministry. He sees his bushel and his cart, and nothing beyond, and sinks into the farmer, instead of Man on the farm. The tradesman scarcely ever gives an ideal worth to his work, but is ridden by the routine of his craft, and the soul is subject to dollars. The priest becomes a form, the attorney a statute-book, the mechanic a machine, the sailor a rope of the ship.

In this distribution of functions the scholar is the delegated intellect. In the right state he is *Man Thinking*. In the degenerate state, when the victim of society, he tends to become a mere thinker, or still worse, the parrot of other men's thinking.

In this view of him, as *Man Thinking*, the theory of his office is contained. Him Nature solicits with all her placid, all her monitory pictures; him the past instructs, him the future invites. Is not indeed every man a student, and do not all things exist for the student's behoof? And, finally, is not the true scholar the only true master? But the old oracle said, "All things have two handles: beware of the wrong one." In life, too often, the scholar errs with mankind and forfeits his privilege. Let us see him in his school, and consider him in reference to the main influences he receives.

I. The first in time and the first in importance of the influences upon the mind is that of nature. Every day, the sun; and, after the sunset, Night and her stars. Ever the winds blow, ever the grass grows. Every day, men and women, conversing, beholding and beholden. The scholar is he of all men whom this spectacle most engages. He must settle its value in his mind. What is nature to him? There is never a beginning, there is never an end, to the inexplicable continuity of this web of God, but always circular power returning into itself. Therein it resembles his own spirit, whose beginning, whose ending, he never can find,—so entire, so boundless. Far too as her splendors shine, system on system hooting like rays, upward, downward without centre,

without circumference,—in the mass and in the particle, Nature hastens to render account of herself to the mind. Classification begins. To the young mind every thing is individual, stands by itself. By and by, it finds how to join two things and see in them one nature; then three, then three thousand, and so, tyrannized over by its own unifying instinct, it goes on tying things together, diminishing anomalies, discovering roots running under ground whereby contrary and remote things cohere and flower out from one stem. It presently learns that since the dawn of history there has been a constant accumulation and classifying of facts. But what is classification but the perceiving that these objects are not chaotic, and are not foreign, but have a law which is also a law of the human mind? The astronomer discovers that geometry, a pure abstraction of the human mind, is the measure of planetary motion. The chemist finds proportions and intelligible method throughout matter; and science is nothing but the finding of analogy, identity, in the most remote parts. The ambitious soul sits down before each refractory fact, one after another reduces all strange constitutions, all new powers, to their class and their law, and goes on forever to animate the last fibre of organization, the outskirts of nature, by insight.

Thus to him, to this schoolboy under the bending dome of day, is suggested that he and it proceed from one root; one is leaf and one is flower, relation, sympathy, stirring in every vein. And what is that root? Is not that the soul of his soul? A thought too bold, a dream too wild. Yet when this spiritual light shall have revealed the law of more earthly natures,—when he has learned to worship the soul, and to see that the natural philosophy that now is, is only the first gropings of its gigantic hand, he shall look forward to an ever expanding knowledge as to a becoming creator. He shall see that nature is the opposite of the soul, answering to it part for part. One is seal and one is print. Its beauty is the beauty of his own mind. Its laws are the laws of his own mind. Nature then becomes to him the measure of his attainments. So much of nature as he is ignorant of, so much of his own mind does he not yet possess. And, in fine, the ancient precept, "Know thyself," and the modern precept, "Study nature," become at last one maxim.

II. The next great influence into the spirit of the scholar is the mind of the Past,—in whatever form, whether of literature, of art, of institutions, that mind is

inscribed. Books are the best type of the influence of the past, and perhaps we shall get at the truth,—learn the amount of this influence more conveniently,—by considering their value alone.

The theory of books is noble. The scholar of the first age received into him the world around; brooded thereon; gave it the new arrangement of his own mind, and uttered it again. It came into him life; it went out from him truth. It came to him short-lived actions; it went out ¹⁰ from him immortal thoughts. It came to him business; it went from him poetry. It was dead fact; now, it is quick thought. It can stand, and it can go. It now endures, it now flies, it now inspires. Precisely in proportion to the depth of mind from which it issued, so high does it soar, so long does it sing.

Or, I might say, it depends on how far the process had gone, of transmuting life into truth. In proportion to the completeness of the distillation, so will the purity and imperishableness of the product be. But none is ²⁰ quite perfect. As no air-pump can by any means make a perfect vacuum, so neither can any artist entirely exclude the conventional, the local, the perishable from his book, or write a book of pure thought, that shall be as efficient, in all respects, to a remote posterity, as to contemporaries, or rather to the second age. Each age, it is found, must write its own books, or rather, each generation for the next succeeding. The books of an older period will not fit this.

Yet hence arises a grave mischief. The sacredness ³⁰ which attaches to the act of creation, the act of thought, is transferred to the record. The poet chanting was felt to be a divine man: henceforth the chant is divine also. The writer was a just and wise spirit: henceforward it is settled the book is perfect; as love of the hero corrupts into worship of his statue. Instantly the book becomes noxious: the guide is a tyrant. The sluggish and perverted mind of the multitude, slow to open to the incursions of Reason, having once so opened, having once received this book, stands upon it, and makes an outcry ⁴⁰ if it is disparaged. Colleges are built on it. Books are written on it by thinkers, not by Man Thinking, by men of talent, that is, who start wrong, who set out from accepted dogmas, not from their own sight of principles. Meek young men grow up in libraries, believing it their duty to accept the views which Cicero, which Locke, which Bacon, have given; forgetful that Cicero, Locke,

and Bacon were only young men in libraries when wrote these books.

Hence, instead of Man Thinking, we have the book-worm. Hence the book-learned class, who value books as such, not as related to nature and the human contribution, but as making a sort of Third Estate with world and the soul. Hence the restorers of readings, emendators, the bibliomaniacs of all degrees.

Books are the best of things, well used, abused, among the worst. What is the right use? What is the one which all means go to effect? They are for nothing to inspire. I had better never see a book than to warped by its attraction clean out of my own orbit, and made a satellite instead of a system. The one thing the world, of value, is the active soul. This every man is entitled to, this every man contains within him, though in almost all men obstructed, and as yet unborn. The soul active sees absolute truth and utters truth, creates. In this action it is genius; not the privilege here and there a favorite, but the sound estate of every man. In its essence it is progressive. The book, the college, the school of art, the institution of any kind, stand with some past utterance of genius. This is good, say they,—let us hold by this. They pin me down. They look backward and not forward. But genius looks forward. The eyes of man are set in his forehead, not in his hindhead. man hopes: genius creates. Whatever talent may be, if the man create not, the pure efflux of the Deity is not his;—cinders and smoke there may be, but not yet flame. There are creative manners, there are creative actions, and creative words; manners, actions, words, that is, indicative of no custom or authority, but springing spontaneous from the mind's own sense of good and fair.

On the other part, instead of being its own seer, let it receive from another mind its truth, though it were in torrents of light, without periods of solitude, inquest and self-recovery, and a fatal disservice is done. Genius is always sufficiently the enemy of genius by over-influence. The literature of every nation bears me witness. The English dramatic poets have Shakespearized now for two hundred years.

12 quick, living • 38 Reason. In Emersonian usage, "Reason" is supra-rational, intuitive, "Understanding" is logical, scientific. See pp. 716-717

Undoubtedly there is a right way of reading, so it be sternly subordinated. Man Thinking must not be subdued by his instruments. Books are for the scholar's idle times. When he can read God directly, the hour is too precious to be wasted in other men's transcripts of their readings. But when the intervals of darkness come, as come they must,—when the sun is hid and the stars withdraw their shining,—we repair to the lamps which were kindled by their ray, to guide our steps to the East again, where the dawn is. We hear, that we may speak. The Arabian proverb says, "A fig tree, looking on a fig tree, becometh fruitful"

It is remarkable, the character of the pleasure we derive from the best books. They impress us with the conviction that one nature wrote and the same reads. We read the verses of one of the great English poets, of Chaucer, of Marvell, of Dryden, with the most modern joy,—with a pleasure, I mean, which is in great part caused by the abstraction of all *time* from their verses. There is some awe mixed with the joy of our surprise, when this poet, who lived in some past world, two or three hundred years ago, says that which lies close to my own soul, that which I also had well-nigh thought and said. But for the evidence thence afforded to the philosophical doctrine of the identity of all minds, we should suppose some pre-established harmony, some foresight of souls that were to be, and some preparation of stores for their future wants, like the fact observed in insects, who lay up food before death for the young grub they shall never see.

I would not be hurried by any love of system, by any exaggeration of instincts, to underrate the Book. We all know, that as the human body can be nourished on any food, though it were boiled grass and the broth of shoes, so the human mind can be fed by any knowledge. And great and heroic men have existed who had almost no other information than by the printed page. I only would say that it needs a strong head to bear that diet. One must be an inventor to read well. As the proverb says, "He that would bring home the wealth of the Indies, must carry out the wealth of the Indies." There is then creative reading as well as creative writing. When the mind is braced by labor and invention, the page of whatever book we read becomes luminous with manifold allusion. Every sentence is doubly significant, and the sense of our author is as broad as the world. We then

see, what is always true, that as the seer's hour of vision is short and rare among heavy days and months, so is its record, perchance, the least part of his volume. The discerning will read, in his Plato or Shakspeare, only that least part,—only the authentic utterances of the oracle;—all the rest he rejects, were it never so many times Plato's and Shakspeare's.

Of course there is a portion of reading quite indispensable to a wise man. History and exact science he must learn by laborious reading. Colleges, in like manner, have their indispensable office,—to teach elements. But they can only highly serve us when they aim not to drill, but to create, when they gather from far every ray of various genius to their hospitable halls, and by the concentrated fires, set the hearts of their youth on flame. Thought and knowledge are natures in which apparatus and pretension avail nothing. Gowns and pecuniary foundations, though of towns of gold, can never countervail the least sentence or syllable of wit. Forget this, and our American colleges will recede in their public importance, whilst they grow richer every year.

III. There goes in the world a notion that the scholar should be a recluse, a valetudinarian,—as unfit for any handiwork, or public labor as a penknife for an axe. The so-called "practical men" sneer at speculative men, as if, because they speculate or *see*, they could do nothing. I have heard it said that the clergy,—who are always, more universally than any other class, the scholars of their day,—are addressed as women; that the rough, spontaneous conversation of men they do not hear, but only a mincing and diluted speech. They are often virtually disfranchised, and indeed there are advocates for their celibacy. As far as this is true of the studious classes, it is not just and wise. Action is with the scholar subordinate, but it is essential. Without it he is not yet man. Without it thought can never ripen into truth. Whilst the world hangs before the eye as a cloud of beauty, we cannot even see its beauty. Inaction is cowardice, but there can be no scholar without the heroic

17 Marvell. Emerson's naming Andrew Marvell (1621-1678) as "one of the great English poets" is significant. For an informative study of Marvell's influence on Emerson, see Norman A. Brittin, "Emerson and the Metaphysical Poets," *American Literature*, March 1936 • 63 Gowns, academic costume • 65 wit, wisdom • 72 speculate or see. "Speculate" is from the Latin, meaning to spy out, to observe.

mind. The preamble of thought, the transition through which it passes from the unconscious to the conscious, is action. Only so much do I know, as I have lived. Instantly we know whose words are loaded with life, and whose not.

The world,—this shadow of the soul, or *other me*,—lies wide around. Its attractions are the keys which unlock my thoughts and make me acquainted with myself. I run eagerly into this resounding tumult I grasp the hands of those next me, and take my place in the ring to suffer and to work, taught by an instinct that so shall the dumb abyss be vocal with speech. I pierce its order, I dissipate its fear, I dispose of it within the circuit of my expanding life. So much only of life as I know by experience, so much of the wilderness have I vanquished and planted, or so far have I extended my being, my dominion I do not see how any man can afford, for the sake of his nerves and his nap, to spare any action in which he can partake. It is pearls and rubies to his dis-
course. Drudgery, calamity, exasperation, want, are in-
structors in eloquence and wisdom. The true scholar grudges every opportunity of action past by, as a loss of power. It is the raw material out of which the intellect moulds her splendid products. A strange process too, this by which experience is converted into thought, as a mulberry leaf is converted into satin. The manufacture goes forward at all hours

The actions and events of our childhood and youth are now matters of calmest observation. They lie like fair pictures in the air. Not so with our recent actions,—with the business which we now have in hand. On this we are quite unable to speculate. Our affections as yet circulate through it. We no more feel or know it than we feel the feet, or the hand, or the brain of our body. The new deed is yet a part of life,—remains for a time immersed in our unconscious life. In some contemplative hour it detaches itself from the life like a ripe fruit, to become a thought of the mind. Instantly it is raised, transfigured; the corruptible has put on incorruption. Henceforth it is an object of beauty, however base its origin and neighborhood. Observe too the impossibility of antedating this act. In its grub state, it cannot fly, it cannot shine, it is a dull grub. But suddenly, without observation, the self-same thing unfurls beautiful wings, and is an angel of wisdom. So is there no fact, no event, in our private history, which shall not, sooner or later,

lose its adhesive, inert form, and astonish us by soaring from our body into the empyrean. Cradle and infancy, school and playground, the fear of boys, and dogs, and ferules, the love of little maids and berries, and many another fact that once filled the whole sky, are gone already, friend and relative, profession and party, town and country, nation and world, must also soar and sing.

Of course, he who has put forth his total strength in fit actions has the richest return of wisdom. I will not shut myself out of this globe of action, and transplant an oak into a flower-pot, there to hunger and pine; nor trust the revenue of some single faculty, and exhaust one vein of thought, much like those Savoyards, who, getting their livelihood by carving shepherds, shepherdesses, and smoking Dutchmen, for all Europe, went out one day to the mountain to find stock, and discovered that they had whittled up the last of their pine trees. Authors who have, in numbers, who have written out their vein, and who, moved by a commendable prudence, sail for Greece or Palestine, follow the trapper into the prairie, or ramble round Algiers, to replenish their merchantable stock.

If it were only for a vocabulary, the scholar would be covetous of action. Life is our dictionary. Years are well spent in country labors; in town, in the insight into trades and manufactures, in frank intercourse with many men and women, in science, in art, to the one end of mastering in all their facts a language by which to illustrate and embody our perceptions. I learn immediately from any speaker how much he has already lived, through the poverty or the splendor of his speech. Life lies behind us as the quarry from whence we get tiles and copestones for the masonry of to-day. This is the way to learn grammar. Colleges and books only copy the language which the field and the work-yard made.

But the final value of action, like that of books, and better than books, is that it is a resource. The great principle of Undulation in nature, that shows itself in the inspiring and expiring of the breath; in desire and satiety; in the ebb and flow of the sea; in day and night, in heat and cold; and, as yet more deeply ingrained in every atom and every fluid, is known to us under the name of Polarity,—these "fits of easy transmission and

39 the corruptible . . . incorruption, 1 Corinthians 15:53 "For this corruptible must put on incorruption . . ." • 59 Savoyards, inhabitants of Savoy in northwestern Italy

reflection," as Newton called them, are the law of nature because they are the law of spirit.

The mind now thinks, now acts, and each fit reproduces the other. When the artist has exhausted his materials, when the fancy no longer paints, when thoughts are no longer apprehended and books are a weariness,—he has always the resource *to live*. Character is higher than intellect. Thinking is the function. Living is the functionary. The stream retreats to its source. A great soul will be strong to live, as well as strong to think. Does he lack organ or medium to impart his truth? He can still fall back on this elemental force of living them. This is a total act. Thinking is a partial act. Let the grandeur of justice shine in his affairs. Let the beauty of affection cheer his lowly roof. Those "far from fame," who dwell and act with him, will feel the force of his constitution in the doings and passages of the day better than it can be measured by any public and designed display. Time shall teach him that the scholar loses no hour which the man lives. Herein he unfolds the sacred germ of his instinct, screened from influence. What is lost in seemliness is gained in strength. Not out of those on whom systems of education have exhausted their culture, comes the helpful giant to destroy the old or to build the new, but out of unhandselled savage nature, out of terrible Druids and Berserkers come at last Alfred and Shakspeare.

I hear therefore with joy whatever is beginning to be said of the dignity and necessity of labor to every citizen. There is virtue yet in the hoe and the spade, for learned as well as for unlearned hands. And labor is everywhere welcome; always we are invited to work; only be this limitation observed, that a man shall not for the sake of wider activity sacrifice any opinion to the popular judgments and modes of action.

I have now spoken of the education of the scholar by nature, by books, and by action. It remains to say somewhat of his duties.

They are such as become Man Thinking. They may all be comprised in self-trust. The office of the scholar is to cheer, to raise, and to guide men by showing them acts amidst appearances. He plies the slow, unhonored, and unpaid task of observation. Flamsteed and Herschel, in their glazed observatories, may catalogue the stars with the praise of all men, and the results being splendid and useful, honor is sure. But he, in his private observa-

tory, cataloguing obscure and nebulous stars of the human mind, which as yet no man has thought of as such,—watching days and months sometimes for a few facts; correcting still his old records,—must relinquish display and immediate fame. In the long period of his preparation he must betray often an ignorance and shiftlessness in popular arts, incurring the disdain of the able who shoulder him aside. Long he must stammer in his speech; often forego the living for the dead. Worse yet, he must accept—how often!—poverty and solitude. For the ease and pleasure of treading the old road, accepting the fashions, the education, the religion of society, he takes the cross of making his own, and, of course, the self-accusation, the faint heart, the frequent uncertainty and loss of time, which are the nettles and tangling vines in the way of the self-relying and self-directed, and the state of virtual hostility in which he seems to stand to society, and especially to educated society. For all this loss and scorn, what offset? He is to find consolation in exercising the highest functions of human nature. He is one who raises himself from private considerations and breathes and lives on public and illustrious thoughts. He is the world's eye. He is the world's heart. He is to resist the vulgar prosperity that retrogrades ever to barbarism, by preserving and communicating heroic sentiments, noble biographies, melodious verse, and the conclusions of history. Whatsoever oracles the human heart, in all emergencies, in all solemn hours, has uttered as its commentary on the world of actions,—these he shall receive and impart. And whatsoever new verdict Reason from her inviolable seat pronounces on the passing men and events of to-day,—this he shall hear and promulgate.

These being his functions, it becomes him to feel all confidence in himself, and to defer never to the popular cry. He and he only knows the world. The world of any moment is the merest appearance. Some great decorum, some fetish of a government, some ephemeral trade, or

1. Newton, Sir Isaac Newton (1642-1727), English philosopher and mathematician who discovered the laws of universal gravitation. • 25 unhandselled, without "handsel" or gift made as a token of good luck, without, that is, artificial advantages or initial good auspices. • 43 Flamsteed, John Flamsteed (1646-1719), English astronomer. • 43 Herschel, Sir William Herschel (1738-1822), German astronomer in England, or his son, also a famous astronomer.

war, or man, is cried up by half mankind and cried down by the other half, as if all depended on this particular up or down. The odds are that the whole question is not worth the poorest thought which the scholar has lost in listening to the controversy. Let him not quit his belief that a popgun is a popgun, though the ancient and honorable of the earth affirm it to be the crack of doom. In silence, in steadiness, in severe abstraction, let him hold by himself; add observation to observation, patient of neglect, patient of reproach, and bide his own time,—happy enough if he can satisfy himself alone that this day he has seen something truly. Success treads on every right step. For the instinct is sure, that prompts him to tell his brother what he thinks. He then learns that in going down into the secrets of his own mind he has descended into the secrets of all minds. He learns that he who has mastered any law in his private thoughts, is master to that extent of all men whose language he speaks, and of all into whose language his own can be translated. The poet, in utter solitude remembering his spontaneous thoughts and recording them, is found to have recorded that which men in crowded cities find true for them also. The orator distrusts at first the fitness of his frank confessions, his want of knowledge of the persons he addresses, until he finds that he is the complement of his hearers;—that they drink his words because he fulfils for them their own nature, the deeper he dives into his privatest, secretest presentiment, to his wonder he finds this is the most acceptable, most public, and universally true. The people delight in it; the better part of every man feels, This is my music; this is myself

In self-trust all the virtues are comprehended. Free should the scholar be,—free and brave. Free even to the definition of freedom, "without any hindrance that does not arise out of his own constitution." Brave, for fear is a thing which a scholar by his very function puts behind him. Fear always springs from ignorance. It is a shame to him if his tranquillity, amid dangerous times, arise from the presumption that like children and women his is a protected class; or if he seek a temporary peace by the diversion of his thoughts from politics or vexed questions, hiding his head like an ostrich in the flowering bushes, peeping into microscopes, and turning rhymes, as a boy whistles to keep his courage up. So is the danger a danger still, so is the fear worse. Manlike let him turn and face it. Let him look into its eye and search its nature, inspect its origin,—see the whelping

of this lion,—which lies no great way back; he will find in himself a perfect comprehension of its nature and extent; he will have made his hands meet on the other side, and can henceforth defy it and pass on superior. The world is his who can see through its pretension. What deafness, what stone-blind custom, what overgrown error you behold is there only by sufferance—by your sufferance. See it to be a lie, and you have already dealt it its mortal blow

Yes, we are the cowed,—we the trustless. It is a ridiculous notion that we are come late into nature, that the world was finished a long time ago. As the world was plastic and fluid in the hands of God, so it is easy to so much of his attributes as we bring to it. To ignorance and sin, it is flint. They adapt themselves to as they may, but in proportion as a man has any truth in him divine, the firmament flows before him and takes his signet and form. Not he is great who can alter nature, but he who can alter my state of mind. They are the kings of the world who give the color of their present thought to all nature and all art, and persuade others by the cheerful serenity of their carrying the matter that this thing which they do is the apple which the angels have desired to pluck, now at last ripe, and invite nations to the harvest. The great man makes the good thing. Wherever Macdonald sits, there is the head of the table. Linnæus makes botany the most alluring studies, and wins it from the farmer and the housewife. Davy, chemistry; and Cuvier, fossils. The danger is always his who works in it with serenity and great ability. The unstable estimates of men crowd to him whose mind is filled with a truth, as the heaped waves of the Atlantic follow the moon

For this self-trust, the reason is deeper than can be fathomed,—darker than can be enlightened. I must not carry with me the feeling of my audience in stating my own belief. But I have already shown the ground of my hope, in adverting to the doctrine that man is created in the image of God. If I believe man has been wronged, he has wronged himself. He has almost lost the light that can lead him back to his prerogatives. Men are become of no account. In

73 Wherever . . . table, taken from a proverb • 74 Linnæus, Carl Linnæus (1707-1778), Swedish botanist • 76 Davy, Sir Humphry D. Davy (1778-1829), English chemist • 76 Cuvier, Georges Léopold Cuvier (1769-1849), French naturalist. See note, p. 688

in history, men in the world of to-day, are bugs, are spawn, and are called "the mass" and "the herd." In a century, in a millennium, one or two men; that is to say, one or two approximations to the right state of every man. All the rest behold in the hero or the poet their own green and crude being,—ripened; yes, and are content to be less, so *that* may attain to its full stature. What a testimony, full of grandeur, full of pity, is borne to the demands of his own nature, by the poor clansman, the poor partisan, who rejoices in the glory of his chief. The poor and the low find some amends to their immense moral capacity, for their acquiescence in a political and social inferiority. They are content to be brushed like flies from the path of a great person, so that justice shall be done by him to that common nature which it is the dearest desire of all to see enlarged and glorified. They sun themselves in the great man's light, and feel it to be their own element. They cast the dignity of man from their downtrodden selves upon the shoulders of a hero, and will perish to add one drop of blood to make that great heart beat, those giant sinews combat and conquer. He lives for us, and we live in him.

Men such as they are, very naturally seek money or power, and power because it is as good as money,—the 'spoils,' so called, "of office." And why not? for they aspire to the highest, and this, in their sleep-walking, hey dream is highest. Wake them and they shall quit the false good and leap to the true, and leave governments to clerks and desks. This revolution is to be wrought by the gradual domestication of the idea of Culture. The main enterprise of the world for splendor, or extent, is the upbuilding of a man. Here are the materials strewn along the ground. The private life of the man shall be a more illustrious monarchy, more formidable to its enemy, more sweet and serene in its influence to its friend, than any kingdom in history. For man, rightly viewed, comprehendeth the particular natures of all men. Each philosopher, each bard, each actor has only done for me, as by a delegate, what one may I can do for myself. The books which once we valued more than the apple of the eye, we have quite exhausted. That is that but saying that we have come up with the point of view which the universal mind took through the eyes of one scribe, we have been that man, and have passed on. First, one, then another, we drain all cisterns, and waxing greater by all these supplies, we crave a better and more abundant food. The man has never lived that

can feed us ever. The human mind cannot be enshrined in a person who shall set a barrier on any one side to this unbounded, unboundable empire. It is one central fire, which, flaming now out of the lips of Etna, lightens the capes of Sicily, and now out of the throat of Vesuvius, illuminates the towers and vineyards of Naples. It is one light which beams out of a thousand stars. It is one soul which animates all men.

But I have dwelt perhaps tediously upon this abstraction of the Scholar. I ought not to delay longer to add what I have to say of nearer reference to the time and to this country.

Historically, there is thought to be a difference in the ideas which predominate over successive epochs, and there are data for marking the genius of the Classic, of the Romantic, and now of the Reflective or Philosophical age. With the views I have intimated of the oneness or the identity of the mind through all individuals, I do not much dwell on these differences. In fact, I believe each individual passes through all three. The boy is a Greek; the youth, romantic, the adult, reflective. I deny not, however, that a revolution in the leading idea may be distinctly enough traced.

Our age is bewailed as the age of Introversion. Must that needs be evil? We, it seems, are critical; we are embarrassed with second thoughts, we cannot enjoy any thing for hankering to know whereof the pleasure consists, we are lined with eyes, we see with our feet; the time is infected with Hamlet's unhappiness,—

"Sicklied o'er with the pale cast of thought."

It is so bad then? Sight is the last thing to be pitied. Would we be blind? Do we fear lest we should outsee nature and God, and drink truth dry? I look upon the discontent of the literary class as a mere announcement of the fact that they find themselves not in the state of mind of their fathers, and regret the coming state as untried; as a boy dreads the water before he has learned that he can swim. If there is any period one would desire to be born in, is it not the age of Revolution; when the old and the new stand side by side and admit of being compared; when the energies of all men are searched by fear and by hope, when the historic glories of the old can be compensated by the rich possibilities

77 Sicklied . . . thought. Hamlet, Act III, Scene i, l. 85

of the new era? This time, like all times, is a very good one, if we but know what to do with it.

I read with some joy of the auspicious signs of the coming days, as they glimmer already through poetry and art, through philosophy and science, through church and state.

One of these signs is the fact that the same movement which effected the elevation of what was called the lowest class in the state, assumed in literature a very marked and as benign an aspect. Instead of the sublime and beautiful, the near, the low, the common, was explored and poetized. That which had been negligently trodden under foot by those who were harnessing and provisioning themselves for long journeys into far countries, is suddenly found to be richer than all foreign parts. The literature of the poor, the feelings of the child, the philosophy of the street, the meaning of household life, are the topics of the time. It is a great stride. It is a sign—is it not?—of new vigor when the extremities are made active, when currents of warm life run into the hands and the feet. I ask not for the great, the remote, the romantic; what is doing in Italy or Arabia; what is Greek art, or Provençal minstrelsy, I embrace the common, I explore and sit at the feet of the familiar, the low. Give me insight into to-day, and you may have the antique and future worlds. What would we really know the meaning of? The meal in the firkin; the milk in the pan; the ballad in the street, the news of the boat; the glance of the eye, the form and the gait of the body;—show me the ultimate reason of these matters, show me the sublime presence of the highest spiritual cause lurking, as always it does lurk, in these suburbs and extremities of nature; let me see every trifle bristling with the polarity that ranges it instantly on an eternal law; and the shop, the plough, and the ledger referred to the like cause by which light undulates and poets sing;—and the world lies no longer a dull miscellany and lumber room, but has form and order, there is no trifle, there is no puzzle, but one design unites and animates the farthest pinnacle and the lowest trench.

This idea has inspired the genius of Goldsmith, Burns, Cowper, and in a newer time, of Goethe, Wordsworth, and Carlyle. This idea they have differently followed and with various success. In contrast with their writing, the style of Pope, of Johnson, of Gibbon, looks cold and pedantic. This writing is blood-warm. Man is surprised

to find that things near are not less beautiful and vivid than things remote. The near explains the remote. The drop is a small ocean. A man is related to all nature. This perception of the worth of the vulgar is fruitful in discoveries. Goethe, in this very thing the modern of the moderns, has shown us, as none ever the genius of the ancients.

There is one man of genius who has done much this philosophy of life, whose literary value has not yet been rightly estimated,—I mean Emanuel Swedenborg. The most imaginative of men, yet writing with the precision of a mathematician, he endeavored to graft a purely philosophical Ethics on the popular Christianity of his time. Such an attempt of course must be a difficulty which no genius could surmount. But he succeeded and showed the connection between nature and affections of the soul. He pierced the emblematic spiritual character of the visible, audible, tangible world. Especially did his shade-loving muse hover over and interpret the lower parts of nature; he showed the terrible bond that allies moral evil to the foul material forms, and has given in epical parables a theory of insanity, of beasts, of unclean and fearful things.

Another sign of our times, also marked by an analogous political movement, is the new importance given to the single person. Every thing that tends to insult the individual,—to surround him with barriers to natural respect, so that each man shall feel the world is his, and man shall treat with man as a sovereign state with a sovereign state,—tends to true union as well as greatness. "I learned," said the melancholy Pestalozzi "that no man in God's wide earth is either willing or able to help any other man." Help must come from within the bosom alone. The scholar is that man who must draw up into himself all the ability of the time, all the contributions of the past, all the hopes of the future. There must be an university of knowledges. If there be no lesson more than another which should pierce his ears. The world is nothing, the man is all; in yourself the law of all nature, and you know not yet how a globe of sap ascends; in yourself slumbers the whole of

56 Emanuel Swedenborg is the subject of an essay in *Emerson's Representative Men* (1850). See note, p. 662. • 77 Pestalozzi Johann Heinrich Pestalozzi (1746-1827), Swiss educational reformer. His *Hints to Parents* influenced Bronson Alcott.

son; it is for you to know all, it is for you to dare all. Mr. President and Gentlemen, this confidence in the unsearched might of man belongs, by all motives, by all prophecy, by all preparation, to the American Scholar. We have listened too long to the courtly muses of Europe. The spirit of the American freeman is already suspected to be timid, imitative, tame. Public and private avarice make the air we breathe thick and fat. The scholar is decent, indolent, complaisant. See already the tragic consequence. The mind of this country, taught to aim at low objects, eats upon itself. There is no work for any but the decorous and the complaisant. Young men of the fairest promise, who begin life upon our shores, inflated by the mountain winds, shined upon by all the stars of God, find the earth below not in unison with these, but are hindered from action by the disgust which the principles on which business is managed inspire, and turn drudges, or die of disgust, some of them suicides. What is the remedy? They did not yet see, and thousands of young men as hopeful now crowding to the barriers for the career do not yet see, that if the single man plant himself indomitably on his instincts, and there abide, the huge world will come round to him. Patience,—patience, with the shades of all the good and

great for company, and for solace the perspective of your own infinite life, and for work the study and the communication of principles, the making those instincts prevalent, the conversion of the world. Is it not the chief disgrace in the world, not to be an unit;—not to be reckoned one character;—not to yield that peculiar fruit which each man was created to bear, but to be reckoned in the gross, in the hundred, or the thousand, of the party, the section, to which we belong, and our opinion predicted geographically, as the north, or the south? Not so, brothers and friends,—please God, ours shall not be so. We will walk on our own feet, we will work with our own hands, we will speak our own minds. The study of letters shall be no longer a name for pity, for doubt, and for sensual indulgence. The dread of man and the love of man shall be a wall of defence and a wreath of joy around all. A nation of men will for the first time exist, because each believes himself inspired by the Divine Soul which also inspires all men.

1837

9 *complaisant*, here in the unfavorable sense of too eager to please, too compliant with the wishes of others (not to be confused with 'complacent')

The Divinity School Address

Delivered Before the Senior Class in
Divinity College, Cambridge,
Sunday Evening, July 15, 1838

Emerson wrote to Carlyle, October 17, 1838, concerning the reception of this address: "The publication of my *Address to the Divinity College* . . . has been the occasion of an outcry in all our leading newspapers against my 'infidelity,' 'pantheism,' and 'atheism.' The writers warn all and sundry against me, and against whatever is supposed to be related to my connection of opinion, &c; against Transcendentalism, Goethe, and Carlyle. I am

heartily sorry to see this last aspect of the storm in our washbowl." The opposition which Emerson refers to, it is important to notice, came from Unitarians as well as from the orthodox or "Calvinist" party; Emerson was not invited again to lecture at Unitarian Harvard until 1867. The core of his heresy was his denial of the special authority of the Christian revelation and his assertion of the supreme authority of the spiritual intuition belonging to each individual.

For an illuminating treatment of historical background, see C. H. Faust, "The Background of the Unitarian Opposition to Transcendentalism," *Modern Philology*, February 1938, XXXV, 297.

In this refulgent summer, it has been a luxury to draw the breath of life. The grass grows, the buds burst, the meadow is spotted with fire and gold in the tint of

flowers. The air is full of birds, and sweet with the breath of the pine, the balm-of-Gilead, and the new hay. Night brings no gloom to the heart with its welcome shade. Through the transparent darkness the stars pour their almost spiritual rays. Man under them seems a young child, and his huge globe a toy. The cool night bathes the world as with a river, and prepares his eyes again for the crimson dawn. The mystery of nature was never displayed more happily. The corn and the wine
 10 have been freely dealt to all creatures, and the never-broken silence with which the old bounty goes forward has not yielded yet one word of explanation. One is constrained to respect the perfection of this world in which our senses converse. How wide, how rich, what invitation from every property it gives to every faculty of man! In its fruitful soils, in its navigable sea, in its mountains of metal and stone; in its forests of all woods; in its animals, in its chemical ingredients, in the powers and path of light, heat, attraction and life, it is well
 20 worth the pith and heart of great men to subdue and enjoy it. The planters, the mechanics, the inventors, the astronomers, the builders of cities, and the captains, history delights to honor.

But when the mind opens and reveals the laws which traverse the universe and make things what they are, then shrinks the great world at once into a mere illustration and fable of this mind. What am I? and What is? asks the human spirit with a curiosity new-kindled, but never to be quenched. Behold these outrunning laws,
 30 which our imperfect apprehension can see tend this way and that, but not come full circle. Behold these infinite relations, so like, so unlike; many, yet one. I would study, I would know, I would admire forever. These works of thought have been the entertainments of the human spirit in all ages.

A more secret, sweet, and overpowering beauty appears to man when his heart and mind open to the sentiment of virtue. Then he is instructed in what is above him. He learns that his being is without bound, that
 40 to the good, to the perfect, he is born, low as he now lies in evil and weakness. That which he venerates is still his own, though he has not realized it yet. *He ought.* He knows the sense of that grand word, though his analysis fails to render account of it. When in innocency or when by intellectual perception he attains to say,—“I love the Right; Truth is beautiful within and without

for evermore. Virtue, I am thine, save me; use me; thou wilt I serve, day and night, in great, in small, that I may be not virtuous, but virtue”,—then is the end of the creation answered, and God is well pleased.

The sentiment of virtue is a reverence and delight in the presence of certain divine laws. It perceives that this homely game of life we play, covers, under what seem foolish details, principles that astonish. The child amidst his baubles is learning the action of light, motion, gravity, muscular force, and in the game of human life love, fear, justice, appetite, man, and God, intermingle. These laws refuse to be adequately stated. They were not written out on paper, or spoken by the tongue. They elude our persevering thought, yet we read them hourly in each other's faces, in each other's actions, in our own remorse. The moral traits which are all globed into every virtuous act and thought,—in speech we measure, and describe or suggest by painful enumeration many particulars. Yet, as this sentiment is the essence of all religion, let me guide your eye to the precise object of the sentiment, by an enumeration of some of the classes of facts in which this element is conspicuous.

The intuition of the moral sentiment is an insight into the perfection of the laws of the soul. These laws execute themselves. They are out of time, out of space, and not subject to circumstance. Thus in the soul of man there is a justice whose retributions are instant and entire. He who does a noble deed is instantly ennobled. He who does a mean deed is by the action itself contracted. He who puts off impurity, thereby puts on purity. If man is at heart just, then in so far is he God, the safe of God, the immortality of God, the majesty of God, he enters into that man with justice. If a man dissembles, he deceives himself, and goes out of acquaintance with his own being. A man in the view of absolute goodness, adores, with total humility. Every step downward, is a step upward. The man who renounces himself, comes to himself.

See how this rapid intrinsic energy worketh everywhere, righting wrongs, correcting appearances, and bringing up facts to a harmony with thoughts. Its operation in life, though slow to the senses, is at last as sure

83 The . . . himself. Compare Matthew 10:39. . . he that loses his life for my sake shall find it."

as in the soul By it a man is made the Providence to himself, dispensing good to his goodness, and evil to his sin. Character is always known Thefts never enrich, alms never impoverish; murder will speak out of stone walls. The least admixture of a lie,—for example, the taint of vanity, any attempt to make a good impression, a favorable appearance,—will instantly vitiate the effect. But speak the truth, and all nature and all spirits help you with unexpected furtherance Speak the truth, and all things alive or brute are vouchers, and the very roots of the grass underground there do seem to stir and move to bear you witness. See again the perfection of the Law as it applies itself to the affections, and becomes the law of society. As we are, so we associate. The good, by affinity, seek the good; the vile, by affinity, the vile. Thus of their own volition, souls proceed into heaven, into hell.

These facts have always suggested to man the sublime creed that the world is not the product of manifold power, but of one will, of one mind, and that one mind is everywhere active, in each ray of the star, in each wavelet of the pool; and whatever opposes that will is everywhere balked and baffled, because things are made so, and not otherwise Good is positive Evil is merely privative, not absolute It is like cold, which is the privation of heat. All evil is so much death or nonentity. Benevolence is absolute and real. So much benevolence as a man hath, so much life hath he For all things proceed out of this same spirit, which is differently named love, justice, temperance, in its different applications, just as the ocean receives different names on the several shores which its washes. All things proceed out of the same spirit, and all things conspire with it Whilst a man seeks good ends, he is strong by the whole strength of nature. In so far as he roves from these ends, he bereaves himself of power, or auxiliaries, his being shrinks out of all remote channels, he becomes less and less, a more, a point, until absolute badness is absolute death

The perception of this law of laws awakens in the mind a sentiment which we call the religious sentiment, and which makes our highest happiness. Wonderful is its power to charm and to command It is a mountain ur. It is the embalmer of the world It is myrrh and storax, and chlorine and rosemary. It makes the sky and the hills sublime, and the silent song of the stars is it by it is the universe made safe and habitable, not by

science or power. Thought may work cold and intransitive in things, and find no end or unity; but the dawn of the sentiment of virtue on the heart, gives and is the assurance that Law is sovereign over all natures; and the worlds, time, space, eternity, do seem to break out into joy

This sentiment is divine and deifying It is the beatitude of man It makes him illimitable Through it, the soul first knows itself It corrects the capital mistake of the infant man, who seeks to be great by following the great, and hopes to derive advantages *from another*,—by showing the fountain of all good to be in himself, and that he, equally with every man, is an inlet into the deeps of Reason When he says, "I ought", when love warms him, when he chooses, warned from on high, the good and great deed, then, deep melodies wander through his soul from Supreme Wisdom—Then he can worship, and be enlarged by his worship, for he can never go behind this sentiment In the sublimest flights of the soul, rectitude is never surmounted, love is never outgrown

This sentiment lies at the foundation of society, and successively creates all forms of worship. The principle of veneration never dies out Man fallen into superstition, into sensuality, is never quite without the visions of the moral sentiment. In like manner, all the expressions of this sentiment are sacred and permanent in proportion to their purity The expressions of this sentiment affect us more than all other compositions The sentences of the oldest time, which ejaculate this piety, are still fresh and fragrant. This thought dwelled always deepest in the minds of men in the devout and contemplative East, not alone in Palestine, where it reached its purest expression, but in Egypt, in Persia, in India, in China Europe has always owed to oriental genius its divine impulses What these holy bards said, all sane men found agreeable and true. And the unique impression of Jesus upon mankind, whose name is not so much written as ploughed into the history of this world, is proof of the subtle virtue of this infusion.

Meantime, whilst the doors of the temple stand open, day and night, before every man, and the oracles of this truth cease never, it is guarded by one stern condition; this, namely it is an intuition. It cannot be received at second hand. Truly speaking, it is not instruction, but provocation, that I can receive from another soul. What he announces, I must find true in me,

or reject, and on his word, or as his second, be he who he may, I can accept nothing. On the contrary, the absence of this primary faith is the presence of degradation. As is the flood, so is the ebb. Let this faith depart, and the very words it spake and the things it made become false and hurtful. Then falls the church, the state, art, letters, life. The doctrine of the divine nature being forgotten, a sickness infects and dwarfs the constitution. Once man was all, now he is an appendage, a nuisance. And because the indwelling Supreme Spirit cannot wholly be got rid of, the doctrine of it suffers this perversion, that the divine nature is attributed to one or two persons, and denied to all the rest, and denied with fury. The doctrine of inspiration is lost, the base doctrine of the majority of voices usurps the place of the doctrine of the soul. Miracles, prophecy, poetry, the ideal life, the holy life, exist as ancient history merely, they are not in the belief, nor in the aspiration of society, but, when suggested, seem ridiculous. Life is comic or pitiful as soon as the high ends of being fade out of sight, and man becomes near-sighted, and can only attend to what addresses the senses.

These general views, which, whilst they are general, none will contest, find abundant illustration in the history of religion, and especially in the history of the Christian church. In that, all of us have had our birth and nurture. The truth contained in that, you, my young friends, are now setting forth to teach. As the Cultus, or established worship of the civilized world, it has great historical interest for us. Of its blessed words, which have been the consolation of humanity, you need not that I should speak. I shall endeavor to discharge my duty to you on this occasion, by pointing out two errors in its administration, which daily appear more gross from the point of view we have just now taken.

Jesus Christ belonged to the true race of prophets. He saw with open eye the mystery of the soul. Drawn by its severe harmony, ravished with its beauty, he lived in it, and had his being there. Alone in all history he estimated the greatness of man. One man was true to what is in you and me. He saw that God incarnates himself in man, and evermore goes forth anew to take possession of his World. He said, in this jubilee of sublime emotion, "I am divine. Through me, God acts; through me, speaks. Would you see God, see me; or see thee, when thou also thinkest as I now think." But what a

distortion did his doctrine and memory suffer in the same, in the next, and the following ages! There is the doctrine of the Reason which will bear to be taught by the Understanding. The understanding caught this high chant from the poet's lips, and said, in the next age "This was Jehovah come down out of heaven. I will kill you, if you say he was a man." The idioms of his language and the figures of his rhetoric have usurped the place of his truth, and churches are not built on his principles, but on his tropes. Christianity became Mythos, as the poetic teaching of Greece and of Egypt before. He spoke of miracles, for he felt that man's life was a miracle, and all that man doth, and he knew that this daily miracle shines as the character ascends. But the word Miracle, as pronounced by Christian churches, gives a false impression; it is Monster. It is not one with the blowing clover and the falling rain.

He felt respect for Moses and the prophets, but not unfit tenderness at postponing their initial revelation to the hour and the man that now is, to the eternal revelation in the heart. Thus was he a true man. Having seen that the law in us is commanding, he would not suffer it to be commanded. Boldly, with hand and heart, and life, he declared it was God. Thus is he, as I think, the only soul in history who has appreciated the worth of man.

I. In this point of view we become sensible of the first defect of historical Christianity. Historical Christianity has fallen into the error that corrupts all attempts to communicate religion. As it appears to us, and as it has appeared for ages, it is not the doctrine of the soul but an exaggeration of the personal, the positive, the ritual. It has dwelt, it dwells, with noxious exaggeration about the *person* of Jesus. The soul knows no person: It invites every man to expand to the full circle of the universe, and will have no preferences but those of spontaneous love. But by this eastern monarchy of Christianity, which indolence and fear have built, the friend of man is made the injurer of man. The man in which his name is surrounded with expressions which were once sallies of admiration and love, but are now petrified into official titles, kills all generous sympathy.

44 I . . . think. The words are not Jesus' exact words, but Emerson's interpretation of Jesus' meaning. • 49 Reason . . . Understanding. See note, p. 878. • 84 friend of man. When Elizabeth Peabody urged Emerson to write "friend" with a capital F, he replied, "If I did so, they would all go to sleep."

and liking All who hear me, feel that the language that describes Christ to Europe and America is not the style of friendship and enthusiasm to a good and noble heart. but is appropriated and formal,—paints a demigod, as the Orientals or the Greeks would describe Osiris or Apollo. Accept the injurious impositions of our early catechetical instruction, and even honesty and self-denial were but splendid sins, if they did not wear the Christian name. One would rather be

“A pagan, suckled in a creed outworn,”

than to be defrauded of his manly right in coming into nature and finding not names and places, not land and professions, but even virtue and truth foreclosed and monopolized. You shall not be a man even You shall not own the world, you shall not dare and live after the infinite Law that is in you, and in company with the infinite Beauty which heaven and earth reflect to you in all lovely forms, but you must subordinate your nature to Christ's nature, you must accept our interpretations, and take his portrait as the vulgar draw it.

That is always best which gives me to myself The sublime is excited in me by the great stoical doctrine, Obey thyself That which shows God in me, fortifies me. That which shows God out of me, makes me a wart and a wen. There is no longer a necessary reason for my being Already the long shadows of untimely oblivion creep over me, and I shall de cease forever

The divine bards are the friends of my virtue, of my intellect, of my strength They admonish me that the gleams which flash across my mind are not mine, but God's, that they had the like, and were not disobedient to the heavenly vision. So I love them Noble provocations go out from them, inviting me to resist evil, to subdue the world, and to Be And thus, by his holy thoughts, Jesus serves us, and thus only To aim to convert a man by miracles is a profanation of the soul A true conversion, a true Christ, is now, as always, to be made by the reception of beautiful sentiments It is true that a great and rich soul, like his, falling among the simple, does so preponderate, that, as his did, it names the world The world seems to exist for him, and they have not yet drunk so deeply of his sense as to see that only by coming again to themselves, or to God in themselves, can they grow forevermore It is a low benefit to give me something; it is a high benefit to

enable me to do somewhat of myself. The time is coming when all men will see that the gift of God to the soul is not a vaunting, overpowering, excluding sanctity, but a sweet, natural goodness, a goodness like thine and mine, and that so invites thine and mine to be and to grow

The injustice of the vulgar tone of preaching is not less flagrant to Jesus than to the souls which it profanes. The preachers do not see that they make his gospel not glad, and shear him of the locks of beauty and the attributes of heaven. When I see a majestic Epaminondas, or Washington, when I see among my contemporaries a true orator, an upright judge, a dear friend, when I vibrate to the melody and fancy of a poem; I see beauty that is to be desired And so lovely, and yet with more entire consent of my human being, sounds in my ear the severe music of the bards that have sung of the true God in all ages Now do not degrade the life and dialogues of Christ out of the circle of this charm, by insulation and peculiarity Let them lie as they befell, alive and warm, part of human life and of the landscape and of the cheerful day

2 The second defect of the traditionary and limited way of using the mind of Christ is a consequence of the first, this namely that the Moral Nature, that Law of laws whose revelations introduce greatness—yea, God himself—into the open soul, is not explored as the fountain of the established teaching in society Men have come to speak of the revelation as somewhat long ago given and done, as if God were dead The injury to faith throttles the preacher, and the goodliest of institutions becomes an uncertain and inarticulate voice

It is very certain that it is the effect of conversation with the beauty of the soul, to beget a desire and need to impart to others the same knowledge and love. If utterance is denied, the thought lies like a burden on the man Always the seer is a sayer Somehow his dream is told, somehow he publishes it with solemn joy. sometimes with pencil on canvas, sometimes with chisel on stone, sometimes in towers and aisles of granite, his soul's worship is builded, sometimes in anthems of in-

7 catechetical instruction, the questions and answers of the catechism, much in vogue in early New England • 10 A pagan . . . outworn, Wordsworth's "The World Is Too Much with Us," l. 10 • 31 not . . . vision Acts 26:19 "I was not disobedient unto the heavenly vision" • 56 Epaminondas, Theban statesman and general (d. 362 B.C.)

definite music, but clearest and most permanent, in words.

The man enamored of this excellency becomes its priest or poet. The office is coeval with the world. But observe the condition, the spiritual limitation of the office. The spirit only can teach. Not any profane man, not any sensual, not any liar, not any slave can teach, but only he can give, who has, he only can create, who is. The man on whom the soul descends, through whom the soul speaks, alone can teach. Courage, piety, love, wisdom, can teach, and every man can open his door to these angels, and they shall bring him the gift of tongues. But the man who aims to speak as books enable, as synods use, as the fashion guides, and as interest commands, babbles. Let him hush.

To this holy office you propose to devote yourselves. I wish you may feel your call in throbs of desire and hope. The office is the first in the world. It is of that reality that it cannot suffer the deduction of any falsehood. And it is my duty to say to you that the need was never greater of new revelation than now. From the views I have already expressed, you will infer the sad conviction, which I share, I believe, with numbers, of the universal decay and now almost death of faith in society. The soul is not preached. The Church seems to totter to its fall, almost all life extinct. On this occasion, any complaisance would be criminal which told you, whose hope and commission it is to preach the faith of Christ, that the faith of Christ is preached.

It is time that this ill-suppressed murmur of all thoughtful men against the famine of our churches,—this moaning of the heart because it is bereaved of the consolation, the hope, the grandeur that come alone out of the culture of the moral nature,—should be heard through the sleep of indolence, and over the din of routine. This great and perpetual office of the preacher is not discharged. Preaching is the expression of the moral sentiment in application to the duties of life. In how many churches, by how many prophets, tell me, is man made sensible that he is an infinite Soul, that the earth and heavens are passing into his mind, that he is drinking forever the soul of God? Where now sounds the persuasion, that by its very melody imparadises my heart, and so affirms its own origin in heaven? Where shall I hear words such as in elder ages drew men to leave all and follow,—father and mother, house and land, wife and child? Where shall I hear these august

laws of moral being so pronounced as to fill my ear, as I feel ennobled by the offer of my uttermost action as passion? The test of the true faith, certainly, should be its power to charm and command the soul, as the laws of nature control the activity of the hands,—so commanding that we find pleasure and honor in obeying. The faith should blend with the light of rising and of setting suns, with the flying cloud, the singing bird, and the breath of flowers. But now the priest's Sabbath has lost the splendor of nature, it is unlovely, we are glad when it is done, we can make, we do make, even sitting on our pews, a far better, holier, sweeter, for ourselves.

Whenever the pulpit is usurped by a formalist, the worshipper defrauded and disconsolate. We shrink as soon as the prayers begin, which do not uplift, but smite and offend us. We are fain to wrap our cloak about us, and secure, as best we can, a solitude that hears not. I once heard a preacher who sorely tempted me to say I would go to church no more. Men go, thought where they are wont to go, else had no soul entered the temple in the afternoon. A snow-storm was falling around us. The snow-storm was real, the preacher merely spectral, and the eye felt the sad contrast in looking at him, and then out of the window behind him into the beautiful meteor of the snow. He had lived in vain. He had no one word intimating that he had laughed or wept, was married or in love, had been commended, or cheated, or chagrined. If he had ever lived and acted we were none the wiser for it. The capital secret of his profession, namely, to convert life into truth, he had not learned. Not one fact in all his experience had he yet imported into his doctrine. This man had ploughed and planted and talked and bought and sold, he had read books, he had eaten and drunken, his head aches, his heart throbs, he smiles and suffers, yet was there not a surmise, a hint, in all the discourse, that he had ever lived at all. Not a line did he draw out of real history. The true preacher can be known by this, that he deals out to his people his life,—life passed through the fire of thought. But of the bad preacher, it could not be told from his sermon what age of the world he fell in, whether he had a father or a child, whether he was a

24 The Church extinct Emerson wrote in his *Journals* of "the corpse-cold Unitarianism of Brattle Street"

freeholder or a pauper, whether he was a citizen or a countryman; or any other fact of his biography. It seemed strange that the people should come to church. It seemed as if their houses were very unentertaining, that they should prefer this thoughtless clamor. It shows that there is a commanding attraction in the moral sentiment, that can lend a faint tint of light to dulness and ignorance coming in its name and place. The good hearer is sure he has been touched sometimes, is sure there is somewhat to be reached, and some word that can reach it. When he listens to these vain words, he comforts himself by their relation to his remembrance of better hours, and so they clatter and echo unchallenged.

I am not ignorant that when we preach unworthily, it is not always quite in vain. There is a good ear, in some men, that draws supplies to virtue out of very indifferent nutriment. There is poetic truth concealed in all the commonplaces of prayer and of sermons, and though foolishly spoken, they may be wisely heard, for each is some select expression that broke out in a moment of piety from some stricken or jubilant soul, and its excellency made it remembered. The prayers and even the dogmas of our church are like the zodiac of Denderah and the astronomical monuments of the Hindoos, wholly insulated from anything now extant in the life and business of the people. They mark the height to which the waters once rose. But this docility is a check upon the mischief from the good and devout. In a large portion of the community, the religious service gives rise to quite other thoughts and emotions. We need not chide the negligent servant. We are struck with pity, rather, at the swift retribution of his sloth. Alas for the unhappy man that is called to stand in the pulpit, and *not* give bread of life. Everything that befalls, accuses him. Would he ask contributions for the missions, foreign or domestic? Instantly his face is suffused with hame, to propose to his parish that they should send money a hundred or a thousand miles, to furnish such poor fare as they have at home and would do well to go a hundred or the thousand miles to escape. Would he urge people to a godly way of living,—and can he ask a fellow-creature to come to Sabbath meetings, when he and they all know what is the poor uttermost they can hope for therein? Will he invite them privately to the Lord's Supper? He dares not. If no heart warm

this rite, the hollow, dry, creaking formality is too plain, than that he can face a man of wit and energy and put the invitation without terror. In the street, what has he to say to the bold village blasphemer? The village blasphemer sees fear in the face, form, and gait of the minister.

Let me not taint the sincerity of this plea by any oversight of the claims of good men. I know and honor the purity and strict conscience of numbers of the clergy. What life the public worship retains, it owes to the scattered company of pious men, who minister here and there in the churches, and who, sometimes accepting with too great tenderness the tenet of the elders, have not accepted from others, but from their own heart, the genuine impulses of virtue, and so still command our love and awe, to the sanctity of character. Moreover, the exceptions are not so much to be found in a few eminent preachers, as in the better hours, the truer inspirations of all,—nay, in the sincere moments of every man. But, with whatever exception, it is still true that tradition characterizes the preaching of this country; that it comes out of the memory, and not out of the soul, that it aims at what is usual, and not at what is necessary and eternal; that thus historical Christianity destroys the power of preaching, by withdrawing it from the exploration of the moral nature of man, where the sublime is, where are the resources of astonishment and power. What a cruel injustice it is to that Law, the joy of the whole earth, which alone can make the thought dear and rich: that Law whose fatal sureness the astronomical orbits poorly emulate,—that it is travestied and depreciated, that it is behooted and behowled, and not a trait, not a word of it articulated. The pulpit in losing sight of this Law, loses its reason, and gropes after it knows not what. And for want of this culture the soul of the community is sick and faithless. It wants nothing so much as a stern, high, stoical, Christian discipline, to make it know itself and the divinity that speaks through it. Now man is ashamed of himself; he skulks and sneaks through the world, to be tolerated, to be

46 *Lord's Supper*. Emerson had resigned the pastorate of the Second Church in Boston in 1832 because of a disagreement with his parishioners on the nature and importance of the Lord's Supper. In a sermon, "The Lord's Supper" (printed in *Miscellanies*, Centenary Edition of his works), delivered to the Church September 9, 1832, he gave the reasons for his "want of sympathy" with the sacrament.

pitied, and scarcely in a thousand years does any man dare to be wise and good, and so draw after him the tears and blessings of his kind.

Certainly there have been periods when, from the inactivity of the intellect on certain truths, a greater faith was possible in names and persons. The Puritans in England and America found in the Christ of the Catholic Church and in the dogmas inherited from Rome, scope for their austere piety and their longings for civil freedom. But their creed is passing away, and none arises in its room. I think no man can go with his thoughts about him into one of our churches, without feeling that what hold the public worship had on men is gone, or going. It has lost its grasp on the affection of the good and the fear of the bad. In the country, neighborhoods, half parishes are *signing off*, to use the local term. It is already beginning to indicate character and religion to withdraw from the religious meetings. I have heard a devout person, who prized the Sabbath, say in bitterness of heart, "On Sundays, it seems wicked to go to church." And the motive that holds the best there is now only a hope and a waiting. What was once a mere circumstance, that the best and the worst men in the parish, the poor and the rich, the learned and the ignorant, young and old, should meet one day as fellows in one house, in sign of an equal right in the soul, has come to be a paramount motive for going thither.

My friends, in these two errors, I think, I find the causes of a decaying church and a wasting unbelief. And what greater calamity can fall upon a nation than the loss of worship? Then all things go to decay. Genius leaves the temple to haunt the senate or the market. Literature becomes frivolous. Science is cold. The eye of youth is not lighted by the hope of other worlds, and age is without honor. Society lives to trifles, and when men die we do not mention them.

And now, my brothers, you will ask, What in these desponding days can be done by us? The remedy is already declared in the ground of our complaint of the Church. We have contrasted the Church with the Soul. In the soul then let the redemption be sought. Wherever a man comes, there comes revolution. The old is for slaves. When a man comes, all books are legible, all things transparent, all religions are forms. He is religious. Man is the wonderworker. He is seen amid miracles. All men bless and curse. He saith yea and

nay, only. The stationariness of religion; the assumption that the age of inspiration is past, that the Bible is closed; the fear of degrading the character of Jesus by representing him as a man;—indicate with sufficient clearness the falsehood of our theology. It is the duty of a true teacher to show us that God is, not was; that He speaketh, not spake. The true Christianity,—a life like Christ's in the infinitude of man,—is lost. No man believeth in the soul of man, but only in some man, some person old and departed. Ah me! no man goeth alone. All men go in flocks to this saint or that poet, to avoid the God who seeth in secret. They cannot see in secret, they love to be blind in public. They think society wiser than their soul, and know not that one soul, and one soul, is wiser than the whole world. See how nations and races flit by on the sea of time and leave no ripple to where they floated or sunk, and one good soul shall make the name of Moses, or of Zeno, or of Zoroaster reverend forever. None assayeth the stern ambition to be the Self of the nation and of nature, but each would be an easy secondary to some Christian scheme, or some utopian connection, or some eminent man. Once let a man have his own knowledge of God, your own sentiment, and he will take secondary knowledge, as St. Paul's or George Fox's or Swedenborg's, and you get wide from God with every year this secondary form lasts, and if, as now, for centuries.—the chasm yawns to that breadth, that men can scarcely be convinced there is in them anything divine.

Let me admonish you, first of all, to go alone; to refuse the good models, even those which are sacred to the imagination of men, and dare to love God without mediator or veil. Friends enough you shall find who will hold up to your emulation Wesleys and Oberlins, Sairs and Prophets. Thank God for these good men, but say "I also am a man." Imitation cannot go above its model. The imitator dooms himself to hopeless mediocrity. The inventor did it because it was natural to him, and so in him it has a charm. In the imitator something el

19 a devout person, Mrs. Emerson, who is quoted in the *Journal* (December 3, 1837), as follows: "Lidian says, it is wicked to go to Church Sundays." • 64 Zeno, Greek philosopher, founder of the Stoic School. See note, p. 295. • 64 Zoroaster, founder of the ancient Persian religion about 1000 B.C. • 70 George Fox. See note, p. 81. • 79 Wesley, John Wesley. See note, p. 828. • 79 Oberlin, Jean Frédéric Oberlin (1740-1826), Franco-German clergyman and philanthropist.

is natural, and he bereaves himself of his own beauty, to come short of another man's.

Yourself a newborn bard of the Holy Ghost, cast behind you all conformity, and acquaint men at first hand with Deity. Look to it first and only, that fashion, custom, authority, pleasure, and money, are nothing to you,—are not bandages over your eyes, that you cannot see,—but live with the privilege of the immeasurable mind. Not too anxious to visit periodically all families and each family in your parish connection,—when you meet one of these men or women, be to them a divine man; be to them thought and virtue, let their timid aspirations find in you a friend; let their trampled instincts be genially tempted out in your atmosphere, let their doubts know that you have doubted, and their wonder feel that you have wondered. By trusting your own heart, you shall gain more confidence in other men. For all our penny-wisdom, for all our soul-destroying slavery to habit, it is not to be doubted that all men have sublime thoughts, that all men value the few real hours of life, they love to be heard, they love to be caught up into the vision of principles. We mark with light in the memory the few interviews we have had, in the dreary years of routine and of sin, with souls that made our souls wiser, that spoke what we thought; that told us what we knew, that gave us leave to be what we only were. Discharge to men the priestly office, and, present or absent, you shall be followed with their love as by an angel.

And, to this end, let us not aim at common degrees of merit. Can we not leave, to such as love it, the virtue that glitters for the commendation of society, and ourselves pierce the deep solitudes of absolute ability and worth? We easily come up to the standard of goodness in society. Society's praise can be cheaply secured, and almost all men are content with those easy merits, but the instant effect of conversing with God will be to put them away. There are persons who are not actors, not speakers, but influences; persons too great for fame, for display; who disdain eloquence, to whom all we call art and artist, seems too nearly allied to show and by-ends, to the exaggeration of the finite and selfish, and loss of the universal. The orators, the poets, the commanders enoach on us only as fair women do, by our allowance and homage. Slight them by preoccupation of mind, slight them, as you can well afford to do, by high and universal aims, and they instantly feel that you have right,

and that it is in lower places that they must shine. They also feel your right, for they with you are open to the influx of the all-knowing Spirit, which annihilates before its broad noon the little shades and gradations of intelligence in the compositions we call wiser and wisest. 50

In such high communion let us study the grand strokes of rectitude—a bold benevolence, an independence of friends, so that not the unjust wishes of those who love us shall impair our freedom, but we shall resist for truth's sake the freest flow of kindness, and appeal to sympathies far in advance; and—what is the highest form in which we know this beautiful element,—a certain solidity of merit, that has nothing to do with opinion, and which is so essentially and manifestly 60 virtue, that it is taken for granted that the right, the brave, the generous step will be taken by it, and nobody thinks of commending it. You would compliment a coxcomb doing a good act, but you would not praise an angel. The silence that accepts merit as the most natural thing in the world, is the highest applause. Such souls, when they appear, are the Imperial Guard of Virtue, the perpetual reserve, the dictators of fortune. One needs not praise their courage,—they are the heart and soul of 70 nature. O my friends, there are resources in us on which we have not drawn. There are men who rise refreshed on hearing a threat, men to whom a crisis which intimidates and paralyzes the majority,—demanding not the faculties of prudence and thrift, but comprehension, immovableness, the readiness of sacrifice,—comes graceful and beloved as a bride. Napoleon said of Massena, that he was not himself until the battle began to go against him; then, when the dead began to fall in ranks around him, awoke his powers of combination, and he put on terror and victory as a robe. So it is in rugged 80 crises, in unweariable endurance, and in aims which put sympathy out of the question, that the angel is shown. But these are heights that we can scarce remember and look up to without contrition and shame. Let us thank God that such things exist.

And now let us do what we can to rekindle the smouldering, nigh quenched fire on the altar. The evils of the church that now is are manifest. The question returns, What shall we do? I confess, all attempts to

76 Massena, André Masséna (1758-1817), Marshal of Napoleon I

project and establish a Cultus with new rites and forms, seem to me vain. Faith makes us, and not we it, and faith makes its own forms. All attempts to contrive a system are as cold as the new worship introduced by the French to the goddess of Reason,—today, pasteboard and filigree, and ending tomorrow in madness and murder. Rather let the breath of new life be breathed by you through the forms already existing. For if once you are alive, you shall find they shall become plastic and new.

10 The remedy to their deformity is first, soul, and second, soul, and evermore, soul. A whole popedom of forms one pulsation of virtue can uplift and vivify. Two inestimable advantages Christianity has given us, first the Sabbath, the jubilee of the whole world, whose light dawns welcome alike into the closet of the philosopher, into the garret of toil, and into prison-cells, and everywhere suggests, even to the vile, the dignity of spiritual being. Let it stand forevermore, a temple, which new love, new faith, new sight shall restore to more than its

20 first splendor to mankind. And secondly, the institution of preaching,—the speech of man to men,—essentially the most flexible of all organs, of all forms. What hinders that now, everywhere, in pulpits, in lecture-rooms, in houses, in fields, wherever the invitation of men or your own occasions lead you, you speak the very truth, as

your life and conscience teach it, and cheer the waiting fainting hearts of men with new hope and new relation?

I look for the hour when that supreme Beauty which ravished the souls of those Eastern men, and chiefly those Hebrews, and through their lips spoke oracles all time, shall speak in the West also. The Hebrew and Greek Scriptures contain immortal sentences, that have been bread of life to millions. But they have no epigrams of integrity, are fragmentary, are not shown in their order to the intellect. I look for the new Teacher that shall follow so far those shining laws that he shall see the complete full circle, shall see their rounding complete grade shall see the world to be the mirror of the soul, shall show the identity of the law of gravitation with purity of heart, and shall show that the Ought, that Duty, is connected with Science, with Beauty, and with Joy.

18

4 new . . . Reason. The "worship of Reason" was instituted in France in 1793 in the midst of the Reign of Terror. The use of "Reason" in this connection is Deistic and is not to be confused with Emerson's use of the word. • 32 Hebrew . . . Scriptures, the Old and New Testaments

Self-Reliance

Self-Reliance has been in the past, and perhaps is still, the best-known and most often quoted essay in American literature. "Trust thyself; every heart vibrates to that iron string," and "Nothing can bring you peace but the triumph of principles" are only two among many examples of Emerson's gift for expressing spiritual truth in quotable form. "These lofty sentences of Emerson," Matthew Arnold

wrote in 1884, "and a hundred others of like strain, I never have lost out of my memory, I never can lose them."

Emerson's belief in self-reliance follows as the logic result of his doctrine of the "over-soul." According to this doctrine, every man has something of the divine in his nature and is capable of establishing a direct relationship with the universal spirit. By means of what Emerson likes to call "the intuition of the moral sentiment," every man is capable of perceiving the highest truth. To quote from the essay, "We lie in the lap of immense intelligence which makes us receivers of its truth and organs of its activity." Every man, therefore, ought to rely upon his own spiritual perceptions, ought to be self-reliant.

Emerson was an individualist, and his **Self-Reliance** an extreme statement of the individualistic point of view. To the modern reader, the author may appear unmindful of social obligations when he says "What I must do is that concerns me, not what the people think"; and again

"Are they my poor?" But Emerson was not indifferent to society. He thought of society as composed of individuals. A good society would be a society composed of good individuals. The primary obligation of the individual, therefore, is to perfect his own life. Like his Puritan forbears, Emerson believed that social salvation could be achieved only through the salvation of the individuals who compose society.

A superficial reading may leave one with the impression that Emerson's doctrine is fatally easy. He appears to say, simply, "Do as you like." It should be remembered, however, that Emerson, again like his Puritan forbears, is holding himself to an almost intolerably high standard of thinking and living. The individual must obey his own highest instinct, must "absolve" himself to himself. Self-imposed requirements, in the case of a conscientious person, may be rigorous to the last degree. "If anyone imagines that this law is lax," says Emerson, a little defiantly, "let him keep its commandment one day."

I read the other day some verses written by an eminent painter which were original and not conventional. The soul always hears an admonition in such lines, let the subject be what it may. The sentiment they instil is of more value than any thought they may contain. To believe your own thought, to believe that what is true for you in your private heart is true for all men,—that is genius. Speak your latent conviction, and it shall be the universal sense, for the inmost in due time becomes the outmost, and our first thought is rendered back to us by the trumpets of the Last Judgment. Familiar as the voice of the mind is to each, the highest merit we ascribe to Moses, Plato and Milton is that they set at naught books and traditions, and spoke not what men, but what *they* thought. A man should learn to detect and watch that gleam of light which flashes across his mind from within, more than the lustre of the firmament of bards and ages. Yet he dismisses without notice his thought, because it is his. In every work of genius we recognize our own rejected thoughts; they come back to us with a certain alienated majesty. Great works of art have no more affecting lesson for us than this. They teach us to abide by our spontaneous impression with good-humored inflexibility then most when the whole cry of voices is on

the other side. Else to-morrow a stranger will say with masterly good sense precisely what we have thought and felt all the time, and we shall be forced to take with shame our own opinion from another.

There is a time in every man's education when he arrives at the conviction that envy is ignorance, that imitation is suicide, that he must take himself for better for worse as his portion, that though the wide universe is full of good, no kernel of nourishing corn can come to him but through his toil bestowed on that plot of ground which is given to him to till. The power which resides in him is new in nature, and none but he knows what that is which he can do, nor does he know until he has tried. Not for nothing one face, one character, one fact, makes much impression on him, and another none. This sculpture in the memory is not without preestablished harmony. The eye was placed where one ray should fall, that it might testify of that particular ray. We but half express ourselves, and are ashamed of that divine idea which each of us represents. It may be safely trusted as proportionate and of good issues, so it be faithfully imparted, but God will not have his work made manifest by cowards. A man is relieved and gay when he has put his heart into his work and done his best, but what he has said or done otherwise shall give him no peace. It is a deliverance which does not deliver. In the attempt his genius deserts him, no muse befriends, no invention, no hope.

Trust thyself: every heart vibrates to that iron string. Accept the place the divine providence has found for you, the society of your contemporaries, the connection of events. Great men have always done so, and confided themselves childlike to the genius of their age, betraying their perception that the absolutely trustworthy was seated at their heart, working through their hands, predominating in all their being. And we are now men, and must accept in the highest mind the same transcendent destiny, and not minors and invalids in a protected corner nor cowards fleeing before a revolution, but guides, redeemers and benefactors, obeying the Almighty effort and advancing on Chaos and the Dark.

What pretty oracles nature yields us on this text in the

¹ eminent painter, probably Washington Allston (1779-1843) • 65
Chaos. Dark, reminiscent of Milton's "Chaos and Old Night" in *Paradise Lost*, Bk. I, l. 543.

face and behavior of children, babes, and even brutes! That divided and rebel mind, that distrust of a sentiment because our arithmetic has computed the strength and means opposed to our purpose, these have not. Their mind being whole, their eye is as yet unconquered, and when we look in their faces we are disconcerted. Infancy conforms to nobody, all conform to it, so that one babe commonly makes four or five out of the adults who prattle and play to it. So God has armed youth and
 10 puberty and manhood no less with its own piquancy and charm, and made it enviable and gracious and its claims not to be put by, if it will stand by itself. Do not think the youth has no force, because he cannot speak to you and me. Hark! in the next room his voice is sufficiently clear and emphatic. It seems he knows how to speak to his contemporaries. Bashful or bold then, he will know how to make us seniors very unnecessary.

The nonchalance of boys who are sure of a dinner, and would disdain as much as a lord to do or say aught to
 20 conciliate one, is the healthy attitude of human nature. A boy is in the parlor what the pit is in the playhouse, independent, irresponsible, looking out from his corner on such people and facts as pass by, he tries and sentences them on their merits, in the swift, summary way of boys, as good, bad, interesting, silly, eloquent, troublesome. He cumbers himself never about consequences, about inter-
 30 ests; he gives an independent, genuine verdict. You must court him; he does not court you. But the man is as it were clapped into jail by his consciousness. As soon as
 30 he has once acted or spoken with *éclat* he is a committed person, watched by the sympathy or the hatreds of hundreds, whose affections must now enter into his account. There is no Lethe for this. Ah, that he could pass again into his neutrality! Who can thus avoid all pledges and, having observed, observe again from the same unaffected, unbiased, unbribable, unaffrighted innocence,—must always be formidable. He would utter opinions on all passing affairs, which being seen to be not private but necessary, would sink like darts into the ear of men and
 40 put them in fear.

These are the voices which we hear in solitude, but they grow faint and inaudible as we enter into the world. Society everywhere is in conspiracy against the manhood of every one of its members. Society is a joint-stock company, in which the members agree, for the better securing of his bread to each shareholder, to surrender

the liberty and culture of the eater. The virtue in most quest is conformity. Self-reliance is its aversion. It loathes not realities and creators, but names and customs.

Whoso would be a man, must be a nonconformist. who would gather immortal palms must not be hindered by the name of goodness, but must explore if it be goodness. Nothing is at last sacred but the integrity of your own mind. Absolve you to yourself, and you shall have the suffrage of the world. I remember an answer which when quite young I was prompted to make to a valiant adviser who was wont to importune me with the old doctrines of the church. On my saying, "What had I to do with the sacredness of traditions, if I live wholly from within?" my friend suggested—"But these impulses may be from below, not from above." I replied, "They do not seem to me to be such; but if I am the Devil's child, I will live then from the Devil." No law can be sacred to me but that of my nature. Good and bad are but names very readily transferable to that or this, the only right is what is after my constitution, the only wrong what is against it. A man is to carry himself in the presence of all opposition as if every thing were titular and ephemeral but he. I am ashamed to think how easily we capitulate to badges and names, to large societies and dead institutions. Every decent and well-spoken individual affects and sways me more than right. I ought to go upright and vital, and speak the rude truth in all ways. If malice and vanity wear the coat of philanthropy, shall that pass? If an angry big man assumes this bountiful cause of Abolition, and comes to me with his last news from Barbadoes, why should I not say to him, "Go love thy infant, love thy woo-chopper, be good-natured and modest, have that grace and never varnish your hard, uncharitable ambition with this incredible tenderness for black folk a thousand miles off. Thy love afar is spite at home." Rough and graceless would be such greeting, but truth is handsomer than the affectation of love. Your goodness must have some edge to it,—else it is none. The doctrine of

21 pit, that part of the theater now usually known in the United States as the "orchestra." In Elizabethan times, the pit was the cheapest location in the house and was occupied by the "groundlings" (see *Hamlet*, Act III, Scene ii, l. 11), who were very outspoken in their judgments on the performance. • 33 Lethe. See note, p. 803. • 5 palms, symbol of success. • 77 Barbadoes, an island in the British West Indies in which Negro slavery was abolished in 1834.

hatred must be preached, as the counteraction of the doctrine of love, when that pules and whines. I shun father and mother and wife and brother when my genius calls me. I would write on the lintels of the door-post, *Whim*. I hope it is somewhat better than whim at last, but we cannot spend the day in explanation. Expect me not to show cause why I seek or why I exclude company. Then again, do not tell me, as a good man did to-day, of my obligation to put all poor men in good situations. Are they *my* poor? I tell thee, thou foolish philanthropist, that I grudge the dollar, the dime, the cent I give to such men as do not belong to me and to whom I do not belong. There is a class of persons to whom by all spiritual affinity I am bought and sold, for them I will go to prison if need be; but your miscellaneous popular charities; the education at college of fools; the building of meeting-houses to the vain end to which many now stand, alms to sots, and the thousand-fold Relief Societies;—though I confess with shame I sometimes succumb and give the dollar, it is a wicked dollar, which by and by I shall have the manhood to withhold.

Virtues are, in the popular estimate, rather the exception than the rule. There is the man *and* his virtues. Men do what is called a good action, as some piece of courage or charity, much as they would pay a fine in expiation of daily non-appearance on parade. Their works are done as an apology or extenuation of their living in the world,—as invalids and the insane pay a high board. Their virtues are penances. I do not wish to expiate, but to live. My life is for itself and not for a spectacle. I much prefer that it should be of a lower strain, so it be genuine and equal, than that it should be glittering and unsteady. I wish it to be sound and sweet, and not to need diet and bleeding. I ask primary evidence that you are a man, and refuse this appeal from the man to his actions. I know that for myself it makes no difference whether I do or forbear those actions which are reckoned excellent. I cannot consent to pay for a privilege where I have intrinsic right. Few and mean as my gifts may be, I actually am, and do not need for my own assurance or the assurance of my fellows any secondary testimony.

What I must do is all that concerns me, not what the people think. This rule, equally arduous in actual and intellectual life, may serve for the whole distinction between greatness and meanness. It is the harder because you will always find those who think they know what is

your duty better than you know it. It is easy in the world to live after the world's opinion; it is easy in solitude to live after our own, but the great man is he who in the midst of the crowd keeps with perfect sweetness the independence of solitude.

The objection to conforming to usages that have become dead to you is that it scatters your force. It loses your time and blurs the impression of your character. If you maintain a dead church, contribute to a dead Bible-society, vote with a great party either for the government or against it, spread your table like base house-keepers,—under all these screens I have difficulty to detect the precise man you are, and of course so much force is withdrawn from your proper life. But do your work, ⁶⁰ and I shall know you. Do your work, and you shall reinforce yourself. A man must consider what a blind-man's-buff is this game of conformity. If I know your sect I anticipate your argument. I hear a preacher announce for his text and topic the expediency of one of the institutions of his church. Do I not know beforehand that not possibly can he say a new and spontaneous word? Do I not know that with all this ostentation of examining the grounds of the institution he will do no such thing? Do I not know that he is pledged to himself not to look ⁷⁰ but at one side, the permitted side, not as a man, but as a parish minister? He is a retained attorney, and these airs of the bench are the emptiest affectation. Well, most men have bound their eyes with one or another handkerchief, and attached themselves to some one of these communities of opinion. This conformity makes them not false in a few particulars, authors of a few lies, but false in all particulars. Their every truth is not quite true. Their two is not the real two, their four is not the real four, so that every word they say chagrins us and we ⁸⁰ know not where to begin to set them right. Meantime nature is not slow to equip us in the prison-uniform of the party to which we adhere. We come to wear one cut of face and figure, and acquire by degrees the gentlest asinine expression. There is a mortifying experience in particular, which does not fail to wreak itself also in the general history, I mean "the foolish face of praise," the forced smile which we put on in company where we

4 lintels. A lintel is the crosspiece above a door • 73 bench, the judge, who sits on the 'bench' • 87 the foolish . . . praise, from Pope's famous satire on Addison in his "Epistle to Dr. Arbuthnot"

do not feel at ease, in answer to conversation which does not interest us. The muscles, not spontaneously moved but moved by a low usurping wilfulness, grow tight about the outline of the face, with the most disagreeable sensation

For nonconformity the world whips you with its displeasure. And therefore a man must know how to estimate a sour face. The by-standers look askance on him in the public street or in the friend's parlor. If this aversion
10 had its origin in contempt and resistance like his own he might well go home with a sad countenance, but the sour faces of the multitude, like their sweet faces, have no deep cause, but are put on and off as the wind blows and a newspaper directs. Yet is the discontent of the multitude more formidable than that of the senate and the college. It is easy enough for a firm man who knows the world to brook the rage of the cultivated classes. Their rage is decorous and prudent, for they are timid, as being very vulnerable themselves. But when to their
20 feminine rage the indignation of the people is added, when the ignorant and the poor are aroused, when the unintelligent brute force that lies at the bottom of society is made to growl and mow, it needs the habit of magnanimity and religion to treat it godlike as a trifle of no concernment.

The other terror that scares us from self-trust is our consistency, a reverence for our past act or word because the eyes of others have no other data for computing our orbit than our past acts, and we are loth to disappoint
30 them.

But why should you keep your head over your shoulder? Why drag about this corpse of your memory, lest you contradict somewhat you have stated in this or that public place? Suppose you should contradict yourself, what then? It seems to be a rule of wisdom never to rely on your memory alone, scarcely even in acts of pure memory, but to bring the past for judgment into the thousand-eyed present, and live ever in a new day. In your metaphysics you have denied personality to the
40 Deity, yet when the devout motions of the soul come, yield to them heart and life, though they should clothe God with shape and color. Leave your theory, as Joseph his coat in the hand of the harlot, and flee.

A foolish consistency is the hobgoblin of little minds, adored by little statesmen and philosophers and divines. With consistency a great soul has simply nothing to do.

He may as well concern himself with his shadow on wall. Speak what you think now in hard words and morrow speak what to-morrow thinks in hard words again, though it contradict every thing you said to-day. "Ah, so you shall be sure to be misunderstood."—Is it bad then to be misunderstood? Pythagoras was misunderstood, and Socrates, and Jesus, and Luther, and Copernicus, and Galileo, and Newton, and every pure and noble spirit that ever took flesh. To be great is to be misunderstood.

I suppose no man can violate his nature. All sallies of his will are rounded in by the law of his being. As the inequalities of Andes and Himmaleh are insignificant in the curve of the sphere. Nor does it matter how you gauge and try him. A character is like an acrostic or Alexandrian stanza,—read it forward, backward, across, it still spells the same thing. In this pleasing contrite wood-life which God allows me, let me record by day my honest thought without prospect or retrospect, and, I cannot doubt, it will be found symmetrical though I mean it not and see it not. My book should smell of pines and resound with the hum of insects. The swallow over my window should interweave that thread or straw he carries in his bill into my web also. We provide for what we are. Character teaches above our wills. Men imagine that they communicate their virtue or vice only by overt actions, and do not see that virtue or vice enters a breath every moment.

There will be an agreement in whatever variety of actions, so they be each honest and natural in their hour. For of one will, the actions will be harmonious, however unlike they seem. These varieties are lost sight of at a little distance, at a little height of thought. One tendency unites them all. The voyage of the best ship is a zigzag line of a hundred tacks. See the line from a sufficient distance, and it straightens itself to the average tendency.

23 mow, make grimaces • 42 Joseph . . . flee. The allusion is Genesis 39:12 • 52 Pythagoras. See note, p. 259 • 53 Socrates, Greek philosopher of the fifth century B.C. • 53 Luther, Martin Luther. See note, p. 129 • 53 Copernicus, Nikolaus Copernicus (1473-1543), Polish astronomer whose system superseded the Ptolemaic • 54 Galileo (1564-1642), Italian astronomer • 54 Newton, Sir Isaac Newton. See note, p. 879 • 59 Andes, a mountain range in South America, extending from the Isthmus of Panama to Cape Horn • 59 Himmaleh, or Himalaya, a mountain range between India and China in which are found the world's highest mountains

Your genuine action will explain itself and will explain your other genuine actions. Your conformity explains nothing. Act singly, and what you have already done singly will justify you now. Greatness appeals to the future. If I can be firm enough to-day to do right and scorn eyes, I must have done so much right before as to defend me now. Be it how it will, do right now. Always scorn appearances and you always may. The force of character is cumulative. All the foregone days of virtue work their health into this. What makes the majesty of the heroes of the senate and the field, which so fills the imagination? The consciousness of a train of great days and victories behind. They shed a united light on the advancing actor. He is attended as by a visible escort of angels. That is it which throws thunder into Chatham's voice, and dignity into Washington's port, and America into Adams's eye. Honor is venerable to us because it is no ephemera. It is always ancient virtue. We worship it today because it is not of to-day. We love it and pay it homage because it is not a trap for our love and homage, but is self-dependent, self-derived, and therefore of an old immaculate pedigree, even if shown in a young person.

I hope in these days we have heard the last of conformity and consistency. Let the words be gazetted and ridiculous henceforward. Instead of the gong for dinner, let us hear a whistle from the Spartan fife. Let us never bow and apologize more. A great man is coming to eat at my house. I do not wish to please him, I wish that he should wish to please me. I will stand here for humanity, and though I would make it kind, I would make it true. Let us affront and reprimand the smooth mediocrity and squalid contentment of the times, and hurl in the face of custom and trade and office, the fact which is the upshot of all history, that there is a great responsible Thinker and Actor working wherever a man works, that a true man belongs to no other time or place, but is the centre of things. Where he is, there is nature. He measures you and all men and all events. Ordinarily, every body in society reminds us of somewhat else, or of some other person. Character, reality, reminds you of nothing else, it takes place of the whole creation. The man must be so much that he must make all circumstances indifferent. Every true man is a cause, a country, and an age, requires infinite spaces and numbers and time fully to accomplish his design;—and posterity seem

to follow his steps as a train of clients. A man Cæsar is born, and for ages after we have a Roman Empire. Christ is born, and millions of minds so grow and cleave to his genius that he is confounded with virtue and the possible of man. An institution is the lengthened shadow of one man, as, Monachism, of the Hermit Antony; the Reformation, of Luther, Quakerism, of Fox, Methodism, of Wesley, Abolition, of Clarkson. Scipio, Milton called "the height of Rome," and all history resolves itself very easily into the biography of a few stout and earnest persons.

Let a man then know his worth, and keep things under his feet. Let him not peep or steal, or skulk up and down with the air of a charity-boy, a bastard, or an interloper in the world which exists for him. But the man in the street, finding no worth in himself which corresponds to the force which built a tower or sculptured a marble god, feels poor when he looks on these. To him a palace, a statue, or a costly book have an alien and forbidding air, much like a gay equipage, and seem to say like that, "Who are you, Sir?" Yet they all are his, suitors for his notice, petitioners to his faculties that they will come out and take possession. The picture waits for my verdict, it is not to command me, but I am to settle its claims to praise. That popular fable of the sot who was picked up dead-drunk in the street, carried to the duke's house, washed and dressed and laid in the duke's bed, and, on his waking, treated with all obsequious ceremony like the duke, and assured that he had been insane, owes its popularity to the fact that it symbolizes so well the state of man, who is in the world a sort of sot, but now and then wakes up, exercises his reason and finds himself a true prince.

15 Chatham, William Pitt, first Earl of Chatham (1708-1778), English statesman • 17 Adams, Samuel Adams (1722-1803), Revolutionary patriot • 25 gazetted, announced in a gazette, as, for example, a case of bankruptcy • 52 Monachism, monasticism • 52 Antony, St. Anthony (251-356?), Egyptian founder of monachism • 53 Fox, George Fox. See note, p. 837 • 54 Wesley, John Wesley. See note, p. 828 • 54 Clarkson, Thomas Clarkson (1760-1846), English abolitionist • 54 Scipio (185?-129? B.C.), Roman general who captured and destroyed Carthage • 55 the height of Rome, *Paradise Lost*, Bk. IX, l. 510 • 55 all . . . persons. Compare Carlyle's famous dictum at the beginning of *Heroes and Hero-Worship* (1841): "For, as I take it, Universal History, the history of what man has accomplished in this world, is at bottom the History of the Great Men who have worked here" • 71 fable. Such a story is told in the "Induction" to Shakespeare's *Taming of the Shrew*.

Our reading is mendicant and sycophantic. In history our imagination plays us false. Kingdom and lordship, power and estate, are a gaudier vocabulary than private John and Edward in a small house and common day's work, but the things of life are the same to both; the sum total of both is the same. Why all this deference to Alfred and Scanderbeg and Gustavus? Suppose they were virtuous, did they wear out virtue? As great a stake depends on your private act to-day as followed their
 10 public and renowned steps. When private men shall act with original views, the lustre will be transferred from the actions of kings to those of gentlemen

The world has been instructed by its kings, who have so magnetized the eyes of nations. It has been taught by this colossal symbol the mutual reverence that is due from man to man. The joyful loyalty with which men have everywhere suffered the king, the noble, or the great proprietor to walk among them by a law of his own, make his own scale of men and things and reverse
 20 theirs, pay for benefits not with money but with honor, and represent the law in his person, was the hieroglyphic by which they obscurely signified their consciousness of their own right and comeliness, the right of every man.

The magnetism which all original action exerts is explained when we inquire the reason of self-trust. Who is the Trustee? What is the aboriginal Self, on which a universal reliance may be grounded? What is the nature and power of that science-baffling star, without parallax, without calculable elements, which shoots a ray of
 30 beauty even into trivial and impure actions, if the least mark of independence appear? The inquiry leads us to that source, at once the essence of genius, of virtue, and of life, which we call Spontaneity or Instinct. We denote this primary wisdom as Intuition, whilst all later teachings are tuition. In that deep force, the last fact behind which analysis cannot go, all things find their common origin. For the sense of being which in calm hours rises, we know not how, in the soul, is not diverse from things, from space, from light, from time, from man, but
 40 one with them and proceeds obviously from the same source whence their life and being also proceed. We first share the life by which things exist and afterwards see them as appearances in nature and forget that we have shared their cause. Here is the fountain of action and of thought. Here are the lungs of that inspiration which giveth man wisdom and which cannot be denied

without impiety and atheism. We lie in the lap of mense intelligence, which makes us receivers of truth and organs of its activity. When we discern just when we discern truth, we do nothing of ourselves, allow a passage to its beams. If we ask whence comes, if we seek to pry into the soul that causes philosophy is at fault. Its presence or its absence is we can affirm. Every man discriminates between voluntary acts of his mind and his involuntary perceptions, and knows that to his involuntary perception perfect faith is due. He may err in the expression of them, but he knows that these things are so, like day and night, not to be disputed. My wilful actions and accusations are but roving,—the idlest reverie, the faint native emotion, command my curiosity and respect. Thoughtless people contradict as readily the statement of perceptions as of opinions, or rather much more readily, for they do not distinguish between percept and notion. They fancy that I choose to see this or that thing. But perception is not whimsical, but fatal. I see a trait, my children will see it after me, and in course of time all mankind,—although it may chance that one has seen it before me. For my perception of it is much a fact as the sun.

The relations of the soul to the divine spirit are pure that it is profane to seek to interpose helps. It may be that when God speaketh he should communicate, not one thing, but all things; should fill the world with his voice, should scatter forth light, nature, time, souls, from the centre of the present thought, and new date at new create the whole. Whenever a mind is simple and receives a divine wisdom, old things pass away,—near teachers, texts, temples fall: it lives now, and absorbs past and future into the present hour. All things are made sacred by relation to it,—one as much as another. All things are dissolved to their centre by their cause and in the universal miracle petty and particular miracle disappear. If therefore a man claims to know and speak of God and carries you backward to the phraseology of some old mouldered nation in another country, in an

7 Alfred, Alfred the Great (849-901), king of the West Saxons • Scanderbeg (1403-1468), Albanian patriot who opposed the Turks • 7 Gustavus, Gustavus Adolphus (1594-1632), king of Sweden
 28 parallax, the apparent displacement (or the difference in apparent direction) of an object, as seen from two different points

other world, believe him not. Is the acorn better than the oak which is its fulness and completion? Is the parent better than the child into whom he has cast his ripened being? Whence then this worship of the past? The centuries are conspirators against the sanity and authority of the soul. Time and space are but physiological colors which the eye makes, but the soul is light. where it is, is day; where it was, is night, and history is an imper-
10 cheerful apologue or parable of my being and becoming

Man is timid and apologetic, he is no longer upright, he dares not say 'I think,' 'I am,' but quotes some saint or sage. He is ashamed before the blade of grass or the blowing rose. These roses under my window make no reference to former roses or to better ones; they are for what they are, they exist with God to-day. There is no time to them. There is simply the rose; it is perfect in every moment of its existence. Before a leaf-bud has burst, its whole life acts, in the full-blown flower there
20 is no more; in the leafless root there is no less. Its nature is satisfied and it satisfies nature in all moments alike. But man postpones or remembers, he does not live in the present, but with reverted eye laments the past, or, heedless of the riches that surround him, stands on tiptoe to foresee the future. He cannot be happy and strong until he too lives with nature in the present, above time.

This should be plain enough. Yet see what strong intellects dare not yet hear God himself unless he speak the phraseology of I know not what David, or Jeremiah, or Paul. We shall not always set so great a price on a few texts, on a few lives. We are like children who repeat by rote the sentences of grandames and tutors, and, as they grow older, of the men of talents and character they chance to see,—painfully recollecting the exact words they spoke, afterwards when they come into the point of view which those had who uttered these sayings, they understand them and are willing to let the words go, for at any time they can use words as good when occasion comes. If we live truly, we shall see truly. It is as easy for the strong man to be strong, as it is for the weak to be weak. When we have new perception, we shall gladly disburden the memory of its hoarded treasures as old rubbish. When a man lives with God, his voice shall be as sweet as the murmur of the brook and the rustle of the corn.

And now at last the highest truth on this subject re-

mains unsaid, probably cannot be said, for all that we say is the far-off remembering of the intuition. That thought by what I can now nearest approach to say it, is this. When good is near you, when you have life in yourself, it is not by any known or accustomed way; you shall not discern the footprints of any other, you shall not see the face of man; you shall not hear any name,—the way, the thought, the good, shall be wholly strange and new. It shall exclude example and experience. You take the way from man, not to man. All persons that ever existed are its forgotten ministers. Fear and hope are alike beneath it. There is somewhat low even in hope. In the hour of vision there is nothing that can be called gratitude, nor properly joy. The soul raised over the passion beholds identity and eternal causation, perceives the self-existence of Truth and Right, and calms itself with knowing that all things go well. Vast spaces of nature, the Atlantic Ocean, the South Sea; long intervals of time, years, centuries, are of no account. This which I think and feel underlay every former state of life and circumstances, as it does underlie my present, and what is called life and what is called death.

Life only avails, not the having lived. Power ceases in the instant of repose; it resides in the moment of
70 transition from a past to a new state, in the shooting of the gulf, in the darting to an aim. This one fact the world hates, that the soul *becomes*; for that forever degrades the past, turns all riches to poverty, all reputation to a shame, confounds the saint with the rogue, shoves Jesus and Judas equally aside. Why then do we prate of self-reliance? Inasmuch as the soul is present there will be power not confident but agent. To talk of reliance is a poor external way of speaking. Speak rather of that which relies because it works and is. Who has more
80 obedience than I masters me, though he should not raise his finger. Round him I must revolve by the gravitation of spirits. We fancy it rhetoric when we speak of eminent virtue. We do not yet see that virtue is Height, and that a man or a company of men, plastic and permeable to principles, by the law of nature must overpower and ride all cities, nations, kings, rich men, poets, who are not.

This is the ultimate fact which we so quickly reach on this, as on every topic, the resolution of all into the
90 ever-blessed ONE. Self-existence is the attribute of the Supreme Cause, and it constitutes the measure of good by

the degree in which it enters into all lower forms. All things real are so by so much virtue as they contain Commerce, husbandry, hunting, whaling, war, eloquence, personal weight, are somewhat, and engage my respect as examples of its presence and impure action I see the same law working in nature for conservation and growth Power is, in nature, the essential measure of right Nature suffers nothing to remain in her kingdoms which cannot help itself The genesis and maturation of a
10 planet, its poise and orbit, the bended tree recovering itself from the strong wind, the vital resources of every animal and vegetable, are demonstrations of the self-sufficing and therefore self-relying soul

Thus all concentrates let us not rove; let us sit at home with the cause Let us stun and astonish the intruding rabble of men and books and institutions by a simple declaration of the divine fact Bid the invaders take the shoes from off their feet, for God is here within Let our
20 simplicity judge them, and our docility to our own law demonstrate the poverty of nature and fortune beside our native riches

But now we are a mob Man does not stand in awe of man, nor is his genius admonished to stay at home, to put itself in communication with the internal ocean, but it goes abroad to beg a cup of water of the urns of other men We must go alone I like the silent church before the service begins, better than any preaching How far off, how cool, how chaste the persons look, begirt each one with a precinct or sanctuary! So let us always sit
30 Why should we assume the faults of our friend, or wife, or father, or child, because they sit around our hearth, or are said to have the same blood? All men have my blood and I all men's Not for that will I adopt their petulance or folly, even to the extent of being ashamed of it But your isolation must not be mechanical, but spiritual, that is, must be elevation At times the whole world seems to be in conspiracy to importune you with emphatic trifles Friend, client, child, sickness, fear, want, charity, all knock at once at thy closet door and say,—
40 'Come out unto us' But keep thy state; come not into their confusion The power men possess to annoy me I give them by a weak curiosity No man can come near me but through my act. "What we love that we have, but by desire we bereave ourselves of the love"

If we cannot at once rise to the sanctities of obedience and faith, let us at least resist our temptations; let us

enter into the state of war and wake Thor and Woden courage and constancy, in our Saxon breasts This is to be done in our smooth times by speaking the truth. Cheer this lying hospitality and lying affection Live no long to the expectation of these deceived and deceiving people with whom we converse Say to them, 'O father, mother, O wife, O brother, O friend, I have lived with you after appearances hitherto Henceforward I am the truth's Be it known unto you that henceforward I obey no law less than the eternal law I will have no covenants but proximities I shall endeavor to nourish my parent to support my family to be the chaste husband of my wife,—but these relations I must fill after a new and unprecedented way I appeal from your customs I must be myself I cannot break myself any longer for you, or you If you can love me for what I am, we shall be the happier If you cannot, I will still seek to deserve that you should I will not hide my tastes or aversions I will so trust that what is deep is holy, that I will do strongly before the sun and moon whatever inly rejoices me and the heart appoints If you are noble, I will love you, if you are not, I will not hurt you and myself by hypocritical attentions If you are true, but not in the same truth with me, cleave to your companions, I will seek my own I do this not selfishly but humbly and truly It is alike your interest, and mine, and all men's, however long we have dwelt in lies, to live in truth Does this sound harsh to-day? You will soon love what is dictated by your nature as well as mine, and if we follow the truth it will bring us out safe at last'—But so may you give these friends pain Yes, but I cannot sell my liberty and my power, to save their sensibility Besides, all persons have their moments of reason, when they look out into the region of absolute truth, then will they justify me and do the same thing

The populace think that your rejection of popular standards is a rejection of all standard, and mere antinomianism, and the bold sensualist will use the name of philosophy to gild his crimes But the law of conscious-

18 shoes . . . feet, an allusion to the words of God to Moses in Exodus 3:5 " . . . put off thy shoes from off thy feet, for the place whereon thou standest is holy ground" • 47 Thor. See note, p. 837 • 47 Woden, or Odin, is treated at length in Carlyle's *Heroes and Hero-Worship* as "the central figure of Scandinavian Paganism" • 83 antinomianism, the doctrine that the moral law may be set aside on the ground that faith alone is necessary to salvation

ness abides. There are two confessionals, in one or the other of which we must be shriven. You may fulfil your round of duties by clearing yourself in the *direct*, or in the *reflex* way. Consider whether you have satisfied your relations to father, mother, cousin, neighbor, town, cat, and dog—whether any of these can upbraid you. But I may also neglect this reflex standard and absolve me to myself. I have my own stern claims and perfect circle. It denies the name of duty to many offices that are called
 10 duties. But if I can discharge its debts it enables me to dispense with the popular code. If any one imagines that this law is lax, let him keep its commandment one day.

And truly it demands something godlike in him who has cast off the common motives of humanity and has ventured to trust himself for a taskmaster. High be his heart, faithful his will, clear his sight, that he may in good earnest be doctrine, society, law, to himself, that a simple purpose may be to him as strong as iron necessity is to others!

If any man consider the present aspects of what is called by distinction *society*, he will see the need of these ethics. The sinew and heart of man seem to be drawn out, and we are become timorous, desponding whimperers. We are afraid of truth, afraid of fortune, afraid of death, and afraid of each other. Our age yields no great and perfect persons. We want men and women who shall renovate life and our social state, but we see that most natures are insolvent, cannot satisfy their own wants, have an ambition out of all proportion to their practical force and do lean and beg day and night continually. Our housekeeping is mendicant, our arts, our occupations, our marriages, our religion we have not chosen, but society has chosen for us. We are parlor soldiers. We shun the rugged battle of fate, where strength is born.

If our young men miscarry in their first enterprises they lose all heart. If the young merchant fails, men say he is *ruined*. If the finest genius studies at one of our colleges and is not installed in an office within one year afterwards in the cities or suburbs of Boston or New York, it seems to his friends and to himself that he is right in being disheartened and in complaining the rest of his life. A sturdy lad from New Hampshire or Vermont, who in turn tries all the professions, who *teams it, arms it, peddles*, keeps a school, preaches, edits a news-

paper, goes to Congress, buys a township, and so forth, in successive years, and always like a cat falls on his feet, is worth a hundred of these city dolls. He walks abreast with his days and feels no shame in not 'studying a profession,' for he does not postpone his life, but lives already. He has not one chance, but a hundred chances. Let a Stoic open the resources of man and tell men they are not leaning willows, but can and must detach themselves, that with the exercise of self-trust, new powers shall appear, that a man is the word made flesh, born to shed healing to the nations; that he should be ashamed of our compassion, and that the moment he acts from himself, tossing the laws, the books, idolatries and customs out of the window, we pity him no more but
 60 thank and revere him,—and that teacher shall restore the life of man to splendor and make his name dear to all history.

It is easy to see that a greater self-reliance must work a revolution in all the offices and relations of men; in their religion; in their education, in their pursuits, their modes of living, their association; in their property; in their speculative views.

1 In what prayers do men allow themselves! That which they call a holy office is not so much as brave and manly. Prayer looks abroad and asks for some foreign
 70 addition to come through some foreign virtue, and loses itself in endless mazes of natural and supernatural, and mediatorial and miraculous. Prayer that craves a particular commodity, anything less than all good, is vicious. Prayer is the contemplation of the facts of life from the highest point of view. It is the soliloquy of a beholding and jubilant soul. It is the spirit of God pronouncing his works good. But prayer as a means to effect a private
 80 end is meanness and theft. It supposes dualism and not unity in nature and consciousness. As soon as the man is at one with God, he will not beg. He will then see prayer in all action. The prayer of the farmer kneeling in his field to weed it, the prayer of the rower kneeling with the stroke of his oar, are true prayers heard throughout nature, though for cheap ends. Caratach, in Fletcher's

56 word made flesh. Compare John 1:14 "And the Word was made flesh, and dwelt among us." • 57 healing . . . nations. Compare Revelation 22:2 "and the leaves of the tree [of life] were for the healing of the nations." • 78 God . . . good. Compare Genesis 1:31 "And God saw everything that he had made, and behold, it was very good."

"Bonduca," when admonished to inquire the mind of the god Audate, replies,—

His hidden meaning lies in our endeavors;
Our valors are our best gods.

Another sort of false prayers are our regrets. Discontent is the want of self-reliance. It is infirmity of will. Regret calamities if you can thereby help the sufferer, if not, attend your own work and already the evil begins to be repaired. Our sympathy is just as base. We come to them who weep foolishly and sit down and cry for company, instead of imparting to them truth and health in rough electric shocks, putting them once more in communication with their own reason. The secret of fortune is joy in our hands. Welcome evermore to gods and men is the self-helping man. For him all doors are flung wide, him all tongues greet, all honors crown, all eyes follow with desire. Our love goes out to him and embraces him because he did not need it. We solicitously and apologetically caress and celebrate him because he held on his way and scorned our disapprobation. The gods love him because men hated him. "To the persevering mortal," said Zoroaster, "the blessed Immortals are swift."

As men's prayers are a disease of the will, so are their creeds a disease of the intellect. They say with those foolish Israelites, 'Let not God speak to us, lest we die. Speak thou, speak any man with us, and we will obey.' Everywhere I am hindered of meeting God in my brother, because he has shut his own temple doors and recites fables merely of his brother's, or his brother's brother's God. Every new mind is a new classification. If it prove a mind of uncommon activity and power, a Locke, a Lavoisier, a Hutton, a Bentham, a Fourier, it imposes its classification on other men, and lo! a new system. In proportion to the depth of the thought, and so to the number of the objects it touches and brings within reach of the pupil, is his complacency. But chiefly is this apparent in creeds and churches, which are also classifications of some powerful mind acting on the elemental thought of duty and man's relation to the Highest. Such is Calvinism, Quakerism, Swedenborgism. The pupil takes the same delight in subordinating every thing to the new terminology as a girl who has just learned botany in seeing a new earth and new seasons thereby. It will happen for a time that the pupil will

find his intellectual power has grown by the study of master's mind. But in all unbalanced minds the classification is idolized, passes for the end and not for a speech-exhaustible means, so that the walls of the system blot to their eye in the remote horizon with the walls of the universe; the luminaries of heaven seem to them hanging on the arch their master built. They cannot imagine how you aliens have any right to see,—how you can. 'It must be somehow that you stole the light from them.' They do not yet perceive that light, unsystematic, indomitable, will break into any cabin, even into the Let them chirp awhile and call it their own. If they honest and do well, presently their neat new pinfold will be too strait and low, will crack, will lean, will and vanish, and the immortal light, all young and joy, million-orbed, million-colored, will beam over the universe as on the first morning.

2. It is for want of self-culture that the superstition of Travelling, whose idols are Italy, England, Egypt, retain its fascination for all educated Americans. They would make England, Italy, or Greece venerable in the imagination, did so by sticking fast where they were, like the axis of the earth. In manly hours we feel that duty is our place. The soul is no traveller, the wise man stays at home, and when his necessities, his duties, on any occasion call him from his house, or into foreign lands, he is at home still and shall make men sensible by the expression of his countenance that he goes, the missionary of wisdom and virtue, and visits cities and men like a sovereign and not like an interloper or a valet.

I have no churlish objection to the circumnavigation of the globe for the purposes of art, of study, and benevolence, so that the man is first domesticated, or does not go abroad with the hope of finding somewhat greater than he knows. He who travels to be amused, or to get something which he does not carry, travels away from himself and grows old even in youth among old things. I Thebes, in Palmyra, his will and mind have become old and dilapidated as they. He carries ruins to ruins.

3 His gods, from John Fletcher's *Bonduca* (1647), Act III, Scene II 88-89 • 22 Zoroaster. See note, p. 390 • 26 Let . . . obey, inaccurately quoted from Exodus 20 19 • 33 Locke, John Locke. See note p. 252 • 33 Lavoisier, Antoine Lavoisier (1743-1794), French chemist • 33 Hutton, James Hutton (1726-1797), English geologist • 3 Bentham, Jeremy Bentham (1748-1832), English philosopher and jurist • 33 Fourier, François Fourier (1772-1837), French socialist • 63 Thebes ancient ruined city in Egypt • 83 Palmyra, ancient ruined city in Syria

Travelling is a fool's paradise. Our first journeys discover to us the indifference of places. At home I dream that at Naples, at Rome, I can be intoxicated with beauty and lose my sadness. I pack my trunk, embrace my friends, embark on the sea and at last wake up in Naples, and there beside me is the stern fact, the sad self, unrelenting, identical, that I fled from. I seek the Vatican and the palaces. I affect to be intoxicated with sights and suggestions, but I am not intoxicated. My giant goes with me wherever I go.

3. But the rage of travelling is a symptom of a deeper unsoundness affecting the whole intellectual action. The intellect is vagabond, and our system of education fosters restlessness. Our minds travel when our bodies are forced to stay at home. We imitate, and what is imitation but the travelling of the mind? Our houses are built with foreign taste, our shelves are garnished with foreign ornaments, our opinions, our tastes, our faculties, lean, and follow the Past and the Distant. The soul created the arts wherever they have flourished. It was in his own mind that the artist sought his model. It was an application of his own thought to the thing to be done and the conditions to be observed. And why need we copy the Doric or the Gothic model? Beauty, convenience, grandeur of thought and quaint expression are as near to us as to any, and if the American artist will study with hope and love the precise thing to be done by him, considering the climate, the soil, the length of the day, the wants of the people, the habit and form of the government, he will create a house in which all these will find themselves fitted, and taste and sentiment will be satisfied also.

Insist on yourself, never imitate. Your own gift you can present every moment with the cumulative force of a whole life's cultivation, but of the adopted talent of another you have only an extemporaneous half possession. That which each can do best, none but his Maker can teach him. No man yet knows what it is, nor can till that person has exhibited it. Where is the master who could have taught Shakspeare? Where is the master who could have instructed Franklin, or Washington, or Bacon, or Newton? Every great man is a unique. The Scipionism of Scipio is precisely that part he could not borrow. Shakspeare will never be made by the study of Shakspeare. Do that which is assigned you, and you cannot hope too much or dare too much. There is at

this moment for you an utterance brave and grand as that of the colossal chisel of Phidias, or trowel of the Egyptians, or the pen of Moses or Dante, but different from all these. Nor possibly will the soul, all rich, all eloquent, with thousand-cloven tongue, deign to repeat itself, but if you can hear what these patriarchs say, surely you can reply to them in the same pitch of voice; for the ear and the tongue are two organs of one nature. Abide in the simple and noble regions of thy life, obey thy heart, and thou shalt reproduce the Foreworld again.

4. As our Religion, our Education, our Art look abroad, so does our spirit of society. All men plume themselves on the improvement of society, and no man improves.

Society never advances. It recedes as fast on one side as it gains on the other. It undergoes continual changes; it is barbarous, it is civilized, it is christianized, it is rich, it is scientific, but this change is not amelioration. For every thing that is given something is taken. Society acquires new arts and loses old instincts. What a contrast between the well-clad, reading, writing, thinking American, with a watch, a pencil and a bill of exchange in his pocket, and the naked New Zealander, whose property is a club, a spear, a mat and an undivided twentieth of a shed to sleep under! But compare the health of the two men and you shall see that the white man has lost his aboriginal strength. If the traveller tell us truly, strike the savage with a broad-axe and in a day or two the flesh shall unite and heal as if you struck the blow into soft pitch, and the same blow shall send the white to his grave.

The civilized man has built a coach, but has lost the use of his feet. He is supported on crutches, but lacks so much support of muscle. He has a fine Geneva watch, but he fails of the skill to tell the hour by the sun. A Greenwich nautical almanac he has, and so being sure of the information when he wants it, the man in the street does not know a star in the sky. The solstice he does not observe, the equinox he knows as little, and the whole bright calendar of the year is without a dial in his mind. His note-books impair his memory; his libraries overload his wit, the insurance-office increases the number of

24 Doric, Greek or classic • 24 Gothic, medieval • 48 Phidias, Greek sculptor of the fifth century B.C. • 48 trowel . . . Egyptians, meaning the pyramids

accidents, and it may be a question whether machinery does not encumber; whether we have not lost by refinement some energy, by a Christianity, entrenched in establishments and forms, some vigor of wild virtue. For every Stoic was a Stoic; but in Christendom where is the Christian?

There is no more deviation in the moral standard than in the standard of height or bulk. No greater men are now than ever were. A singular equality may be observed
 10 between the great men of the first and of the last ages; nor can all the science, art, religion, and philosophy of the nineteenth century avail to educate greater men than Plutarch's heroes, three or four and twenty centuries ago. Not in time is the race progressive. Phocion, Socrates, Anaxagoras, Diogenes, are great men, but they leave no class. He who is really of their class will not be called by their name, but will be his own man, and in his turn the founder of a sect. The arts and inventions of each period are only its costume and do not invigorate men.
 20 The harm of the improved machinery may compensate its good. Hudson and Behring accomplished so much in their fishing-boats as to astonish Parry and Franklin, whose equipment exhausted the resources of science and art. Galileo, with an opera-glass, discovered a more splendid series of celestial phenomena than any one since Columbus found the New World in an undecked boat. It is curious to see the periodical disuse and perishing of means and machinery which were introduced with loud laudation a few years or centuries before. The great
 30 genius returns to essential man. We reckoned the improvements of the art of war among the triumphs of science, and yet Napoleon conquered Europe by the bivouac, which consisted of falling back on naked valor and disencumbering it of all aids. The Emperor held it impossible to make a perfect army, says Las Cases, "without abolishing our arms, magazines, commissaries and carriages, until, in imitation of the Roman custom, the soldier should receive his supply of corn, grind it in his hand-mill and bake his bread himself."

5 Society is a wave. The wave moves onward, but the water of which it is composed does not. The same particle does not rise from the valley to the ridge. Its unity is only phenomenal. The persons who make up a nation to-day, next year die, and their experience dies with them.

And so the reliance on Property, including the reliance on governments which protect it, is the want of self-re-

liance. Men have looked away from themselves and things so long that they have come to esteem the religious, learned and civil institutions as guards of property and they deprecate assaults on these, because they feel them to be assaults on property. They measure the esteem of each other by what each has, and not by what each is. But a cultivated man becomes ashamed of his property, out of new respect for his nature. Especially he hates what he has if he see that it is accidental,—came to him by inheritance, or gift, or crime; then he feels that it is not having, it does not belong to him, has no root in him and merely lies there because no revolution or no robber takes it away. But that which a man is, does always by necessity acquire, and what the man acquires is living property, which does not wait the beck of rulers or mobs, or revolutions, or fire, or storm, or bankruptcies but perpetually renews itself wherever the man breathes. "Thy lot or portion of life," said the Caliph Ali, "is seeking after thee, therefore be at rest from seeking after it." Our dependence on these foreign goods leads us to our slavish respect for numbers. The political parties meet in numerous conventions; the greater the concourse and with each new uproar of announcement, The delegation from Essex! The Democrats from New Hampshire! The Whigs of Maine! the young patriot feels himself stronger than before by a new thousand of eyes and arms. In like manner the reformers summon conventions and vote and resolve in multitude. Not so, O friends! will the God deign to enter and inhabit you, but by a method precisely the reverse. It is only as a man puts off all foreign support and stands alone that I see him to be strong and to prevail. He is weaker by every recruit to his banner. Is not a man better than a town? Ask nothing of men, and, in the endless mutation, thou only firm column must presently appear the upholder of all that

13 Plutarch's heroes, the noble Greeks and Romans of Plutarch's *Lives* • 14 Phocion (402-317 B.C.), Greek philosopher • 15 Anaxagoras (500-428 B.C.), Greek philosopher • 15 Diogenes (412?-323 B.C.), Greek Cynic philosopher • 21 Hudson, Henry Hudson (d. 1611), English navigator. See note, p. 569 • 21 Behring, Vitus Jonassen Bering (1680-1741), Danish navigator who explored the Bering Sea • 22 Parry, Sir William Edward Parry (1790-1855), English explorer of the Arctic • 22 Franklin, Sir John Franklin (1786-1847), English explorer, was lost in the Arctic • 35 Las Cases, Marquis de Las Cases (1766-1842) recorded in *Mémoires de Ste. Hélène* his conversations with Napoleon at St. Helena • 64 Caliph Ali, Ali ben Abu Talib (602?-661), fourth caliph of Mecca • 70 Essex, a county in eastern Massachusetts

that he is weak because he has looked for good out of him and elsewhere, and, so perceiving, throws himself unhesitatingly on his thought, instantly rights himself, stands in the erect position, commands his limbs, works miracles, just as a man who stands on his feet is stronger than a man who stands on his head

So use all that is called Fortune Most men gamble with her, and gain all, and lose all, as her wheel rolls
10 But do thou leave as unlawful these winnings, and deal

with Cause and Effect, the chancellors of God In the Will work and acquire, and thou hast chained the wheel of Chance, and shall sit hereafter out of fear from her rotations A political victory, a rise of rents, the recovery of your sick or the return of your absent friend, or some other favorable event raises your spirits, and you think good days are preparing for you Do not believe it. Nothing can bring you peace but yourself Nothing can bring you peace but the triumph of principles

1841

The Poet

Those who are esteemed umpires of taste are often persons who have acquired some knowledge of admired pictures or sculptures, and have an inclination for whatever is elegant, but if you inquire whether they are beautiful souls, and whether their own acts are like fair pictures, you learn that they are selfish and sensual Their cultivation is local, as if you should rub a log of dry wood in one spot to produce fire, all the rest remaining cold Their knowledge of the fine arts is some study of rules and particulars, or some limited judgment of color or form, which is exercised for amusement or for show It is a proof of the shallowness of the doctrine of beauty, as it lies in the minds of our amateurs, that men seem to have lost the perception of the instant dependence of form upon soul There is no doctrine of forms in our philosophy We were put into our bodies, as fire is put into a pan, to be carried about, but there is no accurate adjustment between the spirit and the organ, much less is the latter the germination of the former So in regard to other forms, the intellectual men do not believe in any essential dependence of the material world on thought and volition. Theologians

think it a pretty air-castle to talk of the spiritual meaning of a ship or a cloud, of a city or a contract, but they prefer to come again to the solid ground of historical evidence, and even the poets are contented with a civil and conformed manner of living, and to write poems from the fancy, at a safe distance from their own experience But the highest minds of the world have never ceased to explore the double meaning, or, shall I say, the quadruple, or the centuple, or much more manifold meaning, of every sensuous fact Orpheus, Empedocles, Heraclitus, Plato, Plutarch, Dante, Swedenborg, and the masters of sculpture, picture, and poetry. For we are not pans and barrows, nor even porters of the fire and torch-bearers, but children of the fire, made of it, and only the same divinity transmuted, and at two or three removes, when we know least about it. And this hidden truth, that the fountains whence all this river of Time, and its creatures, floweth, are intrinsically ideal and beautiful, draws us to the consideration of the nature and functions of the Poet, or the man of Beauty, to the means and materials he uses, and to the general aspect of the art in the present time.

The breadth of the problem is great, for the poet is representative He stands among partial men for the

32 Orpheus, a Thracian poet and musician of Greek mythology, whose lyre could charm beasts and cause trees and rocks to move • 32 Empedocles, Heraclitus, Greek philosophers of the fifth century B.C. 33 Plutarch. See note, p. 250 Emerson was fond of lists of impressive names, some of which he seems to have used not very significantly. In the present list, only Swedenborg and Plato have a special importance for Emerson, each is the subject of an essay in *Representative Men*. In the essay on Plato, he said, "Plato is philosophy, and philosophy, Plato"

complete man, and apprises us not of his wealth, but of the commonwealth. The young man reveres men of genius, because, to speak truly, they are more himself than he is. They receive of the soul as he also receives, but they more. Nature enhances her beauty, to the eye of loving men, from their belief that the poet is beholding her shows at the same time. He is isolated among his contemporaries, by truth and by his art, but with this consolation in his pursuits, that they will draw
10 all men sooner or later. For all men live by truth, and stand in need of expression. In love, in art, in avarice, in politics, in labor, in games, we study to utter our painful secret. The man is only half himself, the other half is his expression.

Notwithstanding this necessity to be published, adequate expression is rare. I know not how it is that we need an interpreter, but the great majority of men seem to be minors, who have not yet come into possession of their own, or mutes, who cannot report the conversation
20 they have had with nature. There is no man who does not anticipate a super-sensual utility in the sun, and stars, earth, and water. These stand and wait to render him a peculiar service. But there is some obstruction, or some excess of phlegm in our constitution, which does not suffer them to yield the due effect. Too feeble fall the impressions of nature on us to make us artists. Every touch should thrill. Every man should be so much an artist, that he could report in conversation what had befallen him. Yet, in our experience, the rays or appulses
30 have sufficient force to arrive at the senses, but not enough to reach the quick, and compel the reproduction of themselves in speech. The poet is the person in whom these powers are in balance, the man without impediment, who sees and handles that which others dream of, traverses the whole scale of experience, and is representative of man, in virtue of being the largest power to receive and to impart.

For the Universe has three children, born at one time, which reappear, under different names, in every system
10 of thought, whether they be called cause, operation, and effect; or, more poetically, Jove, Pluto, Neprune; or theologically, the Father, the Spirit, and the Son; but which we will call here the Knower, the Doer, and the Sayer. These stand respectively for the love of truth, for the love of good, and for the love of beauty. These three are equal. Each is that which he is essentially, so that he

cannot be surmounted or analyzed, and each of the three has the power of the others latent in him, a his own patent.

The poet is the sayer, the namer, and represents beauty. He is a sovereign, and stands on the centre. For the world is not painted or adorned, but is from the beginning beautiful, and God has not made some beautiful things, but Beauty is the creator of the universe. Therefore the poet is not any permissive potentate, but emperor in his own right. Criticism is infested with cant of materialism, which assumes that manual skill or activity is the first merit of all men, and disparages such as say and do not, overlooking the fact, that some men, namely, poets, are natural sayers, sent into the world at the end of expression, and confounds them with those whose province is action, but who quit it to imitate the sayers. But Homer's words are as costly and admirable to Homer, as Agamemnon's victories are to Agamemnon. The poet does not wait for the hero or the sage, but as they act and think primarily, so he writes primarily what will and must be spoken, reckoning the other though primaries also, yet, in respect to him, secondaries and servants, as sitters or models in the studio of a painter, or as assistants who bring building materials to an architect.

For poetry was all written before time was, and when ever we are so finely organized that we can penetrate into that region where the air is music, we hear those prima warblings, and attempt to write them down, but we lose ever and anon a word, or a verse, and substitute something of our own, and thus miswrite the poem. The men of more delicate ear write down these cadences more faithfully, and these transcripts, though imperfect, become the songs of the nations. For nature is as truly beautiful as it is good, or as it is reasonable, and must as much appear, as it must be done, or be known. Words and deeds are quite indifferent modes of the divine energy. Words are also actions, and actions are a kind of words.

The sign and credentials of the poet are, that he announces that which no man foretold. He is the true and only doctor; he knows and tells; he is the only teller of news, for he was present and privy to the appearance which he describes. He is a beholder of ideas, and an utterer of the necessary and causal. For we do not speak now of men of poetical talents, or of industry

and skill in metre, but of the true poet. I took part in a conversation, the other day, concerning a recent writer of lyrics, a man of subtle mind, whose head appeared to be a music-box of delicate tunes and rhythms, and whose skill, and command of language, we could not sufficiently praise. But when the question arose, whether he was not only a lyrist, but a poet, we were obliged to confess that he is plainly a contemporary, not an eternal man. He does not stand out of our low limitations, like a Chimborazo under the line, running up from a torrid base through all the climates of the globe, with belts of the herbage of every latitude on its high and mottled sides, but this genius is the landscape-garden of a modern house, adorned with fountains and statues, with well-bred men and women standing and sitting in the walks and terraces. We hear, through all the varied music, the ground-tone of conventional life. Our poets are men of talents who sing, and not the children of music. The argument is secondary, the finish of the verses is primary.

For it is not metres, but a metre-making argument, that makes a poem,—a thought so passionate and alive, that, like the spirit of a plant or an animal, it has an architecture of its own, and adorns nature with a new thing. The thought and the form are equal in the order of time, but in the order of genesis the thought is prior to the form. The poet has a new thought: he has a whole new experience to unfold, he will tell us how it was with him, and all men will be the richer in his fortune. For the experience of each new age requires a new confession, and the world seems always waiting for its poet. I remember, when I was young, how much I was moved one morning by tidings that genius had appeared in a youth who sat near me at table. He had left his work, and gone rambling; none knew whither, and had written hundreds of lines, but could not tell whether that which was in him was therein told: he could tell nothing but that all was changed,—man, beast, heaven, earth, and sea. How gladly we listened! how credulous! Society seemed to be compromised. We sat in the aurora of a sunrise which was to put out all the stars. Boston seemed to be at twice the distance it had the night before, or was much farther than that. Rome,—what was Rome? Plutarch and Shakspeare were in the yellow leaf, and Homer no more should be heard of. It is much to know that poetry has been written this very day, under this very roof, by your side. What! that wonderful spirit

has not expired! these stony moments are still sparkling and animated! I had fancied that the oracles were all silent, and nature had spent her fires; and behold! all night, from every pore, these fine auroras have been streaming. Every one has some interest in the advent of the poet, and no one knows how much it may concern him. We know that the secret of the world is profound, but who or what shall be our interpreter, we know not. A mountain ramble, a new style of the face, a new person, may put the key into our hands. Of course, the value of genius to us is in the veracity of its report. Talent may frolic and juggle; genius realizes and adds. Mankind, in good earnest, have availed so far in understanding themselves and their work, that the foremost watch-⁶⁰man on the peak announces his news. It is the truest word ever spoken, and the phrase will be the fittest, most musical, and the unerring voice of the world for that time.

All that we call sacred history attests that the birth of a poet is the principal event in chronology. Man, never so often deceived, still watches for the arrival of a brother who can hold him steady to a truth, until he has made it his own. With what joy I begin to read a poem, which I confide in as an inspiration! And now my chains are⁷⁰ to be broken; I shall mount above these clouds and opaque airs in which I live,—opaque, though they seem transparent,—and from the heaven of truth I shall see and comprehend my relations. That will reconcile me to life, and renovate nature, to see trifles animated by a tendency, and to know what I am doing. Life will no more be a noise, now I shall see men and women, and know the signs by which they may be discerned from fools and satans. This day shall be better than my birthday: then I became an animal: now I am invited into⁸⁰ the science of the real. Such is the hope, but the fruition is postponed. Oftener it falls, that this winged man, who will carry me into the heaven, whirls me into mists, then leaps and frisks about with me as it were from

2 writer of lyrics, probably Tennyson, of whose 1842 volume Emerson wrote in his *Journals* (June 1842): "It has many merits, but the question might remain whether it has the merit. One would say it was the poetry of an exquisite, that it was prettiness carried out to the infinite, but with no one great heroic stroke, a too vigorous exclusion of all mere natural influences." • 10 Chimborazo . . . line, a mountain in Ecuador near the equator. • 43 yellow leaf. Compare *Macbeth*, Act V, Scene iii, ll. 22-23: "My way of life is fall'n into the sere, the yellow leaf."

cloud to cloud, still affirming that he is bound heavenward; and I, being myself a novice, am slow in perceiving that he does not know the way into the heavens, and is merely bent that I should admire his skill to rise, like a fowl or a flying fish, a little way from the ground or the water; but the all-piercing, all-feeding, and ocular air of heaven, that man shall never inhabit. I tumble down again soon into my old nooks, and lead the life of exaggerations as before, and have lost my faith in the possibility of any guide who can lead me thither where I would be.

But, leaving these victims of vanity, let us, with new hope, observe how nature, by worthier impulses, has insured the poet's fidelity to his office of announcement and affirming, namely, by the beauty of things, which becomes a new and higher beauty, when expressed. Nature offers all her creatures to him as a picture-language. Being used as a type, a second wonderful value appears in the object, far better than its old value, as the carpenter's stretched cord, if you hold your ear close enough, is musical in the breeze. "Things more excellent than every image," says Jamblichus, "are expressed through images." Things admit of being used as symbols, because nature is a symbol, in the whole, and in every part. Every line we can draw in the sand, has expression, and there is no body without its spirit or genius. All form is an effect of character, all condition, of the quality of the life, all harmony, of health, (and, for this reason, a perception of beauty should be sympathetic, or proper only to the good.) The beautiful rests on the foundations of the necessary. The soul makes the body, as the wise Spenser teaches

"So every spirit, as it is most pure,
And hath in it the more of heavenly light,
So it the fairer body doth procure
To habit in, and it more fairly dight,
With cheerful grace and amiable sight
For, of the soul, the body form doth take,
For soul is form, and doth the body make."

Here we find ourselves, suddenly, not in a critical speculation, but in a holy place, and should go very warily and reverently. We stand before the secret of the world, there where Being passes into Appearance, and Unity into Variety.

The Universe is the externization of the soul. Where-

ever the life is, that bursts into appearance around. Our science is sensual, and therefore superficial. The earth and the heavenly bodies, physics, and chemistry we sensually treat, as if they were self-existent; but they are the retinue of that Being we have. "The mighty heaven," said Proclus, "exhibits, in its transfiguration, clear images of the splendor of intellectual perception being moved in conjunction with the unapparent perception of intellectual natures." Therefore, science always goes abreast with the just elevation of the man, keeping step with religion and metaphysics, or, the state of science is an index of our self-knowledge. Since everything in nature answers to a moral power, if any phenomenon remains brute and dark, it is because the corresponding faculty in the observer is not yet active.

No wonder, then, if these waters be so deep, that we hover over them with a religious regard. The beauty of the fable proves the importance of the sense, to the poet, and to all others; or, if you please, every man is as far a poet as to be susceptible of these enchantments of nature, for all men have the thoughts whereof the universe is the celebration. I find that the fascination resides in the symbol. Who loves nature? Who does not? Is it only poets, and men of leisure and cultivation, who live with her? No, but also hunters, farmers, groom and butchers, though they express their affection in the choice of life, and not in their choice of words. The writer wonders what the coachman or the hunter values in riding, in horses, and dogs. It is not superficial qualities. When you talk with him, he holds these at a slight rate as you. His worship is sympathetic, he has no definitions, but he is commanded in nature, by the living power which he feels to be there present. No imitation, or playing of these things, would content him, he loves the earnest of the north wind, of rain, of stone, and wood, and iron. A beauty not explicable is dearer than a beauty which we can see to the end of. It is nature the symbol, nature certifying the supernatural body overflowed by life, which he worships, with coarse, but sincere rites.

22 Jamblichus, one of the Neo-Platonists. He flourished in Alexandria in the fourth century. • 33 So . . . make. Edmund Spenser's "An Hymne in Honour of Beautie," ll 127-133. • 51 Proclus (411-485), another Neo-Platonist. The Neo-Platonists (Plotinus, Proclus, Jamblichus, and Porphyry), whose works Emerson read in the translations of Thomas Taylor, were one of the major influences on his thought.

The inwardness and mystery of this attachment drives men of every class to the use of emblems. The schools of poets, and philosophers, are not more intoxicated with their symbols, than the populace with theirs. In our political parties, compute the power of badges and emblems. See the great ball which they roll from Baltimore to Bunker Hill! In the political processions, Lowell goes in a loom, and Lynn in a shoe, and Salem in a ship. Witness the cider-barrel, the log-chain, the hickory-stick, the palmetto, and all the cognizances of party. See the power of national emblems. Some stars, lilies, leopards, a crescent, a lion, an eagle, or other figure, which came into credit God knows how, on an old rag of bunting, blowing in the wind, on a fort, at the ends of the earth, shall make the blood tingle under the rudest, or the most conventional exterior. The people fancy they hate poetry, and they are all poets and mystics!

Beyond this universality of the symbolic language, we are apprised of the divineness of this superior use of things, whereby the world is a temple whose walls are covered with emblems, pictures, and commandments of the Deity, in this, that there is no fact in nature which does not carry the whole sense of nature; and the distinctions which we make in events, and in affairs, of low and high, honest and base, disappear when nature is used as a symbol. Thought makes everything fit for use. The vocabulary of an omniscient man would embrace words and images excluded from polite conversation. What would be base, or even obscene, to the obscene, becomes illustrious, spoken in a new connection of thought. The piety of the Hebrew prophets purges their grossness. The circumcision is an example of the power of poetry to raise the low and offensive. Small and mean things serve as well as great symbols. The meaner the type by which a law is expressed, the more pungent it is, and the more lasting in the memories of men. Just as we choose the smallest box, or case, in which any needful utensil can be carried. Bare lists of words are found suggestive, to an imaginative and excited mind, as it is related of Lord Chatham, that he was accustomed to read in Bailey's Dictionary, when he was preparing to speak in Parliament. The poorest experience is rich enough for all the purposes of expressing thought. Why covet a knowledge of new facts? Day and night, house and garden, a few books, a few actions, serve us as well as would all trades and all spectacles. We are far from

having exhausted the significance of the few symbols we use. We can come to use them yet with a terrible simplicity. It does not need that a poem should be long. Every word was once a poem. Every new relation is a new word. Also, we use defects and deformities to a sacred purpose, so expressing our sense that the evils of the world are such only to the evil eye. In the old mythology, mythologists observe, defects are ascribed to divine natures, as lameness to Vulcan, blindness to Cupid, and the like, to signify exuberances.

For, as it is dislocation and detachment from the life of God, that makes things ugly, the poet, who re-attaches things to nature and the Whole,—re-attaching even artificial things, and violations of nature, to nature, by a deeper insight,—disposes very easily of the most disagreeable facts. Readers of poetry see the factory-village and the railway, and fancy that the poetry of the landscape is broken up by these, for these works of art are not yet consecrated in their reading, but the poet sees them fall within the great Order not less than the beehive or the spider's geometrical web. Nature adopts them very fast into her vital circles, and the gliding train of cars she loves like her own. Besides, in a centred mind, it signifies nothing how many mechanical inventions you exhibit. Though you add millions, and never so surprising, the fact of mechanics has not gained a grain's weight. The spiritual fact remains unalterable, by many or by few particulars, as no mountain is of any appreciable height to break the curve of the sphere. A shrewd country-boy goes to the city for the first time, and the complacent citizen is not satisfied with his little wonder.

6 great Hill, the reference is to the presidential election of 1840, in which the Whig candidate, Harrison, defeated the Democratic candidate, Van Buren. Emerson wrote in his *Journals*: "The most imposing part of this Harrison celebration of the Fourth of July in Concord, as in Baltimore, was this ball, twelve or thirteen feet in diameter, which, as it mounts the little heights and slopes of the road, draws all eyes with a certain sublime movement, especially as the imagination is incessantly addressed with its political significance."
 • 7 Lowell . . . ship, signifying the textile industry of Lowell, the shoe factories of Lynn, and the maritime interests of Salem—all cities in Massachusetts. • 10 the cognizances of party. The cider barrel and the log cabin were used by the Whigs as emblems of Harrison; the hickory stick and the palmetto were Democratic symbols, associated, respectively, with Andrew Jackson and South Carolina. • 11 national emblems, lilies, of France, leopards, of Scotland, crescent, of Turkey, lion, of England. • 40 Lord Chatham, William Pitt. See note, p. 897.

It is not that he does not see all the fine houses, and know that he never saw such before, but he disposes of them as easily as the poet finds place for the railway. The chief value of the new fact, is to enhance the great and constant fact of Life, which can dwarf any and every circumstance, and to which the belt of wampum, and the commerce of America, are alike.

The world being thus put under the mind for verb and noun, the poet is he who can articulate it. For, though life is great, and fascinates, and absorbs,—and though all men are intelligent of the symbols through which it is named,—yet they cannot originally use them. We are symbols, and inhabit symbols; workmen, work, and tools, words and things, birth and death, all are emblems, but we sympathize with the symbols, and, being infatuated with the economical uses of things, we do not know that they are thoughts. The poet, by an ulterior intellectual perception, gives them a power which makes their old use forgotten, and puts eyes, and a tongue, into every dumb and inanimate object. He perceives the independence of the thought on the symbol, the stability of the thought, the accidenty and fugacity of the symbol. As the eyes of Lyncaeus were said to see through the earth, so the poet turns the world to glass, and shows us all things in their right series and procession. For, through that better perception, he stands one step nearer to things, and sees the flowing or metamorphosis. perceives that thought is multiform, that within the form of every creature is a force impelling it to ascend into a higher form and, following with his eyes the life, uses the forms which express that life, and so his speech flows with the flowing of nature. All the facts of the animal economy, sex, nutriment, gestation, birth, growth, are symbols of the passage of the world into the soul of man, to suffer there a change, and reappear a new and higher fact. He uses forms according to the life, and not according to the form. This is true science. The poet alone knows astronomy, chemistry, vegetation, and animation, for he does not stop at these facts, but employs them as signs. He knows why the plain or meadow of space was strown with these flowers we call suns, and moons, and stars, why the great deep is adorned with animals, with men, and gods, for, in every word he speaks he rides on them as the horses of thought.

By virtue of this science the poet is the Namer or

Language-maker, naming things sometimes after appearance, sometimes after their essence, and giving every one its own name and not another's, thereby joining the intellect, which delights in detachment, to the boundary. The poets made all the words, and the language is the archives of history, and, if we may call it, a sort of tomb of the muses. For, though the meaning of most of our words is forgotten, each word was a stroke of genius, and obtained currency, because at the moment it symbolized the world to the first speaker, and to the hearer. The etymologist finds the dearest of words to have been once a brilliant picture. Language is poetry. As the limestone of the continent consists of finite masses of the shells of animalcules, so language is made up of images, or tropes, which now, in their secondary use, have long ceased to remind us of their original origin. But the poet names the thing because he sees it comes one step nearer to it than any other. This expression, or naming, is not art, but a second nature, growing out of the first, as a leaf out of a tree. What we call nature, is a certain self-regulated motion, or change. Nature does all things by her own hands, and does not leave another to baptize her, but baptizes herself, and this through the metamorphosis again. I remember a certain poet described it to me thus:

Genius is the activity which repairs the decay of things, whether wholly or partly of a material and sensible kind. Nature, through all her kingdoms, insures her kind. Nobody cares for planting the poor fungus, so she sends it down from the gills of one agaric countless spores, one of which, being preserved, transmits new billions of spores to-morrow or next day. The new agaric of to-morrow has a chance which the old one had not. This agaric of seed is thrown into a new place, not subject to the accidents which destroyed its parent two rods off. It makes a man, and having brought him to ripe age, he will no longer run the risk of losing this wonder-child, but she detaches from him a new self, that kind may be safe from accidents to which the individual is exposed. So when the soul of the poet has come to the ripeness of thought, she detaches and sends away from it its poems or songs,—a fearless, sleepless, death-

23 Lyncaeus was one of the mythological band who sailed in search of the Golden Fleece • 71 a certain poet, Emerson himself

progeny, which is not exposed to the accidents of the weary kingdom of time. a fearless, vivacious offspring, clad with wings (such was the virtue of the soul out of which they came), which carry them fast and far, and infix them irrecoverably into the hearts of men. These wings are the beauty of the poet's soul. The songs, thus flying immortal from their mortal parent, are pursued by clamorous flights of censures, which swarm in far greater numbers, and threaten to devour them; but these
 10 last are not winged. At the end of a very short leap they fall plump down, and rot, having received from the souls out of which they came no beautiful wings. But the melodies of the poet ascend, and leap, and pierce into the deeps of infinite time.

So far the bard taught me, using his freer speech. But nature has a higher end, in the production of new individuals, than security, namely, *ascension*, or, the passage of the soul into higher forms. I knew, in my younger days, the sculptor who made the statue of the youth
 10 which stands in the public garden. He was, as I remember, unable to tell directly, what made him happy, or unhappy, but by wonderful indirections he could tell. He rose one day, according to his habit, before the dawn, and saw the morning break, grand as the eternity out of which it came, and, for many days after, he strove to express this tranquillity, and, lo! his chisel had fashioned out of marble the form of a beautiful youth, Phosphorus, whose aspect is such, that, it is said, all persons who look on it become silent. The poet also resigns himself to his mood, and that thought which agitated him is expressed, but *alter idem*, in a manner totally new. The expression is organic, or, the new type which things themselves take when liberated. As, in the sun, objects paint their images on the retina of the eye, so they, sharing the aspiration of the whole universe, tend to paint a far more delicate copy of their essence in his mind. Like the metamorphosis of things into higher organic forms, is their change into melodies. Over everything stands its daemon, or soul, and, as the form of the thing is reflected by the eye, so the soul of the thing is reflected by a melody. The sea, the mountain-ridge. Niagara, and every flower-bed, pre-exist, or super-exist, in precantations, which sail like odors in the air, and when any man goes by with an ear sufficiently fine, he overhears them, and endeavors to write down the notes, without diluting or depraving them. And herein is the legitimation of

criticism, in the mind's faith, that the poems are a corrupt version of some text in nature, with which they ought to be made to tally. A rhyme in one of our sonnets should not be less pleasing than the iterated nodes of a seashell, or the resembling difference of a group of flowers. The pairing of the birds is an idyl, not tedious as our idyls are, a tempest is a rough ode, without falsehood or rant: a summer, with its harvest sown, reaped, and stored, is an epic song, subordinating how many admirably executed parts. Why should not the symmetry and truth that modulate these, glide into our spirits. and we participate the invention of nature?

This insight, which expresses itself by what is called Imagination, is a very high sort of seeing, which does
 6 not come by study, but by the intellect being where and what it sees, by sharing the path or circuit of things through forms, and so making them translucent to others. The path of things is silent. Will they suffer a speaker to go with them? A spy they will not suffer, a lover, a poet, is the transcendency of their own nature,—him they will suffer. The condition of true naming, on the poet's part, is his resigning himself to the divine *aura* which breathes through forms, and accompanying that.

It is a secret which every intellectual man quickly
 70 learns, that, beyond the energy of his possessed and conscious intellect, he is capable of a new energy (as of an intellect doubled on itself), by abandonment to the nature of things, that, beside his privacy of power as an individual man, there is a great public power, on which he can draw, by unlocking, at all risks, his human doors, and suffering the ethereal tides to roll and circulate through him. then he is caught up into the life of the Universe, his speech is thunder, his thought is law, and his words are universally intelligible as the plants
 80 and animals. The poet knows that he speaks adequately, then, only when he speaks somewhat wildly, or, "with the flower of the mind," not with the intellect, used as an organ, but with the intellect released from all service, and suffered to take its direction from its celestial life; or, as the ancients were wont to express themselves, not with intellect alone, but with the intellect inebriated by nectar. As the traveller who has lost his way throws his reins on his horse's neck, and trusts to the instinct of the animal to find his road, so must we do with the
 90

31 *alter idem*, a second self

divine animal who carries us through this world. For if in any manner we can stimulate this instinct, new passages are opened for us into nature, the mind flows into and through things hardest and highest, and the metamorphosis is possible.

This is the reason why bards love wine, mead, narcotics, coffee, tea, opium, the fumes of sandal-wood and tobacco, or whatever other procurers of animal exhilaration. All men avail themselves of such means as they¹⁰ can, to add this extraordinary power to their normal powers, and to this end they prize conversation, music, pictures, sculpture, dancing, theatres, travelling, war, mobs, fires, gaming, politics, or love, or science, or animal intoxication, which are several coarser or finer *quasi*-mechanical substitutes for the true nectar, which is the ravishment of the intellect by coming nearer to the fact. These are auxiliaries to the centrifugal tendency of a man, to his passage out into free space, and they help him to escape the custody of that body in which he is²⁰ pent up, and of that jail-yard of individual relations in which he is enclosed. Hence a great number of such as were professionally expressers of Beauty, as painters, poets, musicians, and actors, have been more than others wont to lead a life of pleasure and indulgence, all but the few who received the true nectar, and, as it was a spurious mode of attaining freedom, as it was an emancipation not into the heavens, but into the freedom of baser places, they were punished for that advantage they won, by a dissipation and deterioration. But never can³⁰ any advantage be taken of nature by a trick. The spirit of the world, the great calm presence of the Creator, comes not forth to the sorceries of opium or of wine. The sublime vision comes to the pure and simple soul in a clean and chaste body. That is not an inspiration which we owe to narcotics, but some counterfeit excitement and fury. Milton says, that the lyric poet may drink wine and live generously, but the epic poet, he who shall sing of the gods, and their descent unto men, must drink water out of a wooden bowl. For poetry is⁴⁰ not 'Devil's wine,' but God's wine. It is with this as it is with toys. We fill the hands and nurseries of our children with all manner of dolls, drums, and horses, withdrawing their eyes from the plain face and sufficing objects of nature, the sun, and the moon, the animals, the water, and stones, which should be their toys. So the poet's habit of living should be set on a key so low,

that the common influences should delight him. If cheerfulness should be the gift of the sunlight; the should suffice for his inspiration, and he should be tip with water. That spirit which suffices quiet hear which seems to come forth to such from every dry kn of sere grass, from every pine-stump, and half-imbedd stone, on which the dull March sun shines, comes for to the poor and hungry, and such as are of simple tast If thou fill thy brain with Boston and New York, w fashion and covetousness, and wilt stimulate thy jad senses with wine and French coffee, thou shalt find radiance of wisdom in the lonely waste of the pinewood.

If the imagination intoxicates the poet, it is not inactive in other men. The metamorphosis excites in the beholder an emotion of joy. The use of symbols has certain power of emancipation and exhilaration for a men. We seem to be touched by a wand, which make us dance and run about happily, like children. We are like persons who come out of a cave or cellar into the open air. This is the effect on us of tropes, fables, oracles and all poetic forms. Poets are thus liberating gods. Men have really got a new sense, and found within their world, another world, or nest of worlds, for, the metamorphosis once seen, we divine that it does not stop. I will not now consider how much this makes the charm of algebra and the mathematics, which also have their tropes, but it is felt in every definition, as, when Aristotle defines *space* to be an immovable vessel, in which things are contained,—or, when Plato defines a *line* to be a flowing point, or *figure* to be a bound of solid; and many the like. What a joyful sense of freedom we have, when Vitruvius announces the old opinion of artists that no architect can build any house well, who does not know something of anatomy. When Socrates, in Charmides, tells us that the soul is cured of its maladies by certain incantations, and that these incantations are beautiful reasons, from which temperance is generated in souls; when Plato calls the world an animal; and Timaeus affirms that plants also are animals; or affirms a man to be a heavenly tree, growing with his root, which is his head, upward; and, as George Chapman, following him, writes,—

36 Milton says, in the "Sixth Latin Elegy," ll. 55-78. • 78 Vitruvius. See note, p. 320. • 80 Charmides, one of the dialogues of Plato. • 85 Timaeus, one of the dialogues of Plato.

"So in our tree of man, whose nerve root
Springs in his top,"

when Orpheus speaks of hoariness as "that white flower which marks extreme old age," when Proclus calls the universe the statue of the intellect, when Chaucer, in his praise of 'Gentilesse,' compares good blood in mean condition to fire, which, though carried to the darkest house betwixt this and the mount of Caucasus, will yet hold its natural office, and burn as bright as if twenty thousand men did it behold; when John saw, in the Apocalypse, the ruin of the world through evil, and the stars fall from heaven, as the figtree casteth her untimely fruit; when Aesop reports the whole catalogue of common daily relations through the masquerade of birds and beasts;—we take the cheerful hint of the immortality of our essence, and its versatile habits and escapes, as when the gypsies say of themselves, "it is in vain to hang them, they cannot die"

The poets are thus liberating gods. The ancient British bards had for the title of their order, "Those who are free throughout the world." They are free, and they make free. An imaginative book renders us much more service at first, by stimulating us through its tropes, than afterward, when we arrive at the precise sense of the author. I think nothing is of any value in books, excepting the transcendental and extraordinary. If a man is inflamed and carried away by his thought, to that degree that he forgets the authors and the public, and heeds only this one dream, which holds him like an insanity, let me read his paper, and you may have all the arguments and histories and criticism. All the value which attaches to Pythagoras, Paracelsus, Cornelius Agrippa, Cardan, Kepler, Swedenborg, Schelling, Oken, or any other who introduces questionable facts into his cosmogony, as angels, devils, magic, astrology, palmistry, mesmerism, and so on, is the certificate we have of departure from routine, and that here is a new witness. That also is the best success in conversation, the magic of liberty, which puts the world, like a ball, in our hands. How cheap even the liberty then seems, how mean to study, when an emotion communicates to the intellect the power to sap and upheave nature—how great the perspective! nations, times, systems, enter and disappear, like threads in tapestry of large figure and many colors, dream delivers us to dream, and while the drunkenness

lasts, we will sell our bed, our philosophy, our religion, in our opulence

There is good reason why we should prize this liberation. The fate of the poor shepherd, who, blinded and lost in the snowstorm, perishes in a drift within a few feet of his cottage door, is an emblem of the state of man. On the brink of the waters of life and truth, we are miserably dying. The inaccessibility of every thought but that we are in, is wonderful. What if you come near to it,—you are as remote when you are nearest as when you are farthest. Every thought is also a prison, every heaven is also a prison. Therefore we love the poet, the inventor, who in any form, whether in an ode, or in an action, or in looks and behavior, has yielded us a new thought. He unlocks our chains, and admits us to a new scene.

This emancipation is dear to all men, and the power to impart it, as it must come from greater depth and scope of thought, is a measure of intellect. Therefore all books of the imagination endure, all which ascend to that truth that the writer sees nature beneath him, and uses it as his exponent. Every verse or sentence, possessing this virtue, will take care of its own immortality. The religions of the world are the ejaculations of a few imaginative men.

But the quality of the imagination is to flow, and not to freeze. The poet did not stop at the color, or the form, but read their meaning, neither may he rest in this meaning, but he makes the same objects exponents of his new thought. Here is the difference betwixt the poet and the mystic, that the last nails a symbol to one sense, which was a true sense for a moment, but soon becomes old and false. For all symbols are fluxional, all language is vehicular and transitive, and is good, as ferries and horses are, for conveyance, not as farms and houses are, for homestead. Mysticism consists in the mistake of an accidental and individual symbol for a universal one.

1 So . . . top, from the dedication of Chapman's *Homer* • 5 Chaucer. The reference is to the *Wife of Bath's Tale*; II 283-289 • 10 John . . . Apocalypse. See Revelation 6:13 • 32 Pythagoras. See note, p. 259 • 32 Paracelsus, Philippus Paracelsus (1493-1541), Swiss alchemist • 32 Cornelius Agrippa (1486-1535), German physician • 33 Cardan, Jerome Cardan (1501-1576), Italian mathematician • 33 Kepler, Johannes Kepler (1571-1630), German astronomer • 33 Schelling, Friedrich von Schelling (1775-1854), German philosopher • 33 Oken, Lorenz Oken (1779-1851), German naturalist. The author, with characteristic whimsicality, lumps together philosophers, scientists, and charlatans

The morning-redness happens to be the favorite meteor to the eyes of Jacob Behmen, and comes to stand to him for truth and faith; and he believes should stand for the same realities to every reader. But the first reader prefers as naturally the symbol of a mother and child, or a gardener and his bulb, or a jeweller polishing a gem. Either of these, or of a myriad more, are equally good to the person to whom they are significant. Only they must be held lightly, and be very willingly translated into the equivalent terms which others use. And the mystic must be steadily told.—All that you say is just as true without the tedious use of that symbol as with it. Let us have a little algebra, instead of this trite rhetoric,—universal signs, instead of these village symbols,—and we shall both be gainers. The history of hierarchies seems to show, that all religious error consisted in making the symbol too stark and solid, and, at last, nothing but an excess of the organ of language.

Swedenborg, of all men in the recent ages, stands eminently for the translator of nature into thought. I do not know the man in history to whom things stood so uniformly for words. Before him the metamorphosis continually plays. Every thing on which his eye rests, obeys the impulses of moral nature. The figs become grapes whilst he eats them. When some of his angels affirmed a truth, the laurel twig which they held blossomed in their hands. The noise which, at a distance, appeared like gnashing and thumping, on coming nearer was found to be the voice of disputants. The men, in one of his visions, seen in heavenly light, appeared like dragons, and seemed in darkness: but to each other they appeared as men, and, when the light from heaven shone into their cabin, they complained of the darkness, and were compelled to shut the window that they might see.

There was this perception in him, which makes the poet or seer, an object of awe and terror, namely, that the same man, or society of men, may wear one aspect to themselves and their companions, and a different aspect to higher intelligences. Certain priests, whom he describes as conversing very learnedly together, appeared to the children, who were at some distance, like dead horses; and many the like misappearances. And instantly the mind inquires, whether these fishes under the bridge, yonder oxen in the pasture, those dogs in the yard, are immutably fishes, oxen, and dogs, or only so appear to me, and perchance to themselves appear up-

right men; and whether I appear as a man to all eyes. The Brahmins and Pythagoras propounded the same question, and if any poet has witnessed the transformation, he doubtless found it in harmony with various experiences. We have all seen changes as considerable in wheat and caterpillars. He is the poet, and shall draw us with love and terror, who sees, through the flowing vest, the firm nature, and can declare it.

I look in vain for the poet whom I describe. We do not, with sufficient plainness, or sufficient profoundness, address ourselves to life, nor dare we chaunt our own times and social circumstance. If we filled the day with bravery, we should not shrink from celebrating it. Time and nature yield us many gifts, but not yet the timely man, the new religion, the reconciler, whom all things await. Dante's praise is, that he dared to write his autobiography in colossal cipher, or into universality. We have yet had no genius in America, with tyrannous eye, which knew the value of our incomparable materials, and saw, in the barbarism and materialism of the times, another carnival of the same gods whose picture he so much admires in Homer, then in the middle age; then in Calvinism. Banks and tariffs, the newspaper and caucus, Methodism and Unitarianism, are flat and dull to dull people, but rest on the same foundations of wonder as the town of Troy, and the temple of Delphi, and are as swiftly passing away. Our logrolling, our stumps and their politics, our fisheries, our Negroes, and Indians, our boats, and our repudiations, the wrath of rogues, and the pusillanimity of honest men, the northern trade, the southern planting, the western clearing, Oregon, and Texas, are yet unsung. Yet America is a poem in our eyes; its ample geography dazzles the imagination, and it will not wait long for metres. If I have not found that excellent combination of gifts in my countrymen which I seek, neither could I aid myself to fix the idea of the poet by reading now and then in Chalmers's collection of five centuries of English poets. These are

2 Jacob Behmen (1575-1624), German mystic • 64 no . . . America. The remainder of the paragraph seems remarkably prophetic of Whitman, whose *Leaves of Grass* appeared eleven years later • 72 temple of Delphi, the seat of the oracles of Apollo • 77 Oregon, and Texas. In 1844, the date of this essay, Oregon and Texas were subjects of special interest. The Oregon boundary dispute with England was settled in 1846, Texas was admitted into the Union in 1845 • 83 Chalmers's collection, Alexander Chalmers' collection of English poets in twenty-one volumes, published in 1810

wits. more than poets, though there have been poets among them. But when we adhere to the ideal of the poet, we have our difficulties even with Milton and Homer. Milton is too literary, and Homer too literal and historical.

But I am not wise enough for a national criticism, and must use the old largeness a little longer, to discharge my errand from the muse to the poet concerning his art

Art is the path of the creator to his work. The paths, or methods, are ideal and eternal, though few men ever see them, not the artist himself, for years, or for a lifetime, unless he come into the conditions. The painter, the sculptor, the composer, the epic rhapsodist, the orator, all partake one desire, namely, to express themselves symmetrically and abundantly, not dwarfishly and fragmentarily. They found or put themselves in certain conditions, as, the painter and sculptor before some impressive human figures, the orator, into the assembly of the people; and the others, in such scenes as each has found exciting to his intellect; and each presently feels the new desire. He hears a voice, he sees a beckoning. Then he is apprised, with wonder, what herds of daemons hem him in. He can no more rest, he says, with the old painter, "By God, it is in me, and must go forth of me." He pursues a beauty, half seen, which flies before him. The poet pours out verses in every solitude. Most of the things he says are conventional, no doubt, but by and by he says something which is original and beautiful. That charms him. He would say nothing else but such things. In our way of talking, we say, "That is yours, this is mine;" but the poet knows well that it is not his, that it is as strange and beautiful to him as to you; he would not hear the like eloquence at length. Once having tasted this immortal ichor, he cannot have enough of it, and as an admirable creative power exists in these intellectual sections, it is of the last importance that these things get spoken. What a little of all we know is said! What drops of all the sea of our science are baled up! and by what accident it is that these are exposed, when so many secrets sleep in nature! Hence the necessity of speech and song; hence these throbs and heart-beatings in the orator, at the door of the assembly, to the end, namely, that thought may be ejaculated as Logos, or Word.

Doubt not, O poet, but persist. Say 'It is in me, and shall out.' Stand there, balked and dumb, stuttering and stammering, hissed and hooted, stand and strive, until,

at last, rage draw out of thee that *dream*-power which every night shows thee is thine own; a power transcending all limit and privacy, and by virtue of which a man is the conductor of the whole river of electricity. Nothing walks, or creeps, or grows, or exists, which must not in turn arise and walk before him as exponent of his meaning. Comes he to that power, his genius is no longer exhaustible. All the creatures, by pairs and by tribes, pour into his mind as into a Noah's ark, to come forth again to people a new world. This is like the stock of air for our respiration, or for the combustion of our fireplace, not a measure of gallons, but the entire atmosphere if wanted. And therefore the rich poets, as Homer, Chaucer, Shakspeare, and Raphael, have obviously no limits to their works, except the limits of their lifetime, and resemble a mirror carried through the street, ready to render an image of every created thing.

O poet! a new nobility is conferred in groves and pastures, and not in castles, or by the sword-blade, any longer. The conditions are hard, but equal. Thou shalt leave the world, and know the muse only. Thou shalt not know any longer the times, customs, graces, politics, or opinions of men, but shalt take all from the muse. For the time of towns is tolled from the world by 70 funeral chimes, but in nature the universal hours are counted by succeeding tribes of animals and plants, and by growth of joy on joy. God wills also that thou abdicate a manifold and duplex life, and that thou be content that others speak for thee. Others shall be thy gentlemen, and shall represent all courtesy and worldly life for thee, others shall do the great and resounding actions also. Thou shalt lie close hid with nature, and canst not be afforded to the Capitol or the Exchange. The world is full of renunciations and apprenticeships, and 80 this is thine, thou must pass for a fool and a churl for a long season. This is the screen and sheath in which Pan has protected his well-beloved flower, and thou shalt be known only to thine own, and they shall console thee with tenderest love. And thou shalt not be able to rehearse the names of thy friends in thy verse, for an old shame before the holy ideal. And this is the reward: that the ideal shall be real to thee, and the impressions

43 Logos, Greek for "word." Emerson alludes to John 1:1: "In the beginning was the Word . . ." • 60 Raphael. See note, p. 840. The inclusion of Raphael in the present list seems whimsical.

of the actual world shall fall like summer rain, copious, but not troublesome, to thy invulnerable essence. Thou shalt have the whole land for thy park and manor, the sea for thy bath and navigation, without tax and without envy, the woods and the rivers thou shalt own, and thou shalt possess that wherein others are only tenants and boarders. Thou true land-lord! sea-lord! air-lord! Wherever snow falls, or water flows, or birds fly, wherever

day and night meet in twilight, wherever the blue heaven is hung by clouds, or sown with stars, wherever are forms with transparent boundaries, wherever are outlets into celestial space, wherever is danger, and awe, and love, there is Beauty, plenteous as rain, shed for thee, and though thou shouldst walk the world over, thou shalt not be able to find a condition inopportune or ignoble.

1844

Plato; or, The Philosopher

Emerson's *Representative Men*, published in 1850, consists of chapters on "Plato; or, the Philosopher," "Swedenborg, or, the Mystic," "Montaigne, or, the Sceptic," "Shakespeare; or, the Poet," "Napoleon; or, the Man of the World," and "Goethe; or, the Writer." Although modeled after the *Heroes and Hero-Worship* of his friend Thomas Carlyle, Emerson's book, as the word "representative" suggests, is more democratic. Carlyle's great men are demigods who, the author believed, ought to be worshiped and obeyed; Emerson's are embodiments of virtues which are attainable by all men.

Of the six "representative men," Plato exerted by far the largest influence upon Emerson. Primarily a philosopher, Emerson derived his philosophy chiefly from Plato and his successors—the Neo-Platonists and the Cambridge Platonists. The essay was written in an expansive mood. No praise was too high for the great primary source of philosophical wisdom: "Plato is philosophy, and philosophy, Plato."

So close was the relation between the subject and the author that Emerson seems in many passages to have been writing about himself; many passages, at any rate, are as applicable to him as to Plato and throw valuable light upon Emerson's philosophical ideas and methods.

Among books, Plato only is entitled to Omar's fanatical compliment to the Koran, when he said, "Burn the libraries, for their value is in this book." These sentences contain the culture of nations; these are the corner-stone of schools, these are the fountain-head of literatures. A discipline it is in logic, arithmetic, taste, symmetry, poetry, language, rhetoric, ontology, morals, or practical wisdom. There was never such range of speculation. Out of Plato come all things that are still written and debated among men of thought. Great havoc makes he among our originalities. We have reached the mountain from which all these drift boulders were detached. The Bible of the learned for twenty-two hundred years, every brisk young man who says in succession fine things to each reluctant generation,—Boethius, Rabelais, Erasmus, Bruno, Locke, Rousseau, Alfieri, Coleridge,—is some reader of Plato, translating into the vernacular, wittily, his good things. Even the men of grander proportion suffer some deduction from the misfortune (shall I say?) of coming after this exhausting generalizer. St. Augustine, Copernicus, Newton, Behmen, Swedenborg, Goethe, are likewise his debtors, and must say after him. For it is fair

1 Omar, caliph of the Mohammedans in the seventh century • 2 Koran, the holy scriptures of the Mohammedans • 15 Boethius, Roman philosopher of the fifth century • 15 Rabelais, François Rabelais (1490?-1553), French humorist and satirist • 15 Erasmus, Desiderius Erasmus. See note, p. 158 • 15 Bruno, Giordano Bruno (1548-1600), Italian philosopher • 16 Locke, John Locke. See note, p. 252. Emerson had a low opinion of Locke because of his denial of innate ideas • 16 Rousseau, Jean Jacques Rousseau (1712-1778), French philosopher and father of modern romanticism • 16 Alfieri, Count Vittorio Alfieri (1749-1803), Italian dramatist • 20 St. Augustine (354-430), bishop of Hippo and author of *The City of God* • 20 Copernicus, Nikolaus Copernicus. See note, p. 896 • 21 Newton, Sir Isaac Newton. See note, p. 896 • 21 Behmen, Jacob Behmen. See note, p. 914 • 21 Swedenborg, Emanuel Swedenborg. See note, p. 662 • 21 Goethe, Johann Wolfgang von Goethe. See note, p. 855

to credit the broadest generalizer with all the particulars deducible from his thesis

Plato is philosophy, and philosophy, Plato,—at once the glory and the shame of mankind, since neither Saxon nor Roman have availed to add any idea to his categories. No wife, no children had he, and the thinkers of all civilized nations are his posterity, and are tinged with his mind. How many great men Nature is incessantly sending up out of night to be *his men*.—Platonists' the Alexandrians, a constellation of genius, the Elizabethans, not less; Sir Thomas More, Henry More, John Hales, John Smith, Lord Bacon, Jeremy Taylor, Ralph Cudworth, Sydenham, Thomas Taylor; Marcilius Ficinus, and Picus Mirandola. Calvinism is in his "Phædo." Christianity is in it. Mohametanism draws all its philosophy in its handbook of morals, the Akhlak-y-Jalaly, from him. Mysticism finds in Plato all its texts. This citizen of a town in Greece is no villager nor patriot. An Englishman reads and says, "How English!" a German, "How Teutonic!" an Italian, "How Roman and how Greek!" As they say that Helen of Argos had that universal beauty that everybody felt related to her, so Plato seems, to a reader in New England, an American genius. His broad humanity transcends all sectional lines.

This range of Plato instructs us what to think of the vexed question concerning his reputed works,—what are genuine, what spurious. It is singular that wherever we find a man higher, by a whole head, than any of his contemporaries, it is sure to come into doubt what are his real works. Thus Homer, Plato, Raffaele, Shakspeare. For these men magnetize their contemporaries, so that their companions can do for them what they can never do for themselves, and the great man does thus live in several bodies, and write, or paint, or act by many hands, and after some time it is not easy to say what is the authentic work of the master, and what is only of his school.

Plato, too, like every great man, consumed his own times. What is a great man but one of great affinities, who takes up into himself all arts, sciences, all knowables, as his food? He can spare nothing; he can dispose of everything. What is not good for virtue is good for knowledge. Hence his contemporaries tax him with plagiarism. But the inventor only knows how to borrow, and society is glad to forget the innumerable laborers who ministered to this architect, and reserves all its

gratitude for him. When we are praising Plato it seems we are praising quotations from Solon, and Sophron, and Philolaus. Be it so. Every book is a quotation; and every house is a quotation out of all forests, and mines, and stone-quarries, and every man is a quotation from all his ancestors. And this grasping inventor puts all nations under contribution.

Plato absorbed the learning of his times—Philolaus, Timæus, Heraclitus, Parmenides, and what else, then his master, Socrates, and, finding himself still capable of a larger synthesis,—beyond all example then or since,—he travelled into Italy, to gain what Pythagoras had for him; then into Egypt, and perhaps still farther east, to import the other element, which Europe wanted, into the European mind. This breadth entitles him to stand as the representative of philosophy. He says in the "Republic," "Such a genius as philosophers must of necessity have is wont but seldom, in all its parts, to meet in one man, but its different parts generally spring up in different persons." Every man who would do anything well must come to it from a higher ground. A philosopher must be more than a philosopher. Plato is clothed with the powers of a poet, stands upon the highest place of the poet, and (though I doubt he wanted the decisive gift of lyric expression) mainly is not a poet, because he chose to use the poetic gift to an ulterior purpose.

Great geniuses have the shortest biographies. Their cousins can tell you nothing about them. They lived in their writings, and so their house and street life was trivial and commonplace. If you would know their tastes and complexions, the most admiring of their readers most resembles them. Plato, especially, has no external bi-

10 Alexandrians, the Neo-Platonists who flourished in Alexandria in the early centuries of the Christian era • 11 Sir Thomas More (1478-1535), English statesman and philosopher, author of the *Utopia* • 11 Henry More (1614-1687), English philosopher and one of the Cambridge Platonists • 11 John Hales (1584-1656), English divine • 12 John Smith, Captain John Smith. See p. 65 • 12 Jeremy Taylor (1613-1667), English bishop. In his poem "The Problem" Emerson called him "the Shakspeare of divines" • 12 Ralph Cudworth (1617-1688), another Cambridge Platonist • 13 Sydenham, Thomas Sydenham (1624-1689), English physician • 13 Thomas Taylor (1758-1835), English translator of Plato and the Neo-Platonists whose translations Emerson used and admired • 13 Marcilius Ficinus, Marsilio Ficino (1433-1499), Italian Platonist • 14 Picus Mirandola, Giovanni Pico della Mirandola (1463-1494), Italian humanist • 48 Solon, Sophron, Philolaus, Greek writers before Plato • 55 Timæus, Heraclitus, Parmenides, Greek philosophers who flourished around 500 B.C.

ography. If he had lover, wife, or children, we hear nothing of them. He ground them all into paint. As a good chimney burns its smoke, so a philosopher converts the value of all his fortunes into his intellectual performances.

He was born 427, B.C., about the time of the death of Pericles; was of patrician connection in his times and city; and is said to have had an early inclination for war; but, in his twentieth year, meeting with Socrates, was easily dissuaded from this pursuit, and remained for ten
10 years his scholar, until the death of Socrates. He then went to Megara, accepted the invitations of Dion and of Dionysius to the court of Sicily, and went thither three times, though very capriciously treated. He travelled into Italy, then into Egypt, where he stayed a long time; some say three, some say thirteen years. It is said he went farther, into Babylonia: this is uncertain. Returning to Athens, he gave lessons in the Academy to those whom his fame drew thither and died, as we have received it, in the act of writing, at eighty-one years.

20 But the biography of Plato is interior. We are to account for the supreme elevation of this man in the intellectual history of our race,—how it happens that, in proportion to the culture of men, they become his scholars, that, as our Jewish Bible has implanted itself in the table-talk and household life of every man and woman in the European and American nations, so the writings of Plato have pre-occupied every school of learning, every lover of thought, every church, every poet,—making it impossible to think, on certain levels, except
30 through him. He stands between the truth and every man's mind, and has almost impressed language, and the primary forms of thought, with his name and seal. I am struck, in reading him, with the extreme modernness of his style and spirit. Here is the germ of that Europe we know so well, in its long history of arts and arms, here are all its traits, already discernible in the mind of Plato,—and in none before him. It has spread itself since into a hundred histories, but has added no new element. This perpetual modernness is the measure of merit in every
40 work of art, since the author of it was not misled by anything short-lived or local, but abode by real and abiding traits. How Plato came thus to be Europe, and philosophy, and almost literature, is the problem for us to solve.

This could not have happened without a sound, sincere and catholic man, able to honour at the same time the ideal, or laws of the mind, and fate, or the order of

nature. The first period of a nation, as of an individual, is the period of unconscious strength. Children scream, and stamp with fury, unable to express desires. As soon as they can speak and tell their and the reason of it, they become gentle. In adulthood whilst the perceptions are obtuse, men and women vehemently and superlatively, blunder and quarrel, manners are full of desperation, their speech is full of oaths. As soon as, with culture, things have cleared little, and they see them no longer in lumps and masses but accurately distributed, they desist from that vehemence, and explain their meaning in detail. If a tongue had not been framed for articulation man would still be a beast in the forest. The same weakness, want, on a higher plane, occurs daily in the education of ardent young men and women "Ah! you don't understand me; I have never met with any one who comprehends me;" and they sigh and weep, write verses, walk alone,—fault of power to express their profound meaning. In a month or two, through the favor of good genius, they meet some one so related as to their volcanic estate, and good communication being once established, they are thenceforward good citizens. It is ever thus. The progress is to accuracy, to skill, truth, from blind force.

There is a moment, in the history of every nation, when proceeding out of this brute youth, the perceptive powers reach their ripeness, and have not yet become microscopic: so that man, at that instant, extends across the entire scale, and with his feet still planted on the immense forces of night, converses, by his eyes and by his ears, with solar and stellar creation. That is the moment of adult health, the culmination of power.

Such is the history of Europe in all points, and such is the history of philosophy. Its early records, almost perished, are of immigrations from Asia, bringing with them the dress of barbarians; a confusion of crude notions of morality and of natural philosophy, gradually subsiding through the partial insight of single teachers.

Before Pericles came the Seven Wise Masters, and after him the beginnings of geometry, metaphysics, and ethics; then the partialists, deducing the origin of things from

11 Megara, a town in Greece • 11 Dion . . . Dionysius, tyrants of Sicily • Syracuse • 86 Seven Wise Masters, characters in a collection of Eastern tales

flux or water, or from air, or from fire, or from mind. All mix with these causes mythologic pictures. At last comes Plato, the distributor, who needs no barbaric paint, or tattoo, or whooping; for he can define. He leaves with Asia the vast and superlative, he is the arrival of accuracy and intelligence. "He shall be as a god to me, who can rightly divide and define."

This defining is philosophy. Philosophy is the account which the human mind gives to itself of the constitution of the world. Two cardinal facts lie for ever at the base; the one, and the two.—1. Unity, or Identity, and 2. Variety. We unite all things by perceiving the law which pervades them, by perceiving the superficial differences and the profound resemblances. But every mental act,—this very perception of identity or oneness, recognizes the difference of things. Oneness and otherness. It is impossible to speak or to think without embracing both.

The mind is urged to ask for one cause of many effects, then for the cause of that, and again the cause, diving still into the profound, self-assured that it shall arrive at an absolute and sufficient one,—a one that shall be all. "In the midst of the sun is the light, in the midst of the light is truth, and in the midst of truth is the imperishable being," say the Vedas. All philosophy, of east and west, has the same centripetence. Urged by an opposite necessity, the mind returns from the one to that which is not one, but other or many, from cause to effect, and affirms the necessary existence of variety, the self-existence of both, as each is involved in the other. These strictly-blended elements it is the problem of thought to separate and to reconcile. Their existence is mutually contradictory and exclusive; and each so fast slides into the other that we can never say what is one and what it is not. The Proteus is as nimble in the highest as in the lowest grounds, when we contemplate the one, the true, the good,—as in the surfaces and extremities of matter.

In all nations there are minds which incline to dwell in the conception of fundamental Unity. The raptures of prayer and ecstasy of devotion lose all being in one Being. This tendency finds its highest expression in the religious writings of the East, and chiefly in the Indian Scriptures, in the Vedas, the Bhagavat Geeta, and the Vishnu Purana. Those writings contain little else than this idea, and they rise to pure and sublime strains in celebrating it.

The Same, the Same: friend and foe are of one stuff; the ploughman, the plough, and the furrow are of one stuff, and the stuff is such, and so much, that the variations of form are unimportant. "You are fit" (says the supreme Krishna to a sage), "to apprehend that you are not distinct from me. That which I am thou art, and that also is this world, with its gods, and heroes, and mankind. Men contemplate distinctions, because they are stupefied with ignorance." "The words *I* and *mine* constitute ignorance. What is the great end of all you shall now learn from me. It is soul,—one in all bodies, pervading, uniform, perfect, pre-eminent over nature, exempt from birth, growth, and decay, omnipresent, made up of true knowledge, independent, unconnected with unrealities, with name, species, and the rest, in time past, present, and to come. The knowledge that this spirit, which is essentially one, is in one's own, and in all other bodies, is the wisdom of one who knows the unity of things. As one diffusive air, passing through the perforations of a flute, is distinguished as the notes of a scale, so the nature of the Great Spirit is single, though its forms be manifold, arising from the consequences of acts. When the difference of the investing form, as that of god, or the rest, is destroyed, there is no distinction." "The whole world is but a manifestation of Vishnu, who is identical with all things, and is to be regarded by the wise as not differing from, but as the same as themselves. I neither am going nor coming, nor is my dwelling in any one place, nor art thou, thou nor are others, others; nor am I, I." As if he had said, "All is for the soul, and the soul is Vishnu, and animals and stars are transient paintings, and light is whitewash, and durations are deceptive; and form is imprisonment, and heaven itself a decoy." That which the soul seeks is resolution into being, above form, out of Tartarus, and out of heaven,—liberation from nature.

If speculation tends thus to a terrific unity, in which all things are absorbed, action tends directly backwards to diversity. The first is the course of gravitation of

26 centripetence, force directed toward the center • 35 Proteus, a sea god in Greek mythology who assumed different shapes • 47 The Same . . . unimportant. The same thought appears in Emerson's poem "Brahma" and is a close rendering of a passage from the Bhagavad-Gita, one of the Hindu scriptures • 51 Krishna, a Hindu deity, the oracular source of the Bhagavad-Gita • 71 Vishnu, a Hindu deity, of whom Krishna is an incarnation • 81 Tartarus, the infernal regions

mind; the second is the power of nature. Nature is the manifold. The unity absorbs and melts or reduces. Nature opens and creates. These two principles reappear, and interpenetrate all things, all thought, the one, the many. One is being, the other, intellect: one is necessity, the other, freedom; one, rest, the other, motion; one, power; the other, distribution: one, strength, the other, pleasure: one, consciousness, the other, definition; one, genius, the other, talent; one, earnestness, the other, knowledge;
 10 one, possession, the other, trade; one, caste, the other, culture; one, king, the other, democracy; and if we dare carry these generalizations a step higher, and name the last tendency of both, we might say that the end of the one is escape from organization,—pure science, and the end of the other is the highest instrumentality, or use of means, or executive deity.

Each student adheres, by temperament and by habit, to the first or second of these gods of the mind. By religion, he tends to unity, by intellect, or by the senses,
 20 to the many. A too rapid unification, and an excessive appliance to parts and particulars, are the twin dangers of speculation.

To this partiality the history of nations corresponded. The country of unity, of immovable institutions, the seat of a philosophy delighting in abstractions, of men faithful in doctrine and in practice to the idea of a deaf, unimplorable, immense fate, is Asia; and it realizes this faith in the social institution of caste. On the other side, the genius of Europe is active and creative: it resists
 30 caste by culture; its philosophy was a discipline, it is a land of arts, inventions, trade, freedom. If the East loved infinity, the West delighted in boundaries.

European civility is the triumph of talent, the extension of system, the sharpened understanding, adaptive skill, delight in forms, delight in manifestation, in comprehensible results. Pericles, Athens, Greece, had been working in this element with the joy of genius not yet chilled by any foresight of the detriment of an excess. They saw before them no sinister political economy, no
 40 ominous Malthus, no Paris or London, no pitiless subdivision of classes—the doom of the pinmakers, the doom of the weavers, of dressers, of stockingers, of carders, of spinners, of colliers; no Ireland; no Indian caste, superinduced by the efforts of Europe to throw it off. The understanding was in its health and prime. Art was in its splendid novelty. They cut the Pentelican

marble as if it were snow, and their perfect work. architecture and sculpture seemed things of course more difficult than the completion of a new ship at Medford yards, or new mills at Lowell. These things are in course, and may be taken for granted. The Religion, Byzantine legislation, English trade, the saloon, Versailles, the cafés of Paris, the steam-mill, steam-steam-coach, may all be seen in perspective; the tally meeting, the ballot-box, the newspaper and cheap paper.

Meantime, Plato, in Egypt and in eastern pilgrimages imbibed the idea of one Deity, in which all things were absorbed. The unity of Asia, and the detail of Europe, the infinitude of the Asiatic soul, and the defining of Europe—Plato came to join, and by contact enhanced the energy of each. The excellence of Europe and Asia are in his brain. Metaphysics and natural philosophy expressed the genius of Europe, he substituted the religion of Asia, as the base.

In short, a balanced soul was born, perceptive of two elements. It is as easy to be great as to be small. The reason why we do not at once believe in admirable souls is because they are not in our experience. In actual fact they are so rare as to be incredible, but, primarily, there is not only no presumption against them, but the strongest presumption in favour of their appearance. Whether voices were heard in the sky, or not, whether his mother or his father dreamed that the infant in his child was the son of Apollo, whether a swarm of bees settled on his lips, or not, a man who could see the two sides of a thing was born. The wonderful synthesis, familiar in nature, the upper and the under side of the medal of Jove, the union of impossibilities, which reappears in every object, its real and its ideal power—now, also, transferred entire to the consciousness of a man.

The balanced soul came. If he loved abstract truth, he saved himself by propounding the most popular of principles, the absolute good, which rules rulers, and judges the judge. If he made transcendental distinctions, he fortified himself by drawing all his illustrations from sources disdained by orators and polite conversers, from mares and puppies; from pitchers and soup-ladles; from

40 Malthus, Thomas Robert Malthus (1766-1834), English political economist. • 46 Pentelican marble, obtained from Mount Pentelicon near Athens, and used in building the Parthenon. • 50 Medford, Lowell, manufacturing cities in Massachusetts.

cooks and criers, the shops of potters, horse-doctors, butchers, and fishmongers. He cannot forgive in himself a partiality, but is resolved that the two poles of thought shall appear in his statement. His argument and his sentence are self-poised and spherical. The two poles appear; yes, and become two hands, to grasp and appropriate their own.

Every great artist has been such by synthesis. Our strength is transitional, alternating, or, shall I say, a thread of two strands. The sea-shore, sea seen from shore, shore seen from sea; the taste of two metals in contact, and our enlarged powers at the approach and at the departure of a friend, the experience of poetic creativeness, which is not found in staying at home, nor yet in travelling, but in transitions from one to the other, which must therefore be adroitly managed to present as much transitional surface as possible, this command of two elements must explain the power and the charm of Plato. Art expresses the one, or the same by the different. Thought seeks to know unity in unity, poetry to show it by variety, that is, always by an object or symbol. Plato keeps the two vases, one of æther and one of pigment, at his side, and invariably uses both. Things added to things, as statistics, civil history, are inventories. Things used as language are inexhaustibly attractive. Plato turns incessantly the obverse and the reverse of the medal of Jove.

To take an example:—The physical philosophers had sketched each his theory of the world, the theory of atoms, of fire, of flux, of spirit, theories mechanical and chemical in their genius. Plato, a master of mathematics, studious of all natural laws and causes, feels these, as second causes, to be no theories of the world, but bare inventories and lists. To the study of nature he therefore prefixes the dogma—"Let us declare the cause which led the Supreme Ordainer to produce and compose the universe. He was good, and he who is good has no kind of envy. Exempt from envy, he wished that all things should be as much as possible like himself. Whosoever, taught by wise men, shall admit this as the prime cause of the origin and foundation of the world, will be in the truth." "All things are for the sake of the good, and it is the cause of everything beautiful." This dogma animates and impersonates his philosophy.

The synthesis which makes the character of his mind appears in all his talents. Where there is great compass of

wit, we usually find excellencies that combine easily in the living man, but in description appear incompatible. The mind of Plato is not to be exhibited by a Chinese catalogue, but is to be apprehended by an original mind in the exercise of its original power. In him the freest abandonment is united with the precision of a geometer. His daring imagination gives him the more solid grasp of facts, as the birds of highest flight have the strongest alar bones. His patrician polish, his intrinsic elegance, edged by an irony so subtle that it stings and paralyzes, adorn the soundest health and strength of frame. According to the old sentence, "If Jove should descend to the earth, he would speak in the style of Plato."

60

With this palatial air there is, for the direct aim of several of his works, and running through the tenor of them all, a certain earnestness, which mounts, in the "Republic," and in the "Phædo," to piety. He has been charged with feigning sickness at the time of the death of Socrates. But the anecdotes that have come down from the times attest his manly interference before the people in his master's behalf, since even the savage cry of the assembly to Plato is preserved; and the indignation towards popular government, in many of his pieces, expresses a personal exasperation. He has a probity, a native reverence for justice and honor, and a humanity which makes him tender for the superstitions of the people. Add to this, he believes that poetry, prophecy, and the high insight, are from a wisdom of which man is not master, that the gods never philosophize, but, by a celestial mania, these miracles are accomplished. Horsed on these winged steeds, he sweeps the dim regions, visits worlds which flesh cannot enter; he saw the souls in pain, he hears the doom of the judge; he beholds the penal metempsychosis, the Fates, with the rock and shears, and hears the intoxicating hum of their spindle.

But his circumspection never forsook him. One would say, he had read the inscription on the gates of Busyrane—"Be bold;" and on the second gate—"Be bold, be bold, and evermore be bold." and then again had paused well at the third gate—"Be not too bold."

35 Let us . . . truth, from Plato's *Timæus* • 85 inscription . . . too bold. The inscriptions are in Spenser's *Faerie Queene*, Bk. III, Canto XI

His strength is like the momentum of a falling planet; and his discretion, the return of its due and perfect curve—so excellent is his Greek love of boundary, and his skill in definition. In reading logarithms, one is not more secure, than in following Plato in his flights. Nothing can be colder than his head, when the lightnings of his imagination are playing in the sky. He has finished his thinking, before he brings it to the reader, and he abounds in the surprises of a literary master. He¹⁰ has that opulence which furnishes, at every turn, the precise weapon he needs. As the rich man wears no more garments, drives no more horses, sits in no more chambers, than the poor—but has that one dress, or equipage, or instrument, which is fit for the hour and the need; so Plato, in his plenty, is never restricted, but has the fit word. There is, indeed, no weapon in all the armory of wit which he did not possess and use—epic, analysis, mania, intuition, music, satire, and irony, down to the customary and polite. His illustrations are poetry, and²⁰ his jests illustrations. Socrates' profession of obstetric art is good philosophy; and his finding that word "cookery," and "adulatory art," for rhetoric, in the "Gorgias," does us a substantial service still. No orator can measure in effect with him who can give good nicknames.

What moderation, and understatement, and checking his thunder in mid volley! He has good-naturedly furnished the courtier and citizen with all that can be said against the schools. "For philosophy is an elegant thing if any one modestly meddles with it; but, if he is conversant with it more than is becoming, it corrupts the man." He could well afford to be generous—he who, from the sunlike centrality and reach of vision, had a faith without cloud. Such as his perception, was his speech: he plays with the doubt, and makes the most of it. he paints and quibbles; and by-and-by comes a sentence that moves the sea and land. The admirable earnest comes not only at intervals, in the perfect yes and no of the dialogue, but in bursts of light. "I, therefore, Callicles, am persuaded by these accounts, and consider how⁴⁰ I may exhibit my soul before the judge in a healthy condition. Wherefore, disregarding the honors that most men value, and looking to the truth, I shall endeavor in reality to live as virtuously as I can; and, when I die, to die so. And I invite all other men to the utmost of my power; and you, too, I in turn invite to this contest, which, I affirm, surpasses all contests here."

He is a great average man; one who, to the best thing, adds a proportion and equality in his faculties, so men see in him their own dreams and glimpses not available, and made to pass for what they are. A common sense is his warrant and qualification to be world's interpreter. He has reason, as all the philosopher and poetic class have: but he has, also, what they lack, not,—this strong solving sense to reconcile his poetry with the appearances of the world, and build a bridge from the streets of cities to the Atlantis. He omits not this graduation, but slopes his thought, however picturesque the precipice on one side, to an access from plain. He never writes in ecstasy, or catches us up in poetic raptures.

Plato apprehended the cardinal facts. He could penetrate himself on the earth, and cover his eyes whilst he adored that which cannot be numbered, or gauged, known, or named: that of which everything can be affirmed and denied, that "which is entity and non-entity." He called it super-essential. He even stood ready, as in the "Parmenides," to demonstrate that it was so—that this Being exceeded the limits of intellect. No man ever more fully acknowledged the Ineffable. Having paid his homage, as for the human race, to the Unfathomable, he then stood erect, and for the human race affirmed "And yet things are knowable!"—that is, the Asia in our mind was first heartily honored—the ocean of love and power, before form, before will, before knowledge, before the Same, the Good, the One, and now, refreshed and empowered by this worship, the instinct of Europe, named culture, returns, and he cries, Yet things are knowable. They are knowable, because, being from one, things correspond. There is a scale: and the correspondence from heaven to earth, of matter to mind, of the part to the whole, is our guide. As there is a science of stars, called astronomy; a science of quantities, called mathematics; a science of qualities, called chemistry, so there is a science of sciences,—I call it Dialectic,—which is the Intellect discriminating the false and the true. It rests on the observation of identity and diversity; for, to judge, is to unite to an object the notion which belongs to it. The sciences, even the best—mathematics and astronomy—

22 Gorgias, one of Plato's works • 46 contests here. The quotation in this paragraph are from the Gorgias • 56 Atlantis, a mythic western continent mentioned by Plato and other ancient writers

are like sportsmen, who seize whatever prey offers, even without being able to make any use of it. Dialectic must reach the use of them. "This is of that rank that no intellectual man will enter on any study for its own sake, but only with a view to advance himself in that one sole science which embraces all."

"The essence or peculiarity of man is to comprehend a whole; or that which, in the diversity of sensations, can be comprised under a rational unity." "The soul which has never perceived the truth cannot pass into the human form." I announce to men the Intellect. I announce the good of being interpenetrated by the mind that made nature: this benefit, namely, that it can understand nature, which it made and maketh. Nature is good, but intellect is better: as the law-giver is before the law-receiver I give you joy, O sons of men! that truth is altogether wholesome; that we have hope to search out what might be the very self of everything. The misery of man is to be baulked of the sight of essence, and to be stuffed with conjectures but the supreme good is reality; the supreme beauty is reality; and all virtue and all felicity depend on this science of the real for courage is nothing else than knowledge: the fairest fortune that can befall man, is to be guided by his dæmon to that which is truly his own. This also is the essence of justice—to attend every one his own; nay, the notion of virtue is not to be arrived at, except through direct contemplation of the divine essence. Courage, then! for, "the persuasion that we must search that which we do not know, will render us, beyond comparison, better, braver, and more industrious than if we thought it impossible to discover what we do not know, and useless to search for it." He secures a position not to be commanded, by his passion for reality, valuing philosophy only as it is the pleasure of conversing with real being.

Thus, full of the genius of Europe, he said, *Culture*. He saw the institutions of Sparta, and recognized more genially, one would say, than any since, the hope of education. He delighted in every accomplishment, in every graceful and useful and truthful performance; above all, in the splendors of genius and intellectual achievement. "The whole of life, O Socrates, said Glauco, is, with the wise, the measure of hearing such discourses as these." What a price he sets on the feats of talent, on the powers of Pericles, of Isocrates, of Parmenides! What price, above price, on the talents themselves! He called

the several faculties, gods, in his beautiful personation. What value he gives to the art of gymnastic in education; what to geometry, what to music; what to astronomy, whose appeasing and medicinal power he celebrates! In the "Timæus," he indicates the highest employment of the eyes "By us it is asserted, that God invented and bestowed sight on us for this purpose—that, on surveying the circles of intelligence in the heavens, we might properly employ those of our own minds, which, though disturbed when compared with the others that are uniform, are still allied to their circulations, and that, having thus learned, and being naturally possessed of a correct reasoning faculty, we might, by imitating the uniform revolutions of divinity, set right our own wanderings and blunders." And in the "Republic"—"By each of these disciplines, a certain organ of the soul is both purified and re-animated, which is blinded and buried by studies of another kind, an organ better worth saving than ten thousand eyes, since truth is perceived by this alone."

He said, *Culture*, but he first admitted its basis, and gave immeasurably the first place to advantages of nature. His patrician tastes laid stress on the distinctions of birth. In the doctrine of the organic character and disposition is the origin of caste. "Such as were fit to govern, into their composition the informing Deity mingled gold, into the military, silver, iron and brass for husbandmen and artificers." The East confirms itself, in all ages, in this faith. The Koran is explicit on this point of caste. "Men have their metal, as of gold and silver. Those of you who were the worthy ones in the state of ignorance, will be the worthy ones in the state of faith, as soon as you embrace it." Plato was not less firm. "Of the five orders of things, only four can be taught to the generality of men." In the "Republic," he insists on the temperaments of the youth, as first of the first.

A happier example of the stress laid on nature, is in the dialogue with the young Theages, who wishes to receive lessons from Socrates. Socrates declares that, if some have grown wise by associating with him, no thanks are due to him; but, simply, whilst they were with him, they grew wise, not because of him; he pretends not to

3 This . . . all, Compare Plato's *Republic*, Bk. VII. • 7 The essence . . . form, from Plato's *Phaedrus* • 45 Isocrates (436-338 B.C.), Athenian orator and teacher of rhetoric • 45 Parmenides, a Greek philosopher before Plato

know the way of it. "It is adverse to many, nor can those be benefited by associating with me, whom the Dæmon opposes, so that it is not possible for me to live with these. With many, however, he does not prevent me from conversing, who yet are not at all benefited by associating with me. Such, O Theages, is the association with me; for, if it pleases the God, you will make great and rapid proficiency; you will not, if he does not please. Judge whether it is not safer to be instructed by some one of those who have power over the benefit which they impart to men, than by me, who benefit or not, just as it may happen." As if he had said, "I have no system. I cannot be answerable for you. You will be what you must. If there is love between us, inconceivably delicious and profitable will our intercourse be, if not, your time is lost, and you will only annoy me. I shall seem to you stupid, and the reputation I have, false. Quite above us, beyond the will of you or me, is this secret affinity or repulsion laid. All my good is magnetic, and I educate, not by lessons, but by going about my business."

He said, Culture, he said, Nature—and he failed not to add, "There is also the divine." There is no thought in any mind, but it quickly tends to convert itself into a power, and organizes a huge instrumentality of means. Plato, lover of limits, loved the illimitable, saw the enlargement and nobility which come from truth itself, and good itself, and attempted, as if on the part of the human intellect, once for all, to do it adequate homage—homage fit for the immense soul to receive, and yet homage becoming the intellect to render. He said, then, "Our faculties run out into infinity, and return to us thence. We can define but a little way; but here is a fact which will not be skipped, and which to shut our eyes upon is suicide. All things are in a scale, and, begin where we will, ascend and ascend. All things are symbolic; and what we call results are beginnings."

A key to the method and completeness of Plato is his twice-bisected line. After he has illustrated the relation between the absolute good and true, and the forms of the intelligible world, he says.—"Let there be a line cut in two unequal parts. Cut again each of these two parts—one representing the visible, the other the intelligible world—and these two new sections, representing the bright part and the dark part of these worlds, you will have, for one of the sections of the visible world—images, that is, both shadows and reflections, for the

other section, the objects of these images—that plants, animals, and the works of art and nature. I divide the intelligible world in like manner; the section will be of opinions and hypotheses, and the other section, of truths." To these four sections, the four operations of the soul correspond—conjecture, faith, understanding, reason. As every pool reflects the image of sun, so every thought and thing restores us an image-creature of the supreme Good. The universe is performed by a million channels for his activity. All things move and mount.

All his thought has this ascension; in "Phædrus" teaching that "beauty is the most lovely of all things, exciting hilarity, and shedding desire and confidence through the universe, wherever it enters, and it enters some degree, into all things—but that there is another which is as much more beautiful than beauty, as beauty is than chaos, namely, wisdom, which our wonder organ of sight cannot reach unto, but which, could it be seen, would ravish us with its perfect reality." He has the same regard to it as the source of excellence in works of art. "When an artificer, in the fabrication of any work, looks to that which always subsists according to the standard, and, employing a model of this kind, expresses its identity and power in his work, it must follow, that his production should be beautiful. But when he beholds that which is born and dies, it will be far from beautiful."

Thus ever the "Banquet" is a teaching in the same spirit, familiar now to all the poetry, and to all the sermons of the world, that the love of the sexes is initiated and symbolizes, at a distance, the passion of the soul for that immense lake of beauty it exists to seek. This faith in the Divinity is never out of mind, and constitutes the limitation of all his dogmas. Body cannot teach wisdom—God only. In the same mind, he constantly affirms that virtue cannot be taught; that it is not a science, but a inspiration; that the greatest goods are produced to us through mania, and are assigned to us by a divine gift.

This leads me to that central figure, which he has established in his Academy, as the organ through which every considered opinion shall be announced, and whose biography he has likewise so labored, that the historical facts are lost in the light of Plato's mind. Socrates and

40 Let . . . truths. See Plato's *Republic*, Bk. VI. • 74 Banquet another of Plato's works, more commonly known as the *Symposium*.

Plato are the double star, which the most powerful instruments will not entirely separate. Socrates, again, in his traits and genius, is the best example of that synthesis which constitutes Plato's extraordinary power. Socrates, a man of humble stem, but honest enough, of the commonest history, of a personal homeliness so remarkable, as to be a cause of wit in others—the rather that his broad good nature and exquisite taste for a joke invited the sally, which was sure to be paid. The players per-
10 sonated him on the stage, the potters copied his ugly face on their stone jugs. He was a cool fellow, adding to his humor a perfect temper, and a knowledge of his man, be he who he might whom he talked with, which laid the companion open to certain defeat in any debate—and in debate he immoderately delighted. The young men are prodigiously fond of him, and invite him to their feasts, whither he goes for conversation. He can drink, too, has the strongest head in Athens, and, after leaving the whole party under the table, goes away, as
20 if nothing had happened, to begin new dialogues with somebody that is sober. In short, he was what our country-people call *an old one*.

He affected a good many citizen-like tastes, was monstrously fond of Athens, hated trees, never willingly went beyond the walls, knew the old characters, valued the bores and Philistines, thought everything in Athens a little better than anything in any other place. He was plain as a Quaker in habit and speech, affected low phrases, and illustrations from cocks and quails, soup-pans and sycamore-spoons, grooms and farriers, and unnameable offices—especially if he talked with any superfine person. He had a Franklin-like wisdom. Thus, he showed one who was afraid to go on foot to Olympia, that it was no more than his daily walk within doors. If continuously extended, would easily reach

Plain old uncle as he was, with his great ears—an immense talker—the rumor ran, that, on one or two occasions, in the war with Boeotia, he had shown a determination which had covered the retreat of a troop, and
30 there was some story that, under cover of folly, he had, in the city government, when one day he chanced to hold a seat there, evinced a courage in opposing singly the popular voice, which had well-nigh ruined him. He is very poor; but then he is hardy as a soldier, and can live on a few olives, usually, in the strictest sense, on bread and water, except when entertained by his friends

His necessary expenses were exceedingly small, and no one could live as he did. He wore no under garment, his upper garment was the same for summer and winter; and he went barefooted, and it is said that, to procure
50 the pleasure, which he loves, of talking at his ease all day with the most elegant and cultivated young men, he will now and then return to his shop, and carve statues, good or bad, for sale. However that be, it is certain that he had grown to delight in nothing else than this conversation, and that, under his hypocritical pretence of knowing nothing, he attacks and brings down all the fine speakers, all of the fine philosophers of Athens, whether natives, or strangers from Asia Minor and the islands. Nobody can refuse to talk to him, he is so honest,
60 and really curious to know, a man who was willingly confuted, if he did not speak the truth, and who willingly confuted others, asserting what was false; and not less pleased when confuted than when confuting, for he thought not any evil happened to men, of such a magnitude as false opinion respecting the just and unjust. A pitiless disputant, who knows nothing, but the bounds of whose conquering intelligence no man had ever reached, whose temper was imperturbable, whose dread-
70 ful logic was always leisurely and sportive; so careless and ignorant, as to disarm the wariest, and draw them, in the pleasantest manner, into horrible doubts and confusion. But he always knew the way out, knew it, yet would not tell it. No escape, he drives them to terrible choices by his dilemmas, and tosses the Hippiases and Gorgiases, with their grand reputations, as a boy tosses his balls. The tyrannous realist!—Meno has dis-
80 coursed a thousand times, at length, on virtue, before many companies, and very well, as it appeared to him, but, at this moment, he cannot even tell what it is—this crampfish of a Socrates has so bewitched him.

This hard-headed humorist, whose strange conceits, drollery, and *bonhomie* diverted the young patricians, whilst the rumor of his sayings and quibbles gets abroad every day, turns out, in the sequel, to have a probity as invincible as his logic, and to be either insane, or, at least, under cover of this play, enthusiastic in his religion. When accused before the judges of subverting the popular creed, he affirms the immortality of the soul,

75 Hippiases, Gorgiases Hippias and Gorgias were early Greek philosophers

the future reward and punishment, and, refusing to recant, in a caprice of the popular government, was condemned to die, and sent to the prison. Socrates entered the prison, and took away all ignominy from the place, which could not be a prison whilst he was there. Crito bribed the jailer; but Socrates would not go out by treachery. "Whatever inconvenience ensue, nothing is to be preferred before justice. These things I hear like pipes and drums, whose sound makes me deaf to every-
10 thing you say." The fame of this prison, the fame of the discourses there, and the drinking of the hemlock, are one of the most precious passages in the history of the world.

The rare coincidence, in one ugly body, of the droll and the martyr, the keen street and market debater with the sweetest saint known to any history at that time, had forcibly struck the mind of Plato, so capacious of these contrasts; and the figure of Socrates, by a necessity, placed
20 itself in the foreground of the scene, as the fittest dispenser of the intellectual treasures he had to communicate. It was a rare fortune, that this Æsop of the mob, and this robed scholar, should meet, to make each other immortal in their mutual faculty. The strange synthesis, in the character of Socrates, capped the synthesis in the mind of Plato. Moreover, by this means, he was able, in the direct way, and without envy, to avail himself of the wit and weight of Socrates, to which unquestionably his own debt was great; and these derived again their principal advantage from the perfect art of Plato.

30 It remains to say, that the defect of Plato in power is only that which results inevitably from his quality. He is intellectual in his aim, and, therefore, in expression, literary. Mounting into heaven, diving into the pit, expounding the laws of the state, the passion of love, the remorse of crime, the hope of the parting soul—he is literary, and never otherwise. It is almost the sole deduction from the merit of Plato, that his writings have not—what is, no doubt, incident to this regnancy of intellect in his work—the vital authority which the screams of
40 prophets and the sermons of unlettered Arabs and Jews possess. There is an interval; and to cohesion, contact is necessary.

I know not what can be said in reply to this criticism, but that we have come to a fact in the nature of things, an oak is not an orange. The qualities of sugar remain with sugar, and those of salt, with salt.

In the second place, he has not a system. The deaf defenders and disciples are at fault. He attempted theory of the universe, and his theory is not compact or self-evident. One man thinks he means this; and other, that: he has said one thing in one place, and reverse of it in another place. He is charged with having failed to make the transition from ideas to matter. He is the world, sound as a nut, perfect, not the small piece of chaos left, never a stitch nor an end, nor a moment of haste, or botching, or second thought; but the whole of the world is a thing of shreds and patches.

The longest wave is quickly lost in the sea. Plato would willingly have a Platonism, a known and accurate expression for the world, and it should be accurate: shall be the world passed through the mind of Plato, nothing less. Every atom shall have the Platonic tin; every atom, every relation or quality you knew before you shall know again, and find here, but now ordered, not nature, but art. And you shall feel that Alexander indeed overran, with men and horses, some countries, the planet, but countries, and things of which countries are made, elements, planet itself, laws of planet and men, have passed through this man as bread into body, and become no longer bread, but body: so all that mammoth morsel has become Plato. He has clapped copyright on the world. This is the ambition of individualism. But the mouthful proves too large. *Boa constrictor* has good will to eat it, but he is foiled. He falls abroad in the attempt; and biting, gets strangled: the bitter world holds the biter fast by his own teeth. There he perishes. unconquered nature lives on, and forgets him. So it fares with all, so must it fare with Plato. In view of eternal nature, Plato turns out to be philosophical excitations. He argues on this side, and on that. The acute German, the lovingest disciple, could never tell what Platonism was; indeed, admirable texts can be quoted on both sides of every great question from him.

These things we are forced to say, if we must consider the effort of Plato, or of any philosopher, to dispose of Nature—which will not be disposed of. No power of genius has ever yet had the smallest success in explaining existence. The perfect enigma remains. But there is an injustice in assuming this ambition for Plato. Let us not seem to treat with flippancy his venerable name. Men, in proportion to their intellect, have admitted his transcendent claims. The way to know him, is to compare

him, not with nature, but with other men. How many
 ages have gone by, and he remains unapproached! A
 chief structure of human wit, like Karnac, or the me-
 diaeval cathedrals, or the Etrurian remains, it requires
 all the breadth of human faculty to know it I think it
 is truest seen, when seen with the most respect. His
 sense deepens, his merits multiply, with study. When we
 say, here is a fine collection of fables, or, when we praise
 the style, or the common sense, or arithmetic, we speak
 as boys, and much of our impatient criticism of the

dialectic, I suspect, is no better. The criticism is like our
 impatience of miles, when we are in a hurry; but it is
 still best that a mile should have seventeen hundred and
 sixty yards The great-eyed Plato proportioned the lights
 and shades after the genius of our life

The Rhodora:

On Being Asked, Whence Is the Flower?

In May, when sea-winds pierced our solitudes,
 I found the fresh Rhodora in the woods,
 Spreading its leafless blooms in a damp nook,
 To please the desert and the sluggish brook
 The purple petals, fallen in the pool,
 Made the black water with their beauty gay;
 Here might the red-bird come his plumes to cool,
 And court the flower that cheapens his array.
 Rhodora! if the sages ask thee why
 This charm is wasted on the earth and sky,
 Tell them, dear, that if eyes were made for seeing,
 Then Beauty is its own excuse for being
 Why thou wert there, O rival of the rose!
 I never thought to ask, I never knew:
 But, in my simple ignorance, suppose
 The self-same Power that brought me there brought you

1834-1839

Each and All

Little thinks, in the field, yon red-cloaked clown
 Of thee from the hill-top looking down,
 The heifer that lows in the upland farm,
 Far-heard, lows not thine ear to charm;
 The sexton, tolling his bell at noon,
 Deems not that great Napoleon
 Stops his horse, and lists with delight,

Whilst his files sweep round yon Alpine height,
 Nor knowest thou what argument
 Thy life to thy neighbor's creed has lent
 All are needed by each one,
 Nothing is fair or good alone
 I thought the sparrow's note from heaven,
 Singing at dawn on the alder bough,
 I brought him home, in his nest, at even,
 He sings the song, but it cheers not now,
 For I did not bring home the river and sky,—
 He sang to my ear,—they sang to my eye
 The delicate shells lay on the shore;
 The bubbles of the latest wave
 Fresh pearls to their enamel gave,
 And the bellowing of the savage sea
 Greeted their safe escape to me
 I wiped away the weeds and foam,
 I fetched my sea-born treasures home,
 But the poor, unsightly, noisome things
 Had left their beauty on the shore
 With the sun and the sand and the wild uproar.
 The lover watched his graceful maid,
 As 'mid the virgin train she strayed,
 Nor knew her beauty's best attire
 Was woven still by the snow-white choir.
 At last she came to his hermitage,
 Like the bird from the woodlands to the cage,—
 The gay enchantment was undone,

The Rhodora • 12 Beauty . . . being. This often-quoted line hardly
 represents Emerson's usual attitude. More characteristic is the following
 from *Nature* (1836): "Beauty in nature is not ultimate. It is the herald
 of inward and eternal beauty, and is not alone a solid and satisfactory
 good"

A gentle wife, but fairy none
 Then I said, "I covet truth,
 Beauty is unripe childhood's cheat,
 I leave it behind with the games of youth":—
 As I spoke, beneath my feet
 The ground-pine curled its pretty wreath,
 Running over the club-moss burrs,
 I inhaled the violet's breath,
 Around me stood the oaks and firs,
 Pine-cones and acorns lay on the ground;
 Over me soared the eternal sky,
 Full of light and of deity,
 Again I saw, again I heard,
 The rolling river, the morning bird,—
 Beauty through my senses stole,
 I yielded myself to the perfect whole

40

I like a church, I like a cowl;
 I love a prophet of the soul,
 And on my heart monastic aisles
 Fall like sweet strains, or pensive smiles,
 Yet not for all his faith can see
 Would I that cowl'd churchman be

Why should the vest on him allure,
 Which I could not on me endure?

Not from a vain or shallow thought
 His awful Jove young Phidias brought,
 Never from lips of cunning fell
 The thrilling Delphic oracle,
 Out from the heart of nature rolled
 The burdens of the Bible old,
 The litanies of nations came,
 Like the volcano's tongue of flame,
 Up from the burning core below,—
 The canticles of love and woe
 The hand that rounded Peter's dome
 And groined the aisles of Christian Rome
 Wrought in a sad sincerity,
 Himself from God he could not free;
 He builded better than he knew,—
 The conscious stone to beauty grew
 Know'st thou what wove yon woodbird's nest
 Of leaves, and feathers from her breast?
 Or how the fish outbuilt her shell,
 Painting with morn each annual cell?
 Or how the sacred pine-tree adds

Concord Hymn

Sung at the Completion of the Battle Monument,
 July 4, 1837

By the rude bridge that arched the flood,
 Their flag to April's breeze unfurled,
 Here once the embattled farmers stood
 And fired the shot heard round the world

 The foe long since in silence slept,
 Alike the conqueror silent sleeps;
 And Time the ruined bridge has swept
 Down the dark stream which seaward creeps.

 On this green bank, by this soft stream,
 We set to-day a votive stone,
 That memory may their deed redeem.
 When, like our sires, our sons are gone.

10

Spirit, that made those heroes dare
 To die, and leave their children free,
 Bid Time and Nature gently spare
 The shaft we raise to them and thee.

1837

Concord Hymn • 4 fired . . . world. The first armed clash of the American Revolution occurred at Lexington and Concord, April 19, 1775. After having retreated from Lexington, the minutemen rallied at Concord and drove the British back to Boston.

The Snow-Storm

To her old leaves new myriads?
 Such and so grew these holy piles,
 Whilst love and terror laid the tiles.
 Earth proudly wears the Parthenon,
 As the best gem upon her zone,
 And Morning opes with haste her lids
 To gaze upon the Pyramids,
 O'er England's abbeys bends the sky.
 As on its friends, with kindred eye;
 For out of Thought's interior sphere
 These wonders rose to upper air;
 And Nature gladly gave them place,
 Adopted them into her race,
 And granted them an equal date
 With Andes and with Ararat

These temples grew as grows the grass,
 Art might obey, but not surpass.
 The passive Master lent his hand
 To the vast soul that o'er him planned,
 And the same power that reared the shrine
 Bestrode the tribes that knelt within
 Ever the fiery Pentecost
 Girds with one flame the countless host,
 Trances the heart through chanting choirs
 And through the priest the mind inspires
 The word unto the prophet spoken
 Was writ on tables yet unbroken,
 The word by seers or sibyls told,
 In groves of oak, or fanes of gold,
 Still floats upon the morning wind,
 Still whispers to the willing mind
 One accent of the Holy Ghost
 The heedless world hath never lost
 I know what say the fathers wise,—
 The Book itself before me lies.
 Old *Chrysostom*, best Augustine,
 And he who blent both in his line,
 The younger *Golden Lips* or mines,
 Taylor, the Shakspeare of divines.
 His words are music in my ear,
 I see his cowlèd portrait dear,
 And yet, for all his faith could see,
 I would not the good bishop be

30

Announced by all the trumpets of the sky,
 Arrives the snow, and, driving o'er the fields,
 Seems nowhere to alight the whited air
 Hides hills and woods, the river, and the heaven,
 And veils the farm-house at the garden's end.
 The sled and traveller stopped, the courier's feet
 Delayed, all friends shut out, the housemates sit
 Around the radiant fireplace, enclosed
 In a tumultuous privacy of storm.

40

Come see the north wind's masonry
 Out of an unseen quarry evermore
 Furnished with tile, the fierce artificer
 Curves his white bastions with projected roof
 Round every windward stake, or tree, or door
 Speeding, the myriad-handed, his wild work
 So fanciful, so savage, nought cares he
 For number or proportion Mockingly,
 On coop or kennel he hangs Parian wreaths,
 A swan-like form invests the hidden thorn;
 Fills up the farmer's lane from wall to wall,
 Maugre the farmer's sighs, and at the gate
 A tapering turret overtops the work
 And when his hours are numbered, and the world
 Is all his own, retiring, as he were not,
 Leaves, when the sun appears, astonished Art
 To mimic in slow structures, stone by stone,
 Built in an age, the mad wind's nightwork,
 The frolic architecture of the snow

Grace

"Grace" was published in *The Dial* for January 1842, but Emerson did not include it in his collected *Poems* (1847) or in later collections. His reason for "rejecting" it probably was that it expresses ideas contrary to those expressed elsewhere in his writings, especially in *Self-Reliance*. In the essay he says: "Society everywhere is in conspiracy against the manhood of every one of its members . . . Whoso would be a man, must be a nonconformist . . . What I must do is all that concerns me, not what the people think." Although one of his best poems, "Grace" expresses a view which must have been unusual with Emerson and which we may regard as uncharacteristic. The poem shows the influence of the English religious poets of the seventeenth century.

How much, preventing God, how much I owe
To the defenses thou hast round me set;
Example, custom, fear, occasion slow,—
These scorned bondmen were my parapet
I dare not peep over this parapet
To gauge with glance the roaring gulf below.
The depths of sin to which I had descended,
Had not these me against myself defended.

1842

Merlin

Emerson uses Merlin, famous prophet and magician of Arthurian romance, to typify the ideal poet. The ideas of the poem are similar to those of the essay on "The Poet"

I

Thy trivial harp will never please
Or fill my craving ear;
Its chords should ring as blows the breeze,
Free, peremptory, clear.
No jingling serenader's art,

Nor tinkle of piano strings,
Can make the wild blood start
In its mystic springs.
The kingly bard
Must smite the chords rudely and hard,
As with hammer or with mace;
That they may render back
Artful thunder, which conveys
Secrets of the solar track,
Sparks of the supersolar blaze.
Merlin's blows are strokes of fate,
Chiming with the forest tone,
When boughs buffet boughs in the wood;
Chiming with the gasp and moan
Of the ice-imprisoned flood,
With the pulse of manly hearts;
With the voice of orators,
With the din of city arts,
With the cannonade of wars,
With the marches of the brave;
And prayers of might from martyrs' cave.

Great is the art,
Great be the manners, of the bard
He shall not his brain encumber
With the coil of rhythm and number.
But, leaving rule and pale forethought,
He shall aye climb
For his rhyme.
"Pass in, pass in," the angels say,
"In to the upper doors,
Nor count compartments of the floors,
But mount to paradise
By the stairway of surprise."

Blameless master of the games,
King of sport that never shames,
He shall daily joy dispense
Hid in song's sweet influence.
Forms more cheerly live and go,
What time the subtle mind

Merlin • 5 No jingling . . . strings. Possibly Emerson was thinking of Poe, whom he once called "the jingle man" • 29 He . . . number
Compare "The Poet," p. 907 " . . . it is not metres, but a metre
making argument that makes a poem"

Sings aloud the tune whereto
Their pulses beat,
And march their feet,
And their members are combined.

By Sybarites beguiled,
He shall no task decline;
Merlin's mighty line
Extremes of nature reconciled,—
Bereaved a tyrant of his will,
And made the lion mild
Songs can the tempest still,
Scattered on the stormy air,
Mold the year to fair increase
And bring in poetic peace

He shall not seek to weave,
In weak, unhappy times,
Efficacious rhymes,
Wait his returning strength
Bird, that from the nadir's floor
To the zenith's top can soar,
The soaring orbit of the muse exceeds that journey's
length
Nor profane affect to hit
Or compass that, by meddling wit,
Which only the propitious mind
Publishes when 'tis inclined
There are open hours
When the God's will sallies free,
And the dull idiot might see
The flowing fortunes of a thousand years,—
Sudden, at unawares,
Self-moved, fly-to the doors,
Nor sword of angels could reveal
What they conceal.

II

The rhyme of the poet
Modulates the king's affairs,
Balance-loving Nature
Made all things in pairs.
To every foot its antipode;
Each color with its counter glowed;
To every tone beat answering tones,
Higher or graver;

Flavor gladly blends with flavor,
Leaf answers leaf upon the bough,
And match the paired cotyledons.
Hands to hands, and feet to feet,
In one body grooms and brides,
Eldest rite, two married sides
In every mortal meet
Light's far furnace shines,
Smelting balls and bars,
Forging double stars,
Glittering twins and trines
The animals are sick with love,
Lovesick with rhyme,
Each with all propitious Time
Into chorus wove

Like the dancers' ordered band,
Thoughts come also hand in hand,
In equal couples mated,
Or else alternated,
Adding by their mutual gage,
One to other, health and age
Solitary fancies go
Short-lived wandering to and fro,
Most like to bachelors,
Or an ungiven maid,
Not ancestors,
With no posterity to make the lie afraid,
Or keep truth undecayed.
Perfect-paired as eagle's wings,
Justice is the rhyme of things;
Trade and counting use
The selfsame tuneful muse,
And Nemesis,
Who with even matches odd,
Who arthwart space redresses

49 Sybarites, voluptuaries • 51 Merlin's mighty line recalls "Marlowe's mighty line" (in Ben Jonson's "To the Memory of My Beloved Master William Shakespeare," l. 30) • 67 meddling wit. Emerson's doctrine of inspiration disparages the rôle of the intellect in artistic creation, the intellect being denoted by "meddling wit" in the present passage and by "cunning" in "The Problem," l. 11 • 78 The rhyme . . . affairs, a romantic conception of the power of the poet found elsewhere in the nineteenth century, in the following, for example, from Shelley's *Defense of Poetry*: "Poets are the unacknowledged legislators of the world"

The partial wrong,
Fills the just period,
And finishes the song.

Subtle rhymes, with ruin rife,
Murmur in the house of life,
Sung by the Sisters as they spin,
In perfect time and measure they
Build and unbuild our echoing clay,
As the two twilights of the day
Fold us music-drunken in

1846-1847

Bacchus

Bring me wine, but wine which never grew
In the belly of the grape,
Or grew on vine whose tap-roots, reaching through
Under the Andes to the Cape,
Suffered no savor of the earth to scape

Let its grapes the morn salute
From a nocturnal root,
Which feels the acrid juice
Of Styx and Erebus,
And turns the woe of Night,
By its own craft, to a more rich delight

We buy ashes for bread,
We buy diluted wine,
Give me of the true,—
Whose ample leaves and tendrils curled
Among the silver hills of heaven
Draw everlasting dew;
Wine of wine,
Blood of the world,
Form of forms, and mould of statures,
That I intoxicated,
And by the draught assimilated,
May float at pleasure through all natures;
The bird-language rightly spell,
And that which roses say so well

Wine that is shed
Like the torrents of the sun
Up the horizon walls,
Or like the Atlantic streams, which run
When the South Sea calls
Water and bread,
Food which needs no transmuting,
Rainbow-flowering, wisdom-fruited,
Wine which is already man,
Food which teach and reason can

Wine which music is,—
Music and wine are one,—
That I, drinking this,
Shall hear far Chaos talk with me,
Kings unborn shall walk with me,
And the poor grass shall plot and plan
What it will do when it is man
Quickened so, will I unlock
Every crypt of every rock

I thank the joyful juice
For all I know,—
Winds of remembering
Of the ancient being blow,
And seeming-solid walls of use
Open and flow.

10 Pour, Bacchus! the remembering wine,
Retrieve the loss of me and mine'
Vine for vine be antidote,
And the grape requite the lute!
Haste to cure the old despair,—
Reason in Nature's lotus drenched,

Merlin • 126 *Sisters*, the three goddesses of Greek mythology who determined the course of human life. Clotho spun the thread, Lachesis measured its length, and Atropos cut it off

Bacchus • 9 *Styx*, in Greek mythology, the river which had to be crossed in passing to the regions of the dead • 9 *Erebus*, in Greek mythology, the gloomy space through which souls passed to Hades • 21 *intoxicated*. The poet is obviously speaking of a "transcendental intoxication" • 51 *remembering wine*, wine which causes the soul to remember. Emerson has in mind the Platonic doctrines of pre-existence and reminiscence • 54 *lute*. The eating of the fruit of the lotus caused forgetfulness (compare Tennyson's poem, "The Lotus Eaters")

The memory of ages quenched,
 Give them again to shine,
 Let wine repair what this undid,
 And where the infection slid,
 A dazzling memory revive,
 Refresh the faded tints,
 Recut the aged prints,
 And write my old adventures with the pen
 Which on the first day drew,
 Upon the tablets blue,
 The dancing Pleiads and eternal men

1846-1847

Ode

Inscribed to W. H. Channing

This poem was Emerson's answer to the Rev William Henry Channing, and other reformers, who insisted that Emerson take an active part in the movement for the abolition of slavery

Though loath to grieve
 The evil time's sole patriot,
 I cannot leave
 My honeyed thought
 For the priest's cant
 Or statesman's rant

If I refuse
 My study for their politique,
 Which at the best is trick,
 The angry Muse
 Puts confusion in my brain

But who is he that prates
 Of the culture of mankind,
 Of better arts and life?
 Go, blindworm, go,
 Behold the famous States
 Harrying Mexico
 With rifle and with knife!

Or who, with accent bolder,
 Dare praise the freedom-loving mountaineer?
 I found by thee, O rushing Contoocook!
 And in thy valleys, Agiochook!
 The jackals of the Negro-holder

The God who made New Hampshire
 Taunted the lofty land
 With little men,—
 Small bat and wren
 House in the oak —
 If earth-fire cleave
 The upheaved land, and bury the folk,
 The southern crocodile would grieve
 Virtue palters, Right is hence,
 Freedom praised, but hid;
 Funeral eloquence
 Rattles the coffin-lid

What boots thy zeal,
 O glowing friend,
 That would indignant rend
 The northland from the south?
 Wherefore? to what good end?
 Boston Bay and Bunker Hill
 Would serve things still,—
 Things are of the snake

The horseman serves the horse,
 The neatherd serves the neat,
 The merchant serves the purse,
 The eater serves his meat,
 'Tis the day of the chattel,
 Web to weave, and corn to grind,
 Things are in the saddle,
 And ride mankind

17 Mexico War with Mexico began in April 1846 and was formally concluded in February 1848. In New England the war was strongly opposed (compare Lowell's *Biglow Papers*, First Series, 1846) • 21 Contoocook, a river which rises in New Hampshire and flows into the Merrimac • 22 Agiochook, Indian name for the White Mountains • 23 jackals. The jackal, or wild dog, was once supposed to hunt game for the lion, the reference may be to the pursuit of fugitive slaves in New Hampshire, and in New England generally • 45 neat, cattle

There are two laws discrete,
 Not reconciled,—
 Law for man, and law for thing;
 The last builds town and fleet,
 But it runs wild,
 And doth the man unking.

'Tis fit the forest fall,
 The steep be graded,
 The mountain tunnelled,
 The sand shaded,
 The orchard planted,
 The glebe tilled,
 The prairie granted,
 The steamer built

Let man serve law for man,
 Live for friendship, live for love,
 For truth's and harmony's behoof,
 The state may follow how it can,
 As Olympus follows Jove

Yet do not I implore
 The wrinkled shopman to my sounding woods,
 Nor bid the unwilling senator
 Ask votes of thrushes in the solitudes
 Every one to his chosen work,—
 Foolish hands may mix and mar,
 Wise and sure the issues are
 Round they roll till dark is light,
 Sex to sex, and even to odd;—
 The over-god
 Who marries Right to Might,
 Who peoples, unpeoples,—
 He who exterminates
 Races by stronger races,
 Black by white faces,—
 Knows to bring honey
 Out of the lion;
 Grafts gentlest scion
 On pirate and Turk.

The Cossack eats Poland,
 Like stolen fruit;
 Her last noble is ruined,

Her last poet mute.
 Straight, into double band
 The victors divide,
 Half for freedom strike and stand;—
 The astonished Muse finds thousands at her side

1

Hamatreya

70

"Hamatreya" is based upon a passage in the Vish Purana (one of the sacred books of the Hindus), which Emerson transcribed in his Journals in 1845 as follows: "These and other kings who . . . have indulged the feeling that suggests 'This earth is mine—it is my son's—it belongs to my dynasty'—have all passed away. So, many who reigned before them, many who succeeded them, and many who are yet to come, have ceased or will cease. Earth laughs, as if smiling with autumnal flowers, behold her Kings unable to effect the subjugation of themselves. I will repeat to you, Maitreya, the stanzas that were chanted by Earth. . . .

80

"How great is the folly of princes who are endowed with the faculty of reason, to cherish the confidence and ambition when they themselves are but foam upon the wave . . . Foolishness has been the character of every King who has boasted, 'All this earth is mine—everything is mine—it will be in my house forever,'—for he is dead . . ."

"These were the verses, Maitreya, which Earth recited and by listening to which ambitions faded away like snow before the sun."

Emerson's title is apparently a variant of "Maitreya" in the quoted passage.

90

52 discrete, separate, individual, distinct (not to be confused with "discreet") • 75 Every one . . . work. William James justly noted Emerson's "fidelity to the limits of his genius" • 86 honey . . . lion. Samson found "honey in the carcase of the lion" which he had slain. See Judges 14:5-9 • 90 Cossack eats Poland, a frequent occurrence. Russia had appropriated Polish territory in 1772 ("the first partition of Poland"), in 1793 ("the second partition"), and in 1795 ("the third partition") A Polish revolution in 1830 had been suppressed by the czar

Bulkeley, Hunt, Willard, Hosmer, Meriam, Flint
 Possessed the land which rendered to their toil
 Hay, corn, roots, hemp, flax, apples, wool and wood
 Each of these landlords walked amidst his farm,
 Saying, "'Tis mine, my children's and my name's
 How sweet the west wind sounds in my own trees!
 How graceful climb those shadows on my hill!
 I fancy these pure waters and the flags
 Know me, as does my dog we sympathize,
 And, I affirm, my actions smack of the soil"

10

Where are these men? Asleep beneath their grounds
 And strangers, fond as they, their furrows plough
 Earth laughs in flowers, to see her boastful boys
 Earth-proud, proud of the earth which is not theirs,
 Who steer the plough, but cannot steer their feet
 Clear of the grave.
 They added ridge to valley, brook to pond,
 And sighed for all that bounded their domain,
 "This suits me for a pasture, that's my park,
 We must have clay, lime, gravel, granite-ledge,
 And misty lowland, where to go for peat
 The land is well,—lies fairly to the south
 'Tis good, when you have crossed the sea and back,
 To find the sitfast acres where you left them"
 Ah! the hot owner sees not Death, who adds
 Him to his land, a lump of mould the more
 Hear what the Earth says:—

EARTH-SONG

"Mine and yours,
 Mine, not yours
 Earth endures;
 Stars abide—
 Shine down in the old sea;
 Old are the shores,
 But where are old men?
 I who have seen much,
 Such have I never seen.

"The lawyer's deed
 Ran sure,
 In tail,
 To them, and to their heirs

40

Who shall succeed,
 Without fail,
 Forevermore

"Here is the land,
 Shaggy with wood,
 With its old valley,
 Mound and flood
 But the heritors'—
 Fled like the flood's foam
 The lawyer, and the laws,
 And the kingdom,
 Clean swept herefrom

50

"They called me theirs,
 Who so controlled me,
 Yet every one
 Wished to stay, and is gone,
 How am I theirs,
 If they cannot hold me,
 But I hold them!"

When I heard the Earth-song
 I was no longer brave,
 My avarice cooled
 Like lust in the chill of the grave

60

1847

Give All to Love

Give all to love,
 Obey thy heart,
 Friends, kindred, days,
 Estate, good-fame,
 Plans, credit and the Muse,—
 Nothing refuse

'Tis a brave master,
 Let it have scope

Hamatreya • 1 Bulkeley . . Flint, first settlers of Concord •
 12 fond, foolish • 23 'Tis . . . them. These lines might have been
 written by Robert Frost • 39 In tail, entail, designating the possession
 of property

Follow it utterly,
Hope beyond hope.
High and more high
It dives into noon,
With wing unspent,
Untold intent,
But it is a god,
Knows its own path
And the outlets of the sky

It was never for the mean,
It requireth courage stout
Souls above doubt
Valor unbending,
It will reward,—
They shall return
More than they were,
And ever ascending

Leave all for love,
Yet, hear me, yet,
One word more thy heart behoved,
One pulse more of firm endeavor—
Keep thee to-day,
To-morrow, forever,
Free as an Arab
Of thy beloved

Cling with life to the maid,
But when the surprise,
First vague shadow of surmise
Flits across her bosom young,
Of a joy apart from thee,
Free be she, fancy-free,
Nor thou detain her vesture's hem,
Nor the palest rose she flung
From her summer diadem

Though thou loved her as thyself,
As a self of purer clay,
Though her parting dims the day,
Stealing grace from all alive,
Heartily know,
When half-gods go,
The gods arrive.

10

De

"Days" is Emerson's version of a favorite theme of the ec
Puritans, who often preached on "redeeming the tim

20

Daughters of Time, the hypocritic Days,
Muffled and dumb like barefoot dervishes,
And marching single in an endless file,
Bring diadems and fagots in their hands.
To each they offer gifts after his will,
Bread, kingdoms, stars, and sky that holds them all
I, in my pleached garden, watched the pomp,
Forgot my morning wishes, hastily
Took a few herbs and apples, and the Day
Turned and departed silent I, too late.
Under her solemn fillet saw the scorn

Brahma

30

40

"Brahma" is the most notable expression of Hindu re
ligious thought in Emerson's writings. Brahma is the unde
lying, unchanging reality, it can best be understood i
contrast with Maya, the changing, illusory world of ap
pearance, as shown in the following passage from the
Hindu scriptures (quoted in Arthur Christy, *The Orient in
American Transcendentalism*, p. 91). "Brahma is withou
attribute and form, Maya is endowed with both; Brahmc
is infinite, Maya finite, Brahma is immaculate and serene
Maya fleeting and restless; Brahma is without adjuncts
Maya is full of them, Maya is visible, Brahma invisible,
Maya perceptible, Brahma imperceptible, Maya perish-
able, Brahma imperishable; Maya groweth, Brahma wax-
eth not; Maya diminisheth, Brahma waneth not; Maya
appealeth to the ignorant, Brahma attracts him not; Maya
is born, Brahma is birthless; Maya dieth, Brahma is death-
less; Maya descendeth into cognition, Brahma is beyond
cognition, Maya fructifieth, Brahma doth not; Maya dis-
solveth, Brahma is indissoluble; Maya palleth, Brahma is

Give . . . Love • 48 When . . . arrive. Compare in the concluding
paragraph of the essay on "Friendship" "True love transcends the
unworthy object and dwells and broods on the eternal . . ."

a joy forever; Maya changeth, Brahma is immutable, Maya acteth, Brahma is beyond all activity; Maya assumeth various forms, Brahma is formless; Maya is . . . manifold, Brahma is one and eternal. . . . Maya is spread everywhere enveloping the Brahma, the sage alone can pierce through the mist.'

If the red slayer think he slays,
Or if the slain think he is slain,
They know not well the subtle ways
I keep, and pass, and turn again

Far or forgot to me is near,
Shadow and sunlight are the same,
The vanished gods to me appear,
And one to me are shame and fame

They reckon ill who leave me out,
When me they fly, I am the wings,
I am the doubter and the doubt,
And I the hymn the Brahmin sings

The strong gods pine for my abode,
And pine in vain the sacred Seven,
But thou, meek lover of the good!
Find me, and turn thy back on heaven

1856-1857

Terminus

The poem expresses an extraordinarily clear recognition of failing powers. Emerson was correct in thinking that at sixty-three he had reached and passed the peak of his achievement. He lived on for sixteen years after "Terminus" without adding anything significant to his literary output. A few months before his death, he lost his memory completely.

The poem shows a strong vein of realism and Yankee common sense.

It is time to be old,
To take in sail —
The god of bounds,
Who sets to seas a shore,
Came to me in his fatal rounds,
And said: "No more!"

No farther shoot
Thy broad ambitious branches, and thy root.
Fancy departs no more invent,
Contract thy firmament
To compass of a tent
There's not enough for this and that,
Make thy option which of two,
Economize the failing river,
Not the less revere the Giver,
Leave the many and hold the few
Timely wise accept the terms,
Soften the fall with wary foot,
A little while
Still plan and smile,
And,—fault of novel germs,—
Mature the unfallen fruit
Curse, if thou wilt, thy sires,
Bad husbands of their fires,
Who when they gave thee breath,
Failed to bequeath
The needful sinew stark as once,
The Baresark marrow to thy bones,
But left a legacy of ebbing veins,
Inconstant heat and nerveless reins,—
Amid the Muses, left thee deaf and dumb,
Amid the gladiators, halt and numb "

As the bird trims her to the gale,
I trim myself to the storm of time,
I man the rudder, reef the sail,
Obey the voice at eve obeyed at prime
"Lowly faithful, banish fear,
Right onward drive unharmed,
The port, well worth the cruise, is near,
And every wave is charmed "

1866-1867

Brahma • 8 shame and fame. Emerson intended an opposition bad report and good report. The line must mean, 'Evil and Good are to me one and the same.' Emerson is said to have suggested to a puzzled reader the substitution of 'Jehovah' for 'Brahma,' and E. W. Emerson (*Poems*, Centenary Edition, p. 467) tells with approval the story of the child who said that the poem means simply "God everywhere." These suggestions are seriously misleading. To Jehovah, or to the God of the Christian Bible, Good and Evil are not the same. • 14 sacred Seven, the highest saints of the Hindu hierarchy

Terminus • 3 The god of bounds. Terminus was the Roman god of boundaries. • 5 fatal, appointed by fate. • 21 fault of novel, in the lack of new. • 30 --- --

Henry David Thoreau

1817 • 1862

Henry David Thoreau was born in Concord, Massachusetts, July 12, 1817. The time and place of his birth pleased him enormously "I have never got over my surprise that I should have been born into the most estimable place in all the world, and in the very nick of time, too." He was graduated without distinction from Harvard College in 1837, the year of *The American Scholar*. After graduation, he assisted his brother John for a while in teaching a private school. He also helped his father manufacture lead pencils in the 1840's, but when their product equaled, or perhaps surpassed, the best pencils on the market, he gave up pencil making because of a desire for fresh experiences. In 1839 he and John went on a famous journey, the literary record of which, *A Week on the Concord and Merrimack Rivers*, appeared ten years later. About the time of their jour-

ney together, both Henry and John fell in love with Ellen Sewall, who, perhaps wisely, refused them both.

Thoreau was a frequent contributor to *The Dial* from 1840 to 1844. In 1841, and again in 1847-1848, he was a member of Emerson's household, doing odd jobs: in 1842 John died, in 1843 Henry was a tutor in the family of William Emerson, a brother of Ralph Waldo Emerson, on Staten Island. In 1838 he had delivered before the Concord Lyceum his first lecture, in which he described his neighbors as "newly shingled and clapboarded, but if you knock, no one is at home." He continued to lecture for many years, indeed, much of his writing, like Emerson's,

Panel (l to r) Winter scene near Concord • Thoreau's "study" at Walden • The hut near Walden Pond • Henry Thoreau at the age of 37 • His home in Concord

was done with the intention of using it as lecture material. Mr. Canby records lectures not only in Concord but in Boston, Salem, Portland, Bangor, Providence, Philadelphia, New Bedford, and Amherst (New Hampshire); at the last-named place, Thoreau lectured in December 1856 in the basement of the orthodox church, and, as he commented later, "helped to undermine it." But despite a good many attempts, he was not very successful as a lecturer, much less successful and less popular than Emerson, to whom he remarked, with a little bitterness, that "whatever succeeded with the audience was bad." He concluded in 1858 that "audiences go to the Lyceum to suck a sugar-plum."

On July 4, 1845, Thoreau began his famous residence at Walden Pond. "I went to the woods," he explains in a great passage in *Walden*. "because I wished to live deliberately, to front only the essential facts of life. . . ." On September 6, 1847, he left Walden, not from a sense of failure or disappointment but, once more, because of a desire to explore new modes of living. "I left the woods," he wrote in the concluding chapter of his book, "for as good a reason as I went there. Perhaps it seemed to me that I had several more lives to live and could not spare any more time for that one. It is remarkable how easily and insensibly we fall into a particular route and make a beaten track for ourselves. I had not lived there a week before my feet wore a path from my door to the pond-side. . . . How worn and dusty, then, must be the highways of the world, how deep the ruts of tradition and conformity!" *Walden*, published in 1854, is the immortal record of Thoreau's rich, elemental experience. It is a mistake to think of Thoreau as a hermit during the Walden period, though he has frequently been called that. While he lived in the woods, he was often in the village, he received visitors at the Pond, and he continued to do, in and around Concord, the various odd jobs at which he was so adept: fence building, house painting, carpentering, gardening, berry picking, surveying. His aim was always, in his best phrase, to "adventure on life."

In 1845, during his residence at Walden, Thoreau was arrested because of his refusal to pay the poll tax and spent perforce a night in the Concord jail. The experience itself, as he tells us in "Civil Disobedience" (1849), was "novel and interesting enough." Through the grating of his prison cell, he saw his native village from a fresh point of view. The reason for his rebellion

was his opposition to Negro slavery and the movement to increase slave territory in the Southwest. He persisted courageously in this opposition. He helped at least one fugitive slave to evade the Boston police and escape into Canada (see Thoreau's *Journal*, October 1, 1851). Along with Emerson, he gave active support to John Brown. In his *Plea for Captain John Brown*, delivered in the Concord Town Hall, October 30, 1859, when Brown was under sentence of death, Thoreau likened him to Cromwell and the early New England Puritans. When the selectmen of the village refused to sanction a memorial service to Brown, Thoreau rang the bell of the Town Hall himself.

"I have traveled a good deal in Concord," Thoreau wrote in *Walden*; he traveled a good deal in other places, too. There were three excursions to the Maine Woods (in 1846, 1853, and 1857) and four excursions to Cape Cod (in 1849, 1850, 1855, and 1857). He spent a week in Canada in 1850 with Ellery Channing, a Concord friend and neighbor. He frequently journeyed to Monadnock and the White Mountains. These excursions furnished material for much writing, which appeared in part in magazines during Thoreau's lifetime and was collected after his death (*Excursions*, 1863, *The Maine Woods*, 1864, *Cape Cod*, 1865). In 1856 he went with another Concord friend, Bronson Alcott, to New York, where he saw Whitman; shortly after the visit, he wrote to a friend, "That Walt Whitman is the most interesting fact to me at present." In 1861 he traveled as far west as Minnesota, but his health was already failing. He died of tuberculosis in Concord, May 6, 1862, before he had reached his forty-fifth birthday. When asked in his last hours by his Aunt Louisa if he had "made his peace with God," he replied, "I have never quarrelled with Him."

It is only in comparatively recent years that Thoreau has attained his present high reputation in American literature. For more than a half-century after his death, he was very generally regarded as an interesting eccentric and one of the minor Emersonians. This low estimate may be attributed in part to the influence of the derogatory essays of James Russell Lowell and Robert Louis Stevenson. Lowell, the cosmopolite, cleverly ridiculed Thoreau's provincialism and "morbid self-consciousness" ("Thoreau," *My Study Windows*, 1871). Stevenson, *bon vivant* and man of the world, objected that "Thoreau is

dry, priggish, and selfish,"—"in one word, a skulker" ("Henry David Thoreau," *Familiar Studies of Men and Books*, 1882). The growth of Thoreau's fame in the third and fourth decades of the present century has no doubt been owing not only to a recognition of his fine literary qualities but also to various special appeals which his works make to modern readers. His lessons in simplicity and economy have appealed to those who are harassed by the complexity and expense of modern life. His almost primitive intimacy with nature has come home to a generation whose mode of life is largely artificial and divorced from natural influences. His sturdy, rebellious individualism has had a special attraction for

members of an increasingly regimented society. His indigenouness, deeply rooted in a particular place, has been a warning and a rebuke to a generation so mobile and migratory that many people can scarcely be said to have roots anywhere. In short, we read Thoreau for the values which we have lost and which more and more seem necessary to our health and vigor and peace of mind.

Civil Disobedience

"Civil Disobedience" was first published in *Aesthetic Papers* (1849), a collection of essays edited by Elizabeth Peabody. "'Civil Disobedience' attracted no attention at the time, but has since gone round the world. It was Gandhi's source-book in his Indian campaign for Civil Resistance, and has been read and pondered by thousands who hope to find some way to resist seemingly irresistible force" (Canby, *Thoreau*, p. 235).

I heartily accept the motto,— "That government is best which governs least," and I should like to see it acted up to more rapidly and systematically. Carried out, it finally amounts to this, which also I believe,— "That government is best which governs not at all," and when men are prepared for it, that will be the kind of government which they will have. Government is at best but an expedient; but most governments are usually, and all

governments are sometimes, inexpedient. The objections which have been brought against a standing army, and they are many and weighty, and deserve to prevail, may also at last be brought against a standing government. The standing army is only an arm of the standing government. The government itself, which is only the machine which the people have chosen to execute their will, is equally liable to be abused and perverted before the people can act through it. Witness the present Mexican war, the work of comparatively a few individuals using the standing government as their tool; for, in the outset, the people would not have consented to this measure.

This American government,—what is it but a tradition, though a recent one, endeavoring to transmit itself unimpaired to posterity, but each instant losing some of its integrity? It has not the vitality and force of a single living man, for a single man can bend it to his will. It is a sort of wooden gun to the people themselves. But it is not the less necessary for this, for the people must have some complicated machinery or other, and hear it din, to satisfy that idea of government which they have. Governments show thus how successfully men can be

1 That . . . least. The idea is Jeffersonian. In his *First Inaugural* (1801), Jefferson advocated "a wise and frugal government, which shall restrain men from injuring one another, shall leave them otherwise free to regulate their own pursuits of industry and improvement, and shall not take from the mouth of labor the bread it has earned" • 1 *Mexican war*. The Mexican War was unpopular in New England, where it was regarded as a device of the Southern Democrats to increase slave territory. Compare Lowell's protest in *The Biglow Papers*, *First Series*.

imposed on, even impose on themselves, for their own advantage. It is excellent, we must all allow. Yet this government never of itself furthered any enterprise, but by the alacrity with which it got out of its way. *It* does not keep the country free. *It* does not settle the West. *It* does not educate. The character inherent in the American people has done all that has been accomplished, and it would have done somewhat more, if the government had not sometimes got in its way. For
 10 government is an expedient by which men would fain succeed in letting one another alone, and, as has been said when it is most expedient, the governed are most let alone by it. Trade and commerce, if they were not made of India-rubber, would never manage to bounce over the obstacles which legislators are continually putting in their way, and, if one were to judge these men wholly by the effects of their actions and not partly by their intentions, they would deserve to be classed and punished with those mischievous persons who put ob-
 20 structions on the railroads

But, to speak practically and as a citizen, unlike those who call themselves no-government men, I ask for, not at once no government, but *at once* a better government. Let every man make known what kind of government would command his respect, and that will be one step toward obtaining it.

After all, the practical reason why, when the power is once in the hands of the people, a majority are permitted, and for a long period continue, to rule is not be-
 30 cause they are most likely to be in the right, nor because this seems fairest to the minority, but because they are physically the strongest. But a government in which the majority rule in all cases cannot be based on justice, even as far as men understand it. Can there not be a government in which majorities do not virtually decide right and wrong, but conscience?—in which majorities decide only those questions to which the rule of expediency is applicable? Must the citizen ever for a moment, or in the least degree, resign his conscience to the legis-
 40 lator? Why has every man a conscience, then? I think that we should be men first, and subjects afterward. It is not desirable to cultivate a respect for the law, so much as for the right. The only obligation which I have a right to assume is to do at any time what I think right. It is truly enough said, that a corporation has no conscience; but a corporation of conscientious men is a

corporation *with* a conscience. Law never made men a whit more just, and, by means of their respect for it, even the well-disposed are daily made the agents of in-justice. A common and natural result of an undue re-
 50 spect for law is, that you may see a file of soldiers, colonel, captain, corporal, privates, powder-monkeys, and all, marching in admirable order over hill and dale to the wars, against their wills, ay, against their common sense and consciences, which makes it very steep marching indeed, and produces a palpitation of the heart. They have no doubt that it is a damnable business in which they are concerned, they are all peaceably inclined. Now, what are they? Men at all? or small movable forts and magazines, at the service of some unscrupulous man in
 60 power? Visit the Navy-Yard, and behold a marine, such a man as an American government can make, or such as it can make a man with its black arts,—a mere shadow and reminiscence of humanity, a man laid out alive and standing, and already, as one may say, buried under arms with funeral accompaniments, though it may be,—

"Not a drum was heard, not a funeral note,

As his corse to the rampart we hurried,

Not a soldier discharged his farewell shot

O'er the grave where our hero we buried"

The mass of men serve the state thus, not as men mainly, but as machines, with their bodies. They are the standing army, and the militia, jailors, constables, posse comitatus, etc. In most cases there is no free exercise whatever of the judgment or of the moral sense, but they put themselves on a level with wood and earth and stones, and wooden men can perhaps be manufactured that will serve the purpose as well. Such command no more respect than men of straw or a lump of dirt. They have the same sort of worth only as horses and dogs.
 80 Yet such as these even are commonly esteemed good citizens. Others—as most legislators, politicians, lawyers, ministers, and office-holders—serve the state chiefly with their heads, and, as they rarely make any moral distinctions, they are as likely to serve the Devil, without *intending* it, as God. A very few, as heroes, patriots, martyrs, reformers in the great sense, and *men*, serve the

67 Not . . . buried, from Charles Wolfe's "The Burial of Sir John Moore" (1817) • 73 posse comitatus, inhabitants summoned by the sheriff to assist in preserving the peace

state with their consciences also, and so necessarily resist it for the most part, and they are commonly treated as enemies by it. A wise man will only be useful as a man, and will not submit to be "clay," and "stop a hole to keep the wind away," but leave that office to his dust at least.—

"I am too high-born to be propertied,
To be a secondary at control,
Or useful serving-man and instrument
10 To any sovereign state throughout the world"

He who gives himself entirely to his fellow-men appears to them useless and selfish, but he who gives himself partially to them is pronounced a benefactor and philanthropist

How does it become a man to behave toward this American government to-day? I answer, that he cannot without disgrace be associated with it. I cannot for an instant recognize that political organization as *my* government which is the *slave's* government also.

20 All men recognize the right of revolution, that is, the right to refuse allegiance to, and to resist, the government, when its tyranny or its inefficiency are great and unendurable. But almost all say that such is not the case now. But such was the case, they think, in the Revolution of '75. If one were to tell me that this was a bad government because it taxed certain foreign commodities brought to its ports, it is most probable that I should not make an ado about it, for I can do without them. All machines have their friction, and possibly this does
30 enough good to counterbalance the evil. At any rate, it is a great evil to make a stir about it. But when the friction comes to have its machine, and oppression and robbery are organized, I say, let us not have such a machine any longer. In other words, when a sixth of the population of a nation which has undertaken to be the refuge of liberty are slaves, and a whole country is unjustly overrun and conquered by a foreign army, and subjected to military law, I think that it is not too soon for honest men to rebel and revolutionize. What makes
40 this duty the more urgent is the fact that the country so overrun is not our own, but ours is the invading army.

Paley, a common authority with many on moral questions, in his chapter on the "Duty of Submission to Civil Government," resolves all civil obligation into expediency; and he proceeds to say, "that so long as the

interest of the whole society requires it, that is, so long as the established government cannot be resisted changed without public inconveniency, it is the will of God that the established government be obeyed, and so longer. . . . This principle being admitted, the justice of every particular case of resistance is reduced to a comparison of the quantity of the danger and grievance on the one side, and of the probability and expense of redressing it on the other." Of this, he says, every man shall judge for himself. But Paley appears never to have contemplated those cases to which the rule of expediency does not apply, in which a people, as well as an individual, must do justice, cost what it may. If I have unjustly wrested a plank from a drowning man, I must restore it to him though I drown myself. This, according to Paley, would be inconvenient. But he that would save his life, in such a case, shall lose it. This people must cease to hold slaves, and to make war on Mexico though it cost them their existence as a people.

In their practice, nations agree with Paley, but do any one think that Massachusetts does exactly what is right at the present crisis?

"A drab of state, a cloth-o'-silver slut,

To have her train borne up, and her soul trail in the dirt"

Practically speaking, the opponents to a reform in Massachusetts are not a hundred thousand politicians at the South, but a hundred thousand merchants and farmers here, who are more interested in commerce and agriculture than they are in humanity, and are not prepared to do justice to the slave and to Mexico, *cost what it may*. I quarrel not with far-off foes, but with those who near at home, cooperate with, and do the bidding of those far away, and without whom the latter would be harmless. We are accustomed to say, that the mass of

4 clay . . . away. Compare Hamlet, Act V, Scene 1, ll. 236-237: Imperious Caesar, dead and turn'd to clay

Might stop a hole to keep the wind away

7 I . . . world, from Shakespeare's King John, Act V, Scene 11, ll. 79-8

• 45 that . . . other, from Principles of Moral and Political Philosophy (1785) by William Paley (1743-1805), English theologian and moralist

• 62 save . . . it. Compare Matthew 10:39 • 72 merchants. Emerson wrote in his Journal, May 23, 1846: "Cotton thread holds the Union together, unites John C. Calhoun and Abbott Lawrence. Patriotism for holidays and summer evenings, with music and rockets but cotton thread is the Union"

men are unprepared; but improvement is slow, because the few are not materially wiser or better than the many. It is not so important that many should be as good as you, as that there be some absolute goodness somewhere; for that will leaven the whole lump. There are thousands who are *in opinion* opposed to slavery and to the war, who yet in effect do nothing to put an end to them; who, esteeming themselves children of Washington and Franklin, sit down with their hands in their pockets, and say
 10 that they know not what to do, and do nothing; who even postpone the question of freedom to the question of free-trade, and quietly read the prices-current along with the latest advices from Mexico, after dinner, and, it may be, fall asleep over them both. What is the price-current of an honest man and patriot to-day? They hesitate, and they regret, and sometimes they petition; but they do nothing in earnest and with effect. They will wait, well disposed, for others to remedy the evil, that they may no longer have it to regret. At most, they give
 20 only a cheap vote, and a feeble countenance and God-speed, to the right, as it goes by them. There are nine hundred and ninety-nine patrons of virtue to one virtuous man. But it is easier to deal with the real possessor of a thing than with the temporary guardian of it.

All voting is a sort of gaming, like checkers or backgammon, with a slight moral tinge to it, a playing with right and wrong, with moral questions, and betting naturally accompanies it. The character of the voters is not staked. I cast my vote, perchance, as I think right,
 30 but I am not vitally concerned that that right should prevail. I am willing to leave it to the majority. Its obligation, therefore, never exceeds that of expediency. Even voting *for the right* is *doing* nothing for it. It is only expressing to men feebly your desire that it should prevail. A wise man will not leave the right to the mercy of chance, nor wish it to prevail through the power of the majority. There is but little virtue in the action of masses of men. When the majority shall at length vote for the abolition of slavery, it will be because they are
 40 indifferent to slavery, or because there is but little slavery left to be abolished by their vote. *They* will then be the only slaves. Only *his* vote can hasten the abolition of slavery who asserts his own freedom by his vote.

I hear of a convention to be held at Baltimore, or elsewhere, for the selection of a candidate for the Presidency, made up chiefly of editors, and men who are

politicians by profession, but I think, what is it to any independent, intelligent, and respectable man what decision they may come to? Shall we not have the advantage of his wisdom and honesty, nevertheless? Can
 50 we not count upon some independent votes? Are there not many individuals in the country who do not attend conventions? But no. I find that the respectable man, so called, has immediately drifted from his position, and despairs of his country, when his country has more reason to despair of him. He forthwith adopts one of the candidates thus selected as the only *available* one, thus proving that he is himself *available* for any purposes of the demagogue. His vote is of no more worth than that of any unprincipled foreigner or hireling native, who may
 60 have been bought. O for a man who is a *man*, and, as my neighbor says, has a bone in his back which you cannot pass your hand through! Our statistics are at fault: the population has been returned too large. How many *men* are there to a square thousand miles in this country? Hardly one. Does not America offer any inducement for men to settle here? The American has dwindled into an Odd Fellow,—one who may be known by the development of his organ of gregariousness, and a manifest lack of intellect and cheerful self-reliance, whose first and
 70 chief concern, on coming into the world, is to see that the Almshouses are in good repair, and, before yet he has lawfully donned the virile garb, to collect a fund for the support of the widows and orphans that may be; who, in short, ventures to live only by the aid of the Mutual Insurance company, which has promised to bury him decently.

It is not a man's duty, as a matter of course, to devote himself to the eradication of any, even the most enormous wrong; he may still properly have other concerns
 80 to engage him; but it is his duty, at least, to wash his hands of it, and, if he gives it no thought longer, not to give it practically his support. If I devote myself to other pursuits and contemplations, I must first see, at least, that I do not pursue them sitting upon another

5 leaven . . . lump. Compare 1 Corinthians 5:6 "Know ye not that a little leaven leaveneth the whole lump?" • 68 Odd Fellow, a member of a secret fraternity, the Independent Order of Odd Fellows, organized for mutual aid and social enjoyment, and comprising many lodges in England and America • 73 virile garb. The toga virilis, or manly toga, was assumed by Roman boys at the end of their fourteenth year

man's shoulders I must get off him first, that he may pursue his contemplations too. See what gross inconsistency is tolerated. I have heard some of my townsmen say, "I should like to have them order me out to help put down an insurrection of the slaves, or to march to Mexico;—see if I would go," and yet these very men have each, directly by their allegiance, and so indirectly, at least, by their money, furnished a substitute. The soldier is applauded who refuses to serve in an unjust war by those who do not refuse to sustain the unjust government which makes the war, is applauded by those whose own act and authority he disregards and sets at naught, as if the state were penitent to that degree that it hired one to scourge it while it sinned, but not to that degree that it left off sinning for a moment. Thus, under the name of Order and Civil Government, we are all made at last to pay homage to and support our own meanness. After the first blush of sin comes its indifference; and from immoral it becomes, as it were, ²⁰ *unmoral*, and not quite unnecessary to that life which we have made.

The broadest and most prevalent error requires the most disinterested virtue to sustain it. The slight reproach to which the virtue of patriotism is commonly liable, the noble are most likely to incur. Those who, while they disapprove of the character and measures of a government, yield to it their allegiance and support are undoubtedly its most conscientious supporters, and so frequently the most serious obstacles to reform. Some ³⁰ are petitioning the state to dissolve the Union, to disregard the requisitions of the President. Why do they not dissolve it themselves,—the union between themselves and the state,—and refuse to pay their quota into its treasury? Do not they stand in the same relation to the state that the state does to the Union? And have not the same reasons prevented the state from resisting the Union which have prevented them from resisting the state?

How can a man be satisfied to entertain an opinion ⁴⁰ merely, and enjoy *it*? Is there any enjoyment in it, if his opinion is that he is aggrieved? If you are cheated out of a single dollar by your neighbor, you do not rest satisfied with knowing that you are cheated, or with saying that you are cheated, or even with petitioning him to pay you your due; but you take effectual steps at once to obtain the full amount, and see that you are never

cheated again. Action from principle, the perception and the performance of right, changes things and relations, it is essentially revolutionary, and does not consist wholly with anything which was. It not only divides states and churches, it divides families, ay, it divides the *individual*, separating the diabolical in him from the divine.

Unjust laws exist: shall we be content to obey them, or shall we endeavor to amend them, and obey them until we have succeeded, or shall we transgress them at once? Men generally, under such a government as this, think that they ought to wait until they have persuaded the majority to alter them. They think that, if the majority should resist, the remedy would be worse than the evil. But it is the fault of the government itself that the remedy *is* worse than the evil. *It* makes it worse. Why is it not more apt to anticipate and provide for reform? Why does it not cherish its wise minority? Why does it cry and resist before it is hurt? Why does it not encourage its citizens to be on the alert to point out its faults, and *do* better than *it* would have them? Why does it always crucify Christ, and excommunicate Copernicus and Luther, and pronounce Washington and Franklin rebels?

One would think, that a deliberate and practical denial of its authority was the only offense never contemplated by government; else, why has it not assigned it definite, its suitable and proportionate penalty? If a man who has no property refuses but once to earn nine shillings for the state, he is put in prison for a period unlimited by any law that I know, and determined only by the discretion of those who placed him there, but if he should steal ninety times nine shillings from the state he is soon permitted to go at large again.

If the injustice is part of the necessary friction of the machine of government, let it go, let it go: perchance it will wear smooth,—certainly the machine will wear out. If the injustice has a spring, or a pulley, or a rope, or a crank, exclusively for itself, then perhaps you may consider whether the remedy will not be worse than the evil, but if it is of such a nature that it requires you to be the agent of injustice to another, then, I say, break

31 requisitions . . . President, President James K. Polk's call for volunteers for the war against Mexico

the law. Let your life be a counter friction to stop the machine. What I have to do is to see, at any rate, that I do not lend myself to the wrong which I condemn.

As for adopting the ways which the state has provided for remedying the evil, I know not of such ways. They take too much time, and a man's life will be gone. I have other affairs to attend to. I came into this world, not chiefly to make this a good place to live in, but to live in it, be it good or bad. A man has not everything to do, but something, and because he cannot do *everything*, it is not necessary that he should do *something* wrong. It is not my business to be petitioning the Governor or the Legislature any more than it is theirs to petition me, and if they should not hear my petition, what should I do then? But in this case the state has provided no way. Its very Constitution is the evil. This may seem to be harsh and stubborn and unconciliatory, but it is to treat with the utmost kindness and consideration the only spirit that can appreciate or deserves it. So is all change for the better, like birth and death, which convulse the body.

I do not hesitate to say, that those who call themselves Abolitionists should at once effectually withdraw their support, both in person and property, from the government of Massachusetts and not wait till they constitute a majority of one, before they suffer the right to prevail through them. I think that it is enough if they have God on their side, without waiting for that other one. Moreover, any man more right than his neighbors constitutes a majority of one already.

I meet this American government, or its representative, the state government, directly, and face to face, once a year—no more—in the person of its tax-gatherer, this is the only mode in which a man situated as I am necessarily meets it; and it then says distinctly, Recognize me; and the simplest, most effectual, and, in the present posture of affairs, the indispensablest mode of treating with it on this head, of expressing your little satisfaction with and love for it, is to deny it then. My civil neighbor, the tax-gatherer, is the very man I have to deal with,—for it is, after all, with men and not with parchment that I quarrel,—and he has voluntarily chosen to be an agent of the government. How shall he ever know well what he is and does as an officer of the government, or as a man, until he is obliged to consider whether he shall treat me, his neighbor, for whom he

has respect, as a neighbor and well-disposed man, or as a maniac and disturber of the peace, and see if he can get over this obstruction to his neighborliness without a ruder and more impetuous thought or speech corresponding with his action. I know this well, that if one thousand, if one hundred, if ten men whom I could name,—if ten *honest* men only,—if one HONEST man, in this State of Massachusetts, *ceasing to hold slaves*, were actually to withdraw from this copartnership, and be locked up in the county jail therefor, it would be the abolition of slavery in America. For it matters not how small the beginning may seem to be: what is once well done is done forever. But we love better to talk about it: that we say is our mission. Reform keeps many scores of newspapers in its service, but not one man. If my esteemed neighbor, the State's ambassador, who will devote his days to the settlement of the question of human rights in the Council Chamber, instead of being threatened with the prisons of Carolina, were to sit down the prisoner of Massachusetts, that State which is so anxious to foist the sin of slavery upon her sister,—though at present she can discover only an act of inhospitality to be the ground of a quarrel with her,—the Legislature would not wholly waive the subject the following winter.

Under a government which imprisons any unjustly, the true place for a just man is also a prison. The proper place to-day, the only place which Massachusetts has provided for her freer and less desponding spirits, is in her prisons, to be put out and locked out of the State by her own act, as they have already put themselves out by their principles. It is there that the fugitive slave, and the Mexican prisoner on parole, and the Indian come to plead the wrongs of his race should find them; on that separate, but more free and honorable ground, where the State places those who are not *with* her, but *against* her,—the only house in a slave State in which a free man can abide with honor. If any think that their influence would be lost there, and their voices no longer afflict the ear of the State, that they would not be as an enemy within its walls, they do not know by how much truth is stronger than error, nor how much more eloquently

62 State's ambassador, Samuel Hoar of Concord, sent to Charleston, South Carolina, in 1844 to protest against the seizure of Negro seamen from Massachusetts, and inhospitably expelled from Charleston by "a committee of leading citizens."

and effectively he can combat injustice who has experienced a little in his own person. Cast your whole vote, not a strip of paper merely, but your whole influence. A minority is powerless while it conforms to the majority; it is not even a minority then; but it is irresistible when it clogs by its whole weight. If the alternative is to keep all just men in prison, or give up war and slavery, the State will not hesitate which to choose. If a thousand men were not to pay their tax-bills this year, 10 that would not be a violent and bloody measure, as it would be to pay them, and enable the State to commit violence and shed innocent blood. This is, in fact, the definition of a peaceable revolution, if any such is possible. If the tax-gatherer, or any other public officer, asks me, as one has done, "But what shall I do?" my answer is, "If you really wish to do anything, resign your office." When the subject has refused allegiance, and the officer has resigned his office, then the revolution is accomplished. But even suppose blood should 20 flow. Is there not a sort of blood shed when the conscience is wounded? Through this wound a man's real manhood and immortality flow out, and he bleeds to an everlasting death. I see this blood flowing now.

I have contemplated the imprisonment of the offender, rather than the seizure of his goods,—though both will serve the same purpose,—because they who assert the purest right, and consequently are most dangerous to a corrupt State, commonly have not spent much time in accumulating property. To such the State renders comparatively small service, and a slight tax is wont to appear exorbitant, particularly if they are obliged to earn it by special labor with their hands. If there were one who lived wholly without the use of money, the State itself would hesitate to demand it of him. But the rich man—not to make any invidious comparison—is always sold to the institution which makes him rich. Absolutely speaking, the more money, the less virtue; for money comes between a man and his objects, and obtains them for him; and it was certainly no great virtue 30 to obtain it. It puts to rest many questions which he would otherwise be taxed to answer; while the only new question which it puts is the hard but superfluous one, how to spend it. Thus his moral ground is taken from under his feet. The opportunities of living are diminished in proportion as what are called the "means" are increased. The best thing a man can do for his culture

when he is rich is to endeavor to carry out those schemes which he entertained when he was poor. Christ answered the Herodians according to their condition. "Show me the tribute-money," said he;—and one took a penny out of his pocket,—if you use the money which has the image of Cæsar on it and which he has made current and valuable, that is, *if you are men of the State*. and gladly enjoy the advantages of Cæsar's government, then pay him back some of his own when he demands. "Render therefore to Cæsar that which is Cæsar's, and to God those things which are God's,"—leaving them 1 wiser than before as to which was which, for they did not wish to know.

When I converse with the freest of my neighbors, I perceive that, whatever they may say about the magnitude and seriousness of the question, and their regard for the public tranquillity, the long and the short of the matter is, that they cannot spare the protection of the existing government, and they dread the consequences to their property and families of disobedience to it. For my own part, I should not like to think that I ever rely on the protection of the State. But, if I deny the authority of the State when it presents its tax-bill, it will soon take and waste all my property, and so harass me and my children without end. This is hard. This makes impossible for a man to live honestly, and at the same time comfortably, in outward respects. It will not be worth the while to accumulate property; that would be sure to go again. You must hire or squat somewhere, and raise but a small crop, and eat that soon. You must live within yourself, and depend upon yourself always tucked up and ready for a start, and not have many affairs. A man may grow rich in Turkey even, if he will be in all respects a good subject of the Turkish government. Confucius said "If a state is governed by the principles of reason, poverty and misery are subjects of shame, if a state is not governed by the principles of reason, riches and honors are the subjects of shame." No. until I was the protection of Massachusetts to be extended to me in some distant Southern port, where my liberty is endangered, or until I am bent solely on building up an estate at home by peaceful enterprise, I can afford to refuse allegiance to Massachusetts, and her right to my property.

49 Show . . . God's. See Matthew 22 19-21

and life. It costs me less in every sense to incur the penalty of disobedience to the State than it would to obey. I should feel as if I were worth less in that case.

Some years ago, the State met me in behalf of the Church, and commanded me to pay a certain sum toward the support of a clergyman whose preaching my father attended, but never I myself "Pay," it said, "or be locked up in the jail." I declined to pay. But, unfortunately, another man saw fit to pay it. I did not see why the schoolmaster should be taxed to support the priest, and not the priest the schoolmaster; for I was not the State's schoolmaster, but I supported myself by voluntary subscription. I did not see why the lyceum should not present its tax-bill, and have the State to back its demand, as well as the Church. However, at the request of the selectmen, I condescended to make some such statement as this in writing—"Know all men by these presents, that I, Henry Thoreau, do not wish to be regarded as a member of any incorporated society which I have not joined." This I gave to the town clerk, and he has it. The State, having thus learned that I did not wish to be regarded as a member of that church, has never made a like demand on me since; though it said that it must adhere to its original presumption that time. If I had known how to name them, I should then have signed off in detail from all the societies which I never signed on to; but I did not know where to find a complete list.

I have paid no poll-tax for six years. I was put into a jail once on this account, for one night; and, as I stood considering the walls of solid stone, two or three feet thick, the door of wood and iron, a foot thick, and the iron grating which strained the light, I could not help being struck with the foolishness of that institution which treated me as if I were mere flesh and blood and bones, to be locked up. I wondered that it should have concluded at length that this was the best use it could put me to, and had never thought to avail itself of my services in some way. I saw that, if there was a wall of stone between me and my townsmen, there was a still more difficult one to climb or break through before they could get to be as free as I was. I did not for a moment feel confined, and the walls seemed a great waste of stone and mortar. I felt as if I alone of all my townsmen had paid my tax. They plainly did not know how to treat me, but behaved like persons who are underbred. In every threat and in every compliment there was a

blunder; for they thought that my chief desire was to stand the other side of that stone wall. I could not but smile to see how industriously they locked the door on my meditations, which followed them out again without let or hindrance, and they were really all that was dangerous. As they could not reach me, they had resolved to punish my body, just as boys, if they cannot come at some person against whom they have a spite, will abuse his dog. I saw that the State was half-witted, that it was timid as a lone woman with her silver spoons, and that it did not know its friends from its foes, and I lost all my remaining respect for it, and pitied it.

Thus the State never intentionally confronts a man's sense, intellectual or moral, but only his body, his senses. It is not armed with superior wit or honesty, but with superior physical strength. I was not born to be forced. I will breathe after my own fashion. Let us see who is the strongest. What force has a multitude? They only can force me who obey a higher law than I. They force me to become like themselves. I do not hear of *men* being forced to live this way or that by masses of men. What sort of life were that to live? When I meet a government which says to me, "Your money or your life," why should I be in haste to give it my money? It may be in a great strait, and not know what to do: I cannot help that. It must help itself; do as I do. It is not worth the while to snivel about it. I am not responsible for the successful working of the machinery of society. I am not the son of the engineer. I perceive that, when an acorn and a chestnut fall side by side, the one does not remain inert to make way for the other, but both obey their own laws, and spring and grow and flourish as best they can, till one, perchance, overshadows and destroys the other. If a plant cannot live according to its nature, it dies; and so a man.

The night in prison was novel and interesting enough. The prisoners in their shirt-sleeves were enjoying a chat and the evening air in the doorway, when I entered. But the jailer said, "Come, boys, it is time to lock up;" and so they dispersed, and I heard the sound of their steps returning into the hollow apartments. My roommate was introduced to me by the jailer as "a first-rate

28 . . . night. H. S. Canby reckons that Thoreau's famous night in jail occurred on the 23rd or 24th of July, 1846 (Thoreau, p. 473).

fellow and a clever man." When the door was locked, he showed me where to hang my hat, and how he managed matters there. The rooms were whitewashed once a month; and this one, at least, was the whitest, most simply furnished, and probably the neatest apartment in the town. He naturally wanted to know where I came from, and what brought me there; and, when I had told him, I asked him in my turn how he came there, presuming him to be an honest man, of course; and, as the
10 world goes, I believe he was. "Why," said he, "they accuse me of burning a barn, but I never did it." As near as I could discover, he had probably gone to bed in a barn when drunk, and smoked his pipe there; and so a barn was burnt. He had the reputation of being a clever man, had been there some three months waiting for his trial to come on, and would have to wait as much longer; but he was quite domesticated and contented, since he got his board for nothing, and thought that he was well treated.

20 He occupied one window, and I the other; and I saw that if one stayed there long, his principal business would be to look out the window. I had soon read all the tracts that were left there, and examined where former prisoners had broken out, and where a grate had been sawed off, and heard the history of the various occupants of that room, for I found that even here there was a history and a gossip which never circulated beyond the walls of the jail. Probably this is the only house in the town where
30 verses are composed, which are afterward printed in a circular form, but not published. I was shown quite a long list of verses which were composed by some young men who had been detected in an attempt to escape, who avenged themselves by singing them.

I pumped my fellow-prisoner as dry as I could, for fear I should never see him again; but at length he showed me which was my bed, and left me to blow out the lamp.

It was like traveling into a far country, such as I had never expected to behold, to lie there for one night. It seemed to me that I never had heard the town-clock
40 strike before, nor the evening sounds of the village; for we slept with the windows open, which were inside the grating. It was to see my native village in the light of the Middle Ages, and our Concord was turned into a Rhine stream, and visions of knights and castles passed before me. They were the voices of old burghers that I heard in the streets. I was an involuntary spectator and

auditor of whatever was done and said in the kitchen the adjacent village-inn,—a wholly new and rare experience to me. It was a closer view of my native town was fairly inside of it. I never had seen its institutions before. This is one of its peculiar institutions; for a shire town. I began to comprehend what its inhabitants were about.

In the morning, our breakfasts were put through hole in the door, in small oblong-square tin pans, not to fit, and holding a pint of chocolate, with brown bread and an iron spoon. When they called for the vegetables again, I was green enough to return what bread I left; but my comrade seized it, and said that I should eat that up for lunch or dinner. Soon after he was let to work at haying in a neighboring field, whither he went every day, and would not be back till noon; so he bade me good-day, saying that he doubted if he should see me again.

When I came out of prison,—for some one interfered and paid that tax,—I did not perceive that great changes had taken place on the common, such as he observed who went in a youth and emerged a tottering and gray-headed man; and yet a change had to my eyes come to the scene,—the town, and State, and country,—greater than any that mere time could effect. I saw yet more distinctly the State in which I lived. I saw to what extent the people among whom I lived could be trusted for good neighbors and friends; that their friendship was for summer weather only; that they did not greatly propose to do right; that they were a distinct race from the rest by their prejudices and superstitions, as the Chinamen and Malays are; that in their sacrifices to humanity they ran no risks, not even to their property; that at all they were not so noble but they treated the thieves as he had treated them, and hoped, by a certain outward observance and a few prayers, and by walking in a particular straight though useless path from time to time to save their souls. This may be to judge my neighbors harshly; for I believe that many of them are not aware that they have such an institution as the jail in their village.

I clever, honest, kind, obliging; see *Dictionary of American English*.
• 65 some . . . tax. According to one report his Aunt Maria, "putting a shawl over her head, went to the jailer's door, and paid the tax fees to Ellen Staples, her father the jailer being absent" (*Carroll's Thoreau*, p. 234)

It was formerly the custom in our village, when a poor debtor came out of jail, for his acquaintances to salute him, looking through their fingers, which were crossed to represent the grating of a jail window, "How do ye do?" My neighbors did not thus salute me, but first looked at me, and then at one another, as if I had returned from a long journey. I was put into jail as I was going to the shoemaker's to get a shoe which was mended. When I was let out the next morning, I proceeded to finish my errand, and, having put on my mended shoe, joined a huckleberry party, who were impatient to put themselves under my conduct; and in half an hour,—for the horse was soon tackled,—was in the midst of a huckleberry field, on one of our highest hills, two miles off, and then the State was nowhere to be seen.

This is the whole history of "My Prisons."

I have never declined paying the highway tax, because I am as desirous of being a good neighbor as I am of being a bad subject; and as for supporting schools, I am doing my part to educate my fellow-countrymen now. It is for no particular item in the tax-bill that I refuse to pay it. I simply wish to refuse allegiance to the State, to withdraw and stand aloof from it effectually. I do not care to trace the course of my dollar, if I could, till it buys a man or a musket to shoot with,—the dollar is innocent,—but I am concerned to trace the effects of my allegiance. In fact, I quietly declare war with the State, after my fashion, though I will still make what use and get what advantage of her I can, as is usual in such cases.

If others pay the tax which is demanded of me, from a sympathy with the State, they do but what they have already done in their own case, or rather they abet injustice to a greater extent than the State requires. If they pay the tax from a mistaken interest in the individual taxed, to save his property, or prevent his going to jail, it is because they have not considered wisely how far they let their private feelings interfere with the public good.

This, then, is my position at present. But one cannot be too much on his guard in such a case, lest his action be biased by obstinacy or an undue regard for the opinions of men. Let him see that he does only what belongs to himself and to the hour.

I think sometimes, Why, this people mean well, they are only ignorant; they would do better if they knew how why give your neighbors this pain to treat you as they are not inclined to? But I think again, This is no reason why I should do as they do, or permit others to suffer much greater pain of a different kind. Again, I sometimes say to myself, When many millions of men, without heat, without ill will, without personal feeling of any kind, demand of you a few shillings only, without the possibility, such is their constitution, of retracting or altering their present demand, and without the possibility, on your side, of appeal to any other millions, why expose yourself to this overwhelming brute force? You do not resist cold and hunger, the winds and the waves, thus obstinately, you quietly submit to a thousand similar necessities. You do not put your head into the fire. But just in proportion as I regard this as not wholly a brute force, but partly a human force, and consider that I have relations to those millions as to so many millions of men, and not of mere brute or inanimate things, I see that appeal is possible, first and instantaneously, from them to the Maker of them, and, secondly, from them to themselves. But if I put my head deliberately into the fire, there is no appeal to fire or to the Maker of fire, and I have only myself to blame. If I could convince myself that I have any right to be satisfied with men as they are, and to treat them accordingly, and not according, in some respects, to my requisitions and expectations of what they and I ought to be, then, like a good Mussulman and fatalist, I should endeavor to be satisfied with things as they are, and say it is the will of God. And, above all, there is this difference between resisting this and a purely brute or natural force, that I can resist this with some effect; but I cannot expect, like Orpheus, to change the nature of the rocks and trees and beasts.

I do not wish to quarrel with any man or nation. I do not wish to split hairs, to make fine distinctions, or set myself up as better than my neighbors. I seek rather, I may say, even an excuse for conforming to the laws of the land. I am but too ready to conform to them. Indeed, I have reason to suspect myself on this head; and each year, as the tax-gatherer comes round, I find myself

17 *My Prisons*. Silvio Pellico (1789-1854), Italian patriot, told the story of his imprisonment by the Austrians in *Le mie prigioni* (1832), to which Thoreau seems to allude.

disposed to review the acts and position of the general and State governments, and the spirit of the people, to discover a pretext for conformity.

"We must affect our country as our parents,
And if at any time we alienate
Our love or industry from doing it honor,
We must respect effects and teach the soul
Matter of conscience and religion,
And not desire of rule or benefit."

10 I believe that the State will soon be able to take all my work of this sort out of my hands, and then I shall be no better a patriot than my fellow-countrymen. Seen from a lower point of view, the Constitution, with all its faults, is very good; the law and the courts are very respectable; even this State and this American government are, in many respects, very admirable, and rare things, to be thankful for, such as a great many have described them; but seen from a point of view a little higher, they are what I have described them; seen from a
20 higher still, and the highest, who shall say what they are, or that they are worth looking at or thinking of at all?

However, the government does not concern me much, and I shall bestow the fewest possible thoughts on it. It is not many moments that I live under a government, even in this world. If a man is thought-free, fancy-free, imagination-free, that which *is not* never for a long time appearing *to be* to him, unwise rulers or reformers cannot fatally interrupt him.

I know that most men think differently from myself;
30 but those whose lives are by profession devoted to the study of these or kindred subjects content me as little as any. Statesmen and legislators, standing so completely within the institution, never distinctly and nakedly behold it. They speak of moving society, but have no resting-place without it. They may be men of a certain experience and discrimination, and have no doubt invented ingenious and even useful systems, for which we sincerely thank them; but all their wit and usefulness lie within certain not very wide limits. They are wont
40 to forget that the world is not governed by policy and expediency. Webster never goes behind government, and so cannot speak with authority about it. His words are wisdom to those legislators who contemplate no essential reform in the existing government; but for thinkers, and those who legislate for all time, he never

once glances at the subject. I know of those whose serious and wise speculations on this theme would soon reveal the limits of his mind's range and hospitality. Yet, compared with the cheap professions of most reformers, and the still cheaper wisdom and eloquence of politicians in general, his are almost the only sensible and valuable words, and we thank Heaven for him. Comparatively he is always strong, original, and, above all, practical. Still, his quality is not wisdom, but prudence. The lawyer's truth is not Truth, but consistency or a consistency of expediency. Truth is always in harmony with herself and is not concerned chiefly to reveal the justice that may consist with wrong-doing. He well deserves to be called, as he has been called, the Defender of the Constitution. There are really no blows to be given by him but defensive ones. He is not a leader, but a follower. His leaders are the men of '87. "I have never made an effort," he says, "and never propose to make an effort. I have never countenanced an effort, and never mean to countenance an effort, to disturb the arrangement originally made, by which the various States came into the Union." Still thinking of the sanction which the Constitution gives to slavery, he says, "Because it was part of the original compact,—let it stand." Notwithstanding his special acuteness and ability, he is unable to take a fact out of its merely political relations, and behold it as it lies absolutely to be disposed of by intellect,—what, for instance, it behooves a man to do here in America to-day with regard to slavery,—to venture, or is driven to make some such desperate answer as the following, while professing to speak absolutely, and as a private man,—from which what new singular code of social duties might be inferred? "In this manner," says he, "in which the governments of the States where slavery exists are to regulate it is for their own consideration, under their responsibility to their constituents, to the general laws of propriety, humanity and justice, and to God. Associations formed elsewhere springing from a feeling of humanity, or other cause have nothing whatever to do with it. They have never received any encouragement from me, and they never will."

They who know of no purer sources of truth, who have

62 men of '87, the framers of the Constitution, in 1787

traced up its stream no higher, stand, and wisely stand, by the Bible and the Constitution, and drink at it there with reverence and humility; but they who behold where it comes trickling into this lake or that pool, gird up their loins once more, and continue their pilgrimage toward its fountain-head.

No man with a genius for legislation has appeared in America. They are rare in the history of the world. There are orators, politicians, and eloquent men, by the thousand; but the speaker has not yet opened his mouth to speak who is capable of settling the much-vexed questions of the day. We love eloquence for its own sake, and not for any truth which it may utter, or any heroism it may inspire. Our legislators have not yet learned the comparative value of free-trade and of freedom, of union, and of rectitude, to a nation. They have no genius or talent for comparatively humble questions of taxation and finance, commerce and manufactures and agriculture. If we were left solely to the wordy wit of legislators in Congress for our guidance, uncorrected by the seasonable experience and the effectual complaints of the people, America would not long retain her rank among the nations. For eighteen hundred years, though perchance I have no right to say it, the New Testament has been written; yet where is the legislator who has wisdom and practical talent enough to avail himself of the light which it sheds on the science of legislation?

The authority of government, even such as I am will-

ing to submit to,—for I will cheerfully obey those who know and can do better than I, and in many things even those who neither know nor can do so well,—is still an impure one: to be strictly just, it must have the sanction and consent of the governed. It can have no pure right over my person and property but what I concede to it. The progress from an absolute to a limited monarchy, from a limited monarchy to a democracy, is a progress toward a true respect for the individual. Even the Chinese philosopher was wise enough to regard the individual as the basis of the empire. Is a democracy, such as we know it, the last improvement possible in government? Is it not possible to take a step further towards recognizing and organizing the rights of man? There will never be a really free and enlightened State until the State comes to recognize the individual as a higher and independent power, from which all its own power and authority are derived, and treats him accordingly. I please myself with imagining a State at last which can afford to be just to all men, and to treat the individual with respect as a neighbor, which even would not think it inconsistent with its own repose if a few were to live aloof from it, not meddling with it, nor embraced by it, who fulfilled all the duties of neighbors and fellow-men. A State which bore this kind of fruit, and suffered it to drop off as fast as it ripened, would prepare the way for a still more perfect and glorious State, which also I have imagined, but not yet anywhere seen.

1849

From • *Walden*

Where I Lived, and What I Lived For

Walden, the record of Thoreau's stay at Walden Pond from July 4, 1845, to September 6, 1847, was first published in 1854. It is Thoreau's best book and has come to be universally regarded as a great American classic. The book consists of eighteen chapters, as follows: "Economy,"

"Where I Lived and What I Lived For," "Reading," "Sounds," "Solitude," "Visitors," "The Bean Field," "The Village," "The Ponds," "Baker Farm," "Higher Laws," "Brute Neighbors," "House-Warming," "Former Inhabitants and Winter Visitors," "Winter Animals," "The Pond in Winter," "Spring," "Conclusion." Although "Thoreau's strength," as H. S. Canby has observed, "was in the sentence and paragraph, not in the ordered whole," F. O. Matthiessen (*American Renaissance*, pp. 168-170) has ingeniously demonstrated "the firmness with which Thoreau binds his successive links" in *Walden*.

"My purpose in going to Walden Pond," Thoreau wrote in the opening chapter, "was not to live cheaply nor to live dearly there, but to transact some private business

with the fewest obstacles." The "private business" consisted chiefly of the study of nature and in reading and writing. "My residence," he added, "was more favourable, not only to thought, but to serious reading, than a university."

At a certain season of our life we are accustomed to consider every spot as the possible site of a house. I have thus surveyed the country on every side within a dozen miles of where I live. In imagination I have bought all the farms in succession, for all were to be bought, and I knew their price. I walked over each farmer's premises, tasted his wild apples, discoursed on husbandry with him, took his farm at his price, at any price, mortgaging it to him in my mind; even put a higher
10 price on it,—took everything but a deed of it,—took his word for his deed, for I dearly love to talk,—cultivated it, and him too to some extent, I trust, and withdrew when I had enjoyed it long enough, leaving him to carry it on. This experience entitled me to be regarded as a sort of real-estate broker by my friends. Wherever I sat, there I might live, and the landscape radiated from me accordingly. What is a house but a *sedes*, a seat?—better if a country seat. I discovered many a site for a house not likely to be soon improved, which some might have
20 thought too far from the village, but to my eyes the village was too far from it. Well, there I might live, I said, and there I did live, for an hour, a summer and a winter life; saw how I could let the years run off, buffer the winter through, and see the spring come in. The future inhabitants of this region, wherever they may place their houses, may be sure that they have been anticipated. An afternoon sufficed to lay out the land into orchard, wood-lot, and pasture, and to decide what fine oaks or pines should be left to stand before the
30 door, and whence each blasted tree could be seen to the best advantage, and then I let it lie, fallow perchance, for a man is rich in proportion to the number of things which he can afford to let alone.

My imagination carried me so far that I even had the refusal of several farms,—the refusal was all I wanted,—but I never got my fingers burned by actual possession. The nearest that I came to actual possession was when I bought the Hollowell place, and had begun to sort my

seeds, and collected materials with which to make a wheelbarrow to carry it on or off with; but before the owner gave me a deed of it, his wife—every man such a wife—changed her mind and wished to keep him, and he offered me ten dollars to release him. Now to speak the truth, I had but ten cents in the world, and surpassed my arithmetic to tell, if I was that man who had ten cents, or who had a farm, or ten dollars, or both together. However, I let him keep the ten dollars and the farm too, for I had carried it far enough; or rather to be generous, I sold him the farm for just what I gave for it, and, as he was not a rich man, made him a present of ten dollars, and still had my ten cents, and seeds, and materials for a wheelbarrow left. I found thus that I had been a rich man without any damage to my pocket. But I retained the landscape, and I have since annually carried off what it yielded without a wheelbarrow. With respect to landscapes,—

"I am monarch of all I survey,
My right there is none to dispute."

I have frequently seen a poet withdraw, having enjoyed the most valuable part of a farm, while the country farmer supposed that he had got a few wild apples caught. Why, the owner does not know it for many years while a poet has put his farm in rime, the most admirable kind of invisible fence, has fairly impounded it, milked and skimmed it, and got all the cream, and left the farmer only the skimmed milk.

The real attractions of the Hollowell farm, to me, were: its complete retirement, being about two miles from the village, half a mile from the nearest neighbor and separated from the highway by a broad field bounding on the river, which the owner said protected by its fogs from frosts in the spring, though that was nothing to me; the gray color and ruinous state of the house and barn, and the dilapidated fences, which put such

57 I . . . dispute, from William Cowper's "Verses supposed to be written by Alexander Selkirk" (1782). By italicizing "survey," Thoreau makes a punning reference to his occupation as surveyor • 63 a . . . rime. The thought is Emersonian. Compare, for example, Emerson's "The Apology" (1846)

One harvest from thy field
Homeward brought the oxen strong;
A second crop thine acres yield,
Which I gather in a song.

interval between me and the last occupant; the hollow and lichen-covered apple trees, gnawed by rabbits, showing what kind of neighbors I should have; but above all, the recollection I had of it from my earliest voyages up the river, when the house was concealed behind a dense grove of red maples, through which I heard the house-dog bark. I was in haste to buy it, before the proprietor finished getting out some rocks, cutting down the hollow apple trees, and grubbing up some young birches which
 10 had sprung up in the pasture, or, in short, had made any more of his improvements. To enjoy these advantages I was ready to carry it on; like Atlas, to take the world on my shoulders,—I never heard what compensation he received for that,—and do all those things which had no other motive or excuse but that I might pay for it and be unmolested in my possession of it; for I knew all the while that it would yield the most abundant crop of the kind I wanted, if I could only afford to let it alone. But it turned out as I have said.

20 All that I could say, then, with respect to farming on a large scale—I have always cultivated a garden—was, that I had had my seeds ready. Many think that seeds improve with age. I have no doubt that time discriminates between the good and the bad; and when at last I shall plant, I shall be less likely to be disappointed. But I would say to my fellows, once for all, As long as possible live free and uncommitted. It makes but little difference whether you are committed to a farm or the county jail.

30 Old Cato, whose "*De Re Rusticâ*" is my "*Cultivator*," says,—and the only translation I have seen makes sheer nonsense of the passage,—"*When you think of getting a farm turn it thus in your mind, not to buy greedily; nor spare your pains to look at it, and do not think it enough to go round it once. The oftener you go there the more it will please you, if it is good.*" I think I shall not buy greedily, but go round and round it as long as I live, and be buried in it first, that it may please me the more at last.

40 The present was my next experiment of this kind, which I purpose to describe more at length, for convenience putting the experience of two years into one. As I have said, I do not propose to write an ode to dejection, but to brag as lustily as chanticleer in the morning, standing on his roost, if only to wake my neighbors up.

When first I took up my abode in the woods, that is, began to spend my nights as well as days there, which, by accident, was on Independence Day, or the Fourth of July, 1845, my house was not finished for winter, but was merely a defence against the rain, without plastering
 50 or chimney, the walls being of rough, weather-stained boards, with wide chinks, which made it cool at night. The upright white hewn studs and freshly planed door and window casings gave it a clean and airy look, especially in the morning, when its timbers were saturated with dew, so that I fancied that by noon some sweet gum would exude from them. To my imagination it retained throughout the day more or less of this auroral character, reminding me of a certain house on a mountain which I had visited a year before. This was an airy
 60 and unplastered cabin, fit to entertain a travelling god, and where a goddess might trail her garments. The winds which passed over my dwelling were such as sweep over the ridges of mountains, bearing the broken strains, or celestial parts only, of terrestrial music. The morning wind forever blows, the poem of creation is uninterrupted, but few are the ears that hear it. Olympus is but the outside of the earth everywhere.

The only house I had been the owner of before, if I except a boat, was a tent, which I used occasionally when
 70 making excursions in the summer, and this is still rolled up in my garret; but the boat, after passing from hand to hand, has gone down the stream of time. With this more substantial shelter about me, I had made some progress toward settling in the world. This frame, so slightly clad, was a sort of crystallization around me, and reacted on the builder. It was suggestive somewhat as a picture in outlines. I did not need to go outdoors to take the air, for the atmosphere within had lost none of its freshness. It was not so much within-doors as behind
 80 a door where I sat, even in the rainiest weather. The Harivansa says, "An abode without birds is like a meat

30 Old Cato, Marcus Porcius Cato (234-149 B C.), Roman patriot • 30 *De Re Rusticâ*, concerning country life • 30 *Cultivator*, a farm implement • 43 *ode to dejection*. Coleridge had written "*Dejection: an Ode*" (1802), and Shelley had composed "*Stanzas Written in Dejection near Naples*" (1824) • 72 *the boat*. The boat which was used in 1839 by Thoreau and his brother John on the famous voyage described in *A Week on the Concord and Merrimack Rivers* was purchased by Hawthorne in 1842 for seven dollars (see *The American Notebooks by Nathaniel Hawthorne* • 82 *Harivansa*, a Sanskrit epic poem of the fifth century A.D.

without seasoning." Such was not my abode, for I found myself suddenly neighbor to the birds; not by having imprisoned one, but having caged myself near them. I was not only nearer to some of those which commonly frequent the garden and the orchard, but to those wilder and more thrilling songsters of the forest which never, or rarely, serenade a villager,—the wood thrush, the veery, the scarlet tanager, the field sparrow, the whip-poor-will, and many others.

10 I was seated by the shore of a small pond, about a mile and a half south of the village of Concord and somewhat higher than it, in the midst of an extensive wood between that town and Lincoln, and about two miles south of that our only field known to fame, Concord Battle Ground, but I was so low in the woods that the opposite shore, half a mile off, like the rest, covered with wood, was my most distant horizon. For the first week, whenever I looked out on the pond it impressed me like a tarn high up on the side of a mountain, its bottom
20 far above the surface of other lakes, and, as the sun arose, I saw it throwing off its nightly clothing of mist, and here and there, by degrees, its soft ripples or its smooth reflecting surface was revealed, while the mists, like ghosts, were stealthily withdrawing in every direction into the woods, as at the breaking up of some nocturnal conventicle. The very dew seemed to hang upon the trees later into the day than usual, as on the sides of mountains.

This small lake was of most value as a neighbor in the intervals of a gentle rain-storm in August, when,
30 both air and water being perfectly still, but the sky overcast, mid-afternoon had all the serenity of evening, and the wood thrush sang around, and was heard from shore to shore. A lake like this is never smoother than at such a time; and the clear portion of the air above it being shallow and darkened by clouds, the water, full of light and reflections, becomes a lower heaven itself so much the more important. From a hilltop near by, where the wood had been recently cut off, there was a pleasing vista southward across the pond, through a wide indentation
40 in the hills which form the shore there, where their opposite sides sloping toward each other suggested a stream flowing out in that direction through a wooded valley, but stream there was none. That way I looked between and over the near green hills to some distant and higher ones in the horizon, tinged with blue. Indeed, by standing on tiptoe I could catch a glimpse of some of the peaks of the still bluer and more distant mountain ranges

in the northwest, those true-blue coins from heaven's own mint, and also of some portion of the village. In other directions, even from this point, I could see over or beyond the woods which surrounded me. It is well to have some water in your neighborhood, to give buoyancy to and float the earth. One value even of the smallest well is, that when you look into it you see earth is not continent but insular. This is as important as that it keeps butter cool. When I looked across the pond from this peak toward the Sudbury meadows, when in time of flood I distinguished elevated perhaps like a mirage in their seething valley, like a coin in a bowl, all the earth beyond the pond appeared like a thin sheet insulated and floated even by this small sheet of intervening water, and I was reminded that this on which I dwelt was but *dry land*.

Though the view from my door was still more untraced, I did not feel crowded or confined in the landscape. There was pasture enough for my imagination. A low shrub oak plateau to which the opposite shore stretched away toward the prairies of the West and the steppes of Tartary, affording ample room for all the busy families of men. "There are none happy in the world but beings who enjoy freely a vast horizon,"—said Dadara, when his herds required new and larger pastures.

Both place and time were changed, and I dwelt not to those parts of the universe and to those eras in which which had most attracted me. Where I lived was as far off as many a region viewed nightly by astronomers. Men are wont to imagine rare and delectable places in some remote and more celestial corner of the system, beneath the constellation of Cassiopeia's Chair, far from noise and disturbance. I discovered that my house actually occupied its site in such a withdrawn, but forever new and unfaded, part of the universe. If it were worth the while to settle in those parts near to the Pleiades or the Hyades to Aldebaran or Altair, then I was really there, or at least of equal remoteness from the life which I had left behind. I dwelt dwindled and twinkling with as fine a ray to my near neighbor, and to be seen only in moonless nights by him. Such was that part of creation where I had squatted

"There was a shepherd that did live,
And held his thoughts as high

69 Tartary, an indefinite region including Asia and Europe from the Sea of Japan to the Dnieper River • 71 Damodara, the Hindu divinity Krishna • 83 Pleiades . . . Hyades, constellations • 84 Aldebaran . . . Altair, bright stars

As were the mounts whereon his flocks

Did hourly feed him by."

What should we think of the shepherd's life if his flocks always wandered to higher pastures than his thoughts?

Every morning was a cheerful invitation to make my life of equal simplicity, and I may say innocence, with Nature herself. I have been as sincere a worshipper of Aurora as the Greeks. I got up early and bathed in the pond; that was a religious exercise, and one of the best things which I did. They say that characters were engraved on the bathing tub of King Tch'ing-thang to this effect: "Renew thyself completely each day; do it again, and again, and forever again." I can understand that. Morning brings back the heroic ages. I was as much affected by the faint hum of a mosquito making its invisible and unimaginable tour through my apartment at earliest dawn, when I was sitting with door and windows open, as I could be by any trumpet that ever sang of fame. It was Homer's requiem; itself an Iliad and Odyssey in the air, singing its own wrath and wanderings. There was something cosmical about it; a standing advertisement, till forbidden, of the everlasting vigor and fertility of the world. The morning, which is the most memorable season of the day, is the awakening hour. Then there is least somnolence in us, and for an hour, at least, some part of us awakes which slumbers all the rest of the day and night. Little is to be expected of that day, if it can be called a day, to which we are not awakened by our Genius, but by the mechanical nudgings of some servitor, are not awakened by our own newly acquired force and aspirations from within, accompanied by the undulations of celestial music, instead of factory bells, and a fragrance filling the air—to a higher life than we fell asleep from; and thus the darkness bear its fruit, and prove itself to be good, no less than the light. That man who does not believe that each day contains an earlier, more sacred, and auroral hour than he has yet profaned, has despaired of life, and is pursuing a descending and darkening way. After a partial cessation of his sensuous life, the soul of man, or its organs rather, are reinvigorated each day, and his Genius tries again what noble life it can make. All memorable events, I should say, transpire in morning time and in a morning atmosphere. The Vedas say, "All intelligences awake with the morning." Poetry and art, and the fairest and most memorable of the actions of men, date from such an hour. All poets and heroes, like Memnon, are the children

of Aurora, and emit their music at sunrise. To him whose elastic and vigorous thought keeps pace with the sun, the day is a perpetual morning. It matters not what the clocks say or the attitudes and labors of men. Morning is when I am awake and there is a dawn in me. Moral reform is the effort to throw off sleep. Why is it that men give so poor an account of their day if they have not been slumbering? They are not such poor calculators. If they had not been overcome with drowsiness, they would have performed something. The millions are awake enough for physical labor, but only one in a million is awake enough for effective intellectual exertion, only one in a hundred millions to a poetic or divine life. To be awake is to be alive. I have never yet met a man who was quite awake. How could I have looked him in the face?

We must learn to reawaken and keep ourselves awake, not by mechanical aids, but by an infinite expectation of the dawn, which does not forsake us in our soundest sleep. I know of no more encouraging fact than the unquestionable ability of man to elevate his life by a conscious endeavor. It is something to be able to paint a particular picture, or to carve a statue, and so to make a few objects beautiful, but it is far more glorious to carve and paint the very atmosphere and medium through which we look, which morally we can do. To affect the quality of the day, that is the highest of arts. Every man is tasked to make his life, even in its details, worthy of the contemplation of his most elevated and critical hour. If we refused, or rather used up, such paltry information as we get, the oracles would distinctly inform us how this might be done.

I went to the woods because I wished to live deliber-

20 singing . . . wanderings, the wrath of Achilles in the Iliad, the wanderings of Odysseus in the *Odyssey* • 44 Vedas, the sacred literature of the Hindus • 47 Memnon. See note, p. 504. His statue made a harplike sound at sunrise • 78 I . . . because. This paragraph should be compared with the following equally notable passage in the last chapter of *Walden*: "I left the woods for as good a reason as I went there. Perhaps it seemed to me that I had several more lives to live, and could not spare any more time for that one. It is remarkable how easily and insensibly we fall into a particular route, and make a beaten track for ourselves. I had not lived there a week before my feet wore a path from my door to the pondside, and though it is five or six years since I trod it, it is still quite distinct. It is true, I fear, that others may have fallen into it, and so helped to keep it open. The surface of the earth is soft and impressible by the feet of men; and so with the paths which the mind travels. How worn and dusty, then, must be the highways of the world, how deep the ruts of tradition and conformity! I did not wish to take a cabin passage, but rather to go before the mast and on the deck of the world, for there I could best see the moonlight amid the mountains. I do not wish to go below now."

ately, to front only the essential facts of life, and see if I could not learn what it had to teach, and not, when I came to die, discover that I had not lived. I did not wish to live what was not life, living is so dear; nor did I wish to practise resignation, unless it was quite necessary. I wanted to live deep and suck out all the marrow of life, to live so sturdily and Spartan-like as to put to rout all that was not life, to cut a broad swath and shave close, to drive life into a corner, and reduce it to its lowest terms, and, if it proved to be mean, why then to get the whole and genuine meanness of it, and publish its meanness to the world, or if it were sublime, to know it by experience, and be able to give a true account of it in my next excursion. For most men, it appears to me, are in a strange uncertainty about it, whether it is of the devil or of God, and have *somewhat hastily* concluded that it is the chief end of man here to "glorify God and enjoy him forever."

Still we live meanly, like ants; though the fable tells us that we were long ago changed into men; like pygmies we fight with cranes, it is error upon error, and clout upon clout, and our best virtue has for its occasion a superfluous and evitable wretchedness. Our life is frittered away by detail. An honest man has hardly need to count more than his ten fingers, or in extreme cases he may add his ten toes, and lump the rest. Simplicity, simplicity, simplicity! I say, let your affairs be as two or three, and not a hundred or a thousand, instead of a million count half a dozen, and keep your accounts on your thumb-nail. In the midst of this chopping sea of civilized life, such
 30 are the clouds and storms and quicksands and thousand-and-one items to be allowed for, that a man has to live, if he would not founder and go to the bottom and not make his port at all, by dead reckoning, and he must be a great calculator indeed who succeeds. Simplify, simplify. Instead of three meals a day, if it be necessary eat but one; instead of a hundred dishes, five; and reduce other things in proportion. Our life is like a German Confederacy, made up of petty states, with its boundary forever fluctuating, so that even a German cannot tell you how it is
 40 bounded at any moment. The nation itself, with all its so-called internal improvements, which, by the way, are all external and superficial, is just such an unwieldy and overgrown establishment, cluttered with furniture and tripped up by its own traps, ruined by luxury and heedless expense, by want of calculation and a worthy aim, as the million households in the land; and the only cure

for it, as for them, is in a rigid economy, a stern and more than Spartan simplicity of life and elevation of purpose. It lives too fast. Men think that it is essential that *Nation* have commerce, and export ice, and talk through a telegraph, and ride thirty miles an hour, without doubt, whether *they* do or not; but whether we should live like baboons or like men, is a little uncertain. If we do not get out sleepers, and forge rails, and devote day and nights to the work, but go to tinkering upon our *lives* to improve *them*, who will build railroads? And railroads are not built, how shall we get to Heaven in season? But if we stay at home and mind our business, who will want railroads? We do not ride on the railroad; it rides upon us. Did you ever think what those sleepers are that underlie the railroad? Each one is a man, an Irishman, or a Yankee man. The rails are laid on them, and they are covered with sand, and the cars run smooth over them. They are sound sleepers, I assure you. And every few years a new lot is laid down and run over; and that, if some have the pleasure of riding on a rail, others have the misfortune to be ridden upon. And when they run over a man that is walking in his sleep, a superintendent sleeper in the wrong position, and wake him up, they suddenly stop the cars, and make a hue and cry about it, as if this were an exception. I am glad to know that it takes a gang of men for every five miles to keep the sleepers down and level in their beds as it is, for that is a sign that they may sometime get up again.

16 chief . . . forever, an allusion to the Westminster Catechism, formulated by the famous Westminster Assembly in 1643 • 33 dead reckoning, the method of finding the position of a ship without the aid of celestial observations, from a record of the courses sailed and the distance made on each course • 37 German Confederacy. The German Confederation, set up by the Congress of Vienna in 1815, was loose formed and inefficient. Modern, unified Germany dates from 1871 • 54 sleepers, railroad ties • 57 railroads . . . Heaven. Thoreau perhaps remembered Hawthorne's satirical sketch, "The Celestial Railroad" (1843) • 59 We . . . us. Emerson had expressed the same thought in the "Ode to Channing" (1846) "Things are in the saddle, And ride mankind." Despite Thoreau's disapproval of the railroad in theory, trains and trainmen had a romantic appeal for him. In the chapter on "Sounds" in *Walden*, he wrote "On this morning of the great Snow . . . I hear the muffled tone of their engine bell from out the fog bank of their chilled breath, which announces that the cars are coming without long delay, notwithstanding the veto of a New England north-east snow-storm, and I behold the plowmen covered with snow and rime their heads peering above the mould-board . . . I am refreshed and expanded when the freight train rattles past me, and I smell the store which go dispensing their odors all the way from Long Wharf to Lake Champlain . . ."

Why should we live with such hurry and waste of life? We are determined to be starved before we are hungry. Men say that a stitch in time saves nine, and so they take a thousand stitches to-day to save nine to-morrow. As for *work*, we haven't any of any consequence. We have the Saint Vitus' dance, and cannot possibly keep our heads still. If I should only give a few pulls at the parish bell-rope, as for a fire, that is, without setting the bell, there is hardly a man on his farm in the outskirts of Concord, notwithstanding that press of engagements which was his excuse so many times this morning, nor a boy, nor a woman, I might almost say, but would forsake all and follow that sound, not mainly to save property from the flames, but, if we will confess the truth, much more to see it burn, since burn it must, and we, be it known, did not set it on fire,—or to see it put out, and have a hand in it, if that is done as handsomely, yes, even if it were the parish church itself. Hardly a man takes a half-hour's nap after dinner, but when he wakes he holds up his head and asks, "What's the news?" as if the rest of mankind had stood his sentinels. Some give directions to be waked every half-hour, doubtless for no other purpose, and then, to pay for it, they tell what they have dreamed. After a night's sleep the news is as indispensable as the breakfast. "Pray tell me anything new that has happened to a man anywhere on this globe,"—and he reads it over his coffee and rolls, that a man has had his eyes gouged out this morning on the Wachito River, never dreaming the while that he lives in the dark unfathomed mammoth cave of this world, and has but the rudiment of an eye himself.

For my part, I could easily do without the post-office. I think that there are very few important communications made through it. To speak critically, I never received more than one or two letters in my life—I wrote this some years ago—that were worth the postage. The penny-post is, commonly, an institution through which you seriously offer a man that penny for his thoughts which is so often safely offered in jest. And I am sure that I never read any memorable news in a newspaper. If we read of one man robbed, or murdered, or killed by accident, or one house burned, or one vessel wrecked, or one steamboat blown up, or one cow run over on the Western Railroad, or one mad dog killed, or one lot of grasshoppers in the winter,—we never need read of another. One is enough. If you are acquainted with the

principle, what do you care for a myriad instances and applications? To a philosopher all *news*, as it is called, is gossip, and they who edit and read it are old women over their tea. Yet not a few are greedy after this gossip. 50 There was such a rush, as I hear, the other day at one of the offices to learn the foreign news by the last arrival, that several large squares of plate glass belonging to the establishment were broken by the pressure.—news which I seriously think a ready wit might write a twelve month, or twelve years, beforehand with sufficient accuracy. As for Spain, for instance, if you know how to throw in Don Carlos and the Infanta, and Don Pedro and Seville and Granada, from time to time in the right proportions,—they may have changed the names a little since I saw the 60 papers.—and serve up a bull-fight when other entertainments fail, it will be true to the letter, and give us as good an idea of the exact state or ruin of things in Spain as the most succinct and lucid reports under this head in the newspapers. And as for England, almost the last significant scrap of news from that quarter was the revolution of 1649, and if you have learned the history of her crops for an average year, you never need attend to that thing again, unless your speculations are of a merely pecuniary character. If one may judge who rarely looks 70 into the newspapers, nothing new does ever happen in foreign parts, a French revolution not excepted.

What news! how much more important to know what that is which was never old! "Kieou-he-yu (great dignitary of the state of Wei) sent a man to Khoung-tseu to know his news. Khoung-tseu caused the messenger to be seated near him, and questioned him in these terms: What is your master doing? The messenger answered with respect: My master desires to diminish the number of his faults, but he cannot come to the end of them. The 80 messenger being gone, the philosopher remarked: What

28 Wachito River, Ouachita River in Arkansas, at that time a "frontier" region. A. B. Longstreet's "The Fight" in *Georgia Scenes* (1835) gives some notion of the brutality of the frontier in the old Southwest. • 29 dark . . . cave, a double allusion to the Mammoth Cave of Kentucky and "The dark unfathomed caves" of Gray's elegy. • 66 revolution of 1649, the English Civil War, which resulted in the victory of Cromwell and the execution of Charles I in 1649. The statement seems to show marked Puritan and democratic (or anti-royalist) sympathies. • 72 French revolution. Since the great revolution of 1789, there had been frequent changes in the French government, the latest having been the revolution of 1848 and the coup d'état of 1851. • 74 Kieou-he-yu . . . messenger, from the *Analects* of Confucius.

a worthy messenger! What a worthy messenger!" The preacher, instead of vexing the ears of drowsy farmers on their day of rest at the end of the week,—for Sunday is the fit conclusion of an ill-spent week, and not the fresh and brave beginning of a new one,—with this one other draggel-tail of a sermon, should shout with thundering voice, "Pause! Avast! Why so seeming fast, but deadly slow?"

Shams and delusions are esteemed for soundest truths, while reality is fabulous. If men would steadily observe realities only, and not allow themselves to be deluded, life, to compare it with such things as we know, would be like a fairy tale and the Arabian Nights' Entertainments. If we respected only what is inevitable and has a right to be, music and poetry would resound along the streets. When we are unhurried and wise, we perceive that only great and worthy things have any permanent and absolute existence, that petty fears and petty pleasures are but the shadow of the reality. This is always exhilarating and sublime. By closing the eyes and slumbering, and consenting to be deceived by shows, men establish and confirm their daily life of routine and habit everywhere, which still is built on purely illusory foundations. Children, who play life, discern its true law and relations more clearly than men, who fail to live it worthily, but who think that they are wiser by experience, that is, by failure. I have read in a Hindoo book, that "there was a king's son, who, being expelled in infancy from his native city, was brought up by a forester, and, growing up to maturity in that state, imagined himself to belong to the barbarous race with which he lived. One of his father's ministers having discovered him, revealed to him what he was, and the misconception of his character was removed, and he knew himself to be a prince. So soul," continues the Hindoo philosopher, "from the circumstances in which it is placed, mistakes its own character, until the truth is revealed to it by some holy teacher, and then it knows itself to be *Brahme*." I perceive that we inhabitants of New England live this mean life that we do because our vision does not penetrate the surface of things. We think that that *is* which *appears* to be. If a man should walk through this town and see only the reality, where, think you, would the "Mill-dam" go to? If he should give us an account of the realities he beheld there, we should not recognize the place in his description. Look at a meeting-house, or a court-house,

or a jail, or a shop, or a dwelling-house, and say that thing really is before a true gaze, and they would go to pieces in your account of them. Men esteem it remote, in the outskirts of the system behind the far star, before Adam and after the last man. In eternity there is indeed something true and sublime. But these times and places and occasions are now and God himself culminates in the present moment, and never be more divine in the lapse of all the ages. we are enabled to apprehend at all what is sublime noble only by the perpetual instilling and drenching, the reality that surrounds us. The universe constantly and obediently answers to our conceptions; whether travel fast or slow, the track is laid for us. Let us spend our lives in conceiving then. The poet or the artist never yet had so fair and noble a design but some of his posterity at least could accomplish it.

Let us spend one day as deliberately as Nature, and be thrown off the track by every nutshell and mosquito wing that falls on the rails. Let us rise early and fast or break fast, gently and without perturbation; let company come and let company go, let the bells ring; let the children cry,—determined to make a day of it. What should we knock under and go with the stream? Let us not be upset and overwhelmed in that terrible rapid and whirlpool called a dinner, situated in the meridian shallows. Weather this danger and you are safe, for the rest of the way is down hill. With unrelaxed nerves, with morning vigor, sail by it, looking another way, tied to the mast like Ulysses. If the engine whistles, let it whistle till it is hoarse for its pains. If the bell rings, why should we run? We will consider what kind of music they are like. Let us settle ourselves, and work and wedge our feet downward through the mud and sludge of opinion, and prejudice, and tradition, and delusion and appearance, that alluvion which covers the globe through Paris and London, through New York and Boston and Concord, through Church and State, through poetry and philosophy and religion, till we come to the hard bottom and rocks in place, which we can call *reality*, and say, This is, and no mistake; and then begin having a *point d'appui*, below freshet and frost and fire

38 *Brahme*, compare Emerson's "Brahma" and the introductory note to that poem, p. 936 • 76 Ulysses, so tied as a defense against the sorcery of the Sirens, in Bk. XII of the *Odyssey* • 88 *point d'appui*, a basis of operations

a place where you might found a wall or a state, or set a lamp-post safely, or perhaps a gauge, not a Nilometer, but a Realometer, that future ages might know how deep a freshet of shams and appearances had gathered from time to time. If you stand right fronting and face to face to a fact, you will see the sun glimmer on both its surfaces, as if it were a cimeter, and feel its sweet edge dividing you through the heart and marrow, and so you will happily conclude your mortal career. Be it life or death, we crave only reality. If we are really dying, let us hear the rattle in our throats and feel cold in the extremities; if we are alive, let us go about our business.

Time is but the stream I go a-fishing in. I drink at it; but while I drink I see the sandy bottom and detect how shallow it is. Its thin current slides away, but eternity remains. I would drink deeper; fish in the sky, whose bottom is pebbly with stars. I cannot count one. I

know not the first letter of the alphabet. I have always been regretting that I was not as wise as the day I was born. The intellect is a cleaver, it discerns and rifts its way into the secret of things. I do not wish to be any more busy with my hands than is necessary. My head is hands and feet. I feel all my best faculties concentrated in it. My instinct tells me that my head is an organ for burrowing, as some creatures use their snout and fore paws, and with it I would mine and burrow my way through these hills. I think that the richest vein is somewhere hereabouts, so by the divining-rod and thin rising vapors I judge, and here I will begin to mine.

From

The Journals

April 16, 1852

As I turned round the corner of Hubbard's Grove, saw a woodchuck, the first of the season, in the middle of the field, six or seven rods from the fence which bounds the wood, and twenty rods distant. I ran along the fence and cut him off, or rather overtook him, though he started at the same time. When I was only a rod and a half off, he stopped, and I did the same; then he ran again, and I ran up within three feet of him, when he stopped again, the fence being between us. I squatted down and surveyed him at my leisure. His eyes were dull black and rather unobvious, with a faint chestnut iris, with but little expression and that more of resignation than of anger. The general aspect was a coarse grayish brown, a sort of grisel. A lighter brown next the skin, then black or very dark brown and tipped with whitish rather loosely.

The head between a squirrel and a bear, flat on the top and dark brown, and darker still or black on the tip of the nose. The whiskers black, two inches long. The ears very small and roundish, set far back and nearly buried in the fur. Black feet, with long and slender claws for digging. It appeared to tremble, or perchance shivered with cold. When I moved, it gritted its teeth quite loud, sometimes striking the under jaw against the other chatteringly, sometimes grinding one jaw on the other, yet as if more from instinct than anger. Whichever way I turned, that way it headed. I took a twig a foot long and touched its snout, at which it started forward and bit the stick, lessening the distance between us to two feet, and still it held all the ground it gained. I played with it tenderly awhile with the stick, trying to open its gritting jaws. Ever its long incisors, two above and two below, were presented. But I thought it would go to sleep if I stayed long enough. It did not sit upright as sometimes, but *standing* on its fore feet with its head down, *i.e.* half sitting, half standing. We sat looking at one another about half an hour, till we began to feel mesmeric influences. When I was tired, I moved away, wishing to see him run, but I could not start him. He would not stir as long as I was looking at him or could see him. I walked round him; he turned as fast and fronted me still. I sat down by his side within a foot. I talked to him *quasi* forest lingo, baby-talk, at any

rate in a conciliatory tone, and thought that I had some influence on him. He gritted his teeth less. I chewed checkerberry leaves and presented them to his nose at last without a grit; though I saw that by so much gritting of the teeth he had worn them rapidly and they were covered with a fine white powder, which, if you measured it thus, would have made his anger terrible. He did not mind any noise I might make. With a little stick I lifted one of his paws to examine it, and held it up at pleasure
10 I turned him over to see what color he was beneath (darker or more purely brown), though he turned himself back again sooner than I could have wished. His tail was also all brown, though not very dark, rat-tail like, with loose hairs standing out on all sides like a caterpillar brush. He had a rather mild look. I spoke to him kindly. I reached checkerberry leaves to his mouth. I stretched my hands over him, though he turned up his head and still gritted a little. I laid my hand on him, but immediately took it off again, instinct not being wholly
20 overcome. If I had had a few fresh bean leaves, thus in advance of the season, I am sure I should have tamed him completely. It was a frizzly tail. His is a humble, terrestrial color like the partridge's, well concealed where dead wiry grass rises above darker brown or chestnut dead leaves,—a modest color. If I had had some food, I should have ended with stroking him at my leisure. Could easily have wrapped him in my handkerchief. He was not fat nor particularly lean. I finally had to leave him without seeing him move from the place. A large, clumsy, burrowing squirrel. *Arctomys*, bearmouse. I respect
30 him as one of the natives. He lies there, by his color and habits so naturalized amid the dry leaves, the withered grass, and the bushes. A sound nap, too, he has enjoyed in his native fields, the past winter. I think I might learn some wisdom of him. His ancestors have lived here longer than mine. He is more thoroughly acclimated and naturalized than I. Bean leaves the red man raised for him, but he can do without them.

June 18, 1855

At 3 P.M., as I walked up the bank by the Hemlocks, I
40 saw a painted tortoise just beginning its hole; then another a dozen rods from the river on the bare barren field near some pitch pines, where the earth was covered with

cladonias, cinquefoil, sorrel, etc. Its hole was about thirds done. I stooped down over it, and, to my surprise after a slight pause it proceeded in its work, directly and within eighteen inches of my face. I retained a strained position for three quarters of an hour or more for fear of alarming it. It rested on its fore legs, the part of its shell about one inch higher than the rear. This position was not changed essentially to the last. The hole was oval, broadest behind, about one inch wide one and three quarters long, and the dirt already removed was quite wet or moistened. It made the hole and moved the dirt with its hind legs only, not using its fore legs or shell, which last of course could not enter the hole though there was some dirt on it. It first scratched twice with one hind foot, then took up a pinch of the loose sand and deposited it directly behind that, pushing it backward to its full length and then deliberately opening it and letting the dirt fall; then the same with the other hind foot. This it did rapidly, using one leg alternately with perfect regularity, standing on the other one the while, and thus tilting up its shell from time to time, now to this side, then to that. There was half a minute or a minute between each change. The hole made as deep as the feet could reach, or about two inches. It was very neat about its work, not scattering the dirt about any more than was necessary. The completion of the hole occupied perhaps five minutes.

It then without any pause drew its head completely into its shell, raised the rear a little, and protruded and dropped a wet flesh-colored egg into the hole, one foremost, the red skin of its body being considerably protruded with it. Then it put out its head again a little slowly, and placed the egg at one side with one hind foot. After a delay of about two minutes it again drew its head in and dropped another, and so on to the fifth—dropping in its head each time, and pausing somewhat longer between the last. The eggs were placed in the hole without any particular care,—only well down flat and [each] out of the way of the next,—and I could plainly see them from above.

After these ten minutes or more, it without pause turning began to scrape the moist earth into the hole with its hind legs, and, when it had half filled it, it completely pressed it down with the edges of its hind feet, dancing on them alternately, for some time, as on its knees, tilting from side to side, pressing by the weight

weight of the rear of its shell. When it had drawn in thus all the earth that had been moistened, it stretched its hind legs further back and to each side, and drew in the dry and lichen-clad crust, and then danced upon and pressed that down, still not moving the rear of its shell more than one inch to right or left all the while, or changing the position of the forward part at all. The thoroughness with which the covering was done was remarkable. It persevered in drawing in and dancing on the dry surface which had never been disturbed, long after you thought it had done its duty, but it never moved its fore feet, nor once looked round, nor saw the eggs it had laid. There were frequent pauses throughout the whole, when it rested, or ran out its head and looked about circumspectly, at any noise or motion. These pauses were especially long during the covering of its eggs,

which occupied more than half an hour. Perhaps it was hard work.

When it had done, it immediately started for the river at a pretty rapid rate (the suddenness with which it made these transitions was amusing), pausing from time to time, and I judged that it would reach it in fifteen minutes. It was not easy to detect that the ground had been disturbed there. An Indian could not have made his cache more skillfully. In a few minutes all traces of it would be lost to the eye.

The object of moistening the earth was perhaps to enable it to take it up in its hands, and also to prevent its falling back into the hole. Perhaps it also helped to make the ground more compact and harder when it was pressed down.

1852-1855-1906

Walking

Based upon materials in the *Journals* of 1850-1851, and delivered as a lecture in Worcester, Massachusetts, in 1851, "Walking" was first published in the *Atlantic Monthly* for June 1862.

I wish to speak a word for Nature, for absolute freedom and wildness, as contrasted with a freedom and culture merely civil,—to regard man as an inhabitant, or a part and parcel of Nature, rather than a member of society. I wish to make an extreme statement, if so I may make an emphatic one, for there are enough champions of civilization: the minister and the school-committee and every one of you will take care of that.

I have met with but one or two persons in the course of my life who understood the art of Walking, that is, of taking walks,—who had a genius, so to speak, for *sauntering*: which word is beautifully derived "from idle people who roved about the country, in the Middle Ages, and asked charity, under pretense of going *à la Sainte Terre*," to the Holy Land, till the children exclaimed, "There goes a *Sainte-Terrer*." a Saunterer, a Holy-Lander. They who never go to the Holy Land in their walks, as they pretend, are indeed mere idlers and vagabonds; but they who do go there are saunterers in the good sense, such as I mean. Some, however, would derive the word from *sans terre*, without land or home, which, therefore, in the good sense, will mean, having no particular home, but equally at home everywhere. For this is the secret of successful sauntering. He who sits still in a house all the time may be the greatest vagrant of all; but the saunterer, in the good sense, is no more vagrant than the meandering river, which is all the while sedulously seeking the shortest course to the sea. But I prefer the first, which, indeed, is the most probable derivation. For every walk is a sort of crusade, preached by some Peter the Hermit in us, to go forth and reconquer this Holy Land from the hands of the Infidels.

30 Peter the Hermit (d. 1115), preacher of the First Crusade

It is true, we are but faint-hearted crusaders, even the walkers, nowadays, who undertake no persevering, never-ending enterprises. Our expeditions are but tours, and come round again at evening to the old hearth-side from which we set out. Half the walk is but retracing our steps. We should go forth on the shortest walk, perchance, in the spirit of undying adventure, never to return,—prepared to send back our embalmed hearts only as relics to our desolate kingdoms. If you are ready to leave
 10 father and mother, and brother and sister, and wife and child and friends, and never see them again,—if you have paid your debts, and made your will, and settled all your affairs, and are a free man, then you are ready for a walk.

To come down to my own experience, my companion and I, for I sometimes have a companion, take pleasure in fancying ourselves knights of a new, or rather an old, order,—not Equestrians or Chevaliers, not Ritters or Riders, but Walkers, a still more ancient and honorable
 20 class, I trust. The chivalric and heroic spirit which once belonged to the Rider seems now to reside in, or perchance to have subsided into, the Walker,—not the Knight, but Walker, Errant. He is a sort of fourth estate, outside of Church and State and People.

We have felt that we almost alone hereabouts practised this noble art; though, to tell the truth, at least, if their own assertions are to be received, most of my townsmen would fain walk sometimes, as I do, but they cannot. No wealth can buy the requisite leisure, freedom, and independence which are the capital in this
 30 profession. It comes only by the grace of God. It requires a direct dispensation from Heaven to become a walker. You must be born into the family of the Walkers. *Ambulator nascitur, non fit.* Some of my townsmen, it is true, can remember and have described to me some walks which they took ten years ago, in which they were so blessed as to lose themselves for half an hour in the woods; but I know very well that they have confined themselves to the highway ever since, whatever pre-
 40 tensions they may make to belong to this select class. No doubt they were elevated for a moment as by the reminiscence of a previous state of existence, when even they were foresters and outlaws.

"When he came to grene wode,
 In a mery mornynge,

There he herde the notes small
 Of byrdes mery syngynge.

"It is ferre gone, sayd Robyn,
 That I was last here;
 Me lyste a lytell for to shote
 At the donne dere."

I think that I cannot preserve my health and spirit unless I spend four hours a day at least,—and it is commonly more than that,—sauntering through the woods and over the hills and fields, absolutely free from worldly engagements. You may safely say, A penny your thoughts, or a thousand pounds. When sometimes I am reminded that the mechanics and shopkeepers sit in their shops not only all the forenoon, but all the afternoon too, sitting with crossed legs, so many of them as if the legs were made to sit upon, and not to stand walk upon,—I think that they deserve some credit not having all committed suicide long ago.

I, who cannot stay in my chamber for a single day without acquiring some rust, and when sometimes have stolen forth for a walk at the eleventh hour or five o'clock in the afternoon, too late to redeem the day when the shades of night were already beginning to mingle with the daylight, have felt as if I had committed some sin to be atoned for,—I confess that I am astonished at the power of endurance, to say nothing of the moral insensibility, of my neighbors who confine themselves to shops and offices the whole day for weeks and months, aye, and years almost together. I know not what manner of stuff they are of,—sitting there now at three o'clock in the afternoon, as if it were three o'clock in the morning. Bonaparte may talk of the three-o'clock in-the-morning courage, but it is nothing to the courage which can sit down cheerfully at this hour in the afternoon over against one's self whom you have known all the morning, to starve out a garrison to whom you are bound by such strong ties of sympathy. I wonder that about this time, or say between four and five o'clock in the afternoon, too late for the morning papers and too early for the evening ones, there is not a general explosion heard up and down the street, scattering

34 *Ambulator . . . fit.* The walker is born, not made.

legion of antiquated and house-bred notions and whims to the four winds for an airing,—and so the evil cure itself.

How womankind, who are confined to the house still more than men, stand it I do not know, but I have ground to suspect that most of them do not *stand* it at all. When, early in a summer afternoon, we have been shaking the dust of the village from the skirts of our garments, making haste past those houses with purely Doric or
10 Gothic fronts, which have such an air of repose about them, my companion whispers that probably about these times their occupants are all gone to bed. Then it is that I appreciate the beauty and the glory of architecture, which itself never turns in, but forever stands out and erect, keeping watch over the slumberers.

No doubt temperament, and, above all, age, have a good deal to do with it. As a man grows older, his ability to sit still and follow indoor occupations increases. He grows vespertinal in his habits as the evening of life
20 approaches, till at last he comes forth only just before sundown, and gets all the walk that he requires in half an hour.

But the walking of which I speak has nothing in it akin to taking exercise, as it is called, as the sick take medicine at stated hours,—as the swinging of dumb-bells or chairs; but is itself the enterprise and adventure of the day. If you would get exercise, go in search of the springs of life. Think of a man's swinging dumb-bells for his health, when those springs are bubbling up in
30 far-off pastures unsought by him!

Moreover, you must walk like a camel, which is said to be the only beast which ruminates when walking. When a traveler asked Wordsworth's servant to show him her master's study, she answered, "Here is his library, but his study is out of doors."

Living much out of doors, in the sun and wind, will no doubt produce a certain roughness of character,—will cause a thicker cuticle to grow over some of the finer qualities of our nature, as on the face and hands, or as
40 severe manual labor robs the hands of some of their delicacy of touch. So staying in the house, on the other hand, may produce a softness and smoothness, not to say thinness of skin, accompanied by an increased sensibility to certain impressions. Perhaps we should be more susceptible to some influences important to our intellectual and moral growth, if the sun had shone and the wind

blown on us a little less; and no doubt it is a nice matter to proportion rightly the thick and thin skin. But methinks that is a scurf that will fall off fast enough,—that the natural remedy is to be found in the proportion
50 which the night bears to the day, the winter to the summer, thought to experience. There will be so much the more air and sunshine in our thoughts. The callous palms of the laborer are conversant with finer tissues of self-respect and heroism, whose touch thrills the heart, than the languid fingers of idleness. That is mere sentimentality that lies abed by day and thinks itself white, far from the tan and callus of experience.

When we walk, we naturally go to the fields and woods: what would become of us, if we walked only in
60 a garden or a mall? Even some sects of philosophers have felt the necessity of importing the woods to themselves, since they did not go to the woods. "They planted groves and walks of Platanes," where they took *subdiales ambulationes* in porticos open to the air. Of course it is of no use to direct our steps to the woods, if they do not carry us thither. I am alarmed when it happens that I have walked a mile into the woods bodily, without getting there in spirit. In my afternoon walk I would fain
70 forget all my morning occupations and my obligations to society. But it sometimes happens that I cannot easily shake off the village. The thought of some work will run in my head and I am not where my body is,—I am out of my senses. In my walks I would fain return to my senses. What business have I in the woods, if I am thinking of something out of the woods? I suspect myself, and cannot help a shudder, when I find myself so implicated even in what are called good works,—for this may sometimes happen.

My vicinity affords many good walks; and though for
80 so many years I have walked almost every day, and sometimes for several days together, I have not yet exhausted them. An absolutely new prospect is a great happiness, and I can still get this any afternoon. Two or three hours' walking will carry me to as strange a country as I expect ever to see. A single farm-house which I had not seen before is sometimes as good as the dominions of the King of Dahomey. There is in fact a sort of harmony

64 *subdiales ambulationes*, walks in the open air • 88 Dahomey, a colony in French West Africa

discoverable between the capabilities of the landscape within a circle of ten miles' radius, or the limits of an afternoon walk, and the threescore years and ten of human life. It will never become quite familiar to you.

Nowadays almost all man's improvements, so called, as the building of houses, and the cutting down of the forest and of all large trees, simply deform the landscape, and make it more and more tame and cheap. A people who would begin by burning the fences and let the forest
10 stand! I saw the fences half consumed, their ends lost in the middle of the prairie, and some worldly miser with a surveyor looking after his bounds, while heaven had taken place around him, and he did not see the angels going to and fro, but was looking for an old post-hole in the midst of paradise. I looked again, and saw him standing in the middle of a boggy stygian fen, surrounded by devils, and he had found his bounds without a doubt, three little stones, where a stake had been driven, and looking nearer, I saw that the Prince of Darkness was
20 his surveyor.

I can easily walk ten, fifteen, twenty, any number of miles, commencing at my own door, without going by any house, without crossing a road except where the fox and the mink do first along by the river, and then the brook, and then the meadow and the woodside. There are square miles in my vicinity which have no inhabitant. From many a hill I can see civilization and the abodes of man afar. The farmers and their works are scarcely more obvious than woodchucks and their burrows. Man and
30 his affairs, church and state and school, trade and commerce, and manufactures and agriculture, even politics, the most alarming of them all,—I am pleased to see how little space they occupy in the landscape. Politics is but a narrow field, and that still narrower highway yonder leads to it. I sometimes direct the traveler thither. If you would go to the political world, follow the great road,—follow that market-man, keep his dust in your eyes, and it will lead you straight to it; for it, too, has its place merely, and does not occupy all space. I pass
40 from it as from a bean-field into the forest, and it is forgotten. In one half-hour I can walk off to some portion of the earth's surface where a man does not stand from one year's end to another, and there, consequently, politics are not, for they are but as the cigar-smoke of a man.

The village is the place to which the roads tend, a

sort of expansion of the highway, as a lake of a river. It is the body of which roads are the arms and legs, trivial or quadrivial place, the thoroughfare and ordin of travelers. The word is from the Latin *villa*, which together with *via*, a way, or more anciently *ved* and *ve*. Varro derives from *veho*, to carry, because the villa the place to and from which things are carried. Those who got their living by teaming were said *vellatur facere*. Hence, too, the Latin word *vilis* and our *villain*. This suggests what kind of degeneracy villagers are liable to. They are wayworn by the travel that goes by and over them, without traveling themselves.

Some do not walk at all, others walk in the highway a few walk across lots. Roads are made for horses and men of business. I do not travel in them much, comparatively, because I am not in a hurry to get to any tavern or grocery or livery-stable or depot to which they lead. I am a good horse to travel, but not from choice a roadster. The landscape-painter uses the figures of men to mark a road. He would not make that use of my figure. I walk out into a Nature such as the old prophets and poets, Menu, Moses, Homer, Chaucer, walked in. You may name it America, but it is not America; neither Americus Vesputius, nor Columbus, nor the rest were the discoverers of it. There is a truer account of it in mythology than in any history of America, so called that I have seen.

However, there are a few old roads that may be trodden with profit, as if they led somewhere now that they are nearly discontinued. There is the Old Marlborough Road, which does not go to Marlborough now, I think, unless that is Marlborough where it carries me. I am the bolder to speak of it here, because I presume that there are one or two such roads in every town . . .

At present, in this vicinity, the best part of the land is not private property; the landscape is not owned, and the walker enjoys comparative freedom. But possibly the day will come when it will be partitioned off into so-called pleasure-grounds, in which a few will take a narrow and exclusive pleasure only,—when fences shall be

52 Varro, Marcus Terentius Varro (116-27 B.C.), Roman scholar •
68 Menu, in Hindu mythology, a progenitor of human beings and author of wisdom • 81 town Some verses entitled "The Old Marlborough Road" are omitted

multiplied, and man-traps and other engines invented to confine men to the *public* road, and walking over the surface of God's earth shall be construed to mean trespassing on some gentleman's grounds. To enjoy a thing exclusively is commonly to exclude yourself from the true enjoyment of it. Let us improve our opportunities, then, before the evil days come.

What is it that makes it so hard sometimes to determine whither we will walk? I believe that there is a subtle magnetism in Nature, which, if we unconsciously yield to it, will direct us aright. It is not indifferent to us which way we walk. There is a right way; but we are very liable from heedlessness and stupidity to take the wrong one. We would fain take that walk, never yet taken by us through this actual world, which is perfectly symbolic of the path which we love to travel in the interior and ideal world; and sometimes, no doubt, we find it difficult to choose our direction, because it does not yet exist distinctly in our idea.

When I go out of the house for a walk, uncertain as yet whither I will bend my steps, and submit myself to my instinct to decide for me, I find, strange and whimsical as it may seem, that I finally and inevitably settle southwest, toward some particular wood or meadow or deserted pasture or hill in that direction. My needle is slow to settle,—varies a few degrees, and does not always point due southwest, it is true, and it has good authority for this variation, but it always settles between west and south-southwest. The future lies that way to me, and the earth seems more unexhausted and richer on that side. The outline which would bound my walks would be, not a circle, but a parabola, or rather like one of those cometary orbits which have been thought to be non-returning curves, in this case opening westward, in which my house occupies the place of the sun. I turn round and round irresolute sometimes for a quarter of an hour, until I decide, for a thousandth time, that I will walk into the southwest or west. Eastward I go only by force; but westward I go free Thither no business leads me. It is hard for me to believe that I shall find fair landscapes or sufficient wildness and freedom behind the eastern horizon. I am not excited by the prospect of a walk thither; but I believe that the forest which I see in the western horizon stretches uninterruptedly toward the setting sun, and there are no towns nor cities in it

of enough consequence to disturb me. Let me live where I will, on this side is the city, on that the wilderness, and ever I am leaving the city more and more, and withdrawing into the wilderness. I should not lay so much stress on this fact, if I did not believe that something like this is the prevailing tendency of my countrymen. I must walk toward Oregon, and not toward Europe. And that way the nation is moving, and I may say that mankind progress from east to west. Within a few years we have witnessed the phenomenon of a south-eastward migration, in the settlement of Australia; but this affects us as a retrograde movement, and, judging from the moral and physical character of the first generation of Australians, has not yet proved a successful experiment. The eastern Tartars think that there is nothing west beyond Thibet "The world ends there," say they, "beyond there is nothing but a shoreless sea." It is unmitigated East where they live

We go eastward to realize history and study the works of art and literature, retracing the steps of the race; we go westward as into the future, with a spirit of enterprise and adventure. The Atlantic is a Lethean stream, in our passage over which we have had an opportunity to forget the Old World and its institutions. If we do not succeed this time, there is perhaps one more chance for the race left before it arrives on the banks of the Styx; and that is in the Lethe of the Pacific, which is three times as wide

I know not how significant it is, or how far it is an evidence of singularity, that an individual should thus consent in his pettiest walk with the general movement of the race; but I know that something akin to the migratory instinct in birds and quadrupeds,—which, in some instances, is known to have affected the squirrel tribe, impelling them to a general and mysterious movement, in which they were seen, say some, crossing the broadest rivers, each on its particular chip, with its tail raised for a sail, and bridging narrower streams with

67 The Atlantic . . . institutions. Thoreau had doubtless read a similar statement in Cotton Mather's "Life of John Eliot," in the *Magnalia*: "The Atlantick Ocean, like a River of Lethe, may easily cause us to forget many of the things that happened on the other side." In the entry of January 9, 1855, he spoke of Cotton Mather's "rich phrase," and in the entry of February 3, 1856, he quoted Mather's famous letter describing the great snow of 1717

their dead,—that something like the *furor* which affects the domestic cattle in the spring, and which is referred to a worm in their tails,—affects both nations and individuals, either perennially or from time to time. Not a flock of wild geese cackles over our town, but it to some extent unsettles the value of real estate here, and, if I were a broker, I should probably take that disturbance into account.

10 "Than longen folk to gon on pilgrimages,
And palmeres for to seken strange strondes."

Every sunset which I witness inspires me with the desire to go to a West as distant and as fair as that into which the sun goes down. He appears to migrate westward daily, and tempt us to follow him. He is the Great Western Pioneer whom the nations follow. We dream all night of those mountain-ridges in the horizon, though they may be of vapor only, which were last gilded by his rays. The island of Atlantis, and the islands and gardens of the Hesperides, a sort of terrestrial paradise, appear to have been the Great West of the ancients, enveloped in mystery and poetry. Who has not seen in imagination, when looking into the sunset sky, the gardens of the Hesperides, and the foundation of all those fables?

Columbus felt the westward tendency more strongly than any before. He obeyed it, and found a New World for Castile and Leon. The herd of men in those days scented fresh pastures from afar.

30 "And now the sun had stretched out all the hills,
And now was dropped into the western bay;
At last *he* rose, and twitched his mantle blue;
To-morrow to fresh woods and pastures new."

Where on the globe can there be found an area of equal extent with that occupied by the bulk of our States, so fertile and so rich and varied in its productions, and at the same time so habitable by the European, as this is? Michaux, who knew but part of them, says that "the species of large trees are much more numerous in North America than in Europe, in the United States there are more than one hundred and forty species that exceed thirty feet in height; in France there are but thirty that attain this size." Later botanists more than confirm his observations. Humboldt came to America to realize his youthful dreams of a tropical vegetation,

and he beheld it in its greatest perfection in the primeval forests of the Amazon, the most gigantic wilderness the earth, which he has so eloquently described. The geographer Guyot, himself a European, goes farther than I am ready to follow him; yet not when he says: "As the plant is made for the animal, as the vegetable world is made for the animal world, America made for the man of the Old World. . . . The man of the Old World sets out upon his way. Leaving the highlands of Asia, he descends from station to station toward Europe. Each of his steps is marked by a new civilization superior to the preceding, by a greater power of development. Arrived at the Atlantic, he pauses on the shore of this unknown ocean, the bounds of which he knows not, and turns upon his footprints for an instant. When he has exhausted the rich soil of Europe, a reinvigorated himself, "then recommences his adventurous career westward as in the earliest ages." So says Guyot.

From this western impulse coming in contact with the barrier of the Atlantic sprang the commerce and enterprise of modern times. The younger Michaux, in his "Travels West of the Alleghanies in 1802," says of the common inquiry in the newly settled West was "From what part of the world have you come?" As these vast and fertile regions would naturally be the place of meeting and common country of all the inhabitants of the globe."

To use an obsolete Latin word, I might say, *Ex Oriente lux; ex Occidente FRUX*. From the East light; from the West fruit.

Sir Francis Head, an English traveler and a Governor General of Canada, tells us that "in both the northern and southern hemispheres of the New World, Nature has not only outlined her works on a larger scale, but

9 Than . . . strondes, from the "Prologue," ll 12-13, of Chaucer's *Canterbury Tales* • 18 Atlantis. See note, p 922 • 19 Hesperides the garden of classical mythology, located in the extreme West, in which grew the golden apples • 27 Castile . . . Leon, formerly, kingdoms in Spain • 29 And . . . new, from Milton's "Lycidas," ll 190-193 • 37 Michaux, André Michaux (1746-1802), French botanist and traveler • 43 Humboldt, Friedrich Heinrich Alexander, Baron von Humboldt (1769-1859), German naturalist • 48 Guyot, Arnold Henry Guyot (1807-1884), Swiss naturalist and geographer in America • 76 Sir Francis Head (1793-1875), English author and lieutenant governor of Upper Canada

has painted the whole picture with brighter and more costly colors than she used in delineating and in beautifying the Old World. . . . The heavens of America appear infinitely higher, the sky is bluer, the air is fresher, the cold is intenser, the moon looks larger, the stars are brighter, the thunder is louder, the lightning is vividder, the wind is stronger, the rain is heavier, the mountains are higher, the rivers longer, the forests bigger, the plains broader." This statement will do at least to set against

10 Buffon's account of this part of the world and its productions.

Linnæus said long ago, "*Nescio quæ facies læta, glabra plantis Americanis*. I know not what there is of joyous and smooth in the aspect of American plants," and I think that in this country there are no, or at most very few, *Africanæ bestiæ*, African beasts, as the Romans called them, and that in this respect also it is peculiarly fitted for the habitation of man. We are told that within three miles of the centre of the East-Indian city of Singapore, 20 some of the inhabitants are annually carried off by tigers; but the traveler can lie down in the woods at night almost anywhere in North America without fear of wild beasts.

These are encouraging testimonies. If the moon looks larger here than in Europe, probably the sun looks larger also. If the heavens of America appear infinitely higher, and the stars brighter, I trust that these facts are symbolical of the height to which the philosophy and poetry and religion of her inhabitants may one day soar. At length, 30 perchance, the immaterial heaven will appear as much higher to the American mind, and the intimations that star it as much brighter. For I believe that climate does thus react on man,—as there is something in the mountain-air that feeds the spirit and inspires. Will not man grow to greater perfection intellectually as well as physically under these influences? Or is it unimportant how many foggy days there are in his life? I trust that we shall be more imaginative, that our thoughts will be clearer, fresher, and more ethereal, as our sky,—our 40 understanding more comprehensive and broader, like our plains,—our intellect generally on a grander scale, like our thunder and lightning, our rivers and mountains and forests,—and our hearts shall even correspond in breadth and depth and grandeur to our inland seas. Perchance there will appear to the traveler something, he knows not what, of *læta* and *glabra*, of joyous and

serene, in our very faces. Else to what end does the world go on, and why was America discovered?

To Americans I hardly need to say,—

"Westward the star of empire takes its way." 5

As a true patriot, I should be ashamed to think that Adam in paradise was more favorably situated on the whole than the backwoodsman in this country.

Our sympathies in Massachusetts are not confined to New England; though we may be estranged from the South, we sympathize with the West. There is the home of the younger sons, as among the Scandinavians they took to the sea for their inheritance. It is too late to be studying Hebrew; it is more important to understand even the slang of to-day.

Some months ago I went to see a panorama of the Rhine. It was like a dream of the Middle Ages. I floated down its historic stream in something more than imagination, under bridges built by the Romans, and repaired by later heroes, past cities and castles whose very names were music to my ears, and each of which was the subject of a legend. There were Ehrenbreitstein and Rolandseck and Coblenz, which I knew only in history. They were ruins that interested me chiefly. There seemed to come up from its waters and its vine-clad hills and 70 valleys a hushed music as of Crusaders departing for the Holy Land. I floated along under the spell of enchantment, as if I had been transported to an heroic age, and breathed an atmosphere of chivalry.

Soon after, I went to see a panorama of the Mississippi, and as I worked my way up the river in the light of to-day, and saw the steamboats wooding up, counted the rising cities, gazed on the fresh ruins of Nauvoo, beheld the Indians moving west across the stream, and, as before I had looked up the Moselle, now looked up the Ohio and 80

10 Buffon, Comte de Buffon. See note, p. 263. The sarcastic allusion is probably to the following statement: "While America far exceeds us in the size of its reptiles, it is far inferior in its quadruped productions" (*Buffon's Natural History*, Abridged, London, 1828, p. 330). • 12 Linnæus, Carolus Linnæus. See note, p. 880. • 50 Westward . . . way, from Bishop George Berkeley's "Verses on the Prospect of Planting Arts and Learning in America" (1752), except that Berkeley wrote "course" instead of "star". • 67 Ehrenbreitstein . . . Coblenz, cities on the Rhine. • 78 ruins of Nauvoo. The reference is to the riot against the Mormons in 1844 at Nauvoo, Illinois. The Mormons shortly afterwards migrated to Great Salt Lake. • 80 Moselle, a river that flows through France into the Rhine.

the Missouri and heard the legends of Dubuque and of Wenona's Cliff—still thinking more of the future than of the past or present,—I saw that this was a Rhine stream of a different kind; that the foundations of castles were yet to be laid, and the famous bridges were yet to be thrown over the river; and I felt that *this was the heroic age itself*, though we know it not, for the hero is commonly the simplest and obscurest of men.

The West of which I speak is but another name for the Wild; and what I have been preparing to say is, that in Wildness is the preservation of the World. Every tree sends its fibres forth in search of the Wild. The cities import it at any price. Men plough and sail for it. From the forest and wilderness come the tonics and barks which brace mankind. Our ancestors were savages. The story of Romulus and Remus being suckled by a wolf is not a meaningless fable. The founders of every state which has risen to eminence have drawn their nourishment and vigor from a similar wild source. It was because the children of the Empire were not suckled by the wolf that they were conquered and displaced by the children of the northern forests who were.

I believe in the forest, and in the meadow, and in the night in which the corn grows. We require an infusion of hemlock-spruce or arbor-vitæ in our tea. There is a difference between eating and drinking for strength and from mere gluttony. The Hottentots eagerly devour the marrow of the koodoo and other antelopes raw, as a matter of course. Some of our Northern Indians eat raw the marrow of the Arctic reindeer, as well as the various other parts, including the summits of the antlers, as long as they are soft. And herein, perchance, they have stolen a march on the cooks of Paris. They get what usually goes to feed the fire. This is probably better than stall-fed beef and slaughter-house pork to make a man of. Give me a wildness whose glance no civilization can endure,—as if we lived on the marrow of koodoos devoured raw.

There are some intervals which border the strain of the wood-thrush, to which I would migrate,—wild lands where no settler has squatted; to which, methinks, I am already acclimated.

The African hunter Cummings tells us that the skin of the eland, as well as that of most other antelopes just killed, emits the most delicious perfume of trees and

grass. I would have every man so much like a wild antelope, so much a part and parcel of Nature, that his person should thus sweetly advertise our senses of presence, and remind us of those parts of Nature which he most haunts. I feel no disposition to be satirical, when the trapper's coat emits the odor of musquash even; it is a sweeter scent to me than that which commonly exhales from the merchant's or the scholar's garments. When we go into their wardrobes and handle their vestments, I am reminded of no grassy plains and flowery meads which they have frequented, but of dusty merchants' exchanges and libraries rather.

A tanned skin is something more than respectable, and perhaps olive is a fitter color than white for a man, a denizen of the woods. "The pale white man!" I do wonder that the African pitied him. Darwin the naturalist says, "A white man bathing by the side of a Tahitian was like a plant bleached by the gardener's art, compared with a fine, dark green one, growing vigorously in the open fields."

Ben Jonson exclaims,—

"How near to good is what is fair!"

So I would say,—

How near to good is what is *wild*!

Life consists with wildness. The most alive is the wildest. Not yet subdued to man, its presence refreshes him. One who pressed forward incessantly and never rested from his labors, who grew fast and made infinite demands on life, would always find himself in a new country or wilderness, and surrounded by the raw materials of life. He would be climbing over the prostrate stems of primitive forest-trees.

Hope and the future for me are not in lawns and cultivated fields, not in towns and cities, but in the unpervious and quaking swamps. When, formerly, I have

1 Dubuque . . . Cliff, Indian legends associated with Dubuque, Iowa and Winona, Minnesota • 16 Romulus and Remus. Romulus was the legendary founder of Rome, Remus was his twin brother • 2 children . . . forests, a reference to the Goths, who sacked Rome in 410 • 43 The African . . . grass. See R. G. Gordon-Cumming (1820-1866) *Five Years of Hunter's Life in the Far Interior of South Africa* • 62 A white man . . . fields, from Chap. XVIII of Charles Darwin *Voyage of the Beagle*

analyzed my partiality for some farm which I had contemplated purchasing, I have frequently found that I was attracted solely by a few square rods of impermeable and unfathomable bog,—a natural sink in one corner of it. That was the jewel which dazzled me. I derive more of my subsistence from the swamps which surround my native town than from the cultivated gardens in the village. There are no richer parterres to my eyes than the dense beds of dwarf andromeda (*Cassandra calyculata*) which cover these tender places on the earth's surface. Botany cannot go farther than tell me the names of the shrubs which grow there,—the high-blueberry, panicked andromeda, lamb-kill, azalea, and rhodora,—all standing in the quaking sphagnum. I often think that I should like to have my house front on this mass of dull red bushes, omitting other flower pots and borders, transplanted spruce and trim box, even graveled walks,—to have this fertile spot under my windows, not a few imported barrow-fulls of soil only to cover the sand which was thrown out in digging the cellar. Why not put my house, my parlor, behind this plot, instead of behind that meagre assemblage of curiosities, that poor apology for a Nature and Art, which I call my front yard? It is an effort to clear up and make a decent appearance when the carpenter and mason have departed, though done as much for the passer-by as the dweller within. The most tasteful front-yard fence was never an agreeable object of study to me, the most elaborate ornaments, acorn-tops, or what not, soon wearied and disgusted me. Bring your sills up to the very edge of the swamp, then (though it may not be the best place for a dry cellar), so that there be no access on that side to citizens. Front yards are not made to walk in, but, at most, through, and you could go in the back way.

Yes, though you may think me perverse, if it were proposed to me to dwell in the neighborhood of the most beautiful garden that ever human art contrived, or else of a Dismal Swamp, I should certainly decide for the swamp. How vain, then, have been all your labors, citizens, for me!

My spirits infallibly rise in proportion to the outward dreariness. Give me the ocean, the desert, or the wilderness! In the desert, pure air and solitude compensate for want of moisture and fertility. The traveler Burton says of it. "Your *morale* improves; you become frank and cordial, hospitable and single-minded . . . In

the desert, spirituous liquors excite only disgust. There is a keen enjoyment in the mere animal existence." They who have been traveling along on the steppes of Tartary say. "On reëntering cultivated lands, the agitation, perplexity, and turmoil of civilization oppressed and suffocated us; the air seemed to fail us, and we felt every moment as if about to die of asphyxia" When I would recreate myself, I seek the darkest wood, the thickest and most interminable and, to the citizen, most dismal swamp. I enter a swamp as a sacred place,—a *sanctum sanctorum*. There is the strength, the marrow of Nature. The wild-wood covers the virgin-mould,—and the same soil is good for men and for trees. A man's health requires as many acres of meadow to his prospect as his farm does loads of muck. There are the strong meats on which he feeds. A town is saved, not more by the righteous men in it than by the woods and swamps that surround it. A township where one primitive forest waves above while another primitive forest rots below,—such a town is fitted to raise not only corn and potatoes, but poets and philosophers for the coming ages. In such a soil grew Homer and Confucius and the rest, and out of such a wilderness comes the Reformer eating locusts and wild honey

To preserve wild animals implies generally the creation of a forest for them to dwell in or resort to. So it is with man. A hundred years ago they sold bark in our streets peeled from our own woods. In the very aspect of those primitive and rugged trees there was, methinks, a tanning principle which hardened and consolidated the fibres of men's thoughts. Ah! already I shudder for these comparatively degenerate days of my native village, when you cannot collect a load of bark of good thickness,—and we no longer produce tar and turpentine.

The civilized nations—Greece, Rome, England—have been sustained by the primitive forests which anciently rotted where they stand. They survive as long as the soil is not exhausted. Alas for human culture! little is to be expected of a nation, when the vegetable mould is exhausted, and it is compelled to make manure of the

38 Dismal Swamp, in Virginia. Thoreau had probably read William Byrd's account of "the Dismal" in his *History of the Dividing Line* (see p. 105), first published in 1841. • 45 Burton, Sir Richard Francis Burton (1821-1890), English traveler and author. • 56 *sanctum sanctorum*, the holy of holies, the most holy place. • 69 locusts . . . honey. The allusion is to John the Baptist, see Matthew 3.1-4.

bones of its fathers. There the poet sustains himself merely by his own superfluous fat, and the philosopher comes down on his marrow-bones.

It is said to be the task of the American "to work the virgin soil," and that "agriculture here already assumes proportions unknown everywhere else." I think that the farmer displaces the Indian even because he redeems the meadow, and so makes himself stronger and in some respects more natural. I was surveying for a man the other day a single straight line one hundred and thirty-two rods long, through a swamp, at whose entrance might have been written the words which Dante read over the entrance to the infernal regions,—*"Leave all hope, ye that enter,"*—that is, of ever getting out again, where at one time I saw my employer actually up to his neck and swimming for his life in his property, though it was still winter. He had another similar swamp which I could not survey at all, because it was completely under water, and nevertheless, with regard to a third swamp, which I did survey from a distance, he remarked to me, true to his instincts, that he would not part with it for any consideration, on account of the mud which it contained. And that man intends to put a girdling ditch round the whole in the course of forty months, and so redeem it by the magic of his spade. I refer to him only as the type of a class.

The weapons with which we have gained our most important victories, which should be handed down as heirlooms from father to son, are not the sword and the lance, but the bushwhack, the turf-cutter, the spade, and the boghoe, rusted with the blood of many a meadow, and begrimed with the dust of many a hard-fought field. The very winds blew the Indian's corn-field into the meadow, and pointed out the way which he had not the skill to follow. He had no better implement with which to intrench himself in the land than a clam-shell. But the farmer is armed with plough and spade.

In literature it is only the wild that attracts us. Dullness is but another name for tameness. It is the uncivilized free and wild thinking in *"Hamlet"* and the *"Iliad,"* in all the Scriptures and Mythologies, not learned in the schools, that delights us. As the wild duck is more swift and beautiful than the tame, so is the wild—the mallard—thought, which 'mid falling dews wings its way above the fens. A truly good book is something as natural, and as unexpectedly and unaccountably fair and perfect, as

a wild flower discovered on the prairies of the West in the jungles of the East. Genius is a light which pierces the darkness visible, like the lightning's flash, which chance shatters the temple of knowledge itself,—and a taper lighted at the hearthstone of the race, which glows before the light of common day.

English literature, from the days of the minstrel to the Lake Poets,—Chaucer and Spenser and Milton, even Shakespeare, included,—breathes no quite different and, in this sense, wild strain. It is an essentially traditional and civilized literature, reflecting Greece and Rome. The wilderness is a greenwood, her wild man a Robin Hood. There is plenty of genial love of Nature, but no much of Nature herself. Her chronicles inform us of her wild animals, but not when the wild man in her came extinct.

The science of Humboldt is one thing, poetry is another thing. The poet to-day, notwithstanding all discoveries of science, and the accumulated learning of mankind, enjoys no advantage over Homer.

Where is the literature which gives expression to Nature? He would be a poet who could impress the winds and streams into his service, to speak for him who nailed words to their primitive senses, as farnes drive down stakes in the spring, which the frost has heaved; who derived his words as often as he used them,—transplanted them to his page with earth adhering to their roots; whose words were so true and fresh and natural that they would appear to expand like the buds at the approach of spring, though they lay half-smothered between two musty leaves in a library,—ay, to bloom and bear fruit there, after their kind, annually, for the faithful reader, in sympathy with surrounding Nature.

I do not know of any poetry to quote which adequately expresses this yearning for the Wild. Approach from this side, the best poetry is tame. I do not know where to find in any literature, ancient or modern, an account which contents me of that Nature with which even I am acquainted. You will perceive that I demand something which no Augustan nor Elizabethan age, with

44 'mid . . . dews. Thoreau remembered Bryant's "To a Waterfowl" (see p. 468), the opening line of which he echoes here. • 49 darkness visible. The phrase is from Milton's *Paradise Lost*, Bk. I, l. 63. • the light . . . day. The phrase is from Wordsworth's "Ode on Intimations of Immortality," l. 76.

no *culture*, in short, can give. Mythology comes nearer to it than anything. How much more fertile a Nature, at least, has Grecian mythology its root in than English literature! Mythology is the crop which the Old World bore before its soil was exhausted, before the fancy and imagination were affected with blight, and which it still bears, wherever its pristine vigor is unabated. All other literatures endure only as the elms which overshadow our houses; but this is like the great dragon-tree of the
10 Western Isles, as old as mankind, and, whether that does or not, will endure as long, for the decay of other literatures makes the soil in which it thrives

The West is preparing to add its fables to those of the East. The valleys of the Ganges, the Nile, and the Rhine having yielded their crop, it remains to be seen what the valleys of the Amazon, the Plate, the Orinoco, the St. Lawrence, and the Mississippi will produce. Perchance, when, in the course of ages, American liberty has become a fiction of the past,—as it is to some extent a
20 fiction of the present,—the poets of the world will be inspired by American mythology.

The wildest dreams of wild men, even, are not the less true, though they may not recommend themselves to the sense which is most common among Englishmen and Americans to-day. It is not every truth that recommends itself to the common sense. Nature has a place for the wild clematis as well as for the cabbage. Some expressions of truth are reminiscent,—others merely
30 sensible, as the phrase is,—others prophetic. Some forms of disease, even, may prophesy forms of health. The geologist has discovered that the figures of serpents, griffins, flying dragons, and other fanciful embellishments of heraldry, have their prototypes in the forms of fossil species which were extinct before man was created, and hence "indicate a faint and shadowy knowledge of a previous state of organic existence." The Hindoos dreamed that the earth rested on an elephant, and the elephant on a tortoise, and the tortoise on a serpent; and though it may be an unimportant coincidence, it will
40 not be out of place here to state, that a fossile tortoise has lately been discovered in Asia large enough to support an elephant. I confess that I am partial to these wild fancies, which transcend the order of time and development. They are the sublimest recreation of the intellect. The partridge loves peas, but not those that go with her into the pot.

In short, all good things are wild and free. There is something in a strain of music, whether produced by an instrument or by the human voice,—take the sound of a bugle in a summer night, for instance,—which by its
5 wildness, to speak without satire, reminds me of the cries emitted by wild beasts in their native forests. It is so much of their wildness as I can understand. Give me for my friends and neighbors wild men, not tame ones. The wildness of the savage is but a faint symbol of the awful ferity with which good men and lovers meet.

I love even to see the domestic animals reassert their native rights,—any evidence that they have not wholly lost their original wild habits and vigor; as when my neighbor's cow breaks out of her pasture early in the
60 spring and boldly swims the river, a cold, gray tide, twenty-five or thirty rods wide, swollen by the melted snow. It is the buffalo crossing the Mississippi. This exploit confers some dignity on the herd in my eyes,—already dignified. The seeds of instinct are preserved under the thick hides of cattle and horses, like seeds in the bowels of the earth, an indefinite period

Any sportiveness in cattle is unexpected. I saw one day a herd of a dozen bullocks and cows running about and frisking in unwieldy sport, like huge rats, even like
70 kittens. They shook their heads, raised their tails, and rushed up and down a hill, and I perceived by their horns, as well as by their activity, their relation to the deer tribe. But, alas! a sudden loud *Whoa!* would have damped their ardor at once, reduced them from venison to beef, and stiffened their sides and sinews like the locomotive. Who but the Evil One has cried, "*Whoa!*" to mankind? Indeed, the life of cattle, like that of many men, is but a sort of locomotiveness; they move a side at a time, and man, by his machinery, is meeting the
80 horse and the ox half-way. Whatever part the whip has touched is thenceforth palsied. Who would ever think of a *side* of any of the supple cat tribe, as we speak of a *side* of beef?

I rejoice that horses and steers have to be broken before they can be made the slaves of men, and that men themselves have some wild oats still left to sow before they become submissive members of society. Undoubtedly, all men are not equally fit subjects for civilization; and because the majority, like dogs and sheep, are tame
90

by inherited disposition, this is no reason why the others should have their natures broken that they may be reduced to the same level. Men are in the main alike, but they were made several in order that they might be various. If a low use is to be served, one man will do nearly or quite as well as another; if a high one, individual excellence is to be regarded. Any man can stop a hole to keep the wind away, but no other man could serve so rare a use as the author of this illustration did. 10 Confucius says, "The skins of the tiger and the leopard, when they are tanned, are as the skins of the dog and the sheep tanned." But it is not the part of a true culture to tame tigers, any more than it is to make sheep ferocious; and tanning their skins for shoes is not the best use to which they can be put.

When looking over a list of men's names in a foreign language, as of military officers, or of authors who have written on a particular subject, I am reminded once more that there is nothing in a name. The name Menschikoff, 20 for instance, has nothing in it to my ears more human than a whisker, and it may belong to a rat. As the names of the Poles and Russians are to us, so are ours to them. It is as if they had been named by the child's rigmarole, —*Iery wery ichery van, tittle-tol-tan*. I see in my mind a herd of wild creatures swarming over the earth, and to each the herdsman has affixed some barbarous sound in his own dialect. The names of men are of course as cheap and meaningless as *Bose* and *Tray*, the names of dogs.

Methinks it would be some advantage to philosophy, 30 if men were named merely in the gross, as they are known. It would be necessary only to know the genus and perhaps the race or variety, to know the individual. We are not prepared to believe that every private soldier in a Roman army had a name of his own,—because we have not supposed that he had a character of his own.

At present our only true names are nicknames. I knew a boy who, from his peculiar energy, was called "Buster" by his playmates, and this rightly supplanted his Christian name. Some travelers tell us that an Indian had no 40 name given him at first, but earned it, and his name was his fame; and among some tribes he acquired a new name with every new exploit. It is pitiful when a man bears a name for convenience merely, who has earned neither name nor fame.

I will not allow mere names to make distinctions for

me, but still see men in herds for all them. A family name cannot make a man less strange to me. It may be given to a savage who retains in secret his own title earned in the woods. We have a wild savage in a name and a savage name is perchance somewhere recorded in our books. I see that my neighbor, who bears the familiar epithet William, or Edwin, takes it off with his jacket. It does not adhere to him when asleep or in anger, nor is he aroused by any passion or inspiration. I seem to hear a name pronounced by some of his kin at such a time his original wild name in some jaw-breaking or else melodious tongue.

Here is this vast, savage, howling mother of our Nature, lying all around, with such beauty, and such affection for her children, as the leopard; and yet we are so early weaned from her breast to society, to that culture which is exclusively an interaction of man on man—a sort of breeding in and in, which produces at most a merely English nobility, a civilization destined to have a speedy limit.

In society, in the best institutions of men, it is easy to detect a certain precocity. When we should still be growing children, we are already little men. Give me a culture which imports much muck from the meadow and deepens the soil,—not that which trusts to heat and manures, and improved implements and modes of culture only!

Many a poor sore-eyed student that I have heard of would grow faster, both intellectually and physically, instead of sitting up so very late, he honestly slumbers a fool's allowance.

There may be an excess even of informing light. Niepce, a Frenchman, discovered "actinism," that power in the sun's rays which produces a chemical effect; the granite rocks, and stone structures, and statues of metal "are all alike destructively acted upon during the hours of sunshine, and, but for provisions of Nature no less wonderful, would soon perish under the delicate touch of the most subtle of the agencies of the universe." But he observed that "those bodies which underwent this change during the daylight possessed the power of restoring themselves to their original conditions during the

7 stop . . . away. See note, p. 942 • 9 author, Shakespeare • 19 Menschikoff, Prince Aleksandr Menshikov (1787-1869), Russian general • 77 Niepce, Joseph Nicéphore Niepce (1765-1833), French chemist and inventor of photography

hours of night, when this excitement was no longer influencing them." Hence it has been inferred that "the hours of darkness are as necessary to the inorganic creation as we know night and sleep are to the organic kingdom." Not even does the moon shine every night, but gives place to darkness.

I would not have every man nor every part of a man cultivated, any more than I would have every acre of earth cultivated: part will be tillage, but the greater part
10 will be meadow and forest, not only serving an immediate use, but preparing a mould against a distant future, by the annual decay of the vegetation which it supports.

There are other letters for the child to learn than those which Cadmus invented. The Spaniards have a good term to express this wild and dusky knowledge, *Gramática parda*, tawny grammar, a kind of mother-wit derived from that same leopard to which I have referred.

We have heard of a Society for the Diffusion of Useful Knowledge. It is said that knowledge is power; and
20 the like. Methinks there is equal need of a Society for the Diffusion of Useful Ignorance, what we will call Beautiful Knowledge, a knowledge useful in a higher sense: for what is most of our boasted so-called knowledge but a conceit that we know something, which robs us of the advantage of our actual ignorance? What we call knowledge is often our positive ignorance, ignorance our negative knowledge. By long years of patient industry and reading of the newspapers,—for what are the libraries of science but files of newspapers?—a man
30 accumulates a myriad facts, lays them up in his memory, and then when in some spring of his life he saunters abroad into the Great Fields of thought, he, as it were, goes to grass like a horse and leaves all his harness behind in the stable. I would say to the Society for the Diffusion of Useful Knowledge, sometimes,—Go to grass. You have eaten hay long enough. The spring has come with its green crop. The very cows are driven to their country pastures before the end of May; though I have heard of one unnatural farmer who kept his cow
40 in the barn and fed her on hay all the year round. So, frequently, the Society for the Diffusion of Useful Knowledge treats its cattle.

A man's ignorance sometimes is not only useful, but beautiful,—while his knowledge, so called, is oftentimes worse than useless, besides being ugly. Which is the best man to deal with,—he who knows nothing about a

subject, and, what is extremely rare, knows that he knows nothing, or he who really knows something about it, but thinks that he knows all?

My desire for knowledge is intermittent; but my desire to bathe my head in atmospheres unknown to my feet is perennial and constant. The highest that we can attain to is not Knowledge, but Sympathy with Intelligence. I do not know that this higher knowledge amounts to anything more definite than a novel and grand surprise on a sudden revelation of the insufficiency of all that we called Knowledge before,—a discovery that there are more things in heaven and earth than are dreamed of in our philosophy. It is the lighting up of the mist by the sun. Man cannot *know* in any higher sense than
40 this, any more than he can look serenely and with impunity in the face of the sun: 'Ὡς τί νοῶν, οὐ κέλων νοίσεις,—"You will not perceive that, as perceiving a particular thing," say the Chaldean Oracles.

There is something servile in the habit of seeking after a law which we may obey. We may study the laws of matter at and for our convenience, but a successful life knows no law. It is an unfortunate discovery certainly, that of a law which binds us where we did not know before that we were bound. Live free, child of the
70 mist,—and with respect to knowledge we are all children of the mist. The man who takes the liberty to live is superior to all the laws, by virtue of his relation to the law-maker. "That is active duty," says the Vishnu Purana, "which is not for our bondage, that is knowledge which is for our liberation. all other duty is good only unto weariness; all other knowledge is only the cleverness of an artist."

It is remarkable how few events or crises there are in our histories; how little exercised we have been in our
80 minds, how few experiences we have had. I would fain be assured that I am growing apace and rankly, though my very growth disturb this dull equanimity,—though it be with struggle through long, dark, muggy nights or seasons of gloom. It would be well, if all our lives were

14 Cadmus. In Greek mythology, Cadmus introduced the alphabet from Phoenicia into Greece • 57 there . . . philosophy, famous words of Hamlet to Horatio, *Hamlet*, Act I, Scene v, ll 166-167 • 64 Chaldean Oracles, religious teachings of ancient Babylonia • 74 Vishnu Purana, one of the sacred books of the Hindus, compare introductory note to Emerson's "Hamatreya," p 934

a divine tragedy even, instead of this trivial comedy or farce. Dante, Bunyan, and others appear to have been exercised in their minds more than we: they were subjected to a kind of culture such as our district schools and colleges do not contemplate. Even Mahomet, though many may scream at his name, had a good deal more to live for, aye, and to die for, than they have commonly.

When, at rare intervals, some thought visits one, as perchance he is walking on a railroad, then indeed the cars go by without his hearing them. But soon, by some inexorable law our life goes by and the cars return.

"Gentle breeze, that wanderest unseen,
And bendest the thistles round Loira of storms,
Traveler of the windy glens,
Why hast thou left my ear so soon?"

While almost all men feel an attraction drawing them to society, few are attracted strongly to Nature. In their reaction to Nature men appear to me for the most part, notwithstanding their arts, lower than the animals. It is not often a beautiful relation, as in the case of the animals. How little appreciation of the beauty of the landscape there is among us! We have to be told that the Greeks called the world *Kóσμος*, Beauty, or Order, but we do not see clearly why they did so, and we esteem it at best only a curious philological fact.

For my part, I feel that with regard to Nature I live a sort of border life, on the confines of a world into which I make occasional and transient forays only, and my patriotism and allegiance to the State into whose territories I seem to retreat are those of a moss-trooper. Unto a life which I call natural I would gladly follow even a will-o'-the-wisp through bogs and sloughs unimaginable, but no moon nor firefly has shown me the causeway to it. Nature is a personality so vast and universal that we have never seen one of her features. The walker in the familiar fields which stretch around my native town sometimes finds himself in another land than is described in their owners' deeds, as it were in some far-away field on the confines of the actual Concord, where her jurisdiction ceases, and the idea which the word Concord suggests ceases to be suggested. These farms which I have myself surveyed, these bounds which I have set up, appear dimly still as through a mist, but they have no chemistry to fix them; they fade from the surface of the glass; and the picture which the painter

painted stands out dimly from beneath. The world which we are commonly acquainted leaves no trace it will have no anniversary.

I took a walk on Spaulding's Farm the other afternoon. I saw the setting sun lighting up the opposite side of the stately pine wood. Its golden rays straggled into the aisles of the wood as into some noble hall. I was pressed as if some ancient and altogether admirable shining family had settled there in that part of the called Concord, unknown to me,—to whom the sun servant,—who had not gone into society in the village—who had not been called on. I saw their park, their pleasure-ground, beyond through the wood, in Spaulding's cranberry-meadow. The pines furnished them their gables as they grew. Their house was not obvious in vision; the trees grew through it. I do not know whether I heard the sounds of a suppressed hilarity or not. They seemed to recline on the sunbeams. They have sons and daughters. They are quite well. The farmer's cart-path which leads directly through their hall, does not in the least put them out, as the muddy bottom of a pool sometimes seen through the reflected skies. They never heard of Spaulding, and do not know that he is their neighbor,—notwithstanding I heard him whistle as he drove his team through the house. Nothing can equal the serenity of their lives. Their coat of arms is simple, a lichen. I saw it painted on the pines and oaks. Their attics were in the tops of the trees. They are of no politics. There was no noise of labor. I did not perceive that they were weaving or spinning. Yet I did detect when the wind lulled and hearing was done away, the finest imaginable sweet musical hum,—as of a distant hive in May, which perchance was the sound of their thinking. They had no idle thoughts, and no one without could see their work, for their industry was not as knots and excrescences embayed.

But I find it difficult to remember them. They fade irrevocably out of my mind even now while I speak.

5 Mahomet. Thoreau's respect for Mahomet doubtless owed much to Carlyle's *Heroes and Hero Worship* (1841), where Mahomet is the "hero as prophet." Thoreau wrote a notable essay on Carlyle ("Thoma Carlyle and His Works"), published in 1847. • 30 moss-trooper, one of a class of marauders that formerly infested the border country between England and Scotland, so called because of the mossy or boggy character of much of the country.

and endeavor to recall them and recollect myself. It is only after a long and serious effort to recollect my best thoughts that I become again aware of their cohabitancy. If it were not for such families as this, I think I should move out of Concord.

We are accustomed to say in New England that few and fewer pigeons visit us every year. Our forests furnish no mast for them. So, it would seem, few and fewer thoughts visit each growing man from year to year, for the grove in our minds is laid waste,—sold to feed unnecessary fires of ambition, or sent to mill, and there is scarcely a twig left for them to perch on. They no longer build nor breed with us. In some more genial season, perchance, a faint shadow flits across the landscape of the mind, cast by the *wings* of some thought in its vernal or autumnal migration, but, looking up, we are unable to detect the substance of the thought itself. Our winged thoughts are turned to poultry. They no longer soar, and they attain only to a Shanghai and Cochín-China grandeur. Those *gra-a-ate thoughts*, those *gra-a-ate men* you hear of!

We hug the earth,—how rarely we mount! Methinks we might elevate ourselves a little more. We might climb a tree, at least. I found my account in climbing a tree once. It was a tall white-pine, on the top of a hill; and though I got well pitched, I was well paid for it, for I discovered new mountains in the horizon which I had never seen before,—so much more of the earth and the heavens. I might have walked about the foot of the tree for three-score years and ten, and yet I certainly should never have seen them. But, above all, I discovered around me,—it was near the end of June,—on the ends of the topmost branches only, a few minute and delicate red cone-like blossoms, the fertile flower of the white pine looking heavenward. I carried straightway to the village the topmost spire, and showed it to stranger jurymen who walked the streets,—for it was court-week,—and the farmers and lumber-dealers and wood-choppers and hunters, and not one had ever seen the like before, but they wondered as at a star dropped down. Tell of ancient architects finishing their works on the tops of columns as perfectly as on the lower and more visible parts! Nature has from the first expanded the minute blossoms of the forest only toward the heavens, above

men's heads and unobserved by them. We see only the flowers that are under our feet in the meadows. The pines have developed their delicate blossoms on the highest twigs of the wood every summer for ages, as well over the heads of Nature's red children as of her white ones. yet scarcely a farmer or hunter in the land has 50 ever seen them.

Above all, we cannot afford not to live in the present. He is blessed over all mortals who loses no moment of the passing life in remembering the past. Unless our philosophy hears the cock crow in every barn-yard within our horizon, it is belated. That sound commonly reminds us that we are growing rusty and antique in our employments and habits of thought. His philosophy comes down to a more recent time than ours. There is something suggested by it that is a newer testament,— 60 the gospel according to this moment. He has not fallen astern, he has got up early and kept up early, and to be where he is is to be in season, in the foremost rank of time. It is an expression of the health and soundness of Nature, a brag for all the world,—healthiness as of a spring burst forth, a new fountain of the Muses, to celebrate this last instant of time. Where he lives no fugitive slave laws are passed. Who has not betrayed his master many times since last he heard that note?

The merit of this bird's strain is in its freedom from 70 all plaintiveness. The singer can easily move us to tears or to laughter, but where is he who can excite in us a pure morning joy? When, in doleful dumps, breaking the awful stillness of our wooden sidewalk on a Sunday, or perchance, a watcher in the house of mourning, I hear a cockerel crow far or near, I think to myself, "There is one of us well, at any rate,"—and with a sudden gush return to my senses.

We had a remarkable sunset one day last November. I was walking in a meadow, the source of a small brook, 80 when the sun at last, just before setting, after a cold

19 Shanghai . . . Cochín-China, breeds of domestic fowls of Asiatic origin • 68 fugitive slave laws. A new and drastic Fugitive Slave Law, intended to check organized assistance by the "underground railroad" to fugitives, was a part of the Compromise of 1850 • 68 betrayed . . . note, an allusion to Peter's denials of Jesus. gray day, reached a clear stratum in the horizon, and the softest, brightest morning sunlight fell on the dry grass and on the stems of the trees in the opposite horizon and on the leaves of the shrub-oaks on the hillside, while our shadows stretched long over the meadow eastward, as if we were the only motes in its beams. It was such a light as we could not have imagined a moment before, and the air also was so warm and serene that nothing was wanting to make a paradise of that meadow. When
10 we reflected that this was not a solitary phenomenon, never to happen again, but that it would happen forever and ever an infinite number of evenings, and cheer and reassure the latest child that walked there, it was more glorious still.

The sun sets on some retired meadow, where no house is visible, with all the glory and splendor that it lavishes on cities, and perchance as it has never set before,—

where there is but a solitary marsh-hawk to have wings gilded by it, or only a musquash looks out his cabin, and there is some little black-veined brook in the midst of the marsh, just beginning to meander, winding slowly round a decaying stump. We walked pure and bright a light, gilding the withered grass leaves, so softly and serenely bright, I thought I never bathed in such a golden flood, without a ripple or a murmur to it. The west side of every wood and the ground gleamed like the boundary of Elysium, and the sun on our backs seemed like a gentle herdsman driving us home at evening.

So we saunter toward the Holy Land, till one day the sun shall shine more brightly than ever he has, and shall perchance shine into our minds and hearts, and up our whole lives with a great awakening light, as warm and serene and golden as on a bankside in autumn.

Prayer

From *The Dial* for July 1842.

Great God, I ask thee for no meaner self
Than that I may not disappoint myself,
That in my action I may soar as high
As I can now discern with this clear eye.

And next in value, which thy kindness lends,
That I may greatly disappoint my friends,
Howe'er they think or hope that it may be,
They may not dream how thou'st distinguished me.

That my weak hand may equal my firm faith,
And my life practise more than my tongue saith;
10 That my low conduct may not show,
Nor my relenting lines,
That I thy purpose did not know,
Or overrated thy designs.

1842

Rumors from an Æolian Harp

First printed in *The Dial* for October 1842, the poem reprinted in the chapter entitled "Monday" in *A Week on the Concord and Merrimack Rivers*.

There is a vale which none hath seen,
Where foot of man has never been,
Such as here lives with toil and strife,
An anxious and a sinful life.

There every virtue has its birth,
Ere it descends upon the earth,
And thither every deed returns,
Which in the generous bosom burns.

There love is warm, and youth is young,
And poetry is yet unsung,
For Virtue still adventures there,
And freely breathes her native air.

And ever, if you hearken well,
You still may hear its vesper bell,
And tread of high-souled men go by,
Their thoughts conversing with the sky.

1842

The Summer Rain

First printed in *The Dial* for October 1842, "The Summer Rain" was reprinted in the chapter entitled "Thursday" in *A Week on the Concord and Merrimack Rivers*.

My books I'd fain cast off, I cannot read,
"Twixt every page my thoughts go stray at large
Down in the meadow, where is richer feed,
And will not mind to hit their proper targe.

Plutarch was good, and so was Homer too,
Our Shakespeare's life were rich to live again,
What Plutarch read, that was not good nor true,
Nor Shakespeare's books, unless his books were men.

Here while I lie beneath this walnut bough,
What care I for the Greeks or for Troy town,
If juster battles are enacted now
Between the ants upon this hummock's crown?

Bid Homer wait till I the issue learn,
If red or black the gods will favor most,
Or yonder Ajax will the phalanx turn,
Struggling to heave some rock against the host.

Tell Shakespeare to attend some leisure hour,
For now I've business with this drop of dew,
And see you not, the clouds prepare a shower,—
I'll meet him shortly when the sky is blue.

This bed of herdsgrass and wild oats was spread
Last year with nicer skill than monarchs use,
A clover tuft is pillow for my head,
And violets quite overtop my shoes.

And now the cordial clouds have shut all in,
And gently swells the wind to say all's well;
The scattered drops are falling fast and thin,
Some in the pool, some in the flower-bell.

I am well drenched upon my bed of oats;
But see that globe come rolling down its stem,
Now like a lonely planet there it floats,
And now it sinks into my garment's hem.

Drip, drip the trees for all the country round,
And richness rare distills from every bough;
The wind alone it is makes every sound,
Shaking down crystals on the leaves below.

For shame the sun will never show himself,
Who could not with his beams e'er melt me so;
My dripping locks,—they would become an elf,
Who in a beaded coat does gayly go

40
1842

Smoke

First printed in *The Dial* for April 1843, "Smoke" was reprinted in Chapter XIII of *Walden*.

Light-winged smoke, Icarian bird,
Melting thy pinions in thy upward flight,
Lark without song, and messenger of dawn,
Circling above the hamlets as thy nest;
Or else, departing dream, and shadowy form
Of midnight vision, gathering up thy skirts;
By night star-veiling, and by day
Darkening the light and blotting out the sun;
Go thou my incense upward from this hearth,
And ask the Gods to pardon this clear flame.

10
1843

The Summer Rain • 4 targe, target • 11 battles . . . ants. Thoreau's famous description of the battle between the red and black ants is in Chap. XII of *Walden*

Smoke • 1 Icarian. When Icarus, in Greek mythology, flew too near the sun, the wax of his artificial wings melted, and he fell into the sea and was drowned

Inspiration

Portions of "Inspiration" are found scattered through *A Week on the Concord and Merrimack Rivers*. The poem should be compared with Emerson's "Merlin," p 930, noting especially the views of poetic composition expressed

Whate'er we leave to God, God does,
And blesses us;
The work we choose should be our own,
God leaves alone.

If with light head erect I sing,
Though all the Muses lend their force,
From my poor love of anything,
The verse is weak and shallow as its source.

But if with bended neck I grope
Listening behind me for my wit,
With faith superior to hope,
More anxious to keep back than forward it,

Making my soul accomplice there
Unto the flame my heart hath lit,
Then will the verse forever wear—
Time cannot bend the line which God hath writ.

Always the general show of things
Floats in review before my mind,
And such true love and reverence brings,
That sometimes I forget that I am blind.

But now there comes unsought, unseen,
Some clear divine electuary,
And I, who had but sensual been,
Grow sensible, and as God is, am wary.

I hearing get, who had but ears,
And sight, who had but eyes before,
I moments live, who lived but years,
And truth discern, who knew but learning's lore.

I hear beyond the range of sound,
I see beyond the range of sight,
New earths and skies and seas around,
And in my day the sun doth pale his light.

A clear and ancient harmony
Pierces my soul through all its din,
As through its utmost melody,—
Farther behind than they, farther within.

More swift its bolt than lightning is,
Its voice than thunder is more loud,
It doth expand my privacies
To all, and leave me single in the crowd.

Walden Pond in Summer

It speaks with such authority,
With so serene and lofty tone,
That idle Time runs gadding by,
And leaves me with Eternity alone.

Now chiefly is my natal hour,
And only now my prime of life;
Of manhood's strength it is the flower,
'Tis peace's end and war's beginning strife

It comes in summer's broadest noon,
By a grey wall or some chance place,
Unseasoning Time, insulting June,
And vexing day with its presuming face.

Such fragrance round my couch it makes,
More rich than are Arabian drugs,
That my soul scents its life and wakes
The body up beneath its perfumed rugs.

Such is the Muse, the heavenly maid,
The star that guides our mortal course,
Which shows where life's true kernel's laid,
Its wheat's fine flour, and its undying force.

She with one breath attunes the spheres,
And also my poor human heart,
With one impulse propels the years
Around, and gives my throbbing pulse its start.

I will not doubt for evermore,
Nor falter from a steadfast faith,
For though the system be turned o'er,
God takes not back the word which once He saith.

I will not doubt the love untold
Which not my worth nor want has bought,
Which wooed me young, and woos me old,
And to this evening hath me brought.

My memory I'll educate
To know the one historic truth,
Remembering to the latest date
The only true and sole immortal youth

Be but thy inspiration given,
No matter through what danger sought,

I'll fathom hell or climb to heaven,
And yet esteem that cheap which love has bought. 80

Fame cannot tempt the bard
Who's famous with his God,
Nor laurel him reward
Who has his Maker's nod.

1849

50

Though All the Fates

In the paragraph which precedes the poem, Thoreau tells of talking with some boatmen on the Merrimack who intended, when they reached the coast, possibly to embark for "the China seas." "What grievance," he asks, "has its root among the New Hampshire hills? . . . What is wanting to human life here, that these men should make haste to the antipodes?" (See *A Week on the Concord and Merrimack Rivers*.)

60

Though all the fates should prove unkind,
Leave not your native land behind.
The ship, becalmed, at length stands still;
The steed must rest beneath the hill,
But swiftly still our fortunes pace,
To find us out in every place
The vessel, though her masts be firm,
Beneath her copper bears a worm,
Around the cape, across the line,
Till fields of ice her course confine,
It matters not how smooth the breeze,
How shallow or how deep the seas,
Whether she bears Manilla twine,
Or in her hold Madeira wine,
Or China teas, or Spanish hides,
In port or quarantine she rides;
Far from New England's blustering shore,
New England's worm her hulk shall bore,
And sink her in the Indian seas,
Twine, wine, and hides, and China teas.

HAWTHORNE

Nathaniel Hawthorne

1804 • 1864

Nathaniel Hawthorne's first American ancestor, William Hathorne, came to Massachusetts in 1630 and, as a magistrate of the Bay Colony, was active in the 1650's in the persecution of the Quakers. William Hathorne's son, John, was one of the "witch-judges" at Salem in 1692. The seventeenth-century Hathornes were obviously men of importance, though of a sinister kind. The family declined in prominence during the century which followed. Nathaniel Hawthorne's father, a sea captain, died in Dutch Guiana when Nathaniel was only four years of age, leaving at Salem a widow and three children in reduced circumstances. Hawthorne often thought of William Hathorne, "grave, bearded, sable-cloaked and steeple-crowned progenitor," and of John Hathorne, "so conspicuous in the martyrdom of the witches that their blood may fairly be said to have left a stain upon him." He wondered if their sins might have been to

blame for his family's decline and if he might have inherited some of their guilt. "I take shame upon me for their sakes," he wrote in "The Custom House," prefatory essay to *The Scarlet Letter*, "and pray that the curse incurred by them—as I have heard, and as the dreary and unprosperous condition of the race, for a long year back, would argue to exist—may be now henceforth removed." And yet, however much he might deprecate the cruelties of these early progenitors, however alien and distasteful to them might be a scendant who was "a writer of story-books"), he could not escape his inheritance: "strong traits of their nature he said, 'have intertwined themselves with mine.'"

House

this hereditary sense, no doubt, which explains, at least in part, Hawthorne's preoccupation with the theme of guilt and the somber tone of his stories.

He was graduated from Bowdoin College in 1825. Franklin Pierce was in the class of 1824; Longfellow was a classmate. After graduation, Hawthorne returned to his mother's house in Salem and lived there in comparative seclusion for twelve years. He later thought of himself as having been under a spell of enchantment. In a famous letter to Longfellow, written in 1837, he said "By some witchcraft or other—for I really cannot assign any reasonable why and wherefore—I have been carried apart from the main current of life, and find it impossible to get back again. Since we last met . . . I have secluded myself from society; and yet I never meant any such thing, nor dreamed what sort of life I was going to lead. I have made a captive of myself and put me into a dungeon; and now I cannot find the key to let myself out—and if the door were open, I should be almost afraid to come out . . . There is no fate in this world so horrible as to have no share in either its joys or sorrows. For the last ten years, I have not lived, but only dreamed about living." Those years, however, were not wasted. In his solitary chamber, Hawthorne put himself through a rigorous literary discipline. He read and wrote and destroyed much of what he had written. Recovering from a false start in *Fanshawe* (1828), a short novel based upon life at Bowdoin, he discovered the kind of composition in which he was to excel: the moral and psychological tale. After anonymous publication in magazines, his tales were first collected in *Twice-Told Tales* (1837). If these stories, as their author thought later, "have the pale tint of flowers that blossomed in too retired a shade," they illustrate, nevertheless, Hawthorne's characteristic virtues of sharpness of insight and delicacy of treatment.

We need not regret the twelve solitary years, perhaps they were necessary to Hawthorne's development as an artist. The prolongation of the period of solitude, however, might have endangered both his literary growth and his mental health. Hawthorne evidently feared as much, for soon he was attempting, in his own phrase, "to open an intercourse with the world." In 1839-1840 he was "weigher and gauger" in the Boston Custom House; for several months in 1841 he worked in the potato patch and manure pile at Brook Farm. In the meantime, he had fallen in love with Miss Sophia Peabody, whom he

married in 1842. Love and marriage more than anything else, he felt, saved him from the fate of the solitary. The idyllic life of the newly married pair at the Old Manse is delightfully recorded in *The American Notebooks*.

Hawthorne returned to Salem in 1845; and in 1846 appeared a second collection of tales, entitled *Mosses from an Old Manse*. This volume, like *Twice-Told Tales*, attracted so few readers that it was with some justice that Hawthorne believed himself to be "the obscurest man of letters in America." Because of his financial needs, he was glad to accept an appointment as surveyor in the Salem Custom House. Inasmuch as he held this appointment as a loyal Democrat under the Democratic administration of James K. Polk, he was dismissed from office in 1849, after three years' service, to make room for a Whig incumbent. The loss of this place was a blow to Hawthorne. But adversity discovers virtue. The three years which followed this "misfortune" were the most productive period of his life. *The Scarlet Letter* (1850), an intense, tragic study of the psychological effects of adultery upon four people, made Hawthorne famous. His fame was enhanced by *The House of the Seven Gables* (1851), a study of the decay of an old Salem family, and *The Blithedale Romance* (1852), a satire, in part, on the socialist community at Brook Farm. *The House of the Seven Gables* was written at Lenox, in the Berkshires, where Hawthorne enjoyed the stimulating companionship of Herman Melville.

From 1853 to 1857 Hawthorne was consul at Liverpool, he had been appointed to that post by his old college friend, Franklin Pierce, then President of the United States. The office was not much to Hawthorne's liking, but he made the most of the opportunity of seeing England, his impressions of which he recorded in the posthumously printed *English Notebooks* and in *Our Old Home* (1863), a collection of essays. He spent 1858-1859 in Italy and employed Italian backgrounds in his last complete novel, *The Marble Faun* (1860). He returned in 1860 to "The Wayside" in Concord, which he had purchased a short time before going abroad. The Civil War darkened his last years. He did not share the abolitionist zeal. "I always thought that the war should have been avoided," he said in 1863, "although since it has broken out, I have longed for military success as much as any man or woman of the North." His personal loyalty to Pierce, whose public opposition to the War

seemed treacherous to many, was little short of heroic (see the dedicatory letter in *Our Old Home*). His last attempts at fiction resulted in some interesting works which were still unfinished at his death: *The Ancestral Footstep*, *Septimius Felton*, *Doctor Grimshawe's Secret*, and *The Dolliver Romance*.

Critics of Hawthorne have found a good deal to object to, but more to praise. Henry James, while deprecating Hawthorne's "provincialism" and his "abuse of the fanciful element," declared "No one has had just that vision of life, and no one has had a literary form that more successfully expressed his vision." W. C. Brownell, the severest of Hawthorne's critics, objected to his "placidity" and his obsession with allegory, but found in *The Scarlet Letter* "our chief prose masterpiece." More recently, T. S. Eliot has said (in *The Athenaeum*, April 25, 1919) "Hawthorne had . . . the firmness, the true coldness, the hard coldness of the genuine artist. In consequence, the observation of moral life in *The Scarlet*

Letter, in *The House of the Seven Gables*, and in some of the tales and sketches, has solidity, has presence, the permanence of art. It will always be of use. The work of Hawthorne is truly a criticism—true because a fidelity of the artist and not a mere confession of the man—of the Puritan morality, of the Transcendentalist morality, and of the world which Hawthorne knew. It is a criticism as Henry James's work is a criticism of the America of his times, and as the work of Turgenev and Flaubert is a criticism of the Russia of theirs and the France of theirs." Of all the writers of New England's flowering, Hawthorne seems the most certain to endure.

The Gentle Boy

The author of this story stands apart from the warring sects of early New England. He condemns unbridled fanaticism, whether Puritan or Quaker. He recommends the golden mean of "rational piety."

"The Gentle Boy" was first published in the *Token* for 1832 and was reprinted in *Twice-Told Tales* in 1837. Hawthorne's chief source of historical information was Willem Sewel's *History of the Quakers* (see G. Harrison Orians, "The Sources and Themes of Hawthorne's 'The Gentle Boy,'" *New England Quarterly*, December 1941).

ancient principles, having spread before them, the Puritans early endeavored to banish and to prevent the further intrusion of the rising sect. But the measures which it was intended to purge the land of heresy, though more than sufficiently vigorous, were entirely unsuccessful. The Quakers, esteeming persecution a divine call to the post of danger, laid claim to a courage, unknown to the Puritans themselves, who shunned the Cross, by providing for the peaceable exercise of their religion in a distant wilderness. Thus it was the singular fact that every nation of the earth rejected the wandering enthusiasts who practised persecution towards all men, the place of greatest uneasiness and peril, and therefore in their eyes the most eligible, the province of Massachusetts Bay.

The fines, imprisonments, and stripes, liberally tributed by our pious forefathers; the popular antipathy so strong that it endured nearly a hundred years a

In the course of the year 1656 several of the people called Quakers, led, as they professed, by the inward movement of the Spirit, made their appearance in New England. Their reputation, as holders of mystic and per-

21 our . . . forefathers, prominent among whom was Hawthorne's first American ancestor, William Hathorne. Hawthorne alludes to William Hathorne's acts of persecution in two essays: "Main Street" (in *The Snow Image and Other Twice-Told Tales*) and "The Custom House" (the prefatory essay to *The Scarlet Letter*).

actual persecution had ceased, were attractions as powerful for the Quakers as peace, honor, and reward would have been for the worldly-minded. Every European vessel brought new cargoes of the sect, eager to testify against the oppression which they hoped to share, and when shipmasters were restrained by heavy fines from affording them passage, they made long and circuitous journeys through the Indian country, and appeared in the province as if conveyed by a supernatural power. Their enthusiasm, heightened almost to madness by the treatment which they received, produced actions contrary to the rules of decency as well as of rational religion, and presented a singular contrast to the calm and staid deportment of their sectarian successors of the present day. The command of the Spirit, inaudible except to the soul, and not to be controverted on grounds of human wisdom, was made a plea for most indecorous exhibitions, which, abstractedly considered, well deserved the moderate chastisement of the rod. These extravagances, and the persecution which was at once their cause and consequence, continued to increase, till, in the year 1659, the Government of Massachusetts Bay indulged two members of the Quaker sect with the crown of martyrdom.

An indelible stain of blood is upon the hands of all who consented to this act, but a large share of the awful responsibility must rest upon the person then at the head of the government. He was a man of narrow mind and imperfect education, and his uncompromising bigotry was made hot and mischievous by violent and hasty passions; he exerted his influence indecorously and unjustifiably to compass the death of the enthusiasts, and his whole conduct in respect to them was marked by brutal cruelty. The Quakers, whose revengeful feelings were not less deep because they were inactive, remembered this man and his associates in aftertimes. The historian of the sect affirms that, by the wrath of Heaven, a blight fell upon the land in the vicinity of the "bloody town" of Boston, so that no wheat would grow there, and he takes his stand, as it were, among the graves of the ancient persecutors, and triumphantly recounts the judgments that overtook them in old age or at the parting hour. He tells us that they died suddenly, and violently, and in madness; but nothing can exceed the utter mockery with which he records the loathsome disease and "death by rottenness" of the fierce and cruel governor.

On the evening of the autumn day that had witnessed the martyrdom of two men of the Quaker persuasion, a Puritan settler was returning from the metropolis to the neighboring country town in which he resided. The 50 air was cool, the sky clear, and the lingering twilight was made brighter by the rays of a young moon, which had now nearly reached the verge of the horizon. The traveller, a man of middle age, wrapped in a grey frieze coat, quickened his pace when he had reached the outskirts of the town, for a gloomy extent of nearly four miles lay between him and his home. The low, straw-thatched houses were scattered at considerable intervals along the road, and the country having been settled but about thirty years, the tracts of original forest still bore 60 no small proportion to the cultivated ground. The autumn wind wandered among the branches, whirling away the leaves from all except the pine-trees, and moaning as if it lamented the desolation of which it was the instrument. The road had penetrated the mass of woods that lay nearest to the town, and was just emerging into an open space, when the traveller's ears were saluted by a sound more mournful than even that of the wind. It was like the wailing of some one in distress, and it seemed to proceed from beneath a tall and lonely fir tree, 70 in the centre of a cleared, but uninclosed and uncultivated field. The Puritan could not but remember that this was the very spot which had been made accursed a few hours before by the execution of the Quakers, whose bodies had been thrown together into one hasty grave, beneath the tree on which they suffered. He struggled, however, against the superstitious fears which belonged to the age, and compelled himself to pause and listen.

"The voice was most likely mortal, nor have I cause to tremble if it be otherwise," thought he, straining his 80 eyes through the dim moonlight. "Methinks it is like the wailing of a child, some infant, it may be, which has strayed from its mother, and chanced upon the place of death. For the ease of mine own conscience, I must search this matter out."

He therefore left the path, and walked somewhat fearfully across the field. Though now so desolate, its soil was pressed down and trampled by the thousand

footsteps of those who had witnessed the spectacle of that day, all of whom had now retired, leaving the dead to their loneliness. The traveller at length reached the fir tree, which from the middle upward was covered with living branches, although a scaffold had been erected beneath, and other preparations made for the work of death. Under this unhappy tree, which in after-times was believed to drop poison with its dew, sat the one solitary mourner for innocent blood. It was a slender and light-clad little boy, who leaned his face upon a hillock of fresh-turned and half-frozen earth, and wailed bitterly, yet in a suppressed tone, as if his grief might receive the punishment of crime. The Puritan, whose approach had been unperceived, laid his hand upon the child's shoulder, and addressed him compassionately.

You have chosen a dreary lodging, my poor boy, and no wonder that you weep," said he. "But dry your eyes, and tell me where your mother dwells. I promise you, if the journey be not too far, I will leave you in her arms to-night."

The boy had hushed his wailing at once, and turned his face upward to the stranger. It was a pale, bright-eyed countenance, certainly not more than six years old, but sorrow, fear, and want, had destroyed much of its infantile expression. The Puritan, seeing the boy's frightened gaze, and feeling that he trembled under his hand, endeavored to reassure him.

"Nay, if I intended to do you harm, little lad, the readiest way were to leave you here. What! you do not fear to sit beneath the gallows on a new-made grave, and yet you tremble at a friend's touch. Take heart, child, and tell me what is your name, and where is your home?"

"Friend," replied the little boy, in a sweet, though faltering voice, "they call me Ilbrahim, and my home is here."

The pale, spiritual face, the eyes that seemed to mingle with the moonlight, the sweet, airy voice, and the outlandish name, almost made the Puritan believe that the boy was in truth a being which had sprung up out of the grave on which he sat. But perceiving that the apparition stood the test of a short mental prayer, and remembering that the arm which he had touched was life-like, he adopted a more rational supposition. "The poor child is stricken in his intellect," thought he; "but verily his words are fearful, in a place like this." He then spoke soothingly, intending to humor the boy's fantasy.

"Your home will scarce be comfortable, Ill this cold autumn night, and I fear you are ill provided with food. I am hastening to a warm supper and if you will go with me, you shall share them!"

"I thank thee, friend, but though I be hung shivering with cold, thou wilt not give me food for lodging," replied the boy, in the quiet tone which his father had taught him even so young. "My father taught the people whom all men hate. They have laid him in this heap of earth, and here is my home."

The Puritan, who had laid hold of little Ilbrahim's hand, relinquished it as if he were touching a loathsome reptile. But he possessed a compassionate heart, and not even religious prejudice could harden into stone.

"God forbid that I should leave this child to perish, though he comes of the accursed sect," said he to himself. "Do we not all spring from an evil root? Are we not in darkness till the light doth shine upon us? He will not perish, neither in body, nor, if prayer and instruction may avail for him, in soul." He then spoke aloud kindly to Ilbrahim, who had again hid his face in the cold earth of the grave. "Was every door in the world shut against you, my child, that you have wandered thus unhallowed spot?"

"They drove me forth from prison when they took my father thence," said the boy; "and I stood afar off, watching the crowd of people, and when they were gathered thither and found only his grave. I knew that my father was sleeping here, and I said, this shall be my home."

"No, child, no, not while I have a roof over my head or a morsel to share with you!" exclaimed the Puritan, whose sympathies were now fully excited. "Rise up and come with me, and fear not any harm."

The boy wept afresh, and clung to the heap of earth as if the cold heart beneath it were warmer to him than any in a living breast. The traveller, however, continued to entreat him tenderly, and seeming to acquire a degree of confidence, he at length arose. But his slender limbs tottered with weakness, his little head grew dizzy, and he leaned against the tree of death for support.

"My poor boy, are you so feeble?" said the Puritan. "When did you taste food last?"

"I ate bread and water with my father in the prison," replied Ilbrahim, "but they brought him none neither yesterday nor to-day, saying that he had eaten enough."

bear him to his journey's end. Trouble not thyself for my hunger, kind friend, for I have lacked food many times ere now."

The traveller took the child in his arms and wrapped his cloak about him, while his heart stirred with shame and anger against the gratuitous cruelty of the instruments in this persecution. In the awakened warmth of his feelings, he resolved that, at whatever risk, he would not forsake the poor little defenseless being whom Heaven had confided to his care. With this determination he left the accursed field, and resumed the homeward path from which the wailing of the boy had called him. The light and motionless burthen scarcely impeded his progress, and he soon beheld the fire-rays from the windows of the cottage which he, a native of a distant clime, had built in the western wilderness. It was surrounded by a considerable extent of cultivated ground, and the dwelling was situated in the nook of a wood-covered hill, whither it seemed to have crept for protection.

"Look up, child," said the Puritan to Ilbrahim, whose faint head had sunk upon his shoulder; "there is our home."

At the word, "home," a thrill passed through the child's frame, but he continued silent. A few moments brought them to the cottage door, at which the owner knocked; for at that early period, when savages were wandering everywhere among the settlers, bolt and bar were indispensable to the security of a dwelling. The summons was answered by a bond-servant, a coarse-clad and dull-featured piece of humanity, who, after ascertaining that his master was the applicant, undid the door, and held a flaring pine-knot torch to light him in. Farther back in the passage-way the red blaze discovered a matronly woman, but no little crowd of children came bounding forth to greet their father's return. As the Puritan entered, he thrust aside his cloak, and displayed Ilbrahim's face to the female.

"Dorothy, here is a little outcast, whom Providence hath put into our hands," observed he. "Be kind to him, even as if he were of those dear ones who have departed from us."

"What pale and bright-eyed little boy is this, Tobias?" she inquired. "Is he one whom the wilderness folk have ravished from some Christian mother?"

"No, Dorothy, this poor child is no captive from the wilderness," he replied. "The heathen savage would have

given him to eat of his scanty morsel, and to drink of his birchen cup, but Christian men, alas! had cast him out to die."

Then he told her how he had found him beneath the gallows, upon his father's grave; and how his heart had prompted him, like the speaking of an inward voice, to take the little outcast home, and be kind to him. He acknowledged his resolutions to feed and clothe him, as if he were his own child, and to afford him the instruction which should counteract the pernicious errors hitherto instilled into his infant mind. Dorothy was gifted with even a quicker tenderness than her husband, and she approved of all of his doings and intentions.

"Have you a mother, dear child?" she inquired.

The tears burst forth from his full heart as he attempted to reply; but Dorothy at length understood that he had a mother, who, like the rest of her sect, was a persecuted wanderer. She had been taken from the prison a short time before, carried into the uninhabited wilderness, and left to perish there by hunger or wild beasts, this was no uncommon method of disposing of the Quakers, and they were accustomed to boast that the inhabitants of the desert were more hospitable to them than civilized man.

"Fear not, little boy, you shall not need a mother, and a kind one," said Dorothy, when she had gathered this information. "Dry your tears, Ilbrahim, and be my child, as I will be your mother."

The good woman prepared the little bed from which her own children had successively been borne to another resting-place. Before Ilbrahim would consent to occupy it, he knelt down, and as Dorothy listened to his simple and affecting prayer, she marvelled how the parents that had taught it to him could have been judged worthy of death. When the boy had fallen asleep, she bent over his pale and spiritual countenance, pressed a kiss upon his white brow, drew the bedclothes up about his neck, and went away with a pensive gladness in her heart.

Tobias Pearson was not among the earliest emigrants from the old country. He had remained in England during the first years of the civil war, in which he had borne some share as a corner of dragoons under Cromwell. But when the ambitious designs of his leader began

to develop themselves, he quitted the army of the parliament and sought a refuge from the strife, which was no longer holy, among the people of his persuasion in the colony of Massachusetts. A more worldly consideration had perhaps an influence in drawing him thither, for New England offered advantages to men of unprosperous fortunes as well as to dissatisfied religionists, and Pearson had hitherto found it difficult to provide for a wife and increasing family. To this supposed impurity of
10 motive, the more bigoted Puritans were inclined to impute the removal by death of all the children for whose earthly good the father had been over-thoughtful. They had left their native country blooming like roses, and like roses they had perished in a foreign soil. Those expounders of the ways of Providence, who had thus judged their brother, and attributed his domestic sorrows to his sin, were not more charitable when they saw him and Dorothy endeavoring to fill up the void in their hearts, by the adoption of an infant of the accursed sect. Nor
20 did they fail to communicate their disapprobation to Tobias, but the latter, in reply, merely pointed at the little, quiet, lovely boy, whose appearance and deportment were indeed as powerful arguments as could possibly have been adduced in his own favor. Even his beauty, however, and his winning manners, sometimes produced an effect ultimately unfavorable, for the bigots, when the outer surfaces of their iron hearts had been softened and again grew hard, affirmed that no merely natural cause could have so worked upon them.
30 Their antipathy to the poor infant was also increased by the ill success of divers theological discussions, in which it was attempted to convince him of the errors of his sect. Ilbrahim, it is true, was not a skilful controversialist, but the feeling of his religion was strong as instinct in him, and he could neither be enticed nor driven from the faith which his father had died for. The odium of this stubbornness was shared in a great measure by the child's protectors, insomuch that Tobias and Dorothy very shortly began to experience a most bitter
40 species of persecution, in the cold regards of many a friend whom they had valued. The common people manifested their opinions more openly. Pearson was a man of some consideration, being a Representative to the General Court, and an approved Lieutenant in the trainbands, yet within a week after his adoption of Ilbrahim, he had been both hissed and hooted. Once, also, when

walking through a solitary piece of woods, he heard a loud voice from some invisible speaker, and it said, "What shall be done to the backslider? Lo! the scroll is knotted for him, even the whip of nine cords, every cord three knots!" These insults irritated Pearson for the moment; they entered also into his heart, and became imperceptible but powerful workers toward an end which his most secret thought had not whispered.

On the second Sabbath after Ilbrahim became a member of their family, Pearson and his wife deemed it proper that he should appear with them at public worship. He had anticipated some opposition to this measure on the part of the boy, but he prepared himself in silence, and at the appointed hour was clad in the new mourning suit which Dorothy had wrought for him. As the parish was thickly attended, and during many subsequent years, unprovided with a bell, the signal for the commencement of religious exercises was the beat of a drum. At the first sound of martial call to the place of holy and quiet thought, Tobias and Dorothy set forth, each holding a hand to the little Ilbrahim, like two parents linked together by the infant of their love. On their path through the leafy woods, they were overtaken by many persons of their acquaintance, all of whom avoided them, and passed on the other side; but a severer trial awaited their constancy when they had descended the hill, and drew near the pine-built and undecorated house of prayer. Around the door, from which the drummer still sent forth thundering summons, was drawn up a formidable phalanx, including several of the oldest members of the congregation, many of the middle-aged, and nearly all the younger males. Pearson found it difficult to sustain the united and disapproving gaze, but Dorothy, whose mind was differently circumstanced, merely drew the child closer to her, and faltered not in her approach. As they entered the door, they overheard the muttered sentiment of the assemblage, and when the reviling voices of the little children smote Ilbrahim's ear, he wept.

The interior aspect of the meeting-house was rude. The low ceiling, the unplastered walls, the naked wood-work, and the undraped pulpit, offered nothing to excite devotion, which, without such external aids, often remains latent in the heart. The floor of the building was occupied by rows of long, cushionless benches, supplying the place of pews, and the broad aisle formed

sexual division, impassable except by children beneath a certain age.

Pearson and Dorothy separated at the door of the meeting-house, and Ibrahim, being within the years of infancy, was retained under the care of the latter. The wrinkled beldams involved themselves in their rusty cloaks as he passed by, even the mild-featured maidens seemed to dread contamination, and many a stern old man arose, and turned his repulsive and unheavenly countenance upon the gentle boy, as if the sanctuary were polluted by his presence. He was a sweet infant of the skies that had strayed away from his home, and all the inhabitants of this miserable world closed up their impure hearts against him, drew back their earth-soiled garments from his touch, and said, "We are holier than thou"

Ibrahim, seated by the side of his adopted mother, and retaining fast hold of her hand, assumed a grave and decorous demeanor, such as might befit a person of matured taste and understanding, who should find himself in a temple dedicated to some worship which he did not recognize, but felt himself bound to respect. The exercises had not yet commenced, however, when the boy's attention was arrested by an event, apparently of trifling interest. A woman having her face muffled in a hood, and a cloak drawn completely about her form, advanced slowly up the broad aisle, and took a place upon the foremost bench. Ibrahim's faint color varied, his nerves fluttered, he was unable to turn his eyes from the muffled female

When the preliminary prayer and hymn were over, the minister arose, and having turned the hour-glass which stood by the great Bible, commenced his discourse. He was now well stricken in years, a man of pale, thin countenance, and his grey hairs were closely covered by a black velvet skull-cap. In his younger days he had practically learned the meaning of persecution from Archbishop Laud, and he was not now disposed to forget the lesson against which he had murmured then. Introducing the often-discussed subject of the Quakers, he gave a history of that sect, and a description of their tenets, in which error predominated, and prejudice distorted the aspect of what was true. He adverted to the recent measures in the province, and cautioned his hearers of weaker parts against calling in question the just severity which God-fearing magistrates had at length been compelled to exercise. He spoke of the danger of pity, in some cases a commendable and Christian virtue but inapplicable to

this pernicious sect. He observed that such was their devilish obstinacy in error, that even the little children, the sucking babes, were hardened and desperate heretics. He affirmed that no man, without Heaven's especial warrant, should attempt their conversion, lest while he lent his hand to draw them from the slough, he should himself be precipitated into its lowest depths

The sands of the second hour were principally in the lower half of the glass, when the sermon concluded. An approving murmur followed, and the clergyman, having given out a hymn, took his seat with much self-congratulation, and endeavored to read the effect of his eloquence in the visages of the people. But while voices from all parts of the house were tuning themselves to sing, a scene occurred which, though not very unusual at that period in the province, happened to be without precedent in this parish

The muffled female, who had hitherto sat motionless in the front rank of the audience, now arose, and with slow, stately, and unwavering step, ascended the pulpit stairs. The quiverings of incipient harmony were hushed, and the divine sat in speechless and almost terrified astonishment, while she undid the door, and stood up in the sacred desk from which his maledictions had just been thundered. She then divested herself of the cloak and hood, and appeared in a most singular array. A shapeless robe of sackcloth was girded about her waist with a knotted cord, her raven hair fell down upon her shoulders, and its blackness was defiled by pale streaks of ashes, which she had strewn upon her head. Her eyebrows, dark and strongly defined, added to the deathly whiteness of a countenance, which, emaciated with want, and wild with enthusiasm and strange sorrows, retained no trace of earlier beauty. This figure stood gazing earnestly on the audience, and there was no sound, nor any movement, except a faint shuddering which every man observed in his neighbor, but was scarcely conscious of in himself. At length, when her fit of inspiration came, she spoke, for the first few moments, in a low voice, and not invariably distinct utterance. Her discourse gave evidence of an imagination hopelessly entangled

6 involved, wrapped, enveloped (a Latinism) • 35 Archbishop Laud, William Laud (1573-1645), Archbishop of Canterbury, whose acts of persecution caused many of the early Puritans to leave England

... reason, it was a vague and incomprehensible rhapsody, which, however, seemed to spread its own atmosphere round the hearer's soul, and to move his feeling by some influence unconnected with the words. As she proceeded, beautiful but shadowy images would sometimes be seen, like bright things moving in a turbid river, or a strong and singularly shaped idea leapt forth, and seized at once on the understanding or the heart. But the course of her unearthly eloquence soon led
10 her to the persecution of her sect, and from thence the step was short to her own peculiar sorrows. She was naturally a woman of mighty passions, and hatred and revenge now wrapped themselves in the garb of piety, the character of her speech was changed, her images became distinct though wild, and her denunciations had an almost hellish bitterness.

"The governor and his mighty men," she said, "have gathered together, taking counsel among themselves and saying, 'What shall we do unto this people—even unto
20 the people that have come into this land to put our iniquity to the blush?' And lo! the devil entereth into the council-chamber, like a lame man of low stature and gravely apparelled, with a dark and twisted countenance, and a bright, downcast eye. And he standeth up among the rulers, yea, he goeth to and fro, whispering to each, and every man lends his ear, for his word is, 'Slay, slay!' But I say unto ye, Woe to them that slay! Woe to them that shed the blood of saints! Woe to them that have slain the husband, and cast forth the child, the tender infant,
30 to wander homeless, and hungry, and cold, till he die; and have saved the mother alive, in the cruelty of their tender mercies! Woe to them in their lifetime, cursed are they in the delight and pleasure of their hearts! Woe to them in their death-hour, whether it come swiftly with blood and violence, or after long and lingering pain! Woe, in the dark house, in the rottenness of the grave, when the children's children shall revile the ashes of the fathers! Woe, woe, woe, at the judgment, when all the persecuted and all the slain in this bloody land,
40 and the father, the mother, and the child, shall await them in the day that they cannot escape! Seed of the faith, seed of the faith, ye whose hearts are moving with a power that ye know not, arise, wash your hands of this innocent blood! Lift your voices, chosen ones, cry aloud, and call down a woe and a judgment with me!"

Having thus given vent to the flood of malignity which

she mistook for inspiration, the speaker was silent. Her voice was succeeded by the hysteric shrieks of the women, but the feelings of the audience generally had not been drawn onward in the current with her. They remained stupefied, stranded, as it were, in the midst of a torrent, which deafened them by its roar but might not move them by its violence. The clergyman, who could not hitherto have ejected the usurper from his pulpit otherwise than by bodily force, now addressed her in the tone of just indignation and legitimate authority.

"Get you down, woman, from the holy place which you profane," he said. "Is it to the Lord's house that you come to pour forth the foulness of your heart, and to draw inspiration of the devil? Get you down, and remember that the sentence of death is on you; yea, and shall be executed, were it but for this day's work!"

"I go, friend, I go, for the voice hath had its utterance," replied she, in a depressed and even mild tone. "I have done my mission unto thee and to thy people. Revive me with stripes, imprisonment, or death, as ye shall permit."

The weakness of exhausted passion caused her to totter as she descended the pulpit stairs. The people in the meanwhile were stirring to and fro on the floor of the house, whispering among themselves and glancing towards the intruder. Many of them now recognized as the woman who had assaulted the governor with her frightful language as he passed by the window of prison, they knew, also, that she was adjudged to suffer death, and had been preserved only by an involuntary banishment into the wilderness. The new outrage which she had provoked her fate seemed to render further lenity impossible; and a gentleman in military dress, with a stout man of inferior rank, drew towards the door of the meeting-house and awaited her approach. Scarcely did her feet press the floor, however, when an unexpected scene occurred. In that moment of her passage when every eye frowned with death, a little timid boy pressed forth and threw his arms round his mother.

"I am here, mother—it is I; and I will go with thee to prison," he exclaimed.

She gazed at him with a doubtful and almost frightened expression, for she knew that the boy had been called out to perish, and she had not hoped to see his face again. She feared, perhaps, that it was but one of the

happy visions with which her excited fancy had often deceived her, in the solitude of the desert or in prison. But when she felt his hand warm within her own, and heard his little eloquence of childish love, she began to know that she was yet a mother.

"Blessed art thou, my son," she sobbed "My heart was withered; yea, dead with thee and with thy father; and now it leaps as in the first moment when I pressed thee to my bosom."

She knelt down and embraced him again and again, while the joy that could find no words expressed itself in broken accents, like the bubbles gushing up to vanish at the surface of a deep fountain. The sorrows of past years, and the darker peril that was nigh, cast not a shadow on the brightness of that fleeting moment. Soon, however, the spectators saw a change upon her face, as the consciousness of her sad estate returned, and grief supplanted the fount of tears which joy had opened. By the words she uttered, it would seem that the indulgence of natural love had given her mind a momentary sense of its errors, and made her know how far she had strayed from duty in following the dictates of a wild fanaticism.

"In a doleful hour art thou returned to me, poor boy," she said, "for thy mother's path has gone darkening onward till now the end is death. Son, son, I have borne thee in my arms when my limbs were tottering, and I have fed thee with the food that I was fainting for, yet have ill performed a mother's part by thee in life, and now I leave thee no inheritance but woe and shame. Thou wilt go seeking through the world, and find all hearts closed against thee, and their sweet affections turned to bitterness for my sake. My child, my child, how many a pang awaits thy gentle spirit, and I the cause of all!"

She hid her face on Ibrahim's head, and her long, raven hair, discolored with the ashes of her mourning, fell down about him like a veil. A low and interrupted moan was the voice of her heart's anguish, and it did not fail to move the sympathies of many who mistook their involuntary virtue for a sin. Sobs were audible in the female section of the house, and every man who was a father drew his hand across his eyes. Tobias Pearson was agitated and uneasy, but a certain feeling like the consciousness of guilt oppressed him, so that he could not go forth and offer himself as the protector of the child. Dorothy, however, had watched her husband's

eye. Her mind was free from the influence that had begun to work on his, and she drew near the Quaker woman, and addressed her in the hearing of all the congregation.

"Stranger, trust this boy to me, and I will be his mother," she said, taking Ibrahim's hand "Providence has signally marked out my husband to protect him, and he has fed at our table and lodged under our roof now many days, till our hearts have grown very strongly unto him. Leave the tender child with us, and be at ease concerning his welfare."

The Quaker rose from the ground, but drew the boy closer to her while she gazed earnestly in Dorothy's face. Her mild, but saddened features, and neat, matronly attire, harmonized together, and were like a verse of fire-side poetry. Her very aspect proved that she was blameless, so far as mortal could be so, in respect to God and man, while the enthusiast, in her robe of sackcloth and girdle of knotted cord, had as evidently violated the duties of the present life and the future, by fixing her attention wholly on the latter. The two females, as they held each a hand of Ibrahim, formed a practical allegory; it was rational piety and unbridled fanaticism contending for the empire of a young heart.

"Thou art not of our people," said the Quaker, mournfully.

"No, we are not of your people," replied Dorothy with mildness, "but we are Christians, looking upward to the same Heaven with you. Doubt not that your boy shall meet you there, if there be a blessing on our tender and prayerful guidance of him. Thither, I trust, my own children have gone before me, for I also have been a mother. I am no longer so," she added, in a faltering tone, "and your son will have all my care."

"But will ye lead him in the path which his parents have trodden?" demanded the Quaker. "Can ye teach him the enlightened faith which his father has died for, and for which I, even I, am soon to become an unworthy

64 enthusiast implied irrational and fanatical emotion and was a term of reproach in seventeenth-century Puritan usage as well as in the usage of eighteenth-century Neoclassicism • 68 allegory. Hawthorne's allegorical characters recall similar figures in Spenser's *Faerie Queene*, Bk. II, Canto II, where Elissa and Perissa represent opposite extremes of temperament and "the faire Medina" represents the golden mean. For a discussion of Spenser's influence on Hawthorne, see Randall Stewart, "Hawthorne and *The Faerie Queene*," *Philological Quarterly*, April 1933.

martyr.' The boy has been baptised in blood; will ye keep the mark fresh and ruddy upon his forehead?"

"I will not deceive you," answered Dorothy. "If your child become our child, we must breed him up in the instruction which Heaven has imparted to us, we must pray for him the prayers of our own faith, we must do towards him according to the dictates of our own consciences, and not of yours. Were we to act otherwise, we should abuse your trust even in complying with your wishes."

The mother looked down upon her boy with a troubled countenance, and then turned her eyes upward to heaven. She seemed to pray internally, and the contention of her soul was evident.

"Friend," she said at length to Dorothy, "I doubt not that my son shall receive all earthly tenderness at thy hands. Nay, I will believe that even thy imperfect lights may guide him to a better world, for surely thou art on the path thither. But thou hast spoken of a husband. Doth he stand here among this multitude of people? Let him come forth, for I must know to whom I commit this most precious trust."

She turned her face upon the male auditors, and after a momentary delay, Tobias Pearson came forth from among them. The Quaker saw the dress which marked his military rank, and shook her head, but then she noted the hesitating air, the eyes that struggled with her own, and were vanquished, the color that went and came, and could find no resting-place. As she gazed, an unmirthful smile spread over her features, like sunshine that grows melancholy in some desolate spot. Her lips moved inaudibly, but at length she spake.

"I hear it, I hear it. The voice speaketh within me and saith, 'Leave thy child, Catherine, for his place is here, and go hence, for I have other work for thee. Break the bonds of natural affection, martyr thy love, and know that in all these things eternal wisdom hath its ends.' I go, friends, I go. Take ye my boy, my precious jewel. I go hence, trusting that all shall be well, and that even for his infant hands there is a labor in the vineyard."

She knelt down and whispered to Ibrahim, who at first struggled and clung to his mother, with sobs and tears but remained passive when she had kissed his cheek and arisen from the ground. Having held her hands over his head in mental prayer, she was ready to depart.

"Farewell, friends in mine extremity," she said to Pearson and his wife; "the good deed ye have done is a treasure laid up in heaven, to be returned a thousand fold hereafter. And farewell ye, mine enemies, to it is not permitted to harm so much as a hair of mine head to stay my footsteps even for a moment. This is coming when ye shall call upon me to witness ye to this one sin uncommitted, and I will rise and answer."

She turned her steps towards the door, and the men who had stationed themselves to guard it, withstood and suffered her to pass. A general sentiment of awe overcame the virulence of religious hatred. Sanctioned by her love and her affliction, she went forth, and the people gazed after her till she had journeyed a mile, and was lost behind its brow. She went, the angel of her own unquiet heart, to renew the wanderings of past years. For her voice had been already heard in the lands of Christendom; and she had pined in the dungeons of Catholic Inquisition, before she felt the last lay in the dungeons of the Puritans. Her mission extended also to the followers of the Prophet, and to them she had received the courtesy and kindness of all the contending sects of our purer religion united to deny her. Her husband and herself had resided several months in Turkey, where even the Sultan's countenance was gracious to them, in that pagan land, too, Ibrahim's birthplace, and his oriental name was a pledge of gratitude for the good deeds of an unbeliever.

When Pearson and his wife had thus acquired the rights over Ibrahim that could be delegated, his affection for him became, like the memory of their native land, or their mild sorrow for the dead, a piece of immovable furniture of their hearts. The boy, also, in a week or two of mental disquiet, began to gratify his protectors by many inadvertent proofs that he considered them as parents, and their house as home. Before the winter snows were melted, the persecuted infant, little wanderer from a remote and heathen country, seemed native in the New England cottage, and separable from the warmth and security of its hearth. Under the influence of kind treatment, and in the consciousness that he was loved, Ibrahim's demeanor

a premature manliness, which had resulted from his earlier situation; he became more childlike, and his natural character displayed itself with freedom. It was in many respects a beautiful one, yet the disordered imaginations of both his father and mother had perhaps propagated a certain unhealthiness in the mind of the boy. In his general state, Ilbrahim would derive enjoyment from the most trifling events, and from every object about him, he seemed to discover rich treasures of happiness, by a faculty analogous to that of the witch-hazel, which points to hidden gold where all is barren to the eye. His airy gaiety, coming to him from a thousand sources, communicated itself to the family, and Ilbrahim was like a domesticated sunbeam, brightening moody countenances, and chasing away the gloom from the dark corners of the cottage.

On the other hand, as the susceptibility of pleasure is also that of pain, the exuberant cheerfulness of the boy's prevailing temper sometimes yielded to moments of deep depression. His sorrows could not always be followed up to their original source, but most frequently they appeared to flow, though Ilbrahim was young to be sad for such a cause, from wounded love. The flightiness of his mirth rendered him often guilty of offences against the decorum of a Puritan household, and on these occasions he did not invariably escape rebuke. But the slightest word of real bitterness, which he was infallible in distinguishing from pretended anger, seemed to sink into his heart and poison all his enjoyments, till he became sensible that he was entirely forgiven. Of the malice which generally accompanies a superfluity of sensitiveness Ilbrahim was altogether destitute, when trodden upon, he would not turn, when wounded, he could but die. His mind was wanting in the stamina for self-support, it was a plant that would twine beautifully round something stronger than itself, but if repulsed, or torn away, it had no choice but to wither on the ground. Dorothy's acuteness taught her that severity would crush the spirit of the child, and she nurtured him with the gentle care of one who handles a butterfly. Her husband manifested an equal affection, although it grew daily less productive of familiar caresses.

The feelings of the neighboring people, in regard to the Quaker infant and his protectors, had not undergone a favorable change, in spite of the momentary triumph which the desolate mother had obtained over

their sympathies. The scorn and bitterness of which he was the object were very grievous to Ilbrahim, especially when any circumstance made him sensible that the children, his equals in age, partook of the enmity of their parents. His tender and social nature had already overflowed in attachments to everything about him, and still there was a residue of unappropriated love, which he yearned to bestow upon the little ones who were taught to hate him. As the warm days of spring came on, Ilbrahim was accustomed to remain for hours, silent and inactive, within hearing of the children's voices at their play, yet, with his usual delicacy of feeling, he avoided their notice, and would flee and hide himself from the smallest individual among them. Chance, however, at length seemed to open a medium of communication between his heart and theirs, it was by means of a boy about two years older than Ilbrahim, who was injured by a fall from a tree in the vicinity of Pearson's habitation. As the sufferer's own home was at some distance, Dorothy willingly received him under her roof, and became his tender and careful nurse.

Ilbrahim was the unconscious possessor of much skill in physiognomy, and it would have deterred him, in other circumstances, from attempting to make a friend of this boy. The countenance of the latter immediately impressed a beholder disagreeably, but it required some examination to discover that the cause was a very slight distortion of the mouth, and the irregular, broken line and near approach of the eyebrows. Analogous, perhaps, to those trifling deformities was an almost imperceptible twist of every joint, and the uneven prominence of the breast, forming a body regular in its general outline, but faulty in almost all its details. The disposition of the boy was sullen and reserved, and the village schoolmaster stigmatized him as obtuse in intellect, although, at a later period of life, he evinced ambition and very peculiar talents. But whatever might be his personal or moral irregularities, Ilbrahim's heart seized upon, and clung to him, from the moment that he was brought wounded into the cottage, the child of persecution seemed to compare his own fate with that of the sufferer, and to feel that even different modes of misfortune had created a sort of relation-

14 like . . . sunbeam, a favorite figure of Hawthorne's. See Walter Blair, "Color, Light, and Shadow in Hawthorne's Fiction," *New England Quarterly*, March 1942.

ship between them. Food, rest, and the fresh air, for which he languished, were neglected, he nestled continually by the bedside of the little stranger, and, with a fond jealousy, endeavored to be the medium of all the cares that were bestowed upon him. As the boy became convalescent, Ilbrahim contrived games suitable to his situation, or amused him by a faculty which he had perhaps breathed in with the air of his barbaric birthplace. It was that of reciting imaginary adventures on the spur of the moment, and apparently in exhaustless succession. His tales were of course monstrous, disjointed, and without aim, but they were curious, on account of a vein of human tenderness which ran through them all, and was like a sweet, familiar face encountered in the midst of wild and unearthly scenery. The auditor paid much attention to these romances, and sometimes interrupted them by brief remarks upon the incidents, displaying shrewdness above his years, mingled with a moral obliquity which grated very harshly against Ilbrahim's instinctive rectitude. Nothing, however, could arrest the progress of the latter's affection, and there were many proofs that it met with a response from the dark and stubborn nature on which it was lavished. The boy's parents at length removed him, to complete his cure under their own roof.

Ilbrahim did not visit his new friend after his departure, but he made anxious and continual inquiries respecting him, and informed himself of the day when he was to reappear among his playmates. On a pleasant summer afternoon, the children of the neighborhood had assembled in the little forest-crowned amphitheatre behind the meeting-house, and the recovering invalid was there, leaning on a staff. The glee of a score of untainted bosoms was heard in light and airy voices, which danced among the trees like sunshine become audible, the grown men of this weary world, as they journeyed by the spot, marvelled why life, beginning in such brightness, should proceed in gloom, and their hearts, or their imaginations, answered them and said, that the bliss of childhood gushes from its innocence. But it happened that an unexpected addition was made to the heavenly little band. It was Ilbrahim, who came towards the children with a look of sweet confidence on his fair and spiritual face, as if, having manifested his love to one of them, he had no longer to fear a repulse from their society. A hush came over their mirth the moment they beheld him, and they stood whispering to each other while he drew nigh; but

all at once the devil of their fathers entered into unbreeched fanatics, and sending up a fierce shrill they rushed upon the poor Quaker child. In an instant he was the centre of a brood of baby-fiends, who laid sticks against him, pelted him with stones, and displayed an instinct of destruction far more loathsome than bloodthirstiness of manhood.

The invalid in the meanwhile stood apart from the mult, crying out with a loud voice, "Fear not, Ilbrahim, come hither and take my hand;" and his unhappy friend endeavored to obey him. After watching the victim struggling approach with a calm smile and unabated eye, the foul-hearted little villain lifted his staff and struck Ilbrahim on the mouth so forcibly that the blood issued in a stream. The poor child's arms had been raised to guard his head from the storm of blows, but now dropped them at once. His persecutors beat him down, trampled upon him, dragged him by his long, fair locks, and Ilbrahim was on the point of becoming as veritable a martyr as ever entered bleeding into heaven. The uproar, however, attracted the notice of a few neighbors, who put themselves to the trouble of rescuing the little hero, and of conveying him to Pearson's door.

Ilbrahim's bodily harm was severe, but long and careful nursing accomplished his recovery, the injury done to his sensitive spirit was more serious, though not so visible. Its signs were principally of a negative character, and could be discovered only by those who had previously known him. His gait was thenceforth slow, even, and unvaried by the sudden bursts of sprightlier motion which had once corresponded to his overflowing gladness, his countenance was heavier, and its former play of expression the dance of sunshine reflected from moving water, was destroyed by the cloud over his existence, his notice was attracted in a far less degree by passing events, and he appeared to find greater difficulty in comprehending what was new to him than at a happier period. A strange, founding his judgment upon these circumstances, would have said that the dulness of the child's intellect would contradict the promise of his features; but the secret was in the direction of Ilbrahim's thoughts, which were brooding within him when they should naturally have been wandering abroad. An attempt of Dorothy to revive his former sportiveness was the single occasion on which his quiet demeanor yielded to a violent display of grief; he burst into passionate weeping, and ran at

hid himself, for his heart had become so miserably sore that even the hand of kindness tortured it like fire. Sometimes, at night and probably in his dreams, he was heard to cry, "Mother! Mother!" as if her place, which a stranger had supplied while Ilbrahim was happy, admitted of no substitute in his extreme affliction. Perhaps, among the many life-weary wretches then upon the earth, there was not one who combined innocence and misery like this poor, broken-hearted infant, so soon the victim of his own heavenly nature.

While this melancholy change had taken place in Ilbrahim, one of an earlier origin and of different character had come to its perfection in his adopted father. The incident with which this tale commences found Pearson in a state of religious dulness, yet mentally disquieted, and longing for a more fervid faith than he possessed. The first effect of his kindness to Ilbrahim was to produce a softened feeling, an incipient love for the child's whole sect; but joined to this, and resulting perhaps from self-suspicion, was a proud and ostentatious contempt of their tenets and practical extravagances. In the course of much thought, however, for the subject struggled irresistibly into his mind, the foolishness of the doctrine began to be less evident, and the points which had particularly offended his reason assumed another aspect, or vanished entirely away. The work within him appeared to go on even while he slept, and that which had been a doubt when he laid down to rest would often hold the place of a truth, confirmed by some forgotten demonstration, when he recalled his thoughts in the morning. But while he was thus becoming assimilated to the enthusiasts, his contempt, in no wise decreasing towards them, grew very fierce against himself; he imagined, also, that every face of his acquaintance wore a sneer, and that every word addressed to him was a gibe. Such was his state of mind at the period of Ilbrahim's misfortune; and the emotions consequent upon that event completed the change, of which the child had been the original instrument.

In the meantime, neither the fierceness of the persecutors, nor the infatuation of their victims, had decreased. The dungeons were never empty, the streets of almost every village echoed daily with the lash; the life of a woman, whose mild and Christian spirit no cruelty could embitter, had been sacrificed; and more innocent blood was yet to pollute the hands that were so often raised in prayer. Early after the Restoration, the English Quakers

represented to Charles II, that a "vein of blood was open in his dominions;" but though the displeasure of the voluptuous king was roused, his interference was not prompt. And now the tale must stride forward over many months, leaving Pearson to encounter ignominy and misfortune; his wife to a firm endurance of a thousand sorrows; poor Ilbrahim to pine and droop like a cankered rosebud; his mother to wander on a mistaken errand, neglectful of the holiest trust which can be committed to a woman.

A winter evening, a night of storm, had darkened over Pearson's habitation, and there were no cheerful faces to drive the gloom from his broad hearth. The fire, it is true, sent forth a glowing heat and a ruddy light, and large logs, dripping with half-melted snow, lay ready to be cast upon the embers. But the apartment was saddened in its aspect by the absence of much of the homely wealth which had once adorned it, for the exaction of repeated fines, and his own neglect of temporal affairs, had greatly impoverished the owner. And with the furniture of peace, the implements of war had likewise disappeared, the sword was broken, the helm and cuirass were cast away forever, the soldier had done with battles, and might not lift so much as his naked hand to guard his head. But the Holy Book remained, and the table on which it rested was drawn before the fire, while two of the persecuted sect sought comfort from its pages.

He who listened, while the other read, was the master of the house, now emaciated in form, and altered as to the expression and healthiness of his countenance; for his mind had dwelt too long among visionary thoughts, and his body had been worn by imprisonment and stripes. The hale and weather-beaten old man who sat beside him had sustained less injury from a far longer course of the same mode of life. In person he was tall and dignified, and, which alone would have made him hateful to the Puritans, his grey locks fell from beneath the broad-brimmed hat, and rested on his shoulders. As the old man read the sacred page, the snow drifted against the windows, or eddied in at the crevices of the door, while a blast kept laughing in the chimney, and the blaze leaped fiercely up to seek it. And sometimes, when the wind struck the hill at a certain angle, and swept down by the cottage across the wintry plain, its voice was the most doleful that can be conceived; it came as if the Past were speaking, as if the Dead had contributed each a whisper,

as if the Desolation of Ages were breathed in that one lamenting sound.

The Quaker at length closed the book, retaining, however, his hand between the pages which he had been reading, while he looked steadfastly at Pearson. The attitude and features of the latter might have indicated the endurance of bodily pain; he leaned his forehead on his hands, his teeth were firmly closed, and his frame was tremulous at intervals with a nervous agitation.

10 "Friend Tobias," inquired the old man, compassionately, "hast thou found no comfort in these many blessed passages of Scripture?"

"Thy voice has fallen on my ear like a sound afar off and indistinct," replied Pearson without lifting his eyes. "Yea, and when I have hearkened carefully, the words seemed cold and lifeless, and intended for another and a lesser grief than mine. Remove the book," he added, in a tone of sullen bitterness. "I have no part in its consolations, and they do but fret my sorrow the more."

20 "Nay, feeble brother, be not as one who hath never known the light," said the elder Quaker, earnestly, but with mildness. "Art thou he that wouldst be content to give all, and endure all, for conscience' sake, desiring even peculiar trials, that thy faith might be purified, and thy heart weaned from worldly desires? And wilt thou sink beneath an affliction which happens alike to them that have their portion here below, and to them that lay up treasure in heaven? Faint not, for thy burthen is yet light."

30 "It is heavy! It is heavier than I can bear!" exclaimed Pearson, with the impatience of a variable spirit. "From my youth upward I have been a man marked out for wrath; and year by year, yea, day after day, I have endured sorrows, such as others know not in their lifetime. And now I speak not of the love that has been turned to hatred, the honor to ignominy, the ease and plentifulness of all things to danger, want, and nakedness. All this I could have borne, and counted myself blessed. But when my heart was desolate with many losses, I fixed it
40 upon the child of a stranger, and he became dearer to me than all my buried ones, and now he too must die as if my love were poison. Verily, I am an accursed man, and I will lay me down in the dust, and lift up my head no more."

"Thou sinnest, brother, but it is not for me to rebuke thee; for I also have had my hours of darkness, wherein

I have murmured against the cross," said the old Quaker. He continued, perhaps in the hope of distracting his companion's thoughts from his own sorrows. "Even late was the light obscured within me, when the men of blood had banished me on pain of death, and the cart-stables led me onward from village to village, toward the wilderness. A strong and cruel hand was wielding the knotted cords, they sunk deep into the flesh, and they mightst have tracked every reel and totter of my footsteps by the blood that followed. As we went on—

"Have I not borne all this, and have I murmured?" interrupted Pearson, impatiently.

"Nay, friend, but hear me," continued the other. "As we journeyed on, night darkened on our path, so that no man could see the rage of the persecutors, or the constancy of my endurance, though Heaven forbid that I should glory therein. The lights began to glimmer in the cottage windows, and I could discern the inmates as they gathered, in comfort and security, every man with his wife and children by their own evening hearth. At length we came to a tract of fertile land, in the dim light the forest was not visible around it; and behold! there was a straw-thatched dwelling, which bore the very aspect of my home, far over the wild ocean, far in our own England. Then came bitter thoughts upon me; yea, remembrances that were like death to my soul. The happiness of my early days was painted to me, the disquiet of my manhood, the altered faith of my declining years. I remembered how I had been moved to go forth a wanderer when my daughter, the youngest, the dearest of my flock, lay on her dying bed, and——"

"Couldst thou obey the command at such a moment?" exclaimed Pearson, shuddering.

"Yea, yea," replied the old man, hurriedly. "I was kneeling by her bedside when the voice spoke loud within me, but immediately I rose, and took my staff, and gave me gone. Oh! that it were permitted me to forget her woful look when I thus withdrew my arm, and left her journeying through the dark valley alone! for her soul was faint, and she had leaned upon my prayers. Now in that night of horror I was assailed by the thought that I had been an erring Christian, and a cruel parent, yea, even my daughter, with her pale, dying features, seemed to stand by me and whisper, 'Father, you are deceived, go home and shelter your grey head.' Oh! Thou to whom I have looked in my farthest wanderings," continued the

Quaker, raising his agitated eyes to heaven, "inflict not upon the bloodiest of our persecutors the unmitigated agony of my soul, when I believed that all I had done and suffered for Thee was at the instigation of a mocking fiend! But I yielded not, I knelt down and wrestled with the tempter, while the scourge bit more fiercely into the flesh. My prayer was heard, and I went on in peace and joy towards the wilderness."

The old man, though his fanaticism had generally all the calmness of reason, was deeply moved while reciting this tale, and his unwonted emotion seemed to rebuke and keep down that of his companion. They sat in silence, with their faces to the fire, imagining perhaps, in its red embers, new scenes of persecution yet to be encountered. The snow still drifted hard against the windows, and sometimes, as the blaze of the logs had gradually sunk, came down the spacious chimney and hissed upon the hearth. A cautious footstep might now and then be heard in a neighboring apartment, and the sound invariably drew the eyes of both Quakers to the door which led thither. When a fierce and riotous gust of wind had led his thoughts, by a natural association, to homeless travelers on such a night, Pearson resumed the conversation.

"I have well nigh sunk under my own share of this trial," observed he, sighing heavily, "yet I would that it might be doubled to me, if so the child's mother could be spared. Her wounds have been deep and many, but this will be the sorest of all."

"Fear not for Catherine," replied the old Quaker, "for I know that valiant woman, and have seen how she can bear the cross. A mother's heart, indeed, is strong in her, and may seem to contend mightily with her faith, but soon she will stand up and give thanks that her son has been thus early an accepted sacrifice. The boy hath done his work, and she will feel that he is taken hence in kindness both to him and her. Blessed, blessed are they that with so little suffering can enter into peace!"

The fitful rush of the wind was now disturbed by a portentous sound. It was a quick and heavy knocking at the outer door. Pearson's wan countenance grew paler, for many a visit of persecution had taught him what to dread, the old man, on the other hand, stood up erect, and his glance was firm as that of the tried soldier who awaits his enemy.

"The men of blood have come to seek me," he observed, with calmness. "They have heard how I was moved to

return from banishment, and now am I to be led to prison, and thence to death. It is an end I have long looked for. I will open unto them, lest they say, 'Lo, he feareth!'

50

"Nay, I will present myself before them," said Pearson, with recovered fortitude. "It may be that they seek me alone, and know not that thou abidest with me."

"Let us go boldly, both one and the other," rejoined his companion. "It is not fitting that thou or I should shrink."

They therefore proceeded through the entry to the door which they opened, bidding the applicant "Come in, in God's name!" A furious blast of wind drove the storm into their faces, and extinguished the lamp, they had barely time to discern a figure, so white from head to foot with the drifted snow, that it seemed like Winter's self, come in human shape to seek refuge from its own desolation.

"Enter, friend, and do thy errand, be it what it may," said Pearson. "It must needs be pressing, since thou comest on such a bitter night."

"Peace be with this household," said the stranger, when they stood on the floor of the inner apartment.

Pearson started, the elder Quaker stirred the slumbering embers of the fire, till they sent up a clear and lofty blaze, it was a female voice that had spoken, it was a female form that shone out, cold and wintry, in that comfortable light.

"Catherine, blessed woman," exclaimed the old man, "art thou come to this darkened land again? art thou come to bear a valiant testimony as in former years? The scourge hath not prevailed against thee, and from the dungeon hast thou come forth triumphant, but strengthen, strengthen now thy heart, Catherine, for Heaven will prove thee yet this once, ere thou go to thy reward."

"Rejoice friends!" she replied. "Thou who hast long been of our people, and thou whom a little child hath led to us, rejoice! Lo! I come, the messenger of glad tidings, for the day of persecution is overpast. The heart of the king, even Charles, hath been moved in gentleness toward us, and he hath sent forth his letters to stay the hands of the men of blood. A ship's company of our friends hath arrived at yonder town, and I also sailed joyfully among them."

90

As Catherine spoke, her eyes were roaming about the room, in search of him for whose sake security was dear

to her. Pearson made a silent appeal to the old man, nor did the latter shrink from the painful task assigned him.

"Sister," he began, in a softened yet perfectly calm tone, "thou tellest us of His love, manifested in temporal good; and now must we speak to thee of that self-same love, displayed in chastenings. Hitherto, Catherine, thou hast been as one journeying in a darksome and difficult path, and leading an infant by the hand; fain wouldst thou have looked heavenward continually, but still the
10 cares of that little child have drawn thine eyes, and thy affections, to the earth. Sister! go on rejoicing, for his tottering footsteps shall impede thine own no more."

But the unhappy mother was not thus to be consoled; she shook like a leaf, she turned white as the very snow that hung drifted into her hair. The firm old man extended his hand and held her up, keeping his eye upon hers, as if to repress any outbreak of passion.

"I am a woman, I am but a woman, will He try me above my strength?" said Catherine, very quickly, and
20 almost in a whisper. "I have been wounded sore; I have suffered much; many things in the body, many in the mind, crucified in myself and in them that were dearest to me. Surely," added she, with a long shudder, "He hath spared me in this one thing." She broke forth with sudden and irrepressible violence. "Tell me, man of cold heart, what has God done to me? Hath He cast me down, never to rise again? Hath He crushed my very heart in his hand? And thou, to whom I committed my child, how hast thou fulfilled thy trust? Give me back my
30 boy, well, sound, alive, alive; or earth and heaven shall avenge me!"

The agonized shriek of Catherine was answered by the faint, the very faint voice of a child.

On this day it had become evident to Pearson, to his aged guest, and to Dorothy, that Ilbrahim's brief and troubled pilgrimage drew near its close. The two former would willingly have remained by him, to make use of the prayers and pious discourses which they deemed appropriate to the time, and which, if they be impotent
40 as to the departing traveller's reception in the world whither it goes, may at least sustain him in bidding adieu to earth. But though Ilbrahim uttered no complaint, he was disturbed by the faces that looked upon him; so that Dorothy's entreaties, and their own conviction that the child's feet might tread heaven's pavement and not soil it, had induced the two Quakers to remove. Ilbrahim then

closed his eyes and grew calm, and, except for now and then a kind and low word to his nurse, might have been thought to slumber. As nightfall came on, however, as the storm began to rise, something seemed to trouble the repose of the boy's mind, and to render his sense of hearing active and acute. If a passing wind lingered to shake the casement, he strove to turn his head towards it; if the door jarred to and fro upon its hinges, he looked long and anxiously thitherward; if the heavy voice of the old man, as he read the Scriptures, rose but a little higher, the child almost held his dying breath to listen, if a snow-drift swept by the cottage, with a sound like the trailing of a garment, Ilbrahim seemed to watch that some visitor should enter.

But, after a little time, he relinquished whatever secret hope had agitated him, and, with one low, complaining whisper, turned his cheek upon the pillow. He then addressed Dorothy with his usual sweetness, and besought her to draw near him; she did so, and Ilbrahim took her hand in both of his, grasping it with a gentle pressure as if to assure himself that he retained it. At intervals, and without disturbing the repose of his countenance, a very faint trembling passed over him from head to foot, as if a mild but somewhat cool wind had breathed upon him, and made him shiver. As the boy thus led her by the hand, in his quiet progress over the borders of eternity, Dorothy almost imagined that she could discern the near, though dim delightfulness, of the home he was about to reach; she would not have enticed the little wanderer back, though she bemoaned herself that she must leave him and return. But just when Ilbrahim's feet were pressing on the soil of paradise, he heard a voice behind him, and it recalled him a few, few paces of the weary path which he had travelled. As Dorothy looked upon his features, she perceived that their placid expression was again disturbed, her own thoughts had been so wrapt in him, that all sounds of the storm, and of human speech, were lost to her, but when Catherine's shriek pierced through the room, the boy strove to raise himself.

"Friend, she is come! Open unto her!" cried he.

In a moment his mother was kneeling by the bedside; she drew Ilbrahim to her bosom, and he nestled there, with no violence of joy, but contentedly as if he were

6 love . . . chastenings. Compare Hebrews 12 6 " . . . whom the Lord loveth, he chasteneth . . ."

hushing himself to sleep. He looked into her face, and reading its agony, said, with feeble earnestness, "Mourn not, dearest mother. I am happy now." And with these words, the gentle boy was dead.

The king's mandate to stay the New England persecutors was effectual in preventing further martyrdoms, but the colonial authorities, trusting in the remoteness of their situation, and perhaps in the supposed instability of the royal government, shortly renewed their severities in all other respects. Catherine's fanaticism had become wilder by the sundering of all human ties, and wherever a scourge was lifted, there was she to receive the blow; and whenever a dungeon was unbarred, thither she came, to cast herself upon the floor. But in process of time a more Christian spirit—a spirit of forbearance, though not of cordiality or approbation, began to pervade the land in regard to the persecuted sect. And then, when the rigid old Pilgrims eyed her rather in pity than in wrath; when the matrons fed her with the fragments of their children's food, and offered her a lodging on a hard and lowly bed; when no little crowd of schoolboys left their sports to cast stones after the roving enthusiast, then did Catherine return to Pearson's dwelling, and made that her home.

As if Ilbrahim's sweetness yet lingered round his ashes; as if his gentle spirit came down from Heaven to teach his parent a true religion, her fierce and vindictive nature was softened by the same griefs which had once irritated it. When the course of years had made the features of the unobtrusive mourner familiar in the settlement, she became a subject of not deep, but general interest; a being on whom the otherwise superfluous sympathies of all might be bestowed. Every one spoke of her with that degree of pity which it is pleasant to experience; every one was ready to do her the little kindnesses which are not costly yet manifest goodwill, and when at last she died, a long train of her once bitter persecutors followed her, with decent sadness and tears that were not painful, to her place by Ilbrahim's green and sunken grave

1832

11 *wherever* . floor Hawthorne is on sound ground both psychologically and historically when he asserts that the more fanatical of the Quakers deliberately sought persecution and enjoyed it. A famous letter of 1657 from Rhode Island (where religious liberty was enjoyed by all) to Massachusetts states that the Quakers "begin to loathe this place for that they are not opposed by the civil authority" (quoted in J. T. Adams, *The Founding of New England*, p. 267). • 38 decent, becoming, fitting

The Minister's Black Veil

A Parable

"The Minister's Black Veil" was first published in the *Token* for 1836 and was reprinted in *Twice-Told Tales* in 1837. The story is a fine study of the Puritan conscience. Father Hooper may be regarded as a prototype of Arthur Dimmesdale in *The Scarlet Letter* (see *The American Notebooks* by Nathaniel Hawthorne, pp. xlvii-xlviii).

The sexton stood in the porch of Milford meeting-house pulling lustily at the bell-rope. The old people of the village came stooping along the street. Children with bright faces tript merrily beside their parents, or mimicked a graver gait in the conscious dignity of their Sunday clothes. Spruce bachelors looked sidelong at the pretty maidens, and fancied that the Sabbath sunshine made them prettier than on week-days. When the throng had mostly streamed into the porch, the sexton began to toll the bell, keeping his eye on the Reverend Mr.

A Parable. Another clergyman in New England, Mr. Joseph Moody, of York, Maine, who died about eighty years since, made himself remarkable by the same eccentricity that is here related of the Reverend Mr. Hooper. In his case, however, the symbol had a different import. In early life he had accidentally killed a beloved friend, and from that day till the hour of his own death he hid his face from men."
—Hawthorne

Hooper's door. The first glimpse of the clergyman's figure was the signal for the bell to cease its summons.

"But what has good Parson Hooper got upon his face?" cried the sexton in astonishment.

All within hearing immediately turned about, and beheld the semblance of Mr Hooper pacing slowly in his meditative way towards the meeting-house. With one accord they started, expressing more wonder than if some strange minister were coming to dust the cushions of Mr. Hooper's pulpit.

"Are you sure it is our parson?" inquired Goodman Gray of the sexton.

"Of a certainty it is good Mr. Hooper," replied the sexton. "He was to have exchanged pulpits with Parson Shute, of Westbury, but Parson Shute sent to excuse himself yesterday, being to preach a funeral sermon."

The cause of so much amazement may appear sufficiently slight. Mr Hooper, a gentlemanly person of about thirty, though still a bachelor, was dressed with due clerical neatness, as if a careful wife had starched his band, and brushed the weekly dust from his Sunday's garb. There was but one thing remarkable in his appearance. Swathed about his forehead, and hanging down over his face so low as to be shaken by his breath, Mr. Hooper had on a black veil. On a nearer view it seemed to consist of two folds of crape, which entirely concealed his features except the mouth and chin, but probably did not intercept his sight farther than to give a darkened aspect to all living and inanimate things. With this gloomy shade before him, good Mr. Hooper walked onward at a slow and quiet pace, stooping somewhat and looking on the ground, as is customary with abstracted men, yet nodding kindly to those of his parishioners who still waited on the meeting-house steps. But so wonder-struck were they that his greeting hardly met with a return.

"I can't really feel as if good Mr. Hooper's face was behind that piece of crape," said the sexton.

"I don't like it," muttered an old woman, as she hobbled into the meeting-house. "He has changed himself into something awful only by hiding his face."

"Our parson has gone mad!" cried Goodman Gray, following him across the threshold.

A rumor of some unaccountable phenomenon had preceded Mr. Hooper into the meeting-house, and set all the congregation astir. Few could refrain from twisting their

heads towards the door, many stood upright and turned directly about, while several little boys clambered upon the seats, and came down again with a terrible racket. There was a general bustle, a rustling of the women's gowns and shuffling of the men's feet, greatly at variance with that hushed repose which should attend the entrance of the minister. But Mr Hooper appeared not to notice the perturbation of his people. He entered with an almost noiseless step, bent his head mildly to the pews on each side, and bowed as he passed his oldest parishioner, a white-haired great-grandsire, who occupied an arm chair in the centre of the aisle. It was strange to observe how slowly this venerable man became conscious of something singular in the appearance of his pastor. He seemed not fully to partake of the prevailing wonder till Mr Hooper had ascended the stairs, and showed himself in the pulpit face to face with his congregation except for the black veil. That mysterious emblem was never once withdrawn. It shook with his measured breath as he gave out the psalm, it threw its obscurity between him and the holy page as he read the Scriptures; and while he prayed, the veil lay heavily on his uplifted countenance. Did he seek to hide it from the dread Being whom he was addressing?

Such was the effect of this simple piece of crape that more than one woman of delicate nerves was forced to leave the meeting-house. Yet perhaps the pale-faced congregation was almost as fearful a sight to the minister as his black veil to them.

Mr Hooper had the reputation of a good preacher, but not an energetic one. He strove to win his people heavenward by mild, persuasive influences, rather than to drive them thither by the thunders of the Word. The sermon which he now delivered was marked by the same characteristics of style and manner as the general series of his pulpit oratory. But there was something either in the sentiment of the discourse itself, or in the imagination of the auditors, which made it greatly the most powerful effort that they had ever heard from their pastor's lips. It was tinged rather more darkly than usual with the gentle gloom of Mr Hooper's temperament. The subject had reference to secret sin, and those sad mysteries which we hide from our nearest and dearest, and would fain conceal from our own consciousness, even forgetting that the Omniscient can detect them. A subtle power was breathed into his words. Each member of the

congregation, the most innocent girl, and the man of hardened breast, felt as if the preacher had crept upon them behind his awful veil, and discovered their hoarded iniquity of deed or thought. Many spread their clasped hands on their bosoms. There was nothing terrible in what Mr. Hooper said, at least, no violence, and yet, with every tremor of his melancholy voice the hearers quaked. An unsought pathos came hand in hand with awe. So sensible were the audience of some unwonted attribute in their minister, that they longed for a breath of wind to blow aside the veil, almost believing that a stranger's visage would be discovered, though the form, gesture, and voice were those of Mr. Hooper.

At the close of the service the people hurried out with indecorous confusion, eager to communicate their pent-up amazement, and conscious of lighter spirits the moment they lost sight of the black veil. Some gathered in little circles, huddled closely together, with their mouths all whispering in the centre, some went homeward alone, 20 wrapt in silent meditation, some talked loudly, and profaned the Sabbath-day with ostentatious laughter. A few shook their sagacious heads, intimating that they could penetrate the mystery; while one or two affirmed that there was no mystery at all, but only that Mr. Hooper's eyes were so weakened by the midnight lamp as to require a shade. After a brief interval, forth came good Mr. Hooper also, in the rear of his flock. Turning his veiled face from one group to another, he paid due reverence to the hoary heads, saluted the middle-aged with 30 kind dignity, as their friend and spiritual guide, greeted the young with mingled authority and love, and laid his hands on the little children's heads to bless them. Such was always his custom on the Sabbath-day. Strange and bewildered looks repaid him for his courtesy. None, as on former occasions, aspired to the honor of walking by their pastor's side. Old Squire Saunders, doubtless by an accidental lapse of memory, neglected to invite Mr. Hooper to his table, where the good clergyman had been wont to bless the food almost every Sunday since his 40 settlement. He returned, therefore, to the parsonage, and, at the moment of closing the door, was observed to look back upon the people, all of whom had their eyes fixed upon the minister. A sad smile gleamed faintly from beneath the black veil, and flickered about his mouth, glimmering as he disappeared.

"How strange," said a lady, "that a simple black veil,

such as any woman might wear on her bonnet, should become such a terrible thing on Mr. Hooper's face!"

"Something must surely be amiss with Mr. Hooper's intellects," observed her husband, the physician of the 50 village. "But the strangest part of the affair is the effect of this vagary, even on a sober-minded man like myself. The black veil, though it covers only our pastor's face, throws its influence over his whole person, and makes him ghostlike from head to foot. Do you not feel it so?"

"Truly do I," replied the lady, "and I would not be alone with him for the world. I wonder he is not afraid to be alone with himself!"

"Men sometimes are so," said her husband.

The afternoon service was attended with similar cir- 60 cumstances. At its conclusion, the bell tolled for the funeral of a young lady. The relatives and friends were assembled in the house, and the more distant acquaintances stood about the door, speaking of the good qualities of the deceased, when their talk was interrupted by the appearance of Mr. Hooper, still covered with his black veil. It was now an appropriate emblem. The clergyman stepped into the room where the corpse was laid, and bent over the coffin to take a last farewell of his deceased parishioner. As he stooped, the veil hung straight down 70 from his forehead, so that, if her eyelids had not been closed for ever, the dead maiden might have seen his face. Could Mr. Hooper be fearful of her glance, that he so hastily caught back the black veil? A person who watched the interview between the dead and living scrupled not to affirm that, at the instant when the clergyman's features were disclosed, the corpse had slightly shuddered, rustling the shroud and muslin cap, though the countenance retained the composure of death. A superstitious old woman was the only witness of this prod- 80 igy. From the coffin Mr. Hooper passed into the chamber of the mourners, and thence to the head of the staircase, to make the funeral prayer. It was a tender and heart-dissolving prayer, full of sorrow, yet so imbued with celestial hopes that the music of a heavenly harp, swept by the fingers of the dead, seemed faintly to be heard among the saddest accents of the minister. The people trembled, though they but darkly understood him, when he prayed that they, and himself, and all of mortal race, might be ready, as he trusted this young maiden had been, 90 for the dreadful hour that should snatch the veil from their faces. The bearers went heavily forth, and the

mourners followed, saddening all the street, with the dead before them, and Mr. Hooper in the black veil behind.

"Why do you look back?" said one in the procession to his partner.

"I had a fancy," replied she, "that the minister and the maiden's spirit were walking hand in hand."

"And so had I at the same moment," said the other.

That night the handsomest couple in Milford village were to be joined in wedlock. Though reckoned a melancholy man, Mr. Hooper had a placid cheerfulness for such occasions which often excited a sympathetic smile where livelier merriment would have been thrown away. There was no quality of his disposition which made him more beloved than this. The company at the wedding awaited his arrival with impatience, trusting that the strange awe which had gathered over him throughout the day would now be dispelled. But such was not the result. When Mr. Hooper came, the first thing that their eyes rested on was the same horrible black veil, which had added deeper gloom to the funeral, and could portend nothing but evil to the wedding. Such was its immediate effect on the guests, that a cloud seemed to have rolled duskily from beneath the black crape and dimmed the light of the candles. The bridal pair stood up before the minister. But the bride's cold fingers quivered in the tremulous hand of the bridegroom, and her deathlike paleness caused a whisper that the maiden who had been buried a few hours before was come from her grave to be married. If ever another wedding were so dismal, it was that famous one where they tolled the wedding knell. After performing the ceremony, Mr. Hooper raised a glass of wine to his lips, wishing happiness to the new-married couple, in a strain of mild pleasantry that ought to have brightened the features of the guests, like a cheerful gleam from the hearth. At that instant, catching a glimpse of his figure in the looking-glass, the black veil involved his own spirit in the horror with which it overwhelmed all others. His frame shuddered—his lips grew white—he spilt the untasted wine upon the carpet—and rushed forth into the darkness. For the earth, too, had on her black veil.

The next day the whole village of Milford talked of little else than Parson Hooper's black veil. That, and the mystery concealed behind it, supplied a topic for discussion between acquaintances meeting in the street, and

good women gossiping at their open windows. It was the first item of news that the tavern-keeper told to his guests. The children babbled of it on their way to school. One imitative little imp covered his face with an old black handkerchief, thereby so affrighting his playmate that the panic seized himself, and he well-nigh lost his wits by his own waggery.

It was remarkable that, of all the busybodies and impertinent people in the parish, not one ventured to put the plain question to Mr. Hooper, wherefore he did this thing. Hitherto, whenever there appeared the slightest call for such interference, he had never lacked adviser nor shown himself averse to be guided by their judgment. If he erred at all, it was by so painful a degree of self-distrust that even the mildest censure would lead him to consider an indifferent action as a crime. Yet, though so well acquainted with this amiable weakness, no individual among his parishioners chose to make the black veil the subject of friendly remonstrance. There was a feeling of dread, neither plainly confessed nor carefully concealed, which caused each to shift the responsibility upon another, till at length it was found expedient to send a deputation of the church, in order to deal with Mr. Hooper about the mystery before it should grow into a scandal. Never did an embassy so ill discharge its duties. The minister received them with friendly courtesy, but became silent after they were seated, leaving to his visitors the whole burden of introducing their important business. The topic, it might be supposed, was obvious enough. There was the black veil swathed round Mr. Hooper's forehead, and concealing every feature above his placid mouth, on which at times they could perceive the glimmering of a melancholy smile. But that piece of crape, to their imagination, seemed to hang down before his heart, the symbol of a fearful secret between him and them. Were the veil but cast aside they might speak freely of it, but not till then. Thus they sat a considerable time, speechless, confused, and shrinking uneasily from Mr. Hooper's eye, which they felt to be fixed upon them with an invisible glance. Finally, the deputies returned abashed to their constituents, pronouncing the matter too weighty to be handled, except by a

31 famous . . . knell. The reference is to another story of Hawthorne's, "The Wedding Knell," which appeared in the same issue of the *Token*.

council of the churches, if indeed it might not require a general synod.

But there was one person in the village unappalled by the awe with which the black veil had impressed all beside herself. When the deputies returned without an explanation, or even venturing to demand one, she, with the calm energy of her character, determined to chase away the strange cloud that appeared to be settling round Mr. Hooper, every moment more darkly than before. As his plighted wife, it should be her privilege to know what the black veil concealed. At the minister's first visit, therefore, she entered upon the subject with a direct simplicity which made the task easier both for him and her. After he had seated himself she fixed her eyes steadfastly upon the veil, but could discern nothing of the dreadful gloom that had so overawed the multitude. It was but a double fold of crape, hanging down from his forehead to his mouth, and slightly stirring with his breath.

"No," said she aloud, and smiling, "there is nothing terrible in this piece of crape, except that it hides a face which I am always glad to look upon. Come, good sir, let the sun shine from behind the cloud. First lay aside your black veil. then tell me why you put it on."

Mr. Hooper's smile glimmered faintly.

"There is an hour to come," said he, "when all of us shall cast aside our veils. Take it not amiss, beloved friend, if I wear this piece of crape till then."

"Your words are a mystery too," returned the young lady. "Take away the veil from them at least."

"Elizabeth, I will," said he, "so far as my vow may suffer me. Know, then, this veil is a type and a symbol, and I am bound to wear it ever, both in light and darkness, in solitude and before the gaze of multitudes, and as with strangers, so with my familiar friends. No mortal eye will see it withdrawn. This dismal shade must separate me from the world even you, Elizabeth, can never come behind it!"

"What grievous affliction hath befallen you," she earnestly inquired, "that you should thus darken your eyes for ever?"

"If it be a sign of mourning," replied Mr. Hooper, "I, perhaps, like most other mortals, have sorrows dark enough to be typified by a black veil."

"But what if the world will not believe that it is the type of an innocent sorrow?" urged Elizabeth. "Beloved

and respected as you are, there may be whispers that you hide your face under the consciousness of secret sin. For the sake of your holy office, do away with this scandal!"

The color rose into her cheeks as she intimated the nature of the rumors that were already abroad in the village. But Mr. Hooper's mildness did not forsake him. He even smiled again—that same sad smile, which always appeared like a faint glimmering of light proceeding from the obscurity beneath the veil.

"If I hide my face for sorrow, there is cause enough," he merely replied, "and if I cover it for secret sin, what mortal might not do the same?"

And with this gentle but unconquerable obstinacy did he resist all her entreaties. At length Elizabeth sat silent. For a few moments she appeared lost in thought, considering, probably, what new methods might be tried to withdraw her lover from so dark a fantasy, which, if it had no other meaning, was perhaps a symptom of mental disease. Though of a firmer character than his own, the tears rolled down her cheeks. But in an instant, as it were, a new feeling took the place of sorrow her eyes were fixed insensibly on the black veil, when, like a sudden twilight in the air, its terrors fell around her. She arose, and stood trembling before him.

"And do you feel it then at last?" said he mournfully.

She made no reply, but covered her eyes with her hand, and turned to leave the room. He rushed forward and caught her arm.

"Have patience with me, Elizabeth!" cried he passionately. "Do not desert me, though this veil must be between us here on earth. Be mine, and hereafter there shall be no veil over my face, no darkness between our souls! It is but a mortal veil—it is not for eternity! Oh! you know not how lonely I am, and how frightened, to be alone behind my black veil. Do not leave me in this miserable obscurity for ever!"

"Lift the veil but once and look me in the face," said she.

"Never! It cannot be!" replied Mr. Hooper.

"Then, farewell!" said Elizabeth.

She withdrew her arm from his grasp and slowly departed, pausing at the door to give one long, shuddering gaze, that seemed almost to penetrate the mystery of the black veil. But even amid his grief Mr. Hooper smiled to think that only a material emblem had separated him from happiness, though the horrors which

it shadowed forth must be drawn darkly between the fondest of lovers.

From that time no attempts were made to remove Mr. Hooper's black veil, or, by a direct appeal, to discover the secret which it was supposed to hide. By persons who claimed a superiority to popular prejudice it was reckoned merely an eccentric whim, such as often mingles with the sober actions of men otherwise rational, and tinges them all with its own semblance of insanity. But with the multitude good Mr. Hooper was irreparably a bugbear. He could not walk the streets with any peace of mind, so conscious was he that the gentle and timid would turn aside to avoid him, and that others would make it a point of hardihood to throw themselves in his way. The impertinence of the latter class compelled him to give up his customary walk at sunset to the burial-ground, for when he leaned pensively over the gate, there would always be faces behind the grave-stones peeping at his black veil. A fable went the rounds that the stare of the dead people drove him thence. It grieved him to the very depth of his kind heart to observe how the children fled from his approach, breaking up their merriest sports while his melancholy figure was yet afar off. Their instinctive dread caused him to feel more strongly than aught else that a preternatural horror was interwoven with the threads of the black crape. In truth, his own antipathy to the veil was known to be so great that he never willingly passed before a mirror, nor stooped to drink at a still fountain, lest in its peaceful bosom he should be affrighted by himself. This was what gave plausibility to the whispers, that Mr. Hooper's conscience tortured him for some great crime too horrible to be entirely concealed, or otherwise than so obscurely intimated. Thus from beneath the black veil there rolled a cloud into the sunshine, an ambiguity of sin or sorrow, which enveloped the poor minister, so that love or sympathy could never reach him. It was said that ghost and fiend consorted with him there. With self-shudderings and outward terrors he walked continually in its shadow, groping darkly within his own soul, or gazing through a medium that saddened the whole world. Even the lawless wind, it was believed, respected his dreadful secret and never blew aside the veil. But still good Mr. Hooper sadly smiled at the pale visages of the worldly throng as he passed by.

Among all its bad influences, the black veil had the

one desirable effect of making its wearer a very efficient clergyman. By the aid of his mysterious emblem—there was no other apparent cause—he became a man awful power over souls that were in agony for sin. I converts always regarded him with a dread peculiar themselves, affirming, though but figuratively, that, before he brought them to celestial light, they had been with him behind the black veil. Its gloom, indeed, enabled him to sympathize with all dark affections. Dying sinners cried aloud for Mr. Hooper, and would not yield their breath till he appeared; though ever, as he stooped to whisper consolation, they shuddered at the veiled face so near their own. Such were the terrors of the black veil, even when Death had bared his visage! Strange came long distances to attend service at his church, with the mere idle purpose of gazing at his figure, because it was forbidden them to behold his face. But many were made to quake ere they departed! Once, during Governor Belcher's administration, Mr. Hooper was appointed to preach the election sermon. Covered with his black veil, he stood before the chief magistrate, the council, and the representatives, and wrought so deep an impression that the legislative measures of that year were characterized by all the gloom and piety of our earliest ancestral swarms.

In this manner Mr. Hooper spent a long life, irreproachable in outward act, yet shrouded in dismal suspicions; kind and loving, though unloved, and dimly feared; a man apart from men, shunned in their health and joy, but ever summoned to their aid in mortal anguish. As years wore on, shedding their snows above his sable veil, he acquired a name throughout the New England churches, and they called him Father Hooper. Nearly all his parishioners who were of mature age when he was settled had been borne away by many a funeral he had one congregation in the church, and a more crowded one in the church-yard, and having wrought so late into the evening, and done his work so well, it was now good Father Hooper's turn to rest.

65 Belcher, Jonathan Belcher (1681-1757), royal governor of Massachusetts (1730-1741) • 66 election sermon, delivered before the newly elected officers of state. An appointment to preach an election sermon was the highest honor that could be conferred upon a minister in colonial New England. Election sermons were often published (see R. W. G. Vail, "A Check List of New England Election Sermons, *Proceedings of the American Antiquarian Society*, October 1935). Compare the dramatic importance of the election sermon in *The Scarlet Letter*.

Several persons were visible by the shaded candlelight in the death-chamber of the old clergyman. Natural connections he had none. But there was the decorously grave though unmoved physician, seeking only to mitigate the last pangs of the patient whom he could not save. There were the deacons, and other eminently pious members of his church. There, also, was the Reverend Mr. Clark, of Westbury, a young and zealous divine, who had ridden in haste to pray by the bedside of the expiring minister. There was the nurse, no hired handmaiden of death, but one whose calm affection had endured thus long in secrecy, in solitude, amid the chill of age, and would not perish, even at the dying hour. Who, but Elizabeth? And there lay the hoary head of good Father Hooper upon the death-pillow, with the black veil still swathed about his brow and reaching down over his face, so that each more difficult gasp of his faint breath caused it to stir. All through life that piece of crape had hung between him and the world. It had separated him from cheerful brotherhood and woman's love, and kept him in that saddest of all prisons, his own heart; and still it lay upon his face, as if to deepen the gloom of his darksome chamber, and shade him from the sunshine of eternity.

For some time previous his mind had been confused, wavering doubtfully between the past and the present, and hovering forward, as it were, at intervals, into the indistinctness of the world to come. There had been feverish turns, which tossed him from side to side, and wore away what little strength he had. But in his most convulsive struggles, and in the wildest vagaries of his intellect, when no other thought retained its sober influence, he still showed an awful solicitude lest the black veil should slip aside. Even if his bewildered soul could have forgotten, there was a faithful woman at his pillow, who, with averted eyes, would have covered that aged face, which she had last beheld in the comeliness of manhood. At length the death-stricken old man lay quietly in the torpor of mental and bodily exhaustion, with an imperceptible pulse, and breath that grew fainter and fainter, except when a long, deep, and irregular inspiration seemed to prelude the flight of his spirit.

The minister of Westbury approached the bedside.

"Venerable Father Hooper," said he, "the moment of your release is at hand. Are you ready for the lifting of the veil that shuts in time from eternity?"

Father Hooper at first replied merely by a feeble

motion of his head, then, apprehensive, perhaps, that his meaning might be doubtful, he exerted himself to speak.

"Yea," said he, in faint accents, "my soul hath a patient weariness until that veil be lifted."

"And is it fitting," resumed the Reverend Mr. Clark, that a man so given to prayer, of such a blameless example holy in deed and thought, so far as mortal judgment may pronounce, is it fitting that a father in the church should leave a shadow on his memory, that may seem to blacken a life so pure? I pray you, my venerable brother, let not this thing be! Suffer us to be gladdened by your triumphant aspect, as you go to your reward. Before the veil of eternity be lifted, let me cast aside this black veil from your face!"

And thus speaking, the Reverend Mr. Clark bent forward to reveal the mystery of so many years. But exerting a sudden energy that made all the beholders stand aghast, Father Hooper snatched both his hands from beneath the bed-clothes, and pressed them strongly on the black veil, resolute to struggle if the minister of Westbury would contend with a dying man.

"Never!" cried the veiled clergyman. "On earth, never!"

"Dark old man!" exclaimed the affrighted minister, "with what horrible crime upon your soul are you now passing to the judgment?"

Father Hooper's breath heaved, it rattled in his throat, but with a mighty effort, grasping forward with his hands, he caught hold of life, and held it back till he should speak. He even raised himself in bed, and there he sat, shivering with the arms of death around him, while the black veil hung down, awful, at the last moment, in the gathered terrors of a lifetime. And yet the faint, sad smile, so often there, now seemed to glimmer from its obscurity, and linger on Father Hooper's lips.

"Why do you tremble at me alone?" cried he, turning his veiled face round the circle of pale spectators. "Trem-

83 Why . . . black veil. In his review of *Twice-Told Tales*, Poe commented on this story as follows: "The moral put into the mouth of the dying minister will be supposed to convey the true import of the narrative, and that a crime of dark dye (having reference to the 'young lady') has been committed, is a point which only minds congenial with that of the author will perceive." Poe's interpretation, though allowable, and even plausible, is by no means strictly necessary. Hawthorne here, as in so many places in his fiction, leaves the question open.

ble also at each other! Have men avoided me, and women shown no pity, and children screamed and fled, only for my black veil? What but the mystery which it obscurely typified has made this piece of crape so awful? When the friend shows his inmost heart to his friend; the lover to his best beloved; when man does not vainly shrink from the eye of his Creator, loathsomely treasuring up the secret of his sin; then deem me a monster, for the symbol beneath which I have lived, and die! I look
 10 around me, and, lo! on every visage a black veil!"

While his auditors shrank from one another in mutual affright, Father Hooper fell back upon his pillow veiled corpse, with a faint smile lingering on the face. Still veiled, they laid him in his coffin, and a veiled company bore him to the grave. The grass of many years has sprung up and withered on that grave, the burial stone is moss-grown, and good Mr. Hooper's face is dead but awful is still the thought that it mouldered beneath the black veil!

1

The Celestial Railroad

John Bunyan's *Pilgrim's Progress* (1678), of which "The Celestial Railroad" is an adaptation, tells the story of the journey of Christian from the City of Destruction to the Celestial City. In the course of the journey Christian struggled for a time in the Slough of Despond; passed through the Wicket-Gate; received religious instruction at the Interpreter's House; came to a Cross, where the great burden of sin fell from his back and dropped into the mouth of a Sepulchre; ascended the Hill Difficulty; visited the Palace Beautiful; fought with and overcame the foul fiend Apollyon in the Valley of Humiliation; traversed the Valley of the Shadow of Death, avoiding both "the ditch that was on the one hand and the quag that was on the other"; saw the cave of the two giants, Pope and Pagan, suffered persecution in Vanity Fair; refused the invitation of Demas to dig in the silver-mine on the hill called Lucre; was prisoner in the Doubting Castle of Giant Despair; talked with the shepherds of the Delectable Mountains; passed over the Enchanted Ground and through the country of Beulah; crossed the River of Death; and at last entered the Celestial City, where he was welcomed by the shining ones. It will be noticed that Hawthorne's story

follows closely the stages of Bunyan's narrative, Hawthorne also uses, to a considerable extent, the actual language of Bunyan.

The author's purpose was to satirize what might be called the new Emersonian liberalism—particularly Unitarian liberalism, and incidentally the Transcendentalism so popular at the time in the cultivated circles of Boston and Concord. His sympathies were clearly with the older, Puritan school of religious thought, of which Bunyan was his favorite, and perhaps the best, representative English prose. It is interesting to note that "The Celestial Railroad" was written in 1843, when the new liberalism was at its height; and in Concord, where Hawthorne was a neighbor of Emerson's.

The sketch abounds in telling satirical points. Incident after incident is directed against Transcendentalism ("Giant Transcendentalist" with his "strange phraseology"); against the current vogue of German and Oriental philosophies at the Lyceum lecture; and against the social respectability of Unitarianism. The body of the satire, however, is concerned with the romantic, liberal theology which denies original sin, asserts the natural goodness of man, and regards the Christian life as pleasant and not too difficult to attain. A bridge is built over the Slough of Despond; the burden of sin is deposited in the baggage car; a tunnel is constructed through the Hill Difficulty, the Valley of the Shadow of Death is illuminated by gas lamps. Hawthorne regards these "improvements" with Puritan disapproval.

"The Celestial Railroad" has enjoyed a considerable popularity among the more "orthodox" sects and has often been reprinted as a tract. There is reason to believe also, that the sketch displeased the liberals. Hawthorne tells of a Unitarian clergyman who, very much to his relief

passed him by with only a curt greeting, and adds: "This is so unlike his deportment in times past, that I suspect the Celestial Railroad must have given him a pique; and if so, I shall feel as if Providence had sufficiently rewarded me for that pious labor."

Not a great while ago, passing through the gate of dreams, I visited that region of the earth in which lies the famous City of Destruction. It interested me much to learn that by the public spirit of some of the inhabitants a railroad has recently been established between this populous and flourishing town and the Celestial City. Having a little time upon my hands, I resolved to gratify a liberal curiosity by making a trip thither. Accordingly, one fine morning after paying my bill at the hotel, and directing the porter to stow my luggage behind a coach, I took my seat in the vehicle and set out for the station-house. It was my good fortune to enjoy the company of a gentleman—one Mr. Smooth-it-away—who, though he had never actually visited the Celestial City, yet seemed as well acquainted with its laws, customs, policy, and statistics, as with those of the City of Destruction, of which he was a native townsman. Being, moreover, a director of the railroad corporation and one of its largest stockholders, he had it in his power to give me all desirable information respecting that praiseworthy enterprise.

Our coach rattled out of the city, and at a short distance from its outskirts passed over a bridge of elegant construction, but somewhat too slight, as I imagined, to sustain any considerable weight. On both sides lay an extensive quagmire, which could not have been more disagreeable, either to sight or smell, had all the kennels of the earth emptied their pollution there.

"This," remarked Mr. Smooth-it-away, "is the famous Slough of Despond—a disgrace to all the neighborhood; and the greater that it might so easily be converted into firm ground."

"I have understood," said I, "that efforts have been made for that purpose from time immemorial. Bunyan mentions that above twenty thousand cartloads of wholesome instructions had been thrown in here without effect."

"Very probably! And what effect could be anticipated

from such unsubstantial stuff?" cried Mr. Smooth-it-away. "You observe this convenient bridge. We obtained a sufficient foundation for it by throwing into the slough some editions of books of morality; volumes of French philosophy and German rationalism; tracts, sermons, and essays of modern clergymen; extracts from Plato, Confucius, and various Hindoo sages, together with a few ingenious commentaries upon texts of Scripture,—all of which by some scientific process, have been converted into a mass like granite. The whole bog might be filled up with similar matter."

It really seemed to me, however, that the bridge vibrated and heaved up and down in a very formidable manner, and, in spite of Mr. Smooth-it-away's testimony to the solidity of its foundation, I should be loath to cross it in a crowded omnibus, especially if each passenger were encumbered with as heavy luggage as that gentleman and myself. Nevertheless we got over without accident, and soon found ourselves at the station-house. This very neat and spacious edifice is erected on the site of the little wicket gate, which formerly, as all old pilgrims will recollect, stood directly across the highway, and, by its inconvenient narrowness, was a great obstruction to the traveller of liberal mind and expansive stomach. The reader of John Bunyan will be glad to know that Christian's old friend Evangelist, who was accustomed to supply each pilgrim with a mystic roll, now presides at the ticket office. Some malicious persons it is true deny the identity of this reputable character with the Evangelist of old times, and even pretend to bring competent evidence of an imposture. Without involving myself in a dispute I shall merely observe that, so far as my experience goes, the square pieces of pasteboard now delivered to passengers are much more convenient and useful along the road than the antique roll of parchment. Whether they will be as readily received at the gate of the Celestial City I decline giving an opinion.

A large number of passengers were already at the station-house awaiting the departure of the cars. By the aspect and demeanor of these persons it was easy to

13 Mr. Smooth-it-away recalls "Mr. Smooth-man," who was a citizen of the Vanity Fair in Bunyan's *Pilgrim's Progress*. • 64 Evangelist . . . roll. "Then Evangelist gave him [Christian] a parchment roll, and there was written within, Fly from the wrath to come."—*Pilgrim's Progress*

judge that the feelings of the community had undergone a very favorable change in reference to the celestial pilgrimage. It would have done Bunyan's heart good to see it. Instead of a lonely and ragged man with a huge burden on his back, plodding along sorrowfully on foot while the whole city hooted after him, here were parties of the first gentry and most respectable people in the neighborhood setting forth towards the Celestial City as cheerfully as if the pilgrimage were merely a summer tour. Among the gentlemen were characters of deserved eminence—magistrates, politicians, and men of wealth, by whose example religion could not but be greatly recommended to their meaner brethren. In the ladies' apartment, too, I rejoiced to distinguish some of those flowers of fashionable society who are so well fitted to adorn the most elevated circles of the Celestial City. There was much pleasant conversation about the news of the day, topics of business and politics, or the lighter matters of amusement, while religion, though indubitably the main thing at heart, was thrown tastefully into the background. Even an infidel would have heard little or nothing to shock his sensibility.

One great convenience of the new method of going on pilgrimage I must not forget to mention. Our enormous burdens, instead of being carried on our shoulders as had been the custom of old, were all snugly deposited in the baggage car, and, as I was assured, would be delivered to their respective owners at the journey's end. Another thing, likewise, the benevolent reader will be delighted to understand. It may be remembered that there was an ancient feud between Prince Beelzebub and the keeper of the wicket gate, and that the adherents of the former distinguished personage were accustomed to shoot deadly arrows at honest pilgrims while knocking at the door. This dispute, much to the credit as well of the illustrious potentate above mentioned as of the worthy and enlightened directors of the railroad, has been pacifically arranged on the principle of mutual compromise. The prince's subjects are now pretty numerously employed about the station-house, some in taking care of the baggage, others in collecting fuel, feeding the engines, and such congenial occupations, and I can conscientiously affirm that persons more attentive to their business, more willing to accommodate, or more generally agreeable to the passengers, are not to be found on any railroad. Every good heart must surely

exult at so satisfactory an arrangement of an immemorial difficulty.

"Where is Mr. Greatheart?" inquired I. "Beyond doubt the directors have engaged that famous old champion to be chief conductor on the railroad?"

"Why, no," said Mr. Smooth-it-away, with a cough. "He was offered the situation of brakeman, but to tell you the truth, our friend Greatheart has grown preposterously stiff and narrow in his old age. He has so often guided pilgrims over the road on foot that he considers it a sin to travel in any other fashion. Besides, the old fellow had entered so heartily into the ancient feud with Prince Beelzebub that he would have been perpetually at blows or ill language with some of the prince's subjects, and thus have embroiled us anew. So on the whole, we were not sorry when honest Greatheart went off to the Celestial City in a huff and left us liberty to choose a more suitable and accommodating man. Yonder comes the engineer of the train. You will probably recognize him at once."

The engine at this moment took its station in advance of the cars, looking, I must confess, much more like a sort of mechanical demon that would hurry us to the infernal regions than a laudable contrivance for smoothing our way to the Celestial City. On its top sat a personage almost enveloped in smoke and flame, which, not to startle the reader, appeared to gush from his own mouth and stomach as well as from the engine's brazen abdomen.

"Do my eyes deceive me?" cried I. "What on earth is this? A living creature? If so, he is your own brother to the engine he rides upon!"

"Poh, poh, you are obtuse!" said Mr. Smooth-it-away with a hearty laugh. "Don't you know Apollyon, Christian's old enemy, with whom he fought so fierce a battle in the Valley of Humiliation? He was the very fellow to manage the engine, and so we have reconciled

31 **Beelzebub** In Matthew 12:24, Beelzebub is called "the prince of devils"; in the council of devils in *Paradise Lost*, he is second only to Satan; in *Pilgrim's Progress*, he is captain of the castle near the Wicket-Gate. • 49 **Mr. Greatheart**, in the second part of *Pilgrim's Progress*, valiantly assists Christian's wife and sons on their journey to the Celestial City. • 73 **appeared . . . stomach**. Bunyan describes Apollyon as follows: "he was clothed with scales like a fish, he had wings like a dragon, feet like a bear, and out of his belly came fire and smoke, and his mouth was as the mouth of a lion."

him to the custom of going on pilgrimage, and engaged him as chief engineer."

"Bravo, bravo!" exclaimed I, with irrepressible enthusiasm; "this shows the liberality of the age; this proves, if anything can, that all musty prejudices are in a fair way to be obliterated. And how will Christian rejoice to hear of this happy transformation of his old antagonist! I promise myself great pleasure in informing him of it when we reach the Celestial City."

The passengers being all comfortably seated, we now rattled away merrily, accomplishing a greater distance in ten minutes than Christian probably trudged over in a day. It was laughable, while we glanced along, as it were, at the tail of a thunderbolt, to observe two dusty foot travelers in the old pilgrim guise, with cockle shell and staff, their mystic rolls of parchment in their hands and their intolerable burdens on their backs. The preposterous obstinacy of these honest people in persisting to groan and stumble along the difficult pathway rather than take advantage of modern improvements, excited great mirth among our wiser brotherhood. We greeted the two pilgrims with many pleasant gibes and a roar of laughter; whereupon they gazed at us with such woful and absurdly compassionate visages that our merriment grew tenfold more obstreperous. Apollyon also entered heartily into the fun, and contrived to flit the smoke and flame of the engine, or of his own breath, into their faces, and envelop them in an atmosphere of scalding steam. These little practical jokes amused us mightily, and doubtless afforded the pilgrims the gratification of considering themselves martyrs.

At some distance from the railroad Mr. Smooth-it-away pointed to a large, antique edifice, which, he observed, was a tavern of long standing, and had formerly been a noted stopping-place for pilgrims. In Bunyan's road-book it is mentioned as the Interpreter's House.

"I have long had a curiosity to visit that old mansion," remarked I.

"It is not one of our stations, as you perceive," said my companion. "The keeper was violently opposed to the railroad; and well he might be, as the track left his house of entertainment on one side, and thus was pretty certain to deprive him of all his reputable customers. But the footpath still passes his door, and the old gentleman now and then receives a call from some simple traveller, and entertains him with fare as old-fashioned as himself."

Before our talk on this subject came to a conclusion we were rushing by the place where Christian's burden fell from his shoulders at the sight of the Cross. This served as a theme for Mr. Smooth-it-away, Mr. Live-for-the-world, Mr. Hide-sin-in-the-heart, Mr. Scaly-conscience, and a knot of gentlemen from the town of Shun-repentance, to descant upon the inestimable advantages resulting from the safety of our baggage. Myself, and all the passengers indeed, joined with great unanimity in this view of the matter; for our burdens were rich in many things esteemed precious throughout the world, and, especially, we each of us possessed a great variety of favorite Habits, which we trusted would not be out of fashion even in the polite circles of the Celestial City. It would have been a sad spectacle to see such an assortment of valuable articles tumbling into the sepulchre. Thus pleasantly conversing on the favorable circumstances of our position as compared with those of past pilgrims and of narrow-minded ones at the present day, we soon found ourselves at the foot of the Hill Difficulty. Through the very heart of this rocky mountain a tunnel has been constructed of most admirable architecture, with a lofty arch and a spacious double track, so that, unless the earth and rocks should chance to crumble down, it will remain an eternal monument of the builder's skill and enterprise. It is a great though incidental advantage that the materials from the heart of the Hill Difficulty have been employed in filling up the Valley of Humiliation, thus obviating the necessity of descending into that disagreeable and unwholesome hollow.

"This is a wonderful improvement, indeed," said I. "Yet I should have been glad of an opportunity to visit the Palace Beautiful and be introduced to the charming young ladies—Miss Prudence, Miss Piety, Miss Charity, and the rest—who have the kindness to entertain pilgrims there."

"Young ladies!" cried Mr. Smooth-it-away, as soon as he could speak for laughing. "And charming young ladies! Why, my dear fellow, they are old maids, every soul of them—prim, starched, dry, and angular; and

50 Mr. Live-for-the-world. . . . Here, as elsewhere, Hawthorne's names are similar to, but not identical with, Bunyan's "Mr. Love-lust," "Mr. Live-loose," "Lord Time-server," "Mr. Facing-both-ways" are examples from *Pilgrim's Progress*

not one of them, I will venture to say, has altered so much as the fashion of her gown since the days of Christian's pilgrimage."

"Ah, well," said I, much comforted, "then I can very readily dispense with their acquaintance."

The respectable Apollyon was now putting on the steam at a prodigious rate, anxious, perhaps, to get rid of the unpleasant reminiscences connected with the spot where he had so disastrously encountered Christian. Consulting Mr Bunyan's road-book, I perceived that we must now be within a few miles of the Valley of the Shadow of Death, into which doleful region, at our present speed, we should plunge much sooner than seemed at all desirable. In truth, I expected nothing better than to find myself in the ditch on one side or the quag on the other; but on communicating my apprehensions to Mr. Smooth-it-away, he assured me that the difficulties of this passage, even in its worst condition, had been vastly exaggerated, and that, in its present state
20 of improvement, I might consider myself as safe as on any railroad in Christendom.

Even while we were speaking the train shot into the entrance of this dreaded Valley. Though I plead guilty to some foolish palpitations of the heart during our headlong rush over the causeway here constructed, yet it were unjust to withhold the highest encomiums on the boldness of its original conception and the ingenuity of those who executed it. It was gratifying, likewise, to observe how much care had been taken to dispel the
30 everlasting gloom and supply the defect of cheerful sunshine, not a ray of which has ever penetrated among these awful shadows. For this purpose, the inflammable gas which exudes plentifully from the soil is collected by means of pipes, and thence communicated to a quadruple row of lamps along the whole extent of the passage. Thus a radiance has been created even out of the fiery and sulphurous curse that rests forever upon the valley—a radiance hurtful, however, to the eyes, and somewhat bewildering, as I discovered by the changes
40 which it wrought in the visages of my companions. In this respect, as compared with natural daylight, there is the same difference as between truth and falsehood, but if the reader have ever travelled through the dark Valley, he will have learned to be thankful for any light that he could get—if not from the sky above, then from the blasted soil beneath. Such was the red bril-

liancy of these lamps that they appeared to build walls of fire on both sides of the track, between which we held our course at lightning speed, while a reverberating thunder filled the Valley with its echoes. Had the engine run off the track,—a catastrophe, it is whispered, by means unprecedented,—the bottomless pit, if there were any such place, would undoubtedly have received it. Just as some dismal fooleries of this nature had manifested themselves in my heart, quite unawares, there came a tremendous shriek, carrying along the valley as if a thousand devils had begun to stretch their lungs to utter it, but which proved to be merely the whistle of the engine on arriving at a stopping-place.

The spot where we had now paused is the same that our friend Bunyan—a truthful man, but infected with many fantastic notions—has designated, in terms plain than I like to repeat, as the mouth of the infernal region. This, however, must be a mistake, inasmuch as Mr. Smooth-it-away, while we remained in the smoky and lurid cavern, took occasion to prove that Tophet had not even a metaphorical existence. The place, he assured us, is no other than the crater of a half-extinct volcano in which the directors had caused forges to be set up for the manufacture of railroad iron. Hence, also, is obtained a plentiful supply of fuel for the use of the engines. Whoever had gazed into the dismal obscurity of the broad cavern mouth, whence ever and anon darted huge tongues of dusky flame, and had seen the strange half-shaped monsters, and visions of faces horribly grotesque, into which the smoke seemed to wreath itself, and had heard the awful murmurs, and shrieks and deep, shuddering whispers of the blast, sometimes forming themselves into words almost articulate, would have seized upon Mr. Smooth-it-away's comfortable explanation as greedily as we did. The inhabitants of the cavern, moreover, were unlovely personages, dark smoke-begrimed, generally deformed, with misshapen feet, and a glow of dusky redness in their eyes as if their hearts had caught fire and were blazing out of the upper windows. It struck me as a peculiarity that the laborers at the forge and those who brought fuel to the engine, when they began to draw short breath, positively emitted smoke from their mouth and nostrils.

61 terms . . . repeat. Bunyan's statement is, "About the mist of this valley I perceived the mouth of hell to be, and it stood also hard by the wayside" • 65 Tophet, here used for "hell"

Among the idlers about the train, most of whom were puffing cigars which they had lighted at the flame of the crater, I was perplexed to notice several who, to my certain knowledge, had heretofore set forth by railroad for the Celestial City. They looked dark, wild, and smoky, with a singular resemblance, indeed, to the native inhabitants, like whom, also, they had a disagreeable propensity to ill-natured gibes and sneers, the habit of which had wrought a settled contortion of their visages. Having been on speaking terms with one of these persons,—an indolent, good-for-nothing fellow, who went by the name of Take-it-easy,—I called him, and inquired what was his business there.

"Did you not start," said I, "for the Celestial City?"

"That's a fact," said Mr. Take-it-easy, carelessly puffing some smoke into my eyes. "But I heard such bad accounts that I never took pains to climb the hill on which the city stands. No business doing, no fun going on, nothing to drink, and no smoking allowed, and a thrumming of church music from morning till night. I would not stay in such a place if they offered me house room and living free."

"But, my good Mr. Take-it-easy," cried I, "why take up your residence here, of all places in the world?"

"Oh," said the loafer, with a grin, "it is very warm hereabouts, and I meet with plenty of old acquaintances, and altogether the place suits me. I hope to see you back again some day soon. A pleasant journey to you."

While he was speaking the bell of the engine rang, and we dashed away after dropping a few passengers, but receiving no new ones. Rattling onward through the Valley, we were dazzled with the fiercely gleaming gas lamps, as before. But sometimes, in the dark of intense brightness, grim faces, that bore the aspect and expression of individual sins, or evil passions, seemed to thrust themselves through the veil of light, glaring upon us, and stretching forth a great, dusky hand, as if to impede our progress. I almost thought that they were my own sins that appalled me there. These were freaks of imagination—nothing more, certainly—mere delusions, which I ought to be heartily ashamed of, but all through the Dark Valley I was tormented, and pestered, and dolefully bewildered with the same kind of waking dreams. The mephitic gases of that region intoxicate the brain. As the light of natural day, however, began to struggle with the glow of the lanterns,

these vain imaginations lost their vividness, and finally vanished from the first ray of sunshine that greeted our escape from the Valley of the Shadow of Death. Ere we had gone a mile beyond it I could well-nigh have taken my oath that this whole gloomy passage was a dream.

At the end of the valley, as John Bunyan mentions, is a cavern, where, in his days, dwelt two cruel giants, Pope and Pagan, who had strown the ground about their residence with the bones of slaughtered pilgrims. These vile old troglodytes are no longer there; but into their deserted cave another terrible giant has thrust himself, and makes it his business to seize upon honest travellers and fatten them for his table with plentiful meals of smoke, mist, moonshine, raw potatoes, and sawdust. He is a German by birth, and is called Giant Transcendentalist, but as to his form, his features, his substance, and his nature generally, it is the chief peculiarity of this huge miscreant that neither he for himself, nor anybody for him, has ever been able to describe them. As we rushed by the cavern's mouth we caught a hasty glimpse of him, looking somewhat like an ill-proportioned figure, but considerably more like a heap of fog and duskiness. He shouted after us, but in so strange a phraseology that we knew not what he meant, nor whether to be encouraged or affrighted.

It was late in the day when the train thundered into the ancient city of Vanity, where Vanity Fair is still at the height of prosperity, and exhibits an epitome of whatever is brilliant, gay, and fascinating beneath the sun. As I purposed to make a considerable stay here, it gratified me to learn that there is no longer the want of harmony between the town's-people and pilgrims, which impelled the former to such lamentably mistaken measures as the persecution of Christian and the fiery martyrdom of Faithful. On the contrary, as the new railroad brings with it great trade and a constant influx of strangers, the lord of Vanity Fair is its chief patron, and the capitalists of the city are among the largest stockholders. Many passengers stop to take their pleasure or make their profit in the Fair, instead of going onward to the Celestial City. Indeed, such are the charms of the place that people often affirm it to be the true and only heaven; stoutly contending that there is no other, that those who seek further are mere dreamers, and that, if the fabled brightness of the Celestial City lay but a

date time beyond the gates of Vanity, they would not be fools enough to go thither. Without subscribing to these perhaps exaggerated ecomiums, I can truly say that my abode in the city was mainly agreeable, and my intercourse with the inhabitants productive of much amusement and instruction.

Being naturally of a serious turn, my attention was directed to the solid advantages derivable from a residence here, rather than to the effervescent pleasures which are the grand object with too many visitants. The Christian reader, if he have had no accounts of the city later than Bunyan's time, will be surprised to hear that almost every street has its church, and that the reverend clergy are nowhere held in higher respect than at Vanity Fair. And well do they deserve such honorable estimation; for the maxims of wisdom and virtue which fall from their lips come from as deep a spiritual source, and tend to as lofty a religious aim, as those of the sagest philosophers of old. In justification of this high praise I need only mention the names of the Rev. Mr. Shallow-deep, the Rev. Mr. Stumble-at-truth, that fine old clerical character the Rev. Mr. This-to-day, who expects shortly to resign his pulpit to the Rev. Mr. That-tomorrow, together with the Rev. Mr. Bewilderment, the Rev. Mr. Clog-the-spirit, and, last and greatest, the Rev. Dr. Wind-of-doctrine. The labors of these eminent divines are aided by those of innumerable lecturers, who diffuse such a various profundity, in all subjects of human or celestial science, that any man may acquire an omnigenous erudition without the trouble of even learning to read. Thus literature is etherealized by assuming for its medium the human voice, and knowledge, depositing all its heavier particles, except, doubtless, its gold, becomes exhaled into a sound, which forthwith steals into the ever-open ear of the community. These ingenious methods constitute a sort of machinery, by which thought and study are done to every person's hand without his putting himself to the slightest inconvenience in the matter. There is another species of machine for the wholesale manufacture of individual morality. This excellent result is effected by societies for all manner of virtuous purposes, with which a man has merely to connect himself, throwing, as it were, his quota of virtue into the common stock, and the president and directors will take care that the aggregate amount be well applied. All these, and other wonderful improvements in ethics,

religion, and literature, being made plain to my prehension by the ingenious Mr. Smooth-it-away, inspired me with a vast admiration of Vanity Fair.

It would fill a volume, in an age of pamphlets, I to record all my observations in this great capital of human business and pleasure. There was an unlimited range of society—the powerful, the wise, the witty, the famous in every walk of life, princes, presidents, poets, generals, artists, actors, and philanthropists, making their own market at the fair, and deeming price too exorbitant for such commodities as hit their fancy. It was well worth one's while, even if he had no idea of buying or selling, to loiter through the bazaar and observe the various sorts of traffic that were going forward.

Some of the purchasers, I thought, made very foolish bargains. For instance, a young man having inherited a splendid fortune, laid out a considerable portion of it in the purchase of diseases, and finally spent all the rest for a heavy lot of repentance and a suit of rags. A very pretty girl bartered a heart as clear as crystal for a diamond ring, and which seemed her most valuable possession, for another jewel of the same kind, but so worn and discolored as to be utterly worthless. In one shop there was a great many crowns of laurel and myrtle, which sold cheaply to authors, statesmen, and various other people pressed eagerly to buy; some purchased these paltry wreaths with their lives, others by a toilsome servitude of years, and many sacrificed whatever was most valuable, and finally slunk away without the crown. There was a sort of stock or scrip, called Conscience, which seemed to be in great demand, and would purchase almost anything. Indeed, few rich commodities were to be obtained without paying a heavy sum in this particular stock, and a man's business was seldom very lucrative unless he knew precisely when and how to throw his hoard of conscience into the market. Yet as this stock was the only thing of permanent value, whoever parted with it was sure to find himself a loser in the long run. Several of the speculations were of a questionable character. Occasionally a member of Congress recruited his pocket by the sale of his constituents; and I was assured that public officers have often sold their country at very

29 omnigenous, of all kinds

moderate prices. Thousands sold their happiness for a whim. Gilded chains were in great demand, and purchased with almost any sacrifice. In truth, those who desired, according to the old adage, to sell anything valuable for a song, might find customers all over the Fair; and there were innumerable messes of pottage, piping hot, for such as chose to buy them with their birthrights. A few articles, however, could not be found genuine at Vanity Fair. If a customer wished
to renew his stock of youth the dealers offered him a set of false teeth and an auburn wig; if he demanded peace of mind, they recommended opium or a brandy bottle.

Tracts of land and golden mansions, situate in the Celestial City, were often exchanged, at very disadvantageous rates, for a few years' lease of small, dismal, inconvenient tenements in Vanity Fair. Prince Beelzebub himself took great interest in this sort of traffic, and sometimes condescended to meddle with smaller
matters. I once had the pleasure to see him bargaining with a miser for his soul, which, after much ingenious skirmishing on both sides, his highness succeeded in obtaining at about the value of sixpence. The prince remarked with a smile, that he was a loser by the transaction.

Day after day, as I walked the streets of Vanity, my manners and deportment became more and more like those of the inhabitants. The place began to seem like home; the idea of pursuing my travels to the Celestial
City was almost obliterated from my mind. I was reminded of it, however, by the sight of the same pair of simple pilgrims at whom we had laughed so heartily when Apollyon puffed smoke and steam into their faces at the commencement of our journey. There they stood amidst the densest bustle of Vanity; the dealers offering them their purple and fine linen and jewels, the men of wit and humor gibing at them, a pair of buxom ladies ogling them askance, while the benevolent Mr. Smooth-it-away whispered some of his wisdom at their elbows,
and pointed to a newly-erected temple, but there were these worthy simpletons, making the scene look wild and monstrous, merely by their sturdy repudiation of all part in its business or pleasures.

One of them—his name was Stick-to-the-right—perceived in my face, I suppose, a species of sympathy and almost admiration, which, to my own great surprise,

I could not help feeling for this pragmatic couple. It prompted him to address me.

"Sir," inquired he, with a sad, yet mild and kindly voice, "do you call yourself a pilgrim?"

"Yes," I replied, "my right to that appellation is indubitable. I am merely a sojourner here in Vanity Fair, being bound to the Celestial City by the new railroad."

"Alas, friend," rejoined Mr. Stick-to-the-right, "I do assure you, and beseech you to receive the truth of my words, that that whole concern is a bubble. You may travel on it all your lifetime, were you to live thousands of years, and yet never get beyond the limits of Vanity Fair. Yea, though you should deem yourself entering the gates of the blessed city, it will be nothing but a
miserable delusion."

"The Lord of the Celestial City," began the other pilgrim, whose name was Mr. Foot-it-to-heaven, "has refused, and will ever refuse, to grant an act of incorporation for this railroad, and unless that be obtained, no passenger can ever hope to enter his dominions. Wherefore every man who buys a ticket must lay his account with losing the purchase money, which is the value of his own soul"

"Poh, nonsense!" said Mr. Smooth-it-away, taking my
arm and leading me off, "these fellows ought to be indicted for a libel. If the law stood as it once did in Vanity Fair we should see them grinning through the iron bars of the prison window."

This incident made a considerable impression on my mind, and contributed with other circumstances to dispose me to a permanent residence in the city of Vanity; although, of course, I was not simple enough to give up my original plan of gliding along easily and commodiously by railroad. Still, I grew anxious to be
gone. There was one strange thing that troubled me. Amid the occupations or amusements of the Fair, nothing was more common than for a person—whether at feast, theatre, or church, or trafficking for wealth and honors, or whatever he might be doing, and however unseasonable the interruption—suddenly to vanish like a soap bubble, and be never more seen of his fellows; and so accustomed were the latter to such little accidents that they went on with their business as quietly

6 messes . . . birthrights. The allusion is to Esau, who sold his birthright to Jacob for a mess of pottage. See Genesis 25.29-34

as if nothing had happened. But it was otherwise with me.

Finally, after a pretty long residence at the Fair, I resumed my journey towards the Celestial City, still with Mr. Smooth-it-away at my side. At a short distance beyond the suburbs of Vanity we passed the ancient silver mine, of which Demas was the first discoverer, and which is now wrought to great advantage, supplying nearly all the coined currency of the world.

10 A little further onward was the spot where Lot's wife had stood forever under the semblance of a pillar of salt. Curious travellers have long since carried it away piecemeal. Had all regrets been punished as rigorously as this poor dame's were, my yearning for the relinquished delights of Vanity Fair might have produced a similar change in my own corporeal substance, and left me a warning to future pilgrims.

The next remarkable object was a large edifice, constructed of moss-grown stone, but in a modern and airy style of architecture. The engine came to a pause 20 in its vicinity, with the usual tremendous shriek

"This was formerly the castle of the redoubted giant Despair," observed Mr. Smooth-it-away. "but since his death Mr. Flimsy-faith has repaired it, and keeps an excellent house of entertainment here. It is one of our stopping-places"

"It seems but slightly put together," remarked I, looking at the frail yet ponderous walls. "I do not envy Mr Flimsy-faith his habitation. Some day it will thunder 30 down upon the heads of the occupants."

"We shall escape at all events," said Mr Smooth-it-away, "for Apollyon is putting on the steam again"

The road now plunged into a gorge of the Delectable Mountains, and traversed the field where in former ages the blind men wandered and stumbled among the tombs. One of these ancient tombstones had been thrust across the track by some malicious person, and gave the train of cars a terrible jolt. Far up the rugged side of a mountain I perceived a rusty iron door, half overgrown with 40 bushes and creeping plants, but with smoke issuing from its crevices.

"Is that," inquired I, "the very door in the hill-side which the shepherds assured Christian was a by-way to hell?"

"That was a joke on the part of the shepherds," said Mr. Smooth-it-away, with a smile. "It is neither more

nor less than the door of a cavern which they use smoke-house for the preparation of mutton hams."

My recollections of the journey are now, for a space, dim and confused, inasmuch as a singular drowsiness here overcame me, owing to the fact that we were passing over the enchanted ground, the air of which encourages a disposition to sleep. I awoke, however, as soon as we crossed the borders of the pleasant land of Beulah. All the passengers were rubbing their eyes, comparing watches, and congratulating one another on the prospect of arriving so seasonably at the journey's end. The sweet breezes of this happy clime came freshly to our nostrils; we beheld the glimmering gush of silver fountains, overhung by trees of beautiful foliage and delicious fruit, which were propagated from the celestial gardens. Once, as we dashed onward like a hurricane, there was a flutter of wings and the bright appearance of an angel in the air, speeding forth on some heavenly mission. The engine now denounced the close vicinity of the final station-house by one last and horrible scream, in which there seemed to be distinguishable every kind of wailing and woe, the bitter fierceness of wrath, all mixed up with the wild laughter of a devil or a madman. Throughout the journey, at every stopping-place, Apollyon had exercised his ingenuity in screwing the most abominable sounds out of the whistle of the steam-engine; but this closing effort he outdid himself and created an infernal uproar, which, besides disturbing the peace of the inhabitants of Beulah, must have sent its discord echoing through the celestial gates

While the horrid clamor was still ringing in our ears we heard an exulting strain, as if a thousand instruments of music, with height and depth and sweetness in their tones, at once tender and triumphant, were struck in unison, to greet the approach of some illustrious hero who had fought the good fight and won a glorious victory, and was come to lay aside his battered arms forever. Looking to ascertain what might be the occasion of this glad harmony, I perceived, on alighting from the cars, that a multitude of shining ones had assembled on the other side of the river, to welcome two poor pilgrims

10 Lot's wife, looking back at Sodom, was turned into a pillar of salt. See Genesis 19:26 • 83 fought . . . fight. See II Timothy 4:7

who were just emerging from its depths. They were the same whom Apollyon and ourselves had persecuted with taunts, and gibes, and scalding steam, at the commencement of our journey—the same whose unworldly aspect and impressive words had stirred my conscience amid the wild revellers of Vanity Fair.

"How amazingly well those men have got on," cried I to Mr. Smooth-it-away. "I wish we were secure of as good a reception."

"Never fear, never fear!" answered my friend. "Come, make haste; the ferry boat will be off directly, and in three minutes you will be on the other side of the river. No doubt you will find coaches to carry you up to the city gates."

A steam ferry boat, the last improvement on this important route, lay at the river side, puffing, snorting, and emitting all those other disagreeable utterances which betoken the departure to be immediate. I hurried on board with the rest of the passengers, most of whom were in great perturbation: some bawling out for their baggage, some tearing their hair and exclaiming that the boat would explode or sink; some already pale with the heaving of the stream, some gazing aghast at the ugly aspect of the steersman; and some still dizzy

with the slumberous influences of the Enchanted Ground. Looking back to the shore, I was amazed to discern Mr. Smooth-it-away waving his hand in token of farewell.

"Don't you go over to the Celestial City?" exclaimed I.

"Oh, no!" answered he with a queer smile, and that same disagreeable contortion of visage which I had remarked in the inhabitants of the Dark Valley. "Oh, no! I have come thus far only for the sake of your pleasant company. Good-by! We shall meet again."

And then did my excellent friend Mr. Smooth-it-away laugh outright, in the midst of which cachinnation a smoke-wreath issued from his mouth and nostrils, while a twinkle of lurid flame darted out of either eye, proving indubitably that his heart was all of a red blaze. The impudent fiend! To deny the existence of Tophet, when he felt its fiery tortures raging within his breast. I rushed to the side of the boat, intending to fling myself on shore, but the wheels, as they began their revolutions, threw a dash of spray over me so cold—so deadly cold, with the chill that will never leave those waters until Death be drowned in his own river—that with a shiver and a heartquake I awoke. Thank Heaven it was a Dream!

1843

a materialistic world, his ultimate satisfaction and reward, not in popular acclaim but in artistic creation itself, are some of the points suggested by the allegory, and all of these points are applicable in Hawthorne's own case.

The Artist of the Beautiful

"The Artist of the Beautiful" was first published in the *Democratic Review* in 1844 and was reprinted in *Mosses from an Old Manse* in 1846. The story may be profitably studied as an allegory of all art, and particularly as an allegory of Hawthorne's art. The delicacy of the true artist's perceptions, his meticulous attention to detail, his devotion to an artistic ideal, his lack of appreciation by

An elderly man, with his pretty daughter on his arm, was passing along the street, and emerged from the gloom of the cloudy evening into the light that fell across the pavement from the window of a small shop. It was a projecting window, and on the inside were suspended a variety of watches, pinchbeck, silver, and one or two of gold, all with their faces turned from the streets, as if churlishly disinclined to inform the wayfarers what o'clock it was. Seated within the shop, sidelong to the window, with his pale face bent earnestly over some

⁶ pinchbeck, an alloy of copper and zinc, used to imitate gold in cheap jewelry

delicate piece of mechanism on which was thrown the concentrated lustre of a shade lamp, appeared a young man.

"What can Owen Warland be about?" muttered old Peter Hovenden, himself a retired watchmaker, and the former master of this same young man whose occupation he was now wondering at. "What can the fellow be about? These six months past I have never come by his shop without seeing him just as steadily at work as
10 now. It would be a flight beyond his usual foolery to seek for the perpetual motion; and yet I know enough of my old business to be certain that what he is now so busy with is no part of the machinery of a watch."

"Perhaps, father," said Annie, without showing much interest in the question, "Owen is inventing a new kind of timekeeper. I am sure he has ingenuity enough."

"Poh, child! He has not the sort of ingenuity to invent anything better than a Dutch toy," answered her father, who had formerly been put to much vexation by Owen
20 Warland's irregular genius. "A plague on such ingenuity! All the effect that ever I knew of it was to spoil the accuracy of some of the best watches in my shop. He would turn the sun out of its orbit and derange the whole course of time, if, as I said before, his ingenuity could grasp anything bigger than a child's toy!"

"Hush, father! He hears you!" whispered Annie, pressing the old man's arm. "His ears are as delicate as his feelings; and you know how easily disturbed they are. Do let us move on."

30 So Peter Hovenden and his daughter Annie plodded on without further conversation, until in a by-street of the town they found themselves passing the open door of a blacksmith's shop. Within was seen the forge, now blazing up and illuminating the high and dusky roof, and now confining its lustre to a narrow precinct of the coal-strewn floor, according as the breath of the bellows was puffed forth or again inhaled into its vast leathern lungs. In the intervals of brightness it was easy to distinguish objects in remote corners of the shop and the
40 horseshoes that hung upon the wall; in the momentary gloom the fire seemed to be glimmering amidst the vagueness of uninclosed space. Moving about in this red glare and alternate dusk was the figure of the blacksmith, well worthy to be viewed in so picturesque an aspect of light and shade, where the bright blaze struggled with the black night, as if each would have snatched his

comely strength from the other. Anon he drew a hot bar of iron from the coals, laid it on the anvil, up his arm of might, and was soon enveloped in the rain of sparks which the strokes of his hammer scattered the surrounding gloom.

"Now, that is a pleasant sight," said the old watchmaker. "I know what it is to work in gold; but give the worker in iron after all is said and done. He sets his labor upon a reality. What say you, daughter Annie?"

"Pray don't speak so loud, father," whispered Annie. "Robert Danforth will hear you."

"And what if he should hear me?" said Peter Hovenden. "I say again, it is a good and a wholesome thing to depend upon main strength and reality, and to earn one's bread with the bare and brawny arm of a blacksmith. A watchmaker gets his brain puzzled by wheels within a wheel, or loses his health or the rest of his eyesight, as was my case, and finds himself in middle age, or a little after, past labor at his own trade and fit for nothing else, yet too poor to live at his ease. So I say once again, give me main strength for my money. And then, how it takes the nonsense out of a man! Have you ever hear of a blacksmith being such a fool as Owen Warland yonder?"

"Well said, uncle Hovenden!" shouted Robert Danforth from the forge, in a full, deep, merry voice, which made the roof re-echo. "And what says Miss Annie to that doctrine? She, I suppose, will think it a genteel business to tinker up a lady's watch than to forge a horse shoe or make a gridiron."

Annie drew her father onward without giving time for reply.

But we must return to Owen Warland's shop, to spend more meditation upon his history and character than either Peter Hovenden, or probably his daughter Annie, or Owen's old school-fellow, Robert Danforth would have thought due to so slight a subject. From the time that his little fingers could grasp a penknife Owen had been remarkable for a delicate ingenuity, which sometimes produced pretty shapes in wood, principal figures of flowers and birds, and sometimes seemed to dwell at the hidden mysteries of mechanism. But it was always

11 seek . . . motion, the attempt, often made in times past, to invent a machine perpetually supplying its own motive forces independent of any action from without

for purposes of grace, and never with any mockery of the useful. He did not, like the crowd of school-boy artisans, construct little windmills on the angle of a barn or watermills across the neighboring brook. Those who discovered such peculiarity in the boy as to think it worth their while to observe him closely, sometimes saw reason to suppose that he was attempting to imitate the beautiful movements of Nature as exemplified in the flight of birds or the activity of little animals. It seemed, in fact, a new development of the love of the beautiful, such as might have made him a poet, a painter, or a sculptor, and which was as completely refined from all utilitarian coarseness as it could have been in either of the fine arts. He looked with singular distaste at the stiff and regular processes of ordinary machinery. Being once carried to see a steam-engine, in the expectation that his intuitive comprehension of mechanical principles would be gratified, he turned pale and grew sick, as if something monstrous and unnatural had been presented to him. This horror was partly owing to the size and terrible energy of the iron laborer; for the character of Owen's mind was microscopic, and tended naturally to the minute, in accordance with his diminutive frame and the marvellous smallness and delicate power of his fingers. Not that his sense of beauty was thereby diminished into a sense of prettiness. The beautiful idea has no relation to size, and may be as perfectly developed in a space too minute for any but microscopic investigation as within the ample verge that is measured by the arc of the rainbow. But, at all events, this characteristic minuteness in his objects and accomplishments made the world even more incapable than it might otherwise have been of appreciating Owen Warland's genius. The boy's relatives saw nothing better to be done—as perhaps there was not—than to bind him apprentice to a watchmaker, hoping that his strange ingenuity might thus be regulated and put to utilitarian purposes.

Peter Hovenden's opinion of his apprentice has already been expressed. He could make nothing of the lad. Owen's apprehension of the professional mysteries, it is true, were inconceivably quick, but he altogether forgot or despised the grand object of a watchmaker's business, and cared no more for the measurement of time than if it had been merged into eternity. So long, however, as he remained under his old master's care, Owen's lack of sturdiness made it possible, by strict injunctions and sharp

oversight, to restrain his creative eccentricity within bounds, but when his apprenticeship was served out, and he had taken the little shop which Peter Hovenden's failing eyesight compelled him to relinquish, then did people recognize how unfit a person was Owen Warland to lead old blind Father Time along his daily course. One of his most rational projects was to connect a musical operation with the machinery of his watches, so that all the harsh dissonances of life might be rendered tuneful, and each flitting moment fall into the abyss of the past in golden drops of harmony. If a family clock was intrusted to him for repair,—one of those tall, ancient clocks that have grown nearly allied to human nature by measuring out the lifetime of many generations,—he would take upon himself to arrange a dance or funeral procession of figures across its venerable face, representing twelve mirthful or melancholy hours. Several freaks of this kind quite destroyed the young watchmaker's credit with that steady and matter-of-fact class of people who hold the opinion that time is not to be trifled with, whether considered as the medium of advancement and prosperity in this world or preparation for the next. His custom rapidly diminished—a misfortune, however, that was probably reckoned among his better accidents by Owen Warland, who was becoming more and more absorbed in a secret occupation which drew all his science and manual dexterity into itself, and likewise gave full employment to the characteristic tendencies of his genius. This pursuit had already consumed many months

After the old watchmaker and his pretty daughter had gazed at him out of the obscurity of the street, Owen Warland was seized with a fluttering of the nerves, which made his hand tremble too violently to proceed with such delicate labor as he was now engaged upon

"It was Annie herself!" murmured he. "I should have known it, by this throbbing of my heart, before I heard her father's voice. Ah, how it throbs! I shall scarcely be able to work again on this exquisite mechanism to-night. Annie! dearest Annie! thou shouldst give firmness to my heart and hand, and not shake them thus; for if I strive to put the very spirit of beauty into form and give it

26 The beautiful . . . rainbow. Hawthorne perhaps thought of his work in the short tale as exemplifying this principle. The sentence is reminiscent of Ben Jonson's "In small proportions we just beauties see" from "A Pindaric Ode"

motion, it is for thy sake alone. O throbbing heart, be quiet! If my labor be thus thwarted, there will come vague and unsatisfied dreams which will leave me spiritless to-morrow."

As he was endeavoring to settle himself again to his task, the shop door opened and gave admittance to no other than the stalwart figure which Peter Hovenden had paused to admire, as seen amid the light and shadow of the blacksmith's shop. Robert Danforth had brought
10 a little anvil of his own manufacture, and peculiarly constructed, which the young artist had recently bespoken. Owen examined the article and pronounced it fashioned according to his wish.

"Why, yes," said Robert Danforth, his strong voice filling the shop as with the sound of a bass viol. "I consider myself equal to anything in the way of my own trade, though I should have made but a poor figure at yours with such a fist as this," added he, laughing, as he laid his vast hand beside the delicate one of Owen. "But
20 what then? I put more main strength into one blow of my sledge hammer than all that you have expended since you were a 'prentice. Is not that the truth?"

"Very probably," answered the low and slender voice of Owen. "Strength is an earthly monster. I make no pretensions to it. My force, whatever there may be of it, is altogether spiritual."

"Well, but, Owen, what are you about?" asked his old school-fellow, still in such a hearty volume of tone that it made the artist shrink, especially as the question
30 related to a subject so sacred as the absorbing dream of his imagination. "Folks do say that you are trying to discover the perpetual motion."

"The perpetual motion? Nonsense!" replied Owen Warland, with a movement of disgust, for he was full of little petulances. "It can never be discovered. It is a dream that may delude men whose brains are mystified with matter, but not me. Besides, if such a discovery were possible, it would not be worth my while to make it only to have the secret turned to such purposes as are now
40 effected by steam and water power. I am not ambitious to be honored with the paternity of a new kind of cotton machine."

"That would be droll enough!" cried the blacksmith, breaking out into such an uproar of laughter that Owen himself and the bell glasses on his work-board quivered in unison. "No, no, Owen! No child of yours will have

iron joints and sinews. Well, I won't hinder you more. Good night, Owen, and success, and if you any assistance, so far as a downright blow of har upon anvil will answer the purpose, I'm your man."

And with another laugh the man of main strength left the shop.

"How strange it is," whispered Owen Warland to self, leaning his head upon his hand, "that all my mus my purposes, my passion for the beautiful, my consciousness of power to create it,—a finer, more ethereal power of which this earthly giant can have no conception,—all, look so vain and idle whenever my path is crossed by Robert Danforth! He would drive me mad were he to meet him often. His hard, brute force darkens and fuses the spiritual element within me, but I, too, will be strong in my own way. I will not yield to him."

He took from beneath a glass a piece of machinery, which he set in the condensed light of a lamp, and, looking intently at it through a magnifying glass, proceeded to operate with a delicate instrument of steel. In an instant, however, he fell back in his chair and clasped his hands, with a look of horror on his face that made its small features as impressive as those of a giant would have been.

"Heaven! What have I done?" exclaimed he. "The vapor, the influence of that brute force,—it has wildered me and obscured my perception. I have met the very stroke—the fatal stroke—that I have dreamed of from the first. It is all over—the toil of months, the object of my life. I am ruined!"

And there he sat, in strange despair, until his lamp flickered in the socket and left the Artist of the Beautiful in darkness.

Thus it is that ideas, which grow up within the imagination and appear so lovely to it and of a value beyond whatever men call valuable, are exposed to be shattered and annihilated by contact with the practical. It is requisite for the ideal artist to possess a force of character that seems hardly compatible with its delicacy; he must keep his faith in himself while the incredulous world assails him with its utter disbelief, he must stand up against mankind and be his own sole disciple, both as respects his genius and the objects to which it is directed.

For a time Owen Warland succumbed to this severe but inevitable test. He spent a few sluggish weeks with his head so continually resting in his hands that

towns-people had scarcely an opportunity to see his countenance. When at last it was again uplifted to the light of day, a cold, dull, nameless change was perceptible upon it. In the opinion of Peter Hovenden, however, and that order of sagacious understandings who think that life should be regulated, like clockwork, with leaden weights, the alteration was entirely for the better. Owen now, indeed, applied himself to business with dogged industry. It was marvellous to witness the obtuse gravity
10 with which he would inspect the wheels of a great old silver watch, thereby delighting the owner, in whose fob it had been worn till he deemed it a portion of his own life, and was accordingly jealous of its treatment. In consequence of the good report thus acquired, Owen Warland was invited by the proper authorities to regulate the clock in the church steeple. He succeeded so admirably in this matter of public interest that the merchants gruffly acknowledged his merits on 'Change, the nurse whispered his praises as she gave the potion in the sick-chamber,
20 the lover blessed him at the hour of appointed interview, and the town in general thanked Owen for the punctuality of dinner time. In a word, the heavy weight upon his spirits kept everything in order, not merely within his own system, but wheresoever the iron accents of the church clock were audible. It was a circumstance, though minute, yet characteristic of his present state, that, when employed to engrave names or initials on silver spoons, he now wrote the requisite letters in the plainest possible style, omitting a variety of fanciful flourishes that had heretofore distinguished his work in this kind

One day, during the era of this happy transformation, old Peter Hovenden came to visit his former apprentice

"Well, Owen," said he, "I am glad to hear such good accounts of you from all quarters, and especially from the town clock yonder, which speaks in your commendation every hour of the twenty-four. Only get rid altogether of your nonsensical trash about the beautiful, which I nor nobody else, nor yourself to boot, could ever understand, —only free yourself of that, and your success in life is as
4 sure as daylight. Why, if you go on in this way, I should even venture to let you doctor this precious old watch of mine, though, except my daughter Annie, I have nothing else so valuable in the world."

"I should hardly dare touch it, sir," replied Owen, in a depressed tone; for he was weighed down by his old master's presence.

"In time," said the latter,—"in time, you will be capable of it."

The old watchmaker, with the freedom naturally consequent on his former authority, went on inspecting the
50 work which Owen had in hand at the moment, together with other matters that were in progress. The artist, meanwhile, could scarcely lift his head. There was nothing so antipodal to his nature as this man's cold, unimaginative sagacity, by contact with which everything was converted into a dream except the densest matter of the physical world. Owen groaned in spirit and prayed fervently to be delivered from him.

But what is this?" cried Peter Hovenden abruptly, taking up a dusty bell glass, beneath which appeared a
60 mechanical something, as delicate and minute as the system of a butterfly's anatomy. "What have we here?" Owen! Owen! there is witchcraft in these little chains, and wheels, and paddles. See! with one pinch of my finger and thumb I am going to deliver you from all future peril."

"For Heaven's sake," screamed Owen Warland, springing up with wonderful energy, "as you would not drive me mad, do not touch it! The slightest pressure of your finger would ruin me forever."
70

'Aha, young man! And is it so?" said the old watchmaker, looking at him with just enough of penetration to torture Owen's soul with the bitterness of worldly criticism. "Well, take your own course; but I warn you again that in this small piece of mechanism lives your evil spirit. Shall I exorcise him?"

"You are my evil spirit," answered Owen, much excited,—“you and the hard, coarse world! The leaden thoughts and the despondency that you fling upon me are my clogs, else I should long ago have achieved the
80 task that I was created for."

Peter Hovenden shook his head, with the mixture of contempt and indignation which mankind, of whom he was partly a representative, deem themselves entitled to feel towards all simpletons who seek other prizes than the dusty one along the highway. He then took his leave, with an uplifted finger and a sneer upon his face that haunted the artist's dreams for many a night afterwards. At the time of his old master's visit, Owen was probably on the point of taking up the relinquished task; but, by
90 this sinister event, he was thrown back into the state whence he had been slowly emerging.

But the innate tendency of his soul had only been accumulating fresh vigor during its apparent sluggishness. As the summer advanced he almost totally relinquished his business, and permitted Father Time, so far as the old gentleman was represented by the clocks and watches under his control, to stray at random through human life, making infinite confusion among the train of bewildered hours. He wasted the sunshine, as people said, in wandering through the woods and fields and
 10 along the banks of streams. There, like a child, he found amusement in chasing butterflies or watching the motions of water insects. There was something truly mysterious in the intentness with which he contemplated these living playthings as they sported on the breeze or examined the structure of an imperial insect whom he had imprisoned. The chase of butterflies was an apt emblem of the ideal pursuit in which he had spent so many golden hours, but would the beautiful idea ever be yielded to his hand like the butterfly that symbolized
 20 it? Sweet, doubtless, were these days, and congenial to the artist's soul. They were full of bright conceptions, which gleamed through his intellectual world as the butterflies gleamed through the outward atmosphere, and were real to him, for the instant, without the toil, and perplexity, and many disappointments of attempting to make them visible to the sensual eye. Alas that the artist, whether in poetry, or whatever other material, may not content himself with the inward enjoyment of the beautiful, but must chase the flitting mystery beyond the
 30 verge of his ethereal domain, and crush its frail being in seizing it with material grasp. Owen Warland felt the impulse to give external reality to his ideas as irresistibly as any of the poets or painters who have arrayed the world in a dimmer and fainter beauty, imperfectly copied from the richness of their visions.

The night was now his time for the slow progress of re-creating the one idea to which all his intellectual activity referred itself. Always at the approach of dusk he stole into the town, locked himself within his shop,
 40 and wrought with patient delicacy of touch for many hours. Sometimes he was startled by the rap of the watchman, who, when all the world should be asleep, had caught the gleam of lamplight through the crevices of Owen Warland's shutters. Daylight, to the morbid sensibility of his mind, seemed to have an intrusiveness that interfered with his pursuits. On cloudy and inclem-

ent days, therefore, he sat with his head upon his hand muffling, as it were, his sensitive brain in a mist of indefinite musings, for it was a relief to escape from the sharp distinctness with which he was compelled to shape out his thoughts during his nightly toil.

From one of these fits of torpor he was aroused by the entrance of Annie Hovenden, who came into the shop with the freedom of a customer, and also with something of the familiarity of a childish friend. She had worn a hole through her silver thimble, and wanted Owen to repair it.

"But I don't know whether you will condescend to such a task," said she, laughing, "now that you are so taken up with the notion of putting spirit into machinery."

"Where did you get that idea, Annie?" said Owen, starting in surprise.

"Oh, out of my own head," answered she, "and from something that I heard you say, long ago, when you were but a boy and I a little child. But come; will you mend this poor thimble of mine?"

"Anything for your sake, Annie," said Owen Warland—"anything, even were it to work at Robert Danforth's forge."

"And that would be a pretty sight!" retorted Annie, glancing with imperceptible slightness at the artist's small and slender frame. "Well, here is the thimble."

"But that is a strange idea of yours," said Owen, "about the spiritualization of matter."

And then the thought stole into his mind that this young girl possessed the gift to comprehend him better than all the world besides. And what a help and strength would it be to him in his lonely toil if he could gain the sympathy of the only being whom he loved! To persons whose pursuits are insulated from the common business of life—who are either in advance of mankind or apart from it—there often comes a sensation of morbid cold that makes the spirit shiver as if it had reached the frozen solitudes around the pole. What the prophet, the poet, the reformer, the criminal, or any other man with human yearnings, but separated from the multitude by a peculiar lot, might feel, poor Owen felt.

"Annie," cried he, growing pale as death at the thought, "how gladly would I tell you the secret of my pursuit! You, methinks, would estimate it rightly. You, I know, would hear it with a reverence that I must not expect from the harsh material world."

"Would I not? to be sure I would!" replied Annie Hovenden, lightly laughing. "Come, explain to me quickly what is the meaning of this little whirling, so delicately wrought that it might be a plaything for Queen Mab. See! I will put it in motion."

"Hold!" exclaimed Owen, "hold!"

Annie had but given the slightest possible touch, with the point of a needle, to the same minute portion of complicated machinery which has been more than once mentioned, when the artist seized her by the wrist with a force that made her scream aloud. She was affrighted at the convulsion of intense rage and anguish that writhed across his features. The next instant he let his head sink upon his hands.

"Go, Annie," murmured he; "I have deceived myself, and must suffer for it. I yearned for sympathy and thought, and fancied, and dreamed that you might give it me, but you lack the talisman, Annie, that should admit you into my secrets. That touch has undone the toil of months and the thought of a lifetime! It was not your fault, Annie, but you have ruined me!"

Poor Owen Warland! He had indeed erred, yet pardonably, for if any human spirit could have sufficiently revered the processes so sacred in his eyes, it must have been a woman's. Even Annie Hovenden, possibly, might not have disappointed him had she been enlightened by the deep intelligence of love.

The artist spent the ensuing winter in a way that satisfied any persons who had hitherto retained a hopeful opinion of him that he was, in truth, irrevocably, doomed to inutility as regarded the world, and to an evil destiny on his own part. The decease of a relative had put him in possession of a small inheritance. Thus freed from the necessity of toil, and having lost the steadfast influence of a great purpose,—great, at least, to him,—he abandoned himself to habits from which it might have been supposed the mere delicacy of his organization would have availed to secure him. But when the ethereal portion of a man of genius is obscured, the earthly part assumes an influence the more uncontrollable, because the character is now thrown off the balance to which Providence had so nicely adjusted it, and which, in coarser natures, is adjusted by some other method. Owen Warland made proof of whatever show of bliss may be found in riot. He looked at the world through the golden medium of wine, and contemplated the visions that bubble up so

gayly around the brim of the glass, and that people the air with shapes of pleasant madness, which so soon grow ghostly and forlorn. Even when this dismal and inevitable change had taken place, the young man might still have continued to quaff the cup of enchantments, though its vapor did but shroud life in gloom and fill the gloom with spectres that mocked at him. There was a certain irksomeness of spirit, which, being real, and the deepest sensation of which the artist was now conscious, was more intolerable than any fantastic miseries and horrors that the abuse of wine could summon up. In the latter case he could remember, even out of the midst of his trouble, that all was but a delusion, in the former, the heavy anguish was his actual life.

From this perilous state he was redeemed by an incident which more than one person witnessed, but of which the shrewdest could not explain or conjecture the operation on Owen Warland's mind. It was very simple. On a warm afternoon of spring, as the artist sat among his riotous companions with a glass of wine before him, a splendid butterfly flew in at the open window and fluttered about his head.

"Ah," exclaimed Owen, who had drank freely, "are you alive again, child of the sun and playmate of the summer breeze, after your dismal winter's nap? Then it is time for me to be at work!"

And, leaving his unemptied glass upon the table, he departed and was never known to sip another drop of wine.

And now, again, he resumed his wanderings in the woods and fields. It might be fancied that the bright butterfly, which had come so spirit-like into the window as Owen sat with the rude revellers, was indeed a spirit commissioned to recall him to the pure, ideal life that had so etherealized him among men. It might be fancied that he went forth to seek this spirit in its sunny haunts; for still, as in the summer time gone by, he was seen to steal gently up wherever a butterfly had alighted, and lose himself in contemplation of it. When it took flight his eyes followed the winged vision, as if its airy track would show the path to heaven. But what could be the purpose

5 Queen Mab, "the fairies' midwife," who delivers men of their dreams. See the famous description in *Romeo and Juliet*, Act I, Scene iv, ll. 53-94. Hawthorne's idea of a "spiritualized mechanism" as presented in this story may have owed something to Shakespeare's description of Queen Mab's chariot.

of the unseasonable toil, which was again resumed, as the watchman knew by the lines of lamplight through the crevices of Owen Warland's shutters? The towns-people had one comprehensive explanation of all these singularities—Owen Warland had gone mad! How universally efficacious—how satisfactory, too, and soothing to the injured sensibility of narrowness and dulness—is this easy method of accounting for whatever lies beyond the world's most ordinary scope! From St. Paul's days down
10 to our poor little Artist of the Beautiful, the same talisman had been applied to the elucidation of all mysteries in the words or deeds of men who spoke or acted too wisely or too well. In Owen Warland's case the judgment of his towns-people may have been correct. Perhaps he was mad. The lack of sympathy—that contrast between himself and his neighbors which took away the restraint of example—was enough to make him so. Or possibly he had caught just so much of the ethereal radiance as served to bewilder him, in an earthly sense, by its inter-
20 mixture with the common daylight.

One evening, when the artist had returned from a customary ramble and had just thrown the lustre of his lamp on the delicate piece of work so often interrupted, but still taken up again as if his fate were embodied in its mechanism, he was surprised by the entrance of old Peter Hovenden. Owen never met this man without a shrinking of the heart. Of all the world he was most terrible, by reason of a keen understanding which saw so distinctly what it did see, and
30 disbelieved so uncompromisingly in what it could not see. On this occasion the old watchmaker had merely a gracious word or two to say.

"Owen, my lad," said he, "we must see you at my house to-morrow night."

The artist began to mutter some excuse.

"Oh, but it must be so," quoth Peter Hovenden, "for the sake of the days when you were one of the household. What, my boy! don't you know that my daughter Annie is engaged to Robert Danforth? We are making
40 an entertainment, in our humble way, to celebrate the event."

"Ah!" said Owen.

That little monosyllable was all he uttered; its tone seemed cold and unconcerned to an ear like Peter Hovenden's; and yet there was in it the stifled outcry of the poor artist's heart, which he compressed within

him like a man holding down an evil spirit. One slight outbreak, however, imperceptible to the old watchmaker, he allowed himself. Raising the instrument with which he was about to begin his work, he let it fall upon the little system of machinery that had, and cost him months of thought and toil. It was shattered by the stroke!

Owen Warland's story would have been no tolerable representation of the troubled life of those who strive to create the beautiful, if, amid all other thwarting influences, love had not interposed to steal the cunning from his hand. Outwardly he had been no ardent enterprising lover, the career of his passion had confined its tumults and vicissitudes so entirely within the artist's imagination that Annie herself had scarcely more than a woman's intuitive perception of it; but in Owen's view, it covered the whole field of his life. Forgetful of the time when she had shown herself capable of any deep response, he had persisted in connecting all his dreams of artistical success with Annie's image, she was the visible shape in which the spiritual power that he worshipped, and on whose altar he hoped to lay a not unworthy offering, was made manifest to him. Of course he had deceived himself; there were no such attributes in Annie Hovenden as his imagination had endowed her with. She, in the aspect which she wore to his inward vision, was as much a creature of his own as the mysterious piece of mechanism would be were it ever realized. Had he become convinced of his mistake through the medium of successful love,—had he won Annie to his bosom, and there beheld her fade from angel into ordinary woman—the disappointment might have driven him back with concentrated energy, upon his sole remaining object. On the other hand, had he found Annie when he fancied, his lot would have been so rich in beauty that out of its mere redundancy he might have wrought the beautiful into many a worthier type than he had toiled for; but the guise in which his sorrow came to him, the sense that the angel of his life had been snatched away and given to a rude man of earth and iron, who could neither need nor appreciate her ministrations.

9 St. Paul's. The reference is to Acts 26:24. " . . . Festus said with loud voice, Paul, thou art beside thyself, much learning doth make thee mad."

tions,—this was the very perversity of fate that makes human existence appear too absurd and contradictory to be the scene of one other hope or one other fear. There was nothing left for Owen Warland but to sit down like a man that had been stunned.

He went through a fit of illness. After his recovery his small slender frame assumed an obtuser garniture of flesh than it had ever before worn. His thin cheeks became round; his delicate little hand, so spiritually fashioned to achieve fairy task-work, grew plumper than the hand of a thriving infant. His aspect had a childishness such as might have induced a stranger to pat him on the head—pausing, however, in the act, to wonder what manner of child was here. It was as if the spirit had gone out of him, leaving the body to flourish in a sort of vegetable existence. Not that Owen Warland was idiotic. He could talk, and not irrationally. Somewhat of a babbler, indeed, did people begin to think him, for he was apt to discourse at wearisome length of marvels of mechanism that he had read about in books, but which he had learned to consider as absolutely fabulous. Among them he enumerated the Man of Brass, constructed by Albertus Magnus, and the Brazen Head of Friar Bacon, and, coming down to later times, the automata of a little coach and horses, which it was pretended had been manufactured for the Dauphin of France, together with an insect that buzzed about the ear like a living fly, and yet was but a contrivance of minute steel springs. There was a story, too, of a duck that waddled and quacked, and ate, though, had any honest citizen purchased it for dinner, he would have found himself cheated with the mere mechanical apparition of a duck.

"But all these accounts," said Owen Warland, "I am now satisfied are mere impositions."

Then, in a mysterious way, he would confess that he once thought differently. In his idle and dreamy days he had considered it possible, in a certain sense to spiritualize machinery, and to combine with the new species of life and motion thus produced a beauty that should attain to the ideal which Nature has proposed to herself in all her creatures, but has never taken pains to realize. He seemed, however, to retain no very distinct perception either of the process of achieving this object or of the design itself.

"I have thrown it all aside now," he would say. "It

was a dream such as young men are always mystifying themselves with. Now that I have acquired a little common sense, it makes me laugh to think of it."

Poor, poor and fallen Owen Warland! These were ⁵⁰ the symptoms that he had ceased to be an inhabitant of the better sphere that lies unseen around us. He had lost his faith in the invisible, and now prided himself, as such unfortunates invariably do, in the wisdom which rejected much that even his eye could see, and trusted confidently in nothing but what his hand could touch. This is the calamity of men whose spiritual part dies out of them and leaves the grosser understanding to assimilate them more and more to the things of which alone it can take cognizance, but in Owen Warland the spirit was ⁶⁰ not dead nor passed away, it only slept.

How it awoke again is not recorded. Perhaps the torpid slumber was broken by a convulsive pain. Perhaps, as in a former instance, the butterfly came and hovered about his head and re-inspired him,—as indeed this creature of the sunshine had always a mysterious mission for the artist,—re-inspired him with the former purpose of his life. Whether it were pain or happiness that thrilled through his veins, his first impulse was to thank Heaven for rendering him again the being of thought, ⁷⁰ imagination, and keenest sensibility that he had long ceased to be.

"Now for my task," said he. "Never did I feel such strength for it as now."

Yet, strong as he felt himself, he was incited to toil the more diligently by an anxiety lest death should surprise him in the midst of his labors. This anxiety, perhaps, is common to all men who set their hearts upon anything so high, in their own view of it, that life becomes of importance only as conditional to its accom- ⁸⁰ plishment. So long as we love life for itself, we seldom dread the losing it. When we desire life for the attainment of an object, we recognize the frailty of its texture. But, side by side with this sense of insecurity, there is a vital faith in our invulnerability to the shaft of death while engaged in any task that seems assigned by Provi-

23 Albertus Magnus (1193-1280), Bavarian philosopher and schoolman.
• 23 Brazen . . . Bacon. Friar Bacon (1214-1294) was an English philosopher who, according to legend, made a head of brass.
• 26 Dauphin, from 1349 to 1830, the title of the eldest son of the king of France, here the reference is specifically to the son of Louis XVI.

dence as our proper thing to do, and which the world would have cause to mourn for should we leave it unaccomplished. Can the philosopher, big with the inspiration of an idea that is to reform mankind, believe that he is to be beckoned from this sensible existence at the very instant when he is mustering his breath to speak the word of light? Should he perish so, the weary ages may pass away—the world's, whose life sand may fall, drop by drop—before another intellect is prepared to develop the truth that might have been uttered then. But history affords many an example where the most precious spirit, at any particular epoch manifested in human shape, has gone hence untimely, without space allowed him, so far as mortal judgment could discern, to perform his mission on the earth. The prophet dies, and the man of torpid heart and sluggish brain lives on. The poet leaves his song half sung, or finishes it, beyond the scope of mortal ears, in a celestial choir. The painter—as Allston did—leaves half his conception on the canvas to sadden us with its imperfect beauty, and goes to picture forth the whole, if it be no irreverence to say so, in the hues of heaven. But rather such incomplete designs of this life will be perfected nowhere. This so frequent abortion of man's dearest projects must be taken as a proof that the deeds of earth, however etherealized by piety or genius, are without value, except as exercises and manifestations of the spirit. In heaven, all ordinary thought is higher and more melodious than Milton's song. Then, would he add another verse to any strain that he had left unfinished here?

But to return to Owen Warland. It was his fortune, good or ill, to achieve the purpose of his life. Pass we over a long space of intense thought, yearning effort, minute toil, and wasting anxiety, succeeded by an instant of solitary triumph: let all this be imagined, and then behold the artist, on a winter evening, seeking admittance to Robert Danforth's fireside circle. There he found the man of iron, with his massive substance thoroughly warmed and attempered by domestic influences. And there was Annie, too, now transformed into a matron, with much of her husband's plain and sturdy nature, but imbued, as Owen Warland still believed, with a finer grace, that might enable her to be the interpreter between strength and beauty. It happened, likewise, that old Peter Hovenden was a guest this evening at his daughter's fireside, and it was his well-

remembered expression of keen, cold criticism that encountered the artist's glance.

"My old friend Owen!" cried Robert Danforth, star up, and compressing the artist's delicate fingers with a hand that was accustomed to gripe bars of iron. "' is kind and neighborly to come to us at last. I am afraid your perpetual motion had bewitched you out of the remembrance of old times"

"We are glad to see you," said Annie, while a blushed reddened her matronly cheek. "It was not like a friend to stay from us so long"

"Well, Owen," inquired the old watchmaker, as first greeting, "how comes on the beautiful? Have you created it at last?"

The artist did not immediately reply, being startled by the apparition of a young child of strength that was tumbling about on the carpet,—a little personage who had come mysteriously out of the infinite, but with something so sturdy and real in his composition that he seemed moulded out of the densest substance which earth could supply. This hopeful infant crawled toward the new-comer, and setting himself on end, as Robert Danforth expressed the posture, stared at Owen with a look of such sagacious observation that the mother could not help exchanging a proud glance with her husband. But the artist was disturbed by the child's look, as implying a resemblance between it and Peter Hovenden's habitual expression. He could have fancied that the old watchmaker was compressed into this baby shape, a looking out of those baby eyes, and repeating, as he never did, the malicious question —

"The beautiful, Owen! How comes on the beautiful? Have you succeeded in creating the beautiful?"

"I have succeeded," replied the artist, with a momentary light of triumph in his eyes and a smile of sunshine yet steeped in such depth of thought that it was almost sadness. "Yes, my friends, it is the truth. I have succeeded."

"Indeed!" cried Annie, a look of maiden mirthfulness peeping out of her face again. "And is it lawful now, to inquire what the secret is?"

"Surely; it is to disclose it that I have come," answered

3 big, pregnant • 8 sand, of the hourglass • 19 Allston. Washington Allston (1779-1843) left his picture "Belshazzar's Feast" unfinished at his death

Owen Warland. "You shall know, and see, and touch, and possess the secret! For, Annie,—if by that name I may still address the friend of my boyish years,—Annie, it is for your bridal gift that I have wrought this spiritualized mechanism, this harmony of motion, this mystery of beauty. It comes late, indeed, but it is as we go onward in life, when objects begin to lose their freshness of hue and our souls their delicacy of perception, that the spirit of beauty is most needed. If,—forgive me, Annie,—if you know how to value this gift, it can never come too late."

He produced, as he spoke, what seemed a jewel box. It was carved richly out of ebony by his own hand, and inlaid with a fanciful tracery of pearl, representing a boy in pursuit of a butterfly, which, elsewhere, had become a winged spirit, and was flying heavenward, while the boy, or youth, had found such efficacy in his strong desire that he ascended from earth to cloud, and from cloud to celestial atmosphere, to win the beautiful. This case of ebony the artist opened, and bade Annie place her finger on its edge. She did so, but almost screamed as a butterfly fluttered forth, and, alighting on her finger's tip, sat waving the ample magnificence of its purple and gold-speckled wings, as if in prelude to a flight. It is impossible to express by words the glory, the splendor, the delicate gorgeousness which were softened into the beauty of this object. Nature's ideal butterfly was here realized in all its perfection, not in the pattern of such faded insects as flit among earthly flowers, but of those which hover across the meads of paradise for child-angels and the spirits of departed infants to disport themselves with. The rich down was visible upon its wings, the lustre of its eyes seemed instinct with spirit. The firelight glimmered around this wonder—the candles gleamed upon it, but it glistened apparently by its own radiance, and illuminated the finger and outstretched hand on which it rested with a white gleam like that of precious stones. In its perfect beauty, the consideration of size was entirely lost. Had its wings overreached the firmament, the mind could not have been more filled or satisfied.

"Beautiful! beautiful!" exclaimed Annie. "Is it alive? Is it alive?"

"Alive? To be sure it is," answered her husband. "Do you suppose any mortal has skill enough to make a butterfly, or would put himself to the trouble of making

one, when any child may catch a score of them in a summer's afternoon? Alive? Certainly! But this pretty box is undoubtedly of our friend Owen's manufacture, and really it does him credit."

50

At this moment the butterfly waved its wings anew, with a motion so absolutely lifelike that Annie was startled, and even awestricken, for, in spite of her husband's opinion, she could not satisfy herself whether it was indeed a living creature or a piece of wondrous mechanism.

"Is it alive?" she repeated, more earnestly than before.

"Judge for yourself," said Owen Warland, who stood gazing in her face with fixed attention.

The butterfly now flung itself upon the air, fluttered 60 round Annie's head, and soared into a distant region of the parlor, still making itself perceptible to sight by the starry gleam in which the motion of its wings enveloped it. The infant on the floor followed its course with his sagacious little eyes. After flying about the room, it returned in a spiral curve and settled again on Annie's finger.

"But is it alive?" exclaimed she again, and the finger on which the gorgeous mystery had alighted was so tremulous that the butterfly was forced to balance him- 70 self with his wings. "Tell me if it be alive, or whether you created it."

"Wherefore ask who created it, so it be beautiful?" replied Owen Warland. "Alive? Yes, Annie, it may well be said to possess life, for it has absorbed my own being into itself, and in the secret of that butterfly, and in its beauty,—which is not merely outward, but deep as its whole system,—is represented the intellect, the imagination, the sensibility, the soul of an Artist of the Beautiful! Yes, I created it. But"—and here his coun- 80 tenance somewhat changed—"this butterfly is not now to me what it was when I beheld it afar off in the day-dreams of my youth."

"Be it what it may, it is a pretty plaything," said the blacksmith, grinning with childlike delight. "I wonder whether it would condescend to alight on such a great clumsy finger as mine? Hold it hither, Annie."

By the artist's direction, Annie touched her finger's tip to that of her husband, and, after a momentary delay, the butterfly fluttered from one to the other. It preluded 90 a second flight by a similar, yet not precisely the same, waving of wings as in the first experiment; then, ascend-

ing from the blacksmith's stalwart finger, it rose in a gradually enlarging curve to the ceiling, made one wide sweep around the room, and returned with an undulating movement to the point whence it had started.

"Well, that does beat all nature!" cried Robert Danforth, bestowing the heartiest praise that he could find expression for, and, indeed, had he paused there, a man of finer words and nicer perception could not easily have said more. "That goes beyond me, I confess. But
10 what then? There is more real use in one downright blow of my sledge hammer than in the whole five years labor that our friend Owen has wasted on this butterfly."

Here the child clapped his hands and made a great babble of indistinct utterance, apparently demanding that the butterfly should be given him for a plaything.

Owen Warland, meanwhile, glanced sidelong at Annie, to discover whether she sympathized in her husband's estimate of the comparative value of the beautiful and the practical. There was, amid all her kindness towards
20 himself, amid all the wonder and admiration with which she contemplated the marvelous work of his hands and incarnation of his idea, a secret scorn—too secret, perhaps, for her own consciousness, and perceptible only to such intuitive discernment as that of the artist. But Owen, in the latter stages of his pursuit, had risen out of the region in which such a discovery might have been torture. He knew that the world, and Annie as the representative of the world, whatever praise might be bestowed, could never say the fitting word nor feel the
30 fitting sentiment which should be the perfect recompense of an artist who, symbolizing a lofty moral by a material trifle,—converting what was earthly to spiritual gold,—had won the beautiful into his handiwork. Not at this latest moment was he to learn that the reward of all high performance must be sought within itself, or sought in vain. There was, however, a view of the matter which Annie and her husband, and even Peter Hovenden, might fully have understood, and which would have satisfied them that the toil of years had here been worthily be-
40 stowed. Owen Warland might have told them that this butterfly, this plaything, this bridal gift of a poor watchmaker to a blacksmith's wife, was, in truth, a gem of art that a monarch would have purchased with honors and abundant wealth, and have treasured it among the jewels of his kingdom as the most unique and wondrous of them all. But the artist smiled and kept the secret to himself.

"Father," said Annie, thinking that a word of praise from the old watchmaker might gratify his fond apprentice, "do come and admire this pretty butterfly."

"Let us see," said Peter Hovenden, rising from his chair, with a sneer upon his face that always made people doubt, as he himself did, in everything but a man's existence. "Here is my finger for it to alight upon; I shall understand it better when once I have touched it."

But, to the increased astonishment of Annie, when the tip of her father's finger was pressed against that of her husband, on which the butterfly still rested, the insect drooped its wings and seemed on the point of falling to the floor. Even the bright spots of gold upon its wings and body, unless her eyes deceived her, grew dim, and the glowing purple took a dusky hue, and the soft lustre that gleamed around the blacksmith's hand became faint and vanished.

"It is dying! it is dying!" cried Annie, in alarm.

"It has been delicately wrought," said the artist, calmly. "As I told you, it has imbibed a spiritual essence—call it magnetism, or what you will. In an atmosphere of doubt and mockery its exquisite susceptibility suffers torture; does the soul of him who instilled his own life in it. It has already lost its beauty, in a few moments more the mechanism would be irreparably injured."

"Take away your hand, father!" entreated Annie, turning pale. "Here is my child, let it rest on his father's hand. There, perhaps, its life will revive and its colors grow brighter than ever."

Her father, with an acrid smile, withdrew his finger. The butterfly then appeared to recover the power of voluntary motion, while its hues assumed much of their original lustre, and the gleam of starlight, which was its most ethereal attribute, again formed a halo round it. At first, when transferred from Robert Danforth's hand to the small finger of the child, this radiance was so powerful that it positively threw the little fellow's shadow back against the wall. He, meanwhile, extended his plump hand as he had seen his father and mother do, and watched the waving of the insect's wings with faint delight. Nevertheless, there was a certain expression of sagacity that made Owen Warland

34 the reward . . . itself. Hawthorne here speaks in the to Milton's *Lycidas*. "But not the praise," Phoebus replied, and to my trembling ears . . ."

as if here were old Peter Hovenden, partially, and but partially, redeemed from his hard scepticism into childish faith.

"How wise the little monkey looks!" whispered Robert Danforth to his wife.

"I never saw such a look on a child's face," answered Annie, admiring her own infant, and with good reason, far more than the artistic butterfly. "The darling knows more of the mystery than we do."

10 As if the butterfly, like the artist, were conscious of something not entirely congenial in the child's nature, it alternately sparkled and grew dim. At length it arose from the small hand of the infant with an airy motion that seemed to bear it upward without an effort, as if the ethereal instincts with which its master's spirit had endowed it impelled this fair vision involuntarily to a higher sphere. Had there been no obstruction, it might have soared into the sky and grown immortal. But its lustre gleamed upon the ceiling; the exquisite texture of its wings brushed against that earthly medium; and a sparkle or two, as of stardust, floated downward and lay glimmering on the carpet. Then the butterfly came fluttering down, and, instead of returning to the infant, was apparently attracted towards the artist's hand.

"Not so! not so!" murmured Owen Warland, as if

his handiwork could have understood him. "Thou has gone forth out of thy master's heart. There is no return for thee."

With a wavering movement, and emitting a tremulous radiance, the butterfly struggled, as it were, towards the infant, and was about to alight upon his finger, but while it still hovered in the air, the little child of strength, with his grandsire's sharp and shrewd expression in his face, made a snatch at the marvellous insect and compressed it in his hand. Annie screamed. Old Peter Hovenden burst into a cold and scornful laugh. The blacksmith, by main force, unclosed the infant's hand, and found within the palm a small heap of glittering fragments, whence the mystery of beauty had fled forever. And as for Owen Warland, he looked placidly at what seemed the ruin of his life's labor, and which was yet no ruin. He had caught a far other butterfly than this. When the artist rose high enough to achieve the beautiful, the symbol by which he made it perceptible to mortal senses became of little value in his eyes while his spirit possessed itself in the enjoyment of the reality.

Rappaccini's Daughter

"Rappaccini's Daughter" is perhaps Hawthorne's most vivid and forceful study of the tragic isolation of an abnormal personality. The poison in Beatrice's physical nature symbolizes this abnormality, which has been produced by her solitary life. The flowers possibly symbolize her thoughts, solitary thoughts which other people cannot share. The story seems to mean that it is tragic to be so unlike other people that one is cut off from normal rela-

tions with them. "There was an awful doom," Hawthorne has Beatrice say, "the effect of my father's fatal love of science, which estranged me from all society of my kind. . . . I would fain have been loved, not feared." The story's interest is enhanced by the latitude of interpretation allowed the reader.

A secondary theme is Hawthorne's distrust of science, which he shared with other writers of the romantic generation, notably with Wordsworth ("A Poet's Epitaph"), Keats ("Lamia"), and Poe ("Sonnet to Science").

"Rappaccini's Daughter" was first published in the *Democratic Review* in 1844 and was reprinted in *Mosses from an Old Manse* in 1846.

A young man, named Giovanni Guasconti, came, very long ago, from the more southern region of Italy, to pursue his studies at the University of Padua. Giovanni, who had but a scanty supply of gold ducats in his pocket,

took lodgings in a high and gloomy chamber of an old edifice which looked not unworthy to have been the palace of a Paduan noble, and which, in fact, exhibited over its entrance the armorial bearings of a family long since extinct. The young stranger, who was not un-

10 These reminiscences and associations, together with the tendency to heartbreak natural to a young man for the first time out of his native sphere, caused Giovanni to sigh heavily as he looked around the desolate and ill-furnished apartment

"Holy Virgin, signor!" cried old Dame Lisabetta, who, won by the youth's remarkable beauty of person, was kindly endeavoring to give the chamber a habitable air, "what a sigh was that to come out of a young man's heart! Do you find this old mansion gloomy? For
20 the love of Heaven, then, put your head out of the window, and you will see as bright sunshine as you have left in Naples "

Guasconti mechanically did as the old woman advised, but could not quite agree with her that the Paduan sunshine was as cheerful as that of southern Italy. Such as it was, however, it fell upon a garden beneath the window and expended its fostering influences on a variety of plants, which seemed to have been cultivated with exceeding care

30 "Does this garden belong to the house?" asked Giovanni.

"Heaven, forbid, signor, unless it were fruitful of better pot herbs than any that grow there now," answered old Lisabetta. "No, that garden is cultivated by the own hands of Signor Giacomo Rappaccini, the famous doctor, who, I warrant him, has been heard of as far as Naples. It is said that he distils these plants into medicines that are as potent as a charm. Oftentimes you may see the signor doctor at work, and perchance the signora, his
40 daughter, too, gathering the strange flowers that grow in the garden."

The old woman had now done what she could for the aspect of the chamber; and, commending the young man to the protection of the saints, took her departure

Giovanni still found no better occupation than to look down into the garden beneath his window. From its

appearance, he judged it to be one of those botanical gardens which were of earlier date in Padua than elsewhere in Italy or in the world. Or, not improbably might once have been the pleasure-place of an opulent family, for there was the ruin of a marble fountain in the centre, sculptured with rare art but so wofully shattered that it was impossible to trace the original design from the chaos of remaining fragments. The water, however, continued to gush and sparkle into the sunbeams cheerfully as ever. A little gurgling sound ascended the young man's window, and made him feel as if the fountain were an immortal spirit that sung its song unceasingly and without heeding the vicissitudes around while one century embodied it in marble and another scattered the perishable garniture on the soil. All about the pool into which the water subsided grew various plants, that seemed to require a plentiful supply of moisture for the nourishment of gigantic leaves, and, in some instances, flowers gorgeously magnificent. There was one shrub in particular, set in a marble vase in the midst of the pool, that bore a profusion of purple blossoms, each of which had the lustre and richness of a gem; and the whole together made a show so resplendent that it seemed enough to illuminate the garden, even had there been no sunshine. Every portion of the soil was peopled with plants and herbs, which, if less beautiful, still bore tokens of assiduous care, as if all had their individual virtues known to the scientific mind that fostered them. Some were placed in urns, rich with old carving, and others in common garden pots, some crept serpent-like along the ground or climbed on high, using whatever means of ascent was offered them. One plant had wreathed itself round a statue of Vertumnus, which was thus quite veiled and shrouded in a drapery of hanging foliage, so happily arranged that it might have served a sculptor for a study.

While Giovanni stood at the window he heard rustling behind a screen of leaves, and became aware that a person was at work in the garden. His figure soon emerged into view, and showed itself to be that of no common laborer, but a tall, emaciated, sallow, and sickly looking man, dressed in a scholar's garb of black. He was beyond the middle term of life, with grey hair, a thin, grey beard, and a face singularly marked with in-

79 Vertumnus, Roman god of the changing year, or the seasons and their products

tellect and cultivation, but which could never, even in his more youthful days, have expressed much warmth of heart

Nothing could exceed the intentness with which this scientific gardener examined every shrub which grew in his path: it seemed as if he was looking into their inmost nature, making observations in regard to their creative essence, and discovering why one leaf grew in this shape and another in that, and wherefore such and such flowers differed among themselves in hue and perfume. Nevertheless, in spite of this deep intelligence on his part, there was no approach to intimacy between himself and these vegetable existences. On the contrary, he avoided their actual touch or the direct inhaling of their odors with a caution that impressed Giovanni most disagreeably; for the man's demeanor was that of one walking among malignant influences, such as savage beasts, or deadly snakes, or evil spirits, which, should he allow them one moment of license, would wreak upon him some terrible fatality. It was strangely frightful to the young man's imagination to see this air of insecurity in a person cultivating a garden, that most simple and innocent of human toils, and which had been alike the joy and labor of the unfallen parents of the race. Was this garden, then, the Eden of the present world? And this man, with such a perception of harm in what his own hands caused to grow,—was he the Adam?

The distrustful gardener, while plucking away the dead leaves or pruning the too luxuriant growth of the shrubs, defended his hands with a pair of thick gloves. Nor were these his only armor. When, in his walk through the garden, he came to the magnificent plant that hung its purple gems beside the marble fountain, he placed a kind of mask over his mouth and nostrils, as if all this beauty did but conceal a deadlier malice, but, finding his task still too dangerous, he drew back, removed the mask, and called loudly, but in the infirm voice of a person affected with inward disease,—

"Beatrice! Beatrice!"

"Here am I, my father. What would you?" cried a rich and youthful voice from the window of the opposite house—a voice as rich as a tropical sunset, and which made Giovanni, though he knew not why, think of deep hues of purple or crimson and of perfumes heavily delectable. "Are you in the garden?"

"Yes, Beatrice," answered the gardener, "and I need your help."

Soon there emerged from under a sculptured portal the figure of a young girl, arrayed with as much richness of taste as the most splendid of the flowers, beautiful as the day, and with a bloom so deep and vivid that one shade more would have been too much. She looked redundant with life, health, and energy; all of which attributes were bound down and compressed, as it were, and girdled tensely, in their luxuriance, by her virgin zone. Yet Giovanni's fancy must have grown morbid while he looked down into the garden, for the impression which the fair stranger made upon him was as if here were another flower, the human sister of those vegetable ones, as beautiful as they, more beautiful than the richest of them, but still to be touched only with a glove, nor to be approached without a mask. As Beatrice came down the garden path, it was observable that she handled and inhaled the odor of several of the plants which her father had most sedulously avoided.

"Here, Beatrice," said the latter, "see how many needful offices require to be done to our chief treasure. Yet, shattered as I am, my life might pay the penalty of approaching it so closely as circumstances demand. Henceforth, I fear, this plant must be consigned to your sole charge."

"And gladly will I undertake it," cried again the rich tones of the young lady, as she bent towards the magnificent plant and opened her arms as if to embrace it. "Yes, my sister, my splendor, it shall be Beatrice's task to nurse and serve thee, and thou shalt reward her with thy kisses and perfumed breath, which to her is as the breath of life."

Then, with all the tenderness in her manner that was so strikingly expressed in her words, she busied herself with such attentions as the plant seemed to require; and Giovanni, at his lofty window, rubbed his eyes and almost doubted whether it were a girl tending her favorite flower, or one sister performing the duties of affection to another. The scene soon terminated. Whether Dr. Rappaccini had finished his labors in the garden, or that his watchful eye had caught the stranger's face, he now took his daughter's arm and retired. Night was already closing in; oppressive exhalations seemed to proceed from the plants and steal upward past the open window; and Giovanni, closing the lattice, went to his couch and dreamed of a rich flower and beautiful girl. Flower and maiden were different, and yet the same, and fraught with some strange peril in either shape.

There is an influence in the light of morning that tends to rectify whatever errors of fancy, or even of judgment, we may have incurred during the sun's decline, or among the shadows of the night, or in the less wholesome glow of moonshine. Giovanni's first movement, on starting from sleep, was to throw open the window and gaze down into the garden which his dreams had made so fertile of mysteries. He was surprised and a little ashamed to find how real and matter-of-fact an affair it proved to be, in the first rays of the sun which gilded the dew-drops that hung upon leaf and blossom, and, while giving a brighter beauty to each rare flower, brought everything within the limits of ordinary experience. The young man rejoiced that, in the heart of the barren city, he had the privilege of overlooking this spot of lovely and luxuriant vegetation. It would serve, he said to himself, as a symbolic language to keep him in communion with Nature. Neither the sickly and thought-worn Dr. Giacomo Rappaccini, it is true, nor his brilliant daughter, were now visible; so that Giovanni could not determine how much of the singularity which he attributed to both was due to their own qualities and how much to his wonder-working fancy, but he was inclined to take a most rational view of the whole matter.

In the course of the day he paid his respects to Signor Pietro Baglioni, professor of medicine in the university, a physician of eminent repute, to whom Giovanni had brought a letter of introduction. The professor was an elderly personage, apparently of genial nature, and habits that might almost be called jovial. He kept the young man to dinner, and made himself very agreeable by the freedom and liveliness of his conversation, especially when warmed by a flask or two of Tuscan wine. Giovanni, conceiving that men of science, inhabitants of the same city, must needs be on familiar terms with one another, took an opportunity to mention the name of Dr. Rappaccini. But the professor did not respond with so much cordiality as he had anticipated.

"I'll would it become a teacher of the divine art of medicine," said Professor Pietro Baglioni, in answer to a question of Giovanni, "to withhold due and well-considered praise of a physician so eminently skilled as Rappaccini; but, on the other hand, I should answer it but scantily to my conscience were I to permit a worthy youth like yourself, Signor Giovanni, the son of an ancient friend, to imbibe erroneous ideas respecting a

man who might hereafter chance to hold your life and death in his hands. The truth is, our worshipful Dr. Rappaccini has as much science as any member of the faculty—with perhaps one single exception—in Padua; or all Italy, but there are certain grave objections to his professional character."

"And what are they?" asked the young man.

"Has my friend Giovanni any disease of body or heart, that he is so inquisitive about physicians?" said the professor, with a smile. "But as for Rappaccini, it is said of him—and I, who know the man well, can answer for its truth—that he cares infinitely more for science than for mankind. His patients are interesting to him only as subjects for some new experiment. He would sacrifice human life, his own among the rest, or whatever else was dearest to him, for the sake of adding so much as a grain of mustard seed to the great heap of his accumulated knowledge."

"Methinks he is an awful man indeed," remarked Guasconti, mentally recalling the cold and purely intellectual aspect of Rappaccini. "And yet, worshipful professor, is it not a noble spirit? Are there many men capable of so spiritual a love of science?"

"God forbid," answered the professor, somewhat testily, "at least, unless they take sounder views of the healing art than those adopted by Rappaccini. It is his theory that all medicinal virtues are comprised within those substances which we term vegetable poisons. These he cultivates with his own hands, and is said even to have produced new varieties of poison, more horribly deleterious than Nature, without the assistance of this learned person, would ever have plagued the world withal. That the signor doctor does less mischief than might be expected with such dangerous substances is undeniable. Now and then, it must be owned, he has effected, or seemed to effect, a marvellous cure; but, to tell you my private mind, Signor Giovanni, he should receive little credit for such instances of success,—they being probably the work of chance,—but should be held strictly accountable for his failures, which may justly be considered his own work."

The youth might have taken Baglioni's opinions with many grains of allowance had he known that there was a professional warfare of long continuance between him and Dr. Rappaccini, in which the latter was generally thought to have gained the advantage. If the reader be

inclined to judge for himself, we refer him to certain black-letter tracts on both sides, preserved in the medical department of the University of Padua.

"I know not, most learned professor," returned Giovanni, after musing on what had been said of Rappaccini's exclusive zeal for science,—“I know not how dearly this physician may love his art, but surely there is one object more dear to him. He has a daughter.”

"Aha!" cried the professor, with a laugh. "So now our friend Giovanni's secret is out. You have heard of this daughter, whom all the young men in Padua are wild about, though not half a dozen have ever had the good hap to see her face. I know little of the Signora Beatrice save that Rappaccini is said to have instructed her deeply in his science, and that, young and beautiful as fame reports her, she is already qualified to fill a professor's chair. Perchance her father destines her for mine! Other absurd rumors there be, not worth talking about or listening to. So now, Signor Giovanni, drink off your glass of lachryma!"

Guasconti returned to his lodgings somewhat heated with the wine he had quaffed, and which caused his brain to swim with strange fantasies in reference to Dr Rappaccini and the beautiful Beatrice. On his way, happening to pass by a florist's, he bought a fresh bouquet of flowers.

Ascending to his chamber, he seated himself near the window, but within the shadow thrown by the depth of the wall, so that he could look down into the garden with little risk of being discovered. All beneath his eye was a solitude. The strange plants were basking in the sunshine, and now and then nodding gently to one another, as if in acknowledgment of sympathy and kindred. In the midst, by the shattered fountain, grew the magnificent shrub, with its purple gems clustering all over it, they glowed in the air, and gleamed back again out of the depths of the pool, which thus seemed to overflow with colored radiance from the rich reflection that was steeped in it. At first, as we have said, the garden was a solitude. Soon, however,—as Giovanni had half hoped, half feared, would be the case,—a figure appeared beneath the antique sculptured portal, and came down between the rows of plants, inhaling their various perfumes as if she were one of those beings of old classic fable that lived upon sweet odors. On again beholding Beatrice, the young man was even startled to perceive

how much her beauty exceeded his recollection of it; so brilliant, so vivid, was its character, that she glowed amid the sunlight, and, as Giovanni whispered to himself, positively illuminated the more shadowy intervals of the garden path. Her face being now more revealed than on the former occasion, he was struck by its expression of simplicity and sweetness,—qualities that had not entered into his idea of her character, and which made him ask anew what manner of mortal she might be. Nor did he fail again to observe, or imagine, an analogy between the beautiful girl and the gorgeous shrub that hung its gem-like flowers over the fountain,—a resemblance which Beatrice seemed to have indulged a fantastic humor in heightening, both by the arrangement of her dress and the selection of its hues.

Approaching the shrub, she threw open her arms, as with a passionate ardor, and drew its branches into an intimate embrace—so intimate that her features were hidden in its leafy bosom and her glistening ringlets all intermingled with the flowers.

"Give me thy breath, my sister," exclaimed Beatrice; "for I am faint with common air. And give me this flower of thine, which I separate with gentlest fingers from the stem and place it close beside my heart!"

With these words the beautiful daughter of Rappaccini plucked one of the richest blossoms of the shrub, and was about to fasten it in her bosom. But now, unless Giovanni's draughts of wine had bewildered his senses, a singular incident occurred. A small orange-colored reptile, of the lizard or chameleon species, chanced to be creeping along the path, just at the feet of Beatrice. It appeared to Giovanni,—but, at the distance from which he gazed, he could scarcely have seen anything so minute,—it appeared to him, however, that a drop or two of moisture from the broken stem of the flower descended upon the lizard's head. For an instant the reptile contorted itself violently, and then lay motionless in the sunshine. Beatrice observed this remarkable phenomenon, and crossed herself, sadly, but without surprise; nor did she therefore hesitate to arrange the fatal flower in her bosom. There it blushed, and almost glimmered with the dazzling effect of a precious stone, adding to her dress and aspect the one appropriate charm which nothing else

20 *lachryma*, a rich, sweet Neapolitan wine

the world could have supplied. But Giovanni, out of the shadow of his window, bent forward and shrank back, and murmured and trembled.

"Am I awake? Have I my senses?" said he to himself. "What is this being? Beautiful shall I call her, or inexpressibly terrible?"

Beatrice now strayed carelessly through the garden, approaching closer beneath Giovanni's window, so that he was compelled to thrust his head quite out of its concealment in order to gratify the intense and painful curiosity which she excited. At this moment there came a beautiful insect over the garden wall, it had, perhaps, wandered through the city, and found no flowers or verdure among those antique haunts of men until the heavy perfumes of Dr Rappaccini's shrubs had lured it from afar. Without alighting on the flowers, this winged brightness seemed to be attracted by Beatrice, and lingered in the air and fluttered about her head. Now, here it could not be but that Giovanni Guasconti's eyes deceived him. Be that as it might, he fancied that, while Beatrice was gazing at the insect with childish delight, it grew faint and fell at her feet; its bright wings shivered; it was dead—from no cause that he could discern, unless it were the atmosphere of her breath. Again Beatrice crossed herself and sighed heavily as she bent over the dead insect.

An impulsive movement of Giovanni drew her eyes to the window. There she beheld the beautiful head of the young man—rather a Grecian than an Italian head, with fair, regular features, and a glistening of gold among his ringlets—gazing down upon her like a being that hovered in mid air. Scarcely knowing what he did, Giovanni threw down the bouquet which he had hitherto held in his hand.

"Signora," said he, "there are pure and healthful flowers. Wear them for the sake of Giovanni Guasconti."

"Thanks, signor," replied Beatrice, with her rich voice, that came forth as it were like a gush of music, and with a mirthful expression half childish and half woman-like. "I accept your gift, and would fain recompense it with this precious purple flower; but if I toss it into the air it will not reach you. So Signor Guasconti must even content himself with my thanks."

She lifted the bouquet from the ground, and then, as if inwardly ashamed at having stepped aside from her maidenly reserve to respond to a stranger's greeting,

passed swiftly homeward through the garden. But few as the moments were, it seemed to Giovanni, when she was on the point of vanishing beneath the sculptured portal, that his beautiful bouquet was already beginning to wither in her grasp. It was an idle thought; there could be no possibility of distinguishing a faded flower from a fresh one at so great a distance.

For many days after this incident the young man avoided the window that looked into Dr. Rappaccini's garden, as if something ugly and monstrous would have blasted his eyesight had he been betrayed into a glance. He felt conscious of having put himself, to a certain extent, within the influence of an unintelligible power by the communication which he had opened with Beatrice. The wisest course would have been, if his heart were in any real danger, to quit his lodgings and Padua itself at once; the next wiser, to have accustomed himself, as far as possible, to the familiar and daylight view of Beatrice—thus bringing her rigidly and systematically within the limits of ordinary experience. Least of all, while avoiding her sight, ought Giovanni to have remained so near this extraordinary being that the proximity and possibility even of intercourse should give a kind of substance and reality to the wild vagaries which his imagination ran riot continually in producing. Guasconti had not a deep heart—or, at all events, its depths were not sounded now; but he had a quick fancy and an ardent southern temperament, which rose every instant to a higher fever pitch. Whether or no Beatrice possessed those terrible attributes, that fatal breath, the affinity with those so beautiful and deadly flowers which were indicated by what Giovanni had witnessed, she had at least instilled a fierce and subtle poison into his system. It was not love, although her rich beauty was a madness to him; nor horror, even while he fancied her spirit to be imbued with the same baneful essence that seemed to pervade her physical frame; but a wild offspring of both love and horror that had each parent in it, and burned like one and shivered like the other. Giovanni knew not what to dread, still less did he know what to hope; yet hope and dread kept a continual warfare in his breast, alternately vanquishing one another and starting up afresh to renew the contest. Blessed are all simple emotions, be they dark or bright! It is the lurid intermixture of the two that produces the illuminating blaze of the infernal regions. Sometimes he endeavored to assuage the fever of his

spirit by a rapid walk through the streets of Padua or beyond its gates: his footsteps kept time with the throbbings of his brain, so that the walk was apt to accelerate itself to a race. One day he found himself arrested; his arm was seized by a portly personage, who had turned back on recognizing the young man and expended much breath in overtaking him.

"Signor Giovanni! Stay, my young friend!" cried he. "Have you forgotten me? That might well be the case if I were as much altered as yourself."

It was Baglioni, whom Giovanni had avoided ever since their first meeting, from a doubt that the professor's sagacity would look too deeply into his secrets. Endeavoring to recover himself, he stared forth wildly from his inner world into the outer one and spoke like a man in a dream.

"Yes; I am Giovanni Guasconti. You are Professor Pietro Baglioni. Now let me pass!"

"Not yet, not yet, Signor Giovanni Guasconti," said the professor, smiling, but at the same time scrutinizing the youth with an earnest glance. "What! did I grow up side by side with your father? and shall his son pass me like a stranger in these old streets of Padua? Stand still, Signor Giovanni; for we must have a word or two before we part."

"Speedily, then, most worshipful professor, speedily," said Giovanni, with feverish impatience. "Does not your worship see that I am in haste?"

Now, while he was speaking there came a man in black along the street, stooping and moving feebly like a person in inferior health. His face was all overspread with a most sickly and sallow hue, but yet so pervaded with an expression of piercing and active intellect that an observer might easily have overlooked the merely physical attributes and have seen only this wonderful energy. As he passed, this person exchanged a cold and distant salutation with Baglioni, but fixed his eyes upon Giovanni with an intentness that seemed to bring out whatever was within him worthy of notice. Nevertheless, there was a peculiar quietness in the look, as if taking merely a speculative, not a human, interest in the young man.

"It is Dr. Rappaccini!" whispered the professor when the stranger had passed. "Has he ever seen your face before?"

"Not that I know," answered Giovanni, starting at the name.

"He *has* seen you! he must have seen you!" said Baglioni, hastily. "For some purpose or other, this man of science is making a study of you. I know that look of his! It is the same that coldly illuminates his face as he bends over a bird, a mouse, or a butterfly, which, in pursuance of some experiment, he has killed by the perfume of a flower; a look as deep as Nature itself, but without Nature's warmth of love. Signor Giovanni, I will stake my life upon it, you are the subject of one of Rappaccini's experiments!"

"Will you make a fool of me?" cried Giovanni, passionately. "That, signor professor, were an untoward experiment."

"Patience! patience!" replied the imperturbable professor. "I tell thee, my poor Giovanni, that Rappaccini has a scientific interest in thee. Thou hast fallen into fearful hands! And the Signora Beatrice,—what part does she act in this mystery?"

But Guasconti, finding Baglioni's pertinacity intolerable, here broke away, and was gone before the professor could again seize his arm. He looked after the young man intently and shook his head.

"This must not be," said Baglioni to himself. "The youth is the son of my old friend, and shall not come to any harm from which the arcana of medical science can preserve him. Besides, it is too insufferable an impertinence in Rappaccini, thus to snatch the lad out of my own hands, as I may say, and make use of him for his infernal experiments. This daughter of his! It shall be looked to. Perchance, most learned Rappaccini, I may foil you where you little dream of it!"

Meanwhile Giovanni had pursued a circuitous route, and at length found himself at the door of his lodgings. As he crossed the threshold he was met by old Lisabetta, who smirked and smiled, and was evidently desirous to attract his attention; vainly, however, as the ebullition of his feelings had momentarily subsided into a cold and dull vacuity. He turned his eyes full upon the withered face that was puckering itself into a smile, but seemed to behold it not. The old dame, therefore, laid her grasp upon his cloak.

"Signor! signor!" whispered she, still with a smile over the whole breadth of her visage, so that it looked not unlike a grotesque carving in wood, darkened by centuries. "Listen, signor! There is a private entrance into the garden!"

What do you say?" exclaimed Giovanni, turning quickly about, as if an inanimate thing should start into feverish life. "A private entrance into Dr Rappaccini's garden?"

"Hush! hush! not so loud!" whispered Lisabetta, putting her hand over his mouth. "Yes; into the worshipful doctor's garden, where you may see all his fine shrubbery. Many a young man in Padua would give gold to be admitted among those flowers."

10 Giovanni put a piece of gold into her hand.

"Show me the way," said he

A surmise, probably excited by his conversation with Baglioni, crossed his mind, that this interposition of old Lisabetta might perchance be connected with the intrigue, whatever were its nature, in which the professor seemed to suppose that Dr. Rappaccini was involving him. But such a suspicion, though it disturbed Giovanni, was inadequate to restrain him. The instant that he was aware of the possibility of approaching Beatrice, it seemed an
20 absolute necessity of his existence to do so. It mattered not whether she were angel or demon; he was irrevocably within her sphere, and must obey the law that whirled him onward, in ever-lessening circles, towards a result which he did not attempt to foreshadow; and yet, strange to say, there came across him a sudden doubt whether this intense interest on his part were not delusory; whether it were really of so deep and positive a nature as to justify him in now thrusting himself into an incalculable position, whether it were not merely the
30 fantasy of a young man's brain, only slightly or not at all connected with his heart.

He paused, hesitated, turned half about, but again went on. His withered guide led him along several obscure passages, and finally undid a door, through which, as it was opened, there came the sight and sound of rustling leaves, with the broken sunshine glimmering among them. Giovanni stepped forth, and, forcing himself through the entanglement of a shrub that wreathed its tendrils over the hidden entrance, stood beneath his
40 own window in the open area of Dr. Rappaccini's garden.

How often is it the case that, when impossibilities have come to pass and dreams have condensed their misty substance into tangible realities, we find ourselves calm, and even coldly self-possessed, amid circumstances which it would have been a delirium of joy or agony to anticipate! Fate delights to thwart us thus. Passion will choose

his own time to rush upon the scene, and lingers slightly behind when an appropriate adjustment of events would seem to summon his appearance. So was it now with Giovanni. Day after day his pulses had throbbed with feverish blood at the improbable idea of an interview with Beatrice, and of standing with her, face to face in this very garden, basking in the Oriental sunshine of her beauty, and snatching from her full gaze the mystery which he deemed the riddle of his own existence. But now there was a singular and untimely equanimity within his breast. He threw a glance around the garden to discover if Beatrice or her father were present, and, perceiving that he was alone, began a critical observation of the plants.

The aspect of one and all of them dissatisfied him. Their gorgeousness seemed fierce, passionate, and even unnatural. There was hardly an individual shrub which a wanderer, straying by himself through a forest, would not have been startled to find growing wild, as if an unearthly face had glared at him out of the thicket. Several also would have shocked a delicate instinct by an appearance of artificialness indicating that there had been such commixture, and, as it were, adultery, of various vegetable species, that the production was no longer of God's making, but the monstrous offspring of man's depraved fancy, glowing with only an evil mockery of beauty. They were probably the result of experiment, which in one or two cases had succeeded in mingling plants individually lovely into a compound possessing the questionable and ominous character that distinguished the whole growth of the garden. In fine, Giovanni recognized but two or three plants in the collection, and those of a kind that he well knew to be poisonous. While busy with these contemplations he heard the rustling of a silken garment, and, turning, beheld Beatrice emerging from beneath the sculptured portal.

Giovanni had not considered with himself what should be his deportment; whether he should apologize for his intrusion into the garden, or assume that he was there with the privacy at least, if not by the desire, of Dr Rappaccini or his daughter; but Beatrice's manner placed him at his ease, though leaving him still in doubt by what agency he had gained admittance. She came lightly along the path and met him near the broken fountain. There was surprise in her face, but brightened by a simple and kind expression of pleasure.

"You are a connoisseur in flowers, signor," said Beatrice, with a smile, alluding to the bouquet which he had flung her from the window. "It is no marvel, therefore, if the sight of my father's rare collection has tempted you to take a nearer view. If he were here, he could tell you many strange and interesting facts as to the nature and habits of these shrubs, for he has spent a lifetime in such studies, and this garden is his world."

"And yourself, lady," observed Giovanni "if fame says true,—you likewise are deeply skilled in the virtues indicated by these rich blossoms and these spicy perfumes. Would you deign to be my instructress, I should prove an apter scholar than if taught by Signor Rappaccini himself."

"Are there such idle rumors?" asked Beatrice, with the music of a pleasant laugh. "Do people say that I am skilled in my father's science of plants? What a jest is there! No, though I have grown up among these flowers, I know no more of them than their hues and perfume, and sometimes methinks I would fain rid myself of even that small knowledge. There are many flowers here, and those not the least brilliant, that shock and offend me when they meet my eye. But pray, signor, do not believe these stories about my science. Believe nothing of me save what you see with your own eyes."

"And must I believe all that I have seen with my own eyes?" asked Giovanni, pointedly, while the recollection of former scenes made him shrink. "No, signora, you demand too little of me. Bid me believe nothing save what comes from your own lips."

It would appear that Beatrice understood him. There came a deep flush to her cheek, but she looked full into Giovanni's eyes, and responded to his gaze of uneasy suspicion with a queenlike haughtiness.

"I do so bid you, signor," she replied. "Forget whatever you may have fancied in regard to me. If true to the outward senses, still it may be false in its essence, but the words of Beatrice Rappaccini's lips are true from the depths of the heart outward. Those you may believe."

A fervor glowed in her whole aspect and beamed upon Giovanni's consciousness like the light of truth itself, but while she spoke there was a fragrance in the atmosphere around her, rich and delightful, though evanescent, yet which the young man, from an indefinable reluctance, scarcely dared to draw into his lungs. It might be the odor of the flowers. Could it be Beatrice's

breath which thus embalmed her words with a strange richness, as if by steeping them in her heart? A faintness passed like a shadow over Giovanni and flitted away, he seemed to gaze through the beautiful girl's eyes into her transparent soul, and felt no more doubt or fear.

The tinge of passion that had colored Beatrice's manner vanished, she became gay, and appeared to derive a pure delight from her communion with the youth not unlike what the maiden of a lonely island might have felt conversing with a voyager from the civilized world. Evidently her experience of life had been confined within the limits of that garden. She talked now about matters as simple as the daylight or summer clouds, and now asked questions in reference to the city, or Giovanni's distant home, his friends, his mother, and his sisters—questions indicating such seclusion, and such lack of familiarity with modes and forms, that Giovanni responded as if to an infant. Her spirit gushed out before him like a fresh rill that was just catching its first glimpse of the sunlight and wondering at the reflections of earth and sky which were flung into its bosom. There came thoughts, too, from a deep source, and fantasies of a gemlike brilliancy, as if diamonds and rubies sparkled upward among the bubbles of the fountain. Ever and anon there gleamed across the young man's mind a sense of wonder that he should be walking side by side with the being who had so wrought upon his imagination, whom he had idealized in such hues of terror, in whom he had positively witnessed such manifestations of dreadful attributes,—that he should be conversing with Beatrice like a brother, and should find her so human and so maidenlike. But such reflections were only momentary, the effect of her character was too real not to make itself familiar at once.

In this free intercourse they had strayed through the garden, and now, after many turns among its avenues, were come to the shattered fountain, beside which grew the magnificent shrub, with its treasury of glowing blossoms. A fragrance was diffused from it which Giovanni recognized as identical with that which he had attributed to Beatrice's breath, but incomparably more powerful. As her eyes fell upon it, Giovanni beheld her press her hand to her bosom as if her heart were throbbing suddenly and painfully.

"For the first time in my life," murmured she, addressing the shrub, "I had forgotten thee"

"I remember, signora," said Giovanni, "that you once promised to reward me with one of these living gems for the bouquet which I had the happy boldness to fling to your feet. Permit me now to pluck it as a memorial of this interview."

He made a step towards the shrub with extended hand; but Beatrice darted forward, uttering a shriek that went through his heart like a dagger. She caught his hand and drew it back with the whole force of her slender figure. Giovanni felt her touch thrilling through his fibres.

"Touch it not!" exclaimed she, in a voice of agony. "Not for thy life! It is fatal!"

Then, hiding her face, she fled from him and vanished beneath the sculptured portal. As Giovanni followed her with his eyes, he beheld the emaciated figure and pale intelligence of Dr Rappaccini, who had been watching the scene, he knew not how long, within the shadow of the entrance

No sooner was Guasconti alone in his chamber than the image of Beatrice came back to his passionate musings, invested with all the witchery that had been gathering around it ever since his first glimpse of her, and now likewise imbued with a tender warmth of girlish womanhood. She was human; her nature was endowed with all gentle and feminine qualities; she was worthiest to be worshipped; she was capable, surely, on her part, of the height and heroism of love. Those tokens which he had hitherto considered as proofs of a frightful peculiarity in her physical and moral system were now either forgotten, or, by the subtle sophistry of passion transmitted into a golden crown of enchantment, rendering Beatrice the more admirable by so much as she was the more unique. Whatever had looked ugly was now beautiful; or, if incapable of such a change, it stole away and hid itself among those shapeless half ideas which throng the dim region beyond the daylight of our perfect consciousness. Thus did he spend the night, nor fell asleep until the dawn had begun to awake the slumbering flowers in Dr. Rappaccini's garden, whither Giovanni's dreams doubtless led him. Up rose the sun in his due season, and, flinging his beams upon the young man's eyelids, awoke him to a sense of pain. When thoroughly aroused, he became sensible of a burning and tingling agony in his hand—in his right hand—the very hand which Beatrice had grasped in her own when he was on the point of plucking one of the gemlike flowers. On the back of

that hand there was now a purple print like that of four small fingers, and the likeness of a slender thumb upon his wrist.

Oh, how stubbornly does love,—or even that cunning semblance of love which flourishes in the imagination but strikes no depth of root into the heart,—how stubbornly does it hold its faith until the moment comes when it is doomed to vanish into thin mist! Giovanni wrapped a handkerchief about his hand and wondered what evil thing had stung him, and soon forgot his pain in the reverie of Beatrice.

After the first interview, a second was in the inevitable course of what we call fate. A third, a fourth; and meeting with Beatrice in the garden was no longer an incident in Giovanni's daily life, but the whole space which he might be said to live; for the anticipation and memory of that ecstatic hour made up the remainder. Nor was it otherwise with the daughter of Rappaccini. She watched for the youth's appearance, and flew to his side with confidence as unreserved as if they had been playmates from early infancy—as if they were such playmates still. If, by any unwonted chance, he failed to come at the appointed moment, she stood beneath the window and sent up the rich sweetness of her tones to float around him in his chamber and echo and reverberate throughout his heart. "Giovanni! Giovanni! Why tarriesst thou? Come down!" And down he hastened into the Eden of poisonous flowers.

But, with all this intimate familiarity, there was still a reserve in Beatrice's demeanor, so rigidly and invariably sustained that the idea of infringing it scarcely occurred to his imagination. By all appreciable signs, they loved; they had looked love with eyes that conveyed the holy secret from the depths of one soul into the depths of the other, as if it were too sacred to be whispered by the way; they had even spoken love in those gushes of passion when their spirits darted forth in articulated breath like tongues of long-hidden flame, and yet there had been no seal of lips, no clasp of hands, nor any slightest caress such as love claims and hallows. He had never touched one of the gleaming ringlets of her hair, her garment—so marked was the physical barrier between them—had never been waved against him by a breeze. On the few occasions when Giovanni had seemed tempted to overstep the limit, Beatrice grew so sad, so stern, and withal wore such a look of desolate separation,

shuddering at itself, that not a spoken word was requisite to repel him. At such times he was startled at the horrible suspicions that rose, monster-like, out of the caverns of his heart and stared him in the face, his love grew thin and faint as the morning mist, his doubts alone had substance. But, when Beatrice's face brightened again after the momentary shadow, she was transformed at once from the mysterious, questionable being whom he had watched with so much awe and horror, she was now the beautiful and unsophisticated girl whom he felt that his spirit knew with a certainty beyond all other knowledge.

A considerable time had now passed since Giovanni's last meeting with Baglioni. One morning, however, he was disagreeably surprised by a visit from the professor, whom he had scarcely thought of for whole weeks, and would willingly have forgotten still longer. Given up as he had long been to a pervading excitement, he could tolerate no companions except upon condition of their perfect sympathy with his present state of feeling. Such sympathy was not to be expected from Professor Baglioni.

The visitor chatted carelessly for a few minutes about the gossip of the city and the university, and then took up another topic.

"I have been reading an old classic author lately," said he, "and met with a story that strangely interested me. Possibly you may remember it. It is of an Indian prince, who sent a beautiful woman as a present to Alexander the Great. She was as lovely as the dawn and gorgeous as the sunset, but what especially distinguished her was a certain rich perfume in her breath—richer than a garden of Persian roses. Alexander, as was natural to a youthful conqueror, fell in love at first sight with this magnificent stranger; but a certain sage physician, happening to be present, discovered a terrible secret in regard to her."

"And what was that?" asked Giovanni, turning his eyes downward to avoid those of the professor.

"That this lovely woman," continued Baglioni, with emphasis, "had been nourished with poisons from her birth upward, until her whole nature was so imbued with them that she herself had become the deadliest poison in existence. Poison was her element of life. With that rich perfume of her breath she blasted the very air. Her love would have been poison—her embrace death. Is not this a marvellous tale?"

"A childish fable," answered Giovanni, nervously starting from his chair. "I marvel how your worship

finds time to read such nonsense among your graver studies."

"By the by," said the professor, looking uneasily about him, "what singular fragrance is this in your apartment? Is it the perfume of your gloves? It is faint, but delicious; and yet, after all, by no means agreeable. Were I to breathe it long, methinks it would make me ill. It is like the breath of a flower; but I see no flowers in the chamber."

"Nor are there any," replied Giovanni, who had turned pale as the professor spoke, "nor, I think, is there any fragrance except in your worship's imagination. Odors, being a sort of element combined of the sensual and the spiritual, are apt to deceive us in this manner. The recollection of a perfume, the bare idea of it, may easily be mistaken for a present reality."

"Ay, but my sober imagination does not often play such tricks," said Baglioni; "and, were I to fancy any kind of odor, it would be that of some vile apothecary drug, wherewith my fingers are likely enough to be imbued. Our worshipful friend Rappaccini, as I have heard, tinctures his medicaments with odors richer than those of Araby. Doubtless, likewise, the fair and learned Signora Beatrice would minister to her patients with draughts as sweet as a maiden's breath; but woe to him that sips them!"

Giovanni's face evinced many contending emotions. The tone in which the professor alluded to the pure and lovely daughter of Rappaccini was a torture to his soul; and yet the intimation of a view of her character, opposite to his own, gave instantaneous distinctness to a thousand dim suspicions, which now grinned at him like so many demons. But he strove hard to quell them and to respond to Baglioni with a true lover's perfect faith.

"Signor professor," said he, "you were my father's friend, perchance, too, it is your purpose to act a friendly part towards his son. I would fain feel nothing towards you save respect and deference, but I pray you to observe, signor, that there is one subject on which we must

24 author. The reference is to Sir Thomas Browne's *Pseudodoxia Epidemica*, Bk. VII, Chap. 17. Hawthorne had copied in his notebooks:

A story there passeth of an Indian King, that sent unto Alexander a fair woman fed with Aconites and other poysons, with this intent, either by converse or copulation complexionally to destroy him" • 68 odors . . . Araby, reminiscent of Shakespeare's "perfumes of Arabia," *Macbeth*, Act V, Scene i, l. 57

... speak. You know not the Signora Beatrice. You cannot, therefore, estimate the wrong—the blasphemy, I may even say—that is offered to her character by a light or injurious word."

"Giovanni! my poor Giovanni!" answered the professor, with a calm expression of pity, "I know this wretched girl far better than yourself. You shall hear the truth in respect to the poisoner Rappaccini and his poisonous daughter; yes, poisonous as she is beautiful. Listen; for, even should you do violence to my gray hairs, it shall not silence me. That old fable of the Indian woman has become a truth by the deep and deadly science of Rappaccini and in the person of the lovely Beatrice"

Giovanni groaned and hid his face.

"Her father," continued Baglioni, "was not restrained by natural affection from offering up his child in this horrible manner as the victim of his insane zeal for science. for, let us do him justice, he is as true a man of science as ever distilled his own heart in an alembic. What, then, will be your fate? Beyond a doubt you are selected as the material of some new experiment. Perhaps the result is to be death, perhaps a fate more awful still. Rappaccini, with what he calls the interest of science before his eyes, will hesitate at nothing"

"It is a dream," muttered Giovanni to himself, "surely it is a dream."

"But," resumed the professor, "be of good cheer, son of my friend. It is not yet too late for the rescue. Possibly we may even succeed in bringing back this miserable child within the limits of ordinary nature, from which her father's madness has estranged her. Behold this little silver vase! It was wrought by the hands of the renowned Benvenuto Cellini, and is well worthy to be a love gift to the fairest dame in Italy. But its contents are invaluable. One little sip of this antidote would have rendered the most virulent poisons of the Borgias innocuous. Doubt not that it will be as efficacious against those of Rappaccini. Bestow the vase, and the precious liquid within it, on your Beatrice, and hopefully await the result."

Baglioni laid a small, exquisitely wrought silver vial on the table and withdrew, leaving what he had said to produce its effect upon the young man's mind.

"We will thwart Rappaccini yet," thought he, chuckling to himself, as he descended the stairs, "but, let us

confess the truth of him, he is a wonderful man—a wonderful man indeed, a vile empiric, however, in his practice, and therefore not to be tolerated by those who respect the good old rules of the medical profession."

Throughout Giovanni's whole acquaintance with Beatrice, he had occasionally, as we have said, been haunted by dark surmises as to her character; yet so thoroughly had she made herself felt by him as a simple, natural, most affectionate, and guileless creature, that the image now held up by Professor Baglioni looked as strange and incredible as if it were not in accordance with his original conception. True, there were ugly recollections connected with his first glimpses of the beautiful girl; he could not quite forget the bouquet that withered in her grasp, and the insect that perished amid the sunbeams, by no ostensible agency save the fragrance of her breath. These incidents, however, dissolving in the purer light of her character, had no longer the efficacy of fact but were acknowledged as mistaken fantasies, by whatever testimony of the senses they might appear to be substantiated. There is something truer and more real than what we can see with the eyes and touch with the finger. On such better evidence had Giovanni founded his confidence in Beatrice, though rather by the necessary force of her high attributes than by any deep and generous faith on his part. But now his spirit was incapable of sustaining itself at the height to which the early enthusiasm of passion had exalted it, he fell down grovelling among earthly doubts, and defiled therewith the pure whiteness of Beatrice's image. Not that he gave her up, he did but distrust. He resolved to institute some decisive test that should satisfy him, once for all, whether there were those dreadful peculiarities in her physical nature which could not be supposed to exist without some corresponding monstrosity of soul. His eyes, gazing down afar, might have deceived him as to the lizard, the insect, and the flowers, but if he could witness, at the distance of a few paces, the sudden blight of one fresh and healthful flower in Beatrice's hand, there would be room for no further question. With this idea he hastened to the florist's and purchased a bouquet that was still gemmed with the morning dew-drops.

34 Benvenuto Cellini (1500-1571), Italian author and artist in metal
• 37 Borgias, Cesare Borgia (1476-1507), Italian cardinal and military leader, and his sister, Lucrezia Borgia (1480-1519), both were wicked and unscrupulous

It was now the customary hour of his daily interview with Beatrice. Before descending into the garden, Giovanni failed not to look at his figure in the mirror,—a vanity to be expected in a beautiful young man, yet, as displaying itself at that troubled and feverish moment, the token of a certain shallowness of feeling and insincerity of character. He did gaze, however, and said to himself that his features had never before possessed so rich a grace, nor his eyes such vivacity, nor his cheeks so warm a hue of superabundant life

"At least," thought he, "her poison has not yet insinuated itself into my system. I am no flower to perish in her grasp."

With that thought he turned his eyes on the bouquet, which he had never once laid aside from his hand. A thrill of indefinable horror shot through his frame on perceiving that those dewy flowers were already beginning to droop, they wore the aspect of things that had been fresh and lovely yesterday. Giovanni grew white as marble, and stood motionless before the mirror, staring at his own reflection there as at the likeness of something frightful. He remembered Baglioni's remark about the fragrance that seemed to pervade the chamber. It must have been the poison in his breath! Then he shuddered—shuddered at himself. Recovering from his stupor, he began to watch with curious eye a spider that was busily at work hanging its web from the antique cornice of the apartment, crossing and recrossing the artful system of interwoven lines—as vigorous and active a spider as ever dangled from an old ceiling. Giovanni bent towards the insect, and emitted a deep, long breath. The spider suddenly ceased its toil; the web vibrated with a tremor originating in the body of the small artisan. Again Giovanni sent forth a breath, deeper, longer, and imbued with a venomous feeling out of his heart: he knew not whether he were wicked, or only desperate. The spider made a convulsive gripe with his limbs and hung dead across the window.

"Accursed! accursed!" muttered Giovanni, addressing himself. "Hast thou grown so poisonous that this deadly insect perished by thy breath?"

At that moment a rich, sweet voice came floating up from the garden.

"Giovanni! Giovanni! It is past the hour! Why tarriest thou? Come down!"

"Yes," muttered Giovanni again "She is the only being

whom my breath may not slay! Would that it might!"

He rushed down, and in an instant was standing before the bright and loving eyes of Beatrice. A moment ago his wrath and despair had been so fierce that he could have desired nothing so much as to wither her by a glance; but with her actual presence there came influences which had too real an existence to be at once shaken off. recollections of the delicate and benign power of her feminine nature, which had so often enveloped him in a religious calm, recollections of many a holy and passionate outgush of her heart, when the pure fountain had been unsealed from its depths and made visible in its transparency to his mental eye, recollections which, had Giovanni known how to estimate them, would have assured him that all this ugly mystery was but an earthly illusion, and that, whatever mist of evil might seem to have gathered over her, the real Beatrice was a heavenly angel. Incapable as he was of such high faith, still her presence had not utterly lost its magic. Giovanni's rage was quelled into an aspect of sullen insensibility. Beatrice, with a quick spiritual sense, immediately felt that there was a gulf of blackness between them which neither he nor she could pass. They walked on together, sad and silent, and came thus to the marble fountain and to its pool of water on the ground, in the midst of which grew the shrub that bore gem-like blossoms. Giovanni was affrighted at the eager enjoyment—the appetite, as it were—with which he found himself inhaling the fragrance of the flowers.

"Beatrice," asked he, abruptly, "whence came this shrub?"

"My father created it," answered she, with simplicity.

"Created it! created it!" repeated Giovanni. "What mean you, Beatrice?"

"He is a man fearfully acquainted with the secrets of Nature," replied Beatrice; "and, at the hour when I first drew breath, this plant sprang from the soil, the offspring of his science, of his intellect, while I was but his earthly child. Approach it not!" continued she, observing with terror that Giovanni was drawing nearer to the shrub. "It has qualities that you little dream of. But I, dearest Giovanni,—I grew up and blossomed with the plant and was nourished with its breath. It was my sister, and I loved it with a human affection; for, alas!— hast thou not suspected it?—there was an awful doom."

Here Giovanni frowned so darkly upon her that

Beatrice paused and trembled. But her faith in his tenderness reassured her, and made her blush that she had doubted for an instant.

"There was an awful doom," she continued, "the effect of my father's fatal love of science, which estranged me from all society of my kind. Until Heaven sent thee, dearest Giovanni, oh, how lonely was thy poor Beatrice!"

"Was it a hard doom?" asked Giovanni, fixing his eyes upon her.

10 "Only of late have I known how hard it was," answered she, tenderly. "Oh, yes; but my heart was torpid, and therefore quiet."

Giovanni's rage broke forth from his sullen gloom like a lightning flash out of a dark cloud

"Accursed one!" cried he, with venomous scorn and anger. "And, finding thy solitude wearisome, thou hast severed me likewise from all the warmth of life and enticed me into thy region of unspeakable horror!"

"Giovanni!" exclaimed Beatrice, turning her large
20 bright eyes upon his face. The force of his words had not found its way into her mind; she was merely thunderstruck.

"Yes, poisonous thing!" repeated Giovanni, beside himself with passion. "Thou hast done it! Thou hast blasted me! Thou hast filled my veins with poison! Thou hast made me as hateful, as ugly, as loathsome and deadly a creature as thyself—a world's wonder of hideous monstrosity! Now, if our breath be happily as fatal to ourselves as to all others, let us join our lips in one kiss
30 of unutterable hatred, and so die!"

"What has befallen me?" murmured Beatrice, with a low moan out of her heart. "Holy Virgin, pity me, a poor heart-broken child!"

"Thou,—dost thou pray?" cried Giovanni, still with the same fiendish scorn. "Thy very prayers, as they come from thy lips, taint the atmosphere with death. Yes, yes, let us pray! Let us to church and dip our fingers in the holy water at the portal! They that come after us will perish as by a pestilence! Let us sign
40 crosses in the air! It will be scattering curses abroad in the likeness of holy symbols!"

"Giovanni," said Beatrice, calmly, for her grief was beyond passion, "why dost thou join thyself with me thus in those terrible words? I, it is true, am the horrible thing thou namest me. But thou,—what hast thou to do, save with one other shudder at my hideous mis-

ery to go forth out of the garden and mingle with the race, and forget that there ever crawled on earth such a monster as poor Beatrice?"

"Dost thou pretend ignorance?" asked Giovanni, scowling upon her. "Behold! this power have I gained from the pure daughter of Rappaccini."

There was a swarm of summer insects flitting through the air in search of the food promised by the flowery odors of the fatal garden. They circled round Giovanni's head, and were evidently attracted towards him by the same influence which had drawn them for an instant within the sphere of several of the shrubs. He sent forth a breath among them, and smiled bitterly at Beatrice as at least a score of the insects fell dead upon the ground.

"I see it! I see it!" shrieked Beatrice. "It is my father's fatal science! No, no, Giovanni, it was not I! Never! I dreamed only to love thee and be with thee a little time, and so to let thee pass away, leaving but thine image in mine heart, for, Giovanni, believe it though my body be nourished with poison, my spirit is God's creature, and craves love as its daily food. But my father,—he has united us in this fearful sympathy. Yes, spurn me, tread upon me, kill me! Oh, what is death after such words as thine? But it was not I. Not for a world of bliss would I have done it."

Giovanni's passion had exhausted itself in its outburst from his lips. There now came across him a sense, mournful, and not without tenderness, of the intimate and peculiar relationship between Beatrice and himself. They stood, as it were, in an utter solitude, which would be made none the less solitary by the densest throng of human life. Ought not, then, the desert of humanity around them to press this insulated pair closer together? If they should be cruel to one another, who was there to be kind to them? Besides, thought Giovanni, might there not still be a hope of his returning within the limits of ordinary nature, and leading Beatrice, the redeemed Beatrice, by the hand? O, weak, and selfish, and unworthy spirit, that could dream of an earthly union and earthly happiness as possible, after such deep love had been so bitterly wronged as was Beatrice's love by Giovanni's blighting words! No, no, there could be no such hope. She must pass heavily, with that broken heart, across the borders of Time—she must bathe her hurts in some fount of paradise, and forget her grief in the light of immortality, and *there* be well.

But Giovanni did not know it.

"Dear Beatrice," said he, approaching her, while she shrank away as always at his approach, but now with a different impulse, "dearest Beatrice, our fate is not yet so desperate. Behold! there is a medicine, potent, as a wise physician has assured me, and almost divine in its efficacy. It is composed of ingredients the most opposite to those by which thy awful father has brought this calamity upon thee and me. It is distilled of blessed herbs. Shall we not quaff it together, and thus be purified from evil?"

"Give it me!" said Beatrice, extending her hand to receive the little silver vial which Giovanni took from his bosom. She added, with a peculiar emphasis, "I will drink, but do thou await the result."

She put Baglioni's antidote to her lips, and, at the same moment, the figure of Rappaccini emerged from the portal and came slowly towards the marble fountain. As he drew near, the pale man of science seemed to gaze with a triumphant expression at the beautiful youth and maiden, as might an artist who should spend his life in achieving a picture or a group of statuary and finally be satisfied with his success. He paused, his bent form grew erect with conscious power, he spread out his hands over them in the attitude of a father imploring a blessing upon his children; but those were the same hands that had thrown poison into the stream of their lives. Giovanni trembled. Beatrice shuddered nervously, and pressed her hand upon her heart.

"My daughter," said Rappaccini, "thou art no longer lonely in the world. Pluck one of those precious gems from thy sister shrub and bid thy bridegroom wear it in his bosom. It will not harm him now. My science and the sympathy between thee and him have so wrought within his system, that he now stands apart from common men, as thou dost, daughter of my pride and triumph, from ordinary women. Pass on, then, through the world, most dear to one another and dreadful to all besides!"

"My father," said Beatrice, feebly,—and still as she spoke she kept her hand upon her heart,—“wherefore didst thou inflict this miserable doom upon thy child?”

"Miserable!" exclaimed Rappaccini. "What mean you, foolish girl? Dost thou deem it misery to be endowed with marvellous gifts against which no power nor strength could avail an enemy—misery, to be able to

quell the mightiest with a breath—misery, to be as terrible as thou art beautiful? Wouldst thou, then, have preferred the condition of a weak woman, exposed to all evil and capable of none?"

"I would fain have been loved, not feared," murmured Beatrice, sinking down upon the ground. "But now it matters not. I am going, father, where the evil which thou hast striven to mingle with my being will pass away like a dream—like the fragrance of these poisonous flowers, which will no longer taint my breath among the flowers of Eden. Farewell, Giovanni! Thy words of hatred are like lead within my heart, but they, too, will fall away as I ascend. Oh, was there not, from the first, more poison in thy nature than in mine?"

To Beatrice,—so radically had her earthly part been wrought upon by Rappaccini's skill,—as poison had been life, so the powerful antidote was death; and thus the poor victim of man's ingenuity and of thwarted nature, and of the fatality that attends all such efforts of perverted wisdom, perished there, at the feet of her father and Giovanni. Just at that moment Professor Pietro Baglioni looked forth from the window, and called loudly, in a tone of triumph mixed with horror, to the thunderstricken man of science,—

"Rappaccini! Rappaccini! and is *this* the upshot of your experiment!"

1844

The Old Manse

The Author Makes the Reader Acquainted with His Abode

The following essay is a pleasant account of Hawthorne's life at the Old Manse in Concord, where he took his bride, Sophia Peabody, upon their marriage in July 1842, and where they lived until the autumn of 1845. Drawn largely from the fuller and more intimate record preserved in *The American Notebooks*, it was written after the author had moved back to Salem, and serves as an introduction to the collection of tales and sketches entitled *Mosses from an Old Manse*, published in 1846. Like many other examples in his writings—notably "The Custom House," which is prefatory to *The Scarlet Letter*, and the sketches in *Our Old Home*—"The Old Manse" shows Hawthorne's mastery of the informal essay: the delicate humor, the ripe wisdom, and the ease and naturalness of style make for excellence in this kind of writing.

Between two tall gateposts of rough-hewn stone (the gate itself having fallen from its hinges at some unknown epoch) we beheld the gray front of the old parsonage terminating the vista of an avenue of black ash-trees. It was now a twelvemonth since the funeral procession of the venerable clergyman, its last inhabitant, had turned from that gateway towards the village burying-ground. The wheel-track leading to the door, as well as the whole breadth of the avenue, was almost overgrown with grass, affording dainty mouthfuls to two or three vagrant cows and an old white horse who had his own living to pick up along the roadside. The glimmering shadows that lay half asleep between the door of the house and the public highway were a kind of spiritual medium, seen through which the edifice had not quite

the aspect of belonging to the material world. Certainly it had little in common with those ordinary abodes which stand so imminent upon the road that every passer-can thrust his head, as it were, into the domestic circle. From these quiet windows the figures of passing travelers looked too remote and dim to disturb the sense of privacy. In its near retirement and accessible seclusion was the very spot for the residence of a clergyman,—a man not estranged from human life, yet enveloped in the midst of it with a veil woven of intermingled gloom and brightness. It was worthy to have been one of the time-honored parsonages of England in which, through many generations, a succession of holy occupants passed from youth to age, and bequeath each an inheritance of sanctity to pervade the house and hover over it as with an atmosphere.

Nor, in truth, had the Old Manse ever been profaned by a lay occupant until that memorable summer afternoon when I entered it as my home. A priest had built it, a priest had succeeded to it; other priestly men from time to time had dwelt in it; and children born in its chambers had grown up to assume the priestly character. It was awful to reflect how many sermons must have been written there. The latest inhabitant alone—he by whose translation to paradise the dwelling was left vacant—had penned nearly three thousand discourses, besides the better, if not the greater, number that gushed living from his lips. How often, no doubt, had he paced to and fro along the avenue, attuning his meditations to the sighs and gentle murmurs, and deep and solemn peals of the wind among the lofty tops of the trees! In that variety of natural utterances he could find something accordant with every passage of his sermon, were it of tenderness or reverential fear. The boughs over my head seemed shadowy with solemn thoughts as well as with rustling leaves. I took shame to myself for having been so long a writer of idle stories, and ventured to hope that wisdom would descend upon me with the falling leaves of the avenue, and that I should light upon an intellectual treasure in the Old Manse well worth those hoards of long-hidden gold which people seek for in moss-grown houses. Profound treatises of morality, a lay-

⁶ venerable clergyman, the Rev Ezra Ripley, who died in 1841 at the age of ninety • ³⁴ A priest. The Rev William Emerson, grandfather of Ralph Waldo Emerson, built the house in 1765

man's unprofessional and therefore unprejudiced views of religion; histories (such as Bancroft might have written had he taken up his abode here as he once purposed) bright with picture, gleaming over a depth of philosophic thought,—these were the works that might fitly have flowed from such a retirement. In the humblest event I resolved at least to achieve a novel that should evolve some deep lesson and should possess physical substance enough to stand alone

In furtherance of my design, and as if to leave me no pretext for not fulfilling it, there was in the rear of the house the most delightful little nook of a study that ever afforded its snug seclusion to a scholar. It was here that Emerson wrote *Nature*; for he was then an inhabitant of the Manse, and used to watch the Assyrian dawn and Paphian sunset and moonrise from the summit of our eastern hill. When I first saw the room its walls were blackened with the smoke of unnumbered years, and made still blacker by the grim prints of Puritan ministers that hung around. These worthies looked strangely like bad angels, or at least like men who had wrestled so continually and so sternly with the devil that somewhat of his sooty fierceness had been imparted to their own visages. They had all vanished now; a cheerful coat of paint and golden-tinted paper-hangings lighted up the small apartment, while the shadow of a willow-tree that swept against the overhanging eaves attempered the cheery western sunshine. In place of the grim prints there was the sweet and lovely head of one of Raphael's Madonnas and two pleasant little pictures of the Lake of Como. The only other decorations were a purple vase of flowers, always fresh, and a bronze one containing graceful ferns. My books (few, and by no means choice; for they were chiefly such waifs as chance had thrown in my way) stood in order about the room, seldom to be disturbed

The study had three windows, set with little, old-fashioned panes of glass, each with a crack across it. The two on the western side looked, or rather peeped, between the willow branches down into the orchard, with glimpses of the river through the trees. The third, facing northward, commanded a broader view of the river at a spot where its hitherto obscure waters gleam forth into the light of history. It was at this window that the clergyman who then dwelt in the Manse stood watching the outbreak of a long and deadly struggle between two

nations, he saw the irregular array of his parishioners on the farther side of the river and the glittering line of the British on the hither bank. He awaited in an agony of suspense the rattle of the musketry. It came, and there 50 needed but a gentle wind to sweep the battle smoke around this quiet house.

Perhaps the reader, whom I cannot help considering as my guest in the Old Manse and entitled to all courtesy in the way of sight-showing,—perhaps he will choose to take a nearer view of the memorable spot. We stand now on the river's brink. It may well be called the Concord, the river of peace and quietness, for it is certainly the most unexcitable and sluggish stream that ever loitered imperceptibly towards its eternity—the sea. Posi- 60 tively, I had lived three weeks beside it before it grew quite clear to my perception which way the current flowed. It never has a vivacious aspect except when a northwestern breeze is vexing its surface on a sunshiny day. From the incurable indolence of its nature, the stream is happily incapable of becoming the slave of human ingenuity, as is the fate of so many a wild, free mountain torrent. While all things else are compelled to subserve some useful purpose, it idles its sluggish life away in lazy liberty, without turning a solitary spindle or af- 70 fording even water-power enough to grind the corn that grows upon its banks. The torpor of its movement allows it nowhere a bright, pebbly shore, nor so much as a narrow strip of glistening sand, in any part of its course. It slumbers between broad prairies, kissing the long meadow grass, and bathes the overhanging boughs of elder bushes and willows or the roots of elms and ash-trees and clumps of maples. Flags and rushes grow along its plashy shore, the yellow water-lily spreads its broad, flat leaves on the margin, and the fragrant 80 white pond-lily abounds, generally selecting a position just so far from the river's brink that it cannot be grasped save at the hazard of plunging in.

2 Bancroft, George Bancroft (1800-1891), author of the *History of the United States* • 14 *Nature*. Emerson's first book, *Nature*, appeared in 1836 • 15 *Assyrian . . . sunset*, a graceful allusion to the passage in *Nature* in which Emerson said, "The dawn is my Assyria, the sunset and moonrise my Paphos." Assyria was an ancient civilization in Asia Minor, flourishing at the "dawn" of history. Paphos, an ancient city in Cyprus, had a temple to Aphrodite, goddess of love • 30 *Lake of Como*, in Italy • 46 *outbreak . . . struggle*, the Revolutionary War

It is a marvel whence this perfect flower derives its loveliness and perfume, springing as it does from the black mud over which the river sleeps, and where lurk the slimy eel and speckled frog and the mud turtle, whom continual washing cannot cleanse. It is the very same black mud out of which the yellow lily sucks its obscene life and noisome odor. Thus we see, too, in the world that some persons assimilate only what is ugly and evil from the same moral circumstances which sup-
10 ply good and beautiful results—the fragrance of celestial flowers—to the daily life of others.

The reader must not, from any testimony of mine, contract a dislike towards our slumberous stream. In the light of a calm and golden sunset it becomes lovely beyond expression, the more lovely for the quietude that so well accords with the hour, when even the wind, after blustering all day long, usually hushes itself to rest. Each tree and rock, and every blade of grass, is distinctly imaged, and, however unsightly in reality, as-
20 sumes ideal beauty in the reflection. The minutest things of earth and the broad aspect of the firmament are pictured equally without effort and with the same felicity of success. All the sky glows downward at our feet, the rich clouds float through the unruffled bosom of the stream like heavenly thoughts through a peaceful heart. We will not, then, malign our river as gross and impure while it can glorify itself with so adequate a picture of the heaven that broods above it; or, if we remember its tawny hue and the muddiness of its bed,
30 let it be a symbol that the earthliest human soul has an infinite spiritual capacity and may contain the better world within its depths. But, indeed, the same lesson might be drawn out of any mud puddle in the streets of a city; and, being taught us everywhere, it must be true.

Come, we have pursued a somewhat devious track in our walk to the battleground. Here we are, at the point where the river was crossed by the old bridge, the possession of which was the immediate object of the con-
40 test. On the hither side grow two or three elms, throwing a wide circumference of shade, but which must have been planted at some period within the threescore years and ten that have passed since the battle day. On the farther shore, overhung by a clump of elder bushes, we discern the stone abutment of the bridge. Looking down into the river, I once discovered some heavy frag-

ments of the timbers, all green with half a century's growth of water moss; for during that length of time the tramp of horses and human footsteps has ceased at this ancient highway. The stream has here about the breadth of twenty strokes of a swimmer's arm,—a space not too wide when the bullets were whistling across it. Old people who dwell hereabouts will point out very spots on the western bank where our countrymen fell down and died, and on this side of the river an obelisk of granite has grown up from the soil that was fertilized with British blood. The monument, not more than twenty feet in height, is such as it befitted the habitants of a village to erect in illustration of a matter of local interest rather than what was suitable to commemorate an epoch of national history. Still, by the fathers of the village this famous deed was done; and their descendants might rightfully claim the privilege of building a memorial.

A humbler token of the fight, yet a more interesting one than the granite obelisk, may be seen close under the stone-wall which separates the battleground from the precincts of the parsonage. It is the grave—marked by a small, mossgrown fragment of stone at the head and another at the foot—the grave of two British soldiers who were slain in the skirmish, and have ever since slept peacefully where Zechariah Brown and Thomas Davis buried them. Soon was their warfare ended; weary night march from Boston, a rattling volley of musketry across the river, and then these many years of rest. In the long procession of slain invaders who passed into eternity from the battlefields of the revolution, these two nameless soldiers led the way.

Lowell, the poet, as we were once standing over the grave, told me a tradition in reference to one of the inhabitants below. The story has something deeply impressive, though its circumstances cannot altogether be reconciled with probability. A youth in the service of the clergyman happened to be chopping wood, that April morning, at the back door of the Manse, and when the noise of battle rang from side to side of the bridge he hastened across the intervening field to see what might be going forward. It is rather strange, by the way, that this lad should have been so diligently at work when the whole population of town and country were startled out of their customary business by the advance of the British troops. Be that as it might, the tradition says

that the lad now left his task and hurried to the battle-field with the axe still in his hand. The British had by this time retreated, the Americans were in pursuit, and the late scene of strife was thus deserted by both parties. Two soldiers lay on the ground—one was a corpse, but, as the young New Englander drew nigh, the other Briton raised himself painfully upon his hands and knees and gave a ghastly stare into his face. The boy,—it must have been a nervous impulse, without purpose, without thought, and betokening a sensitive and impressible nature rather than a hardened one,—the boy uplifted his axe and dealt the wounded soldier a fierce and fatal blow upon the head.

I could wish that the grave might be opened, for I would fain know whether either of the skeleton soldiers has the mark of an axe in his skull. The story comes home to me like truth. Oftentimes, as an intellectual and moral exercise, I have sought to follow that poor youth through his subsequent career, and observe how his soul was tortured by the blood stain, contracted as it had been before the long custom of war had robbed human life of its sanctity, and while it still seemed murderous to slay a brother man. This one circumstance has borne more fruit for me than all that history tells us of the fight.

Many strangers come in the summer time to view the battle-ground. For my own part, I have never found my imagination much excited by this or any other scene of historic celebrity, nor would the placid margin of the river have lost any of its charm for me had men never fought and died there. There is a wilder interest in the tract of land—perhaps a hundred yards in breadth—which extends between the battle-field and the northern face of our Old Manse, with its contiguous avenue and orchard. Here, in some unknown age, before the white man came, stood an Indian village, convenient to the river, whence its inhabitants must have drawn so large a part of their subsistence. The site is identified by the spear and arrowheads, the chisels, and other implements of war, labor, and the chase, which the plough turns up from the soil. You see a splinter of stone, half hidden beneath a sod, it looks like nothing worthy of note, but, if you have faith enough to pick it up, behold a relic! Thoreau, who has a strange faculty of finding what the Indians have left behind them, first set me on the search, and I afterwards enriched myself with some very perfect specimens, so rudely wrought that it seemed almost as if

chance had fashioned them. Their great charm consists in this rudeness and in the individuality of each article, so different from the productions of civilized machinery, which shapes everything on one pattern. There is exquisite delight, too, in picking up for one's self an arrowhead that was dropped centuries ago and has never been handled since, and which we thus receive directly from the hand of the red hunter, who purposed to shoot it at his game or at an enemy. Such an incident builds up again the Indian village and its encircling forest, and recalls to life the painted chiefs and warriors, the squaws at their household toil, and the children sporting among the wigwams, while the little wind-rocked pappoose swings from the branch of the tree. It can hardly be told whether it is a joy or a pain, after such a momentary vision, to gaze around in the broad daylight of reality and see stone fences, white houses, potato fields, and men doggedly hoeing in their shirt-sleeves and homespun pantaloons. But this is nonsense. The Old Manse is better than a thousand wigwams.

The Old Manse! We had almost forgotten it, but will return thither through the orchard. This was set out by the last clergyman, in the decline of his life, when the neighbors laughed at the hoary-headed man for planting trees from which he could have no prospect of gathering fruit. Even had that been the case, there was only so much the better motive for planting them, in the pure and unselfish hope of benefiting his successors,—an end so seldom achieved by more ambitious efforts. But the old minister, before reaching his patriarchal age of ninety, ate the apples from this orchard during many years, and added silver and gold to his annual stipend by disposing of the superfluity. It is pleasant to think of him walking among the trees in the quiet afternoons of early autumn and picking up here and there a windfall, while he observes how heavily the branches are weighed down, and computes the number of empty flour barrels that will be filled by their burden. He loved each tree, doubtless, as if it had been his own child. An orchard has a relation to mankind, and readily connects itself with matters of the heart. The trees possess a domestic character, they have lost the wild nature of their forest kindred, and have grown humanized by receiving the care of man as well as by contributing to his wants. There is so much individuality of character, too, among apple-trees that it gives them an additional claim to be the objects of human

interest. One is harsh and crabbed in its manifestations; another gives us fruit as mild as charity. One is churlish and illiberal, evidently grudging the few apples that it bears, another exhausts itself in free-hearted benevolence. The variety of grotesque shapes into which apple-trees contort themselves has its effect on those who get acquainted with them—they stretch out their crooked branches, and take such hold of the imagination that we remember them as humorists and odd-fellows. And what is more melancholy than the old apple-trees that linger about the spot where once stood a homestead, but where there is now only a ruined chimney rising out of a grassy and weed-grown cellar? They offer their fruit to every wayfarer,—apples that are bitter sweet with the moral of Time's vicissitude.

I have met with no other such pleasant trouble in the world as that of finding myself, with only the two or three mouths which it was my privilege to feed, the sole inheritor of the old clergyman's wealth of fruits. Throughout the summer there were cherries and currants, and then came autumn, with his immense burden of apples, dropping them continually from his overladen shoulders as he trudged along. In the stillest afternoon, if I listened, the thump of a great apple was audible, falling without a breath of wind, from the mere necessity of perfect ripeness. And, besides, there were pear-trees, that flung down bushels upon bushels of heavy pears, and peach-trees, which, in a good year, tormented me with peaches, neither to be eaten nor kept, nor, without labor and perplexity, to be given away. The idea of an infinite generosity and exhaustless bounty on the part of our Mother Nature was well worth obtaining through such cares as these. That feeling can be enjoyed in perfection only by the natives of summer islands, where the bread-fruit, the cocoa, the palm, and the orange grow spontaneously and hold forth the ever-ready meal; but likewise almost as well by a man long habituated to city life, who plunges into such a solitude as that of the Old Manse, where he plucks the fruit of trees that he did not plant, and which therefore, to my heterodox taste, bear the closest resemblance to those that grew in Eden. It has been an apothegm these five thousand years, that toil sweetens the bread it earns. For my part (speaking from hard experience, acquired while belaboring the rugged furrows of Brook Farm), I relish best the free gifts of Providence.

Not that it can be disputed that the light toil requisite

to cultivate a moderately-sized garden imparts such to kitchen vegetables as is never found in those of the market gardener. Childless men, if they would know something of the bliss of paternity, should plant a seed be it squash, bean, Indian corn, or perhaps a mere flower or worthless weed,—should plant it with their own hands and nurse it from infancy to maturity altogether by their own care. If there be not too many of them, each individual plant becomes an object of separate interest. The garden, that skirted the avenue of the Manse, was of precisely the right extent. An hour or two of morning labor was all that it required. But I used to visit and revise a dozen times a day, and stand in deep contemplation over my vegetable progeny with a love that nobody could share or conceive of who had never taken part in the process of creation. It was one of the most bewitching sights in the world to observe a hill of beans thrusting aside soil, or a row of early peas just peeping forth sufficient to trace a line of delicate green. Later in the season humming-birds were attracted by the blossoms of a peculiar variety of bean; and they were a joy to me, those little spiritual visitants, for deigning to sip airy food out of nectar cups. Multitudes of bees used to bury themselves in the yellow blossoms of the summer squashes. This, too, was a deep satisfaction; although when they had laden themselves with sweets they flew away to some unknown hive, which would give back nothing in requital of what my garden had contributed. But I was glad thus to fling benefaction upon the passing breeze with the certainty that somebody must profit by it, and that there would be a little more honey in the world to allay the sourness and bitterness which mankind is always complaining of. Yet indeed, my life was the sweeter for that honey.

Speaking of summer squashes, I must say a word of their beautiful and varied forms. They presented an endless diversity of urns and vases, shallow or deep, scalloped or plain, moulded in patterns which a sculptor would do well to copy, since Art has never invented anything more graceful. A hundred squashes in the garden were worthy, in my eyes at least, of being rendered indestructible in marble. If ever Providence (but I know it never will) should assign me a superfluity of gold, part of

44 Brook Farm. Hawthorne spent most of 1841 in this socialist and utopian community

it shall be expended for a service of plate, or most delicate porcelain, to be wrought into the shapes of summer squashes gathered from vines which I will plant with my own hands. As dishes for containing vegetables they would be peculiarly appropriate.

But not merely the squeamish love of the beautiful was gratified by my toil in the kitchen garden. There was a hearty enjoyment, likewise, in observing the growth of the crook-necked winter squashes, from the first little bulb, with the withered blossom adhering to it, until they lay strewn upon the soil, big, round fellows, hiding their heads beneath the leaves, but turning up their great yellow rotundities to the noontide sun. Gazing at them, I felt that by my agency something worth living for had been done. A new substance was born into the world. They were real and tangible existences, which the mind could seize hold of and rejoice in. A cabbage, too,—especially the early Dutch cabbage, which swells to a monstrous circumference, until its ambitious heart often bursts asunder,—is a matter to be proud of when we can claim a share with the earth and sky in producing it. But, after all, the hugest pleasure is reserved until these vegetable children of ours are smoking on the table, and we, like Saturn, make a meal of them.

What with the river, the battle-field, the orchard and the garden, the reader begins to despair of finding his way back into the Old Manse. But in agreeable weather it is the truest hospitality to keep him out-of-doors. I never grew quite acquainted with my habitation till a long spell of sulky rain had confined me beneath its roof. There could not be a more sombre aspect of external Nature than as then seen from the windows of my study. The great willow-tree had caught and retained among its leaves a whole cataract of water, to be shaken down at intervals by the frequent gusts of wind. All day long, and for a week together, the rain was drip-drip-dripping and splash-splash-splashing from the eaves, and bubbling and foaming into the tubs beneath the spouts. The old, unpainted shingles of the house and out-buildings were black with moisture; and the mosses of ancient growth upon the walls looked green and fresh, as if they were the newest things and afterthought of Time. The usually mirrored surface of the river was blurred by an infinity of raindrops; the whole landscape had a completely water-soaked appearance, conveying the impression that the earth was wet through like a sponge; while the summit

of a wooded hill, about a mile distant, was enveloped in a dense mist, where the demon of the tempest seemed to have his abiding-place and to be plotting still direr inclemencies

Nature has no kindness, no hospitality, during a rain. In the fiercest heat of sunny days she retains a secret mercy, and welcomes the wayfarer to shady nooks of the woods whither the sun cannot penetrate, but she provides no shelter against her storms. It makes us shiver to think of those deep, umbrageous recesses, those overshadowing banks, where we found such enjoyment during the sultry afternoons. Not a twig of foliage there but would dash a little shower into our faces. Looking reproachfully towards the impenetrable sky,—if sky there be above that dismal uniformity of cloud,—we are apt to murmur against the whole system of the universe, since it involves the extinction of so many summer days in so short a life by the hissing and spluttering rain. In such spells of weather—and it is to be supposed such weather came—Eve's bower in paradise must have been but a cheerless and aguish kind of shelter, nowise comparable to the old parsonage, which had resources of its own to beguile the week's imprisonment. The idea of sleeping on a couch of wet roses!

Happy the man who in a rainy day can betake himself to a huge garret, stored, like that of the Manse, with lumber that each generation has left behind it from a period before the revolution. Our garret was an arched hall, dimly illuminated through small and dusty windows, it was but a twilight at the best, and there were nooks, or rather caverns, of deep obscurity, the secrets of which I never learned, being too reverent of their dust and cobwebs. The beams and rafters, roughly hewn and with strips of bark still on them, and the rude masonry of the chimneys, made the garret look wild and uncivilized,—an aspect unlike what was seen elsewhere in the quiet and decorous old house. But on one side there was a little whitewashed apartment which bore the traditionary title of the Saint's Chamber, because holy men in their youth had slept and studied and prayed there. With its elevated retirement, its one window, its small fireplace, and its closet, convenient for an oratory, it was the very spot where a young man might inspire himself with solemn

enthusiasm and cherish saintly dreams. The occupants, at various epochs, had left brief records and ejaculations inscribed upon the walls. There, too, hung a tattered and shrivelled roll of canvas, which on inspection proved to be the forcibly wrought picture of a clergyman, in wig, band, and gown, holding a Bible in his hand. As I turned his face towards the light he eyed me with an air of authority such as men of his profession seldom assume in our days. The original had been pastor of the parish more
10 than a century ago, a friend of Whitefield, and almost his equal in fervid eloquence. I bowed before the effigy of the dignified divine, and felt as if I had now met face to face with the ghost by whom, as there was reason to apprehend, the Manse was haunted.

Houses of any antiquity in New England are so invariably possessed with spirits that the matter seems hardly worth alluding to. Our ghost used to heave deep sighs in a particular corner of the parlor, and sometimes rustled paper, as if he were turning over a sermon in the long
20 upper entry,—where nevertheless he was invisible in spite of the bright moonshine that fell through the eastern window. Not improbably he wished me to edit and publish a selection from a chest full of manuscript discourses that stood in the garret. Once, while Hillard and other friends sat talking with us in the twilight, there came a rustling noise as of a minister's silk gown, sweeping through the very midst of the company so closely as almost to brush against the chairs. Still there was nothing visible. A yet stranger business was that of a ghostly
30 servant maid, who used to be heard in the kitchen at deepest midnight, grinding coffee, cooking, ironing,—performing, in short, all kinds of domestic labor,—although no traces of anything accomplished could be detected the next morning. Some neglected duty of her servitude—some ill-starched ministerial band—disturbed the poor damsel in her grave and kept her at work without any wages.

But to return from this digression. A part of my predecessor's library was stored in the garret,—no unfit receptacle indeed for such dreary trash as comprised the
40 greater number of volumes. The old books would have been worth nothing at an auction. In this venerable garret, however, they possessed an interest, quite apart from their literary value, as heirlooms, many of which had been transmitted down through a series of consecrated hands from the days of the mighty Puritan divines. Auto-

graphs of famous names were to be seen in faded ink some of their flyleaves; and there were marginal observations or interpolated pages closely covered with manuscript in illegible shorthand, perhaps concealing many of profound truth and wisdom. The world will never the better for it. A few of the books were Latin folios written by Catholic authors, others demolished Papis as with a sledge-hammer, in plain English. A dissertation on the book of Job—which only Job himself could have had patience to read—filled at least a score of small, thin set quartos, at the rate of two or three volumes to a character. Then there was a vast folio body of divinity—t corpulent a body, it might be feared, to comprehend the spiritual element of religion. Volumes of this form dated back two hundred years or more, and were generally bound in black leather, exhibiting precisely such an appearance as we should attribute to books of enchantment. Others equally antique were of a size proper to be carried in the large waistcoat pockets of old times,—diminutive but as black as their bulkier brethren, and abundantly interfused with Greek and Latin quotations. These little old volumes impressed me as if they had been intended for very large ones, but had been unfortunately blighted at an early stage of their growth.

The rain pattered upon the roof and the sky gloomed through the dusty garret windows, while I burrowed among these venerable books in search of any living thought which should burn like a coal of fire, or glow like an inextinguishable gem, beneath the dead trumpery that had long hidden it. But I found no such treasure; all was dead alike; and I could not but muse deeply and wonderingly upon the humiliating fact that the works of man's intellect decay like those of his hands. Thought grows mouldy. What was good and nourishing food for the spirits of one generation affords no sustenance for the next. Books of religion, however, cannot be considered a fair test of the enduring and vivacious properties of human thought, because such books so seldom really touch upon their ostensible subject, and have, therefore, so little business to be written at all. So long as an unlettered soul can attain to saving grace, there would seem

9 original . . . Whitefield. George Whitefield, the English revivalist (see p. 19), had preached in Concord at the invitation of the Rev. Daniel Bliss, the "original" referred to. • 24 Hillard, George Stillman Hillard (1808-1879), a Boston lawyer and the author of travel sketches

to be no deadly error in holding theological libraries to be accumulations of, for the most part, stupendous impertinence.

Many of the books had accrued in the latter years of the last clergyman's lifetime. These threatened to be of even less interest than the elder works, a century hence, to any curious inquirer who should then rummage them as I was doing now. Volumes of the "Liberal Preacher" and "Christian Examiner," occasional sermons, controversial pamphlets, tracts, and other productions of a like fugitive nature took the place of the thick and heavy volumes of past time. In a physical point of view there was much the same difference as between a feather and a lump of lead; but, intellectually regarded, the specific gravity of old and new was about upon a par. Both also were alike frigid. The elder books, nevertheless, seemed to have been earnestly written, and might be conceived to have possessed warmth at some former period, although, with the lapse of time, the heated masses had cooled down even to the freezing point. The frigidity of the modern productions, on the other hand, was characteristic and inherent, and evidently had little to do with the writer's qualities of mind and heart. In fine, of this whole dusty heap of literature I tossed aside all the sacred art, and felt myself none the less a Christian for eschewing it. There appeared no hope of either mounting to the better world on a Gothic staircase of ancient folios or of flying thither on the wings of a modern tract.

Nothing, strange to say, retained any sap except what had been written for the passing day and year without the remotest pretension or idea of permanence. There were a few old newspapers, and still older almanacs, which reproduced to my mental eye the epochs when they had issued from the press with a distinctness that was altogether unaccountable. It was as if I had found bits of magic looking-glass among the books, with the images of a vanished century in them. I turned my eyes towards the tattered picture above mentioned, and asked of the austere divine wherefore it was that he and his brethren, after the most painful rummaging and groping into their minds, had been able to produce nothing half so real as these newspaper scribblers and almanac makers had thrown off in the effervescence of a moment. The portrait responded not; so I sought an answer for myself. It is the age itself that writes newspapers and almanacs, which, therefore, have a distinct purpose and meaning at the time, and a

kind of intelligible truth for all times, whereas most other works—being written by men who, in the very act, set themselves apart from their age—are likely to possess little significance when new, and none at all when old. Genius, indeed, melts many ages into one, and thus effects something permanent, yet still with a similarity of office to that of the more ephemeral writer. A work of genius is but the newspaper of a century, or perchance of a hundred centuries.

Lightly as I have spoken of these old books, there yet lingers with me a superstitious reverence for literature of all kinds. A bound volume has a charm in my eyes similar to what scraps of manuscript possess for the good Mussulman. He imagines that those wind-wafted records are perhaps hallowed by some sacred verse, and I, that every new book or antique one may contain the "open sesame;"—the spell to disclose treasures hidden in some unsuspected cave of Truth. Thus it was not without sadness that I turned away from the library of the Old Manse.

Blessed was the sunshine when it came again at the close of another stormy day, beaming from the edge of the western horizon, while the massive firmament of clouds threw down all the gloom it could, but served only to kindle the golden light into a more brilliant glow by the strongly contrasted shadows. Heaven smiled at the earth, so long unseen, from beneath its heavy eyelid. Tomorrow for the hill-tops and the wood paths.

Or it might be that Ellery Channing came up the avenue to join me in a fishing excursion on the river. Strange and happy times were those when we cast aside all irksome forms and strait-laced habitudes, and delivered ourselves up to the free air, to live like the Indians or any less conventional race during one bright semicircle of the sun. Rowing our boat against the current, between wide meadows, we turned aside into the Assabeth. A more lovely stream than this, for a mile above its junction with the Concord, has never flowed on earth,—nowhere, indeed, except to lave the interior regions of a poet's imagination. It is sheltered from the breeze by woods and a hill-side, so that elsewhere there

8 *Liberal Preacher*, *Christian Examiner*, theological magazines •
60 *Mussulman*, a Mohammedan • 75 *Ellery Channing*. William Ellery Channing (1818-1901), nephew of the famous Unitarian clergyman of the same name, was a poet of the Transcendental school.

might be a hurricane, and here scarcely a ripple across the shaded water. The current lingers along so gently that the mere force of the boatman's will seems sufficient to propel his craft against it. It comes flowing softly through the mid-most privacy and deepest heart of a wood which whispers it to be quiet, while the stream whispers back again from its sedgy borders, as if river and wood were hushing one another to sleep. Yes, the river sleeps along its course and dreams of the sky and of the clustering foliage, amid which fall showers of broken sunlight, imparting specks of vivid cheerfulness, in contrast with the quiet depth of the prevailing tint. Of all this scene, the slumbering river has a dream picture in its bosom. Which, after all, was the most real—the picture, or the original?—the objects palpable to our grosser senses, or their apotheosis in the stream beneath? Surely the disembodied images stand in closer relation to the soul. But both the original and the reflection had here an ideal charm, and, had it been a thought more wild, I could have fancied that this river had strayed forth out of the rich scenery of my companion's inner world; only the vegetation along its banks should then have had an Oriental character.

Gentle and unobtrusive as the river is, yet the tranquil woods seem hardly satisfied to allow it passage. The trees are rooted on the very verge of the water, and dip their pendent branches into it. At one spot there is a lofty bank, on the slope of which grow some hemlocks, declining across the stream with outstretched arms, as if resolute to take the plunge. In other places the banks are almost on a level with the water; so that the quiet congregation of trees set their feet in the flood, and are fringed with foliage down to the surface. Cardinal flowers kindle their spiral flames and illuminate the dark nooks among the shrubbery. The pond-lily grows abundantly along the margin—that delicious flower, which, as Thoreau tells me, opens its virgin bosom to the first sunlight and perfects its being through the magic of that genial kiss. He has beheld beds of them unfolding in due succession as the sunrise stole gradually from flower to flower—a sight not to be hoped for unless when a poet adjusts his inward eye to a proper focus with the outward organ. Grape-vines here and there twine themselves around shrub and tree and hang their clusters over the water within reach of the boatman's hand. Oftentimes they unite two trees of alien race in an inextricable twine,

marrying the hemlock and the maple against their and enriching them with a purple offspring of w neither is the parent. One of these ambitious parasites climbed into the upper branches of a tall, white pine, is still ascending from bough to bough, unsatisfied to shall crown the tree's airy summit with a wreath of broad foliage and a cluster of its grapes.

The winding course of the stream continually shut the scene behind us, and revealed as calm and lovely one before. We glided from depth to depth, and breathed new seclusion at every turn. The shy kingfisher flew from the withered branch close at hand to another at a distance uttering a shrill cry of anger or alarm. Ducks that I had been floating there since the preceding eve were startled at our approach, and skimmed along the glassy river breaking its dark surface with a bright streak. The purple heron leaped from among the lily-pads. The turtle, sunning itself upon a rock or at the root of a tree, slid suddenly into the water with a plunge. The painted Indian who paddled his canoe along the Assabeth three hundred years ago could hardly have seen a wilder gentleness display upon its banks and reflected in its bosom than we did. Nor could the same Indian have prepared his noon meal with more simplicity. We drew up our skiff at some point where the overarching shade formed a natural bower, and there kindled a fire with the pine cones and decayed branches that lay strewn plentifully around. Soothe the smoke ascended among the trees, impregnated with savory incense, not heavy, dull, and surfeiting, like the steam of cookery within doors, but sprightly and piquant. The smell of our feast was akin to the woodland odor with which it mingled: there was no sacrilege committed by our intrusion there: the sacred solitude was hospitable, and granted us free leave to cook and eat in the recess that was at once our kitchen and banqueting hall. It is strange what humble offices may be performed in a beautiful scene without destroying its poetry. Our fire, red gleaming among the trees, and we beside it, busied with culinary rites and spreading out our meal on a moss-grown log, all seemed in unison with the river gliding by and the foliage rustling over us. And, what was strangest, neither did our mirth seem to disturb the pro-

23 Oriental character. The reference is to the interest of the New England Transcendentalists in Oriental philosophy • 66 Assabeth. The Assabeth River flows into the Concord River at Concord

priety of the solemn woods, although the hobgoblins of the old wilderness and the will-of-the-wisps that glimmered in the marshy places might have come trooping to share our table talk, and have added their shrill laughter to our merriment. It was the very spot in which to utter the extremest nonsense or the profoundest wisdom, or that ethereal product of the mind which partakes of both, and may become one or the other, in correspondence with the faith and insight of the auditor.

So amid sunshine and shadow, rustling leaves and sighing waters, up gushed our talk like the babble of a fountain. The evanescent spray was Ellery's, and his, too, the lumps of golden thought that lay glimmering in the fountain's bed and brightened both our faces by the reflection. Could he have drawn out that virgin gold and stamped it with the mint mark that alone gives currency, the world might have had the profit, and he the fame. My mind was the richer merely by the knowledge that it was there. But the chief profit of those wild days to him and me lay, not in any definite idea, not in any angular or rounded truth, which we dug out of the shapeless mass of problematical stuff, but in the freedom which we thereby won from all custom and conventionalism and fettering influences of man on man. We were so free to-day that it was impossible to be slaves again to-morrow. When we crossed the threshold of the house or trod the thronged pavements of a city, still the leaves of the trees that overhang the Assabeth were whispering to us, "Be free! be free!" Therefore along that shady river-bank there are spots, marked with a heap of ashes and half-consumed brands, only less sacred in my remembrance than the hearth of a household fire.

And yet how sweet, as we floated homeward adown the golden river at sunset,—how sweet was it to return within the system of human society, not as to a dungeon and a chain, but as to a stately edifice, whence we could go forth at will into statelier simplicity! How gently, too, did the sight of the Old Manse, best seen from the river, overshadowed with its willow and all environed about with the foliage of its orchard and avenue,—how gently did its gray, homely aspect rebuke the speculative extravagances of the day! It had grown sacred in connection with the artificial life against which we inveighed, it had been a home for many years in spite of all, it was my home too; and, with these thoughts, it seemed to me that all the artifice and conventionalism of life was but an

impalpable thinness upon its surface, and that the depth below was none the worse for it. Once, as we turned our boat to the bank, there was a cloud, in the shape of an immensely gigantic figure of a hound, couched above the house, as if keeping guard over it. Gazing at this symbol, I prayed that the upper influences might long protect the institutions that had grown out of the heart of mankind.

If ever my readers should decide to give up civilized life, cities, houses, and whatever moral or material enormities in addition to these the perverted ingenuity of our race has contrived, let it be in the early autumn. Then Nature will love him better than at any other season, and will take him to her bosom with a more motherly tenderness. I could scarcely endure the roof of the old house above me in those first autumnal days. How early in the summer, too, the prophecy of autumn comes! Earlier in some years than in others, sometimes even in the first weeks of July. There is no other feeling like what is caused by this faint, doubtful, yet real perception—if it be not rather a foreboding—of the year's decay, so blessedly sweet and sad in the same breath.

Did I say that there was no feeling like it? Ah, but there is a half-acknowledged melancholy like to this when we stand in the perfected vigor of our life and feel that Time has now given us all his flowers, and that the next work of his never idle fingers must be to steal them one by one away.

I have forgotten whether the song of the cricket be not as early a token of autumn's approach as any other,—that song which may be called an audible stillness, for though very loud and heard afar, yet the mind does not take note of it as a sound, so completely is its individual existence merged among the accompanying characteristics of the season. Alas for the pleasant summer time! In August the grass is still verdant on the hills and in the valleys, the foliage of the trees is as dense as ever, and as green, the flowers gleam forth in richer abundance along the margin of the river, and by the stone walls, and deep among the woods, the days, too, are as fervid now as they were a month ago, and yet in every breath of wind and in every beam of sunshine we hear the whispered farewell and behold the parting smile of a dear friend. There is a coolness amid all the heat, a mildness in the blazing noon. Not a breeze can stir but it thrills us with the breath of autumn. A pensive glory is seen in the far

golden gleams, among the shadows of the trees. The flowers—even the brightest of them, and they are the most gorgeous of the year—have this gentle sadness wedded to their pomp, and typify the character of the delicious time each within itself. The brilliant cardinal flower has never seemed gay to me.

Still later in the season Nature's tenderness waxes stronger. It is impossible not to be fond of our mother now, for she is so fond of us! At other periods she does not make this impression on me, or only at rare intervals, but in those genial days of autumn, when she has perfected her harvests and accomplished every needful thing that was given her to do, then she overflows with a blessed superfluity of love. She has leisure to caress her children now. It is good to be alive at such times. Thank Heaven for breath—yes, for mere breath—when it is made up of a heavenly breeze like this! It comes with a real kiss upon our cheeks, it would linger fondly around us if it might, but, since it must be gone, it embraces us with its whole kindly heart and passes onward to embrace likewise the next thing that it meets. A blessing is flung abroad and scattered far and wide over the earth, to be gathered up by all who choose. I recline upon the still unwithered grass and whisper to myself, "O perfect day! O beautiful world! O beneficent God!" And it is the promise of a blessed eternity, for our Creator would never have made such lovely days and have given us the deep hearts to enjoy them, above and beyond all thought, unless we were meant to be immortal. This sunshine is the golden pledge thereof. It beams through the gates of paradise and shows us glimpses far inward.

By and by, in a little time, the outward world puts on a drear austerity. On some October morning there is a heavy hoar-frost on the grass and along the tops of the fences, and at sunrise the leaves fall from the trees of our avenue without a breath of wind, quietly descending by their own weight. All summer long they have murmured like the noise of waters, they have roared loudly while the branches were wrestling with the thunder gust, they have made music both glad and solemn, they have attuned my thoughts by their quiet sound as I paced to and fro beneath the arch of intermingling boughs. Now they can only rustle under my feet. Henceforth the gray parsonage begins to assume a larger importance, and draws to its fireside,—for the abomination of the air-tight stove is reserved till wintry weather,—draws closer and

closer to its fireside the vagrant impulses that had gone wandering about through the summer.

When summer was dead and buried the Old Man became as lonely as a hermitage. Not that ever—in my time at least—it had been thronged with company; but at no rare intervals, we welcomed some friend out of the dusty glare and tumult of the world, and rejoiced to share with him the transparent obscurity that was floating over us. In one respect our precincts were like the Enchanted Ground through which the pilgrim travelled on his way to the Celestial City! The guests, each and all, felt a slumberous influence upon them; they fell asleep in chairs, or took a more deliberate siesta on the sofa, or were seen stretched among the shadows of the orchard looking up dreamily through the boughs. They could not have paid a more acceptable compliment to my abode than to my own qualities as a host. I held it as a proof that they left their cares behind them as they passed between the stone gate-posts at the entrance of our avenue, and that the so powerful opiate was the abundance of peace and quiet within and all around us. Others could give them pleasure and amusement or instruction—these could be picked up anywhere; but it was for me to give them rest—in a life of trouble. What better could be done for those weary and world-worn spirits?—for him whose career of perpetual action was impeded and harassed by the rarest of his powers and the richest of his acquirements?—for another who had thrown his ardent heart from earliest youth into the strife of politics and now, perchance, began to suspect that one lifetime is too brief for the accomplishment of any lofty aim?—for her on whose feminine nature had been imposed the heavy gift of intellectual power, such as a strong man might have staggered under, and with it the necessity

55 Enchanted . . . City. See p. 1012 for another allusion to the passage in *Pilgrim's Progress* where the shepherds on the Delectable Mountains warn the pilgrims to "take heed that they sleep not upon the enchanted ground," for "the air naturally tended to make one drowsy" • 71 him, Horatio Bridge, Bowdoin classmate and lifelong friend, whose *Journal of an African Cruiser*, edited by Hawthorne, had just been published. Bridge was an officer in the United States Navy, and Hawthorne perhaps intended to suggest that Bridge's literary talent was at odds with his professional career • 74 another, Franklin Pierce (1804-1869), another associate at Bowdoin and friend of a lifetime. Pierce rose through the state legislature of New Hampshire and the national Congress to the Presidency of the United States (1853-1857) • 78 her, Margaret Fuller, a frequent visitor in Concord. to act upon the world?—in a word, not to multiply instances, what better could be done for anybody who came within our magic circle than to throw the spell of a tranquil spirit over him? And when it had wrought its full effect, then we dismissed him, with but misty reminiscences, as if he had been dreaming of us

Were I to adopt a pet idea, as so many people do, and fondle it in my embraces to the exclusion of all others, it would be, that the great want which mankind labors under at this present period is sleep. The world should recline its vast head on the first convenient pillow and take an age-long nap. It has gone distracted through a morbid activity, and, while preternaturally wide awake, is nevertheless tormented by visions that seem real to it now, but would assume their true aspect and character were all things once set right by an interval of sound repose. This is the only method of getting rid of old delusions and avoiding new ones, of regenerating our race, so that it might in due time awake as an infant out of dewy slumber; of restoring to us the simple perception of what is right, and the single-hearted desire to achieve it, both of which have long been lost in consequence of this weary activity of brain and torpor or passion of the heart that now afflict the universe. Stimulants, the only mode of treatment hitherto attempted, cannot quell the disease; they do but heighten the delirium.

Let not the above paragraph ever be quoted against the author, for, though tinctured with its modicum of truth, it is the result and expression of what he knew, while he was writing, to be but a distorted survey of the state and prospects of mankind. There were circumstances around me which made it difficult to view the world precisely as it exists, for, severe and sober as was the Old Manse, it was necessary to go but a little way beyond its threshold before meeting with stranger moral shapes of men than might have been encountered elsewhere in a circuit of a thousand miles.

These hobgoblins of flesh and blood were attracted hither by the widespreading influence of a great original hinker, who had his earthly abode at the opposite extremity of our village. His mind acted upon other minds of a certain constitution with wonderful magnetism, and drew many men upon long pilgrimages to speak with him face to face. Young visionaries—to whom just so much of insight had been imparted as to make life all labyrinth around them—came to seek the clew that

should guide them out of their self-involved bewilderment. Grayheaded theorists—whose systems, at first air, had finally imprisoned them in an iron frame-work—travelled painfully to his door, not to ask deliverance, but to invite the free spirit into their own thralldom. People that had lighted on a new thought, or a thought that they fancied new, came to Emerson, as the finder of a glittering gem hastens to a lapidary, to ascertain its quality and value. Uncertain, troubled, earnest wanderers through the midnight of the moral world beheld his intellectual fire as a beacon burning on a hill-top, and, climbing the difficult ascent, looked forth into the surrounding obscurity more hopefully than hitherto. The light revealed objects unseen before,—mountains, gleaming lakes, glimpses of a creation among the chaos, but, also, as was unavoidable, it attracted bats and owls and the whole host of night birds, which flapped their dusky wings against the gazer's eyes, and sometimes were mistaken for fowls of angelic feather. Such delusions always hover high whenever a beacon fire of truth is kindled.

For myself there had been epochs of my life when I, too, might have asked of this prophet the master word that should solve me the riddle of the universe, but now, being happy, I felt as if there were no question to be put, and therefore admired Emerson as a poet of deep beauty and austere tenderness, but sought nothing from him as a philosopher. It was good, nevertheless, to meet him in the woodpaths, or sometimes in our avenue, with that pure intellectual gleam diffused about his presence like the garment of a shining one, and he so quiet, so simple, so without pretension, encountering each man alive as if expecting to receive more than he could impart. And, in truth, the heart of many an ordinary man had, perchance, inscriptions which he could not read. But it was impossible to dwell in his vicinity without inhaling more or less the mountain atmosphere of his lofty thought, which, in the brains of some people, wrought a singular giddiness,—new truth being as heady as new wine. Never was a poor little country village infested with such a variety of queer, strangely-dressed, oddly-behaved mortals, most of whom took upon themselves to be important agents of the world's destiny, yet were simply bores of a very intense water. Such, I imagine, is the invariable character of persons who crowd so closely about an original thinker as to draw in his unuttered breath and thus become imbued with a false originality. This is the

is enough to make any man of common sense blaspheme at all ideas of less than a century's standing, and pray that the world may be petrified and rendered immovable in precisely the worst moral and physical state that it ever yet arrived at, rather than be benefited by such schemes of such philosophers.

And now I begin to feel—and perhaps should have sooner felt—that we have talked enough of the Old Manse. Mine honored reader, it may be, will vilify the poor author as an egotist for babbling through so many pages about a moss-grown country parsonage, and his life within its walls and on the river and in the woods, and the influences that wrought upon him from all these sources. My conscience, however, does not reproach me with betraying anything too sacredly individual to be revealed by a human spirit to its brother or sister spirit. How narrow—how shallow and scanty too—is the stream of thought that has been flowing from my pen, compared with the broad tide of dim emotions, ideas, and associations which swell around me from that portion of my existence! How little have I told! and of that little, how almost nothing is even tintured with any quality that makes it exclusively my own! Has the reader gone wandering, hand in hand with me, through the inner passages of my being? and have we groped together into all its chambers and examined their treasures or their rubbish? Not so. We have been standing on the greensward, but just within the cavern's mouth, where the common sunshine is free to penetrate, and where every footstep is therefore free to come. I have appealed to no sentiment or sensibilities save such as are diffused among us all. So far as I am a man of really individual attributes I veil my face; nor am I, nor have I ever been, one of those supremely hospitable people who serve up their own hearts, delicately fried, with brain sauce, as a tidbit for their beloved public.

Glancing back over what I have written, it seems but the scattered reminiscences of a single summer. In fairy-land there is no measurement of time; and, in a spot so sheltered from the turmoil of life's ocean, three years hastened away with a noiseless flight, as the breezy sunshine chases the cloud shadows across the depths of a still valley. Now came hints, growing more and more distinct, that the owner of the old house was pining for his native air. Carpenters next appeared, making a tremendous racket among the out-buildings, strewing the

green grass with pine shavings and chips of chest-joints, and vexing the whole antiquity of the place with their discordant renovations. Soon, moreover, they vested our abode of the veil of woodbine which had crept over a large portion of its southern face. All the aged mosses were cleared unsparingly away; and there were horrible whispers about brushing up the external walls with a coat of paint—a purpose as little to my taste as might be that of rouging the venerable cheeks of one's grandmother. But the hand that renovates is always more sacrilegious than that which destroys. In future we gathered up our household goods, drank a farewell cup of tea in our pleasant little breakfast room,—delicately fragrant tea, an unpurchasable luxury, one of the many angel gifts that had fallen like dew upon us,—and passed forth between the tall stone gateposts as uncertain as the wandering Arabs where our tent might next be pitched. Providence took me by the hand, and—an oddity of dispensation which, I trust, there is no irreverence in smiling at—has led me, as the newspapers announce while I am writing, from the Old Manse into a custom-house. As a story teller, I have often contrived strange vicissitudes for my imaginary personages, but none like this.

The treasure of intellectual good which I hoped to find in our secluded dwelling had never come to light. No profound treatise of ethics, no philosophic history, no novel even, that could stand unsupported on its edges. All that I had to show, as a man of letters, were these few tales and essays, which had blossomed out like flowers in the calm summer of my heart and mind. Save editing (an easy task) the journal of my friend of many years the *African Cruiser*, I had done nothing else. With these idle weeds and withering blossoms I have intermixed some that were produced long ago,—old, faded things, reminding me of flowers pressed between the leaves of a book,—and now offer the bouquet, such as it is, to any whom it may please. These fitful sketches, with so little of external life about them, yet claiming no profundity of purpose,—so reserved, even while they sometimes seem so frank,—often but half in earnest, and never, even when most so, expressing satisfactorily the thoughts which they profess to image,—such trifles, I truly feel, afford no solid basis for a literary reputation. Nevertheless, the public—if my limited number of readers, whom I venture to regard rather as a circle of friends, may be termed

a public—will receive them the more kindly, as the last offering, the last collection, of this nature which it is my purpose ever to put forth. Unless I could do better, I have done enough in this kind. For myself the book will always retain one charm—as reminding me of the river, with its delightful solitudes, and of the avenue, the garden, and the orchard, and especially the dear old Manse, with the little study on its western side, and the sunshine glimmering through the willow branches while I wrote.

Let the reader, if he will do me so much honor, imagine himself my guest, and that, having seen whatever may be worthy of notice within and about the Old Manse, he has finally been ushered into my study. There, after seating him in an antique elbow chair, an heirloom of the house, I take forth a roll of manuscript and entreat his attention to the following tales—an act of personal inhospitality, however, which I never was guilty of, nor ever will be, even to my worst enemy

1846

Preface to "The House of the Seven Gables"

The following Preface is the best example of Hawthorne's criticism of his own writings. The critical points are generally applicable not only to *The House of the Seven Gables* but to his works as a whole. Of particular interest is his distinction between the "Novel" and the "Romance." As examples of the Novel, Hawthorne had in mind no doubt the works of such writers as Thackeray and Trollope. His own works he preferred to call "Romances."

When a writer calls his work a Romance, it need hardly be observed that he wishes to claim a certain latitude, both as to its fashion and material, which he would not have felt himself entitled to assume, had he professed to be writing a Novel. The latter form of composition is resumed to aim at a very minute fidelity, not merely to the possible, but to the probable and ordinary course of man's experience. The former—while, as a work of art, it must rigidly subject itself to laws, and while it sins pardonably so far as it may swerve aside from the truth

of the human heart—has fairly a right to present that truth under circumstances, to a great extent, of the writer's own choosing or creation. If he thinks fit, also, he may so manage his atmospherical medium as to bring out or mellow the lights, and deepen and enrich the shadows, of the picture. He will be wise, no doubt, to make a very moderate use of the privileges here stated, and, especially, to mingle the Marvelous rather as a slight, delicate, and evanescent flavor, than as any portion of the actual substance of the dish offered to the public. He can hardly be said, however, to commit a literary crime, even if he disregard this caution.

In the present work the author has proposed to himself—but with what success, fortunately, it is not for him to judge—to keep undeviatingly within his immunities. The point of view in which this tale comes under the Romantic definition lies in the attempt to connect a bygone time with the very present that is flitting away from us. It is a legend, prolonging itself, from an epoch now gray in the distance down into our own broad daylight, and bringing along with it some of its legendary mist, which the reader, according to his pleasure, may either disregard or allow it to float almost imperceptibly about the characters and events for the sake of a picturesque effect. The narrative, it may be, is woven of so humble a texture as to require this advantage, and, at the same time, to render it the more difficult of attainment.

Many writers lay very great stress upon some definite moral purpose, at which they profess to aim their works. Not to be deficient in this particular, the author has provided himself with a moral,—the truth, namely, that the wrongdoing of one generation lives into the successive ones, and, divesting itself of every temporary advantage,

becomes a pure and uncontrollable mischief;—and he would feel it a singular gratification, if this romance might effectually convince mankind—or, indeed, any one man—of the folly of tumbling down an avalanche of ill-gotten gold, or real estate, on the heads of an unfortunate posterity, thereby to maim and crush them, until the accumulated mass shall be scattered abroad in its original atoms. In good faith, however, he is not sufficiently imaginative to flatter himself with the slightest hope of this kind. When romances do really teach anything, or produce any effective operation, it is usually through a far more subtle process than the ostensible one. The author has considered it hardly worth his while, therefore, relentlessly to impale the story with its moral, as with an iron rod,—or, rather, as by sticking a pin through a butterfly,—thus at once depriving it of life, and causing it to stiffen in an ungainly and unnatural attitude. A high truth, indeed, fairly, finely, and skilfully wrought out, brightening at every step, and crowning the final development of a work of fiction, may add an artistic glory, but is never any truer, and seldom any more evident, at the last page than at the first.

The reader may perhaps choose to assign an actual locality to the imaginary events of this narrative. If permitted by the historical connection,—which, though slight, was essential to his plan,—the author would very willingly have avoided anything of this nature. Not to

speak of other objections, it exposes the romance to inflexible and exceedingly dangerous species of criticism by bringing his fancy-pictures almost into positive contact with the realities of the moment. It has been no part of his object, however, to describe local manners, nor any way to meddle with the characteristics of a community for whom he cherishes a proper respect and natural regard. He trusts not to be considered as unpardonably offending, by laying out a street that infringes upon nobody's private rights, and appropriating a lot of land which had no visible owner, and building a house of materials long in use for constructing castles in the air. The personages of the tale—though they give themselves out to be of ancient stability and considerable prominence—are really of the author's own making, or at all events, of his own mixing, their virtues can shed no luster, nor their defects redound, in the remotest degree to the discredit of the venerable town of which they profess to be inhabitants. He would be glad, therefore, if—especially in the quarter to which he alludes—this book may be read strictly as a romance, having a great deal more to do with the clouds overhead than with any portion of the actual soil of the County of Essex.

DOWN EAST HUMORISTS: Smith, Davis

Seba Smith

1792 • 1868

When, in January 1830, Editor Seba Smith of the *Portland* (Maine) *Courier* decided he should do something to stimulate interest in his languishing newspaper, he invented the humorous character Jack Downing to say his say about contemporary politics. The homespun commentator was such a success that from 1830 down to

the eve of the Civil War Smith turned out the "Downing Letters," important in the development of American humor and of a type of political argument destined to prove very significant in our national history.

Jack and the members of the Downing family who exchanged letters with him were both believable and

nusing. Smith's background had equipped him well for writing about Yankees, both authentically and humorously. Born in a Buckfield, Maine, log cabin, reared in Buckfield or other Down East towns until he was twenty-three, he was well acquainted with Yankee ways of thinking, talking, and living. The vividness with which he portrayed Downingville, the lifelikeness of the speech of the Downings, and the verisimilitude of their actions all made his rustics believable. (Emerson notes that his old Concord neighbor, Ezra Ripley, never could be persuaded that Jack was not a living man.) Smith's study at Bowdoin (1815-1818) and his travel in the South probably helped him acquire the objectivity often valuable for humor.

In addition to the appeals of the characterization and the humor, there was the appeal of the political satire. At first Smith had his hero wander into the Maine legislature and write naively about state politics. Later he had Jack go to Washington, D. C., and comment on national issues and personalities. Writing of his adventures in the Kitchen Cabinet (unofficial advisers) of Jackson and of his friendships with public men, Downing wittingly or unwittingly said laughable things about the partisan struggles of the day—the fight against the national bank, the nullification struggle and others. This illiterate but shrewd common man discoursing on national affairs appealed to readers not only in the Jacksonian period which produced him but also in later periods, as he continued his letters during succeeding administrations. Frequently, newspaper wits nominated him for the governorship or the Presidency, and early

cartoonists of the day who wanted a symbol for the United States often pictured Jack. Even today, Uncle Sam is simply Jack Downing with whiskers. Jack was the ancestor of a whole series of horse sense humorists, such as Hosea Biglow, Bill Arp, Kin Hubbard, and Will Rogers, who have delighted great masses of Americans and influenced their political thinking.

From

My Thirty Years Out of the Senate

Accompanied by a number of his official and unofficial advisers, President Jackson spent part of the summer of 1833 taking a trip which carried him to several of the

Panel (l to r) News of the day • Storytelling session in a New England country store • The Yankee peddler

chief cities of the North. At each stop there were large demonstrations, partly because of the President's personal popularity, partly because of general approval in the North of his recent stand on nullification. Jack Downing, in his letter dated June 10, tells of the reception at Philadelphia. Subsequent letters, here reprinted, offer additional details about the journey.

MAJOR DOWNING SHAKES HANDS FOR THE
PRESIDENT AT PHILADELPHIA, WHILE ON
THE GRAND TOUR DOWN EAST

Philadelphia, June 10, 1833

To Uncle Joshua Downing, Postmaster, up in Downingville, in the State of Maine, with care and speed

Dear Uncle Joshua:—We are coming on, full chisel. I've been trying, ever since we started, to get a chance to write a little to you, but when we've been on the road I couldn't catch my breath hardly long enough to write my name, we kept flying so fast, and when we made any stop, there was such a jam around us there wasn't
10 elbow room enough for a miskeeter to turn round without knocking his wings off

I'm most afraid now we shall get to Downingville before this letter does, so that we shall be likely to catch you all in the suds before you think of it. But I understand there is a *fast mail* goes on that way, and I mean to send it by that, so I'm in hopes you'll get it time enough to have the children's faces washed and their heads combed, and the gals get on their clean gowns. And if Sargent Joel *could* have time enough to call out
20 my old Downingville company and get their uniforms brushed up a little, and come down the road as fur as your new barn to meet us, there's nothing that would please the President better. As for victuals, most anything won't come amiss, we are as hungry as bears after traveling a hundred miles a day. A little fried pork and eggs, or a pot of baked beans and an Indian pudding would suit us much better than the soft stuff they give here in these great cities.

The President wouldn't miss of seeing you for any
30 thing in the world, and he will go to Downingville if he has legs and arms enough left when he goes to Portland to carry him there. But, for fear that anything

should happen that he shouldn't be able to come, had better meet us in Portland, say about the 22d, then you can go up to Downingville with us.

This traveling with the President is capital fun, all, if it wasn't so plaguy tiresome. We come into timore on a railroad, and we flew over the ground a harrycane. There isn't a horse in this country could keep up with us, if he should go upon the clip. When we got to Baltimore, the streets were full with folks as thick as the spruce trees down in the swamp. There we found Black Hawk, a little, dried up Indian king. And I thought the folks looked at him and the prophet about as much as they did me and the President. I gave the President a wink, and this Indian fellow was taking the shine off us a little, so we concluded we wouldn't have him with us no more, but go on without him.

I can't stop to tell you, in this letter, how we went along to Philadelphia, though we had a pretty easy time some of the way in the steamboats. And I can't stop to tell you of half of the fine things I have seen here. They took us up into a great hall this morning, as big as a meeting-house, and then the folks begun to pour in by thousands to shake hands with the President—Federalists and all, it made no difference. There was such a stream of 'em coming in that the hall was full in a few minutes, and it was so jammed up around the door that they couldn't get out again if they were to die. So they had to knock out some of the windows, and go out t'other way.

The President shook hands with all his might an hour or two, 'till he got so tired he couldn't hardly stand. I took hold and shook for him once in a while to help him along, but at last he got so tired he had to lie down on a soft bench, covered with cloth, and shake as well as he could, and when he couldn't shake, he would nod to 'em as they come along. And at last he got so beat out, he couldn't only wrinkle his forehead and wink. Then I kind of stood behind him, and reached my arm round under his, and shook for him for about half an hour as tight as I could spring. Then we concluded it was best to adjourn for to-day.

And I've made out to get away up into the garret in the tavern long enough to write this letter. We shall be off tomorrow or next day for York; and if I can possibly get breathing time enough there, I shall write to you again.

Give my love to all the folks in Downingville, and believe me your loving neffu.

MAJOR JACK DOWNING
1833

MAJOR DOWNING DESCRIBES THE VISIT OF THE
PRESIDENT AT BOSTON

Boston, Tuesday, June 25, 1833

To the Editor of the Portland Cornucopia

My Dear Old Friend—I'm keeping house with the President to-day, and bein' he's getting considerable better, I thought I'd catch a chance when he was taking a knap, and write a little to let you know how we get along. This ere sickness of the President has been a bad pull-back to us. He hasn't been able to go out since Sunday afternoon, and I've been watchin' with him this two nights, and if I wasn't as tough as a halter, I should be half dead by this time.

And if the President wasn't tougher than a catamount, he'd kick the bucket before he'd been round to see one half the notions there is in Boston. Poor man, he has a hard time of it; you've no idea how much he has to go through. It's worse than being dragged through forty knot-holes.

To be bamboozled about from four o'clock in the morning till midnight, rain or shine—jammed into one great house to eat a breakfast, and into another great house to eat a dinner, and into another to eat supper, and into two or three others between meals, to eat cooliations, and to have to go out and review three or four regiments of troops, and then to be jammed into Funnel Hall two hours, and shake hands with three or four thousand folks, and then to go into the State House and stand there two or three hours, and see all Boston streaming through it like a river through a saw-mill, and then to ride about the city awhile in a fine painted covered wagon, with four or five horses to draw it, and then to ride awhile in one without any cover to it, finney-fined off to the top notch, and then get on to the horses and ride awhile a horseback, and then run into a great picture-room and see more fine pictures than you could make a stick at in a week, and then go into some grand gentleman's house, and shake hands a half an hour with a flock of ladies, and then after supper go and have a

Jack shaking hands for the President.

little still kind of a hubbub all alone with three or four hundred particular friends, and talk an hour or two, and take another cooliation, and then go home, and about midnight get ready to go to bed, and up again at four o'clock the next morning and at it. And if this aint enough to tucker a feller out, I don't know what is. The President wouldn't have stood it till this time, if he hadn't sent me and Mr. Van Buren to some of the parties, while he staid at home to rest.

The President's got so much better, I think we shall be able to start for Salem to-morrow, for we must go so through with it now we've begun, as hard work as 'tis I think we shall get to Portland about the 4th of July, so, if you get your guns and things all ready, you can kill two birds with one stone. I hope you'll be pretty careful there how you point your guns. They pointed 'em so careless at New York that a wad come within six inches of making daylight shine through the President.

Now I think on't, there is the most rascally set of fellers skulking about somewhere in this part of the country that ever I heard of, and I wish you would blow 'em up. They are worse than the pickpockets. I mean them are fellers that's got to writing letters and putting my name to 'em, and sending of 'em to the printers. And I heard there was one sassy feller last Saturday, down to Newburyport, that got on to a horse, and rid about town calling himself Major Jack Down-

ing, and all the soldiers and the folks marched up and shook hands with him, and thought it was me. Isn't it Mr Shakespeare that says something about "he that steals my munnypus steals trash, but he that steals my name ought to have his head broke?" I wish you would find that story and print it.

Your old friend,

MAJOR JACK DOWNING

1833

THE PRESIDENT AND THE REST OF 'EM TURN A
SHORT CORNER AT CONCORD, AND SET
THEIR FACES TOWARD WASHINGTON

Concord, Nu Hamsheer, June 30, 1833

To the Editor of the Portland Courier

10 My Dear Old Friend —The jig is all up about our going to Portland and Downingville, I've battled the watch with the President this two days about it, and told him he must go there if he had the breath of life in him, and he kept telling me he certainly would, if horses could carry him there

But the President isn't very well, and that ain't the worst of it, there's been a little difficulty bruin' among us, and the President's got so riled about it, that he's finally concluded to start on his way back to-morrow I can't help it, but I feel bad enough about it to cry a
20 barrel of tears.

I don't know how they will stan' it in Downingville when they come to get the news I'm afraid there will be a master uproar there, for you know they are all great Demokrats. But the stage is jest agoing to start.

In haste, from your friend,

MAJOR JACK DOWNING

1833

COUSIN NABBY DESCRIBES THE UNUTTERABLE
DISAPPOINTMENT AT DOWNINGVILLE
BECAUSE THE PRESIDENT DIDN'T COME

Downingville, July 8, 1833

To the Editor of the Portland Courier

30 Respectable Sir —As Cousin Jack is always so mighty budge in writing letters to you, and as he and the Presi-

dent showed us a most provoking trick, and run a stream of chalk, back to Washington, withing here, after they had promised over and over that they would come, and we had got all shod and our clean gownds on, and more good victuals than there ever was in all Downingville before. Mr. Editor, I declare it's too bad; we are all a-blazes about it, and I mean to write and tell about it, if I live; and if Cousin Jack don't let me lump it; so there now.

Ye see Cousin Jack writ to us that he and the President and some more gentlemen should be here of July, and we must spring to it and brush up and see how smart we could look, and how many figures we could show to the President. This was a week before the 4th of July come a Thursday. The letter to Uncle Joshua, the Postmaster. Most all the Downingville were at the Post-Office waiting for the mail come in, for we expected to hear from Jack.

Uncle Joshua put on his spectacles and opened the mail, and hauled out the papers and letters in a minute I see one to Uncle Joshua with the President's name on the outside, so I knew it was Jack, for the President always puts his name on the letters. We all cried out to Uncle Joshua to open it and let us know what was in it. But he's such a provoking odd old man, he wouldn't touch it 'till every one of the papers and letters sorted and set in their places. And then he took it and set down in his armchair, and took out his tobacker box and chawed of tobacker, and then he broke open the sort and chawed and read to himself. We all stood by with our hearts in our mouths, and he must read it over to himself three times, chawing it a quid, and once in a while giving us a knowing look before he would tell us what was in it. And he would tell us arter all, but, says he, "You must all be ready to attend to, such as Downingville never see before."

At that we all turned and run, and such a hurry as we were in from that time 'till Thursday morning we guess you never see. Such a washing and scrubbing, making new clothes and mending old ones, and cooking and cooking. Every thing seemed to be in a fever all over the neighborhood. Sargent Joel flew like a ravin' distracted rooster. He called out his

pany every morning before sunrise, and marched em up and down the road three hours every day. He sent to the store and got a whole new set of buttons, and had 'em sowed on to his regimental coat, and had a new piece of red put round the collar. And had his trowses washed and his boots greased, and looked as though he might take the shine off of most anything. But the greatest rumpus was at Uncle Joshua's, for they said the President must stay there all night. And Ant Keziah was in such a pucker to have everything nice, I didn't know but she would fly off the handle.

She had every part of the house washed from garret to cellar, and the floors all sanded, and a bunch of green bushes put into all the fire places. And she baked three overn-full of dried punkin pies, besides a few dried huckleberry pies, and cake, and a great pot of pork and beans. But the worst trouble was to fix up the bed so as to look nice, for Ant Keziah declared the President should have as good a night's lodging in her house as he had in New York or Boston. So she put on two feather beds on top the straw bed, and a bran-new calico quilt that she made the first summer after she was married, and never put it on a bed before. And to make it look as nice as the New York beds, she took her red silk gown and ripped it up and made a blanket to spread over the top. And then she hung up some sheets all round the bedroom, and the gals brought in a whole handful of roses and pinks, and pinned 'em up round as thick as flies in August.

After we got things pretty much fixed, Uncle Joshua started off to meet Cousin Jack and the President, and left Sargent Joel to put matters to rights, and told us we must all be ready and be paraded in the road by nine o'clock Thursday morning. Well, Thursday morning come, and we all mustered as soon as it was daylight and dressed up. The children were all washed, and had their clean aprons on and their heads combed, and were put under the care of the schoolmarm, to be paraded along with her scholars.

About eight o'clock, all the village got together down the road as fur as Uncle Joshua's new barn, and Sargent Joel told us how to stand, as he said, in military order. He placed Bill Johnson and Cousin Ephraim out a little ways in front, with each of 'em a great long fowling piece with a smart charge in to fire a salute and told 'em as soon as the President hove in sight to

The unutterable disappointment at Downingville.

let drive, only to be careful and pint their guns up, so as not to hurt anybody. Then come Sargent Joel and his company, and then come the schoolmarm and the children, and then come all the women and gals over sixteen with Ant Keziah at their head, and then come all the men in town that owned horses riding on horse-back, and all the boys that Sargent Joel didn't think was large enough to walk in the procession got up and sot on the fences along by the side of the road.

There we stood 'till about nine o'clock, when, sure enough, we saw somebody come riding out of the woods down the hill. The boys all screamed, ready to split their throats, "Hoorah for Jackson," and Bill Johnson fired off his gun. Cousin Ephraim, who ain't so easily fluttered, held on to his and didn't fire, for he couldn't see anybody but Uncle Joshua on his old gray horse. Along come Uncle Joshua, on a slow trot, and we looked and looked, and couldn't see anybody coming behind him.

Then they all begun to look at one another as wild as hawks, and turn all manner of colors. When Uncle Joshua got up so we could see him pretty plain, he looked as cross as a thunder-cloud. He rid up to Sar-

gent Joel, and says he, "You may all go home about your business, for Jack and the President are half way to Washington by this time."

My stars! what a time there was then. I never see so many folks boiling over mad before. Bill Johnson threw his gun over into the field as much as ten rods, and hopped up and down, and struck his fists together like all possessed. Sargent Joel marched back and forth across the road two or three times, growing redder and
10 redder, till at last he drew out his sword and fetched a blow across a hemlock stump, and snapped it off like a pipe-stem. Ant Keziah fell down in a conniption fit; and it was an hour before we could bring her tu and get her into the house. And when she come to go

round the house and see the victuals she had up, and go into the bedroom and see her gown up, she went into conniption fits again. But s'ter to-day, and has gone to work to try to patch gown again.

I thought I would jest let you know about these and if you are a mind to send word on to Cousin and the President, I'm willing. You may tell 'e aint five folks in Downingville that would hock Jackson now, and hardly one that would vote for unless 'tis Uncle Joshua, and he wouldn't if he afraid of losing the Post-Office.

Your respected friend,

NABBY DOWING

Charles Augustus Davis

1795 • 1867

During the 1830's, when Seba Smith's Jack Downing was winning fame, Charles Augustus Davis was in business in New York, a partner in the firm of Davis and Brooks, commission merchants. A friend of Merchant-Prince Aspinwall, of Fashion Leader Philip Howe, and of the aristocratic Brevoorts, he was at home in the most elegant metropolitan society. His taste in writing was for the elegant and old-fashioned literature of authors Halleck and Irving, with whom he frequently dined. In politics he was a Whig, bitterly opposed to Jackson and to Jackson's policies.

From Smith, in 1833, Davis "borrowed" the character Jack Downing and the device of writing political letters in the vernacular. He both wrote and published a number of letters in Yankee dialect urging his own

views. (He changed the name to *J. Downing*, but distinction was noticed by relatively few contemporaries.) Davis' letters had little authenticity. The author had been born in New Jersey, had long been in commerce in New York, and had acquired a knowledge of Yankee ways which probably was completely theoretical.

However, the letters signed "J. Downing" were at least as famous as Jack's—perhaps more famous. Newspapers everywhere reprinted them, and a collection in book form, *Letters of J. Downing, Major* (1834), went through ten editions in two years. They won success because of their remarkable effectiveness as hard-hitting political satire against Jackson, his associates, and his policies. So delighted was Nicholas Biddle with Davis' opposition to Jackson's United States Bank policy in

letters that he appointed the author to a bank directorship in New York. The J. Downing letters were discontinued when the contest concerning the bank ended. The letters were important, however, because even more than Smith, Davis realized and pointed out to scores of humorists

who were to follow him the value of homespun philosophizing for purposes of political argument.

From

Letters of J. Downing, Major

To the Editor of the New-York Daily Advertiser
Downingville, 29th June, 1833

Dear Sir,—This is going to be rather a lengthy letter. We've had real times. I begun to feel pretty streaked for our folks when I see what was done on Boston Common, and over there to little Cambridge. I told you I was going on here to get things to rights, and when I got here, I found 'em in a terrible taken about that crowner's lie down in York Bay. There was nothin at
10 all goin on.

I went full drive down to the meetin-house, and got hold of the rope, and pull'd away like smoke, and made the old bell turn clean over. The folks come up thick enough then to see what was to pay, and filled the old tabernacle chock full, and there was more outside than you could count. 'Now,' says I, 'I spose you think there's going to be preaching here today, but that is not the business. The Ginerel is comin.' That was enough—
'Now,' says I, 'be spry. I tell'd the Ginerel last winter
15 he'd see nothing till he got down here, and if we don't make him stare then there's no snakes. Where's Captain Finny?' says I. 'Here I be,' says he; and there he was, sure enough: the crittur had just come out of his bush-pasture, and had his bush-hook with him. Says I, 'Captain Finny, you are to be the marshal of the day.' Upon that he jumps right on eend. 'Now,' says I, 'where is Seth Sprague, the schoolmaster?' 'Here I be,' says he; and there he stood with his pitchpipe up in the

gallery, just as if I was going to give out the salm for him. 'You just pocket your pitch-pipe,' says I, 'Seth, and brush up your larnin. for we have pitched on you to write the address'—'Why, Major,' says Zekiel Bigelow, 'I thought I was to do that, and I've got one already.' 'But,' says I, 'you don't know nothing about Latin; the Ginerel can't stomach any thing now without its got Latin in it, ever since they made a Doctor on him down there to Cambridge t'other day, but howsever,' says I, 'you shall give the address after all, only just let Seth stick a little Hog-latin into it here and there. And now,' says I, 'all on you be spry, and don't stop stirrin till the
4 pudden's done.'

Then they begun to hunt for hats, and down the gallery-stairs they went. And if there'd been forty thank-givens and independence days comin in a string, I don't believe there could be more racket than there was in Downingville that afternoon and night.

By ten o'clock next morning all was ready. I had 'em all stationed, and I went out and come back three or four times across the brook by the potash, to try 'em. I got a white hat on, and shag-bark stick, put some flour on my
50 head, and got on to my sorrel horse, and looked just as much like the old gentleman as I could. Arter tryin them two or three times, I got 'em all as limber as a with, and the last time I tried 'em, you've no idee, it went off just as slick as ile.

'Now,' says I, 'tenshon the hull! Stand at ease till you see me agin,' and then I streaked it down to old Miss Crane's tavern, about two miles off, and waited till the Ginerel come along, and afore I had mixed a second
60 glass of switchel up they came, and the Ginerel looked as chirk and lively as a skipper.

'Now,' says I, 'Ginerel, we are going right into Downingville, and no man here is to give any orders but myself,' and I said this loud enough for Mr. Van Buren and Governor Woodbury and all on 'em to hear me, and they were all as hush arter that as cows in a clover-lot. Then

we all mounted, and on we went—I and the General a leetle a-head on 'em. And when we crossed the brook, says I, 'don't be afeard of the string-pieces here, General—we aint in York now.' 'I'll follow you, Major,' says he, 'through thick and thin—I feel safe here.'

Jest as we got on the nole on tother side the brook, we come in sight of Downingville. The General riz right up in his stirrups, and pointed with his hickory, and says he, 'Major, that's Downingville.' Says I, 'that's true enuf, and I should like to hear any one say it aint,' says I—'for the sight on't makes me crawl all over, and whenever I hear any one say one word agin it, I feel as tho' I could take him, as I have done streaked snakes, by the tail, and snap his head off.' 'Why,' says the General, 'I knew that was Downingville as soon as my eye caught a glimpse on't. I'd go,' says he, 'Major, east of sunrise any day to see sich a place.' The General was tickled to pieces, and I thought I should go myself right through my shirt-collar—for, you see, the General never see sich a sight afore.

10 Seth Sprague had put the children all on the school-house—you couldn't see an atom of the roof—with green boughs, and singing a set piece he had made; and when I and the General passed by they made it all ring agin, I tell you; whether it was his facing the sun or what, but he looked as if he was e'eny jist a going to cry (for he is a mazin tender-hearted crittur). Just then Sargent Joel, who had charge of the field-piece in front of the meetin'house, touched her off, and didn't she speak! This composed the General in a minute—says he, 'Major, 20 I shouldn't want nothing better than a dozen of them guns to change the boundry-line along here jest to suit you—but look, Major, what on earth has got into Mr. Van Buren's horse?' Sure enough, Sargent Joel had put in a leetle too much waddin, if any thing, and Enoch Bissel, as sly as a weasel, slipped in a swad of grass, that hit Mr. Van Buren's horse, and set him capering till he kinder flung him. I was as wrathful as murder; says I, 'where is he?' and I arter him full split—he was clippin it across the orchard, so that you might put an egg on 40 his coat-flap, and it wouldn't role off. I streaked it round the corner of the stone-fence to head him—but afore I got to him he ketched Mr. Van Buren's horse, and was clearing out of the county—and afore this he is slick enough in the Province.

They tell different stories about it, but Deacon Willoby saw the hull on it, and he says Mr. Van Buren hung on like a lamper-eel, till he was kinder jerked up like a

trounced toad, and he came down on the horse jist as he kicked up behind and that sent him cle the fence into the Deacon's potato-patch. He over so fast in the air you could not tell one en tother; but his feet struck first, and he stood the Deacon says, and made as handsome a bow to th as if nothing on earth had happened to him.

The review of Captain Finny's company did te shine off them are Boston and Salem sogers, I te but they was all so keen arter the General that al Captain Finny could do, we couldn't keep th strait, and they all got into such a snarl, that you as well try to straiten a sheep's wool.

The bell was ringing all the while; two peop up there with stone hammers poundin on her Uncle Josh had gone and took the bell-rope, and tie eend on't to the steeple, and carried the tother eend to the Deacon's chimbley, more than twelve rods of every inch on't was hung full of flags, and where wa'n't no flags, he had got all the cloth out of the t mill; and the gals and Downingville boys had g their handkerchers, and gowns, and flannel shirts it was so high up, and the wind kinder shook'e together so you couldn't tell a checked shirt from a Continental. The General was tickled half to d says he, 'Major, that looks about right.' 'It does so, I; 'General, if that ain't union, I don't know.' He keen as a brier to catch any thing cunning, he don't where he is, he snorts right out.

As soon as we got down to the meetin'house, Zekil Bigelow gin the address, it was stuck full of I words here and there, like burs in a stray sheep's fle Zekil is a knowin cretur, He keeps a packin-yard, salts down more fish than any man in three cou round—he don't know so much about Latin as some f but he did get along with his address most curious thank'd the General for comin to Downingville in first place, and then he thank'd him for his proclamat and for presarvin the Union, and threw in the salt, the nitre and pickle, and when he come to talk of nullifiers, he cut and shaved, and made the scales fl tell you. Every hair on the General's head stood su on eend. And there stood that cretur Zekiel right af him, talking like a book, and his head was as smoc and every hair on it slicked down with a dipped cand and that are few of his wo'd tell the folks behind wh way his eye turned jest as well as though they was look

strait in his face—caze it kinder lodged on his collar, and every time he looked up, it would stand still a minet, and point right straight up in the air

Then cum the Ginerals turn,—his heart was so full, he could but jest speak, and I was just agoin to begin for him, when out he came:—

'My friends,' says he, 'though I tell'd 'em down south my father was an Irishman, and my mother, too, I am as clear a Yankee (and he turned, and lookin round him, slap'd his hand on my shoulder), as the Major himself,' says he, 'and he knows it.' 'So I do,' says I, 'Ginerals, I tell'd 'em all so often enough' 'I will presarve the Union, I'll be hang'd and choak'd to death if I don't; and when I want pickle I know where to find it' I am glad to hear you say that salt petre once in a while is good—I always thought so—and if the Constitution spiles in my hands for the want of it, I wont stand another election' Here the Ginerals was goin to stop, but, says I, in his ear, 'You must give 'em a little Latin, Doctor.' Here he off hat agin—'E pluribus unum,' says he, 'my friends, sine qua non' 'That'll do, Ginerals,' says I, and then we turn'd to, and shook all the folks round till dinner time, and then we made the bake beans and salt pork fly, and the cider too, I tell you. The folks hadn't eat nothin since I got on to the ground. Arter dinner I tell'd the Ginerals about that blasted rascal, Enoch Bissel, who tucked in the grass waddin 'That's the same fellow,' says I, 'Major Barry turn'd out of the Post Office I knew he was a scamp, and if he wasn't then, he is now.' 'Why, Major,' says the Ginerals, 'it was

jest so with that infernal rascal Randolph; if he didn't deserve what I gin him afore he attacked me, he sartinly did afterwards, and where's the odds?' 'Plaguey little,' says I, 'Ginerals.'

To-night we're going to a quiltin at Uncle Josh's. Miss Willoby, the Deacons's eldest darter, is sprucin up for it. She is rather too old to be handsome, but she is a keen cretur. The Ginerals and Mr Van Buren both talk about her considerable. If the Ginerals don't keep a sharp look out, Mr. Van Buren will go clean ahead on him on that tack, for he is the *perlitest* cretur amongst the women you ever see. The Ginerals says he must have some of our Yankee gals in the cabinet next winter, and I kinder have a notion there will be some hitchin teems doun hereabouts afore we quit.

We shall go strait from here to *Saratogue*, and wash inside and out there. I expect we shall all need washin afore we get there.

This is the longest letter I ever writ in all my life, but I'm to hum now. It would cost you a good many of your odd nine-penses, I guess, to pay the postage, if it want for the President—he franks all my letters—and that aint what he does for most folks.

I may tell you about the quiltin frolic tonight, in my next, but I wont promise; for I have jest as much as I can do here, to do all the chores for the Ginerals, and write near about fifty letters a day for him.

Yours to sarve,

J. DOWNING, MAJOR,
Downingville Militia, 2d Brigade

1833

MELVILLE

Herman Melville

1819 • 1891

Herman Melville, whom John Freeman has called "the most powerful of all the great American writers," was born in New York City in 1819. When he was eleven years of age, his family moved to Albany, where he be-

came a student in the Albany Academy. Two years later his father, a merchant, died in debt. During the five ensuing years the boy was variously occupied, clerking in a bank and in his brother's store in Albany, working

on his uncle's farm at Pittsfield. At the age of eighteen, he shipped as a sailor on a merchantman bound for Liverpool. The reasons for his so doing we must take from *Redburn*, which appears to be a pretty literal account of Melville's own experiences "Sad disappointments in several plans which I had sketched for my future life; the necessity of doing something for myself, united to a naturally roving disposition, had now conspired within me, to send me to sea as a sailor" After a short stay in Liverpool, where he was shocked by the brutality and misery of the great city, he returned with his ship, sobered and matured, one must believe, by this early introduction to a world of violence and crime. Of his life during the next three or four years little is known except that he taught school in Albany and Pittsfield and tried his hand at writing.

The most decisive event of Melville's life came on January 3, 1841, when at the age of twenty-one he shipped at New Bedford on the *Acushnet*, a whaler, for the South Seas. This whale-ship was for him, in the words of Ishmael in *Moby Dick*, "my Yale College and my Harvard." Melville was gone three years and nine months, returning to Boston in October 1844. For his life during this period one is forced to draw largely upon *Typee*, *Omoo*, *White Jacket*, and *Moby Dick*, though Mr. C. R. Anderson has exposed some of the errors (in Mr. Mumford's biography, for example) which result from the unwary use of these fictional works for biographical purposes. The exact details of Melville's wanderings in the Pacific are in large measure still uncertain. But it is known that, after some eighteen months on the *Acushnet*,

Melville deserted. July 9, 1842, at the Marquesas Is. After a month or two among the cannibals he escaped to Tahiti; further travels may have taken him to Japan. Finally, on August 17, 1843, he joined the crew of the frigate *United States* at Honolulu and remained with the ship until his arrival at Boston more than a year later.

The eight or nine years following his return from his voyages were Melville's great productive period. He poured forth a veritable torrent of books: *Typee* (1845), *Omoo* (1847), *Mardi* (1849), *Redburn* (1849), *White Jacket* (1850), *Moby Dick* (1851), and *Pierre* (1852). It was inevitable, perhaps, that there should be a lull in his writing off after such extraordinary productivity. Melville seemed to have a premonitory sense of this in 1851 when, at the age of thirty-two, he wrote to Hawthorne: "From my twenty-fifth year I date my life. Three weeks have scarcely passed, at any time between then and now that I have not unfolded within myself. But I feel I am now come to the inmost leaf of the bulb, and shortly the flower must fall to the mold." He lived for forty years; but he failed to write another book as great as *Moby Dick*, and his productivity steadily diminished. *Israel Potter* (1855); *The Piazza Tales* (1856) which includes "Benito Cereno"; *The Confidence-Man* (1857); two volumes of poetry, *Battle Pieces and Aspects of the War* (1866) and *Clarel* (1876); and *Billy Budd* written near the end of his life and not published until 1924.

Panel (l to r) Disaster • The clipper *Nightingale* • Herman Melville at 45 • Melville in the South Seas

1924. From 1866 to 1885, he was Inspector of Customs in New York City.

Mr. Thorp notes "five determining influences" in Melville's literary career "the religious orthodoxy of his home, which left its imprint, though he revolted from it; his contact with the brutalities of a sailor's life and with savage societies which impelled him to question the premises of western civilization; his reading in philosophy and belles-lettres, which, though unmethodical, was prodigious between 1846 and 1851 [notably, Rabelais, Sir Thomas Browne, Shakespeare and other Elizabethan dramatists, the Bible, and Carlyle]; his friendships with artists and men of letters in New York who advanced his interests and educated him in his craft; and the sympathy of Hawthorne, which more than any other factor contributed to the fruition of his genius" This last influence is of special interest. From the summer of 1850 till the autumn of 1851, Melville and Hawthorne were near neighbors and frequent companions, the former residing at Pittsfield, the latter at Lenox. On more than one occasion the two men talked together "about time and eternity, things of this world and of the next, and books and publishers, and all possible and impossible matters" (Hawthorne's *American Notebooks*) Melville was somewhat extravagant in his admiration of his new friend (see his extraordinary letters to Hawthorne, in Thorp's *Melville*); Hawthorne, though reserved and older, gave to Melville a sympathetic understanding such as he had not known before and would never know again *Moby Dick* was dedicated to Hawthorne, and Hawthorne's letter of acknowledgment and appreciation—unfortunately lost, as are all of his letters to Melville—was to Melville a "joy-giving and exultation-breeding letter" After Hawthorne left the Berkshires, their friendly intimacy was interrupted; but in 1856, when Melville was on a recuperative journey to Italy and the Holy Land, the two men met again in England. After this meeting, Hawthorne wrote in his journal the best contemporary characterization of Melville that we have: "We took a pretty long walk together, and sat down in a hollow among the sand hills (sheltering ourselves from the high, cool wind) and smoked a cigar Melville, as he always does, began to reason of Providence and futurity, and of everything that lies beyond human ken, and informed me that he had 'pretty much made up his mind to be annihilated', but still he does not seem to

rest in that anticipation, and, I think, will never rest until he gets hold of a definite belief. It is strange how he persists—and has persisted ever since I knew him, and probably long before—in wandering to-and-fro over these deserts, as dismal and monotonous as the sand hills amid which we were sitting He can neither believe, nor be comfortable in his unbelief, and he is too honest and courageous not to try to do one or the other . . . he has a very high and noble nature . . ." (*The English Notebooks*).

Melville began, in *Typee* and *Omoo*, with delightful narratives of travels in the South Seas, written in a simple, straightforward style There is no allegory here, and no bitterness, except for occasional satirical sallies at the missionaries and the "civilized" nations *Redburn* and *White Jacket*, also, are simple narratives, though imbued with darker elements the former delves into the slums of Liverpool; the latter is an angry exposure of the cruelties practiced on board a frigate of the American Navy The transition to allegory came in *Mardi*—a confused and confusing book, effective in parts, but lacking integration Melville reached his full stature in *Moby Dick*, a powerful allegory of good and evil By this time, too, his prose style had changed from one of Defoe-like simplicity to one of magnificent rhythms, which, while recalling Sir Thomas Browne's, were Melville's own *Pierre*, in which Melville attempted for the first time the structure of the novel, has something of the power of *Moby Dick*, though it is much less successful as literary art. Among the productions after 1852, one may mention "Benito Cereno" (1856) and *Billy Budd* (1890?) as deserving to rank with his best work, always excepting the matchless *Moby Dick* *Billy Budd* is of special interest because the book shows that Melville retained his creative power and also because its conclusion may throw some light on Melville's state of mind in his old age Both Ahab, in *Moby Dick*, and *Pierre* went down in defeat, and that defeat perhaps was Melville's own. Billy Budd, a handsome young sailor, goes down in defeat also—he is hanged for the accidental killing of a man But his defeat is not one of defiance, like Ahab's, or of despair, like *Pierre's*. Just before the trap is sprung, he blesses the Captain, his friend, who, compelled by naval law, has pronounced the death sentence with great reluctance. Mr. Freeman finds here an indication that Melville achieved in his later years an inward peace, a reconciliation with life.

Melville's reputation as one of the very greatest of American writers dates from about 1920. His early works were enjoyed by many readers, most of whom, however, were estranged by the obscurity and pessimism of *Mardi*, *Moby Dick*, and *Pierre*. After about 1860, Melville was a forgotten author. There were always, to be sure, a few readers, particularly in England, who knew his books, but "oblivion" is hardly too strong a term to describe Melville's fate for a half century and more. The almost total eclipse of his fame is sufficiently attested by the fact that he was given just one sentence in Barrett Wendell's *Literary History of America*, published in 1900: "Herman Melville, with his books about the South Seas, which Robert Louis Stevenson is said to have declared the best ever written, and with his novels of maritime adventure, began a career of literary promise, which

never came to fruition." The exciting rediscovery occurred in both England and America about the centenary of Melville's birth. The enthusiasm of the 1920's may be explained in various ways. It is sufficient here to say that his splendid literary works were for the first time recognized by a considerable number of readers and that the postwar mood of discontent and despair vibrated sympathetically with that of *Moby Dick* and *Pierre*. His fame, tardily established, bids fair to continue with little, if any, abatement.

From

Mardi

Mardi, a satirical allegory, tells the story of voyages to mythical islands in the Pacific. Taji, the chief character, is accompanied on these voyages by the following dignitaries: Media, King of Odo; Babbalanja, the philosopher; Yoomy, the poet; and Mohi, the historian of "Mardi," which may be construed as standing for the world. Since the islands visited bear unmistakable resemblances to the nations of Europe and America, an almost limitless opportunity is afforded for comment on men, manners, and institutions. The names given to countries and persons are highly suggestive, usually obviously so, of Melville's satirical intentions. "Dominora," the name for England, for example, emphasizes the imperialistic history of that nation; "Vivenza," the name for the United States, suggests boastfulness and vociferous patriotism. In the three chapters which have been selected, Melville draws an extravagantly satirical picture of the United States Senate during

the debate on the Oregon boundary question in gives sobering counsel to our too exuberant republicans to see clearly the tragic problem of Negro slavery in the South.

Throughout the book runs the theme of Taji's search for Yillah, a blue-eyed maiden, who may be supposed to represent a spiritual ideal. The quest is unsuccessful; Yillah is not to be found in Vivenza, North or South, or in any of the islands of Mardi. At the end of the book, Taji, the "unreturning wanderer" still pursuing Yillah "over an endless sea." *Mardi*, then, is an allegory of Melville's search for the highest good. He doesn't find what he is looking for, but he writes eloquently of the search and acutely of the limitations and defects in what he finds.

Chapter C

THEY VISIT THE GREAT CENTRAL TEMPLE OF VIVENZA

The throng that greeted us upon landing were exceedingly boisterous.

"Whence came ye?" they cried. "Whither bound? Is there ever such a land as this? Is it not a great and extensive republic? Pray, observe how tall we are; just

of our thighs, are we not a glorious people? Here, feel of our beards. Look round, look round, be not afraid, behold those palms; swear now, that this land surpasses all others. Old Bello's mountains are mole-hills to ours, his rivers, rills; his empires, villages, his palm-trees, shrubs "

"True," said Babbalanja. "But great Oro must have had some hand in making your mountains and streams—Would ye have been as great in a desert?"

"Where is your king?" asked Media, drawing himself up in his robe, and cocking his crown

"Ha, ha, my fine fellow! We are all kings here, royalty breathes in the common air. But come on, come on Let us show you our great Temple of Freedom."

And so saying, irreverently grasping his sacred arm, they conducted us toward a lofty structure, planted upon a bold hill, and supported by thirty pillars of palm, four quite green; as if recently added, and beyond these, an almost interminable vacancy, as if all the palms in Mardi, were at some future time, to aid in upholding that fabric

Upon the summit of the temple was a staff; and as we drew nigh, a man with a collar round his neck, and the red marks of stripes upon his back, was just in the act of hoisting a tappa standard—correspondingly striped. Other collared menials were going in and out of the temple.

Near the porch, stood an image like that on the top of the arch we had seen Upon its pedestal, were pasted certain hieroglyphical notices; according to Mohi, offering rewards for missing men, so many hands high

Entering the temple, we beheld an amphitheatrical space, in the middle of which, a great fire was burning. Around it, were many chiefs, robed in long togas, and presenting strange contrasts in their style of tattooing.

Some were sociably laughing and chatting, others diligently making excavations between their teeth with slivers of bamboo, or turning their heads into mills, were grinding up leaves and ejecting their juices Some were busily inserting the down of a thistle into their ears Several stood erect, intent upon maintaining striking attitudes, their javelins tragically crossed upon their chests They would have looked very imposing, were it not, that in rear their vesture was sadly disordered Others, with swelling fronts, seemed chiefly indebted to their dinners for their dignity. Many were nodding and napping And, here and there, were sundry indefatigable worthies, making a great show of imperious and indispensable business,

sedulously folding banana leaves into scrolls, and recklessly placing them into the hands of little boys, in gay turbans and trim little girdles, who thereupon fled as if with salvation for the dying.

It was a crowded scene, the dusky chiefs, here and there, grouped together, and their fantastic tattooings showing like the carved work on quaint old chimney-stacks, seen from afar But one of their number overtopped all the rest As when, drawing nigh unto old Rome, amid the crowd of sculptured columns and gables, St Peter's grand dome soars far aloft, serene in the upper air, so, showed one calm grand forehead among those of this mob of chieftains That head was Saturnina's. Gall and Spurzheim⁶⁰ saw you ever such a brow?—poised like an avalanche, under the shadow of a forest' woe betide the devoted valleys below' Lavatar' behold those lips,—like mystic scrolls' Those eyes,—like panthers' caves at the base of Popocatepetl'

"By my right hand, Saturnina," cried Babbalanja, "but thou wert made in the image of thy Maker! Yet, have I beheld men, to the eye as commanding as thou, and surmounted by heads globe-like as thine, who never had thy caliber We must measure brains, not heads, my lord, else, the sperm-whale, with his tun of an occiput,⁷⁰ would transcend us all"

Near by, were arched ways, leading to subterranean places, whence issued a savory steam, and an extraordinary clattering of calabashes, and snacking of lips, as if something were being eaten down there by the fattest of fat fellows, with the heartiest of appetites, and the most irresistible of relishes It was a quaffing, guzzling, gobbling noise Peeping down, we beheld a company, breasted up against a board, groaning under numerous

4 Bello, the king of England • 6 Oro, the god of Mardi, the name is suggestive of 'gold' • 13 Temple of Freedom, the Capitol at Washington • 16 thirty pillars, referring to the states of the Union • 16 four • green, recently admitted states Texas (1845), Florida (1845), Iowa (1846), Wisconsin (1848) • 21 man neck, a Negro slave • 23 tappa, fabric made from the bark of the mulberry tree which grows in the Pacific islands • 29 missing men, fugitive slaves • 30 amphitheatrical space, the Senate chamber • 59 Saturnina, Daniel Webster • 59 Gall, Franz Joseph Gall (1758-1828), German physician and founder of phrenology • 60 Spurzheim, Johann Kaspar Spurzheim (1776-1832), German physician and phrenologist • 62 Lavatar, Johann Kaspar Lavater (1741-1801), Swiss physiognomist • 64 Popocatepetl, a volcano in Mexico nearly 18,000 feet high • 70 sperm-whale, a large whale whose head contains spermaceti (used in making candles, ointments, etc.) • 70 occiput, the back part of the head

vians. In the middle of all, was a mighty great gourd, yellow as gold, and jolly round like a pumpkin in October, and so big it must have grown in the sun. Thence flowed a tide of red wine. And before it, stood plenty of paunches being filled therewith like portly stone jars at a fountain. Melancholy to tell, before that fine flood of old wine, and among those portly old toppers, was a lean man; who occasionally ducked in his bill. He looked like an ibis standing in the Nile at flood tide, among a
 10 tongue-lapping herd of hippopotami.

They were jolly as the jolliest; and laughed so uproariously, that their hemispheres all quivered and shook, like vast provinces in an earthquake. Ha! ha! ha! how they laughed, and they roared. A deaf man might have heard them; and no milk could have soured within a forty-two-pounder ball shot of that place.

Now, the smell of good things is no very bad thing in itself. It is the savor of good things beyond; proof positive of a glorious good meal. So snuffing up those
 20 zephyrs from Araby the blest, those boisterous gales, blowing from out the mouths of baked boars, stuffed with bread-fruit, bananas, and sage, we would fain have gone down and partaken.

But this could not be; for we were told that those worthies below, were a club in secret conclave; very busy in settling certain weighty state affairs upon a solid basis. They were all chiefs of immense capacity.—how many gallons, there was no finding out.

Be sure, now, a most riotous noise came up from
 30 those catacombs, which seemed full of the ghosts of fat Lamberts; and this uproar it was, that heightened the din above ground.

But heedless of all, in the midst of the amphitheater, stood a tall, gaunt warrior, ferociously tattooed, with a beak like a buzzard; long dusty locks; and his hands full of headless arrows. He was laboring under violent paroxysms, three benevolent individuals essaying to hold him. But repeatedly breaking loose, he burst anew into his delirium; while with an absence of sympathy, dis-
 40 tressing to behold, the rest of the assembly seemed wholly engrossed with themselves, nor did they appear to care how soon the unfortunate lunatic might demolish himself by his frantic proceedings.

Toward one side of the amphitheatrical space, perched high upon an elevated dais, sat a white-headed old man with a tomahawk in his hand; earnestly engaged in over-

seeing the tumult; though not a word did he occasionally, however, he was regarded by those with a mysterious sort of deference; and was chanced to pass between him and the crazy n invariably did so in a stooping position; probably the atmospheric grape and cannister, continual from the mouth of the lunatic.

"What mob is this?" cried Media.

"'Tis the grand council of Vivenza," cried a by "Hear ye not Alanno?" and he pointed to the lunatic.

Now coming close to Alanno, we found, the incredible volubility, he was addressing the assembly upon some all-absorbing subject connected with Bello, and his presumed encroachments toward the west of Vivenza.

One hand smiting his hip, and the other his head, the lunatic thus proceeded, roaring like a wild bear, beating the air like a windmill.—

"I have said it! the thunder is flashing, the lightning is crashing! already there's an earthquake in Don Full soon will old Bello discover that his diabolical machinations against this ineffable land must soon come to naught. Who dare not declare, that we are invincible? I repeat it, we are. Ha! ha! Audacious must bite the dust! Hair by hair, we will trail his gray beard at the end of our spears! Ha! ha! I hoarse; but would mine were a voice like the wild cry of Bullorom, that I might be heard from one end of the great and gorgeous land to its farthest zenith; ay, to the uttermost diameter of its circumference. Awake Vivenza! The signs of the times are portentous; extraordinary; I hesitate not to add, peculiar! Up! Let us not descend to the bathos, when we should be to the climax! Does not all Mardi wink and look on the great sun itself a frigid spectator? Then let us display our mandibles to the deadly encounter. Methinks I see it now. Old Bello is crafty, and his oath is recorded to obliterate us! Across this wide lagoon he casts his serpent eyes; whets his insatiate bill; mumbles his

31 Lamberts. Daniel Lambert (1770-1803), an Englishman, weighed 739 pounds • 34 warrior, Senator William Allen of Ohio, a strenuous advocate of the occupation of Oregon. The Oregon boundary dispute with England was settled in 1846 • 45 old man, G. M. barous tusks, licks his forked tongues, and who knows when we shall have the shark in our midst? Yet be not deceived; for though as yet, Bello has forborn molesting us openly, his emissaries are at work, his infernal sappers, and miners, and wet-nurses, and midwives, and grave-diggers are busy! His canoe-yards are all in commotion! In navies his forests are being launched upon the wave; and ere long typhoons, zephyrs, white-squalls, balmy breezes, hurricanes, and besoms will be raging round us!"

His philippic concluded, Alanno was conducted from the place; and being now quite exhausted, cold cobblestones were applied to his temples, and he was treated to a bath in a stream.

This chieftain, it seems, was from a distant western valley, called Hio-Hio, one of the largest and most fertile in Vivenza, though but recently settled. Its inhabitants, and those of the vales adjoining,—a right sturdy set of fellows,—were accounted the most dogmatically democratic and ultra of all the tribes in Vivenza; ever seeking to push on their brethren to the uttermost, and especially were they bitter against Bello. But they were a fine young tribe, nevertheless. Like strong new wine they worked violently in becoming clear. Time, perhaps, would make them all right.

An interval of greater uproar than ever now ensued; during which, with his tomahawk, the white-headed old man repeatedly thumped and pounded the seat where he sat, apparently to augment the din, though he looked anxious to suppress it.

At last, tiring of his posture, he whispered in the ear of a chief, his friend, who, approaching a portly warrior present, prevailed upon him to rise and address the assembly. And no sooner did this one do so, than the whole convocation dispersed, as if to their yams, and with a grin, the little old man leaped from his seat, and stretched his legs on a mat.

The fire was now extinguished, and the temple deserted.

Chapter CLXI

THEY HEARKEN UNTO A VOICE FROM THE GODS

Next day we retraced our voyage northward, to visit that section of Vivenza.

In due time we landed

To look round was refreshing. Of all the lands we had seen, none looked more promising. The groves stood tall and green; the fields spread flush and broad, the dew of the first morning seemed hardly vanished from the grass. On all sides was heard the fall of waters, the swarming of bees, and the rejoicing hum of a thriving population.

"Ha, ha!" laughed Yoomy, "Labor laughs in this land, and claps his hands in the jubilee groves! methinks that Yillah will yet be found"

Generously entertained, we tarried in this land, till at length, from over the Lagoon, came full tidings of the eruption we had witnessed in Franko, with many details. The conflagration had spread through Porpheero, and the kings were to and fro hunted, like malefactors by blood-hounds, all that part of Mardi was heaving with throes.

With the utmost delight, these tidings were welcomed by many yet others heard them with boding concern.

Those, too, there were, who rejoiced that the kings were cast down, but mourned that the people themselves stood not firmer. A victory, turned to no wise and enduring account, said they, is no victory at all. Some victories revert to the vanquished.

But day by day great crowds ran down to the beach, in wait for canoes periodically bringing further intelligence. Every hour new cries startled the air. "Hurrah! another kingdom is burnt down to the earth's edge, 70 another demi-god is unhelmed, another republic is dawning! Shake hands, freemen, shake hands! Soon will we hear of Dominora down in the dust; of hapless Verdanna free as ourselves; all Porpheero's volcanoes are bursting! Who may withstand the people? The times tell terrible tales to tyrants! Ere we die, freemen, all Mardi will be free."

Overhearing these shouts, Babbalanja thus addressed Media — "My lord, I can not but believe, that these men, are far more excited than those with whom they so ardently sympathize. But no wonder. The single discharges which are heard in Porpheero, here come con-

9 besoms, brooms. Compare Isaiah 14 23 "I will sweep it with the besom of destruction" • 16 Hio-Hio, Ohio • 55 Franko, France • 56 conflagration, the Revolutions of 1848 • 56 Porpheero, Europe • 73 Verdanna, Ireland

densed in one tremendous report. Every arrival is a firing off of events by platoons."

Now, during this tumultuous interval, King Media very prudently kept himself exceedingly quiet. He doffed his regalia; and in all things carried himself with a dignified discretion. And many hours he absented himself; none knowing whither he went, or what his employment.

So also with Babbalanja. But still pursuing our search, at last we all journeyed into a great valley, whose inhabitants were more than commonly inflated with the ardor of the times.

Rambling on, we espied a clamorous crowd gathered about a conspicuous palm, against which, a scroll was fixed

The people were violently agitated; storming out maledictions against the insolent knave, who, over night must have fixed there, that scandalous document. But whoever he may have been, certain it was, he had contrived to hood himself effectually.

After much vehement discussion, during which sundry inflammatory harangues were made from the stumps of trees near by, it was proposed, that the scroll should be read aloud, so that all might give ear.

Seizing it, a fiery youth mounted upon the bowed shoulders of an old man, his sire, and with a shrill voice, ever and anon interrupted by outcries, read as follows.—

"Sovereign-kings of Vivenza! it is fit you should hearken to wisdom. But well aware, that you give ear to little wisdom except of your own; and that as free-

men, you are free to hunt down him who dissents from your majesties; I deem it proper to address you anonymously.

"And if it please you, you may ascribe this voice to the gods: for never will you trace it to man.

'It is not unknown, sovereign-kings! that in these boisterous days, the lessons of history are almost discarded, as superseded by present experiences. And that while all Mardi's Present has grown out of its Past, it is becoming obsolete to refer to what has been. Yet, per-

adventure, the Past is an apostle.

"The grand error of this age, sovereign-kings! is the general supposition, that the very special Diabolus is abroad; whereas, the very special Diabolus has been abroad ever since Mardi began.

"And the grand error of your nation, sovereign-kings!

seems this:—The conceit that Mardi is now i scene of the last act of her drama; and that all events were ordained, to bring about the catast believe to be at hand,—a universal and f Republic.

"May it please you, those who hold to the are fools, and not wise.

"Time is made up of various ages; and each own a novelty. But imbedded in the walls of mids, which outrun all chronologies, sculpture are found, belonging to yet older fabrics. And mound-building period of yore, so every age t erections will forever endure. But as your fore apace, sovereign-kings! overrunning the tumuli western vales; so, while deriving their substan the past, succeeding generations overgrow it; time, themselves decay.

"Oro decrees these vicissitudes.

"In chronicles of old, you read, sovereign-kin an eagle from the clouds presaged royalty to the Taquinoo, and a king, Taquinoo reigned. No en dynasty, thought he.

"But another omen descended, foreshadowing of Zooperbi, his son; and Zooperbi returning fr camp, found his country a fortress against him. N kings would she have. And for five hundred twelve the Regifugium or King's-flight, was annually cele like your own jubilee day. And rampant young stormed out detestation of kings; and augurs swo their birds presaged immortality to freedom.

"Then, Romara's free eagles flew over all Marc perched on the topmost diadems of the east.

"Ever thus must it be.

"For, mostly, monarchs are gemmed bridles up world, checking the plungings of a steed from the pas. And republics are as vast reservoirs, draining all streams to one level; and so, breeding a fullness can not remain full, without overflowing. And Romara flooded all Mardi, till scarce an Ararat wa of the lofty kingdoms which had been

"Thus, also, did Franko, fifty twelve-moons ago may she do again. And though not yet, have you,

43 Diabolus, the devil • 60 tumuli, mounds over ancient grav
67 Taquinoo, of the Tarquin dynasty of ancient Rome • 87 Fr
... ago, a reference to the Napoleonic conquests

ereign-kings! in any large degree done likewise, it is because you overflow your redundancies within your own mighty borders, having a wild western waste, which many shepherds with their flocks could not overrun in a day. Yet overrun at last it will be; and then, the recoil must come.

"And, may it please you, that thus far your chronicles had narrated a very different story, had your population been pressed and packed, like that of your old sire-land : Dominora. Then, your great experiment might have proved an explosion; like the chemist's who, stirring his mixture, was blown by it into the air

"For though crossed, and recrossed by many brave quarterings, and boasting the great Bull in your pedigree, yet, sovereign-kings! you are not meditative philosophers like the people of a small republic of old, nor enduring stoics, like their neighbors. Pent up, like them, may it please you, your thirteen original tribes had proved more turbulent, than so many mutinous legions. Free horses need wide prairies; and fortunate for you, sovereign-kings! that you have room enough, wherein to be free.

"And, may it please you, you are free, partly, because you are young. Your nation is like a fine, florid youth, full of fiery impulses, and hard to restrain; his strong hand nobly championing his heart. On all sides, freely he gives, and still seeks to acquire. The breath of his nostrils is like smoke in spring air, every tendon is electric with generous resolves. The oppressor he defies to his beard, the high walls of old opinions he scales with a bound. In the future he sees all the domes of the East.

"But years elapse, and this bold boy is transformed. His eyes open not as of yore, his heart is shut up as a vice. He yields not a groat, and seeking no more acquisitions, is only bent on preserving his hoard. The maxims once trampled under foot, are now printed on his front; and he who hated oppressors, is become an oppressor himself.

"Thus, often, with men; thus, often, with nations. Then marvel not, sovereign-kings! that old states are different from yours, and think not, your own must forever remain liberal as now.

"Each age thinks its own is eternal. But though for five hundred twelve-moons, all Romara, by courtesy of history, was republican; yet, at last, her terrible king-
gers came, and spotted themselves with gore

"And time was, when Dominora was republican, down

to her sturdy back-bone. The son of an absolute monarch became the man Karolus; and his crown and head, both rolled in the dust. And Dominora had her patriots by thousands, and lusty Defenses, and glorious Areopagiticass were written, not since surpassed; and no turban was doffed save in homage of Oro

"Yet, may it please you, to the sound of pipe and tabor, the second King Karolus returned in good time; and was hailed gracious majesty by high and low

"Throughout all eternity, the parts of the past are but parts of the future reversed. In the old foot-prints, up and down, you mortals go, eternally traveling your Sierras. And not more infallible the ponderings of the Calculating Machine than the deductions from the decim- 60
als of history

"In nations, sovereign-kings! there is a transmigration of souls, in you, is a marvelous destiny. The eagle of Romara revives in your own mountain bird, and once more is plumed for her flight. Her screams are answered by the vauntful cries of a hawk, his red comb yet reeking with slaughter. And one East, one West, those bold birds may fly, till they lock pinions in the midmost beyond.

"But, soaring in the sky over the nations that shall 70
gather their broods under their wings, that bloody hawk may hereafter be taken for the eagle.

"And though crimson republics may rise in constellations, like fiery Aldebarans, speeding to their culminations, yet, down must they sink at last, and leave the old sultan-sun in the sky; in time, again to be deposed

"For little longer, may it please you, can republics subsist now, than in days gone by. For, assuming that Mardi is wiser than of old, nevertheless, though all men approached sages in intelligence, some would yet be 80
more wise than others, and so, the old degrees be preserved. And no exemption would an equality of knowledge furnish, from the inbred servility of mortal to mortal, from all the organic causes, which inevitably divide mankind into brigades and battalions, with captains at their head.

48 Karolus . . . dust, the execution of Charles I in 1649 • 50 Areopagiticass, Milton's *Areopagitica*, a famous defense of freedom of speech and of the press, published in 1644 • 54 second . . . Karolus, the "restoration" of Charles II in 1660 • 74 Aldebarans, Aldebaran is a red star of particular brightness • 81 degrees, ranks

"Civilization has not ever been the brother of equality. Freedom was born among the wild eyries in the mountains; and barbarous tribes have sheltered under her wings, when the enlightened people of the plain have nestled under different pinions.

"Though, thus far, for you, sovereign-kings! your republic has been fruitful of blessings; yet, in themselves, monarchies are not utterly evil. For many nations, they are better than republics; for many, they will ever
10 so remain. And better, on all hands, that peace should rule with a scepter, than that the tribunes of the people should brandish their broadswords. Better be the subject of a king, upright and just; than a freeman in Franko, with the executioner's ax at every corner.

"It is not the prime end, and chief blessing, to be politically free. And freedom is only good as a means; is no end in itself. Nor, did man fight it out against his masters to the haft, not then, would he uncollar his neck from the yoke. A born thrall to the last, yelping out his
20 liberty, he still remains a slave unto Oro; and well is it for the universe, that Oro's scepter is absolute.

"World-old the saying, that it is easier to govern others, than oneself. And that all men should govern themselves as nations, needs that all men be better, and wiser, than the wisest of one-man rulers. But in no stable democracy do all men govern themselves. Though an army be all volunteers, martial law must prevail. Delegate your power, you leagued mortals must. The hazard you must stand. And though unlike King Bello
30 of Dominora, your great chieftain, sovereign-kings! may not declare war of himself; nevertheless, has he done a still more imperial thing:—gone to war without declaring intentions. You yourselves were precipitated upon a neighboring nation, ere you knew your spears were in your hands.

"But, as in stars you have written it on the welkin, sovereign-kings! you are a great and glorious people. And verily, yours is the best and happiest land under the sun. But not wholly, because you, in your wisdom, decreed it: your origin and geography necessitated it. Nor,
40 in their germ, are all your blessings to be ascribed to the noble sires, who of yore fought in your behalf, sovereign-kings! Your nation enjoyed no little independence before your Declaration declared it. Your ancient pilgrims fathered your liberty; and your wild woods harbored the nursling. For the state that to-day is made up of

slaves, can not to-morrow transmute her bond though lawlessness may transform them into freedom is the name for a thing that is *not* freedom; lesson never learned in an hour or an age. tribes it will never be learned.

"Yet, if it please you, there may be such a being free under Caesar. Ages ago, there were vital freemen, as breathe vital air to-day.

"Names make not distinctions; some despise without swaying scepters. Though King Bello was not put together by yokel men; your federalism of freedom, sovereign-kings! was the hand of slaves.

"It is not gildings, and gold maces, and crowns alone, that make a people servile. There is much and cringing among you yourselves, sovereign-kings! Poverty is abased before riches, all Mardi Gras where, it is hard to be a debtor; any where, the world is lord it over fools; every where, suffering is found.

"Thus, freedom is more social than political. real felicity is not to be shared. *That* is of a material individual getting and holding. It is not, whether the state, but who rules me. Better be secure and unking, than exposed to violence from twenty million monarchs, though oneself be of the number.

"But superstitious notions you harbor, sovereign-kings! Did you visit Dominora, you would not be marched straight into a dungeon. And though you would inhale sundry sights displeasing, you would start to inhale liberal breezes; and hear crowds boasting of their legs; as you, of yours. Nor has the wine of Dominora monarchical flavor.

"Now, though far and wide, to keep equal pace the times, great reforms, of a verity, be needed; not are bloody revolutions required. Though it be the certain of remedies, no prudent invalid opens his door to let out his disease with his life. And though all may be assuaged; all evils can not be done away. Freedom is the chronic malady of the universe; and checked in one place, breaks forth in another.

"Of late, on this head, some wild dreams have parted.

22 saying. Compare Proverbs 16 32: "He that ruleth his spirit is better than he that taketh a city" • 32 gone . . . intentions. On March 1846, President Polk declared that "War exists . . . by the action of Mexico herself"

'There are many, who erewhile believed that the age of pikes and javelins was passed; that after a heady and blustering youth, old Mardi was at last settling down into a serene old age; and that the Indian summer, first discovered in your land, sovereign-kings! was the hazy vapor emitted from its tranquil pipe. But it has not so proved. Mardi's peaces are but truces. Long absent, at last the red comets have returned. And return they must, though their periods be ages. And should Mardi endure until mountain melt into mountain, and all the sles form one table-land; yet, would it but expand the old battle-plain.

"Students of history are horror-struck at the massacres of old; but in the shambles, men are being murdered to-day. Could time be reversed, and the future change places with the past, the past would cry out against us, and our future, full as loudly, as we against the ages foregone. All the Ages are his children, calling each other names.

20 "Hark ye, sovereign-kings! cheer not on the yelping pack too furiously. Hunters have been torn by their hounds. Be advised, wash your hands. Hold aloof. Oro has poured out an ocean for an everlasting barrier between you and the worst folly which other republics have perpetrated. That barrier hold sacred. And swear never to cross over to Porphero, by manifesto or army, unless you traverse dry land.

"And be not too grasping, nearer home. It is not freedom to filch. Expand not your area too widely, now Seek 30 you proselytes? Neighboring nations may be free without coming under your banner. And if you can not lay your ambition, know this: that it is best served, by waiting events.

"Time, but Time only, may enable you to cross the equator; and give you the Arctic Circles for your boundaries."

So read the anonymous scroll, which straightway, was torn into shreds.

"Old tory, and monarchist!" they shouted, "Preaching over his benighted sermons in these enlightened times! Fool! does he not know that all the Past and its graves are being dug over?"

They were furious, so wildly rolling their eyes after victims, that well was it for King Media, he wore not his crown; and in silence, we moved unnoted from out the crowd.

"My lord, I am amazed at the indiscretion of a demi-

god," said Babbalanja, as we passed on our way; "I recognized your sultanic style the very first sentence. This, then, is the result of your hours of seclusion."

"Philosopher! I am astounded at your effrontery. I detected your philosophy the very first maxim. Who posted that parchment for you?"

So, each charged the other with its authorship: and there was no finding out, whether, indeed, either knew aught of its origin.

Now, could it have been Babbalanja? Hardly. For, philosophic as the document was, it seemed too dogmatic and conservative for him. King Media? But though imperially absolute in his political sentiments, Media delivered not himself so boldly, when actually beholding 40 the eruption in Franko

Indeed, the settlement of this question must be left to the commentators on Mardi, some four or five hundred centuries hence.

Chapter CLXII

THEY VISIT THE EXTREME SOUTH OF VIVENZA

We penetrated further and further into the valleys around; but, though, as elsewhere, at times we heard whisperings that promised an end to our wanderings, —we still wandered on; and once again, even Yoomy abated his sanguine hopes.

And now, we prepared to embark for the extreme 70 south of the land.

But we were warned by the people, that in that portion of Vivenza, whither we were going, much would be seen repulsive to strangers. Such things, however, indulgent visitors overlooked. For themselves, they were well aware of those evils. Northern Vivenza had done all it could to assuage them; but in vain; the inhabitants of those southern valleys were a fiery, and intractable race; heeding neither expostulations, nor entreaties. They were wedded to their ways. Nay, they swore, that if the 80 northern tribes persisted in intermeddlings, they would dissolve the common alliance, and establish a distinct confederacy among themselves

Our coasting voyage at an end, our keels grated the beach among many prostrate palms, decaying, and washed by the billows. Though part and parcel of the shore we

had left, this region seemed another land. Fewer thriving things were seen; fewer cheerful sounds were heard. "Here labor has lost his laugh!" cried Yoomy.

It was a great plain where we landed, and there, under a burning sun, hundreds of collared men were toiling in trenches, filled with the taro plant: a root most flourishing in that soil. Standing grimly over these, were men unlike them; armed with long thongs, which descended upon the toilers, and made wounds. Blood and sweat mixed, and in great drops, fell.

"Who ate these plants thus nourished?" cried Yoomy.

"Are these men?" asked Babbalanja.

"Which mean you?" said Mohi.

Heeding him not, Babbalanja advanced toward the foremost of those with the thongs,—one Nulli: a cadaverous, ghost-like man; with a low ridge of forehead; hair, steel-gray; and wondrous eyes;—bright, nimble, as the twin Corporant balls, playing about the ends of ships' royal-yards in gales.

20 The sun passed under a cloud; and Nulli, darting at Babbalanja those wondrous eyes, there fell upon him a baleful glare.

"Have they souls?" he said, pointing to the serfs.

"No," said Nulli, "their ancestors may have had; but their souls have been bred out of their descendants; as the instinct of scent is killed in pointers."

Approaching one of the serfs, Media took him by the hand, and felt of it long; and looked into his eyes; and placed his ear to his side; and exclaimed, "Surely this 30 being has flesh that is warm; he has Oro in his eye; and a heart in him that beats. I swear he is a man."

"Is this our lord the king?" cried Mohi, starting.

"What art thou," said Babbalanja to the serf. "Dost ever feel in thee a sense of right and wrong? Art ever glad or sad?—They tell us thou art not a man;—speak, then, for thyself; say, whether thou beliest thy Maker."

"Speak not of my Maker to me. Under the lash, I believe my masters, and account myself a brute; but in my dreams, bethink myself an angel. But I am bond; and 40 my little ones;—their mother's milk is gall."

"Just Oro!" cried Yoomy, "do no thunders roll,—no lightnings flash in this accursed land!"

"Asylum for all Mardi's thralls!" cried Media.

"Incendiaries!" cried he with the wondrous eyes, "come ye, firebrands, to light the flame of revolt? Know ye not, that there are many serfs, who, incited to obtain their

liberty, might wreak some dreadful vengeance. thou king! *thou* horrified at this? Go back to right her wrongs! These serfs are happier though thine, no collars wear, more happy as than if free. Are they not fed, clothed, and c Thy serfs pine for food: never yet did these; no thoughts, no cares."

"Thoughts and cares are life, and liberty, and *itality*!" cried Babbalanja; "and are their souls blown out as candles?"

"Ranter! they are content," cried Nulli. "T no tears."

"Frost never weeps," said Babbalanja; "and frozen in those frigid eyes."

"Oh fettered sons of fettered mothers, conceived born in manacles," cried Yoomy; "dragging them life; and falling with them, clanking in the grave as ourselves, how my stiff arm shivers to you! 'Twere absolution for the matricide, to str rivet from your chains. My heart outswells its

"Oro! Art thou?" cried Babbalanja; "and do thing exist? It shakes my little faith." Then, upon Nulli, "How can ye abide to sway this dominion?"

"Peace, fanatic! Who else may till unwholesome but these? And as these beings are, so shall thou main; 'tis right and righteous! Maramma champion—I swear it! The first blow struck for them, did the union of Vivenza's vales. The northern tribe know it; and know me."

Said Media, "Yet if—"

"No more! another word, and, king as thou art shalt be dungeoned:—here, there is such a law; thou not among the northern tribes."

"And this is freedom!" murmured Media; "heaven's own voice is throttled. And were these to rise, and fight for it; like dogs, they would be h down by her pretended sons!"

"Pray, heaven!" cried Yoomy, "they may yet find way to loose their bonds without one drop of blood. hear me, Oro! were there no other way, and should

15 Nulli, John C. Calhoun (1782-1850), the chief exponent of the doctrine of nullification • 18 Corporant, St. Elmo's fire, a luminous electrical discharge visible at the tips of a ship's masts and rigging in stormy weather • 73 Maramma, the Church

masters not relent, all honest hearts must cheer this tribe of Hamo on; though they cut their chains with blades thrice edged, and gory to the haft! 'Tis right to fight for freedom, whoever be the thrall."

"These South savannahs may yet prove battle-fields," said Mohi, gloomily, as we retraced our steps.

"Be it," said Yoomy. "Oro will van the right."

"Not always has it proved so," said Babbalanja. "Oft-times, the right fights single-handed against the world, and Oro champions none. In all things, man's own battles, man himself must fight. Yoomy, so far as feeling goes, your sympathies are not more hot than mine, but for these serfs you would cross spears, yet, I would not Better present woes for some, than future woes for all."

"No need to fight," cried Yoomy, "to liberate that tribe of Hamo instantly; a way may be found, and no irretrievable evil ensue."

"Point it out, and be blessed, Yoomy"

"That is for Vivenza; but the head is dull, where the heart is cold."

"My lord," said Babbalanja, "you have startled us by your kingly sympathy for suffering; say thou, then, in what wise manner it shall be relieved."

"That is for Vivenza," said Media.

"Mohi, you are old: speak thou."

"Let Vivenza speak," said Mohi.

"Thus, then, we all agree; and weeping, all but echo hard-hearted Nulli. Tears are not swords, and wrongs seem almost natural as rights. For the righteous to suppress an evil, is sometimes harder than for others to uphold it. Humanity cries out against this vast enormity:—not one man knows a prudent remedy. Blame not, then, the North, and wisely judge the South. Ere, as a nation, they became responsible, this thing was planted in their midst. Such roots strike deep. Place to-day those serfs in Dominora, and with them, all Vivenza's Past,—and serfs, for many years, in Dominora, they would be. Easy is it to stand afar and rail. All men are censors who have lungs. We can say, the stars are wrongly marshaled. Blind men say the sun is blind. A thousand muscles wag our tongues; though our tongues were housed, that they might have a home. Whoso is free from crime, let him cross himself—but hold his cross upon his lips. That he is not bad, is not of him. Potters' clay and wax are all, molded by hands invisible. The soil decides the man. And, ere birth, man wills not

to be born here or there. These southern tribes have grown up with this thing, bond-women were their nurses, and bondmen serve them still. Nor are all their serfs such wretches as those we saw. Some seem happy: yet not as men. Unmanned, they know not what they are. And though, of all the south, Nulli must stand almost alone in his insensate creed, yet, to all wrong-doers, custom backs the sense of wrong. And if to every Mardian, conscience be the awarder of its own doom, then, of these tribes, many shall be found exempted from the least penalty of this sin. But sin it is, no less,—a blot, foul as the crater-pool of hell, it puts out the sun at noon, it parches all fertility, and, conscience or no conscience—ere he die—let every master who wrenches a bond-babe from mother, that the nipple tear, unwreathes the arms of sisters, or cuts the holy unity in twain, till apart fall man and wife, like one bleeding body cleft—let that master thrice shrive his soul, take every sacrament, on his bended knees give up the ghost,—yet shall he die despairing, and live again, to die forever damned. The future is all hieroglyphics. Who may read? But, methinks the great laggard Time must now march up apace, and somehow befriend these thralls. It can not be, that misery is perpetually entailed, though, in a land so proscribing primogeniture, the first-born and last of Hamo's tribe must still succeed to all their sires' wrongs. Yes! Time—all-healing Time—Time, great Philanthropist!—Time must befriend these thralls!"

"Oro grant it!" cried Yoomy, "and let Mardi say, amen!"

"Amen! amen! amen!" cried echoes echoing echoes

We traversed many of these southern vales, but as in Dominora,—so, throughout Vivenza, North and South, —Yillah harbored not.

1849

Benito Cereno

"Benito Cereno" was first printed serially in *Putnam's Monthly Magazine* in October, November, and December 1855, and was reprinted, with minor revisions, in *Piazza Tales* in 1856. Melville derived the principal facts of his narrative from Chapter XVIII of Amasa Delano's *Narrative of Voyages and Travels in the Northern and Southern Hemispheres* . . . , Boston, 1817; but the artistry which made of the facts a literary masterpiece was Melville's own. Delano's chapter is reprinted in Harold H. Scudder's "Melville's 'Benito Cereno' and Captain Delano's Voyages," *Publications of the Modern Language Association*, June 1928, XLIII.

The late Edward J. O'Brien regarded "Benito Cereno" as "the noblest short story in American literature" (*Twenty-Five Finest Short Stories*, New York, 1931). The story is indeed remarkable for its atmosphere and suggestion, its cumulative suspense, its horror, its pictorial qualities, its portrayal of contrasting types of character. Only in *Moby Dick* perhaps is Melville's power more fully revealed.

In the year 1799, Captain Amasa Delano, of Duxbury, in Massachusetts, commanding a large sealer and general trader, lay at anchor with a valuable cargo, in the harbor of St. Maria—a small, desert, uninhabited island towards the southern extremity of the long coast of Chili. There he had touched for water.

On the second day, not long after dawn, while lying in his berth, his mate came below, informing him that a strange sail was coming into the bay. Ships were then
10 not so plenty in those waters as now. He rose, dressed, and went on deck.

The morning was one peculiar to that coast. Every-

thing was mute and calm; everything gray. though undulated into long roods of swells, see and was sleeked at the surface like waved lea cooled and set in the smelter's mould. The sk a gray surtout. Flights of troubled gray fowl, kin with flights of troubled gray vapors amo they were mixed, skimmed low and fitfully waters, as swallows over meadows before storn ows present, foreshadowing deeper shadows to

To Captain Delano's surprise, the stranger through the glass, showed no colors; though upon entering a haven, however uninhabited in where but a single other ship might be lying, custom among peaceful seamen of all nations. ering the lawlessness and loneliness of the s, the sort of stories, at that day, associated wi seas, Captain Delano's surprise might have d into some uneasiness had he not been a pers singularly undistrustful good nature, not liable on extraordinary and repeated incentives, and then, to indulge in personal alarms, any way in the imputation of malign evil in man. Whe view of what humanity is capable, such a trait along with a benevolent heart, more than ordinary ness and accuracy of intellectual perception, may to the wise to determine.

But whatever misgivings might have obtruded seeing the stranger, would almost, in any seaman's have been dissipated by observing that the sl navigating into the harbor, was drawing too ne land; a sunken reef making out off her bow. This s to prove her a stranger, indeed, not only to the but the island; consequently, she could be no v freebooter on that ocean. With no small interest, C Delano continued to watch her—a proceeding not facilitated by the vapors partly mantling the hull, th which the far matin light from her cabin str equivocally enough; much like the sun—by this hemisphered on the rim of the horizon, and, appar in company with the strange ship, entering the harl which, wimpled by the same low, creeping clouds, sh not unlike a Lima intriguante's one sinister eye pe

54 Lima, the capital of Peru • 54 intriguante, a woman who on an illicit love affair

across the Plaza from the Indian loop-hole of her dusk *saya-y-manta*.

It might have been but a deception of the vapors, but, the longer the stranger was watched the more singular appeared her manoeuvres. Ere long it seemed hard to decide whether she meant to come in or no—what she wanted, or what she was about. The wind, which had breezed up a little during the night, was now extremely light and baffling, which the more increased the apparent uncertainty of her movements.

Surmising, at last, that it might be a ship in distress, Captain Delano ordered his whale-boat to be dropped, and, much to the wary opposition of his mate, prepared to board her, and, at the least, pilot her in. On the night previous, a fishing-party of the seamen had gone a long distance to some detached rocks out of sight from the sealer, and, an hour or two before daybreak, had returned, having met with no small success. Presuming that the stranger might have been long off soundings, the good captain put several baskets of the fish, for presents, into his boat, and so pulled away. From her continuing too near the sunken reef, deeming her in danger, calling to his men, he made all haste to apprise those on board of their situation. But, some time ere the boat came up, the wind, light though it was, having shifted, had headed the vessel off, as well as partly broken the vapors from about her.

Upon gaining a less remote view, the ship, when made signally visible on the verge of the leaden-hued swells, with the shreds of fog here and there raggedly furring her, appeared like a white-washed monastery after a thunderstorm, seen perched upon some dun cliff among the Pyrenees. But it was no purely fanciful resemblance which now, for a moment, almost led Captain Delano to think that nothing less than a ship-load of monks was before him. Peering over the bulwarks were what really seemed, in the hazy distance, throngs of dark cowl; while, fitfully revealed through the open port-holes, other dark moving figures were dimly descried, as of Black Friars pacing the cloisters.

Upon a still nigher approach, this appearance was modified, and the true character of the vessel was plain—a Spanish merchantman of the first class, carrying Negro slaves, amongst other valuable freight, from one colonial port to another. A very large, and, in its time, a very fine vessel, such as in those days were at intervals

encountered along that main; sometimes superseded Acapulco treasure-ships, or retired frigates of the Spanish king's navy, which, like superannuated Italian palaces, still, under a decline of masters, preserved signs of former state.

As the whale-boat drew more and more nigh, the cause of the peculiar pipe-clayed aspect of the stranger was seen in the slovenly neglect pervading her. The spars, ropes, and great part of the bulwarks, looked woolly, from long unacquaintance with the scraper, tar, and the brush. Her keel seemed laid, her ribs put together, and she launched, from Ezekiel's Valley of Dry Bones.

In the present business in which she was engaged, the ship's general model and rig appeared to have undergone no material change from their original warlike and Froissart pattern. However, no guns were seen.

The tops were large, and were railed about with what had once been octagonal net-work, all now in sad disrepair. These tops hung overhead like three ruinous aviaries, in one of which was seen perched on a ratlin, a white noddy, a strange fowl, so called from its lethargic somnambulistic character, being frequently caught by hand at sea. Battered and mouldy, the castellated fore-castle seemed some ancient turret, long ago taken by assault, and then left to decay. Toward the stern, two high-raised quarter galleries—the balustrades here and there covered with dry, tindery sea-moss—opening out from the unoccupied state-cabin, whose dead-lights, for all the mild weather, were hermetically closed and calked—these tenantless balconies hung over the sea as if it were the grand Venetian canal. But the principal relic of faded grandeur was the ample oval of the shield-like stern-piece, intricately carved with the arms of Castile and Leon, medallioned about by groups of mythological or symbolical devices, uppermost and central of which was a dark satyr in a mask, holding his foot on the prostrate neck of a writhing figure, likewise masked.

2 *saya-y-manta*, skirt and shawl • 48 Acapulco, a Mexican port on the Pacific Ocean • 58 Ezekiel's . . . Bones. See Ezekiel 37 1-10 • 62 Froissart, Jean Froissart (1337-1410), author of the famous *Chronicles* Froissart pattern" apparently means that the ship was of medieval design • 63 tops, platforms in the mast • 74 dead-lights, shutters on the cabin windows to keep out water • 80 Castile and Leon. See note, p. 966

Whether the ship had a figure-head, or only a plain beak, was not quite certain, owing to canvas wrapped about that part, either to protect it while undergoing a re-furbishing, or else decently to hide its decay. Rudely painted or chalked, as in a sailor freak, along the forward side of a sort of pedestal below the canvas, was the sentence, "*Seguid a nuestro jefe*" (follow your leader); while upon the tarnished head-boards, near by, appeared, in stately capitals, once gilt, the ship's name "SAN DOMI-
 10 NICK," each letter streakingly corroded with tricklings of copper-spike rust, while, like mourning weeds, dark festoons of sea-grass slimily swept to and fro over the name, with every hearse-like roll of the hull.

As, at last, the boat was hooked from the bow along toward the gangway amidship, its keel, while yet some inches separated from the hull, harshly grated as on a sunken coral reef. It proved a huge bunch of conglobated barnacles adhering below the water to the side like a wen—a token of baffling airs and long calms passed
 20 somewhere in those seas.

Climbing the side, the visitor was at once surrounded by a clamorous throng of whites and blacks, but the latter outnumbering the former more than could have been expected, Negro transportation-ship as the stranger in port was. But, in one language, and as with one voice, all poured out a common tale of suffering, in which the Negresses, of whom there were not a few, exceeded the others in their dolorous vehemence. The scurvy, together with a fever, had swept off a great part of their
 30 number, more especially the Spaniards. Off Cape Horn, they had narrowly escaped shipwreck, then, for days together, they had lain tranced without wind; their provisions were low, their water next to none; their lips that moment were baked.

While Captain Delano was thus made the mark of all eager tongues, his one eager glance took in all the faces, with every other object about him.

Always upon first boarding a large and populous ship at sea, especially a foreign one, with a nondescript crew
 40 such as Lascars or Manilla men, the impression varies in a peculiar way from that produced by first entering a strange house with strange inmates in a strange land. Both house and ship—the one by its walls and blinds, the other by its high bulwarks like ramparts—hoard from view their interiors till the last moment; but in the case of the ship there is this addition: that the living

spectacle it contains, upon its sudden and con- closure, has, in contrast with the blank oce- zones it, something of the effect of enchantm- ship seems unreal; these strange costumes, ges- faces, but a shadowy tableau just emerged from which directly must receive back what it gave.

Perhaps it was some such influence, as ab- tempted to be described, which, in Captain mind, heightened whatever, upon a staid scruti- have seemed unusual; especially the conspicuoi- of four elderly grizzled Negroes, their heads li- doddered willow tops, who, in venerable contr- tumult below them, were couched sphynx-like the starboard cat-head, another on the larboard remaining pair face to face on the opposite . above the main-chains. They each had bits of un- old junk in their hands, and, with a sort of sto- content, were picking the junk into oakum, a sn- of which lay by their sides. They accompanied with a continuous, low, monotonous chant; dror- druling away like so many gray-headed bag-pipers a funeral march.

The quarter-deck rose into an ample elevate- upon the forward verge of which, lifted, like the pickers, some eight feet above the general thr- along in a row, separated by regular spaces, th- legged figures of six other blacks; each with hatchet in his hand, which, with a bit of brick- rag, he was engaged like a scullion in scouring between each two was a small stack of hatchet- rusted edges turned forward awaiting a like op- Though occasionally the four oakum-pickers would address some person or persons in the crowd bel- the six hatchet-polishers neither spoke to othe- breathed a whisper among themselves, but sat upon their task, except at intervals, when, with t- culiar love in Negroes of uniting industry with p- two-and-two they sideways clashed their hatch- gether, like cymbals, with a barbarous din. All six, the generality, had the raw aspect of unsophist- Africans.

But that first comprehensive glance which to

40 Lascars, East Indian sailors • 58 doddered, having los- branches because of age or decay • 62 main-chains, attached mainmast

those ten figures, with scores less conspicuous, rested but an instant upon them, as, impatient of the hubbub of voices, the visitor turned in quest of whomsoever it might be that commanded the ship.

But as if not unwilling to let nature make known her own case among his suffering charge, or else in despair of restraining it for the time, the Spanish captain, a gentlemanly, reserved-looking, and rather young man to a stranger's eye, dressed with singular richness, but bearing plain traces of recent sleepless cares and disquietudes, stood passively by, leaning against the mainmast, at one moment casting a dreary, spiritless look upon his excited people, at the next an unhappy glance toward his visitor. By his side stood a black of small stature, in whose rude face, as occasionally, like a shepherd's dog, he mutely turned it up into the Spaniard's, sorrow and affection were equally blended.

Struggling through the throng, the American advanced to the Spaniard, assuring him of his sympathies, and offering to render whatever assistance might be in his power. To which the Spaniard returned for the present but grave and ceremonious acknowledgments, his national formality dusked by the saturnine mood of ill-health.

But losing no time in mere compliments, Captain Delano, returning to the gangway, had his basket of fish brought up; and as the wind still continued light, so that some hours at least must elapse ere the ship could be brought to the anchorage, he bade his men return to the sealer, and fetch back as much water as the whale-boat could carry, with whatever soft bread the steward might have, all the remaining pumpkins on board, with a box of sugar, and a dozen of his private bottles of cider.

Not many minutes after the boat's pushing off, to the vexation of all, the wind entirely died away, and the tide turning, began drifting back the ship helplessly seaward. But trusting this would not long last, Captain Delano sought, with good hopes, to cheer up the strangers, feeling no small satisfaction that, with persons in their condition he could—thanks to his frequent voyages along the Spanish main—converse with some freedom in their native tongue.

While left alone with them, he was not long in observing some things tending to heighten his first impressions; but surprise was lost in pity, both for the Spaniards and blacks, alike evidently reduced from scarcity of water

and provisions; while long-continued suffering seemed to have brought out the less good-natured qualities of the Negroes, besides, at the same time, impairing the Spaniard's authority over them. But, under the circumstances, precisely this condition of things was to have been anticipated. In armies, navies, cities, or families, in nature herself, nothing more relaxes good order than misery. Still, Captain Delano was not without the idea, that had Benito Cereno been a man of greater energy, misrule would hardly have come to the present pass. But the debility, constitutional or induced by the hardships, bodily and mental, of the Spanish captain, was too obvious to be overlooked. A prey to settled dejection, as if long mocked with hope he would not now indulge it, even when it had ceased to be a mock, the prospect of that day or evening at furthest, lying at anchor, with plenty of water for his people, and a brother captain to counsel and befriend, seemed in no perceptible degree to encourage him. His mind appeared unstrung, if not still more seriously affected. Shut up in these oaken walls, chained to one dull round of command, whose unconditionality cloyed him, like some hypochondriac abbot he moved slowly about, at times suddenly pausing, starting, or staring, biting his lip, biting his finger-nail, flushing, paling, twitching his beard, with other symptoms of an absent or moody mind. This distempered spirit was lodged, as before hinted, in as distempered a frame. He was rather tall, but seemed never to have been robust, and now with nervous suffering was almost worn to a skeleton. A tendency to some pulmonary complaint appeared to have been lately confirmed. His voice was like that of one with lungs half gone—hoarsely suppressed, a husky whisper. No wonder that, as in this state he tottered about, his private servant apprehensively followed him. Sometimes the Negro gave his master his arm, or took his handkerchief out of his pocket for him; performing these and similar offices with that affectionate zeal which transmutes into something filial or fraternal acts in themselves but menial, and which has gained for the Negro the repute of making the most pleasing body-servant in the world, one, too, whom a master need be on no stiffly superior terms with, but may treat with familiar trust, less a servant than a devoted companion.

Marking the noisy indocility of the blacks in general, as well as what seemed the sullen inefficiency of the

whites, it was not without humane satisfaction that Captain Delano witnessed the steady good conduct of Babo.

But the good conduct of Babo, hardly more than the ill-behavior of others, seemed to withdraw the half-lunatic Don Benito from his cloudy languor. Not that such precisely was the impression made by the Spaniard on the mind of his visitor. The Spaniard's individual unrest was, for the present, but noted as a conspicuous feature in the ship's general affliction. Still, Captain Delano was not a little concerned at what he could not help taking for the time to be Don Benito's unfriendly indifference toward himself. The Spaniard's manner, too, conveyed a sort of sour and gloomy disdain, which he seemed at no pains to disguise. But this the American in charity ascribed to the harassing effects of sickness, since, in former instances, he had noted that there are peculiar natures on whom prolonged physical suffering seems to cancel every social instinct of kindness, as if forced to black bread themselves, they deemed it but equity that each person coming nigh them should, indirectly, by some slight or affront, be made to partake of their fare.

But ere long Captain Delano bethought him that, indulgent as he was at the first, in judging the Spaniard, he might not, after all, have exercised charity enough. At bottom it was Don Benito's reserve which displeased him, but the same reserve was shown toward all but his personal attendant. Even the formal reports which, according to sea-usage, were at stated times made to him by some petty underling, either a white, mulatto or black, he hardly had patience enough to listen to, without betraying contemptuous aversion. His manner upon such occasions was, in its degree, not unlike that which might be supposed to have been his imperial countryman's, Charles V., just previous to the anchoritish retirement of that monarch from the throne.

This splenetic disrelish of his place was evinced in almost every function pertaining to it. Proud as he was ⁴⁰ moody, he condescended to no personal mandate. Whatever special orders were necessary, their delivery was delegated to his body-servant, who in turn transferred them to their ultimate destination, through runners, alert Spanish boys or slave boys, like pages or pilot-fish within easy call continually hovering around Don Benito. So that to have beheld this undemonstrative invalid gliding

about, apathetic and mute, no landsman dreamed that in him was lodged a dictatorship which, while at sea, there was no earthly appeal from.

Thus, the Spaniard, regarded in his reserve, the involuntary victim of mental disorder. But his reserve might, in some degree, have proceeded from design. If so, then here was evinced the unhealthy of that icy though conscientious policy, most adopted by all commanders of large ships, which in signal emergencies, obliterates alike the notion of sway with every trace of sociality; transforms the man into a block, or rather into a loaded cannon, until there is call for thunder, has nothing

Viewing him in this light, it seemed but a token of the perverse habit induced by a long such hard self-restraint, that, notwithstanding the condition of his ship, the Spaniard should still in a demeanor, which, however harmless, or it appropriate, in a well-appointed vessel, such as Dominick might have been at the outset of the was anything but judicious now. But the Spaniard, perhaps, thought that it was with captains as with generals, under all events, must still be their duty, probably this appearance of slumbering dominion have been but an attempted disguise to conscious beclivity—not deep policy, but shallow device. But this as it might, whether Don Benito's manner designed or not, the more Captain Delano no pervading reserve, the less he felt uneasiness particular manifestation of that reserve toward him.

Neither were his thoughts taken up by the
alone. Wonted to the quiet orderliness of the
comfortable family of a crew, the noisy confusion
San Dominick's suffering host repeatedly challeng
eye. Some prominent breaches, not only of discipli
of decency, were observed. These Captain Delano
not but ascribe, in the main, to the absence of
subordinate deck-officers to whom, along with h
duties, is entrusted what may be styled the polic
partment of a populous ship. True, the old oar
pickers appeared at times to act the part of moni
constables to their countrymen, the blacks; but th

36 Charles V (1500-1558), Holy Roman Emperor and king of Spain
44 pilot-fish, so named because often seen with a shark, as if it
as a pilot to the shark

occasionally succeeding in allaying trifling outbreaks now and then between man and man, they could do little or nothing toward establishing general quiet. The San Dominick was in the condition of a transatlantic emigrant ship, among whose multitude of living freight are some individuals, doubtless, as little troublesome as crates and bales; but the friendly remonstrances of such with their ruder companions are of not so much avail as the unfriendly arm of the mate. What the San Dominick wanted was, what the emigrant ship has, stern superior officers. But on these decks not so much as a fourth-mate was to be seen.

The visitor's curiosity was roused to learn the particulars of those mishaps which had brought about such absenteeism, with its consequences, because, though deriving some inkling of the voyage from the wails which at the first moment had greeted him, yet of the details no clear understanding had been had. The best account would, doubtless, be given by the captain. Yet at first the visitor was loth to ask it, unwilling to provoke some distant rebuff. But plucking up courage, he at last accosted Don Benito, renewing the expression of his benevolent interest, adding, that did he (Captain Delano) but know the particulars of the ship's misfortunes, he would, perhaps, be better able in the end to relieve them. Would Don Benito favor him with the whole story.

Don Benito faltered; then, like some somnambulist suddenly interfered with, vacantly stared at his visitor, and ended by looking down on the deck. He maintained this posture so long, that Captain Delano, almost equally disconcerted, and involuntarily almost as rude, turned suddenly from him, walking forward to accost one of the Spanish seamen for the desired information. But he had hardly gone five paces, when, with a sort of eagerness, Don Benito invited him back, regretting his momentary absence of mind, and professing readiness to gratify him.

While most part of the story was being given, the two captains stood on the after part of the main-deck, a privileged spot, no one being near but the servant.

"It is now a hundred and ninety days," began the Spaniard, in his husky whisper, "that this ship, well officered and well manned, with several cabin passengers—some fifty Spaniards in all—sailed from Buenos Ayres bound to Lima, with a general cargo, hardware, Paraguay tea and the like—and," pointing forward, "that parcel of

Negroes, now not more than a hundred and fifty, as you see, but then numbering over three hundred souls. Off Cape Horn we had heavy gales. In one moment, by night, three of my best officers, with fifteen sailors, were lost, with the main-yard; the spar snapping under them in the slings, as they sought, with heavers, to beat down the icy sail. To lighten the hull, the heavier sacks of mata were thrown into the sea, with most of the water-pipes lashed on deck at the time. And this last necessity it was, combined with the prolonged detentions afterwards experienced, which eventually brought about our chief causes of suffering. When—"

Here there was a sudden fainting attack of his cough, brought on, no doubt, by his mental distress. His servant sustained him, and drawing a cordial from his pocket placed it to his lips. He a little revived. But unwilling to leave him unsupported while yet imperfectly restored, the black with one arm still encircled his master, at the same time keeping his eye fixed on his face, as if to watch for the first sign of complete restoration, or relapse, as the event might prove.

The Spaniard proceeded, but brokenly and obscurely, as one in a dream.

"—Oh, my God! rather than pass through what I have, with joy I would have hailed the most terrible gales; but—"

His cough returned and with increased violence, this subsiding, with reddened lips and closed eyes he fell heavily against his supporter.

"His mind wanders. He was thinking of the plague that followed the gales," plaintively sighed the servant; "my poor, poor master!" wringing one hand, and with the other wiping the mouth. "But be patient, Señor," again turning to Captain Delano, "these fits do not last long; master will soon be himself."

Don Benito reviving, went on; but as this portion of the story was very brokenly delivered, the substance only will here be set down.

It appeared that after the ship had been many days tossed in storms off the Cape, the scurvy broke out, carrying off numbers of the whites and blacks. When at last they had worked round into the Pacific, their spars and sails were so damaged, and so inadequately handled

54 water-pipes, large casks of water

by the surviving mariners, most of whom were become invalids, that, unable to lay her northerly course by the wind, which was powerful, the unmanageable ship, for successive days and nights, was blown northwestward, where the breeze suddenly deserted her, in unknown waters, to sultry calms. The absence of the water-pipes now proved as fatal to life as before their presence had menaced it. Induced, or at least aggravated, by the more than scanty allowance of water, a malignant fever followed the scurvy, with the excessive heat of the lengthened calm, making such short work of it as to sweep away, as by billows, whole families of the Africans, and a yet larger number, proportionably, of the Spaniards, including, by a luckless fatality, every remaining officer on board. Consequently, in the smart west winds eventually following the calm, the already rent sails, having to be simply dropped, not furled, at need, had been gradually reduced to the beggar's rags they were now. To procure substitutes for his lost sailors, as well as supplies of water and sails, the captain, at the earliest opportunity, had made for Baldivia, the southernmost civilized port of Chili and South America, but upon nearing the coast the thick weather had prevented him from so much as sighting that harbor. Since which period, almost without a crew, and almost without canvas and almost without water, and, at intervals, giving its added dead to the sea, the *San Dominick* had been battle-dored about by contrary winds, inveigled by currents, or grown weedy in calms. Like a man lost in woods, more than once she had doubled upon her own track.

"But throughout these calamities," huskily continued Don Benito, painfully turning in the half embrace of his servant, "I have to thank those Negroes you see, who, though to your inexperienced eyes appearing unruly, have, indeed, conducted themselves with less of restlessness than even their owner could have thought possible under such circumstances."

Here he again fell faintly back. Again his mind wandered; but he rallied, and less obscurely proceeded.

"Yes, their owner was quite right in assuring me that no fetters would be needed with his blacks, so that while, as is wont in this transportation, these Negroes have always remained upon deck—not thrust below, as in the Guinea-men—they have, also, from the beginning, been freely permitted to range within given bounds at their pleasure."

Once more the faintness returned—his mind but, recovering, he resumed:

"But it is Babo here to whom, under God, only my own preservation, but likewise to him the merit is due, of pacifying his more ignorant when at intervals tempted to murmurings."

"Ah, master," sighed the black, bowing his head, "I speak of me; Babo is nothing; what Babo has but duty."

"Faithful fellow!" cried Captain Delano. "Benito, I envy you such a friend; slave I cannot command."

As master and man stood before him, the black holding the white, Captain Delano could not but prize him of the beauty of that relationship which contrasted such a spectacle of fidelity on the one hand with confidence on the other. The scene was heightened by the contrast in dress, denoting their relative positions. The Spaniard wore a loose Chili jacket of dark blue, white small-clothes and stockings, with silver buttons, the knee and instep; a high-crowned sombrero, with a green grass, a slender sword, silver mounted, hung in a knot in his sash—the last being an almost indispensable adjunct, more for utility than ornament, of an American gentleman's dress to this hour. Even when his occasional nervous contortions brought him into disarray, there was a certain precision in his attire, not at variance with the unsightly disorder especially in the belittered Ghetto, forward of the mast, wholly occupied by the blacks.

The servant wore nothing but wide trowsers, and, entirely, from their coarseness and patches, made of some old topsail, they were clean, and confined at the waist by a bit of unstranded rope, which, with his bowed, deprecatory air at times, made him look somewhat like a begging friar of St. Francis.

However unsuitable for the time and place, and in the blunt-thinking American's eyes, and how strangely surviving in the midst of all his afflictions, the toilette of Don Benito might not, in fashion at least, have gone beyond the style of the day among South Americans of his class. Though on the present voyage, since from Buenos Ayres, he had avowed himself a native resident of Chili, whose inhabitants had not so gen-

44 Guinea-men, ships trading with Guinea in West Africa

adopted the plain coat and once plebeian pantaloons, but, with a becoming modification, adhered to their provincial costume, picturesque as any in the world. Still, relatively to the pale history of the voyage, and his own pale face, there seemed something so incongruous in the Spaniard's apparel, as almost to suggest the image of an invalid courtier tottering about London streets in the time of the plague.

The portion of the narrative which, perhaps, most excited interest, as well as some surprise, considering the latitudes in question, was the long calms spoken of, and more particularly the ship's so long drifting about. Without communicating the opinion, of course, the American could not but impute at least part of the detentions both to clumsy seamanship and faulty navigation. Eyeing Don Benito's small, yellow hands, he easily inferred that the young captain had not got into command at the hawse-hole but the cabin-window, and if so, why wonder at incompetence, in youth, sickness, and gentility united?

20 But drowning criticism in compassion, after a fresh repetition of his sympathies, Captain Delano, having heard out his story, not only engaged, as in the first place, to see Don Benito and his people supplied in their immediate bodily needs, but, also, now further promised to assist him in procuring a large permanent supply of water, as well as some sails and rigging; and, though it would involve no small embarrassment to himself, yet he would spare three of his best seamen for temporary deck officers; so that without delay the ship might proceed to

Conception, there fully to refit for Lima, her destined port. Such generosity was not without its effect, even upon the invalid. His face lighted up; eager and hectic, he met the honest glance of his visitor. With gratitude he seemed overcome.

"This excitement is bad for master," whispered the servant, taking his arm, and with soothing words gently drawing him aside.

When Don Benito returned, the American was pained to observe that his hopefulness, like the sudden kindling in his cheek, was but febrile and transient.

Ere long, with a joyless mien, looking up towards the poop, the host invited his guest to accompany him there, for the benefit of what little breath of wind might be stirring.

As, during the telling of the story, Captain Delano had once or twice started at the occasional cymballing of the

hatchet-polishers, wondering why such an interruption should be allowed, especially in that part of the ship, and in the ears of an invalid, and moreover, as the hatchets had anything but an attractive look, and the handlers of them still less so, it was, therefore, to tell the truth, not without some lurking reluctance, or even shrinking, it may be, that Captain Delano, with apparent complaisance, acquiesced in his host's invitation. The more so, since, with an untimely caprice of punctilio, rendered distressing by his cadaverous aspect, Don Benito, with Castilian bows, solemnly insisted upon his guest's preceding him up the ladder leading to the elevation, where, one on each side of the last step, sat for armorial supporters and sentries two of the ominous file. Gingerly enough stepped good Captain Delano between them, and in the instant of leaving them behind, like one running the gauntlet, he felt an apprehensive twitch in the calves of his legs.

But when, facing about, he saw the whole file, like so many organ-grinders, still stupidly intent on their work, unmindful of everything beside, he could not but smile at his late fidgety panic.

Presently, while standing with his host, looking forward upon the decks below, he was struck by one of those 70 instances of insubordination previously alluded to. Three black boys, with two Spanish boys, were sitting together on the hatches, scraping a rude wooden platter, in which some scanty mess had recently been cooked. Suddenly, one of the black boys, enraged at a word dropped by one of his white companions, seized a knife, and, though called to forbear by one of the oakum-pickers, struck the lad over the head, inflicting a gash from which blood flowed.

In amazement, Captain Delano inquired what this meant. To which the pale Don Benito dully muttered, 80 that it was merely the sport of the lad.

"Pretty serious sport, truly," rejoined Captain Delano. "Had such a thing happened on board the Bachelor's Delight, instant punishment would have followed."

At these words, the Spaniard turned upon the American one of his sudden, staring, half-lunatic looks; then, relapsing into his torpor, answered, "Doubtless, doubtless, Señor."

18 hawse-hole, one of the holes in the bow of a ship, through which a cable passes. The statement means that the captain had had no experience as a common sailor. • 30 Conception, Conception, a city on the Chilean coast.

Is it, thought Captain Delano, that this hapless man is one of those paper captains I've known, who by policy wink at what by power they cannot put down? I know no sadder sight than a commander who has little of command but the name.

"I should think, Don Benito," he now said, glancing towards the oakum-picker who had sought to interfere with the boys, "that you would find it advantageous to keep all your blacks employed, especially the younger ones, no matter at what useless task, and no matter what happens to the ship. Why, even with my little band, I find such a course indispensable. I once kept a crew on my quarter-deck thrumming mats for my cabin, when, for three days, I had given up my ship—mats, men, and all—for a speedy loss, owing to the violence of a gale, in which we could do nothing but helplessly drive before it."

"Doubtless, doubtless," muttered Don Benito.

"But," continued Captain Delano, again glancing upon the oakum-pickers and then at the hatchet-polishers, near by, "I see you keep some, at least, of your host employed."

"Yes," was again the vacant response.

"Those old men there, shaking their paws from their pulpits," continued Captain Delano, pointing to the oakum-pickers, "seem to act the part of old dominies to the rest, little heeded as their admonitions are at times. Is this voluntary on their part, Don Benito, or have you appointed them shepherds to your flock of black sheep?"

"What posts they fill, I appointed them," rejoined the Spaniard in an acrid tone, as if resenting some supposed satiric reflection.

"And these others, these Ashantee conjurors here," continued Captain Delano, rather uneasily eyeing the brandished steel of the hatchet-polishers, where, in spots, it had been brought to a shine, "this seems a curious business they are at, Don Benito?"

"In the gales we met," answered the Spaniard, "what of our general cargo was not thrown overboard was much damaged by the brine. Since coming into calm weather, I have had several cases of knives and hatchets daily brought up for overhauling and cleaning."

"A prudent idea, Don Benito. You are part owner of ship and cargo, I presume; but not of the slaves, perhaps?"

"I am owner of all you see," impatiently returned Don

Benito, "except the main company of blacks, longed to my late friend Alexandro Aranda."

As he mentioned this name, his air was heavy; his knees shook; his servant supported him.

Thinking he divined the cause of such uneasiness, to confirm his surmise, Captain Delano paused, said: "And may I ask, Don Benito, when since awhile ago you spoke of some cabin passenger, whose loss so afflicts you, at the outward voyage accompanied his blacks?"

"Yes"

"But died of the fever?"

"Died of the fever.—Oh, could I but—"

Again quivering, the Spaniard paused.

"Pardon me," said Captain Delano, lowly, "but that, by a sympathetic experience, I conjecture Benito, what it is that gives the keener edge to your grief. It was once my hard fortune to lose, at sea, my friend, my own brother, then supercargo. As for the welfare of his spirit, its departure I could have cared like a man; but that honest eye, that honest hand of which had so often met mine—and that warm heart, all—like scraps to the dogs—to throw all to the sharks! It was then I vowed never to have for my voyager a man I loved, unless, unbeknown to him, I provided every requisite, in case of a fatality, for embalming his mortal part for interment on shore. Your friend's remains now on board this ship, Don Benito, not thus strangely would the mention of his name affect you."

"On board this ship?" echoed the Spaniard with horrified gestures, as directed against some spot where he unconsciously fell into the ready arms of his attendant, who, with a silent appeal toward Captain Delano, beseeched him not again to broach a theme so speakably distressing to his master.

This poor fellow now, thought the pained American, is the victim of that sad superstition which associates goblins with the deserted body of man, as ghosts haunt an abandoned house. How unlike are we made! I, to me, in like case, would have been a solemn

33 Ashantee, a native kingdom in West Africa • 64 supercargo officer in a merchant ship whose duty is to manage the business of the voyage

faction, the bare suggestion, even, terrifies the Spaniard into this trance. Poor Alexandro Aranda! what would you say could you here see your friend—who, on former voyages, when you, for months, were left behind, has, I dare say, often longed, and longed, for one peep at you—now transported with terror at the least thought of having you anyway nigh him.

At this moment, with a dreary grave-yard toll, betokening a flaw, the ship's fore-castle bell, smote by one of the grizzled oakum-pickers, proclaimed ten o'clock, through the leaden calm; when Captain Delano's attention was caught by the moving figure of a gigantic black, emerging from the general crowd below, and slowly advancing toward the elevated poop. An iron collar was about his neck, from which depended a chain, thrice wound round his body; the terminating links padlocked together at a broad band of iron, his girdle

"How like a mute Atufal moves," murmured the servant.

The black mounted the steps of the poop, and, like a brave prisoner, brought up to receive sentence, stood in unquailing muteness before Don Benito, now recovered from his attack.

At the first glimpse of his approach, Don Benito had started, a resentful shadow swept over his face; and, as with the sudden memory of bootless rage, his white lips glued together.

This is some mulish mutineer, thought Captain Delano, surveying, not without a mixture of admiration, the colossal form of the Negro.

"See, he waits your question, master," said the servant.

Thus reminded, Don Benito, nervously averting his glance, as if shunning, by anticipation, some rebellious response, in a disconcerted voice, thus spoke:—

"Atufal, will you ask my pardon now?"

The black was silent

"Again, master," murmured the servant, with bitter upbraiding eyeing his countryman, "again, master; he will bend to master yet."

"Answer," said Don Benito, still averting his glance, say but the one word. *pardon*. and your chains shall be off."

Upon this, the black, slowly raising both arms, let them lifelessly fall, his links clanking, his head bowed; so much as to say, "No, I am content."

"Go," said Don Benito, with inkept and unknown emotion.

Deliberately as he had come, the black obeyed.

"Excuse me, Don Benito," said Captain Delano, "but this scene surprises me, what means it, pray?"

"It means that that Negro alone, of all the band, has given me peculiar cause of offence. I have put him in chains, I—"

Here he paused, his hand to his head, as if there were a swimming there, or a sudden bewilderment of memory had come over him, but meeting his servant's kindly glance seemed reassured, and proceeded —

"I could not scourge such a form. But I told him he must ask my pardon. As yet he has not. At my command, every two hours he stands before me."

"And how long has this been?"

"Some sixty days "

"And obedient in all else? And respectful?"

"Yes."

"Upon my conscience, then," exclaimed Captain Delano, impulsively, "he has a royal spirit in him, this fellow."

"He may have some right to it," bitterly returned Don Benito, "he says he was king in his own land "

"Yes," said the servant, entering a word, "those slits 70 in Atufal's ears once held wedges of gold, but poor Babo here, in his own land, was only a poor slave, a black man's slave was Babo, who now is the white's."

Somewhat annoyed by these conversational familiarities, Captain Delano turned curiously upon the attendant, then glanced inquiringly at his master, but, as if long wonted to these little informalities, neither master nor man seemed to understand him

"What, pray, was Atufal's offence, Don Benito?" asked Captain Delano; "if it was not something very serious, 80 take a fool's advice, and, in view of his general docility, as well as in some natural respect for his spirit, remit him his penalty."

"No, no, master never will do that," here murmured the servant to himself, "proud Atufal must first ask master's pardon. The slave there carries the padlock, but master here carries the key."

His attention thus directed, Captain Delano now noticed for the first time, that, suspended by a slender silken cord, from Don Benito's neck, hung a key. At 90

once, from the servant's muttered syllables, divining the key's purpose, he smiled and said—"So, Don Benito—padlock and key—significant symbols, truly."

Biting his lip, Don Benito faltered.

Though the remark of Captain Delano, a man of such native simplicity as to be incapable of satire or irony, had been dropped in playful allusion to the Spaniard's singularly evidenced lordship over the black, yet the hypochondriac seemed in some way to have taken it as
10 a malicious reflection upon his confessed inability thus far to break down, at least, on a verbal summons, the entrenched will of the slave. Deploring this supposed misconception, yet despairing of correcting it, Captain Delano shifted the subject; but finding his companion more than ever withdrawn, as if still sourly digesting the
lees of the presumed affront above-mentioned, by-and-by Captain Delano likewise became less talkative, oppressed,
against his own will, by what seemed the secret vindictiveness of the morbidly sensitive Spaniard. But the
20 good sailor, himself of a quite contrary disposition, refrained, on his part, alike from the appearance as from the feeling of resentment, and if silent, was only so from contagion.

Presently the Spaniard, assisted by his servant, somewhat discourteously crossed over from his guest, a procedure which, sensibly enough, might have been allowed to pass for idle caprice of ill-humor, had not master and man, lingering round the corner of the elevated skylight, began whispering together in low voices. This was un-
30 pleasing. And more: the moody air of the Spaniard, which at times had not been without a sort of valetudinarian stateliness, now seemed anything but dignified; while the menial familiarity of the servant lost its original charm of simple-hearted attachment.

In his embarrassment, the visitor turned his face to the other side of the ship. By so doing, his glance accidentally fell on a young Spanish sailor, a coil of rope in his hand, just stepped from the deck to the first round of the mizzen-rigging. Perhaps the man would not have
40 been particularly noticed, were it not that, during his ascent to one of the yards, he, with a sort of covert intentness, kept his eye fixed on Captain Delano, from whom, presently, it passed, as if by a natural sequence, to the two whisperers.

His own attention thus redirected to that quarter, Captain Delano gave a slight start. From something in Don

Benito's manner just then, it seemed as if the visitor at least partly, been the subject of the withdrawal going on—a conjecture as little agreeable to the guest as it was little flattering to the host.

The singular alternations of courtesy and ill-will in the Spanish captain were unaccountable, and led to one of two suppositions—innocent lunacy, or conscious imposture.

But the first idea, though it might naturally occur to an indifferent observer, and, in some respects, had not hitherto been wholly a stranger to Captain Delano's mind, yet, now that, in an incipient way, he began to regard the stranger's conduct something in the nature of an intentional affront, of course the idea was virtually vacated. But if not a lunatic, what was he? Under the circumstances, would a gentleman, an honest boor, act the part now acted by his host? No man was an impostor. Some low-born adventurer, masquerading as an oceanic grandee, yet so ignorant of the first requisites of mere gentlemanhood as to be ignorant of the present remarkable indecorum. That ceremoniousness, too, at other times evinced, seemed uncharacteristic of one playing a part above his level. Benito Cereno—Don Benito Cereno—a strange name. One, too, at that period, not unknown, by surname, to supercargoes and sea captains trading to the Spanish Main, as belonging to one of the most surprising and extensive mercantile families in all the provinces, several members of it having titles; a Castilian Rothschild, with a noble brother, or cousin, in every great trading town of South America. The Don Benito was in early manhood, about twenty-three or thirty. To assume a sort of roving cadetship in the time affairs of such a house, what more likely scheme than to assume a young knave of talent and spirit? But the Spaniard was a pale invalid. Never mind. For even to the art of simulating mortal disease, the craft of some trick had been known to attain. To think that, under the aspect of infantile weakness, the most savage enmity might be couched—those velvets of the Spaniard's face, the silky paw to his fangs.

From no train of thought did these fancies come.

76 Rothschild. The Rothschilds were a family of wealthy bankers who flourished first in Germany and later in England from the eighteenth to the present century.

from within, but from without, suddenly, too, and in one throng, like hoar frost, yet as soon to vanish as the mild sun of Captain Delano's good-nature regained its meridian.

Glancing over once more towards his host—whose side-face, revealed above the skylight, was now turned toward him—he was struck by the profile, whose clearness of cut was refined by the thinness incident to ill-health, as well as ennobled about the chin by the beard. 60
Away with suspicion. He was a true off-shoot of a true *hidalgo* Cereno.

Relieved by these and other better thoughts, the visitor, lightly humming a tune, now began indifferently pacing the poop, so as not to betray to Don Benito that he had at all mistrusted incivility, much less duplicity, for such mistrust would yet be proved illusory, and by the event, though, for the present, the circumstance which had provoked that distrust remained unexplained. But when that little mystery should have been cleared up, Captain 65
Delano thought he might extremely regret it, did he allow Don Benito to become aware that he had indulged in ungenerous surmises. In short, to the Spaniard's black-letter text, it was best, for a while, to leave open margin.

Presently, his pale face twitching and overcast, the Spaniard, still supported by his attendant, moved over towards his guest, when, with even more than his usual embarrassment, and a strange sort of intriguing intonation in his husky whisper, the following conversation began —

"Señor, may I ask how long you have lain at this isle?"

"Oh, but a day or two, Don Benito."

"And from what port are you last?"

"Canton."

"And there, Señor, you exchanged your seal-skins for teas and silks, I think you said?"

"Yes. Silks, mostly."

"And the balance you took in specie, perhaps?"

Captain Delano, fidgeting a little, answered—

"Yes, some silver, not a very great deal, though."

"Ah—well. May I ask how many men have you, Señor?"

Captain Delano slightly started, but answered—

"About five-and-twenty, all told."

"And at present, Señor, all on board, I suppose?"

"All on board, Don Benito," replied the Captain, now with satisfaction.

"And will be to-night, Señor?"

At this last question, following so many pertinacious ones, for the soul of him Captain Delano could not but look very earnestly at the questioner, who, instead of meeting the glance, with every token of craven discomposure dropped his eyes to the deck, presenting an unworthy contrast to his servant, who, just then, was kneeling at his feet, adjusting a loose shoe-buckle, his disengaged face meantime, with humble curiosity, turned openly up into his master's downcast one.

The Spaniard, still with a guilty shuffle, repeated his question.

"And—and will be to-night, Señor?"

"Yes, for aught I know," returned Captain Delano— 60
"but nay," rallying himself into fearless truth, "some of them talked of going off on another fishing party about midnight."

"Your ships generally go—go more or less armed, I believe, Señor?"

"Oh, a six-pounder or two, in case of emergency," was the intrepidly indifferent reply, "with a small stock of muskets, sealing-spears, and cutlasses, you know."

As he thus responded, Captain Delano again glanced at Don Benito, but the latter's eyes were averted, while 70
abruptly and awkwardly shifting the subject, he made some peevish allusion to the calm, and then, without apology, once more, with his attendant, withdrew to the opposite bulwarks, where the whispering was resumed.

At this moment, and ere Captain Delano could cast a cool thought upon what had just passed, the young Spanish sailor, before mentioned, was seen descending from the rigging. In act of stooping over to spring inboard to the deck, his voluminous, unconfined frock, or shirt, of coarse woolen, much spotted with tar, opened out far 80
down the chest, revealing a soiled under garment of what seemed the finest linen, edged, about the neck, with a narrow blue ribbon, sadly faded and worn. At this moment the young sailor's eye was again fixed on the whisperers, and Captain Delano thought he observed a

11 *hidalgo*, a title denoting a Spanish nobleman • 22 **black-letter**, a style of type, also known as Gothic or Old English, which was copied by the early printers from a form of manuscript letter current at the time. The phrase in this connection connotes strangeness and unfamiliarity • 23 **open margin**, without marginal gloss or commentary • 33 **Canton**, in China

lurking significance in it, as if silent signs, of some Freemason sort, had that instant been interchanged.

This once more impelled his own glance in the direction of Don Benito, and, as before, he could not but infer that himself formed the subject of the conference. He paused. The sound of the hatchet-polishing fell on his ears. He cast another swift side-look at the two. They had the air of conspirators. In connection with the late questionings, and the incident of the young sailor, these things now begat such return of involuntary suspicion, that the singular guilelessness of the American could not endure it. Plucking up a gay and humorous expression, he crossed over to the two rapidly, saying:—"Ha, Don Benito, your black here seems high in your trust, a sort of privy-counsellor, in fact."

Upon this, the servant looked up with a good-natured grin, but the master started as from a venomous bite. It was a moment or two before the Spaniard sufficiently recovered himself to reply, which he did, at last, with cold constraint—"Yes, Señor, I have trust in Babo."

Here Babo, changing his previous grin of mere animal humor into an intelligent smile, not ungratefully eyed his master.

Finding that the Spaniard now stood silent and reserved, as if involuntarily, or purposely giving hint that his guest's proximity was inconvenient just then, Captain Delano, unwilling to appear uncivil even to incivility itself, made some trivial remark and moved off; again and again turning over in his mind the mysterious demeanor of Don Benito Cereno.

He had descended from the poop, and, wrapped in thought, was passing near a dark hatchway, leading down into the steerage, when, perceiving motion there, he looked to see what moved. The same instant there was a sparkle in the shadowy hatchway, and he saw one of the Spanish sailors, prowling there, hurriedly placing his hand in the bosom of his frock, as if hiding something. Before the man could have been certain who it was that was passing, he slunk below out of sight. But enough was seen of him to make it sure that he was the same young sailor before noticed in the rigging.

What was that which so sparkled? thought Captain Delano. It was no lamp—no match—no live coal. Could it have been a jewel? But how come sailors with jewels?—or with silk-trimmed under-shirts either? Has he been robbing the trunks of the dead cabin-passengers? But

if so, he would hardly wear one of the stolen board ship here. Ah, ah—if, now, that was, secret sign I saw passing between this suspicion and his captain awhile since; if I could only that, in my uneasiness, my senses did not desert—

Here, passing from one suspicious thing to another, his mind revolved the strange questions put to him in his ship.

By a curious coincidence, as each point was the black wizards of Ashantee would strike up with hatchets, as in ominous comment on the white man's thoughts. Pressed by such enigmas and portents, have been almost against nature, had not, even least distrustful heart, some ugly misgivings crossed

Observing the ship now helplessly fallen into the current, with enchanted sails, drifting with increasing rapidity seaward; and noting that, from a lately into projection of the land, the sealer was hidden, the mariner began to quake at thoughts which he durst confess to himself. Above all, he began to ghostly dread of Don Benito. And yet when he himself, dilated his chest, felt himself strong on land and coolly considered it—what did all these phantasies amount to?

Had the Spaniard any sinister scheme, it must have reference not so much to him (Captain Delano) as to his ship (the *Bachelor's Delight*). Hence the drifting away of the one ship from the other, insidiously favoring any such possible scheme, was, for the time at least, opposed to it. Clearly any suspicion, coming from such contradictions, must needs be delusive. Besides, it is not absurd to think of a vessel in distress—a vessel by sickness almost dismanned of her crew—a vessel whose inmates were parched for water—was it not a thousand times absurd that such a craft should, at present, exhibit a piratical character; or her commander, either for himself or those under him, cherish any desire but for speedy relief and refreshment? But then, might not the distress, and thirst in particular, be affected? And might not that same undiminished Spanish crew, alleged to have perished off to a remnant, be at that very moment lurking in the hold? On heart-broken pretence of entre-

a cup of cold water, fiends in human form had got into lonely dwellings, nor retired until a dark deed had been done. And among the Malay pirates, it was no unusual thing to lure ships after them into their treacherous harbors, or entice boarders from a declared enemy at sea, by the spectacle of thinly manned or vacant decks, beneath which prowled a hundred spears with yellow arms ready to upthrust them through the mats. Not that Captain Delano had entirely credited such things. He had heard of them—and now, as stories, they recurred. The present destination of the ship was the anchorage. There she would be near his own vessel. Upon gaining that vicinity, might not the San Dominick, like a slumbering volcano, suddenly let loose energies now hid?

He recalled the Spaniard's manner while telling his story. There was a gloomy hesitancy and subterfuge about it. It was just the manner of one making up his tale for evil purposes, as he goes. But if that story was not true, what was the truth? That the ship had unlawfully come into the Spaniard's possession? But in many of its details, especially in reference to the more calamitous parts, such as the fatalities among the seamen, the consequent prolonged beating about, the past sufferings from obstinate calms, and still continued suffering from thirst; in all these points, as well as others, Don Benito's story had corroborated not only the wailing ejaculations of the indiscriminate multitude, white and black, but likewise—what seemed impossible to be counterfeit—by the very expression and play of every human feature, which Captain Delano saw. If Don Benito's story was, throughout, an invention, then every soul on board, down to the youngest Negress, was his carefully drilled recruit in the plot—an incredible inference. And yet, if there was ground for mistrusting his veracity, that inference was a legitimate one.

But those questions of the Spaniard. There, indeed, one might pause. Did they not seem put with much the same object with which the burglar or assassin, by daytime, reconnoitres the walls of a house? But, with ill purposes, to solicit such information openly of the chief person endangered, and so, in effect, setting him on his guard; how unlikely a procedure was that. Absurd, then, to suppose that those questions had been prompted by evil designs. Thus, the same conduct, which, in this instance, had raised the alarm, served to dispel it. In short, scarce any suspicion or uneasiness, however ap-

parently reasonable at the time, which was not now, with equal apparent reason, dismissed.

At last, he began to laugh at his former forebodings; and laugh at the strange ship for, in its aspect somehow siding with them, as it were, and laugh, too, at the odd-looking blacks, particularly those old scissors-grinders, the Ashantees, and those bed-ridden old knitting women, the oakum-pickers, and almost at the dark Spaniard himself, the central hobgoblin of all.

For the rest, whatever in a serious way seemed enigmatical, was now good-naturedly explained away by the thought that, for the most part the poor invalid scarcely knew what he was about; either sulking in black vapors, or putting idle questions without sense or object. Evidently, for the present, the man was not fit to be entrusted with the ship. On some benevolent plea withdrawing the command from him, Captain Delano would yet have to send her to Conception in charge of his second mate, a worthy person and good navigator—a plan not more convenient for the San Dominick than for Don Benito, for, relieved from all anxiety, keeping wholly to his cabin, the sick man, under the good nursing of his servant, would probably, by the end of the passage, be in a measure restored to health, and with that he should also be restored to authority.

Such were the American's thoughts. They were tranquilizing. There was a difference between the idea of Don Benito's darkly pre-ordaining Captain Delano's fate, and Captain Delano's lightly arranging Don Benito's. Nevertheless, it was not without something of relief that the good seaman presently perceived his whale-boat in the distance. Its absence had been prolonged by unexpected detention at the sealer's side, as well as its returning trip lengthened by the continual recession of the goal.

The advancing speck was observed by the blacks. Their shouts attracted the attention of Don Benito, who, with a return of courtesy, approaching Captain Delano, expressed satisfaction at the coming of some supplies, slight and temporary as they must necessarily prove.

Captain Delano responded, but while doing so, his attention was drawn to something passing on the deck below among the crowd climbing the landward bulwarks, anxiously watching the coming boat, two blacks, to all appearances accidentally incommoded by one of the sailors, violently pushed him aside, which the sailor

someway resenting, they dashed him to the deck, despite the earnest cries of the oakum-pickers

"Don Benito," said Captain Delano quickly, "do you see what is going on there? Look!"

But, seized by his cough, the Spaniard staggered, with both hands to his face, on the point of falling. Captain Delano would have supported him, but the servant was more alert, who, with one hand sustaining his master, with the other applied the cordial. Don Benito restored, the black withdrew his support, slipping aside a little, but dutifully remaining within call of a whisper. Such discretion was here evinced as quite wiped away, in the visitor's eyes, any blemish of impropriety which might have attached to the attendant, from the indecorous conferences before mentioned; showing, too, that if the servant were to blame, it might be more the master's fault than his own, since, when left to himself, he could conduct thus well.

His glance called away from the spectacle of disorder to the more pleasing one before him, Captain Delano could not avoid again congratulating his host upon possessing such a servant, who, though perhaps a little too forward now and then, must upon the whole be invaluable to one in the invalid's situation.

"Tell me, Don Benito," he added, with a smile—"I should like to have your man here, myself—what will you take for him? Would fifty doubloons be any object?"

"Master wouldn't part with Babo for a thousand doubloons," murmured the black, overhearing the offer, and taking it in earnest, and, with the strange vanity of a faithful slave, appreciated by his master, scorning to hear so paltry a valuation put upon him by a stranger. But Don Benito, apparently hardly yet completely restored, and again interrupted by his cough, made but some broken reply.

Soon his physical distress became so great, affecting his mind, too, apparently, that, as if to screen the sad spectacle, the servant gently conducted his master below.

Left to himself, the American, to while away the time till his boat should arrive, would have pleasantly accosted some one of the few Spanish seamen he saw, but recalling something that Don Benito had said touching their ill conduct, he refrained; as a ship-master indisposed to countenance cowardice or unfaithfulness in seamen.

While, with these thoughts, standing with eye di-

rected forward toward that handful of sailors, he thought that one or two of them returned thence and with a sort of meaning. He rubbed his eyes and looked again; but again seemed to see the same. Under a new form, but more obscure than any other, the old suspicions recurred, but, in the absence of Don Benito, with less of panic than before. Despairing of a bad account given of the sailors, Captain Delano resolved forthwith to accost one of them. Descending thence, he made his way through the blacks, his mind drawing a queer cry from the oakum-pickers, partly by whom, the Negroes, twitching each other as if divided before him; but, as if curious to see what the object of this deliberate visit to their Ghetto, came behind, in tolerable order, followed the white stranger. His progress thus proclaimed as by mounted knights, arms, and escorted as by a Caffre guard of honor, Captain Delano, assuming a good-humored, off-handed air, continued to advance; now and then saying a blithe word to the Negroes, and his eye curiously surveying the faces, here and there sparsely mixed in with the black like stray white pawns venturously involved in the game of the chess-men opposed.

While thinking which of them to select for his purpose, he chanced to observe a sailor seated on the deck engaged in tarring the strap of a large block, a circle of blacks squatted round him inquisitively eyeing the process.

The mean employment of the man was in contrast with something superior in his figure. His hand, black and continually thrusting it into the tar-pot held for him by a Negro, seemed not naturally allied to his face, a face which would have been a very fine one but for its haggardness. Whether this haggardness had anything to do with criminality, could not be determined; since intense heat and cold, though unlike, produce like sensations, so innocence and guilt, when, through casual association with mental pain, stamping any visible mark upon the face, press, use one seal—a hacked one.

18 conduct. According to Bartlett's Dictionary of Americanisms (1848) quoted in the Dictionary of American English, the intransitive use of the verb "conduct" without the reflexive pronoun was common in England, both in speech and in writing. Bartlett deplored the usage as an "offensive barbarism." • 62 kings-at-arms, the chief hereditary officers of England • 63 Caffre, Kafir, a tribe of South Africa

Not again that this reflection occurred to Captain Delano at the time, charitable man as he was. Rather another idea. Because observing so singular a haggardness combined with a dark eye, averted as in trouble and shame, and then, again recalling Don Benito's confessed ill opinion of his crew, insensibly he was operated upon by certain general notions which, while disconnecting pain and abashment from virtue, invariably link them with vice.

10 If, indeed, there be any wickedness on board this ship, thought Captain Delano, be sure that man there has fouled his hand in it, even as now he fouls it in the pitch. I don't like to accost him. I will speak to this other, this old Jack here on the windlass.

He advanced to an old Barcelona tar, in ragged red breeches and dirty nightcap, cheeks trenched and bronzed, whiskers dense as thorn hedges. Seated between two sleepy-looking Africans, this mariner, like his younger shipmate, was employed upon some rigging—splicing
20 a cable—the sleepy-looking blacks performing the inferior function of holding the outer parts of the ropes for him.

Upon Captain Delano's approach, the man at once hung his head below its previous level, the one necessary for business. It appeared as if he desired to be thought absorbed, with more than common fidelity, in his task. Being addressed, he glanced up, but with what seemed a furtive, diffident air, which sat strangely enough on his weather-beaten visage, much as if a grizzly bear, instead of growling and biting, should snarl and cast sheep's eyes. He was asked several questions concerning the voyage—questions purposely referring to several particulars in Don Benito's narrative, not previously corroborated by those impulsive cries greeting the visitor on first coming on board. The questions were briefly answered, confirming all that remained to be confirmed of the story. The Negroes about the windlass joined in with the old sailor; but, as they became talkative, he by degrees became mute, and at length quite glum, seemed morosely unwilling to answer more questions, and yet, all the while, this ursine air was somehow mixed with his sheepish one.

Despairing of getting into unembarrassed talk with such a centaur, Captain Delano, after glancing round for a more promising countenance, but seeing none, spoke pleasantly to the blacks to make way for him; and so,

amid various grins and grimaces, returned to the poop, feeling a little strange at first, he could hardly tell why, but upon the whole with regained confidence in Benito Cereno.

How plainly, thought he, did that old whiskerando yonder betray a consciousness of ill desert. No doubt, when he saw me coming, he dreaded lest I, apprised by his Captain of the crew's general misbehavior, came with sharp words for him, and so down with his head. And yet—and yet, now that I think of it, that very old fellow, if I err not, was one of those who seemed so earnestly eyeing me here awhile since. Ah, these currents spin one's head around almost as much as they do the ship. Ha! there now's a pleasant sort of sunny sight, quite
sociable, too.

His attention had been drawn to a slumbering Negress, partly disclosed through the lace-work of some rigging, lying, with youthful limbs carelessly disposed, under the lee of the bulwarks, like a doe in the shade of a woodland rock. Sprawling at her lapped breasts, was her wide-awake fawn, stark naked, its black little body half lifted from the deck, crosswise with its dam's, its hands, like two paws, clambering upon her, its mouth and nose ineffectually rooting to get at the mark, and meantime
70 giving a vexatious half-grunt, blending with the composed snore of the Negress.

The uncommon vigor of the child at length roused the mother. She started up, at a distance facing Captain Delano. But as if not at all concerned at the attitude in which she had been caught, delightedly she caught the child up, with maternal transports, covering it with kisses.

There's naked nature, now; pure tenderness and love, thought Captain Delano, well pleased.

This incident prompted him to remark the other
80 Negresses more particularly than before. He was gratified with their manners, like most uncivilized women, they seemed at once tender of heart and tough of constitution, equally ready to die for their infants or fight for them. Unsophisticated as leopardesses; loving as doves. Ah! thought Captain Delano, these, perhaps, are some of the very women whom Ledyard saw in Africa, and gave such a noble account of.

15 Barcelona, a seaport in Spain • 87 Ledyard, John Ledyard (1751-1788), American traveler

These natural sights somehow insensibly deepened his confidence and ease. At last he looked to see how his boat was getting on; but it was still pretty remote. He turned to see if Don Benito had returned, but he had not.

To change the scene, as well as to please himself with a leisurely observation of the coming boat, stepping over into the mizzen-chains, he clambered his way into the starboard quarter-gallery—one of those abandoned Venetian-looking water-balconies previously mentioned—re-
10 treats cut off from the deck. As his foot pressed the half-damp, half-dry sea-mosses matting the place, and a chance phantom cats-paw—an islet of breeze, unheralded, unfollowed—as this ghostly cats-paw came fanning his cheek; as his glance fell upon the row of small, round dead-lights—all closed like coppered eyes of the confined—and the state-cabin door, once connecting with the gallery, even as the dead-lights had once looked out upon it, but now calked fast like a sarcophagus lid, and to a purple-black, tarred-over panel, threshold,
20 and post, and he bethought him of the time, when that state-cabin and this state-balcony had heard the voices of the Spanish king's officers, and the forms of the Lima viceroy's daughters had perhaps leaned where he stood—as these and other images flitted through his mind, as the cats-paw through the calm, gradually he felt rising a dreamy inquietude, like that of one who alone on the prairie feels unrest from the repose of the noon.

He leaned against the carved balustrade, again looking off toward his boat; but found his eye falling upon the
30 ribbon grass, trailing along the ship's waterline, straight as a border of green box; and parterres of sea-weed, broad ovals and crescents, floating nigh and far, with what seemed long formal alleys between, crossing the terraces of swells, and sweeping round as if leading to the grottoes below. And overhanging all was the balustrade by his arm, which, partly stained with pitch and partly embossed with moss, seemed the charred ruin of some summer-house in a grand garden long running to waste.

Trying to break one charm, he was but becharmed
40 anew. Though upon the wide sea, he seemed in some far inland country; prisoner in some deserted chateau, left to stare at empty grounds, and peer out at vague roads, where never wagon or wayfarer passed.

But these enchantments were a little disenchanted as his eye fell on the corroded main-chains. Of an ancient style, massy and rusty in link, shackle and bolt, they

seemed even more fit for the ship's present busir the one for which she had been built.

Presently he thought something moved in chains. He rubbed his eyes, and looked hard. G rigging were about the chains; and there, peering behind a great stay, like an Indian from behind lock, a Spanish sailor, a marlingspike in his ha seen, who made what seemed an imperfect gesture toward the balcony, but immediately, as if alarmed some advancing step along the deck within, vanished into the recesses of the hempen forest, like a fox.

What meant this? Something the man had sought to communicate, unbeknown to any one, even to himself. Did the secret involve aught unfavorable to himself? Were those previous misgivings of Captain Delano's about to be verified? Or, in his haunted moment, had some random, unintentional motion of the man, while busy with the stay, as if repairing, been mistaken for a significant beckoning?

Not unbewildered, again he gazed off for his boat. But it was temporarily hidden by a rocky spur of the isle. As with some eagerness he bent forward, waiting for the first shooting view of its beak, the balustrade came way before him like charcoal. Had he not clutching the outreaching rope he would have fallen into the sea. The crash, though feeble, and the fall, though heeded of the rotten fragments, must have been overheard and glanced up. With sober curiosity peering down upon him was one of the old oakum-pickers, slipped from his perch to an outside boom; while below the old Nantux and, invisible to him, reconnoitering from a port hole like a fox from the mouth of its den, crouched the Spanish sailor again. From something suddenly suggested by the man's air, the mad idea now darted into Captain Delano's mind, that Don Benito's plea of indisposition in withdrawing below, was but a pretense that he was engaged there maturing his plot, of which the sailor was by some means gaining an inkling, had a mind to vex the stranger against, incited, it may be, by gratitude for a kind word on first boarding the ship. Was it far from foreseeing some possible interference like this, that Captain Benito had, beforehand, given such a bad character to his sailors, while praising the Negroes, though, indeed, the former seemed as docile as the latter the contrary. The whites, too, by nature, were the shrewder race. A man with some evil design, would he not be likely

10 speak well of that stupidity which was blind to his depravity, and malign that intelligence from which it might not be hidden? Not unlikely, perhaps. But if the whites had dark secrets concerning Don Benito, could then Don Benito be any way in complicity with the blacks? But they were too stupid. Besides, who ever heard of a white so far a renegade as to apostatize from his very species almost, by leaguings against it with Negroes? These difficulties recalled former ones. Lost in their mazes, Captain Delano, who had now regained the deck, was uneasily advancing along it, when he observed a new face; an aged sailor seated cross-legged near the main hatchway. His skin was shrunk up with wrinkles like a pelican's empty pouch; his hair frosted, his countenance grave and composed. His hands were full of ropes, which he was working into a large knot. Some blacks were about him obligingly dipping the strands for him, here and there, as the exigencies of the operation demanded.

20 Captain Delano crossed over to him, and stood in silence surveying the knot, his mind, by a not uncongenial transition, passing from its own entanglements to those of the hemp. For intricacy such a knot he had never seen in an American ship, or indeed any other. The old man looked like an Egyptian priest, making Gordian knots for the temple of Ammon. The knot seemed a combination of double-bowline-knot, treble-crown-knot, back-handed-well-knot, knot-in-and-out-knot, and jamming-knot.

At last, puzzled to comprehend the meaning of such a knot, Captain Delano addressed the knotter.—

"What are you knotting there, my man?"

"The knot," was the brief reply, without looking up.

"So it seems, but what is it for?"

"For some one else to undo," muttered back the old man, plying his fingers harder than ever, the knot being now nearly completed.

While Captain Delano stood watching him, suddenly the old man threw the knot toward him, saying in broken English,—the first heard in the ship,—something to this effect: "Undo it, cut it, quick." It was said lowly, but with such condensation of rapidity, that the long, slow words in Spanish, which had preceded and followed, almost operated as covers to the brief English between.

For a moment, knot in hand, and knot in head, Captain Delano stood mute, while, without further heeding him the old man was now intent upon other ropes.

Presently there was a slight stir behind Captain Delano. Turning, he saw the chained Negro, Atufal, standing quietly there. The next moment the old sailor rose, muttering, and, followed by his subordinate Negroes, removed to the forward part of the ship, where in the crowd he disappeared.

An elderly Negro, in a clout like an infant's, and with a pepper and salt head, and a kind of attorney air, now approached Captain Delano. In tolerable Spanish, and with a good-natured, knowing wink, he informed him that the old knotter was simple-witted, but harmless; often playing his odd tricks. The Negro concluded by begging the knot, for of course the stranger would not care to be troubled with it. Unconsciously, it was handed to him. With a sort of congé, the Negro received it, and, turning his back, ferreted into it like a detective custom-house officer after smuggled laces. Soon, with some African word, equivalent to pshaw, he tossed the knot overboard.

All this is very queer now, thought Captain Delano, with a qualmish sort of emotion; but, as one feeling incipient sea-sickness, he strove, by ignoring the symptoms, to get rid of the malady. Once more he looked off for his boat. To his delight, it was now again in view, leaving the rocky spur astern.

The sensation here experienced, after at first relieving his uneasiness, with unforeseen efficacy soon began to remove it. The less distant sight of that well-known boat—showing it, not as before, half blended with the haze, but with outline defined, so that its individuality, like a man's, was manifest, that boat, *Rover* by name, which, though now in strange seas, had often pressed the beach of Captain Delano's home, and, brought to its threshold for repairs, had familiarly lain there, as a Newfoundland dog, the sight of that household boat evoked a thousand trustful associations, which, contrasted with previous suspicions, filled him not only with lightsome confidence, but somehow with half humorous self-reproaches at his former lack of it.

"What, I, Amasa Delano—Jack of the Beach, as they called me when a lad—I, Amasa; the same that, duck-satchel in hand, used to paddle along the waterside to

25 Gordian knot, in classical mythology, an intricate knot tied by Gordius and cut by Alexander the Great with his sword • 26 Ammon, Amen, an Egyptian deity

the school-house made from the old hulk—I, little Jack of the Beach, that used to go berrying with cousin Nat and the rest; I to be murdered here at the ends of the earth, on board a haunted pirate-ship by a horrible Spaniard? Too nonsensical to think of! Who would murder Amasa Delano? His conscience is clean. There is some one above. Fie, fie, Jack of the Beach! you are a child indeed; a child of the second childhood, old boy; you are beginning to dote and drule, I'm afraid."

10 Light of heart and foot, he stepped aft, and there was met by Don Benito's servant, who, with a pleasing expression, responsive to his own present feelings, informed him that his master had recovered from the effects of his coughing fit, and had just ordered him to go present his compliments to his good guest, Don Amasa, and say that he (Don Benito) would soon have the happiness to rejoin him.

There now, do you mark that? again thought Captain Delano, walking the poop. What a donkey I was. This
20 kind gentleman who here sends me his kind compliments, he, but ten minutes ago, dark-lantern in hand, was dodging round some old grind-stone in the hold, sharpening a hatchet for me, I thought. Well, well, these long calms have a morbid effect on the mind, I've often heard, though I never believed it before. Ha! glancing towards the boat; there's *Rover*; good dog; a white bone in her mouth. A pretty big bone though, seems to me.—What? Yes, she has fallen afoul of the bubbling tide-rip there. It sets her the other way, too, for the time.
30 Patience.

It was now about noon, though, from the grayness of everything, it seemed to be getting toward dusk.

The calm was confirmed. In the far distance, away from the influence of land, the leaden ocean seemed laid out and leaved up, its course finished, soul gone, defunct. But the current from landward, where the ship was, increased; silently sweeping her further and further toward the tranced waters beyond.

Still, from his knowledge of those latitudes, cherishing
40 ing hopes of a breeze, and a fair and fresh one, at any moment, Captain Delano, despite present prospects, buoyantly counted upon bringing the San Dominick safely to anchor ere night. The distance swept over was nothing; since, with a good wind, ten minutes' sailing would retrace more than sixty minutes' drifting. Meantime, one moment turning to mark *Rover* fighting the

tide-rip, and the next to see Don Benito approach continued walking the poop.

Gradually he felt a vexation arising from the his boat; this soon merged into uneasiness; and his eye falling continually, as from a stage-box pit, upon the strange crowd before and below him by-and-by, recognizing there the face—now complete indifference—of the Spanish sailor who had seen beckon from the main-chains—something of trepidations returned.

Ah, thought he—gravely enough—this is I agree: because it went off, it follows not that it come back.

Though ashamed of the relapse, he could not altogether subdue it; and so, exerting his good-nature to most, insensibly he came to a compromise.

Yes, this is a strange craft; a strange history, to strange folks on board. But—nothing more.

By way of keeping his mind out of mischief, his boat should arrive, he tried to occupy it with thoughts over and over, in a purely speculative sort of way lesser peculiarities of the captain and crew. And others, four curious points recurred:

First, the affair of the Spanish lad assailed with knife by the slave boy; an act winked at by Don Benito. Second, the tyranny in Don Benito's treatment of the black, as if a child should lead a bull of the by the ring in his nose. Third, the trampling of the by the two Negroes; a piece of insolence passed without so much as a reprimand. Fourth, the cri submission to their master of all the ships' under mostly blacks; as if by the least inadvertence they feared to draw down his despotic displeasure.

Coupling these points, they seemed somewhat contradictory. But what then, thought Captain Delano, going toward his now nearing boat—what then? Don Benito is a very capricious commander. But not the first of the sort I have seen, though it's true rather exceeds any other. But as a nation—continuing he in his reveries—these Spaniards are all an odd the very word Spaniard has a curious, conspirator, (Fawkish twang to it. And yet, I dare say, Spaniard

87 Guy-Fawkish. On November 5, 1605, Guy Fawkes attempted to set fire to barrels of gunpowder which had been placed under the English Houses of Parliament.

the main are as good folks as any in Duxbury, Massachusetts. Ah, good! At last *Roier* has come.

As, with its welcome freight, the boat touched the side, the oakum-pickers, with venerable gestures, sought to restrain the blacks, who, at the sight of three gurried water-casks in its bottom, and a pile of wilted pumpkins in its bow, hung over the bulwarks in disorderly raptures

Don Benito, with his servant, now appeared; his coming, perhaps, hastened by hearing the noise. Of him Captain Delano sought permission to serve out the water, so that all might share alike, and none injure themselves by unfair excess. But sensible, and, on Don Benito's account, kind as this offer was, it was received with what seemed impatience, as if aware that he lacked energy as a commander, Don Benito, with the true jealousy of weakness, resented as an affront any interference. So, at least, Captain Delano inferred

In another moment the casks were being hoisted in, when some of the eager Negroes accidentally jostled Captain Delano, where he stood by the gangway; so that, unmindful of Don Benito, yielding to the impulse of the moment, with good-natured authority he bade the blacks stand back; to enforce his words making use of a half-mirthful, half-menacing gesture. Instantly the blacks paused, just where they were, each Negro and Negress suspended in his or her posture, exactly as the word had found them—for a few seconds continuing so—while, as between the responsive posts of a telegraph, an unknown syllable ran from man to man among the perched oakum-pickers. While the visitor's attention was fixed by this scene, suddenly the hatchet-polishers half rose, and a rapid cry came from Don Benito

Thinking that at the signal of the Spaniard he was about to be massacred, Captain Delano would have sprung for his boat, but paused, as the oakum-pickers dropping down into the crowd with earnest exclamations, forced every white and every Negro back, at the same moment, with gestures friendly and familiar, almost jocose, bidding him, in substance, not be a fool. Simultaneously the hatchet-polishers resumed their seats, quietly as so many tailors, and at once, as if nothing had happened, the work of hoisting in the casks was resumed, whites and blacks singing at the tackle

Captain Delano glanced toward Don Benito. As he saw his meagre form in the act of recovering itself from reclining in the servant's arms, into which the agitated

invalid had fallen, he could not but marvel at the panic by which himself had been surprised on the darting supposition that such a commander, who, upon a legitimate occasion, so trivial, too, as it now appeared, could lose all self command, was, with energetic iniquity, going to bring about his murder

The casks being on deck, Captain Delano was handed a number of jars and cups by one of the steward's aids, who, in the name of his captain, entreated him to do as he had proposed—dole out the water. He complied, with republican impartiality as to this republican element, which always seeks one level, serving the oldest white no better than the youngest black, excepting, indeed, poor Don Benito, whose condition, if not rank, demanded an extra allowance. To him, in the first place, Captain Delano presented a fair pitcher of the fluid, but, thirsting as he was for it, the Spaniard quaffed not a drop until after several grave bows and salutes. A reciprocation of courtesies which the sight-loving Africans hailed with clapping hands.

Two of the less wilted pumpkins being reserved for the cabin table, the residue were minced up on the spot for the general regalement. But the soft bread, sugar, and bottled cider, Captain Delano would have given the whites alone, and in chief Don Benito, but the latter objected, which disinterestedness not a little pleased the American; and so mouthfuls all around were given alike to whites and blacks; excepting one bottle of cider, which Babo insisted upon setting aside for his master.

Here it may be observed that as, on the first visit of the boat, the American had not permitted his men to board the ship, neither did he now; being unwilling to add to the confusion of the decks.

Not uninfluenced by the peculiar good-humor at present prevailing, and for the time oblivious of any but benevolent thoughts, Captain Delano, who, from recent indications, counted upon a breeze within an hour or two at furthest, dispatched the boat back to the sealer, with orders for all the hands that could be spared immediately to set about rafting casks to the watering-place and filling them. Likewise he bade word be carried to his chief officer, that if, against present expectation, the ship was not brought to anchor by sunset, he need

5 gurried, fouled with gurry, or the offal of fish

be under no concern, for as there was to be a full moon that night, he (Captain Delano) would remain on board ready to play the pilot, come the wind soon or late.

As the two captains stood together, observing the departing boat—the servant, as it happened, having just spied a spot on his master's velvet sleeve, and silently engaged rubbing it out—the American expressed his regrets that the San Dominick had no boats; none, at least, but the unseaworthy old hulk of the long-boat, which, warped as a camel's skeleton in the desert, and almost as bleached, lay pot-wise inverted amidships, one side a little tipped, furnishing a subterraneous sort of den for family groups of the blacks, mostly women and small children, who, squatting on old mats below, or perched above in the dark dome, on the elevated seats, were descried, some distance within, like a social circle of bats, sheltering in some friendly cave; at intervals, ebon flights of naked boys and girls, three or four years old, darting in and out of the den's mouth.

"Had you three or four boats now, Don Benito," said Captain Delano, "I think that, by tugging at the oars, your Negroes here might help along matters some. Did you sail from port without boats, Don Benito?"

"They were stove in the gales, Señor."

"That was bad. Many men, too, you lost then. Boats and men. Those must have been hard gales, Don Benito."

"Past all speech," cringed the Spaniard

"Tell me, Don Benito," continued his companion with increased interest, "tell me, were these gales immediately

off the pitch of Cape Horn?"

"Cape Horn?—who spoke of Cape Horn?"

"Yourself did, when giving me an account of your voyage," answered Captain Delano, with almost equal astonishment at this eating of his own words, even as he ever seemed eating his own heart, on the part of the Spaniard. "You yourself, Don Benito, spoke of Cape Horn," he emphatically repeated.

The Spaniard turned, in a sort of stooping posture, pausing an instant, as one about to make a plunging exchange of elements, as from air to water.

At this moment a messenger-boy, a white, hurried by, in the regular performance of his function carrying the last expired half-hour forward to the forecabin, from the cabin time-piece, to have it struck at the ship's large bell

"Master," said the servant, discontinuing his work on

the coat sleeve, and addressing the rapt Spaniard sort of timid apprehensiveness, as one charged duty, the discharge of which, it was foreseen, would be irksome to the very person who had imposed it, whose benefit it was intended, "master told me mind where he was, or how engaged, always to him, to a minute, when shaving-time comes. Might I go to strike the half-hour afternoon. It is now. Will master go into the cuddy?"

"Ah—yes," answered the Spaniard, starting, as dreams into realities, then turning upon Captain Delano, he said that ere long he would resume the conversation.

"Then if master means to talk more to Don Amasa," said the servant, "why not let Don Amasa sit by in the cuddy, and master can talk, and Don Amasa listen, while Babo here lathers and strops."

"Yes," said Captain Delano, not displeased with the sociable plan, "yes, Don Benito, unless you had a better, I will go with you."

"Be it so, Señor."

As the three passed aft, the American could not think it another strange instance of his host's capriciousness, this being shaved with such uncommon punctiliousness in the middle of the day. But he deemed it more likely that the servant's anxious fidelity had something to do with the matter, inasmuch as the timely intervention served to rally his master from the mood which evidently been coming upon him.

The place called the cuddy was a light deck-cabin formed by the poop, a sort of attic to the large cabin below. Part of it had formerly been the quarters of the officers, but since their death all the partitionings had been thrown down, and the whole interior converted into one spacious and airy marine hall, for absence of fine furniture and picturesque disarray of odd appointments, somewhat answering to the wide, cluttered hall of some eccentric bachelor-squire in the country, who hangs his shooting-jacket and tobacco-pouch on deer antlers, and keeps his fishing-rod, tongs, and wading-stick in the same corner.

The similitude was heightened, if not originally suggested, by glimpses of the surrounding sea, since, in one aspect, the country and the ocean seem cousins-german.

The floor of the cuddy was matted. Overhead, four or five old muskets were stuck into horizontal holes along the beams. On one side was a claw-footed old table

lashed to the deck, a thumbed missal on it, and over it a small, meagre crucifix attached to the bulk-head. Under the table lay a dented cutlass or two, with a hacked harpoon, among some melancholy old rigging, like a heap of poor friars' girdles. There were also two long, sharp-tipped settees of Malacca cane, black with age, and uncomfortable to look at as inquisitors' racks, with a large, misshapen arm-chair, which, furnished with a rude barber's crotch at the back, working with a screw, seemed some grotesque engine of torment. A flag locker was in one corner, open, exposing various colored bunting, some rolled up, others half unrolled, still others tumbled. Opposite was a cumbrous washstand, of black mahogany, all of one block, with a pedestal, like a font, and over it a railed shelf, containing combs, brushes, and other implements of the toilet. A torn hammock of stained grass swung near, the sheets tossed, and the pillow wrinkled up like a brow, as if whoever slept here slept but illy, with alternate visitations of sad thoughts and bad dreams.

The further extremity of the cuddy, overhanging the ship's stern, was pierced with three openings, windows or port-holes, according as men or cannon might peer, socially or unsocially, out of them. At present neither men nor cannon were seen, though huge ring-bolts and other rusty iron fixtures of the woodwork hinted of twenty-four-pounders.

Glancing toward the hammock as he entered, Captain Delano said, "You sleep here, Don Benito?"

"Yes, Señor, since we got into mild weather."

"This seems a sort of dormitory, sitting-room, sail-loft, chapel, armory, and private closet all together, Don Benito," added Captain Delano, looking round.

"Yes, Señor; events have not been favorable to much order in my arrangements."

Here the servant, napkin on arm, made a motion as if waiting his master's good pleasure. Don Benito signified his readiness, when, seating him in the Malacca arm-chair, and for the guest's convenience drawing opposite one of the settees, the servant commenced operations by throwing back his master's collar and loosening his cravat.

There is something in the Negro which, in a peculiar way, fits him for avocations about one's person. Most Negroes are natural valets and hair-dressers; taking to the comb and brush congenially as to the castinets, and

flourishing them apparently with almost equal satisfaction. There is, too, a smooth tact about them in this employment, with a marvelous, noiseless, gliding briskness, not ungraceful in its way, singularly pleasing to behold, and still more so to be the manipulated subject of. And above all is the great gift of good-humor. Not the mere grin or laugh is here meant. Those were unsuitable. But a certain easy cheerfulness, harmonious in every glance and gesture, as though God had set the whole Negro to some pleasant tune.

When to this is added the docility arising from the unaspiring contentment of a limited mind, and that susceptibility of blind attachment sometimes inhering in indisputable inferiors, one readily perceives why those hypochondriacs, Johnson and Byron—it may be something like the hypochondriac, Benito Cereno—took to their hearts, almost to the exclusion of the entire white race, their serving men, the Negroes, Barber and Fletcher. But if there be that in the Negro which exempts him from the inflicted sourness of the morbid or cynical mind, how, in his most prepossessing aspects, must he appear to a benevolent one? When at ease with respect to exterior things, Captain Delano's nature was not only benign, but familiarly and humorously so. At home, he had often taken rare satisfaction in sitting in his door, watching some free man of color at his work or play. If on a voyage he chanced to have a black sailor, invariably he was on chatty, and half-gamesome terms with him. In fact, like most men of a good, blithe heart, Captain Delano took to Negroes, not philanthropically, but genially, just as other men to Newfoundland dogs.

Hitherto the circumstances in which he found the San Dominick had repressed the tendency. But in the cuddy, relieved from his former uneasiness, and, for various reasons, more sociably inclined than at any previous period of the day, and seeing the colored servant, napkin on arm, so debonair about his master, in a business so familiar as that of shaving, too, all his old weakness for Negroes returned.

Among other things, he was amused with an odd instance of the African love of bright colors and fine shows, in the black's informally taking from the flag-locker a great piece of bunting of all hues, and lavishly tucking it under his master's chin for an apron.

The mode of shaving among the Spaniards is a little different from what it is with other nations. They have

a basin, specifically called a barber's basin, which on one side is scooped out, so as accurately to receive the chin, against which it is closely held in lathering; which is done, not with a brush, but with soap dipped in the water of the basin and rubbed on the face.

In the present instance salt-water was used for lack of better; and the parts lathered were only the upper lip, and low down under the throat, all the rest being cultivated beard.

10 The preliminaries being somewhat novel to Captain Delano he sat curiously eying them, so that no conversation took place, nor, for the present, did Don Benito appear disposed to renew any.

Setting down his basin, the Negro searched among the razors, as for the sharpest, and having found it, gave it an additional edge by expertly stropping it on the firm, smooth, oily skin of his open palm; he then made a gesture as if to begin, but midway stood suspended for an instant, one hand elevating the razor, the other professionally dabbling among the bubbling suds on the Spaniard's lank neck. Not unaffected by the close sight of the gleaming steel, Don Benito nervously shuddered; his usual ghastliness was heightened by the lather, which lather, again, was intensified in its hue by the contrasting sootiness of the Negro's body. Altogether the scene was somewhat peculiar, at least to Captain Delano, nor, as he saw the two thus postured, could he resist the vagary, that in the black he saw a headsman, and in the white a man at the block. But this was one of those
20 antic conceits, appearing and vanishing in a breath, from which, perhaps, the best regulated mind is not always free.

Meantime the agitation of the Spaniard had a little loosened the bunting from around him, so that one broad fold swept curtain-like over the chair-arm to the floor, revealing, amid a profusion of armorial bars and ground-colors—black, blue and yellow—a closed castle in a blood-red field diagonal with a lion rampant in a white.

"The castle and the lion," exclaimed Captain Delano—"why, Don Benito, this is the flag of Spain you use here.
40 It's well it's only I, and not the King, that sees this," he added with a smile, "but"—turning toward the black,— "it's all one, I suppose, so the colors be gay," which playful remark did not fail somewhat to tickle the Negro.

"Now, master," he said, readjusting the flag, and pressing the head gently further back into the crotch of the chair; "now, master," and the steel glanced nigh the throat.

Again Don Benito faintly shuddered

"You must not shake so, master. See, Don master always shakes when I shave him. And ye knows I never yet have drawn blood, though it's master will shake so, I may some of these time master," he continued. "And now, Don Amasa, p on with your talk about the gale, and all that; ma hear, and between times, master can answer"

"Ah yes, these gales," said Captain Delano; "more I think of your voyage, Don Benito, the wonder, not at the gales, terrible as they must have but at the disastrous interval following them. For by your account, have you been these two months more getting from Cape Horn to St. Maria, a c which I myself, with a good wind, have sailed in days. True, you had calms, and long ones, but to calmed for two months, that is, at least, unusual Don Benito, had almost any other gentleman to such a story, I should have been half disposed to incredulity"

Here an involuntary expression came over the Spaniard similar to that just before on the deck, and when he was the start he gave, or a sudden gawky roll of the head in the calm, or a momentary unsteadiness of the sea hand, however it was, just then the razor drew spots of which stained the creamy lather under the thumb. Immediately the black barber drew back his steel, remaining in his professional attitude, back to Captain Delano, and face to Don Benito, held up the true razor, saying, with a sort of half humorous sorrow, master—you shook so—here's Babo's first blood."

No sword drawn before James the First of England no assassination in that timid King's presence, could produced a more terrified aspect than was now presented by Don Benito.

Poor fellow, thought Captain Delano, so nervous can't even bear the sight of barber's blood, and this strung, sick man, is it credible that I should have agined he meant to spill all my blood, who can't even the sight of one little drop of his own? Surely, A. Delano, you have been beside yourself this day. Tell me not when you get home, sappy Amasa. Well, well, looks like a murderer, doesn't he? More like as if him were to be done for. Well, well, this day's experience shall be a good lesson.

Meantime, while these things were running thro

the honest seaman's mind, the servant had taken the napkin from his arm, and to Don Benito had said—"But answer Don Amasa, please, master, while I wipe this ugly stuff off the razor, and strop it again."

As he said the words, his face was turned half round, so as to be alike visible to the Spaniard and the American, and seemed, by its expression, to hint, that he was desirous, by getting his master to go on with the conversation, considerably to withdraw his attention from the recent annoying accident. As if glad to snatch the offered relief, Don Benito resumed, rehearsing to Captain Delano, that not only were the calms of unusual duration, but the ship had fallen in with obstinate currents, and other things he added, some of which were but repetitions of former statements, to explain how it came to pass that the passage from Cape Horn to St. Maria had been so exceedingly long, now and then mingling with his words, incidental praises, less qualified than before, to the blacks, for their general good conduct. These particulars were not given consecutively, the servant, at convenient times, using his razor, and so, between the intervals of shaving, the story and panegyric went on with more than usual huskiness.

To Captain Delano's imagination, now again not wholly at rest, there was something so hollow in the Spaniard's manner, with apparently some reciprocal hollowness in the servant's dusky comment of silence, that the idea flashed across him, that possibly master and man, for some unknown purpose, were acting out, both in word and deed, nay, to the very tremor of Don Benito's limbs, some juggling play before him. Neither did the suspicion of collusion lack apparent support, from the fact of those whispered conferences before mentioned. But then, what could be the object of enacting this play of the barber before him? At last, regarding the notion as a whimsy, insensibly suggested, perhaps, by the theatrical aspect of Don Benito in his harlequin ensign, Captain Delano speedily banished it.

The shaving over, the servant bestirred himself with a small bottle of scented waters, pouring a few drops on the head, and then diligently rubbing, the vehemence of the exercise causing the muscles of his face to twitch rather strangely.

His next operation was with comb, scissors and brush, going round and round, smoothing a curl here, clipping in unruly whisker-hair there, giving a graceful sweep to

the temple-lock, with other impromptu touches evincing the hand of a master, while, like any resigned gentleman in barber's hands, Don Benito bore all, much less uneasily, at least, than he had done the razoring, indeed, he sat so pale and rigid now, that the Negro seemed a Nubian sculptor finishing off a white statue-head.

All being over at last, the standard of Spain removed, tumbled up, and tossed back into the flag-locker, the Negro's warm breath blowing away any stray hair which might have lodged down his master's neck, collar and cravat readjusted, a speck of lint whisked off the velvet lapel, all this being done, backing off a little space, and pausing with an expression of subdued self-complacency, the servant for a moment surveyed his master, as, in toilet at least, the creature of his own tasteful hands.

Captain Delano playfully complimented him upon his achievement, at the same time congratulating Don Benito.

But neither sweet waters, nor shampooing, nor fidelity, nor sociality, delighted the Spaniard. Seeing him relapsing into forbidding gloom, and still remaining seated, Captain Delano, thinking that his presence was undesired just then, withdrew, on pretense of seeing whether, as he had prophesied, any signs of a breeze were visible.

Walking forward to the mainmast, he stood awhile thinking over the scene and not without some undefined misgivings, when he heard a noise near the cuddy, and turning saw the Negro, his hand to his cheek. Advancing, Captain Delano perceived that the cheek was bleeding. He was about to ask the cause, when the Negro's wailing soliloquy enlightened him.

"Ah, when will master get better from his sickness; only the sour heart that sour sickness breeds made him serve Babo so, cutting Babo with the razor, because, only by accident Babo had given master one little scratch, and for the first time in so many a day, too. Ah, ah, ah," holding his hand to his face.

Is it possible thought Captain Delano, was it to wreak in private his Spanish spite against this poor friend of his, that Don Benito, by his sullen manner, impelled me to withdraw? Ah, this slavery breeds ugly passions in man—Poor fellow!

He was about to speak in sympathy to the Negro, but with a timid reluctance he now re-entered the cuddy.

51 Nubian, one of the Negro tribe of Nubia, in eastern Africa

Presently master and man came forth; Don Benito leaning on his servant as if nothing had happened.

But a sort of love-quarrel, after all, thought Captain Delano.

He accosted Don Benito, and they slowly walked together. They had gone but a few paces, when the steward—a tall, rajah-looking mulatto, orientally set off with a pagoda turban formed by three or four Madras handkerchiefs wound about his head, tier on tier—approaching
10 with a salaam, announced lunch in the cabin.

On their way thither, the two captains were preceded by the mulatto, who, turning round as he advanced, with continual smiles and bows, ushered them on, a display of elegance which quite completed the insignificance of the small bare-headed Babo, who, as if not unconscious of inferiority, eyed askance the graceful steward. But in part, Captain Delano imputed his jealous watchfulness to that peculiar feeling which the full-blooded African entertains for the adulterated one. As for the steward, his manner,
20 if not bespeaking much dignity of self-respect, yet evidenced his extreme desire to please, which is doubly meritorious, as at once Christian and Chesterfieldian.

Captain Delano observed with interest that while the complexion of the mulatto was hybrid, his physiognomy was European—classically so.

"Don Benito," whispered he, "I am glad to see this usher-of-the-golden-rod of yours, the sight refutes an ugly remark once made to me by a Barbados planter; that when a mulatto has a regular European face, look out for
30 him; he is a devil. But see, your steward here has features more regular than King George's of England, and yet there he nods, and bows, and smiles; a king, indeed—the king of kind hearts and polite fellows. What a pleasant voice he has, too!"

"He has, Señor."

"But, tell me, has he not, so far as you have known him, always proved a good, worthy fellow?" said Captain Delano, pausing, while with a final genuflexion the steward disappeared into the cabin; "come, for the reason just
40 mentioned, I am curious to know."

"Francesco is a good man," rather sluggishly responded Don Benito, like a sort of phlegmatic appreciator, who would neither find fault nor flatter.

"Ah, I thought so. For it were strange, indeed, and not very creditable to us white-skins, if a little of our blood mixed with the African's, should, far from improv-

ing the latter's quality, have the sad effect of vitriolic acid into black broth, improving the habits, but not the wholesomeness."

"Doubtless, doubtless, Señor, but"—glancing—"not to speak of Negroes, your planter's remark heard applied to the Spanish and Indian intern in our provinces. But I know nothing about the
he listlessly added.

And here they entered the cabin.

The lunch was a frugal one. Some of Captain Delano's fresh fish and pumpkins, biscuit and salt beef, served bottle of cider, and the San Dominick's last of Canary.

As they entered, Francesco, with two or three aids, was hovering over the table giving the last orders. Upon perceiving their master they withdrew. Francesco making a smiling congé, and the Spaniard out condescending to notice it, fastidiously remarked to his companion that he relished not superfluous atten-

Without companions, host and guest sat down, childless married couple, at opposite ends of the table. Don Benito waving Captain Delano to his place weak as he was, insisting upon that gentleman seated before himself.

The Negro placed a rug under Don Benito's feet, a cushion behind his back, and then stood behind, near the master's chair, but Captain Delano's. At first, this surprised the latter. But it was soon evident that, in taking his position, the black was still true to his mission since by facing him he could the more readily anticipate his slightest want.

"This is an uncommonly intelligent fellow of yours, Don Benito," whispered Captain Delano across the table.
"You say true, Señor."

During the repast, the guest again reverted to part of Don Benito's story, begging further particulars here and there. He inquired how it was that the scurvy and its kind should have committed such wholesale havoc upon whites, while destroying less than half of the blacks. If this question reproduced the whole scene of plagues before the Spaniard's eyes, miserably reminding him of his solitude in a cabin where before he had had so many friends and officers round him, his hand shook, his face became hueless, broken words escaped, but directly sane memory of the past seemed replaced by insane horrors of the present. With starting eyes he stared be-

him at vacancy. For nothing was to be seen but the hand of his servant pushing the Canary over toward him. At length a few sips served partially to restore him. He made random reference to the different constitutions of races, enabling one to offer more resistance to certain maladies than another. The thought was new to his companion.

Presently Captain Delano, intending to say something to his host concerning the pecuniary part of the business he had undertaken for him, especially—since he was strictly accountable to his owners—with reference to the new suit of sails, and other things of that sort, and naturally preferring to conduct such affairs in private, was desirous that the servant should withdraw, imagining that Don Benito for a few minutes could dispense with his attendance. He, however, waited awhile, thinking that, as the conversation proceeded, Don Benito, without being prompted, would perceive the propriety of the step.

But it was otherwise. At last catching his host's eye, Captain Delano, with a slight backward gesture of his thumb, whispered, "Don Benito, pardon me, but there is an interference with the full expression of what I have to say to you."

Upon this the Spaniard changed countenance, which was imputed to his resenting the hint, as in some way a reflection upon his servant. After a moment's pause, he assured his guest that the black's remaining with them could be of no disservice, because since losing his officers he had made Babo (whose original office, it now appeared, had been captain of the slaves) not only his constant attendant and companion, but in all things his confidant.

After this, nothing more could be said, though, indeed, Captain Delano could hardly avoid some little tinge of irritation upon being left ungratified in so inconsiderable a wish, by one, too, for whom he intended such solid services. But it is only his querulousness, thought he, and so filling his glass he proceeded to business.

The price of the sails and other matters was fixed upon. But while this was being done, the American observed that, though his original offer of assistance had been hailed with hectic animation, yet now when it was reduced to a business transaction, indifference and apathy were betrayed. Don Benito, in fact, appeared to submit to hearing the details more out of regard to common propriety, than from any impression that weighty benefit to himself and his voyage was involved.

Soon, his manner became still more reserved. The effort was vain to seek to draw him into social talk. Gnawed by his splenetic mood, he sat twitching his beard, while to little purpose the hand of his servant, mute as *sc* that on the wall, slowly pushed over the Canary.

Lunch being over, they sat down on the cushioned transom, the servant placing a pillow behind his master. The long continuance of the calm had now affected the atmosphere. Don Benito sighed heavily, as if for breath.

"Why not adjourn to the cuddy," said Captain Delano; "there is more air there." But the host sat silent and motionless.

Meantime his servant knelt before him with a large fan of feathers. And Francesco coming in on tiptoes, *60* handed the Negro a little cup of aromatic waters, with which at intervals he chafed his master's brow, smoothing the hair along the temples as a nurse does a child's. He spoke no word. He only rested his eye on his master's as if, amid all Don Benito's distress, a little to refresh his spirit by the silent sight of fidelity.

Presently the ship's bell sounded two o'clock, and through the cabin-windows a slight rippling of the sea was discerned, and from the desired direction.

"There," exclaimed Captain Delano, "I told you so, *70* Don Benito, look!"

He had risen to his feet, speaking in a very animated tone, with a view the more to rouse his companion. But though the crimson curtain of the stern-window near him that moment fluttered against his pale cheek, Don Benito seemed to have even less welcome for the breeze than the calm.

Poor fellow, thought Captain Delano, bitter experience has taught him that one ripple does not make a wind, any more than one swallow a summer. But he is mistaken *80* for once. I will get his ship in for him, and prove it.

Briefly alluding to his weak condition, he urged his host to remain quietly where he was, since he (Captain Delano) would with pleasure take upon himself the responsibility of making the best use of the wind.

Upon gaining the deck, Captain Delano started at the unexpected figure of Atufal, monumentally fixed at the threshold, like one of those sculptured porters of black marble guarding the porches of Egyptian tombs.

But this time the start was, perhaps, purely physical. *90* Atufal's presence, singularly attesting docility even in sullenness, was contrasted with that of the hatchet-polish-

ers, who in patience evinced their industry; while both spectacles showed, that lax as Don Benito's general authority might be, still, whenever he chose to exert it, no man so savage or colossal but must, more or less, bow.

Snatching a trumpet which hung from the bulwarks, with a free step Captain Delano advanced to the forward edge of the poop, issuing his orders in his best Spanish. The few sailors and many Negroes, all equally pleased, obediently set about heading the ship toward the harbour.

10 While giving some directions about setting a lower stu'n'-sail, suddenly Captain Delano heard a voice faithfully repeating his orders. Turning, he saw Babo, now for the time acting, under the pilot, his original part of captain of the slaves. This assistance proved valuable. Tattered sails and warped yards were soon brought into some trim. And no brace or halyard was pulled but to the blithe songs of the inspirited Negroes.

Good fellows, thought Captain Delano, a little training would make fine sailors of them. Why see, the very 20 women pull and sing, too. These must be some of those Ashantee Negresses that make such capital soldiers, I've heard. But who's at the helm? I must have a good hand there.

He went to see.

The San Dominick steered with a cumbrous tiller, with large horizontal pullies attached. At each pulley-end stood a subordinate black, and between them, at the tiller-head, the responsible post, a Spanish seaman, whose countenance evinced his due share in the general hope- 30 fulness and confidence at the coming of the breeze.

He proved the same man who had behaved with so shame-faced an air on the windlass.

"Ah,—it is you, my man," exclaimed Captain Delano—"well, no more sheep's-eyes now,—look straight forward and keep the ship so. Good hand, I trust? And want to get into the harbor, don't you?"

The man assented with an inward chuckle, grasping the tiller-head firmly. Upon this, unperceived by the American, the two blacks eyed the sailor intently.

40 Finding all right at the helm, the pilot went forward to the forecabin, to see how matters stood there.

The ship now had way enough to breast the current. With the approach of evening the breeze would be sure to freshen.

Having done all that was needed for the present, Captain Delano, giving his last orders to the sailors,

turned aft to report affairs to Don Benito in the perhaps additionally incited to rejoin him by the snatching a moment's private chat while his servant engaged upon deck.

From opposite sides, there were, beneath the two approaches to the cabin, one further forward the other, and consequently communicating with the passage. Marking the servant still above, Captain Delano taking the highest entrance—the one last named, whose porch Atufal still stood—hurried on his way. Arrived at the cabin threshold, he paused an instant little to recover from his eagerness. Then, with the object of his intended business upon his lips, he entered. Advanced toward the seated Spaniard, he heard a footstep, keeping time with his. From the opposite a salver in hand, the servant was likewise advancing.

"Confound the faithful fellow," thought Captain Delano, "what a vexatious coincidence."

Possibly, the vexation might have been something different, were it not for the brisk confidence inspired by the breeze. But even as it was, he felt a slight tremor from a sudden indefinite association in his mind with Atufal.

"Don Benito," said he, "I give you joy, the breeze holds, and will increase. By the way, your tall man, time-piece, Atufal, stands without. By your order, course?"

Don Benito recoiled, as if at some bland satirical delivered with such adroit garnish of apparent breeding as to present no handle for retort.

He is like one flayed alive, thought Captain Delano, where may one touch him without causing a shrink?

The servant moved before his master, adjusted his cushion; recalled to civility, the Spaniard stiffly replied, "You are right. The slave appears where you saw according to my command, which is, that if at a given hour I am below, he must take his stand and await my coming."

"Ah now, pardon me, but that is treating the fellow like an ex-king indeed. Ah, Don Benito," smiling, "for all the license you permit in some things, I fear at bottom, you are a bitter hard master."

Again Don Benito shrank, and this time, as the sailor thought, from a genuine twinge of his conscience.

Again conversation became constrained. In vain Captain Delano called attention to the now perceptible

tion of the keel gently cleaving the sea, with lack-lustre eye, Don Benito returned words few and reserved

By-and-by, the wind having steadily risen, and still blowing right into the harbour, bore the San Dominick swiftly on. Rounding a point of land, the sealer at distance came into open view

Meantime Captain Delano had again repaired to the deck, remaining there some time. Having at last altered the ship's course, so as to give the reef a wide berth, he returned for a few moments below

I will cheer up my poor friend, this time, thought he

"Better and better, Don Benito," he cried as he blithely re-entered "there will soon be an end to your cares, at least for awhile. For when, after a long, sad voyage, you know, the anchor drops into the haven, all its vast weight seems lifted from the captain's heart. We are getting on famously, Don Benito. My ship is in sight. Look through this side-light here, there she is, all a-taunt-o! The Bachelor's Delight, my good friend. Ah, how this wind braces one up. Come, you must take a cup of coffee with me this evening. My old steward will give you as fine a cup as ever any sultan tasted. What say you, Don Benito, will you?"

At first, the Spaniard glanced feverishly up, casting a longing look toward the sealer, while with mute concern his servant gazed into his face. Suddenly the old age of coldness returned, and dropping back to his cushions he was silent

"You do not answer. Come, all day you have been my host; would you have hospitality all on one side?"

"I cannot go," was the response

"What? It will not fatigue you. The ships will lie together as near as they can, without swinging foul. It will be little more than stepping from deck to deck, which is but as from room to room. Come, come, you must not refuse me."

"I cannot go," decisively and repulsively repeated Don Benito.

Renouncing all but the last appearance of courtesy with a sort of cadaverous sullenness, and biting his thin nails to the quick, he glanced, almost glared, at his guest, as if impatient that a stranger's presence should interfere with the full indulgence of his morbid hour. Meantime the sound of the parted waters came more and more gurglingly and merrily in at the windows, as reproaching him for his dark spleen, as telling him that, sulk as he

might, and go mad with it, nature cared not a jot; since, whose fault was it, pray?

But the foul mood was now at its depth, as the fair wind at its height

There was something in the man so far beyond any mere unsociality or sourness previously evinced, that even the forbearing good-nature of his guest could no longer endure it. Wholly at a loss to account for such demeanor, and deeming sickness with eccentricity, however extreme, no adequate excuse, well satisfied, too, that nothing in his own conduct could justify it, Captain Delano's pride began to be roused. Himself became reserved. But all seemed one to the Spaniard. Quitting him therefore, Captain Delano once more went to the deck

The ship was now within less than two miles of the sealer. The whale-boat was seen darting over the interval

To be brief, the two vessels, thanks to the pilot's skill, ere long in neighborly style lay anchored together

Before returning to his own vessel, Captain Delano had intended communicating to Don Benito the smaller details of the proposed services to be rendered. But, as it was, unwilling anew to subject himself to rebuffs, he resolved, now that he had seen the San Dominick safely moored, immediately to quit her, without further allusion to hospitality or business. Indefinitely postponing his ulterior plans, he would regulate his future actions according to future circumstances. His boat was ready to receive him, but his host still tarried below. Well, thought Captain Delano, if he has little breeding, the more need to show mine. He descended to the cabin to bid a ceremonious, and, it may be, tacitly rebukeful adieu. But to his great satisfaction, Don Benito, as if he began to feel the weight of that treatment with which his slighted guest had, not indecorously, retaliated upon him, now supported by his servant, rose to his feet, and grasping Captain Delano's hand, stood tremulous, too much agitated to speak. But the good augury hence drawn was suddenly dashed, by his resuming all his previous reserve, with augmented gloom, as, with half-averted eyes, he silently reseated himself on his cushions. With a corresponding return of his own chilled feelings, Captain Delano bowed and withdrew

He was hardly midway in the narrow corridor, dim as a tunnel, leading from the cabin to the stairs, when a sound, as of the tolling for execution in some jail-yard, fell on his ears. It was the echo of the ship's flawed bell,

striking the hour, drearily reverberated in this subterranean vault. Instantly, by a fatality not to be withstood, his mind, responsive to the portent, swarmed with superstitious suspicions. He paused. In images far swifter than these sentences, the minutest details of all his former distrusts swept through him.

Hitherto, credulous good-nature had been too ready to furnish excuses for reasonable fears. Why was the Spaniard, so superfluously punctilious at times, now heedless of common propriety in not accompanying to the side his departing guest? Did indisposition forbid? Indisposition had not forbidden more irksome exertion that day. His last equivocal demeanor recurred. He had risen to his feet, grasped his guest's hand, motioned toward his hat; then, in an instant, all was eclipsed in sinister muteness and gloom. Did this imply one brief, repentant relenting at the final moment, from some iniquitous plot, followed by remorseless return to it? His last glance seemed to express a calamitous, yet acquiescent farewell to Captain Delano forever. Why decline the invitation to visit the sealer that evening? Or was the Spaniard less hardened than the Jew, who refrained not from supping at the board of him whom the same night he meant to betray? What imported all those day-long enigmas and contradictions, except they were intended to mystify, preliminary to some stealthy blow? Atufal, the pretended rebel, but punctual shadow, that moment lurked by the threshold without. He seemed a sentry, and more. Who, by his own confession, had stationed him there? Was the Negro now lying in wait?

The Spaniard behind—his creature before; to rush from darkness to light was the involuntary choice.

The next moment, with clenched jaw and hand, he passed Atufal, and stood unharmed in the light. As he saw his trim ship lying peacefully at her anchor, and almost within ordinary call, as he saw his household boat, with familiar faces in it, patiently rising and falling on the short waves by the San Dominick's side, and then, glancing about the decks where he stood, saw the oakum-pickers still gravely plying their fingers; and heard the low, buzzing whistle and industrious hum of the hatchet-polishers, still bestirring themselves over their endless occupation; and more than all, as he saw the benign aspect of nature, taking her innocent repose in the evening, the screened sun in the quiet camp of the west shining out like the mild light from Abraham's tent; as

his charmed eye and ear took in all these, with the figure of the black, the clenched jaw and hand. Once again he smiled at the phantoms which had him, and felt something like a tinge of remorse, harbouring them even for a moment, he should plication, have betrayed an atheist doubt of the watchful Providence above.

There was a few minutes' delay, while, in obedience to his orders, the boat was being hooked along to the way. During this interval, a sort of saddened satisfaction stole over Captain Delano, at thinking of the offices he had that day discharged for a stranger. He thought he, after good actions one's conscience is ungrateful, however much so the benefited party is.

Presently, his foot, in the first act of descent from the boat, pressed the first round of the side-ladder, and he presented inward upon the deck. In the same moment he heard his name courteously sounded, and, to his pleased surprise, saw Don Benito advancing—his wonted energy in his air, as if, at the last moment, upon making amends for his recent discourtesy. An instinctive good feeling, Captain Delano, with his foot, turned and reciprocally advanced. As he saw the Spaniard's nervous eagerness increased, but his energy failed, so that, the better to support him, the Spaniard, placing his master's hand on his naked shoulder, and gently holding it there, formed himself into a sort of crutch.

When the two captains met, the Spaniard again bravely took the hand of the American, at the same time casting an earnest glance into his eyes, but, as before, he much overcame to speak.

I have done him wrong, self-reproachfully thought the Captain Delano, his apparent coldness has deceived him in no instance has he meant to offend.

Meantime, as if fearful the continuance of the situation might too much unstring his master, the servant seemed anxious to terminate it. And so, still presenting himself as a crutch, and walking between the two captains, he advanced with them toward the gangway; while, as if full of kindly contrition, Don Benito would not go the hand of Captain Delano, but retained it in his grasp across the black's body.

22 the Jew . . . betray, an allusion to Judas' betrayal of Jesus Matthew 26

Soon they were standing by the side, looking over into the boat, whose crew turned up their curious eyes. Waiting a moment for the Spaniard to relinquish his hold, the now embarrassed Captain Delano lifted his foot, to overstep the threshold of the open gangway, but still Don Benito would not let go his hand. And yet, with an agitated tone, he said, "I can go no further, here I must bid you adieu. Adieu, my dear, dear Don Amasa. Go—go!" suddenly tearing his hand loose, "go, and God guard you better than me, my best friend."

Not unaffected, Captain Delano would now have lingered; but catching the meekly admonitory eye of the servant, with a hasty farewell he descended into his boat, followed by the continual adieus of Don Benito, standing rooted in the gangway.

Seating himself in the stern, Captain Delano, making a last salute, ordered the boat shoved off. The crew had their oars on end. The bowsmen pushed the boat a sufficient distance for the oars to be lengthwise dropped. The instant that was done, Don Benito sprang over the bulwarks, falling at the feet of Captain Delano, at the same time, calling toward his ship, but in tones so frenzied, that none in the boat could understand him. But, as if not equally obtuse, three sailors, from three different and distant parts of the ship, splashed into the sea, swimming after their captain, as if intent upon his rescue.

The dismayed officer of the boat eagerly asked what this meant. To which Captain Delano, turning a disdainful smile upon the unaccountable Spaniard, answered that, for his part, he neither knew nor cared, but it seemed as if Don Benito had taken it into his head to produce the impression among his people that the boat wanted to kidnap him. "Or else—give way for your lives," he wildly added, starting at a clattering hubbub in the ship, above which rang the tocsin of the hatchet-polishers, and seizing Don Benito by the throat he added, "this plotting pirate means murder!" Here, in apparent verification of the words, the servant, a dagger in his hand, was seen on the rail overhead, poised, in the act of leaping, as if with desperate fidelity to befriend his master to the last, while, seemingly to aid the black, the three white sailors were trying to clamber into the hampered bow. Meantime, the whole host of Negroes, as if inflamed at the sight of their jeopardized captain, impended in one sooty avalanche over the bulwarks.

All this, with what preceded, and what followed, oc-

curred with such involutions of rapidity, that past, present, and future seemed one.

Seeing the Negro coming, Captain Delano had flung the Spaniard aside, almost in the very act of clutching him⁵⁰ and, by the unconscious recoil, shifting his place, with arms thrown up, so promptly grappled the servant in his descent, that with dagger presented at Captain Delano's heart, the black seemed of purpose to have leaped there as to his mark. But the weapon was wrenched away, and the assailant dashed down into the bottom of the boat, which now, with disentangled oars, began to speed through the sea.

At this juncture, the left hand of Captain Delano, on one side, again clutched the half-reclined Don Benito,⁶⁰ heedless that he was in a speechless faint, while his right foot, on the other side, ground the prostrate Negro, and his right arm pressed for added speed on the after oar, his eye bent forward, encouraging his men to their utmost.

But here, the officer of the boat, who had at last succeeded in beating off the towing sailors, and was now, with face turned aft, assisting the bowsmen at his oar, suddenly called to Captain Delano, to see what the black was about, while a Portuguese oarsman shouted to him to⁷⁰ give heed to what the Spaniard was saying.

Glancing down at his feet, Captain Delano saw the freed hand of the servant aiming with a second dagger—a small one, before concealed in his wool—with this he was snakishly writhing up from the boat's bottom, at the heart of his master, his countenance lividly vindictive, expressing the centred purpose of his soul, while the Spaniard, half-choked, was vainly shrinking away, with husky words, incoherent to all but the Portuguese.

That moment, across the long-benighted mind of Cap-⁸⁰tain Delano, a flash of revelation swept, illuminating in unanticipated clearness his host's whole mysterious demeanor, with every enigmatic event of the day, as well as the entire past voyage of the *San Dominick*. He smote Babo's hand down, but his own heart smote him harder. With infinite pity he withdrew his hold from Don Benito. Not Captain Delano, but Don Benito, the black, in leaping into the boat, had intended to stab.

Both the black's hands were held, as, glancing up towards the *San Dominick*, Captain Delano, now with⁹⁰ the scales dropped from his eyes, saw the Negroes, not in misrule, not in tumult, not as if frantically concerned

for Don Benito, but with mask torn away, flourishing hatchets and knives, in ferocious piratical revolt. Like delirious black dervishes, the six Ashantees danced on the poop. Prevented by their foes from springing into the water, the Spanish boys were hurrying up to the topmost spars, while such of the few Spanish sailors, not already in the sea, less alert, were descried, helplessly mixed in, on deck, with the blacks.

Meantime Captain Delano hailed his own vessel, ordering the ports up, and the guns run out. But by this time the cable of the San Dominick had been cut, and the fag-end, in lashing out, whipped away the canvas shroud about the beak, suddenly revealing, as the bleached hull swung round toward the open ocean, death for the figurehead, in a human skeleton, chalky comment on the chalked words below, "*Follow your leader.*"

At the sight, Don Benito, covering his face, wailed out " 'Tis he, Aranda! my murdered, unburied friend!"

Upon reaching the sealer, calling for ropes, Captain Delano bound the Negro, who made no resistance, and had him hoisted to the deck. He would then have assisted the now almost helpless Don Benito up the side, but Don Benito, wan as he was, refused to move, or be moved, until the Negro should have been first put below out of view. When, presently assured that it was done, he no more shrank from the ascent.

The boat was immediately dispatched back to pick up the three swimming sailors. Meantime, the guns were in readiness, though, owing to the San Dominick having glided somewhat astern of the sealer, only the aftermost one could be brought to bear. With this, they fired six times, thinking to cripple the fugitive ship by bringing down her spars. But only a few inconsiderable ropes were shot away. Soon the ship was beyond the gun's range, steering broad out of the bay, the blacks thickly clustering round the bowsprit, one moment with taunting cries toward the whites, the next with upthrown gestures hailing the now dusky moors of ocean—cawing crows escaped from the hand of the fowler.

The first impulse was to slip the cables and give chase. But, upon second thoughts, to pursue with whale-boat and yawl seemed more promising.

Upon inquiring of Don Benito what firearms they had on board the San Dominick, Captain Delano was answered that they had none that could be used, because, in the earlier stages of the mutiny, a cabin-passenger,

since dead, had secretly put out of order the what few muskets there were. But with all his strength, Don Benito entreated the American no chase, either with ship or boat, for the Negroes ready proved themselves such desperadoes, that of a present assault, nothing but a total massacre whites could be looked for. But, regarding this as coming from one whose spirit had been cruel misery, the American did not give up his design.

The boats were got ready and armed. Captain ordered his men into them. He was going himself. Don Benito grasped his arm.

"What! have you saved my life, Señor, and are now going to throw away your own?"

The officers also, for reasons connected with the interests and those of the voyage, and a duty owing owners, strongly objected against their commanding. Weighing their remonstrances a moment, Captain Delano felt bound to remain, appointing his chief—an athletic and resolute man, who had been a steer's-man—to head the party. The more to encourage the sailors, they were told, that the Spanish captain considered his ship as good as lost, that she and her including some gold and silver, were worth more than a thousand doubloons. Take her, and no small part shall be theirs. The sailors replied with a shout.

The fugitives had now almost gained an offing. It was nearly night, but the moon was rising. After hard longed pulling, the boats came up on the ship's quarter at a suitable distance laying upon their oars to discharge their muskets. Having no bullets to return, the Negroes sent their yells. But upon the second volley, the Indians they hurtled their hatchets. One took off a sailor's legs. Another struck the whale-boat's bow, cutting the rope there, and remaining stuck in the gunwale a woodman's axe. Snatching it, quivering from its handle, the mate hurled it back. The returned gun now stuck in the ship's broken quarter-gallery, and remained.

The Negroes giving too hot a reception, the whites kept a more respectful distance. Hovering now just out of reach of the hurtling hatchets, they, with a view to

73 offing, a good distance from the shore where there is deep water and no need of a pilot.

close encounter which must soon come, sought to decoy the blacks into entirely disarming themselves of their most murderous weapons in a hand-to-hand fight, by foolishly flinging them, as missiles, short of the mark, into the sea. But ere long, perceiving the stratagem, the Negroes desisted, though not before many of them had to replace their lost hatchets with handspikes, an exchange which, as counted upon, proved, in the end, favorable to the assailants.

Meantime, with a strong wind, the ship still clove the water; the boats alternately falling behind, and pulling up, to discharge fresh volleys.

The fire was mostly directed toward the stern, since there, chiefly, the Negroes, at present, were clustering. But to kill or maim the Negroes was not the object. To take them, with the ship, was the object. To do it, the ship must be boarded, which could not be done by boats while she was sailing so fast.

A thought now struck the mate. Observing the Spanish boys still aloft, high as they could get, he called to them to descend to the yards, and cut adrift the sails. It was done. About this time, owing to causes hereafter to be shown, two Spaniards, in the dress of sailors, and conspicuously showing themselves, were killed, not by volleys, but by deliberate marksman's shots, while, as it afterward appeared, by one of the general discharges, Atufal, the black, and the Spaniard at the helm likewise were killed. What now, with the loss of the sails, and loss of leaders, the ship became unmanageable to the Negroes.

With creaking masts, she came heavily round to the wind, the prow slowly swinging into view of the boats, its skeleton gleaming in the horizontal moonlight, and casting a gigantic ribbed shadow upon the water. One extended arm of the ghost seemed beckoning the whites to avenge it.

"Follow your leader!" cried the mate, and, one on each bow, the boats boarded. Sealing-spears and cutlasses crossed hatchets and handspikes. Huddled upon the long-boat amidships, the Negresses raised a wailing chant, whose chorus was the clash of the steel.

For a time, the attack wavered, the Negroes wedging themselves to beat it back, the half-repelled sailors, as yet unable to gain a footing, fighting as troopers in the saddle, one leg sideways flung over the bulwarks, and one without, plying their cutlasses like carters' whips. But

in vain. They were almost overborne, when rallying themselves into a squad as one man, with a huzza, they sprang inboard, where, entangled, they involuntarily separated again. For a few breaths' space there was a vague, 50 muffled, inner sound, as of submerged sword-fish rushing hither and thither through shoals of black-fish. Soon, in a reunited band, and joined by the Spanish seamen, the whites came to the surface, irresistibly driving the Negroes toward the stern. But a barricade of casks and sacks from side to side, had been thrown up by the mainmast. Here the Negroes faced about, and though scorning peace or truce, yet vain would have had respite. But, without pause, overleaping the barrier, the unflagging sailors again closed. Exhausted, the blacks now fought in despair. 60 Their red tongues lolled, wolf-like, from their black mouths. But the pale sailors' teeth were set, not a word was spoken, and, in five minutes more, the ship was won.

Nearly a score of the Negroes were killed. Exclusive of those by the balls, many were mangled, their wounds—mostly inflicted by the long-edged sealing-spears—resembling those shaven ones of the English at Preston Pans, made by the poled scythes of the Highlanders. On the other side, none were killed, though several were wounded, some severely, including the mate. 70 The surviving Negroes were temporarily secured, and the ship towed back into the harbor at midnight, once more lay anchored.

Omitting the incidents and arrangements ensuing, suffice it that, after two days spent in refitting, the ships sailed in company for Concepcion in Chili, and thence for Lima in Peru, where, before the vice-regal courts, the whole affair, from the beginning, underwent investigation.

Though, midway on the passage, the ill-fated Spaniard, 80 relaxed from constraint, showed some signs of regaining health with free-will, yet, agreeably to his own foreboding, shortly before arriving at Lima, he relapsed, finally becoming so reduced as to be carried ashore in arms. Hearing of his story and plight, one of the many religious institutions of the City of Kings opened an hospitable refuge to him, where both physician and priest were his nurses, and a member of the order volunteered to be his

68 Preston Pans. At the battle of Prestonpans in 1745, the Scotch Highlanders supported the Young Pretender against the English.

one special guardian and consoler, by night and by day.

The following extracts, translated from one of the official Spanish documents, will, it is hoped, shed light on the preceding narrative, as well as, in the first place, reveal the true port of departure and true history of the San Dominick's voyage, down to the time of her touching at the island of St Maria.

But, ere the extracts come, it may be well to preface them with a remark.

10 The document selected, from among many others, for partial translation, contains the deposition of Benito Cereno, the first taken in the case. Some disclosures therein were, at the time, held dubious for both learned and natural reasons. The tribunal inclined to the opinion that the deponent, not undisturbed in his mind by recent events, raved of some things which could never have happened. But subsequent depositions of the surviving sailors, bearing out the revelations of their captain in several of the strangest particulars, gave credence to the rest. So
20 that the tribunal, in its final decision, rested its capital sentences upon statements which, had they lacked confirmation, it would have deemed it but duty to reject.

I, DON JOSE DE ABOS AND PADILLA, His Majesty's Notary for the Royal Revenue, and Register of this Province, and Notary Public of the Holy Crusade of this Bishopric, etc.

Do certify and declare, as much as is requisite in law, that, in the criminal cause commenced the twenty-fourth of the month of September, in the year seventeen hundred and ninety-nine, against the Negroes of the ship
30 San Dominick, the following declaration before me was made

Declaration of the first witness, DON BENITO CERENO.

The same day, and month, and year, His Honor, Doctor Juan Martinez de Rozas, Councilor of the Royal Audience of this Kingdom, and learned in the law of this Intendency, ordered the captain of the ship San Dominick, Don Benito Cereno, to appear; which he did in his litter, attended by the monk Infelez; of whom he received the oath, which he took
40 by God, our Lord, and a sign of the Cross; under which he promised to tell the truth of whatever he should know and should be asked;—and being interrogated agreeably to the tenor of the act commencing the process, he said, that on the twentieth of May last, he set sail with his ship from the port of Valparaiso, bound to that of Callao; loaded with the produce of the country besides thirty cases of hardware

and one hundred and sixty blacks, of both sexes, m longing to Don Alexandro Aranda, gentleman, of Mendoza; that the crew of the ship consisted of 1 men, besides the persons who went as passengers; Negroes were in part as follows: . . .

[Here, in the original, follows a list of 501 names, descriptions, and ages, compiled from several covered documents of Aranda's, and also from 1 tions of the deponent, from which portions only tracted.]

—One, from about eighteen to nineteen years, José, and this was the man that waited upon his Don Alexandro, and who speaks well the Spanish, served him four or five years, . . . A mulatto, name cesco, the cabin steward, of a good person and voice, sung in the Valparaiso churches, native of the prov Buenos Ayres, aged about thirty-five years. A smart named Dago, who had been for many years a grave among the Spaniards, aged forty-six years. . . . Fo Negroes, born in Africa, from sixty to seventy, but caulkers by trade, whose names are as follows:—th was named Muri, and he was killed (as was also h named Diamelo), the second, Nacta; the third, Yola wise killed, the fourth, Ghofan, and six full-grown Ne aged from thirty to forty-five, all raw, and born amon Ashantees—Matiluqui, Yan, Lecbe, Mapenda, Yar Akim, four of whom were killed; . . . a powerful l named Atufal, who being supposed to have been a ch Africa, his owner set great store by him. . . . And a Negro of Senegal, but some years among the Span aged about thirty, which Negro's name was Babo. . he does not remember the names of the others, but still expecting the residue of Don Alexandro's papers be found, will then take due account of them all, and 1 to the court, . . . and thirty-nine women and chil of all ages.

[The catalogue over, the deposition goes on:]

. . . That all the Negroes slept upon deck, as is custom in this navigation, and none wore fetters, because the ow his friend Aranda, told him that they were all tractable, that on the seventh day after leaving port, at three o'clock in the morning, all the Spaniards being asleep except two officers on the watch, who were the boatswain, J Robles, and the carpenter, Juan Bautista Gayete, and helmsman and his boy, the Negroes revolted sudde wounded dangerously the boatswain and the carpenter, .

52 [Here . . . extracted.] The brackets and bracketed material Melville's throughout • 76 Senegal, a province in West Africa

successively killed eighteen men of those who were sleeping upon deck, some with hand-spikes and hatchets, and others by throwing them alive overboard, after tying them, that of the Spaniards upon deck, they left about seven, as he thinks, alive and tied, to manoeuvre the ship, and three or four more who hid themselves, remained also alive. Although in the act of revolt the Negroes made themselves masters of the hatchway, six or seven wounded went through it to the cockpit, without any hindrance on their part; that in the act of revolt, the mate and another person, whose name he does not recollect, attempted to come up through the hatchway, but being quickly wounded, were obliged to return to the cabin; that the deponent resolved at break of day to come up the companion-way, where the Negro Babo was, being the ringleader, and Atufal, who assisted him, and having spoken to them, exhorted them to cease committing such atrocities, asking them, at the same time, what they wanted and intended to do, offering, himself, to obey their commands; that, notwithstanding this, they threw, in his presence, three men, alive and tied, overboard, that they told the deponent to come up, and that they would not kill him, which having done, the Negro Babo asked him whether there were in those seas any Negro countries where they might be carried, and he answered them, No, that the Negro Babo afterward told him to carry them to Senegal, or to the neighbouring islands of St. Nicholas, and he answered, that this was impossible, on account of the great distance, the necessity involved of rounding Cape Horn, the bad condition of the vessel, the want of provisions, sails, and water, but that the Negro Babo replied to him he must carry them in any way, that they would do and conform themselves to everything the deponent should require as to eating and drinking; that after a long conference, being absolutely compelled to please them, for they threatened to kill all the whites if they were not, at all events, carried to Senegal, he told them that what was most wanting for the voyage was water, that they would go near the coast to take it and thence they would proceed on their course; that the Negro Babo agreed to it; and the deponent steered toward the intermediate ports, hoping to meet some Spanish or foreign vessel that would save them, that within ten or eleven days they saw the land, and continued their course by it in the vicinity of Nasca, that the deponent observed that the Negroes were now restless and mutinous, because he did not affect the taking in of water, the Negro Babo having equired, with threats, that it should be done, without ail, the following day; he told him he saw plainly that the coast was steep, and the rivers designated in the maps were not to be found, with other reasons suitable to the circumstances; that the best way would be to

go to the island of Santa Maria, where they might water easily, it being a solitary island, as the foreigners did, that the deponent did not go to Pisco, that was near, nor make any other port of the coast, because the Negro Babo had intimated to him several times, that he would kill all the whites the very moment he should perceive any city, town, or settlement of any kind on the shores to which they should be carried, that having determined to go to the island of Santa Maria, as the deponent had planned, for the purpose of trying whether, on the passage or near the island itself, they could find any vessel that should favor them, or whether he could escape from it in a boat to the neighbouring coast of Arruco, to adopt the necessary means he immediately changed his course, steering for the island, that the Negroes Babo and Atufal held daily conferences, in which they discussed what was necessary for their design of returning to Senegal, whether they were to kill all the Spaniards, and particularly the deponent, that eight days after parting with the coast of Nasca, the deponent being on the watch a little after day-break, and soon after the Negroes had their meeting, the Negro Babo came to the place where the deponent was, and told him that he had determined to kill his master, Don Alexandro Aranda, both because he and his companions could not otherwise be sure of their liberty, and that to keep the seamen in subjection, he wanted to prepare a warning of what road they should be made to take did they or any of them oppose him, and that, by means of the death of Don Alexandro, that warning would best be given, but, that what this last meant, the deponent did not at the time comprehend, nor could not, further than that the death of Don Alexandro was intended, and moreover the Negro Babo proposed to the deponent to call the mate Raneds, who was sleeping in the cabin, before the thing was done, for fear, as the deponent understood it, that the mate, who was a good navigator, should be killed with Don Alexandro and the rest, that the deponent, who was the friend, from youth of Don Alexandro, prayed and conjured, but all was useless, for the Negro Babo answered him that the thing could not be prevented, and that all the Spaniards risked their death if they should attempt to frustrate his will in this matter, or any other, that, in this conflict, the deponent called the mate, Raneds, who was forced to go apart, and immediately the Negro Babo commanded the Ashantee Matiuqui and the Ashantee Lecbe to go and commit the murder, that those two went down with hatchets to the berth of Don Alexandro, that, yet half alive and mangled, they dragged him on deck; that they were going to throw him overboard in that state, but the Negro Babo stopped them, bidding the murder be completed on the deck before him, which was done, when, by his orders, the body

was carried below, forward, that nothing more was seen of it by the deponent for three days; . . . that Don Alonzo Sidonia, an old man, long resident at Valparaiso, and lately appointed to a civil office in Peru, whither he had taken passage, was at the time sleeping in the berth opposite Don Alexandro's, that awakening at his cries, surprised by them, and at the sight of the Negroes with their bloody hatchets in their hands, he threw himself into the sea through a window which was near him and was drowned, without it being in the power of the deponent to assist or take him up, . . . that, a short time after killing Aranda, they brought upon deck his german-cousin, of middle-age, Don Francisco Masa, of Mendoza, and the young Don Joaquin, Marques de Arambolaza, then lately from Spain, with his Spanish servant Ponce, and the three young clerks of Aranda, José Mozairi, Lorenzo Bargas, and Hermenegildo Gandix, all of Cadiz, that Don Joaquin and Hermenegildo Gandix, the Negro Babo, for purposes hereafter to appear, preserved alive, but Don Francisco Masa, José Mozairi, and Lorenzo Bargas, with Ponce the servant, besides the boatswain, Juan Robles, the boatswain's mates, Manuel Viscaya and Roderigo Hurta, and four of the sailors, the Negro Babo ordered to be thrown alive into the sea, although they made no resistance, nor begged for anything else but mercy, that the boatswain, Juan Robles, who knew how to swim, kept the longest above water, making acts of contrition, and, in the last words he uttered, charged this deponent to cause mass to be said for his soul to our Lady of Succour. . . . that, during the three days which followed, the deponent, uncertain what fate had befallen the remains of Don Alexandro, frequently asked the Negro Babo where they were, and, if still on board, whether they were to be preserved for interment ashore, entreating him so to order it, that the Negro Babo answered nothing till the fourth day, when at sunrise, the deponent coming on deck, the Negro Babo showed him a skeleton, which had been substituted for the ship's proper figurehead—the image of Christopher Colon, the discoverer of the New World; that the Negro Babo asked him whose skeleton that was, and whether, from its whiteness, he should not think it a white's; that, upon discovering his face, the Negro Babo, coming close, said words to this effect. "Keep faith with the blacks from here to Senegal, or you shall in spirit, as now in body, follow your leader," pointing to the prow; . . . that the same morning the Negro Babo took by succession each Spaniard forward, and asked him whose skeleton that was, and whether, from its whiteness, he should not think it a white's, that each Spaniard covered his face; that then to each the Negro Babo repeated the words in the first place said to the deponent; . . . that they (the Spaniards),

being then assembled aft, the Negro Babo harangued saying that he had now done all; that the deponent (navigating for the Negroes) might pursue his course with him and all of them that they should, soul and body, in the way of Don Alexandro, if he saw them (the Spaniards) speak or plot anything against them (the Negroes) threat which was repeated every day; that, before the last mentioned, they had tied the cook to throw him overboard, for it is not known what thing they heard him say but finally the Negro Babo spared his life, at the request of the deponent, that a few days after, the deponent, desiring not to omit any means to preserve the lives of the remaining whites, spoke to the Negroes peace and tranquility, and agreed to draw up a paper, signed by the deponent and the sailors who could write, as also by the Negro Babo for himself and all the blacks, in which the deponent pledged himself to carry them to Senegal, and they not to do any more, and he formally to make over to them the ship with the cargo, with which they were for that time satisfied and quieted. . . . But the next day, the more surely to prevent against the sailors' escape, the Negro Babo commanded the boats to be destroyed but the long-boat, which was seaworthy, and another, a cutter in good condition, knowing it would yet be wanted for towing the casks, he had it lowered down into the hold.

[Various particulars of the prolonged and perilsome navigation ensuing here follow, with incidents of a calamitous calm, from which portion one passage is extracted, to wit:—]

—That on the fifth day of the calm, all on board suffered much from the heat, and want of water, and five having fallen into fits, and mad, the Negroes became irritable, and by a chance gesture, which they deemed suspicious—though it was harmless—made by the mate, Raneds, to the deponent in the act of handing a quadrant, they killed him, but for this they were afterwards sorry, the mate being the remaining navigator on board, except the deponent.

—That omitting other events, which daily happened which can only serve uselessly to recall past misfortune and conflicts, after seventy-three days' navigation, reckoned from the time they sailed from Nasca, during which they were sustained under a scanty allowance of water, and were afflicted with the calms before mentioned, they at last arrived at the island of Santa Maria, on the seventeenth of the month of August, at about six o'clock in the afternoon, at which hour they cast anchor very near the American ship, B.

2 days; . . . The dots indicating omissions are Melville's through

lor's Delight, which lay in the same bay, commanded by the generous Captain Amasa Delano, but at six o'clock in the morning, they had already descried the port, and the Negroes became uneasy, as soon as at distance they saw the ship, not having expected to see one there, that the Negro Babo pacified them, assuring them that no fear need be had, that straightway he ordered the figure on the bow to be covered with canvas, as for repairs, and had the decks a little set in order; that for a time the Negro Babo and the Negro Atufal conferred; that the Negro Atufal was for sailing away, but the Negro Babo would not, and, by himself, cast about what to do; that at last he came to the deponent, proposing to him to say and do all that the deponent declares to have said and done to the American captain, that the Negro Babo warned him that if he varied in the least, or uttered any word, or gave any look that should give the least intimation of the past events or present state, he would instantly kill him, with all his companions, showing a dagger, which he carried hid, saying something which, as he understood it, meant that that dagger would be alert as his eye; that the Negro Babo then announced the plan to all his companions, which pleased them, that he then, the better to disguise the truth, devised many expedients, in some of them uniting deceit and defense, that of this sort was the device of the six Ashantees before named, who were his bravoos, that them he stationed on the break of the poop, as if to clean certain hatchets (in cases, which were part of the cargo), but in reality to use them, and distribute them at need, and at a given word he told them, that, among other devices, was the device of presenting Atufal, his right hand man, as chained, though in a moment the chains could be dropped; that in every particular he informed the deponent what part he was expected to enact in every device, and what story he was to tell on every occasion, always threatening him with instant death if he varied in the least: that, conscious that many of the Negroes would be turbulent, the Negro Babo appointed the four aged Negroes, who were calkers, to keep what domestic order they could on the decks, that again and again he harangued the Spaniards and his companions, informing them of his intent, and of his devices, and of the invented story that this deponent was to tell, charging them lest any of them varied from that story, that these arrangements were made and matured during the interval of two or three hours, between their first sighting the ship and the arrival on board of Captain Amasa Delano, that this happened at about half-past seven o'clock in the morning, Captain Amasa Delano coming in his boat, and all gladly receiving him, that the deponent, as well as he could force himself, acting then the

part of principal owner, and a free captain of the ship, told Captain Amasa Delano, when called upon, that he came from Buenos Ayres, bound to Lima, with three hundred Negroes; that off Cape Horn, and in a subsequent fever, many Negroes had died, that also, by similar casualties, all the sea officers and the greatest part of the crew had died

[And so the deposition goes on, circumstantially recounting the fictitious story dictated to the deponent by Babo, and through the deponent imposed upon Captain Delano, and also recounting the friendly offers of Captain Delano, with other things, but all of which is here omitted. After the fictitious story, etc., the deposition proceeds.]

—that the generous Captain Amasa Delano remained on board all the day, till he left the ship anchored at six o'clock in the evening, deponent speaking to him always of his pretended misfortunes, under the forementioned principles, without having had it in his power to tell a single word, or give him the least hint, that he might know the truth and state of things, because the Negro Babo, performing the office of an officious servant with all the appearance of submission of the humble slave, did not leave the deponent one moment, that this was in order to observe the deponent's actions and words, for the Negro Babo understands well the Spanish, and besides, there were thereabouts some others who were constantly on the watch, and likewise understood the Spanish, that upon one occasion, while deponent was standing on the deck conversing with Amasa Delano, by a secret sign the Negro Babo drew him (the deponent) aside, the act appearing as if originating with the deponent, that then, he being drawn aside, the Negro Babo proposed to him to gain from Amasa Delano full particulars about his ship, and crew, and arms, that the deponent asked "For what?" that the Negro Babo answered he might conceive, that, grieved at the prospect of what might overtake the generous Captain Amasa Delano, the deponent at first refused to ask the desired questions, and used every argument to induce the Negro Babo to give up this new design, that the Negro Babo showed the point of his dagger, that, after the information had been obtained the Negro Babo again drew him aside, telling him that that very night he (the deponent) would be captain of two ships instead of one, for that, great part of the American's ship's crew being to be absent fishing, the six Ashantees, without any one else, would easily take it, that at this time he said other things to the same purpose, that no entreaties availed; that before Amasa Delano's coming on board, no hint had been given

touching the capture of the American ship: that to prevent this project the deponent was powerless, . . . —that in some things his memory is confused, he cannot distinctly recall every event, . . . —that as soon as they had cast anchor at six of the clock in the evening, as has before been stated, the American Captain took leave, to return to his vessel, that upon a sudden impulse, which the deponent believes to have come from God and his angels, he, after the farewell had been said, followed the generous Captain Amasa Delano as far as the gunwale, where he stayed, under the pretense of taking leave, until Amasa Delano should have been seated in his boat, that on shoving off, the deponent sprang from the gunwale into the boat, and fell into it, he knows not how, God guarding him, that—

[*Here, in the original, follows the account of what further happened at the escape, and how the San Dominick was retaken, and of the passage to the coast; including in the recital many expressions of "eternal gratitude" to the "generous Captain Amasa Delano." The deposition then proceeds with recapitulatory remarks, and a partial reenumeration of the Negroes, making record of their individual part in the past events, with a view to furnishing, according to command of the court, the data whereon to found the criminal sentences to be pronounced. From this portion is the following:*]

—That he believes that all the Negroes, though not in the first place knowing to the design of revolt, when it was accomplished, approved it. . . . That the Negro, José, eighteen years old, and in the personal service of Don Alexandro, was the one who communicated the information to the Negro Babo, about the state of things in the cabin, before the revolt, that this is known, because, in the preceding midnight, he used to come from his berth, which was under his master's, in the cabin, to the deck where the ringleader and his associates were, and had secret conversations with the Negro Babo, in which he was several times seen by the mate, that, one night, the mate drove him away twice; . . . that this same Negro José was the one who, without being commanded to do so by the Negro Babo, as
 40 Lecbe and Matilquiqui were, stabbed his master, Don Alexandro, after he had been dragged half-lifeless to the deck, . . . that the mulatto steward, Francesco, was of the first band of revolvers, that he was, in all things, the creature and tool of the Negro Babo, that, to make his court, he, just before a repast in the cabin, proposed, to the Negro Babo, poisoning a dish for the generous Captain Amasa Delano, this is known and believed, because the Negroes have said it; but that the Negro Babo, having another design, forbade Francesco; . . . that the Ashantee Lecbe was one of the

worst of them; for that, on the day the ship was retaken, assisted in the defense of her, with a hatchet in each hand, with one of which he wounded, in the breast, the mate of Amasa Delano, in the first act of boarding; that he knew, that, in sight of the deponent, Lecbe struck the hatchet, Don Francisco Masa when, by the Negro Babo's orders, he was carrying him to throw him overboard, besides participating in the murder, before mentioned, Don Alexandro Aranda, and others of the cabin-passengers; that, owing to the fury with which the Ashantees fought in the engagement with the boats, but this Lecbe and Yvived, that Yan was bad as Lecbe, that Yan was told who, by Babo's command, willingly prepared the speech of Don Alexandro, in a way the Negroes afterwards mentioned to the deponent, but which he, so long as reason is left, can never divulge, that Yan and Lecbe were the two who, in a calm by night, riveted the skeleton to the box, also the Negroes told him, that the Negro Babo was traced the inscription below it, that the Negro Babo was the plotter from first to last, he ordered every murder was the helm and keel of the revolt, that Atufal was lieutenant in all, but Atufal, with his own hand, committed no murder, nor did the Negro Babo, . . . that he was shot, being killed in the fight with the boats, ere long, . . . that the Negresses, of age, were knowing to the revolt, and testified themselves satisfied at the death of the master, Don Alexandro, that, had the Negroes not restrained them, they would have tortured to death, instead of simply killing, the Spaniards slain by command of the Negro Babo; that the Negresses used their utmost influence to have the deponent made away with, that, in the various acts of murder, they sang songs and danced—not gaily, but solemnly; and before the engagement with the boats, as we during the action, they sang melancholy songs to the Negroes, and that this melancholy tone was more influencing than a different one would have been, and was intended, that all this is believed because the Negroes have said it

—that of the thirty-six men of the crew, exclusive of passengers (all of whom are now dead), which the deponent had knowledge of, six only remained alive, with four cabin-boys and ship-boys, not included with the crew, . . . —that the negroes broke an arm of one of the cabin-boys and gave him strokes with hatchets.

[*Then follow various random disclosures referring to various periods of time. The following are extracted:*]

—That during the presence of Captain Amasa Delano on board, some attempts were made by the sailors, and one Hermenegildo Gandix, to convey hints to him of the tr

state of affairs; but that these attempts were ineffectual, owing to fear of incurring death, and, furthermore, owing to the devices which offered contradictions to the true state of affairs, as well as owing to the generosity and piety of Amasa Delano, incapable of sounding such wickedness, . . . that Luys Galgo, a sailor about sixty years of age, and formerly of the king's navy, was one of those who sought to convey tokens to Captain Amasa Delano, but his intent, though undiscovered, being suspected, he was, on a pretense, made to retire out of sight, and at last into the hold, and there was made away with. This the negroes have since said; . . . that one of the ship-boys feeling, from Captain Amasa Delano's presence, some hopes of release, and not having enough prudence, dropped some chanceword respecting his expectations, which being overheard and understood by a slave-boy with whom he was eating at the time, the latter struck him on the head with a knife, inflicting a bad wound, but of which the boy is now healing, that likewise, not long before the ship was brought to anchor, one of the seamen, steering at the time, endangered himself by letting the blacks remark some expression in his countenance, arising from a cause similar to the above, but this sailor, by his heedful after conduct, escaped, that these statements are made to show the court that from the beginning to the end of the revolt, it was impossible for the deponent and his men to act otherwise than they did, . . . —that the third clerk, Hermenegildo Gandix, who before had been forced to live among the seamen, wearing a seaman's habit, and in all respects appearing to be one for the time, he, Gandix, was killed by a musket ball fired through mistake from the boats before boarding, having in his fright run up the mizzen-rigging, calling to the boats—"don't board," lest upon their boarding the Negroes should kill him, that this inducing the Americans to believe he some way favored the cause of the Negroes, they fired two balls at him, so that he fell wounded from the rigging, and was drowned in the sea, . . . —that the young Don Joaquin, Marques de Aramboalaza, like Hermenegildo Gandix, the third clerk, was degraded to the office and appearance of a common seaman; that upon one occasion, when Don Joaquin shrank, the Negro Babo commanded the Ashantee Leche to take tar and heat it, and pour it upon Don Joaquin's hands, . . . —that Don Joaquin was killed owing to another mistake of the Americans, but one impossible to be avoided, as upon the approach of the boats, Don Joaquin, with a hatchet tied edge out and upright to his hand, was made by the Negroes to appear on the bulwarks, whereupon, seen with arms in his hands and in a questionable attitude, he was shot for a renegade seaman, . . . —that on the person of Don Joaquin was found secreted a jewel, which, by papers that

were discovered, proved to have been meant for the shrine of our Lady of Mercy in Lima, a votive offering, beforehand prepared and guarded, to attest his gratitude, when he should have landed in Peru, his last destination, for the safe conclusion of his entire voyage from Spain; . . . —that the jewel, with the other effects of the late Don Joaquin, is in the custody of the brethren of the Hospital de Sacerdotes, awaiting the disposition of the honorable court, . . . —that, owing to the condition of the deponent, as well as the haste in which the boats departed for the attack, the Americans were not forewarned that there were, among the apparent crew, a passenger and one of the clerks, disguised by the Negro Babo, . . . —that, besides the Negroes killed in the action, some were killed after the capture and re-anchoring at night, when shackled to the ring-bolts on deck, that these deaths were committed by the sailors, ere they could be prevented. That so soon as informed of it, Captain Amasa Delano used all his authority, and, in particular with his own hand, struck down Martinez Gola, who, having found a razor in the pocket of an old jacket of his, which one of the shackled Negroes had on, was aiming it at the Negro's throat, that the noble Captain Amasa Delano also wrenched from the hand of Bartholomew Barlo, a dagger secreted at the time of the massacre of the whites, with which he was in the act of stabbing a shackled Negro, who, the same day, with another Negro, had thrown him down and jumped upon him, —that, for all the events, befalling through so long a time, during which the ship was in the hands of the Negro Babo, he cannot here give account, but that, what he has said is the most substantial of what occurs to him at present, and is the truth under the oath which he has taken, which declaration he affirmed and ratified, after hearing it read to him.

He said that he is twenty-nine years of age, and broken in body and mind, that when finally dismissed by the court, he shall not return home to Chili, but betake himself to the monastery on Mount Agonia without, and signed with his honor, and crossed himself, and for the time, departed as he came, in his litter, with the monk Infelez, to the Hospital de Sacerdotes

BENITO CERENO

DOCTOR ROZAS.

If the deposition have served as the key to fit into the lock of the complications which precede it, then, as a vault whose door has been flung back, the San Dominick's hull lies open to-day.

Hitherto the nature of this narrative besides rendering

the intricacies in the beginning unavoidable, has more or less required that many things, instead of being set down in the order of occurrence, should be retrospectively, or irregularly given, this last is the case with the following passages, which will conclude the account.

During the long, mild voyage to Lima, there was, as before hinted, a period during which the sufferer a little recovered his health, or, at least in some degree, his tranquillity. Ere the decided relapse which came, the two captains had many cordial conversations—their fraternal unreserve in singular contrast with former withdrawals.

Again and again, it was repeated, how hard it had been to enact the part forced on the Spaniard by Babo.

"Ah, my dear friend," Don Benito once said, "at those very times when you thought me so morose and ungrateful, nay when, as you now admit, you half thought me plotting your murder, at those very times my heart was frozen, I could not look at you, thinking of what, both on board this ship and your own, hung, from other hands, over my kind benefactor. And as God lives, Don Amasa, I know not whether desire for my own safety alone could have nerved me to that leap into your boat, had it not been for the thought that, did you, unenlightened, return to your ship, you, my best friend, with all who might be with you, stolen upon, that night, in your hammocks, would never in this world have wakened again. Do but think how you walked this deck, how you sat in this cabin, every inch of ground mined into honeycombs under you. Had I dropped the least hint, made the least advance toward an understanding between us, death, explosive death—yours as mine—would have ended the scene."

"True, true," cried Captain Delano, starting, "you saved my life, Don Benito, more than I yours; saved it, too, against my knowledge and will."

"Nay, my friend," rejoined the Spaniard, courteous even to the point of religion, "God charmed your life, but you saved mine. To think of some things you did—those smilings and chattings, rash pointings and gesturings. For less than these, they slew my mate, Raneds, but you had the Prince of Heaven's safe conduct through all ambuscades."

"Yes, all is owing to Providence, I know; but the temper of my mind that morning was more than commonly pleasant, while the sight of so much suffering, more apparent than real, added to my good-nature, com-

passion, and charity, happily interweaving the thread it been otherwise, doubtless, as you hint, some interferences might have ended unhappily enough. Those feelings I spoke of enabled me to better of momentary distrust, at times when it might have cost me my life, without saving anything. Only at the end did my suspicions get the better of you, and you know how wide of the mark they then fell.

"Wide indeed," said Don Benito, sadly; "you were with me, all day; stood with me, sat with me, with me, looked at me, ate with me, drank with me, and yet your last act was to clutch for a monster only an innocent man, but the most pitiable of all. To such degree many malign machinations and conditions impose. So far may even the best men in judging the conduct of one with the recesses of condition he is not acquainted. But you were for it, and you were in time undeceived. Would that in both respects, it was so ever, and with all men."

"You generalize, Don Benito; and mournfully err. But the past is passed, why moralize upon it? I see, yon bright sun has forgotten it all, and the blue sea, and the blue sky, these have turned over leaves."

"Because they have no memory," he dejectedly replied, "because they are not human."

"But these mild trades that now fan your cheek, Benito, do they not come with a human-like healing you? Warm friends, steadfast friends are the trades."

"With their steadfastness they but waft me to the tomb, Señor," was the foreboding response.

"You are saved," cried Captain Delano, more and more astonished and pained, "you are saved. What has such a shadow upon you?"

"The Negro."

There was silence, while the moody man sat, slow and unconsciously gathering his mantle about him, as if it were a pall.

There was no more conversation that day.

But if the Spaniard's melancholy sometimes ended in muteness upon topics like the above, there were other upon which he never spoke at all, on which, indeed, his old reserves were piled. Pass over the worst and, only to elucidate, let an item or two of these be cited. The day so precise and costly, worn by him on the day when events have been narrated, had not willingly been put aside. And that silver-mounted sword, apparent symbol of d

poric command, was not, indeed, a sword, but the ghost of one. The scabbard, artificially stiffened, was empty.

As for the black—whose brain, not body, had schemed and led the revolt, with the plot—his slight frame, inadequate to that which it held, had at once yielded to the superior muscular strength of his captor, in the boat. Seeing all was over, he uttered no sound, and could not be forced to. His aspect seemed to say, since I cannot do deeds, I will not speak words. Put in irons in the hold, with the rest, he was carried to Lima. During the passage, Don Benito did not visit him. Nor then, nor at any time after, would he look at him. Before the tribunal he refused. When pressed by the judges he fainted

On the testimony of the sailors alone rested the legal identity of Babo.

Some months after, dragged to the gibbet at the tail of a mule, the black met his voiceless end. The body was burned to ashes, but for many days, the head, that hive of subtlety, fixed on a pole in the Plaza, met, unabashed, the gaze of the whites, and across the Plaza looked towards St Bartholomew's church, in whose vaults slept then, as now, the recovered bones of Aranda and across the Rimac bridge looked toward the monastery, on Mount Agonia without, where, three months after being dismissed by the court, Benito Cereno, borne on the bier, did, indeed, follow his leader.

1856

NOVELISTS OF THE OLD SOUTH: Kennedy, Simms

John Pendleton Kennedy

1795 • 1870

Kennedy was a literary amateur; to him, as to William Byrd, writing was a gentlemanly accomplishment rather than a profession. His activities were many and varied. The son of well-to-do and socially prominent parents in Baltimore, he received his formal education in a private preparatory school and at Baltimore College. He par-

ticipated briefly in the War of 1812 at the Battle of Bladensburg, studied law in Baltimore, and was elected to

Panel (l to r) Woodlands, Simms' South Carolina home • William Gilmore Simms • Southern fox-hunt • Slave quarters

the Maryland legislature. For three terms (1838-1844), he was a Whig member of Congress, where he staunchly advocated the benefits of internal improvements and of the protective tariff. He was appointed secretary of the Navy by President Fillmore, and had an active part in organizing Commodore Perry's expedition to Japan in 1852. In the meantime, as a result of his marriage to the daughter of a wealthy manufacturer in Baltimore, he had become more and more closely identified with the business life of that city. He was a public-spirited citizen and the recipient of many offices and honors.

It is surprising that, in the midst of such political, business, and social activity, Kennedy should have found time to write as much as he did. His writings, like his public activities, were extremely varied. He wrote several political works: *Annals of Quodlibet* (1840), a satire on Jacksonian democracy, *A Defense of the Whigs* (1843), and *Letters of Mr. Paul Ambrose on the Great Rebellion in the United States* (1865), a plea for the settlement of sectional differences and the preservation of the Union. He wrote the biography of his friend (and the biographer of Patrick Henry) in the two-volume *Memoirs of the Life of William Wirt* (1849). He is remembered in literature, however, not for his political and biographical productions, but for three fictional works, "unlike enough," says Parrington, "to have been written by different men." *Swallow Barn* (1832), a collection of sketches of plantation life in Virginia, *Horse-*

Shoe Robinson (1835), a historical romance of Carolina in the American Revolution; and *Reb Bowl* (1838), a romance of colonial Maryland.

Opinion may reasonably differ as to which three works is the best. Parrington preferred the "and whimsical cavalier romance" of *Rob of the Horse-Shoe Robinson* presents a more substantial culminating in the Battle of King's Mountain; it challenges comparison with Simms' *The Partisan*, which was published in the same year and deals with the same materials. *Swallow Barn* is a pleasant portrait of social life and manners in the Virginia of the 18th century. In the words of the author's Preface, "the mellow, bland, and sunny luxuriance of her old society." Kennedy was admirably qualified to paint a picture: his mother was from Virginia and he had spent much of his youth in the Old Dominion; his residence in Baltimore gave him just the right environment. If he seems to have seen only what was true of that old-time society, one must remember that the narrator, Mark Littleton, was honor-bound, after enjoying the bountiful hospitality of Swallow Barn, to report nothing except the good.

Swallow Barn, ed. J. B. Hubbell, New York, 1929. • *Horse-Shoe Robinson*, ed. E. E. Leisy, New York, 1927. • V. L. Parrington, "Mark Littleton Kennedy," *The Romantic Revolution in America*, New York, 1927.

From

Swallow Barn

Swallow Barn is an authentic, if somewhat romantic, account of life among the landed gentry of Virginia in the 1820's as observed and reported by Kennedy, who appears in the book as Mark Littleton, a guest at Swallow Barn.

The author begins by describing the house and its environs and introducing the *dramatis personae*, among whom is Frank Meriwether, "the Master of a lordly domain." Other persons at Swallow Barn are Lucretia, Meriwether's wife; their three children; Prudence Meriwether, Frank Meriwether's spinster sister; Ned Hardard, Mrs. Meriwether's brother, who had attended Princeton, where "he ran the usual wild and unprofitable course of college life"; Parson Chubb, the schoolmaster; Carey, the Negro groom; and many others. Only a few miles away lived old Mr. Tracy, at the Brakes, with his son and his two charming daughters, Catherine and ("Charming" is the only word for the young ladies in Kennedy's book.) The Tracys had always been on friendly

terms with the Meriwethers; there was consequently a good deal of visiting back and forth. In fact, the action of the story, for the most part, shifts from Swallow Barn to the Brakes, and back again—such action as there is, for *Swallow Barn* has no plot to speak of. A tenuous thread of continuity is furnished by Ned Hazard's courtship of Bel Tracy, but the interest is held rather by episodes and detached scenes.

The episodes include a session of the County Court, in which Tolliver Hedges, Esq., attorney for the defense, figures amusingly, a possum hunt; a visit to the slave quarter, where Mark Littleton found an "air of contentment and good humour and kind family attachment"; the friendly lawsuit between Meriwether and Tracy; and the dinner to celebrate its happy settlement. The ostensible purpose of the lawsuit was to determine the ownership of a small tract of land which had formerly been the site of a milldam. The mill had been a failure, because of an insufficient amount of water in Apple-pie Branch, the stream on which it was situated. Meriwether's chief concern in the whole affair was not the land but the tender, and rather peculiar, feelings of old Mr. Tracy. The matter was submitted to the arbitration of two eminent lawyers, Singleton Swansdown and Philpot Wart, who, at Meriwether's instigation, gave a verdict favorable to Tracy. The latter was almost disappointed when the long-drawn-out litigation was brought to an end, he so much enjoyed studying the fine legal aspects of the case that when the question was settled, and in his favor, he felt that his occupation was gone. Such, in part, is the background of the dinner at Swallow Barn. Kennedy's chapter "The Dinner Table" is the classic treatment of its subject.

Chapter I

SWALLOW BARN

Swallow Barn is an aristocratical old edifice which sits, like a brooding hen, on the southern bank of the James River. It looks down upon a shady pocket or nook, formed by an indentation of the shore, from a gentle acclivity thinly sprinkled with oaks whose magnificent branches afford habitation to sundry friendly colonies of squirrels and woodpeckers.

This time-honored mansion was the residence of the

family of Hazards. But in the present generation, the spells of love and mortgage have translated the possession to Frank Meriwether, who having married Lucretia, the eldest daughter of my late Uncle Walter Hazard, and lifted some gentlemanlike incumbrances which had been sleeping for years upon the domain, was thus inducted into the proprietary rights. The adjacency of his own estate gave a territorial feature to this alliance, of which the fruits were no less discernible in the multiplication of Negroes, cattle, and poultry, than in a flourishing clan of Meriwethers.

The main building is more than a century old. It is built with thick brick walls, but one story in height, and surmounted by a double-faced or hipped roof, which gives the idea of a ship bottom upwards. Later buildings have been added to this, as the wants or ambition of the family have expanded. These are all constructed of wood, and seem to have been built in defiance of all laws of congruity, just as convenience required. But they form altogether an agreeable picture of habitation, suggesting the idea of comfort in the ample space they fill, and in their conspicuous adaptation to domestic uses.

The hall door is an ancient piece of walnut, which has grown too heavy for its hinges, and by its daily travel has furrowed the floor in a quadrant, over which it has an uneasy journey. It is shaded by a narrow porch, with a carved pediment upheld by massive columns of wood, somewhat split by the sun. An ample court-yard, inclosed by a semicircular paling, extends in front of the whole pile, and is traversed by a gravel road leading from a rather ostentatious iron gate, which is swung between two pillars of brick surmounted by globes of cut stone. Between the gate and the house a large willow spreads its arched and pendent drapery over the grass. A bridle rack stands within the inclosure, and near it a ragged horse-nibbled plum-tree—the current belief being that a plum-tree thrives on ill usage—casts its skeleton shadow on the dust.

Some Lombardy poplars, springing above a mass of shrubbery, partially screen various supernumerary buildings at a short distance in the rear of the mansion. Amongst these is to be seen the gable end of a stable, with the date of its erection stiffly emblazoned in black bricks near the upper angle, in figures set in after the fashion of the work on a girl's sampler. In the same quarter a pigeon-box, reared on a post and resembling a huge

tee-totum, is visible, and about its several doors and windows a family of pragmatical pigeons are generally strutting, bridling, and bragging at each other from sunrise until dark.

Appendant to this homestead is an extensive tract of land which stretches some three or four miles along the river, presenting alternately abrupt promontories mantled with pine and dwarf oak, and small inlets terminating in swamps. Some sparse portions of forest vary the landscape, which, for the most part, exhibits a succession of fields clothed with Indian corn, some small patches of cotton or tobacco plants, with the usual varieties of stubble and fallow grounds. These are inclosed by worm fences of shrunken chestnut, where lizards and ground-squirrels are perpetually running races along the rails.

A few hundred steps from the mansion, a brook glides at a snail's pace towards the river, holding its course through a wilderness of laurel and alder, and creeping around islets covered with green mosses. Across this stream is thrown a rough bridge, which it would delight a painter to see, and not far below it an aged sycamore twists its roots into a grotesque framework to the pure mirror of a spring, which wells up its cool waters from a bed of gravel and runs gurgling to the brook. There it aids in furnishing a cruising ground to a squadron of ducks who, in defiance of all nautical propriety, are incessantly turning up their sterns to the skies. On the grass which skirts the margin of the spring, I observe the family linen is usually spread out by some three or four Negro women, who chant shrill music over their wash-tubs, and seem to live in ceaseless warfare with sundry little besmirched and bow-legged blacks, who are never tired of making somersets, and mischievously pushing each other on the clothes laid down to dry.

Beyond the bridge, at some distance, stands a prominent object in the perspective of this picture,—the most venerable appendage to the establishment—a huge barn with an immense roof hanging almost to the ground, and thatched a foot thick with sunburnt straw, which reaches below the eaves in ragged flakes. It has a singularly drowsy and decrepit aspect. The yard around it is strewn knee-deep with litter, from the midst of which arises a long rack resembling a chevaux de frise, which is ordinarily filled with fodder. This is the customary lounge of half a score of oxen and as many cows, who sustain an

imperturbable companionship with a sickly wagon, parched tongue and drooping swingle-trees, as it in the sun, give it a most forlorn invalid character; some sociable carts under the sheds, with their perched against the walls, suggest the idea of a gossiping cronies taking their ease in a tavern. Now and then a clownish hobble-de-hoy colt, with fetlocks and disordered mane, and a thousand burs tail, stalks through this company. But as it is forbidden ground to all his tribe, he is likely very soon to counter a shower of corn-cobs from some of the men, upon which contingency he makes a rapid race across the bars which imperfectly guard the entrance to the yard, and with an uncouth display of his bounds away towards the brook, where he stops to look back with a saucy defiance, and after affectually drink for a moment, gallops away with a braggart whin to the fields.

Chap

A COUNTRY GENTLEMAN

The master of this lordly domain is Frank Meriwether. He is now in the meridian of life—somewhere a forty-five. Good cheer and an easy temper tell well upon him. The first has given him a comfortable, portly figure, and the latter a contemplative turn of mind, which inclines him to be lazy and philosophical.

He has some right to pride himself on his personal appearance, for he has a handsome face, with a dark line of eye and a fine intellectual brow. His head is grown scant of hair on the crown, which induces him to somewhat particular in the management of his locks in that locality, and these are assuming a decided silvery hue.

It is pleasant to see him when he is going to ride the Court House on business occasions. He is then to make his appearance in a coat of blue broadcloth,

1 tee-totum, a child's toy, somewhat like a top, twirled by the finger.
• 13 worm fences, fences made with rails in a zigzag pattern •
chevaux de frise. See note, p. 630 • 47 swingle-tree, or single-tree, is the pivoted bar to which the traces of a harnessed horse are fastened.
• 52 hobble-de-hoy, an awkward, gawky youth between boy and man.

tonishly glossy, and with an unusual amount of plaited ruffle strutting through the folds of a Marseilles waistcoat. A worshipful finish is given to this costume by a large straw hat, lined with green silk. There is a magisterial fulness in his garments which betokens condition in the world, and a heavy bunch of seals, suspended by a chain of gold, jingles as he moves, pronouncing him a man of superfluities.

It is considered rather extraordinary that he has never set up for Congress, but the truth is, he is an unambitious man, and has a great dislike to currying favor—as he calls it. And, besides, he is thoroughly convinced that there will always be men enough in Virginia willing to serve the people, and therefore does not see why he should trouble his head about it. Some years ago, however, there was really an impression that he meant to come out. By some sudden whim, he took it into his head to visit Washington during the session of Congress, and returned, after a fortnight, very seriously distempered with politics. He told curious anecdotes of certain secret intrigues which had been discovered in the affairs of the capital, gave a clear insight into the views of some deep-laid combinations, and became, all at once, painfully florid in his discourse, and dogmatical to a degree that made his wife stare. Fortunately, this orgasm soon subsided, and Frank relapsed into an indolent gentleman of the opposition, but it had the effect to give a much more decided cast to his studies, for he forthwith discarded the "Richmond Whig" from his newspaper subscription, and took to "The Enquirer," like a man who was not to be disturbed by doubts. And as it was morally impossible to believe all that was written on both sides, to prevent his mind from being abused, he from this time forward took a stand against the re-election of Mr. Adams to the Presidency, and resolved to give an implicit faith to all alleged facts which set against his administration. The consequence of this straightforward and confiding deportment was an unexpected complimentary notice of him by the Executive of the State. He was put into the commission of the peace, and having thus become a public man against his will, his opinions were observed to undergo some essential changes. He now thinks that a good citizen ought neither to solicit nor decline office; that the magistracy of Virginia is the sturdiest pillar which supports the fabric of the Constitution; and that the

people, "though in their opinions they may be mistaken, in their sentiments they are never wrong,"—with some such other dogmas as, a few years ago, he did not hold in very good repute. In this temper, he has of late embarked on the millpond of county affairs, and notwithstanding his amiable character and his doctrinary republicanism, I am told he keeps the peace as if he commanded a garrison, and administers justice like a Cadi.

He has some claim to supremacy in this last department, for during three years he smoked segars in a lawyer's office in Richmond, which enabled him to obtain a bird's-eye view of Blackstone and the Revised Code. Besides this, he was a member of a Law Debating Society, which ate oysters once a week in a cellar, and he wore, in accordance with the usage of most promising law students of that day, six cravats, one over the other, and yellow-topped boots, by which he was recognized as a blood of the metropolis. Having in this way qualified himself to assert and maintain his rights, he came to his estate, upon his arrival at age, a very model of landed gentlemen. Since that time his avocations have had a certain literary tincture, for having settled himself down as a married man, and got rid of his superfluous foppery, he rambled with wonderful assiduity through a wilderness of romances, poems, and dissertations, which are now collected in his library, and, with their battered blue covers, present a lively type of an army of continentals at the close of the war, or a hospital of invalids. These have all, at last, given way to the newspapers—a miscellaneous study very attractive and engrossing to country gentlemen. This line of study has rendered Meriwether a most perilous antagonist in the matter of legislative proceedings.

A landed proprietor, with a good house and a host of servants, is naturally a hospitable man. A guest is one of his daily wants. A friendly face is a necessary of life, without which the heart is apt to starve, or a luxury without

34 Mr. Adams, John Quincy Adams, sixth President of the United States (1825-1829) • 53 Cadi, a Mohammedan magistrate • 57 Blackstone, the famous *Commentaries* of Sir William Blackstone (1723-1780), English jurist. In his "Speech for Conciliation with the Colonies" (1775), Edmund Burke commented on the popularity of this work in America: "I hear that they have sold nearly as many of Blackstone's *Commentaries* in America as in England" • 63 a blood, a man of spirit and fashion • 72 continentals, American soldiers in the Revolutionary War

which it grows parsimonious. Men who are isolated from society by distance, feel these wants by an instinct, and are grateful for the opportunity to relieve them. In Meriwether, the sentiment goes beyond this. It has, besides, something dialectic in it. His house is open to every body, as freely almost as an inn. But to see him when he has had the good fortune to pick up an intelligent, educated gentleman,—and particularly one who listens well!—a respectable, assentatious stranger!—All the better if he
 10 has been in the Legislature, or better still, if in Congress. Such a person caught within the purlieus of Swallow Barn, may set down one week's entertainment as certain—inevitable, and as many more as he likes—the more the merrier. He will know something of the quality of Meriwether's rhetoric before he is gone.

Then again, it is very pleasant to see Frank's kind and considerate bearing towards his servants and dependents. His slaves appreciate this, and hold him in most affectionate reverence, and, therefore, are not only contented,
 20 but happy under his dominion.

Meriwether is not much of a traveller. He has never been in New England, and very seldom beyond the confines of Virginia. He makes now and then a winter excursion to Richmond, which, I rather think, he considers as the centre of civilization, and towards autumn, it is his custom to journey over the mountain to the Springs, which he is obliged to do to avoid the unhealthy season in the tide-water region. But the upper country is not much to his taste, and would not be endured by him if it
 30 were not for the crowds that resort there for the same reason which operates upon him; and I may add,—though he would not confess it—for the opportunity this course affords him for discussion of opinions.

He thinks lightly of the mercantile interest, and, in fact, undervalues the manners of the large cities generally. He believes that those who live in them are hollow-hearted and insincere, and wanting in that substantial intelligence and virtue, which he affirms to be characteristic of the country. He is an ardent admirer of the genius of Virginia,
 40 and is frequent in his commendation of a toast in which the state is compared to the mother of the Gracchi—indeed, it is a familiar thing with him to speak of the aristocracy of talent as only inferior to that of the landed interest,—the idea of a freeholder inferring to his mind a certain constitutional pre-eminence in all the virtues of citizenship, as a matter of course.

The solitary elevation of a country gentleman, to do in the world, begets some magnificent notions. It comes as infallible as the Pope; gradually acquires a habit of making long speeches, is apt to be impatient of contradiction, and is always very touchy on the point of honor. There is nothing more conclusive than a man's logic any where, but in the country, among dependents, it flows with the smooth and unrelenting course of a full stream irrigating a meadow, and depositing its mud in fertilizing luxuriance. Meriwether's notions, about Swallow Barn, import absolute verity. I have discovered that they are not so current out of jurisdiction. Indeed, every now and then, we have quite obstinate discussions when some of the neighboring potentates, who stand in the same sphere with Frank, come to the house, for these worthies have opinions of their own, and nothing can be more dogged than the conflict between them. They sometimes fire away at one another with a most amiable and unconvincible hardihood for a whole evening, bandying interjections, and making bows, and saying shrewd things with all the courtesy imaginable. But for unextinguishable pertinacity in argument, and utter impregnability of belief, there is no potentate like your country-gentleman who reads the newspapers. When one of these discussions fairly gets underway, it never comes to an anchor again of its own accord—it is either blown out so far to sea as to be given up as lost, or puts into port for distress for want of documents—or is upset by a call for the boot-jack and slipper which is something like the previous question in Congress.

If my worthy cousin be somewhat over-argumentative as a politician, he restores the equilibrium of his character by a considerate coolness in religious matters. He piques himself upon being a high-churchman, but is the most diligent frequenter of places of worship, and very seldom permits himself to get into a dispute upon points of faith. If Mr. Chub, the Presbyterian tutor in the family, ever succeeds in drawing him into this field, as occasionally has the address to do, Meriwether is sure to fly the course, he gets puzzled with scripture names, a

41 the Gracchi, brothers and reforming statesmen in Rome in the second century B.C. • 76 the previous question, in parliamentary practice the question whether the main issue shall be voted on at once without further debate • 80 high-churchman, a member of the party of the Episcopal Church which attaches much importance to forms and ceremonies

makes some odd mistakes between Peter and Paul, and then generally turns the parson over to his wife, who, he says, has an astonishing memory.

He is somewhat distinguished as a breeder of blooded horses, and, ever since the celebrated race between Eclipse and Henry, has taken to this occupation with a renewed zeal, as a matter affecting the reputation of the state. It is delightful to hear him expatiate upon the value, importance, and patriotic bearing of this employment, and to listen to all his technical lore touching the mystery of horse-craft. He has some fine colts in training, which are committed to the care of a pragmatistical old Negro, named Carey, who, in his reverence for the occupation, is the perfect shadow of his master. He and Frank hold grave and momentous consultations upon the affairs of the stable, in such a sagacious strain of equal debate, that it would puzzle a spectator to tell which was the leading member in the council. Carey thinks he knows a great deal more upon the subject than his master, and their frequent intercourse has begot a familiarity in the old Negro which is almost fatal to Meriwether's supremacy. The old man feels himself authorized to maintain his positions according to the freest parliamentary form, and sometimes with a violence of asseveration that compels his master to abandon his ground, purely out of faint-heartedness. Meriwether gets a little nettled by Carey's doggedness, but generally turns it off in a laugh. I was in the stable with him, a few mornings after my arrival, when he ventured to expostulate with the venerable groom upon a professional point, but the controversy terminated in its customary way. "Who sot you up, Master Frank, to tell me how to fodder that 'ere cretur, when I as good as nursed you on my knee?"

"Well, tie up your tongue, you old mastiff," replied Frank, as he walked out of the stable, "and cease growling, since you will have it your own way,"—and then, as we left the old man's presence, he added, with an affectionate chuckle—"a faithful old cur, too, that snaps at me out of pure honesty, he has not many years left, and it does no harm to humor him!"

Chapter XXXIII

THE DINNER TABLE

About half after three, Carey, with a solemn official air which was well set off by a singularly stiff costume,—

assuming for the nonce the rank and station of head-waiter,—announced that dinner was on the table. The greater part of the company was collected in the drawing-room, some two or three loitered through the hall. At the summons, Mr. Tracy, with that alacrious motion which sometimes belongs to old men, sprang upon his feet and hastened to the opposite side of the room, where my cousin Lucretia was seated, took her hand, and, with a 50 repetition of formal bows after a fashion in vogue in the last century, led her to the dining-room. Meriwether stood at the door beckoning to one after another of his guests, with that kind smile and unstudied grace which are natural to a benevolent temper, his tall figure somewhat constrained in its motion by an infusion of modesty, which is always discernible in him when placed in any conspicuous position. As soon as Mr. Tracy led the way, Swansdown, with some particularity, offered his arm to Bel. The other ladies found an escort among the 60 more gallant of the gentlemen, and after them the rest of the party pressed forward pell-mell towards the dining-room, leaving Meriwether to bring up the rear, who, upon arriving at the table, with that considerateness which never forsakes him in the smallest matters, placed Mr. Wart, Mr. Chub, and one or two of his elder guests near his own seat.

I must not forget to mention, that before we had taken our chairs, Mistress Winkle, decked out in all the pomp of silk and muslin, sailed, as it were, with muffled 70 oars into the room from a side door, and, with a prim and stealthy motion, deposited her time-worn person near to my cousin Lucretia. It is a custom of affectionate courtesy in the family, to accord to this venerable relic of the past generation the civility of a place at table. Mr. Tracy was aware of Meriwether's feelings towards the aged dame, and, prompted by his overflowing zeal on the present occasion to manifest his deference to his host, he no sooner observed her than he broke out into a jocose and gallant recognition —

"Mistress Winkle! what, my old friend! It rejoices me to see you looking so well—and so youthful! The world goes merrily with you. Gad's-my life! if Colonel Tarleton were only alive again to make another visit to the James River, it would be hard to persuade him that time had

83 Tarleton, Sir Banastre Tarleton (1754-1833), English officer in America during the Revolutionary War

gained so small a victory over the romping girl whom he had the impertinence to chuckle under the chin so boldly. A saucy and stark trooper he was in those days, Mistress Winkle! But the gout, the gout, I warrant, did his business for him long ago! Ha, ha! You hav'n't forgot old times, Mistress Winkle, although they have well nigh forgotten you."

The housekeeper, during this outbreak, courtesied, hemmed and smiled, and, with much confusion, rustled her silken folds in her chair, with somewhat of the motion of a motherly hen in the process of incubation. Mr Tracy had touched upon an incident which, for nearly half a century, had been a theme that warmed up all her self-complacency, and which owed its origin to one of the English partisan's forays upon the river side, during the Revolution, in which he was said to have made himself very much at home at Swallow Barn, and to have bestowed some complimentary notice upon the then buxom and blooming dependant of the family.

20 The table was furnished with a profusion of the delicacies afforded by the country, and, notwithstanding it was much more ample than the accommodation of the guests required, it seemed to be stored rather with a reference to its own dimensions than to the number or wants of those who were collected around it. At the head, immediately under the eye of our hostess, in the customary pride of place, was deposited a goodly ham of bacon, rich in its own perfections, as well as in the endemic honors that belong to it in the Old Dominion.

30 According to a usage worthy of imitation, it was clothed in its own dark skin, which the imaginative mistress of the kitchen had embellished by carving into some fanciful figures. The opposite end of the table smoked with a huge roasted saddle of mutton, which seemed, from its trim and spruce air, ready to gallop off the dish. Between these two extremes was scattered an enticing diversity of poultry, prepared with many savory adjuncts, and especially that topical luxury, which yet so slowly finds its way northward,—fried chickens,—sworn brother to the

40 ham, and old Virginia's standard dish. The intervening spaces displayed a profusion of the products of the garden, nor were oysters and crabs wanting where room allowed; and, where nothing else could be deposited, as if scrupulous of showing a bare spot of the table-cloth, the bountiful forethought of Mistress Winkle had provided a choice selection of pickles of every color and kind. From

the whole array of the board it was obvious, that dance and variety were deemed no less essential to entertainment, than the excellence of the viands.

A bevy of domestics, in every stage of training, tended upon the table, presenting a lively type of progress of civilization, or the march of intellect, a veteran waiting-man being well-contrasted with the half-monkey, half-boy, who seemed to have been for the first time admitted to the parlor, whilst, between the two, were exhibited the successive degrees that marked the advance from the young savage to the sedate and sophisticated image of the old-fashioned negro nobility. It was equal to a gallery of caricatures, a sort of scenic representation upon man in his various stages, with his odd imitations illustrated in the broadest lines. Each had a little of some article of coxcombry to his dress; a pewter button fastened to the shirt for a breast-pin, a dingy parti-colored ribbon, ostentatiously displayed across the breast, one end lodged in the waistcoat pocket, or a preposterous cravat girding up an exorbitantly starched shirt collar that rivalled the driven snow, as it traversed cheek to cheek, black as midnight, and fretted the lower cartilage of a pair of refractory, raven-hued ears. One, more conceited than the rest, had platted his wool (after a fashion common amongst the negroes) into five or six short curls, both before and behind, whilst the visages of the whole group wore that grave, momentous elongation which was peculiar to the African face, and which is eminently adapted to express the official care and personal importance of the wearer.

As the more immediate, and what is universally conceded to be the more important, business of the dinner was discussed, to wit, the process of dulling the edge of appetite, the merriment of the company rose in proportion to the leisure afforded to its exercise, and the elasticity of the guests gently slid into the vivacity of the younger Mr Tracy did not lose for an instant that aquated cavalier air which he had assumed on entering the room. As Harvey Riggs expressed it, "he was perfectly polite and very precisely gay." The ladies, for their time, gave their tone to the table; and, under this influence, we found ourselves falling into detached circles, where each pursued its separate theme, sometimes loud and rapid converse, mingled with frequent bursts of laughter that spread an undistinguishable din throughout the room, and sometimes in low and confidential mu-

murings, of which it was impossible to say whether they were grave or gay. Swansdown's voice was poured into Bel's ear in gentle and unremitting whispers, of which Ned Hazard alone, of all the guests—to judge by his intense and abstracted gaze—was able to unriddle the import. Prudence, equally abstracted, was unnaturally merry, and laughed much more than was necessary at Harvey's jokes. Catharine talked with singular sagacity, and listened, with still more singular earnestness, to Mr Beverley, who was instructing her, with equal interest and eloquence, upon the wholesome effects he had found in the abundant use of flannel—which he described with unnecessary amplitude of details—in repelling the assaults of an ancient enemy, the rheumatism. Now and then a loud and rather obstreperous laugh, not altogether suited to the region he inhabited, and which some such consciousness seemed abruptly to arrest, was set up by Taliaferro Hedges. This worthy had already begun to occupy that questionable ground which a gentleman of loose habits and decaying reputation is pretty sure to arrive at in his descending career. Dissipation had lowered him somewhat in the world, and had already introduced him to a class of associates who had made a visible impression on his manners, a circumstance which very few men have so little shrewdness as not to perceive, nor so much hardihood as not to be ashamed of. In truth, Toll had imbibed some of the slang, and much of the boisterousness of the bar-room, but he had not yet given such unequivocal indications of the incurableness of his infirmity, as to induce his acquaintances (who for the most part upheld him on some family consideration) to exclude him from their houses. On the contrary, a certain strain of disorderly but generous companionship, breaking out and shining above the vices to which it was akin, still recommended him to the favor of those who were unwilling to desert him as long as his case was not absolutely hopeless. The course of intemperance, however, gravitates by a fatal law downwards—it is unfortunately of the most rare occurrence, that the mind which has once been debauched by a habit of intoxication, ever regains that poise of self-respect which preserves the purity of the individual. It was easy to perceive that Hedges labored under a perpetual struggle to constrain his deportment within even the broader boundaries that limit the indulgence of the class of gentlemen.

Amidst these diversified exhibitions, Mr. Wart ate like

a man with a good appetite, and gave himself no trouble to talk, except in the intervals of serving his plate; for he remarked, "that he was not accustomed to these late hours, and thought them apt to make one surcharge his stomach," whilst the parson, who sat opposite to him, wore a perpetual smile during the repast, sometimes looking as if he intended to say something, but more generally watching every word that fell from Mr. Wart's lips.

The courses disappeared, a rich dessert came and went, the spirits of the company rose still higher. The wine, iced almost to the freezing point, moved in a busy sphere; for the intense heat of the weather gave it an additional zest. We had made the usual libations to the ladies, and exchanged the frequent healths, according to the hack-
 60 neyed and unmeaning custom which prevails unquestioned, I suppose, over Christendom, when the epoch arrived at which, by the arbitrary law of the feast, the womankind are expected to withdraw, that time which, if I were a sovereign in this dinner-party realm, should be blotted from the festive calendar. I should shame me to acknowledge that there was any moment in the social day when it was unseemly for the temperate sex to look upon or listen to the lord of creation in his pastimes, but I was neither monarch nor magician, and so we were left
 70 alone to pursue unreproved the frolic current upon which we had been lifted. Before us glittered the dark sea of the table, studded over with "carracks," "argosies," and "barks" freighted with the wealth of the Azores, Spain, Portugal and France, and with the lighters by which these precious bulks were unladen, and deposited in their proper receptacles. In sooth, the wine was very good.

Almost the first words that were spoken, after we had readjusted ourselves from the stir occasioned by the retreat of the ladies, came from Mr. Tracy. He had been
 80 waiting for a suitable opportunity to acquit himself of a grave and formal duty. The occasion of the dinner, he conceived, demanded of him a peculiar compliment to the host. His strict and refined sensitiveness to the requirements of gentle breeding would have forbidden him to sleep quietly in his bed with this task unperformed; and therefore, with a tremulous and fluttered motion,

59 libations to the ladies, drinking their healths • 73 carracks, large ships formerly used by the Spaniards in the East India trade • 73 argosies, merchant vessels of the largest size • 75 lighters, boats used in unloading vessels not lying at wharves

like that of a young orator awe-struck at the thought of making a speech, he rose to command the attention of the table. A faint-hearted smile sat rigidly upon his visage, "like moonlight on a marble statue,"—his eye glassy, his cheek pale, and his gesture contrived to a faint and feeble counterfeit of mirth. It was evident the old gentleman was not accustomed to public speaking and so he remarked, as he turned towards Meriwether, and continued an address somewhat in the following terms —

10 "Since we have, my dear sir, so fortunately succeeded in putting an end to a vexatious question,—which, although it has resulted in throwing upon my hands a few barren and unprofitable acres, has given all the glory of the settlement to you,—(here his voice quavered considerably,) for it was indubitably, my very worthy and excellent friend, at your instance and suggestion, that we struck out the happy thought of leaving it to the arbitrement of our kind friends —and to tell the truth (at this point the old gentleman brightened up a little and looked
20 jocular, although he still had the quaver,) I don't know but I would as lief have the lawsuit as the land,—seeing that it has been the occasion of many merry meetings — I will take upon myself to propose to this good company of neighbors and friends, that we shall drink,—ha ha! (continued the veteran, waving his hand above his head, and inclining towards the table with a gay gesticulation,) that we shall drink, gentlemen, a bumper. (here he took the decanter in his hand, and filled his glass) "Fill your glasses all around,—no flinching!"

30 "Fill up! fill up!" cried every one, anxious to help the old gentleman out of his difficulties, "Mr. Tracy's toast in a bumper!"

"Here," continued Mr. Tracy, holding his glass on high with a trembling hand, "here is to our admirable host, Mister Francis Meriwether of Swallow Barn!—a sensible and enlightened gentleman,—a considerate landlord,—a kind neighbor, an independent, upright, sensible,—enlightened—(here he became sadly puzzled for a word, and paused for a full half minute,) reasonable defender
40 of right and justice, a man that is not headstrong (his perplexity still increasing) on the score of landmarks, or indeed on any score!—I say, gentlemen, here's wishing him success in all his aims, and long life to enjoy a great many such joyous meetings as the present; besides—"

"Health of our host, and many such meetings!" exclaimed Mr. Wart, interrupting the speaker, and thus

cutting short a toast of which it was evident Mr. could not find the end.

"Health to our host,—joyous meetings!" cried on a dozen voices

And thus relieved from his floundering progress the old gentleman took his seat in great glee, remarking the person next to him, "that he was not much proficient in making dinner speeches, but that he could get through very well when he was once pushed to it."

Meriwether sat out this adulatory and unexpected assault with painful emotions, sinking under the weight of his natural diffidence. The rest of the company sat in silence the slow, drawling and distinct elocution of the speaker, with an amused and ludicrous suspense. Mr. Wart's interruption, which was the signal for a shower of approbation; and in the uproar that ensued, the old gentleman was quaffed, while Mr. Tracy chuckled at the success of his essay, and Meriwether stood bowing and blushing with the bashfulness of a girl.

When the clamor subsided, Philly Wart remarked in a quiet tone—

"I think our friend Meriwether will scarcely expect a speech in reply to this compliment. The fashion is to return the broadside whenever it is given."

"I pray you," said Meriwether, with an emotion amounting almost to alarm, "do not ask me to say anything that will have an insuperable aversion to such efforts. I will not stand it. Mr. Tracy knows how kindly I take the expression of his regard."

Harvey Riggs, who observed Meriwether's real embarrassment, rose to divert the attention of the company to another quarter, and putting on an air of great solemnity observed that he was unwilling to lose so favorable an opportunity of paying a tribute to two very worthy gentlemen. On the present occasion he might say, conspicuously, "I mean, gentlemen," said he, "Mr. Philpot and Mr. Singleton Oglethorpe Swansdown. Replie gentlemen! Here's to the health of the pacificators—men whose judgments could not be led astray by the decisions of courts, and whose energies could not be subdued by the formidable difficulties of the Apple

"Bravo!" rang from every mouth.

"A speech from Mr. Swansdown!" exclaimed Ned Har-

"A speech from Mr. Swansdown!" echoed from all quarters.

The gentleman called on rose from his chair. Harvey Riggs rapped upon the table to command silence, there followed a pause.

"I do not rise to make a speech," said Swansdown with great formality of manner.

"Hear him!" shouted Harvey.

"I do not rise, gentlemen," said the other, "to make a speech, but custom, in these innovating times, almost imperatively exacts that the festive, spontaneous and unmerited encomiums of the table,—that, I remark, the festive, spontaneous and unmerited encomiums of the table, generated in the heat of convivial zeal, should meet their response in the same hilarious spirit in which they find their origin. Gentlemen will understand me, it is not my purpose to rebuke a custom which may, and doubtless does, contribute to the embellishment of the social relations. It is merely my purpose, on the present occasion, as an humble, and, if I know myself, an unpretending individual, to respond to the free and unbidden expressions of the good-will of this company to myself, and my distinguished colleague, with whom my name has been associated. In his name therefore, and in my own, I desire to acknowledge the deep sense we entertain of the compliment conveyed in the toast of our worthy fellow-guest (Philly Wart bowed and smiled.) It will be amongst the proudest topics of remembrance left to me, gentlemen, amidst the vicissitudes of a changeful life, that the personal sacrifices I have made and the toil I have bestowed, in the successful endeavor to define and establish the complex relations and rights of two estimable friends, have found a favorable and flattering approval in the good sense of this enlightened company. If it should further result, that the great principles developed, and, to a certain extent, promulgated in this endeavor, should hereafter redound to the advantage of the generation amongst which I have the honor to live, I need not say how sincerely I shall rejoice that neither my friend nor myself have lived in vain. I propose, gentlemen, in return,—'The freeholders of the Old Dominion, the prosperity of the Commonwealth reposes securely upon their intelligence!'"

"Amen!" said Hazard in an under tone, intended only for my ear, "and may they never fail to do honor to unpretending merit!"

"I suppose," said Mr. Wart, speaking in an unusually placid tone, as he rose with a face reefed into half its ordinary length with smiles, and, at the same time, expressing arch waggery, "I suppose it is necessary that I also should speak to this point. There are, if your honor pleases—Mr. President—ordinarily two different motives for proposing the health of an individual at table. The one is a *bona fide* purpose to exalt and honor the person proposed, by a public manifestation of the common feeling toward him, by reason of some certain act or deed by him performed, entitling him, in the estimation of the persons proposing, to applause. In this point of view, my worthy friend who has just spoken, seems to have considered the case in hand. The second motive for the act, may it please you,—Mr. Meriwether,—may be, and such I take it, a certain intent, *inter alia*, to promote and encourage cheerful companionship. With whatever gravity the *res gesta* may be conducted, I hold that it is to be looked upon *diverso intuitu*, according to the temper and condition of the company for the time being.

"Now, sir, I will not venture to say that my learned friend has not wisely considered the toast in the present instance, as intended and made in all gravity of purpose; but, seeing that this company did certainly manifest some levity on the occasion, I choose, sir, to stand on the sunny side of the question, as the safest, in the present emergency. *Vere sapit*, sir, *qui alieno periculo sapit*; I, therefore, sir, go for the joke. I have sometimes seen an old hound tongue upon a false scent, but then there is music made, and, I believe, that is pretty much all that is wanting on the present occasion.

"When a man is praised to his face, gentlemen of the jury," he continued, rising into an energetic key, and mistaking the tribunal he was addressing,—*"I beg pardon, gentlemen, you see the ermine and the woollack will stick to my tongue. Omnibus hoc vitium cantoribus, as an ancient author (I forget his name) very appropriately remarks. What is bred in the bone—you know the proverb. But when a man is praised to his face,"—here the*

62 *inter alia*, among other things • 64 *res gesta*, the business in hand • 65 *diverso intuitu*, in a different view • 73 *Vere . . . sapit*. He is truly wise who is wise from another's peril • 81 *ermine*, office of judge, whose robe is lined with ermine • 81 *woollack*, the seat of the lord chancellor in the English House of Lords • 82 *Omnibus . . . cantoribus*. All poets have this vice. The "ancient author" is Horace, in *Satires*, I, iii

speaker stretched out his arm, and stood silent for a moment, as if endeavoring to recollect what he intended to say,—for he had lost the thread of his speech,—and during this pause his countenance grew so irresistibly comic that the whole company, who had from the first been collecting a storm of laughter, now broke out with concentrated violence

"Poh, Ned Hazard! you put every thing I had to say out of my head with that horse-laugh," continued the orator, looking at Ned, who had thrown himself back in his chair, giving full vent to his merriment.

Philly patiently awaited the blowing over of this whirlwind, with an increased drollery of look, and then, as it subsided, he made a bow with his glass in his hand, saying, in an emphatic way, "your healths, gentlemen!" swallowed his wine, and took his seat, amidst renewed peals of mirth. At the same moment, from the depths of this tumult, was distinctly heard the voice of Mr Chub, who cried out, with his eyes brimful of tears, and a half suffocated voice,—“A prodigious queer man, that Mister Philly Wart!”

Segars were now introduced, the decanters were filled for the second time, and the flush of social enjoyment reddened into a deeper hue. Some one or two additional guests had just arrived, and taken their seats at the table, a full octave lower in tone than their excited comrades of the board: it was like the mingling of a few flats too many in a lively overture, but the custom of the soil sanctions and invites these irregularities, and it was not long before this rear-guard hastened on to the van. The scene presented a fine picture of careless, unmethodized and unenthralled hospitality, where the guests enjoyed themselves according to their varying impulses, whether in grave argumentation or toppling merriment. Now and then, a song,—none of the best in execution,—was sung, and after that a boisterous catch was trolled, with some decisive thumpings on the table, by way of marking time, in which it might be perceived that even old Mr Tracy was infected with the prevailing glee, for his eyes sparkled, and his head shook to the music, and his fist was brandished with a downward swing, almost in the style of a professed royster. In the intervals of the singing a story was told. Sometimes the conversation almost sank into a murmur, sometimes it mounted to a gale, its billow rolling in with a deep-toned, heavy, swelling roar, until it was spent in a general explosion. Not unfrequently, a collapse of the din surprised some single speaker in

the high road of his narrative, and thus detected his counting, in an upper key, some incident which he perhaps addressed to one auditor, and which, not a to his disconcertment, he found himself compelled to communicate to the whole circle. It was in such a terval as this, that Hedges was left struggling through the following colloquy with Ralph Tracy:—

"I made a narrow escape "

"How was that?" asked Ralph

"Oh, a very serious accident, I assure you! I came in an ace of getting yoked that trip, married, sir, but that's lovely!"

"No!" exclaimed Ralph. "you didn't, sure enough Toll?"

"If I didn't," replied Toll, "I wish I may be——(he slipped out a round, full and expressive maledict I'll tell you how it was. At the Sweet Springs I acquainted with a preposterously rich old sugar planter from Louisiana. He had his wife and daughter with and a whole squad of servants. Forty thousand dollars a year! and the daughter as frenchified as a sunflower—so particularly young neither, but looking as innocent if she wa'n't worth one copper. I went in for grace, began to show out a few of my ineffable pulchritude and what do you think?—she was most horribly struck. I put her into an ecstasy with one of my pigeon-wing. She wanted to find out my name "

"Well, and what come of it?"

"That were only three things," said Toll, "in the way. If it had not been for them, I should have been planning sugar this day. First, the old one didn't take to it kindly, and then, the mother began to rear a little at too, but I shouldn't have considered that of much count, only the daughter herself seemed as much as to insinuate that the thing wouldn't do "

"Did you carry it so far as to put the question to her?"

"Not exactly so far as that. No, no, I was not such a fool as to come to the *ore tenus*: I went on the non-committal principle. She as much as signified to a friend of mine, that she didn't wish to make my acquaintance, and so, I took the hint and was off—wa'n't that clear, Ralph?"

This concluding interrogatory was followed up by a

73 pigeon-wing, a fancy step executed by jumping and striking legs together • 85 ore tenus, by word of mouth

of Toll's loud cachinations, that might have been heard a hundred paces from the house, and which was, as usual, chopped short by his perceiving that it did not take effect so decidedly as he expected upon the company. Upon this, Hedges became rather silent for the next half hour

The dining-room had for some time past been gradually assuming that soft, mellow, foggy tint which is said by the painters to spread such a charm over an Indian-summer landscape. The volumes of smoke roiled majestically across the table, and then rose into the upper air, where they spread themselves out into a rich, dun mass, and flung a certain hazy witchery over the scene. The busy riot of revelry seemed to echo through another Cimmerium, and the figures of the guests were clad in even a spectral obscurity. Motionless, exact and sombre as an Egyptian obelisk, old Carey's form was dimly seen relieved against the light of a window, near one end of the table, all the other domestics had fled, and the veteran body-guard alone remained on duty. The wine went round with the regularity of a city milk-cart, stopping at every door. A mine of wit was continually pouring out its recondite treasures: the guests were every moment growing less fastidious; and the banquet had already reached that stage when second-rate wit is as good as the best, if not better. The good humor of our friend Wart had attracted the waggy of Riggs and Hazard, and they were artfully soliciting and provoking him to a more conspicuous part in the farce of the evening. Like Munchausen's frozen horn, the counsellor was rapidly melting into a noisy temperature. He had volunteered some two or three stories, of which he seemed, somehow or other, to have lost the pith. In short, it was supposed, from some droll expression of the eye, and a slight faltering of the tongue, that Mr. Wart was growing gay.

Harvey Riggs, when matters were precisely in this condition, contrived, by signs and secret messages, to concentrate the attention of the company upon the old lawyer, just as he was setting out with the history of a famous campaign.

"You all remember the late war," said Philly, looking around, and finding the eyes of every one upon him.

This announcement was followed by a laugh of applause, indicating the interest that all took in the commencement of the narrative.

"There is certainly nothing particularly calculated to excite your risible faculties in that!" said he, as much amused as his auditory.—"I was honored by his Excel-

lency the Governor of Virginia with a commission as captain of a troop of horse, having been previously elected to that station by a unanimous vote at a meeting of the 50 corps."

"Explain the name of the troop," said Ned Hazard.

"The Invincible Blues," replied the other, "the uniform being a blue bobtail, and the corps having resolved that they would never be vanquished."

"I am told," interrupted Harvey Riggs, "that you furnished yourself with a new pair of yellow buckskin small-clothes on the occasion, and that with them and your blue bobtail you produced a sensation through the whole country."

"Faith!" said Mr. Chub, speaking across the table, "Mr. Riggs, I can assure you I don't think a horseman well mounted without leather small-clothes."

"I took prodigious pains," continued Philly, not heeding the interruption, "to infuse into my men the highest military discipline. There wasn't a man in the corps that couldn't carry his nag over any worm fence in the country,—throwing off the rider—"

"The rider of the fence, you mean," said Hazard dryly.

"To be sure I do!" replied Philly, with briskness, "you 70 don't suppose I meant to say that my men were *ex equis dejecti*—exhippiated, if I may be allowed to coin a word? No, sir, while the horse kept his legs, every man was like a horse-fly."

"What system of discipline did you introduce?" inquired Harvey.

"The system of foxhunting," answered Mr. Wart, "the very best that ever was used for cavalry."

"Go on," said Harvey.

"We received intelligence, somewhere in the summer 80 of eighteen hundred and thirteen, that old Admiral Warren was beginning to squint somewhat awfully at Norfolk, and rather taking liberties in Hampton Roads. *Ratione cujus*, as we lawyers say, it was thought prudent to call into immediate service some of the most efficient of the military force of the country, and, accordingly, up

14 Cimmerium, the abode of the Cimmerians, described by Homer as a remote realm of mist and gloom. • 28 Munchausen's frozen horn. In one of Munchausen's surprising adventures, the tunes played by the postilion were 'frozen up in the horn' and did not come out until the horn was hung on a peg near the kitchen fire. • 40 the late war, the War of 1812. • 71 *ex . . . dejecti*, thrown from their horses. • 72 *exhippiated*, literally, removed from his saddle-cloth. • 81 Admiral Warren, Sir John Borlase Warren (1752-1822), English admiral. • 84 *Ratione cujus*, by reason of which.

came an order addressed to me, commanding me to repair with my men, as speedily as possible, to the neighborhood of Craney Island. This summons operated like an electric shock. It was the first real flavor of gunpowder that the troop had ever snuffed. I never saw men behave better. It became my duty to take instant measures to meet the emergency. In the first place, I ordered a meeting of the troop at the Court House,—for I was resolved to do things coolly."

10 "You are mistaken, Mr. Wart," said Harvey, "in the order of your movements; the first thing that you did was to put on your new buskin breeches."

"Nonsense!" said the counsellor, "I called the meeting at the Court House, directing every man to be there in full equipment."

"And you sent forthwith to Richmond," interrupted Hazard, "for a white plume three feet long."

"Now, gentlemen!" said Philly, imploringly, "one at a time! if you wish to hear me out, let me go on. Well, 20 sir, the men met in complete order. Harry Davenport, (you remember him, Mr. Meriwether, a devil-may-care sort of a fellow, a perfect walking nuisance in time of peace, an indictable offence going at large!) he was my orderly, and the very best, I suppose, in Virginia. I furnished Harry (it was entirely a thought of my own) with a halbert, the shaft twelve feet long, and pointed with a foot of polished iron. As soon as I put this into his hands, the fellow set up one of his horse-laughes, and galloped about the square like a wild Cossack."

30 "I should think," said Meriwether, "that one of our countrymen would scarcely know what to do with a pole twelve feet long, after he had got into his saddle. However, I take it for granted you had good reason for what you did."

"The Polish lancers," replied Philly, "produced a terrible impression with a weapon somewhat similar."

"No matter," said Ned, "about the Polish lancers; let us get upon our campaign."

"Well," continued Mr. Wart, "I thought it would not 40 be amiss, before we started, to animate and encourage my fellows with a speech. So, I drew them up in a hollow square, and gave them a flourish that set them half crazy."

"That was just the way with Tyrtæus before Ithome!" exclaimed Mr. Chub, with great exultation, from the opposite side of the table. "I should like to have heard Mr. Wart exhorting his men!"

"I will tell you exactly what he said, for I was at the time," said Ned Hazard; "Follow me, my boys! the eyes of the world are upon you; keep upon my white plume, and let that be your rallying p

"Pish!" cried Philly, turning round and showing black teeth with a good-natured, half-tipsy grin, "no such thing. I told them, what it was my duty to them, that we had joined issue with the British Government, and had come to the *ultima ratio*: and they must now make up our minds to die on the field of country's honor, rather than see her soil polluted the footsteps of an invader, that an enemy was a door, threatening our firesides."

"You told them," interrupted Hazard again, "that the next morning's sun might find them stark and stiff gory, on the dew-besprinkled sod. I can remember expressions as well as if it were yesterday."

"I might have said something like that," replied Philly, "by way of encouragement to the men. However, you recollect well enough, Ned, that there was not a man in the corps whose mind was not as perfectly made up to die as to eat his dinner."

"All, except old Shakebag, the tavernkeeper," said Ned, "and he was short-winded and pursy, and might be excused for preferring his dinner."

"I except him," replied Mr. Wart, and then proceeded with his narrative. "As soon as I had finished my address I dissolved the square, and instantly took up the line march."

"You should say rather that you took up the charge," said Ned, "for you went out of the village in line, at a brisk speed, with swords brandishing above your heads. I led the way, with Harry Davenport close at your heels, thrusting his long lance right at the seat of your yellow buckskins, and shouting like a savage."

"What was that for?" I asked with some astonishment.

"Ned puts a coloring on it," replied the counsellor; "he did go out from the court house at a charge, but there was no brandishing of swords, we carried our swords, Mr. Littleton, in the charge, at arm's length, the blade being extended horizontally exactly parallel with the line of the eyes. I did this to give the men courage."

"How near was the enemy at this time?" I inquired.

43 Tyrtæus, a lyric poet of Greece in the seventh century B.C. • *ultima ratio*, the last argument

They had not landed," answered Ned gravely, "but were expected to land at Craney Island, about one hundred miles off."

Here was a shout of applause from the table

"I can tell you what," said Mr. Wart, for he was too much flustered to take any thing in joke that passed, "there is no time so important in a campaign as when an army first breaks ground. If you can keep your men in heart at the starting point, you may make them do what o you please afterwards."

"That's true!" said Mr. Chub, who had evinced great interest in Philly's narrative from the beginning, and was even more impervious than the lawyer himself to the waggery of the table. "Cyrus would never have persuaded the Greeks to march with him to Babylon, if he had not made them believe that they were going only against the Pisidians. Such stratagems are considered lawful in war. It was a masterly thing in my opinion, this device of Mr. Wart's."

"Had you severe service?" asked Meriwether.

"Tolerably severe," replied Philly, "while it lasted. It rained upon us nearly the whole way from here to Norfolk, and there was a good deal of ague and fever in the country at that time, which we ran great risk of taking, because we were obliged to keep up a guard night and day."

"You had an engagement I think I have heard?" said I.

"Pretty nearly the same thing," answered Mr. Wart. "The enemy never landed whilst I remained, except, I believe, to get some pigs and fowls on Craney Island. But we had frequent alarms, and several times were drawn up in a line of battle, which is more trying to men, Mr. Littleton, than actual fighting. It gave me a good opportunity to see what my fellows were made of. Harry Davenport was a perfect powder-magazine. The rascal wanted us one night to swim our horses over to the Island. Gad, I believe he would have gone by himself if I hadn't forbidden him!"

"Your campaign lasted some time?" said I.

"About a week," replied Philly. "No, I am mistaken, it was rather more, for it took us three days to return home. And such a set of madcaps as we had all the way back to the court house! Nothing but scrub races the whole distance!"

"Now," said Harry Riggs, looking at Mr. Wart with a face of sly railery, "now that you have got through this

celebrated campaign, tell us how many men you had."

"Seven rank and file," said Ned, answering for him

"Fiddle-de-dee!" exclaimed Mr. Wart. "I had twenty!"

"On your honor, as a trooper?" cried Ned.

50

"On my *voir dire*," said Philly, hesitating—"I had nine in uniform, and I forget how many were not in uniform,—because I didn't allow these fellows to go with us, but they had very good hearts for it. Nine men, bless your soul, sir, on horseback, strung out in Indian file, make a very formidable display!"

"Well, it was a very gallant thing, take it altogether," said Harvey. "So, gentlemen, fill your glasses. Here's to Captain Wart of the Invincible Blues, the genuine representative of the chivalry of the Old Dominion!"

60

As the feast drew to a close, the graver members of the party stole off to the drawing-room, leaving behind them that happy remnant which may be called the sifted wheat of the stack. There sat Harvey Riggs, with his broad, laughing face mellowed by wine and good cheer, and with an eye rendered kindly by long shining on merry meetings, lolling over two chairs, whilst he urged the potatoes like a seasoned man, and a thirsty. And there sat Meriwether, abstemious but mirthful, with a face and heart brimful of benevolence, beside him, the inimitable 70 original Philly Wart. And there, too, was seen the jolly parson, priestlike even over his cups, filled with wonder and joy to see the tide of mirth run so in the flood, ever and anon turning, with bewildered eagerness, from one to another of his compotators, in doubt as to which pleased him most. And there, too, above all, was Ned Hazard, an imp of laughter, with his left arm dangling over the back of his chair, and his right lifting up his replenished glass on high, to catch its sparkling beams in the light, his head tossed negligently back upon his shoulder, and from his mouth forth issuing, with an elongated puff, that richer essence than incense of Araby: his dog Wilful, too, privileged as himself, with his faithful face recumbent between his master's knees.

Such are the images that gladden the old-fashioned was-sail of Virginia.

William Gilmore Simms

1806 • 1870

"By far the most virile and interesting figure of the Old South" is Parrington's just estimate of William Gilmore Simms. Though born in the most aristocratic of Southern cities, Charleston, South Carolina, Simms did not belong to the aristocracy. The death of his mother and his father's removal to Mississippi left the boy to the care of an impoverished grandmother. His schooling was irregular, for a time, he was apprenticed to a druggist. At the age of eighteen, he visited his father in Mississippi, where he saw the mixed life of the frontier. His observations were to serve him well in his writings. After his return to Charleston, he first experimented in poetry and journalism and then turned to the writing of fiction, his first novel appearing in 1833. Two years later he achieved a popular success with *The Yemassee*. For a good while his works were more favorably received in the North than in his native city, where an eighteenth-century classical taste in literature persisted longer than almost anywhere else. By marriage in 1836 he connected himself with the planter aristocracy and acquired the country estate, midway between Charleston and Augusta, known as "The Woodlands." Here Simms wrote his books and entertained his friends.

In the 1850's he became the leader of a group of younger writers in Charleston, which included the poets Paul Hamilton Hayne and Henry Timrod, he was instrumental, together with the other members of the group, in founding the distinguished though short-lived *Russell's Magazine* (1857-1860). In the 1850's, also, he became an active opponent of abolitionism and

contributed to the Southern manifesto, *The Pro-Sla Argument* (Charleston, 1853). The Northern invasion of South Carolina inflicted severe personal hardship on Simms, among them, the burning of his house and loss of a fine library.

Simms was a prolific writer. Trent's "partial bibliography" lists eighty separate publications, thirty-five of which are classified as "romances, novelettes, and lected stories." His best writing includes three kinds of fiction: (1) the "border romance," of which *Guy R* (1834), *Richard Hurd* (1838), and *The Bon Beagles* (1840) are examples; (2) the romance of Indian warfare, of which *The Yemassee* (1835) is the best illustration, and (3) the romance of the American Revolution, the kind in which he was most prolific and most successful. From the many titles in the last category the following may be selected: *The Partisan* (1833), *Mellichampe* (1836), and *Katharine Walton* (1851), which form a trilogy; and *Woodcraft* (1854) and *Forayers* (1855), which present Simms' best comic character, Captain Porgy.

Simms' books are vigorous tales of adventure in wilderness and swamp. He has often been regarded as a lesser Cooper, but this is an uncritical view because Simms' materials and methods were his own. He appropriated the rich literary provinces, the frontier of the old Southwest and South Carolina during the American Revolution, and he handled his materials with vividness and realistic force. Parrington compares Simms with the early English novelists, Henry Fielding and Tobias Smollett.

and notes the element of the picaresque as particularly distinguishing his work from Cooper's

Simms has not been much read in the present century, but there is reason to believe that with the better study of American literature his worth will be increasingly recognized. The late Professor Trent, in our only full-length biography of Simms, summarized his merits as follows "The romances of Simms deal with an eventful period, when a young people was struggling for its rights. They show how high and low, rich and poor, were animated by a common patriotism, how they suffered for the cause they espoused, how they triumphed

through their bravery and faith. They make the reader familiar with great characters like Marion, and with historic events of no little importance to a nation destined to greatness. Moreover, they are full of the freshness of swamp and forest, of the languorous charm of Southern climate and scenery. They are full of the heroic deeds of common, unlettered men . . . No one will ever do the same work as well, and it was worth doing"

The Yemassee, ed. Alexander Cowie, New York, 1937 (The other romances are out of print) • William P. Trent, *William Gilmore Simms*, Boston, 1892 • V. L. Parrington, 'William Gilmore Simms,' *The Romantic Revolution in America*, New York, 1927

From

The Forayers

The time of *The Forayers* is the summer of 1781, the place, the vicinity of Orangeburg, about one hundred miles northwest of Charleston, in South Carolina. Simms' book portrays vividly the chaotic conditions in the colony. Many citizens were Loyalists, many others were cautiously neutral. The British and American armies met in minor skirmishes but avoided a decisive engagement. The "parsons," Marion's gallant troop of cavalry, harassed the enemy at every turn, embarrassing his movements. In the general confusion which prevailed, bands of outlaws plundered the countryside.

Against this background, Simms tells a vigorous and enormously complicated story of adventures in love and battle. The action centers upon the changing fortunes of his hero, Willie Sinclair, who is a major in Marion's troop. He is the almost superhuman hero of romance, scouting the enemy, fighting the outlaws, and, of course, making love to the heroine. Sinclair's father is a Loyalist who bitterly resents his son's support of the Patriot cause. A picaresque outlaw, Hell-Fire Dick, and a capable villain,

Inglehardt, add appreciably to the hero's difficulties. Simms' story, unfinished at the end of the book (the heroine has just been mysteriously abducted), is continued and completed in *Eutaw: a Sequel to the Forayers* (1856).

The selection given here is an interlude which has only a slight connection with the main action of the novel. The British army under Lord Rawdon has just entered Orangeburg, the American forces commanded by General Nathanael Greene have taken a position a few miles away. During this brief respite from fighting, the Falstaffian Captain Porgy, of Marion's men, entertains at dinner a distinguished company: John Rutledge, Patriot governor of South Carolina, Greene, "Light-Horse Harry" Lee of Virginia, Marion, William Washington (a kinsman of George Washington), and other military chieftains. Our hero is not an invited guest, though he intrudes at the end of the banquet with a private message for General Marion. The account of Porgy's hospitality shows us Simms in one of his most zestful moods.

Chapter XLIII

THE FROG CONCERT AND CAMPAIGN

The army of Greene were taking rest for the first time for several days, at the close of that which witnessed their insulting demonstrations before the garrison of

Orangeburg. We have seen that their camp lay only four miles from that village:—a mellow sunset overspread the scene, and gentle breezes from the west cooled off sweetly the heat of a day, the ardency of which had severely tried all parties. The utmost languor for a while pervaded the encampment. The troops lay about upon the grass, under the trees, with half-shut eyes, enjoying that dreamy sensation which supervenes after fatigue, and before recuperation—mind and body in concert, as if it were, for mutual restoration. But few of the groups visible in our foreground, were capable of exertion, and but few, indeed, of those whom we do not see, were any more equal to it than those immediately before our eyes. Here and there, some important adjutant, ensign, or corporal, might be found, restlessly employed, giving orders about the use of moonshine. Troopers who had thrown their chief burdens on the loins of their horses, were, perhaps, the most lively, and groups of these were to be seen, busy in consuming the last drops of sunshine and Jamaica at command, while flirting the cards at "old sledge" from well-thumbed and greasy packs of "pictures," pitching quoits, or grooming horses. We confess that Marion's men were the chief sinners after this fashion, his boys of Santee, Pedee, Waccamaw, and the parish country generally, having a sort of natural calling for the fine arts, were busy with cards and coppers at every rest. Cards and dice constituted so many fine arts in their hands. It was the boast of some of them that they could extract all sorts of music, fun, and philosophy, from the four aces.

To this general rest and languor of the army, there were, however, some striking exceptions. The command of Marion stretched toward the Caw-caw. In the woods of this region, an hour before sunset, there might be seen a squad of twenty troopers, dark, bronzed, half-naked young savages, following with some interest, the speech and movements of a large, broad-shouldered, and great-bellied personage, wearing the uniform—somewhat doubtful, indeed, because of rents, stains, and deficiencies—of a captain of dragoons. He was on foot, and by no means active of movement, though taking his steps with the confidence of a war-horse, and the solid firmness of an elephant. He was a fine-looking fellow, in spite of the too great obtrusion upon the sight of his abdominal territory, a region which he, nevertheless, endeavored to circumscribe within reasonable

bounds by a girthing of leather, only half covered by a crimson sash, which no doubt had the desired effect to some degree, though at some sacrifice of the wearers' comforts. His face was full almost as the moon at full, of a ruddy brown, his head massive, chin large and prominent, eyes, bright but small, and mouth eager and in animation. His nose was decidedly intellectual. At his elbow stood a Negro, jacket off, and arms akimbo, who followed the motions of his superior with a mixed air of deference and assurance. Around these two the troops were gathered. Before the group, slaughtered and skinned, hanging from a tree, was one of the best beeves of the country—a poor skinny beast, weighing some two hundred pounds, gross, bone, meat, skin, off. Near at hand stood a small, rickety, covered wagon, the contents of which we may conjecture. It was one of Marion's recent captures from the convoy of Stewart, and contained, no doubt, some resources, the value of which may be guessed from the mysterious looks which were, every now and then, cast upon it by passing groups of thirsty dragoons, the very glances of which are apt to burst locks, and consume stores.

Our captain was busy with the commissariat of the brigade—not as the head of it, by no means, but as premier—head-counsellor, and legal and moral adviser.

"I tell you, Fickling, it will never do. Tell me the best were no better beeves to be had!" You have just taken what they please to give you. You are too modest. It is the infirmity of your family, whenever the interest is not absolutely and directly your own. We do this business of foraging for all the army, yet it seems that the mearest share is always to fall to us. Tell me nothing of Colonel Lee. He has an independent legion, let him pick up his own beeves. As for the field-officers, I do not see that their official position confers upon them any right to better tastes and appetites than a poor captain of partisan cavalry. I thank my stars that I have tastes which are as well cultivated as any brigadier or colonel in the army. And shall my tastes be defrauded, because these epauletted buffalos are greedy, and you are mealy-mouthed? Why the devil don't you assert yourself, man, and assist

20 Jamaica, rum from Jamaica in the West Indies • 20 old sledge card game better known as 'seven-up' • 24 Santee . . . Waccamaw rivers in South Carolina • 82 partisan, pertaining to a detached body of troops engaged in making forays and harassing an enemy

us, as you should, when the distribution of the beef takes place? You are a fool, Fickling, for your submission! Colonel Lee's man steps before you, and says, 'Colonel Lee;' and Colonel Washington's man starts up, and says, 'Colonel Washington'—and these, and a score of others, even while they speak, clap hands on the best pieces, and choose the fattest flanks, and when all are served, you steal up, with finger in your mouth, and murmur, 'Is anything left for General Marion?' Is that the way to do business? I tell you, 'No, sir!' Your true way is to take the best that offers—lay bold hands on it—nay, thrust it through with your naked sabre, and say, 'Marion's brand' Do the thing as you should, with the proper look and manner, and not a rapsallion in the army, representing no matter what division, dare lay hands on it after that! If they do, let me be at your elbow next time, with two or three fellows of my choosing!"

"But, Captain Porgy—"

"But me no buts, Mr. Fickling. I'll have you out of your office, if you do not but against this sort of distribution. You are to provide us; and, if you do not comprehend that our soldiers are just as deserving of good food as any continentals in the service, you are not fit for our service, and I'll have you out of it. General Marion himself submits quite too much to this sort of treatment. If there is a fine horse in the brigade, it is immediately wanted for some one of Lee's dragoons—some d—d henchman or bugleman—and off the colonel goes to Greene and tells him that his legion wants horses, and that Marion has enough and to spare, and we are allied upon to dismount, and provide other people. Yet here we kept day and night on the trot—off to-day for the Pon-pon and Savannah, to-morrow for the Pedee—now running down Tories, now cattle, seeking information, scouting, spying, called out at all hours, and how is this to be done, if we are to give up our horses. The brigade has covered all this low country, from the Pedee to the Savannah, for three years and more, and the best that is out in the forays that we alone make, are served out to these hungry feeders. I won't submit to it. They shall either have my horses nor my cattle, and if you take any more such beef as this, Fickling, when better is to be had, we'll turn you, neck and heels, out of your department."

"But, Captain Porgy—"

"See to it!"

"But—"

"See to it! That's all! I say no more—to you!—Tom!"
"Sah!"

"Get our share of that carrion! See what you can do with it. We must have soup, I suppose. Make a pilaw. We have plenty of pepper now. You can hardly get a decent steak from the beast. But do what you can. I must see after something more. We are to have company to-night. I have asked the great men, the big-wigs, the governor, Generals Marion and Sumter, the colonels of the brigade, Maham, Singleton, and a few others. Have everything ready by ten o'clock. Did you succeed in getting any melons?"

"I empty one patch, maussa."

"Whose?"

"I dunno quite 'zackly, but he's a fiel' jes' yer on de back ob de village. De melons is quite 'spectable."

"Ripe?"

"As de sunshine kin make 'em"

"Good! Do as much stealing in an honest way as you can! D—n the patriotism that can't eat stolen fruits!"

"Wha' else you guine hab, maussa"

"Who knows what I can get? I must look. There ought to be frogs here in abundance, and of good size. Not such as we can find in a rice reserve, Tom, but passable in war-time, and delicate enough for hot weather. I shall look out for a young alligator or two."

"Dat'll do! Gi' me two young alligator tail, and de frog, and I gi' you fus' rate turtle soup and ball, and steak"

"Must have a ragout, Tom. Have you seen no pigs about, Tom?"

"Nebber yer de fus' squeak, maussa"

"Well"—with a grunt—"we must do as we can. Come, boys, are you ready?"

"Ay, ay, captain!" from a score of voices, and a dozen active young fellows presented themselves, armed with wooden spears and knives.

"Where's George Dennison?"

A voice answered from the foot of a tree.

"Come along, George, don't be lazy. What you shall see this evening will enable you to beat Homer in a

19 But . . . buts Compare *Romeo and Juliet*, Act III, Scene v, l. 153
'Thank me no thankings nor proud me no prouds' • 51 pilaw, rice boiled with meat

new epic, in which cranes and frogs shall figure to posterity."

And, following the corpulent captain, the whole party pushed down to the swamp.

"There's a battalion for you, George Dennison. Not a rascal under six feet—half a dozen nearer seven I chose them specially for the expedition. They are our cranes, and are all eager for the war."

"And the frogs are sounding for the conflict Hear their tongues, already. The concert for the evening is begun. Hear the chirruping overture —

" Fry bacon—tea-table!
Coyong! coyong! coyong!
Supper on table—supper on table,
Eat if you're able!
Blood an' 'ounds—blood an' 'ounds'

"By the way, captain, a frog concert, would not be a bad speculation in the great cities of Europe. How a score or two of musical fellows, who had once or twice slept in our swamps, or lingered after sunset along our rice-fields, would make capital out of it! And such a sensation. What a hurly-burly, subdued to order, they could make of it."

"No doubt! The notes and tones occupy every note of the *gamut*! It is a rare original music. But the secret would lie in making the music tributary to satire. The frogs should furnish a running commentary on the follies and vices of society as in Aristophanes, only adapted to our times. It would task art admirably to work out of it an opera—the Loves of the Frogs! Little Squeaka, the dreaming sentimental damsel, just emerging into society—coming out, in her train some half a dozen Jockos—minnows of fashion, that sing in a love-lisp always—Therubina! ah! Therubina! Oh the rich fun of such a farcical! Of what a delightful variety would the affair admit! The lover, the villain, the priest, the mother—all the usual varieties, not forgetting Arlecchino. Of course, the frogs are not less fortunate than their betters. They have a Jack Pudding among them. The squirrels have I know."

"Don't forget the duenna! Hear her falsetto, squeaking through a score of crevices in her broken teeth.—

" 'On your knees, O,
Not a sneeze, O,

Don't you hear your mother coming?
'To be kissed, O,
By the priest, O,
Is the saintliest sort of mumming

" 'O, alack, O,
Such a smack, O,
Makes the very echoes jealous;
'But it proves, O,
Holy loves, O,
Most particularly zealous.'

" 'Hark that drumming!
'Mother coming!
'And that pother?
' 'Tis your father!
'Awful sounds, O!
'Blood and 'ounds, O!'

"In full fresco swells the chorus,
From the motley group before us;
Sighing, swelling,
Barking, belling—
Such a moaning, such intoning,
So much groaning, honing, droning,
Calling, falling, bawling, drawling,
Speaking, shrieking, squeezing, squeaking,

"All subsiding to a quiver,
And a shiver,
Only to ascend, in thunder,
Rolling up and roaring under—
Blood and 'ounds, O! blood and 'ounds, O!
Awful sounds, breaking bounds,
Setting all the woods a-shaking,
Setting all the bog a-quaking,
All the swampy empire waking,
With the eternal blood and 'ounds, O

"Rending, raging,
Battle waging,
'Yond all musical assuaging—

28 Aristophanes The reference is to *The Frogs*, a satirical comedy by Aristophanes (448-330 B C) • 37 Arlecchino, a blundering servant in Italian masked comedy

O'er all mortal sounds uproarious,
 O'er all mortal sense victorious,
 Like the diapason glorious,—
 That through pipes and stops,
 Shrieks, and bounds, and hops,
 Foams, and frisks, and frolics,
 Rolls and rages, rocks and rollicks,
 Feeding every mortal stopper, ah!
 Of the grand Italian opera!"

Thus it was that the rustic poet of the partisans, gave forth extempore an embodiment of the music of the frog-pondians

"Hurrah!" cried Porgy, "hurrah, Geordie—why, man, you are native, to frog manor born, with all the pipes and bellows of the swamp in your own wind-bags, or to requite you in your own coin —

"Worthy venison,
 Geordie Dennison,

You will soon require a stopper, O,
 Scaring off with greater clamor,
 Every leap-frog from his amour,
 Turning every mother's son of 'em
 Making fun of 'em,—
 To a hopper off, from a hopper, O!"

And thus doggelizing as they went, the two led their laughing cohort down into the swamp

The Caw-caw was in full concert Bull and bell, squeak and shriek, moan and groan All the artistes were in exercise, engaged, no doubt, in some rehearsal, preparatory to some great ceremonial—the bridal, possibly, of the young princess of the pondians

Porgy and his corps, with their pointed spears of wood, wooden forks, baskets, and knives, stole down into the lagunes What a picture for the stage! What an action for the burlesque drama! But the matter was a serious one enough for one of the parties Long will the frogs of that ilk remember with wailing the raid of the cranes of that day Could you have seen those long, gaunt back-woodsmen, each with shaft, prong, or trident, striding
 40 hither and thither in the bog, and lake, striding right and left, poised above their great-eyed enemies, and plunging forward to grapple the wounded and squalling victim before he should sheer off, or, as George Dennison said afterward, describing the affair in sonorous heroics—

"Could you have seen that theatre of frogs,
 As each in due delight and bog immersed,
 Sprawled out, at length, in slime and sandy bed;
 Great legs of green or brown outstretching wide;
 Great arms thrown out as if embracing heaven;
 With eyes dilating, big as Bullace grapes,
 50 Uprturned, and gloating as with rapturous rage;
 Great flattened jaws, that, ever and anon,
 Distending with voluminous harmonies,
 Sent forth their correspondences of sound,
 In due obedience to the choragus,
 Who still, at proper intervals, pour'd out
 The grand refrain—sonorous, swelling still,
 Till, at the last, the apex diapason
 Was caught, was won, in glorious 'Blood and 'ounds!'"

It was a war of shallow waters Habitual croakers are 60 only justified when they perish They have nothing to complain of They always seem to anticipate their fate, and this seems to prove it only just execution after judgment—which, of course, is legal and becoming Our partisans had grown expert in this sort of warfare The Caw-caw swamp was a region in which the frogs held populous communities and cities, and—you know the proverb—"Thick grass is easier cut than thin" It was a massacre! Every spearman could count his score or two
 70 of slain, and, really, a very pretty spectacle they made when, emerging from the swamp, each carried his victims aloft, transfixed upon a sharp and slender rod, run through at the neck, eyes wider than ever, and legs and arms spread about in all directions Nor was this all. No less than three young alligators and three times as many terrapins were surprised and captured, almost without a struggle, and borne off in triumph to the camp! The wailing in the Caw-caw that night was not greatly lessened by the loss of so many sonorous voices, since we may reasonably suppose that maternal suffering sent up
 80 such extra clamors for the absence of precious young ones, as more than atoned for the diminished forces of the community

"On your lives, boys, not a word of what we have been doing," said Captain Porgy They all swore to keep faith

34 lagunes, lagoons • 50 Bullace, a kind of plum

"There are thousands of clever people in the world," he added, "who require to be surprised into happiness. Some of my guests, to-night, are probably of this description. I shall teach them a new pleasure—nay, a new moral in a new pleasure—teach them how absurd it is to despise any of the gifts of Providence."

And, following out this policy, it was with great secrecy that the spoils of the frog campaign were conveyed to his quarters, and delivered over to the custody of Tom, his cook. Tom, we may add, like every sensible cook, made a sufficient mystery of his art to keep prying curiosity away from the kitchen whenever he was engaged in any of his culinary combinations. Let us leave these for other parties, and for proceedings of more imposing consequence if less attractive performance. We shall seek to be present when supper is on the table

Chapter XLV

DOINGS IN THE APOLLO CHAMBER

Our partisan division of the army, with their horses, occupied no small extent of territory. Our Captain Porgy, himself, with his little personal equipage, demanded considerable space. He was the person always to secure that "ample room and verge enough," which, as he himself said, were essential to his individual girth. "My breadth of belt," he was wont to say, "implies a fair field, and, having that, I ask no favors." Besides being of social habits, his mess was always a large one. Among his immediate associates, retainers rather, he kept not only his cook, but his poet, the one almost as necessary as the other. Then, he never was without a guest, and whenever his commissariat was particularly well supplied, he was sure to have a full table. Such an idea as a good table, without an adequate number of guests to enjoy it, seemed to him a thing vile, unreasonable, inhuman, and utterly unchristian. We have seen that, particularly fortunate in his foray among the green-jacketed denizens of the Caw-caw, he had made arrangements for a larger circle than usual. His own tastes and purposes requiring it, Captain Porgy usually chose his own ground whenever tents were to be pitched. He had a great eye to proper localities

"The open woods, on the south and west," was his rule. "Let the swamp and thicket cover my back on the east.

That east wind has been of evil tendency from the e periods of time. The Bible speaks of it. A bad-tem person, soured and surly, growling always, and ins able from bile and conceit, is said to fill his bowels the east wind. It has a bad effect on the best bowels me just opening enough on the east for the purpos draught, but let your tent be open to the full pre of the winds from south and west. You need, ir climate, an eastern opening at the dinner-hour, dini three, or thereabout, but beware of it after the sur set. Don't sleep with the east wind blowing upon If you do, face it—let your feet receive it first. Every that blows has a specific quality. The east, northeast, southeast, are all or more or less pernicious, muddy sidious, hateful. Our natural winds in midsummer from the south and west. The south persuades you languor, pleasantly relaxes, discourages the exer which would be too exhaustive for the season. The is the agitator, the thunder-storm wind, that purges purifies, the northwest is the cleaning wind, that swe up the sky, and brushes off all its cobwebs. Each w having thus a specific mission, it is wonderful that n who build know so little of the means of ventilati Now, you see, I choose my ground with an open pi forest in front, that is south and west and northwest: take care that the land slopes down from me in all th directions. If there be hill, swamp, or dense thicket put them, with the devil, behind me. I have here chos the very pleasantest spot in the whole encampment. The is not one of these continental officers who knows ar thing of the subject. Yet, to the health of an army, a d ference of fifty yards in the location of a camp, is ve frequently all the difference between life and death!"

And, in that broad, terrace-like spread of wood ar thicker, he had chosen the most agreeable region. Th pine-woods opened at his feet, and spread away almo interminably, giving the necessary degree of shade, ye leaving free passage for the wind.

"Free circulation, Geordie Dennison," said he, as wit hands outspread he seemed to welcome the gentle pla of the breezes reeking up from the southwest—"that i the secret of health—free circulation for the winds, th

Apollo Chamber. An Elizabethan reminiscence. Ben Jonson used to meet his followers in the Apollo Room at the Devil Tavern. • 17 partisan division, Marion's men • 21 ample . . . enough, from Thomas Gray's "The Bard," l. 51

waters, and the blood. It is stagnation that is death. This is the reason why a pine-forest is more healthy than any other. It is the only forest that suffers free play to the winds. Hence you hear the music in a pine-forest which you hear in no other. The breezes pour through, and swell up, until all the tree-tops become so many organ-pipes. The vulgar notion is that there is some virtue in the odor of the pines to neutralize malaria. But this is all nonsense. Pine-woods that have a dense undergrowth, are not more healthy than any other. It is the shape of the tree, a tall column, without lateral branches, naked a hundred feet high, and arching above, umbrella fashion, into a grand ceiling, which shuts out the intense heat of the sun, and suffers free exercise to the breeze. Here it plays with delight and impunity. In the dense thickets it trickles only, and finally stagnates, and hence the fevers of uncleared lands. Bays, swamps, ponds, are unhealthy, not because of the water which they contain, but because of the dense thickets which they nurture. The hottest place in the world in midsummer, is a deep forest or thicket, with a close undergrowth. Fools talk of decaying vegetation as the secret of disease, yet when our fevers are raging most, vegetation has not begun to decay. Gardens, fields, forests, are never more fresh and beautiful, never more vigorous and verdant than when death seems lurking under every flower, like some venomous reptile watching for and creeping to the ear of the unconscious sleeper. But, Geordie Dennison, boy, once suppose that the air is stagnant in any locality, and you need not suppose the necessity for its impregnation by any deleterious agent. A stagnant atmosphere is, *per se*, malaria. And that fact that we can assign a distinct locality for the disease—that we can say with confidence, to sleep here is death, while you may sleep with safety within half a mile—establishes the fact conclusively that the atmosphere is localized—no matter by what cause—though even that is a matter which I have considered also—and once let the atmosphere be fixed, and it is only in degree that it differs from that of an old sink or well. It is putrid, and to inhale it is a danger. You can not impregnate with miasma any region, where the winds are allowed to penetrate freely from three points of the compass, and where they do penetrate. When we are very sickly, you will always find a pressure of winds, daily from a single quarter, for a long-continued period of time. The atmosphere loses its equilibrium, as it were;

the winds lack their *balance*; and running one course only, they run into a *cul de sac*, as water that can not escape, rises to a level with its source, becomes a pond, and stagnates. A thunder-storm purifies, not from its electricity, as some contend, but because it is a storm. All storms purify because they agitate. They disperse the local atmosphere over a thousand miles of space, and restore its equilibrium."

"But, Captain Porgy, were it not better that you should be thinking of your supper and company, instead of philosophizing here about the atmosphere?"

"It is because I am thinking of my company and supper, Master Geordie, that I do philosophize about the atmosphere. A wholesome atmosphere is half of a good supper. We can eschew the water. We need not drink that, if we can find any other liquor, but make what wry faces we will, the atmosphere we must drink, even though we know it to be impregnated with poison. Better drink the vilest ditch-water a thousand times. That may disorder the stomach, but the other must vitiate the lungs and so directly disease the blood and the heart. I am trying to teach you, sir, that in giving a good supper or dinner to your friends, you are to serve it up in properly-ventilated apartments."

70

"Well, we have it airy enough here."

"True, but had it been left to anybody else, ten to one you would have had our tents pitched in a villanous thicket where we never could have got a breath of air. Look, now, at the Legion encamped on the left, they are in a bottom, the breeze passing clean over their heads. Their camp-master had no idea of what was the duty to be done, beyond the simply getting room enough for the horses and wagons of some three hundred men. Sir, the partisan cavalry have never been so healthy as when I have been permitted to select the ground for their bivouac."

"That's true!"

"To be sure it's true, and you see the fruits of it in the pleasant sleeps that we enjoy, and the hardy elasticity with which we travel. There never was any people so exposed as ours have been, night and day, in all weathers, and the most wearisome marches that have ever enjoyed such admirable health. And they owe it to me, sir—to me,

48 *cul de sac*, literally, bottom of a bag, a passage with only one outlet

Geordie Dennison—yet, d—n 'em, they are not half so grateful for this blessing as for my soups and suppers. They would readily compound to drink any quantity of malaria, if they could swallow a pint of my rum-punch after it."

"Ah, they regard the rum-punch as the antidote, and there is nothing unreasonable, therefore, in their practice. But, captain, the hour *latens*."

"*Latens!* By what right do you use that word?"

"It's a good word, captain."

10 "So it is, but I never heard it used before "

"Very likely, but would you permit that argument to be used against any new dish that Tom should put on the table to-night!"

"No, sir, no, Geordie, you are right. You could not have answered me better if you had argued a thousand years. And I will remember the word,—so, as the hour *latens*, Geordie, get up and help me with these tables. I must summon Frampton and Millhouse. We shall need their knives and hatchets. I have invited thirty-one guests, 20 Geordie, not counting you and Lance, we three will make the number thirty-four. There's no such table to be spread in camp to-night. Think of it,—a simple captain of militia giving a supper to thirty guests, and upon such short commons as are allowed us. Half of the poor devils in camp think it monstrous impudent of me to give a supper at all—and to thirty persons——"

"They can't guess how it's to be done."

"No! indeed! the blockheads! But their vexation increases when they find my guests all outranking myself. 30 The envious rascals! Beware of envy, Geordie—it is the dirtiest, sneakiest, meanest little passion in the world, the younger brother of vanity, furnishing all the venom to its sleek-skinned and painted senior "

"And you are to have the governor, captain?"

"Ay, he accepts. John Rutledge is a great fellow, without affectation, Geordie—no pretender—one of the few men who really do *think*. The greater number, even when they greatly rank, only repeat each other—they do not think. Thought, George Dennison, is really confined to 40 a very few. Men, as a race, are not thinking animals. They are gregarious and imitative. They go in droves and follow a leader, whom they contrive after a while to mimic after a monkey fashion. Thought is always an individual. But—where is that boy Frampton? Sound your whistle, George."

The whistle was sounded.

"Now help me with these poles. There are forty. We must have crotch-sticks—two, four, six, eight, twelve—it will require twenty-four; we must make tables solid."

Lance Frampton now appeared, followed by half a dozen young troopers, bearing slim green poles upon their shoulders, forked sticks, and all the apparatus necessary to the construction of the rustic tables and seats of the company. Long practice had made all of them familiar with the rude sort of manufacture which was required. The crotch-sticks were soon driven right into the ground, in frequent parallels, cross pieces were laid in the crotchets of these, and the poles were stretched along, forming a crossed table with four ends for so many dignitaries, and capable to accommodate forty guests with ease. Of a similar, but stouter fashion were the seats for the guests. It was surprising how soon the area was filled—how soon the mechanical preparations for the feast were fashioned. The amphitheatre beneath the pines was ample. Porgy, as he boasted, had proper eye for locality. When reared and steadily stanchioned and strengthened, the tables were covered with great oak-leaves, green, looking very clean, neat and fresh—a verdant tablecloth.

"Now, see that you have torches, Lance, for, though we have a glorious moon, we need torches for the dark corners. Many of the guests will bring their Negroes with them. But we shall need some waiters besides. Engage some of these young chaps. They shall sweep the platters clean. Forget nothing, boy. We are to have big waffles to supper, remember. Geordie, come with me to the wagon. I think we shall astonish these epauleted gentlemen to-night."

And the two turned off to another part of the woods where stood the little wagon already described—a sort of covered box—a thing which one man might have rolled, but to which a couple of stout hackneys were harnessed, when taken.

"Little," said Porgy, as he unlocked the cover of the vehicle, "little did stuttering Pete dream what he lost and we gained when we cut off the four wagons. I never gave a look at the one little one upon which fastened—as if the most precious commodities were never always packed in the smallest compass! Yet, look there, Geordie."

The poet looked in —

"Lemons, captain."

"Ay, lemons and white sugar, and nutmegs, and cloves, and spices of all sorts, and an anchor of Geneva, and a box of cocoa, and a bag of coffee, and a good supply of old Jamaica, and, see you that keg?—tongues, beef-tongues, English beef-tongues. Now please you to read the name on the cover, ay! Lord Rawdon's own prog, by the pipers, specially selected for his table and palate. We
10 shall astonish these wooden-headed continentals to-night, Geordie! won't we? You thought me mad, didn't you, when I invited so many? But I knew what I was about. They shall stare, they shall sup, though they lament for ever, after the acquisition of such a taste as their vulgar fortunes can never hereafter satisfy. But mum! Not a word in anticipation."

And Porgy closed the wagon with haste and locked it, as half a dozen troopers lounged carelessly by, looking, with some curiosity as they passed, to the proceedings
20 of the two.

"Stay here, Geordie, and keep watch till I return. I must put Millhouse on duty over this wagon, or there will be a Flemish account of its contents when supper's called. The morals of the dragoon service, imply theft as a necessity. A good scout has all the capabilities of a good pickpocket."

And, moralizing as he went, Porgy hurried off for succor. Dennison was relieved by Millhouse, a one-armed trooper of iron aspect, and as stubborn of purpose as a
30 mule. The wagon was safe in his keeping as long as his left arm could lift sabre or pistol—and he was duly armed with both.

The next visit of our host was to Tom, the cook, who had a precinct of his own, some twenty-five yards from the spot where the tables had been spread. The terrapin soup was discussed, the *ragout*, the stew, the boiled tongues, nothing escaped attention. Then a survey was taken of the crockery, the bowls, plates, dishes, the knives and forks, the spoons of iron, the drinking vessels of
40 delph, tin, or calabash. These commodities were too frail of character, not to need the greatest care and attention, and every feast given by our captain, mortified him with the slenderness of his resources. But there was no remedy. If half a dozen good bowls of delph, and platters of tin, could be provided for the more distinguished guests, the rest might surely be satisfied with

clean calabashes. We will suppose our captain satisfied in respect to these things. He was in the midst of the examination, however, venting his annoyances at his limited resources, in uneasy exclamations, when a mes-
50 senger from Rutledge brought him the note from that personage apprizing him that Greene and Lee would appear among his guests. The governor wrote —

"I shall take the liberty, my dear Captain Porgy, of bringing with me a couple of additional guests, in General Greene and Colonel Lee, knowing that your provision will not only be ample, but that the taste which usually presides over your banquets will give to our friends from Rhode Island and Virginia such a notion of the tastes of Apicius and Lucullus, as certainly never
60 yet dawned upon them in their own half-civilized regions. Your own courtesy will do the rest and will, I trust, sufficiently justify the confidence with which I have insisted upon their coming. Yours,

"JOHN RUTLEDGE"

"Humph!" exclaimed Porgy, "I should not have ventured to ask General Greene, not that I stand in awe of his epaulettes, but it is so rare to find a *parvenu* who would not hold such an invitation from a poor captain of militia, to be a piece of impertinence and presumption. Our own folks know me too well to exhibit any such *gaucherie*. As for Lee, he is a popinjay! I should never ask him myself, but have no objection that he should occasionally appear among gentlemen who can teach him, by example, how gentlemen can be good fellows without any loss of dignity—Geordie—your pen and a scrap of paper. I hope I diminish none of your verses by consuming your foolscap."

The pen and paper were hid, and our captain wrote —

"Governor Rutledge can take no liberty for the pro-
80 priety of which his name is not a sufficient guaranty. Captain Porgy will be most happy to welcome any guests whom he may think proper to bring."

This written, he handed it to the messenger. It was

4 anchor of Geneva, ten gallon container of Holland gin • 23
Flemish account, an account showing a loss or deficit • 36 *ragout*, a highly seasoned dish made of pieces of meat stewed with vegetables •
60 Apicius (d. 37 A.D.), notorious Roman epicure under Tiberius • 60
Lucullus (d. 57 B.C.), wealthy Roman general famous for his banquets • 68 *parvenu*, one newly risen to position, an upstart • 72
gaucherie, clumsiness

then that Greene's cook uncovered a small tumbrel or box in a wheelbarrow, containing the uncooked provisions which had been destined for his own table. Porgy looked at the bloody and livid meats with unqualified disgust.

"But," said he *sotto voce*, "we can't reject them. Here, Tom."

The cook appeared, apron in front and knife in hand.

"Tom, take charge of these provisions. They are sent by the general—General Greene, do you hear? Use them. Cook them. Turn them into soup, hash, steak, what you will!" then, as the messengers of Rutledge and Greene disappeared—"but d—m you, boy, don't let them show themselves upon my table. The meat is villanously butchered. That alone should condemn it. Make it up for some of these young fellows that have been working for us. And—Tom—"

"Well, maussa—talk quick."

"Don't forget the balls. Let there be a plenty in the soup."

"Psho, maussa, enty I know."

"Enough! Begone!"

The active mind of our corpulent captain began to grow restless. He had seen to everything that he could think of, and grew peevish from nothing to do. Suddenly he stuck his fingers into his hair.

"No! the vessels for the punch, Geordie. By heavens, I had almost forgotten. Let us after the punchbowls, and then for the manufacture. You are good at that, a poet should be. Curious problem, Geordie—the affinity between poetry and the bottle."

"Not at all. It only implies the ardency of the poet. It is so with the orator. You never saw poet or orator yet, that was not ardent and fond of the juices of the grape."

"Not the didactic orders, surely. But how is it, then, that Bacchus is not your deity instead of Apollo?"

"Because Apollo, with virtues of his own, includes those of Bacchus. He is a ripener of Bacchus, and loves not the wine less, nor is less the true god of it, because he employs a vintner. I see no difficulty in the matter."

"And, perhaps, there is none. Yet what would Apollo say, or Bacchus even, to such a punchbowl as ours?"

And he pointed to an enormous calabash, holding a couple of gallons at the least, that, duly valued and

taken care of, had survived all the vicissitudes of campaign.

"They would, either of them, feel that there was some propriety in the vessel. It is one which Ceres presented for the occasion, to a kindred deity. Boor-ture has provided where vulgar art has failed. It would be much more staggering to either of the ancient gods to give them with the Jamaica, instead of the blood of Tuscan

"Ah! they never got such liquor on Olympus. The nectar was a poor wishy-washy sort of stuff, of not more body than some of those thin vaporing French German liquors, of which we have had a taste occasionally. Their wine of Tuscany, nay, the Falernian of Herculaneum, would not take rank now-a-days with the juices of the common corn, prepared according to our process. Drinking whiskey or Jamaica, Nero might have been a fool, a wretch, a murderer—might fire his city or butcher his mother—might have committed any crime, but could not have been cowardly! Whiskey or Jamaica might have saved Rome from Gaul and Vandal. The barbarians, be sure, drank the most potent beverages."

"A notion deserving of study. We drink deep now. Will our descendants bear us? Will they laugh at our potations, which rarely leave a gentleman on his legs after midnight?"

"Ah! say nothing of our progeny. Do not build upon the degenerates. It may be that the milksops will fancy it bad taste, nay, even immoral, on the part of their ancestors, to have swallowed Jamaica or whiskey at all. In proportion as their heads are weak, will they pronounce ours vicious, and just because we have a certain amount of strength in our virtue—a certain quality of brawn and blood and muscle, to keep our sentiment from etherealizing—growing into mere thin air—will they presume to stroke their beards in self-complaisant satisfaction, thanking God that such poor *publicans*, have given way to a more saintly race of sinners. I am half inclined to thank my stars that, when I disappear, the race of Porgy will not be continued in the person of one who prides himself upon having no head—for a bottle!"

49 Ceres, Roman goddess of growing vegetation • 58 Falernian, Italian sweet wine • 81 publicans . . . sinners, an allusion to the parable of the Pharisee and the publican. See Luke 18:9-14

HOW PORGY FEASTED THE CAPTAINS

"Yes! save us from all degenerate children But, captain, will this *one* calabash of punch suffice for forty? Impossible! Two gallons among forty! Never in the world! Why, sir, there are three generals, and one governor, a score of colonels, and others of inferior rank, who are emulous of great men's virtues Two gallons to forty such persons"

"Oh! don't stop to calculate. Luckily there are two calabashes."

10 And the little wagon yielded up the desired article

"Make it rich, Geordie"

"Captain Porgy, when they drink of this liquor, each man will feel that his will has been made He will feel that he has no more care in life—will fold his robes about him for flight"

"Or fall! Well, give us a taste. I profess to be a very competent judge of what a good Jamaica punch should be."

Smacks his lips.

20 "The proportions are good the acid has yielded to the embrace of the sugar with the recognition of a perfect faith, and both succumb to the spirit, as with the recognition of a perfect deity Next to poetry, Geordie, you are an adept at punch."

Geordie somewhat proudly:—

"Yes, captain, on this score I feel safe. I am not always certain of my verses I sometimes feel that they lack the sweet and the ardent—but I am never doubtful of the perfect harmony that prevails among all the elements
30 when I manufacture punch"

Porgy quaffs off the contents of the *dipper*

"Geordie, you are a benefactor When this war ceases, you shall partake my fortunes You shall live with me, and, between punch and poetry, we will make the latter end of life a felicitous *finale* to a very exciting drama By the way, Geordie, talking of poetry and punch reminds me. You must be prepared with something good to-night I shall have you out You shall give us some heroic ballad I know you have not been drowsing in that thicket for
10 nothing Have you got anything ready?"

"I *have* been doing a trifle, but—"

"None of your buts Get aside and memorize it These two vessels of punch, meanwhile, we will put under lock and key, and yield to the guardianship of Sergeant Mill-house."

With vulgar people, a dinner party is the occasion of much fuss and fidgeting The vulgar egotism is always on the *qui vive* lest something should go wrong—lest something should be wanting to the proper effect—lest, in brief, some luckless excess or deficiency should certainly convey to the guest the secret of those deficiencies, in taste, manners, experiences, and resources, which would, if known, be fatal to the claims of good breeding and high ton which the host is most anxious to establish. Those, on the contrary, who feel assured on such points are apt to take the events of a dinner-table coolly and with comparative indifference A blunder or a deficiency of steward or servant, occasions little or no concern, is never allowed to disturb the equilibrium of the master, who takes for granted that such small matters will be ascribed, by every sensible guest, to the right cause; and for the opinion of all other persons he cares not a button

The result of this equanimity is to enable him to keep his mind "in hand" for the entertainment of his company He is able to observe and to minister with promptness and full resource, as his wits are not disordered by any feverish workings of his *amour propre* He sees what is wanting at a glance, supplies the deficiency with a nod, his servants are duly taught in the value of his nod and glance, and the skill of the host, by which the guests are diverted, enables Jack and Gill to wipe up the water which they have spilt so awkwardly, in their uphill progress, without attracting any notice—without filling the scene with most admired disorder.

Our host *knows* his company, and conjures up the special topic which appeals directly to the tastes or the fancies of each He is vigilant even while he seems most at ease, when his indifference is most apparent, it is made to cover a becoming solicitude for the comfort of the humblest person present He provides himself with the proper cue to all your prejudices and affections, as by a divine instinct, so that he steers clear of the one,

48 on vive, on the alert • 54 high ton, fashion or style • 68
amour propre, self esteem

and shapes his course directly for the other, and when the waters are unluckily ruffled, by some bull-headed companion, who treads on his neighbor's toes without even suspecting that he has corns, our host is at hand to pour oil upon the troubled waters, and soothe to calm the temper which is ruffled. He contrives, at the same time, that the offender shall be taught the nature of his offence, without being brought up to the halberds and set in pillory,

10

"Pour encourager les autres."

There was nothing doubtful about the *aplomb* of Captain Porgy. Having prepared his feast according to the full extent of his resources, drilled his awkward squad to the utmost of his capacity and their susceptibilities, seen that they were in sufficient numbers for proper attendance, and made, in brief, all his preparations, he gave himself no further concern, but prepared to receive his guests, with the easy good nature, the frank politeness, the smiling grace, of an old-school gentleman. And it is quite an error to talk, as we are apt to do, of the formality of the old-school gentleman. The gentleman of two hundred or one hundred years ago, differed very slightly in his bearing from the same class at the present day. In due degree as his ceremonials ran into formalities, did he lose the character of the gentleman. In no period was mere form and buckram ever confounded, by sensible people, with politeness and refinement.

Never was gentleman more perfectly at ease in crowded assembly, yet more solicitous of the claims of all about him, than our corpulent captain. His shrewd good sense, nice tastes, playful humors, and frank spirit, all harmonizing happily, enabled him to play the host generally to the equal satisfaction of all his company. He had the proper welcome for each as he drew nigh, the proper word, which set each person at his ease, and prepared him for the development of all his conversational resources.

Among the first of his guests to appear were Governor Rutledge and General Greene. "The really great," said Porgy to Lance Frampton who stood behind him, "never keep the table waiting."

The approach to the scene was through a great natural avenue of lofty green pines, through which the moon was peeping curiously with a bright smile, a disinterested spectator of the proceedings. Music timed the approaches

of the guests, the army band having been secured evening Porgy welcomed his guests at the entrance of the area in which his tables had been spread.

"General Greene, Captain Porgy," said R Greene took the outstretched hand of the host, saying, "What I have heard of you, Captain Porgy, makes me trespass without fear of the consequences."

"And what I know of General Greene enables me to welcome him with every hope of the consequence. I am very grateful to Governor Rutledge for doing that for me. As a poor captain of militia, I should scarcely have dared to do myself."

"I knew my customers both, my dear captain Rutledge," and knew how little was necessary to the regular and volunteer service grateful to each other.

"Be seated, gentlemen," said Porgy, "while I put myself on duty for a while," and he resumed his place at the opening of the avenue, while Sumter, Marion, and the rest severally presented themselves, were welcomed and conducted to the interior by young Frampton, while the duties of an aid Colonel Lee was among the first to appear.

"My dear Porgy," said he condescendingly—"I am late, but the cavalry of the legion is on vigilant duty to-night, and a good officer you know—eh?"

And he left it to our host to conceive the rest.

"Col Lee may be forgiven, if late among his friends when we know that his enemies rarely reproach him with a like remissness."

The grace of Porgy's manner happily blended with the grave dignity of his address. Lee smiled at the compliment —

"Always ready. Porgy—never to be outdone in a play of compliment, or the retort courteous," and when speaking he was ushered in with other visitors.

The company was at length assembled. The music ceased. A single bugle sounded from the amphitheatre, and the guests disposed themselves without confusion under the whispered suggestions of Lieutenant Frampton.

8 halberds, a frame made with halberds (a long-handled, pointed weapon in use in the sixteenth century) to which soldiers were tied to be flogged. • 10 Pour . . . autres, to encourage the others. The quotation is from Voltaire's *Candide* (1759). "Dans ce pays-ci il est bon de tuer de temps en temps un amiral pour encourager les autres." (In this country it is well to kill an admiral now and then to encourage the others.)

ton. Porgy took his place at the head of the table, standing, till all were seated.

"Gentlemen," said he, "be pleased to find places at the board. Colonel Singleton, you are my *vis-à-vis*. Governor Rutledge will you honor me by sitting at my right General Greene. I have presumed to assign you the seat at my left."

Right and left of Singleton, Marion and Sumter were placed. At one end of the table crossing the centre of the board, Colonel Lee was seated, Colonel Maham occupied the other Carrington, Horry, Mellichampe, St Julien, and others found places between these several termini. Scarcely had they been seated when four great calabash tureens were placed severally at the extremities, the odorous vapors from which appealed gratefully to every nostril in company.

"Turtle soup!" was the delighted murmur

"And lemons!"

And as the smoking vessels were set before the governor and General Greene, the former exclaimed—

"Faith, Captain Porgy, your last voyage to the West Indies seems to have been a highly prosperous adventure"

"In truth," said Greene, "I am half inclined to think that there must have been some such enterprise, of which General Marion has forgotten to apprize me"

"I begin seriously to suspect him," said Rutledge "The fact is that General Marion is so fond of secret enterprises, and audacious ones—does things with so much despatch, and thinks it so easy to do the impossible, that I half believe he has made a three nights' run for the Havana, or sent off a favorite squad on a sortie in that direction Say, general, is it not so? Let us know the truth of it. You found, among your captures at Georgetown, some ready-rigged sloop or schooner, and sent her out on a cruise in anticipation of this very occasion"

"Nay, governor, the merits of the enterprise, such as it was and the fruits thereof are due entirely to our host It was his adventure wholly though we share the spoils"

"But, where—where—where—" began Peter Horry, uttering, "where the devil did he—did he—get 'em—turtles and lemons! I don't—don't—understand it—all."

"Better not press the inquiry, Horry," said Singleton with a sly smile upon the company—"the discovery will hardly add to your own laurels"

"How—my laurels! What—what—I want to—to

know—have my laurels—to do—to do—with the matter?"

"Let's have it, Colonel Singleton," said Rutledge eagerly. "Out with the story Colonel Horry is so seldom to be caught napping that I shall rejoice to have one story at his expense"

"Ay, ay, the story, Singleton," from a dozen voices around the board

"Tell—tell—tell, it you will," stammered Horry—"only be sure, and tell—the—the—truth, and shame—you know who"

"The adventure illustrates the military character of the two gentlemen most admirably," said Singleton. "Colonel Horry is a gentleman of large eyes and grapples with objects of magnitude always It is Captain Porgy's pleasure to be discriminating and select The lemons and a variety of other edibles are furnished, unwillingly, I grant you, by Lord Rawdon himself They form a part of the supplies brought up by Colonel Stewart In dashing at Stewart's convoy, Horry passed a mean little wagon in the rear, as quite unworthy his regards He swept off as you know three or four others of considerable value to the army But the very littleness of this wagon which Horry had despised, fixed the regards of our host He quietly possessed himself of it, and was rewarded with the private stores designed for Lord Rawdon himself." The story produced a laugh at the expense of Horry

"Who—who—who—the devil," said he, "would have thought—of—of—anything good in—that rickety concern? I'd like to know, Captain Porgy, what you got besides the lemons?"

"White sugars, coffee, tea, spices, Spanish sweetmeats, preserved ginger, three kegs of Jamaica, and a goodly variety besides!"

"The d—l!—and—and—I to miss 'em all."

"But you got loads of bacon and flour, Horry."

"Several bales of blankets"

"Ay, and a bathing-tub and complete set of chamber crockery!"

"What," said Rutledge, "was there a bathing-tub and chamber crockery?"

"Yes, indeed"

"Who could have wanted that, I wonder?"

"Some young ensign of the buffs or blues," said Porgy, "whose mother was duly considerate of the young man's skin in a warm climate. You should have discovered Colonel Horry's visage when that wagon was burst open and the contents revealed. The bathing-tub and furniture filled the wagon."

"What did he say, Porgy? Tell us that!"

"Say! Ah! What was it, colonel? Deliver it yourself: nobody can repeat it half so well."

10 "Re—re—peat it yourself, if you can!" said Horry stammering and dipping up his soup with increased rapidity.

"Out with it, Captain Porgy. Horry's speech."

Porgy nodded to Singleton, who answered —

"I heard it, and as Horry permits will deliver it. He said, stamping his feet in a rage. 'Throw out the d——d basins, and break up the blasted tub. Who would have thought of any fellow being such a bloody booby as to bring a bathing-tub and chamber crockery into a pond and bush country?'"

20 And slightly imitating the stammer of Horry so as to give a lively idea of his manner, Singleton set the table in a roar. When the laugh had subsided —

"But did he break up the crockery, Porgy?"

"Every bowl and basin. He was merciless. You never saw such havoc. His broadsword played elephant in the crockery shop to perfection, and the dragoons, delighted with the humors of their colonel, went into the work of demolition with a rush."

30 "I had—no—no—no use for the d——d—d——d—d—d things," said Horry, "and I was—de—de—de—terminated to give the d——d puppy that owned them a lesson."

"Ha! ha! ha!"

"But where did the turtles come from?"

"From the genius of my cook, Tom," said Porgy. "The turtle are terrapin from the Caw-caw."

"Not the alligator terrapin, captain, I hope," said Sumter. "I could never bring myself to eat any of that order."

"You have done it on this occasion," said Porgy.

40 "And very effectually too, general," said Singleton, "since I have helped you to a second supply, and you seem in a fair way to need a third."

Sumter looked a little blank.

"Do not be discomfited, general," said Porgy, "since I took the precaution to have all their tails cut off before they were hashed up for the soup."

"But what did you do with the tails?"

"Ah! they were made into balls, with a due proportion of beef and bacon."

"You have caught me beyond escape, captain, since I confess to have done as much execution on the balls as on the soup."

"And you are surprised into a wisdom, general, that has cured you of the prejudices of twenty years! What we call the alligator terrapin is the best of the tribe—the fattest, richest, best flavored. It requires only that skill in the dressing which my man Tom supplies."

The bugle sounded. Sergeant Millhouse marshalled the waiters to their stations, and the emptied vessels were removed. With another blast of the bugle, new dishes were set on the table.

"A noble-looking fish," said Greene. "What fish is this, Captain Porgy?"

"The greatest delicacy of a fresh-water river, this is the Edisto blue cat—for very nice people a most discouraging name—Gentlemen, look to yourselves. Here is boiled fish, such as George the Third can not procure; dressed in a style which would not discredit the table of our great ally, the king of France. Men of *goût* will of course prefer the boiled—for the undeveloped taste, the fry is abundant. There are perch and trout in those several dishes. They are all fresh from the Edisto within five hours."

"Your troopers have been busy, captain."

"Ay, sir, and my cook. He was fortunate in his search along the river this morning, to come upon three or four fish-traps, which he emptied without leave. Governor, the melted butter is beside you. By-the-way, those naval biscuit are also from the stores of my Lord Rawdon—General, do not dream of defiling that fish with vinegar. 50 It is an abomination in this case. The fish only entreats the butter, and the dressing is complete."

The eye of Porgy swept the table. The guests discussed the fish with the relish of starving men. There was a cessation. The finger of Porgy was lifted. Millhouse's bugle gave tongue, and the fish was superseded with a variety of dishes.

65 Edisto, river in South Carolina • 69 goût, taste • 83 discussed, tried the quality of, by consuming. Compare Scott, in *Guy Mannering* (1815). "A tall, stout, country-looking man was busy discussing huge slices of cold boiled beef."

'General Greene—Governor Rutledge—suffer me to persuade you both to the ragout which is before me.

"What is it, captain?"

"Try it, general. It is the *alerta*—the green *alerta*—a sort of chicken you will find it, but far superior. The stew is of the *lagarta*, according to the Spaniards, and a dish quite as rare as exquisite on table. Gentlemen, interspersed with these dishes you will find more familiar, but inferior ones. There are hams and tongues, both from the stores of Lord Rawdon, and, in fact, most of this course will be found of foreign character. You will please ask me for no more revelations touching my mode of procuring supplies, as I have no wish to expose the breaking of any more crockery. It is not every one of our partisans who can bear, with so much equanimity as Colonel Horry, the story of his own acquisitions and how made."

"This—what do you call it?" said Greene.

"*Alerta*!"

20 "Is delicious!"

"And nothing could be more savory than this stew, Captain Porgy."

"Yes, indeed, governor—the Spaniards have the merit of the discovery. But gentlemen, with this course, it is time to spiritualize the feast."

The speaker's finger was uplifted, and two enormous bowls of punch were set down at the two ends of the table.

30 "Gentlemen, we owe a great deal to the providence of Lord Rawdon."

"And the improvidence of Horry," whispered Rutledge, "for, of a verity, had he captured these spoils, he would never have made the same use of them as our host has done."

"Sir," said Porgy with solemnity, "he would have wasted them—naked, upon his dragoons—Gentlemen, you will please fill for a sentiment. Colonel Singleton, see that your end of the table charges duly."

"We are ready, captain."

40 Porgy rising —

"Gentlemen, our first regular sentiment. 'The cause of Liberty—the cause of the American continent—the cause of all continents wherever man has a living soul!'"

"Music." And the bands struck up.

"Captain Porgy," said Lee, "send me, if you please, a second supply of that dish which you call the *alerta*. I

don't know what sort of bird it is, but the savor is that of young pigeons. It is wonderfully nice."

"I agree with you, Lee," said Colonel Williams, though I have no more idea what the bird is than of the mansions of the moon. Let me trouble you also, Captain Porgy."

"I must also trespass, captain," said Carrington. "Ordinarily, I seldom suffer myself to eat of dishes of which I know nothing, but these foreign meats come to us under good guaranties, though half the time without a name at all."

"Unless French, which is so much Greek to me," said Maham. "Captain, that *lagarta* stew is princely."

"No crowned head in Europe enjoys the like. Shall I help you, Colonel Maham?"

"Thank you, yes. But I thought you called it foreign."

"So it is—in one sense, but this is not imported. It is wholly domestic."

"Well, foreign or domestic, it is first rate," said Greene. "I will try a little more of it, Captain Porgy."

"Ah! general,"—with a smile—"suffer me to say that it is only in the militia service, after all, that the taste properly refines. Governor, shall I serve you?"

"Thank you, I will mince a little of your *lagarta*, captain," and a sly glance of Rutledge apprized the captain of his suspicions. But the face of Porgy made no revelations.

"Gentlemen," said Singleton, at the other end of the table, "fill your glasses."

"Ready, all," said Porgy.

Singleton rose, and gave —

"South Carolina—almost freed from the footsteps of the foreign tyrant and rising to the full assertion of her own sovereignty!"

80 A brilliant burst from John Rutledge, brief, but like a fiery tongue speaking to the soul, followed this sentiment; and the music rose into a triumphant peal as his voice died away upon the echoes. Other sentiments succeeded other speeches, Rutledge, Greene, Marion, Sumter, Lee, were all duly honored with toasts, and all responded, each after his own fashion, all unaffectedly, simply, and with the proper earnestness of soldiers. And the punch

4 *alerta*, Spanish word meaning "on the alert", here used for "frog"

• 6 *lagarta*, alligator

flowed anew into fresh goblets, and the merriment grew high, and some of the grave barons began to sing in snatches, and the volunteer toasts filled up the pauses in the conversation. Meanwhile, a score of melons were placed upon the board, and the preserved fruits from the West Indies, guava and ginger, were crowded upon the board, and provoked new merriment at the expense of Rawdon, who lost, and Horry who refused to find the prize.

10 And while they gashed deeply the purple centres of the melons, Rutledge suddenly said to Porgy —

"And now, captain, that you have had your triumph, that all present have borne testimony in the least equivocal manner to the merits of your feast, I would fain know of what those foreign dishes were compounded, of which, knowing nothing, all have partaken so freely. Hams and tongues, fresh from Britain, designed for my Lord Rawdon's own table, have been sent away from yours uncut—proof of homage, the most profound, to yet preferable meats. Pray tell us, then, what were the elements of your *lagarta* and your *alerta*—your *ragouts* and stews."

"Ay, ay," seconded the company, "let us know. What were the birds?"

"I should really be pleased to know, Captain Porgy," said General Greene, bowing, "touching those birds."

"There need be no mystery in it now, general, since, as Governor Rutledge says, the feast has triumphed. But I am afraid I shall too greatly confound you, when I state 30 that the dishes contained no birds at all. The stew of *alerta* was compounded chiefly of the race which helped Homer in the construction of an epic—a race which Milton describes as the—

"Small infantry
Warred on by cranes."

"You surely do not mean *frogs*, Captain Porgy?" cried Lee, with affected horror in his accents.

"Your guess is a sagacious one, and worthy of the legion, Colonel Lee."

40 "Good heavens! and is it come to this, that the soldiers of liberty should be reduced to the necessity of frog-eating?"

"Necessity, Colonel Lee!" exclaimed Rutledge. "By heavens, sir, it should be matter of taste and preference, sir, if only in due deference to our great Gallic ally, but,

of a truth, sir, after to-day's feast, it should be a r argument in behalf of liberty, that she has brought us such rare fine feeding and such improved tastes."

"And the other dish, Captain Porgy," demanded Su ter, "the stew with the Spanish name?"

"The name speaks for itself—*lagarta*. It is of the gr lizard family—the cayman—in vulgar speech, the a gator. But the specimens employed, gentlemen, w mere juveniles, young vagabonds, whose affectionate p ents had hardly suffered them out of sight before. Th had probably never fed on larger prey than their neig bors of the *alerta* family."

"One question, Captain Porgy," said Carrington "be so good as to inform me, if, among your sever unfamiliar dishes, I have had the happiness to eat t the rattlesnake, the viper, the moccasin, or the bo constrictor?"

"Alas! colonel, I grieve to say that you have not should have been pleased to have got a couple of youn chicken-snakes, but I was not fortunate in the search. We got glimpse of a few runners [black-snakes], bu they were quite too swift of foot for the hunters. Th chicken-snake is of unexceptionable tenderness, the run ner is a little too muscular, if not previously well sodden but, unless near a hencoop, or a corncrib, it is not easy to find the chicken-snake. I repeat my regrets that I coul not secure this delicacy for my table. But another time Colonel Carrington, should you sup with me I will make a special effort in your behalf."

"I thank you, sir, do not suffer your regrets to disturb you. For that matter, I am half doubtful whether your *alerta* and *lagarta*, of which I have, in my ignorance, partaken somewhat too freely, will continue to lie lightly on my soul or stomach."

"Have no fears, sir, and the better to secure their repose, do me the honor, sir, of a bowl of punch with me. Gentlemen, I entreat the whole table to our companion-ship."

And the vessels were filled and emptied.

"And now, gentlemen," continued the host, "I give you—The poets, who minister at once to Apollo, to Bacchus, and to Mars, and beg to introduce you to the

32 Homer. See *Iliad*, Bk III, l 6 • 33 Milton. The quotation is from *Paradise Lost*, Bk I, ll 575-576 • 45 Gallic ally, France • 66 [black-snakes], Simms' brackets

only representative of the faculty in our squadron, Mr. George Dennison, my ensign. If I mistake not, he has been this day as busy with the muse, as I with my cook; and, if we will suffer him, he will bring us gifts from Parnassus not unworthy of those which we have enjoyed from the provision-wagon of Lord Rawdon "

"In which Horry, going from Dan to Beersheba, could see nothing "

"Having a taste for baths, warming-pans, and chamber-furniture "

"'Nough of that—that—Singleton' I—I—I'm a sinner be—be—beyond salvation, if I ever pass a little mean-looking wagon again, without seeing what's in it "

"But—Mr Dennison," said Rutledge

"George' Geordie' " said Porgy, good-humoredly The poet, hitherto the only silent person at table, now rose—a tall, slender person, of bright, lively eye, mouth full of expression, Grecian nose, and great forehead rising up like a tower His cheeks were flushed, his frame trembled, and there was an evident quivering of the lip which was discernible to every eye about him Dennison sang the verses, which he wrote, in a clear military voice, shrill like a clarion. There was, perhaps, no great deal of music in his composition, but enough for the present purpose, and of the kind best suited, perhaps for a military gathering—bold, free, eager and full of animation His ballad had been the work of that very afternoon

He had no prefaces But, waiting till the music hushed, and the voices, he then began —

THE BATTLE FEAST

30 To the dark and bloody feast,
Haste ye battle vultures, haste;
There is banquet, man and beast,
For your savage taste
Never on such costly wassail
Did ye flesh your beaks before;
Come, ye slaves of Hesse Cassel,
To be sold no more!

Small your cost to George of Britain,
One and sixpences sterling down
40 Yet for this, ye sorry chapmen,
Each will lose his crown,
Freedom knows no price for valor,

Yours is measured by the groat,
Britain pays in gold and silver,
We in steel and shot.

Recreants, ye from Scottish Highlands,
Lately rebels to the throne
Of that brutal foreign despot,
Now, whose sway ye own,
Ye are welcome to the banquet,
Which is spread for all who come,
Where the eater is the eaten,
And the deathsman goes to doom.

And ye braggart sons of Erin,
Loathing still the sway ye bear,
Groaning in the very fetters,
Ye would make us wear,
Ever writhing, ever raging,
'Neath the bonds ye can not break—
Here the bloody banquet woos ye,
Gather and partake!

Stoop, ye vultures, to the issue,
It will be ere set of sun!
Mark whose valor bides the longest,
Blood of price or blood of none
Comes the Tartan of Glenorchy,
Comes the sullen Saxon boor,
Comes the light-heeled German yager
Crowding to the shore!

7 from . Beersheba, throughout the whole region, Dan and Beersheba being, respectively, the northern and southern limits of Palestine in early Old Testament times • 36 slaves of Hesse Cassel The Hessians, hired at so much per head to the crown of Britain, for the war in America, formed no small portion of the British army "—Simms • 39 One . . . down "We are not sure that Master George Dennison is altogether right in this statement of the hire of the Hessian per head, but the difference is immaterial, whether in poetry or history —Simms • 40 chapmen, merchants, traders • 46 Recreants . . . Highlands The exiled rebels of '45, when settled in America, almost wholly proved adherents of that monarch whom, as followers of the Stuarts, they opposed to the knife The disasters of '45 cured them of all propensity to rebellion Even the Macdonalds, the famous Hector—Flora who saved the Pretender—all became loyal to George the Third in America, and fought against the patriots "—Simms • 66 Tartan of Glenorchy, Scotch Highlander "Tartan" is Scotch plaid • 68 yager, or jager, a German rifleman, originally a hunter

Who shall meet them by the water
 On the mountain, in the vale,
 Meet them with the stroke of slaughter
 Till the right arm fail?
 Wherefore ask? Yon pealing summons
 Finds fit answer, sharp and soon,
 Answer fit for peers and commons,
 Yager and dragoon.

Lo! the soul that makes a nation,
 Which, from out the ranks of toil
 Upward springs in day of peril,
 Soul to save the soil!
 Comes a high and mighty aspect,
 From the shores of Powhatan;—
 Lo! in him the nation's hero,
 Glorious perfect man!

Follows, rugged as his mountains,
 Daring man from Bennington,
 Blacksmith stout from Narraganset,
 Good where deeds are done
 Comes the keen-eyed Santee rifle,
 Sleepless still and swift as flame,
 Rowel rashing, bullet winging
 Man of deadly aim

Stoop, ye vultures, to the issue,
 Stoop, and scour the bloody plain
 Flsh your beaks where fat the carnage,
 Mountains up the slain
 Whose the skull your talon rendeth
 Eye, within your dripping beak,
 Speechless tongue that loosely lolleth
 On divided cheek!

In the tartan of Glenorchy,
 Scarlet of the Saxon boor,
 Gray frock of the Hessian yager
 Strewn from mount to shore,
 Read the fate of hireling valor,
 Read the doom of foreign foe,
 Know that he who smites for freedom,
 Ever strikes the deadly blow!

It was in the midst of the compliments of the poet, that Willie Sinclair stole in to the table, plucked the sleeve of Marion, who rose quickly and quietly, and went out with him in silence. The company sat at the table some time longer.

"Why your poet seems a genuine Birserker, Captain Porgy. This chant was worthy to be sung in the hall of Odin. Does he fight as bravely as he sings?"

"Every bit, sir, and he goes into battle with the same convulsive sort of tremor with which he begins to sing or to recite. But that passes off in a few moments, and then he fairly rages. In fact, sir, it is not easy for him to arrest himself, and he sometimes shows himself rather too savage in strife—with rather too great an appetite for blood."

"You are as fortunate, Captain Porgy, in your poet as your cook; I would I could persuade them from you!—Who?—Do you say?"

These last words were spoken to Lieutenant Frampton who had whispered something into Rutledge's ear.

"Colonel Sinclair, your excellency. He waits you without, along with General Marion."

"Instantly"—and, watching his opportunity, while beakers were filling. Rutledge stole away. Greene followed his example, so did Sumter and the elder officers, the young ones remained, and soon Captain Porgy, his veneration no longer active, was in full flight, keeping the table in a roar, with merry jest, jibe, and story, till the hours grew something smaller than the stars, and the moon had a hooded, downcast looking visage, as if she had seen or heard something to shock her modesty. Let us leave the revellers while they make a final onslaught upon the punchbowls.

1855

14 shores of Powhatan, eastern Virginia, where Powhatan, an Indian chief, flourished in the early seventeenth century. The glorious perfect man of the passage is, of course, George Washington. • 18 Bennington, in Vermont. The reference is to John Stark, American Revolutionary general. • 19 Narraganset, in Rhode Island. The reference is to Nathanael Greene. • 23 Rowel, a small wheel attached to spurs, with radiating sharp points. • 23 rashing, cutting. • 24 Man aim, an allusion to the American Revolutionary generals, Thomas Sumter and Francis Marion. • 42 Willie Sinclair. The hero of the book makes this brief appearance at Captain Porgy's banquet. See introductory note, p. 1131.

MOVERS WESTWARD: Kirkland, Singers of the West

Caroline Matilda Kirkland

1801 • 1864

In the decade before the Civil War the Middle West provided the materials for literature more successfully than it produced literature itself. Daniel Boone, Johnny Appleseed, Mike Fink, and Davy Crockett now loom large in the folklore of a region which has appropriately glorified the pioneer and the riverman, and later generations of writers have made much capital of the bustling energy which almost overnight peopled the Great Lakes and Mississippi Valley states. Only the literary historian, however, is now much concerned with the literary activity of the West prior to 1860. The reasons are fairly clear: the early Western writers were few in number and provincial in spirit, more anxious usually to emulate the cultural fashions of the East than to deal freshly with the folk among whom they found themselves. Some of them worked hard to establish Western magazines and literary centers—a group at Cincinnati in the thirties is especially

worth remark—but they found little support among their own people. The rare pioneer who had money or time or taste for literature was likely to prefer the imported to the native varieties.

Of those writers who might be chosen to illustrate the condition of belles-lettres in the West at this period, Mrs. Caroline Matilda Kirkland is probably the most interesting. She, at least, was willing to look at the life around her, to find her themes close at hand rather than in Indian legend or the thin traditions of the French *voyageurs*. She was, in short, something of a realist in an age in which the prevailing taste was for heavy sentiment and romance. To her everlasting credit it may be said that she

Panel (l to r) Conestoga wagons, moving westward • A house-raising in the new territory • Forty Niners

succeeded in making her unassuming pictures of frontier life mildly popular

The facts of her life are none too readily established, exact dates cannot always be given for the important events of her career, few as they are. Caroline Matilda Stansbury was her maiden name, she was born in New York City in 1801. Her father was a bookseller who died during her girlhood; we can only guess at her education. She married William Kirkland, a schoolteacher, in Geneva, New York, about 1827 or 1828, and thereafter assisted him in the conduct of private schools, first at Geneva and later at Detroit. In Michigan the Kirklands were evidently bitten by the spirit of speculation which prevailed throughout the West in the thirties. It seems probable that their decision to buy land and settle at Pinckney, about sixty miles west and north of Detroit, was made shortly before the Panic of 1837, which ended many a Western dream of grandeur. In any case, they found themselves in the late thirties in a typical new settlement, where a few log cabins had sprung up around a sawmill. Town-lots and a public square were laid out, houses were built (eventually in the dignified style of the Classical revival), gardens were planted, small businesses were begun; a school was established, and the amenities of civilized life were gradually brought in. The pattern differed little from that which Cooper described in *The Pioneers* (see p. 586) except that the wealthy landlord was uncommon in the Middle West. Some of the settlements thus begun have now become great cities; others, surrounded by prosperous farms, are now thriving

towns, and a great many, Pinckney among them, have remained villages, their timeworn houses and vacant streets mute testimony to the uncertainties of American life.

Perhaps the Kirkland family fortunes suffered, and Mr. Kirkland's venture into literature had an economic motive. Whatever the impetus, she determined to describe the settling of "Montacute" in a series of essay-sketches depicting the typical trials and typical men and women of a new community. Under the pseudonym of "Mary Clavers" *A New Home—Who'll Follow?* or *Glimpses of Western Life* was published in 1839 and reached its fifth edition in 1855. There were two sequels, slightly less popular, but still well received: *Forest Life* (1842) and *Western Clearings* (1845). About 1844, whether because of the palling of frontier life or because of her literary success, Mrs. Kirkland returned with her husband to New York City. Mr. Kirkland died there in 1846, and from that time until her death in 1864 his widow was busy writing and editing. None of her later work has the interest of the three books about Michigan. A son, Joseph Kirkland, followed his mother into the writing of fiction; his *Zury, The Meanest Man in Spring County* (1887) holds an honorable place in the development of realism.

From

A New Home—Who'll Follow?

or, *Glimpses of Western Life*

A New Home—Who'll Follow? was described in Mrs. Kirkland's Preface as "straggling and cloudy crayon sketches of life and manners in the remoter parts of Michi-

gan," for which she claimed only "the merit of general truth of outline." It was nearly but not entirely, she continued, "a veritable history; an unimpeachable transcript of reality; a rough picture, in detached parts, but pentographed from the life; a sort of 'Emigrant's Guide.'" She acknowledged, furthermore, that the form had been suggested by *Our Village*, *Sketches of Rural Life, Character, and Scenery* (1824-1832) by the popular English author, Mary Russell Mitford (1787-1855). The method is roughly chronological, with interspersed character sketches and story sketches. The flavor is decidedly literary—Mrs. Kirkland was writing for the folks back East—but unpretentiousness and good humor go far to redeem the bookish-

ness. Moreover, as the following chapter will suggest, Mrs. Kirkland was able to satirize "literary ladies" of the era of the annuals and gift-books, not so vigorously as Mark Twain did in the well-known Emmeline Grangerford of *Huckleberry Finn* but perhaps a shade more accurately. She wrote at a time when "sweet singers" were all too plentiful and young ladies like Miss Eloise Fidler far too conspicuous in American life

Chapter XXVII

*Smelling so sweetly, all musk, and so incensing, I
warrant you, in silk and gold, and in such alligant
terms.*

SHAKSPEARE—MERRY WIVES OF WINDSOR

Art thou not Romeo, and a Montague?

SHAKSPEARE

*My brain's in a fever, my pulses beat quick,
I shall die, or at least be exceedingly sick!
O, what do you think! after all my romancing
My visions of glory, my sighing, my glancing—*
MISS BIDDY FUDGE

In addition to our Montacute first circle had lately appeared in the person of Miss Eloise Fidler, an elder sister of Mrs. Rivers, who was to spend some months 'in this peaceful retreat,'—to borrow one of her favorite expressions

This young lady was not as handsome as she would fain have been, if I may judge by the cataracts of ash-colored ringlets which shaded her cheeks, and the exceeding straitness of the stays which restrained her somewhat exuberant proportions. Her age was at a stand, but I could never discover exactly where, for this point proved an exception to the general communicativeness of her disposition. I guessed it at eight and twenty, but perhaps she would have judged this uncharitable, so I will not insist. Certain it is that it must have taken a good while to read as many novels and commit to memory as much poetry, as lined the head and exalted the sensibilities of our fair visitant.

Her dress was in the height of fashion and all her accoutrements *point de vice*. A gold pencil-case of the most delicate proportions was suspended by a kindred

chain round a neck which might be called *whity-brown*; and a note-book of lady-like-ness was peeping from the pocket of her highly-useful apron of blue silk—*ever* ready to secure a passing thought or an elegant quotation. Her album—she was just the person to have an album—was resplendent in gold and satin, and the verses which meandered over its emblazoned pages were of the most unexceptionable quality, overlaid with flowers and gems—love and despair. To find any degree of appropriateness in these various offerings, one must allow the fortunate possessor of the purple volume, at least all the various perfections of an admirable Crichton, allayed in some small measure by the trilling faults of coldness, fickleness, and deceit, and, to judge of Miss Fidler's friends by their hand-writing, they must have been able to offer an edifying variety of bumps to the fingers of the phrenologist. But here is the very book itself at my elbow, waiting these three months, I blush to say, for a contribution which has yet to be pumped up from my unwilling brains, and I have a mind to steal a few specimens from its already loaded pages, for the benefit of the distressed, who may, like myself, be at their wit's end for something to put in just such a book.

The first page, rich with embossed lilies, bears the invocation, written in a great black spattering hand, and wearing the air of a defiance. It runs thus —

If among the names of the stainless few,
Thine own hath maintained a place,
Come dip thy pen in the sable dew,
And with it this volume grace

But oh! if thy soul e'er encourag'd a thought
Which purity's self might blame,
Close quickly the volume, and venture not
To sully its snows with thy name

Text: the fourth edition, New York, 1850 • Shakspeare. See *The Merry Wives of Windsor*, Act II, Scene II • Shakspeare. See *Romeo and Juliet*, Act II, Scene II • 20 *point de vice*, very correct • 33 an admirable Crichton, an allusion to the precocious learning of the Scottish poet-adventurer James Crichton (1560-1585), probably known to Mrs. Kirkland through the Crichton (1837) of William Harrison Ainsworth (1805-1882), popular English writer of historical fiction • 38 *phrenologist*. Both phrenology and the analysis of character from handwriting were popular fads of the thirties. The founder of phrenology, J. K. Spurzheim (see p. 1067), lectured in Boston just before his death, a series of articles by Poe was entitled "Autography."

Then we come to a wreath of flowers of gorgeous hues,
within whose circle appears in a *miminee piminee* hand,
evidently a young lady's—

THE WREATH OF SLEEP

O let me twine this glowing wreath,
Amid those rings of golden hair,
'Twill soothe thee with its odorous breath
To sweet forgetfulness of care

'Tis form'd of every scented flower
That flings its fragrance o'er the night,
And gifted with a fairy power
To fill thy dreams with forms of light.

'Twas braided by an angel boy
When fresh from Paradise he came
To fill our earth-born hearts with joy—
Ah! need I tell the cherub's name!

This contributor I have settled in my own mind to be
a descendant of Anna Matilda, the high-priestess of the
Della Cruscan order. The next blazon is an interesting
view of a young lady, combing her hair. As she seems
not to have been long out of bed, the lines which follow
are rather appropriate, though I feel quite sure they come
from the expert fingers of a merchant's clerk—from the
finished elegance, and very sweeping tails of the chirog-
raphy.

MORNING

Awake! arise! art thou slumbering still?
When the sun is above the mapled hill,
And the shadows are fitting fast away,
And the dews are diamond beneath his ray,
And every bird in our vine-roofed bower
Is waked into song by the joyous hour
Come, banish sleep from thy gentle eyes,
Sister! sweet sister! awake! arise!

Yet I love to gaze on thy lids of pearl,
And to mark the wave of the single curl,
That shades in its beauty thy brow of snow,
And the cheek that lies like a rose below,
And to list to the murmuring notes that fall

From thy lips, like music in fairy hall.
But it must not be—the sweet morning flies
Ere thou hast enjoyed it; awake! arise!

There is balm on the wings of this freshen'd air!
'Twill make thine eyes brighter, thy brow more fair,
And a deep, deep rose on thy cheek shall be
The meed of an early walk with me.
We will seek the shade by the green hill side,
Or follow the clear brook's whispering tide,
And brush the dew from the violet's eyes—
Sister! sweet sister! awake! arise!

This I transcribe for the good advice which it contain
And what have we here? It is tastefully headed by a
engraving of Hero and Ursula in the 'pleached bower
and Beatrice running 'like a lap-wing' in the background
It begins ominously.

TO ———

Oh, look upon this pallid brow!
Say, canst thou there discern one trace
Of that proud soul, which oft ere now
Thou'st sworn shed radiance o'er my face?
Chill'd is that soul—its darling themes,
Thy manly honour, virtue, truth,
Prove now to be but fleeting dreams,
Like other lovely thoughts of youth.

Meet, if thy coward spirit dare,
This sunken eye; say, dost thou see
The rays thou saidst were sparkling there
When first its gaze was turn'd on thee?
That eye's young light is quench'd forever,
No change its radiance can repair
Will Joy's keen touch relume it? Never!
It gleams the watch-light of Despair

2 *miminee piminee*, usually "niminy-piminy," ridiculously affected *
17 Anna Matilda, the fictitious name adopted by Mrs Hannah Cowley
(1743-1809) for her poetical correspondence with "Della Crusca"
(Robert Merry, 1755-1798), originally published in the *London World*
in 1787-1789. The elaborate and affected metaphors of the "Della
Cruscans" were briefly popular before their castigation by the English
critic William Gifford (1756-1826) in the *Baviad* (1794) and *Maeviad*
(1795) * 51 Hero and Ursula . . . and Beatrice, female characters
in Shakespeare's *Much Ado about Nothing*. The engraving depicts
the opening of Act III

I find myself growing hoarse by sympathy, and I shall venture only a single extract more, and this because Miss Fidler declares it, without exception, the sweetest thing she ever read. It is written with a crow-quill, and has other marks of femininity. Its vignette is a little girl and boy playing at battledoor.

BALLAD

The deadly strife was over, and across the field of fame,
With anguish in his haughty eye, the Moor Almanzor
came,

He prick'd his fiery courses on among the scatter'd
dead,

Till he came at last to what he sought, a sever'd human
head

It might have seem'd a maiden's, so pale it was, and fair,
But the lip and chin were shaded till they match'd the
raven hair

There lingered yet upon the brow a spirit bold and high,
And the stroke of death had scarcely closed the piercing
eagle eye

Almanzor grasp'd the flowing locks, and he staid not in
his flight,

Till he reach'd a lonely castle's gate where stood a lady
bright

'Inez! behold thy paramour!' he loud and sternly cried,
And threw his ghastly burden down, close at the lady's
side

'I sought thy bower at even-tide, thou syren, false as
fair'

20 'And, would that I had rather died! I found yon stripling
there

'I turn'd me from the hated spot but I swore by yon
dread Heaven,

'To know no rest until my sword the traitor's life had
riven.'

The lady stood like stone until he turn'd to ride away,
And then she oped her marble lips, and wildly thus did
say:

'Alas, alas! thou cruel Moor, what is it thou hast done!
'This was my brother Rodriguez, my father's only son.'

And then before his frenzied eyes, like a crush'd lily bell,
Lifeless upon the bleeding head, the gentle Inez fell.
He drew his glittering ataghan—he sheath'd it in his
side—

And for his Spanish lady-love the Moor Almanzor died. 30

This is not a very novel incident, but young ladies like stories of love and murder, and Miss Fidler's tastes were peculiarly young-lady-like. She praised Ainsworth and James, but thought Bulwer's works 'very immoral,' though I could never discover that she had more than skimmed the story from any of them. Cooper she found 'pretty,' Miss Sedgwick 'pretty well,' only her characters are such common sort of people.

Miss Fidler wrote her own poetry, so that she had ample employment for her time while with us in the 40 woods. It was unfortunate that she could not walk out much on account of her shoes. She was obliged to make out with diluted inspiration. The nearest approach she usually made to the study of Nature was to sit on the wood-pile, under a girdled tree, and there, with her gold pencil in hand, and her 'eyne, grey as glass,' rolled upwards, poesy by the hour. Several people, and especially one marriageable lady of a certain age, felt afraid Miss Fidler was 'kind o' crazy.'

And, standing marvel of Montacute, no guest at morn- 50 ing or night ever found the fair Eloise ungloved. Think of it! In the very wilds to be always like a cat in nutshells, alone useless where all are so busy! I do not wonder our good neighbors thought the damsel a little touched. And then her shoes! 'Saint Crispin Crispianus' never had so self-sacrificing a votary. No shoemaker this side of New York could make a sole papery enough; no tannery out of France could produce materials for this piece of exquisite feminine foppery. Eternal imprisonment within doors, except in the warmest and driest 60

33 Ainsworth Miss Sedgwick, historical novelists. Ainsworth (see note, p. 1151) is perhaps known best for *Rookwood* (1834), G. P. R. James (1799-1860) for *Richelieu* (1829), though he is said to have written more than a hundred novels, E. G. E. L. Bulwer Lytton (1803-1873) for *Pelham* (1828). Cooper was, of course, the best-known American novelist at this period and Catherine Maria Sedgwick (1789-1867), author of *The Linwoods* (1835) and many other books, was his chief woman rival. • 55 'Saint Crispin Crispianus,' Crispin and Crispinian, two brothers of Rome supposed to have been put to death in the reign of Maximianus (286-305), became, from about the eighth century, the patron saints of shoemaking.

weather, was indeed somewhat of a price to pay, but it was ungrudged. The sofa and its footstool, finery and novels, *would* have made a delicious world for Miss Eloise Fidler, if—

But, alas! 'all this availeth me nothing' has been ever the song of poor human nature. The mention of that unfortunate name includes the only real, personal, pungent distress which had as yet shaded the lot of my interesting heroine Fidler! In the mortification adhering to ¹⁰ so unpoetical, so unromantic, so inelegant a surname—a name irredeemable even by the highly classical elegance of the Eloise, or as the fair lady herself pronounced it, 'Elovees,' in this lay all her wo, and the grand study of her life had been to sink this hated cognomen in one more congenial to her taste. Perhaps this very anxiety had defeated itself; at any rate, here she was at—I did not mean to touch on the ungrateful guess again, but at least at mateable years, neither married, nor particularly likely to be married.

²⁰ Mrs Rivers was the object of absolute envy to the pining Eloise. 'Anna had been so fortunate,' she said; 'Rivers was the sweetest name! and Harley was such an elegant fellow!'

We thought poor Anna had been any thing but fortunate. She might better have been Fidler or Fiddlestring all her life than to have taken the name of an indifferent and dissipated husband. But not so thought Miss Fidler. It was not long after the arrival of the elegant Eloise, that the Montacute Lyceum held its first meeting in Mr ³⁰ Simeon Jenkins's shop, lighted by three candles, supported by candelabra of scooped potatoes; Mr. Jenkins himself sitting on the head of a barrel, as president. At first the debates of the institute were held with closed doors, but after the youthful or less practised speakers had tried their powers for a few evenings, the Lyceum was thrown open to the world every Tuesday evening, at six o'clock. The list of members was not very select as to age, character, or standing; and it soon included the entire gentility of the town, and some who scarce claimed rank elsewhere. ⁴⁰ The attendance of the ladies was particularly requested; and the whole fair sex of Montacute made a point of showing occasionally the interest they undoubtedly felt in the gallant knights who tilted in this field of honor.

But I must not be too diffuse—I was speaking of Miss Fidler. One evening—I hope that beginning prepares the reader for something highly interesting—one evening

the question to be debated was the equally novel and striking one which regards the comparative mental capacity of the sexes, and as it was expected that some of the best speakers on both sides would be drawn out by the interesting nature of the subject, every body was anxious to attend.

Among the rest was Miss Fidler, much to the surprise of her sister and myself, who had hitherto been so unfashionable as to deny ourselves this gratification.

'What new whim possesses you, Eloise?' said Mrs Rivers, 'you who never go out in the day-time.'

'O, just *per passy le tong*,' said the young lady, who was a great French scholar, and go she would, and did.

The debate was interesting to absolute breathlessness, ⁶ both of speakers and hearers, and was gallantly decided in favor of the fair by a youthful member who occupied the barrel as president for the evening. He gave it as his decided opinion, that if the natural and social disadvantages under which women labored and must ever continue to labor, could be removed, if their education could be entirely different, and their position in society the reverse of what it is at present, they would be very nearly, if not quite equal to the nobler sex, in all but strength of mind, in which very useful quality it was his opinion ^{7.} that man would still have the advantage, especially in those communities whose energies were developed by the aid of debating societies.

This decision was hailed with acclamations, and as soon as the question for the ensuing debate, 'which is the more useful animal, the ox or the ass?' was announced, Miss Eloise Fidler returned home to rave of the elegant young man who sat on the barrel, whom she had decided to be one of 'Nature's aristocracy,' and whom she had discovered to bear the splendid appellative of Dacre. 'Edward ⁸ Dacre,' said she, 'for I hear the rude creature Jenkins call him Ed.'

The next morning witnessed another departure from Miss Fidler's usual habits. She proposed a walk; and observed that she had never yet bought an article at the store, and really felt as if she ought to purchase some-

²⁹ Lyceum, the name given to the chief agency of adult education in Mrs Kirkland's time. The Lyceum movement is usually said to have begun in 1826. Debating was only one of the activities of the local Lyceums which covered the northern United States, many libraries and lecture associations grew out of them. • 58 *per . . . tong*, Eloise's version of *pour passer le temps*, to pass the time.

thing. Mrs. Rivers chancing to be somewhat occupied, Miss Fidler did me the honor of a call, as she could not think of walking without a chaperon.

Behind the counter at Skinner's I saw for the first time a spruce clerk, a really well-looking young man, who made his very best bow to Miss Fidler, and served us with much assiduity. The young lady's purchases occupied some time, and I was obliged gently to hint home-affairs before she could decide between two pieces of muslin, which she declared to be so nearly alike, that it was almost impossible to say which was the best.

When we were at length upon our return, I was closely questioned as to my knowledge of 'that gentleman, and on my observing that he seemed to be a very decent young man, Miss Fidler warmly justified him from any such opinion, and after a glowing eulogium on his fine countenance, his elegant manners, and his grace as a debater, concluded by informing me, as if to cap the climax, that his name was Edward Dacre.

20 I had thought no more of the matter for some time, though I knew Mr. Dacre had become a frequent visitor at Mr. Rivers', when Mrs. Rivers came to me one morning with a perplexed brow, and confided to me her sisterly fears that Eloise was about to make a fool of herself, as she had done more than once before.

'My father,' she said, 'hoped in this remote corner of creation Eloise might forget her nonsense and act like other people; but I verily believe she is bent upon encouraging this low fellow, whose principal charm in her 30 bewildered eyes is his name.'

'His name?' said I, 'pray explain,' for I had not then learned all the boundless absurdity of this new Cherubina's fancies.

'Edward Dacre!' said my friend, 'this is what enchants my sister, who is absolutely mad on the subject of her own homely appellation.'

'O, is that all?' said I, 'send her to me, then, and I engage to dismiss her cured.'

And Miss Fidler came to spend the day. We talked of 40 all novels without exception, and all poetry of all magazines, and Miss Fidler asked me if I had read the 'Young Duke.' Upon my confessing as much, she asked my opinion of the heroine, and then if I had ever heard so sweet a name. 'May Dacre—May Dacre,' she repeated, as if to solace her delighted ears.

'Only think how such names are murdered in this

country,' said I, tossing carelessly before her an account of Mr. Skinner, which bore 'Edkins Daker' below the receipt. I never saw a change equal to that which seemed to 'come over the spirit of her dream.' I went on with my citations of murdered names, telling how Rodgers was turned into Rudgers, Conway into Coniway, and Montague into Montag, but poor Miss Fidler was no longer in talking mood, and long before the day was out, she complained of a head-ache and returned to her sister's. Mr. Daker found her 'not at home' that evening; and when I called next morning, the young lady was in bed, steeping her long ringlets in tears, real tears.

To hasten to the catastrophe it was discovered ere long that Mr. Edkin's Daker's handsome face and really pleasant manners, had fairly vanquished Miss Fidler's romance, and she had responded to his professions of attachment with a truth and sincerity, which, while it vexed her family inexpressibly, seemed to me to atone for all her follies. Mr. Daker's prospects were by no means despicable, since a small capital employed in merchandize in Michigan, is very apt to confer upon the industrious and fortunate possessor that crowning charm, without which handsome faces, and even handsome names, are quite worthless in our Western eyes. 70

Some little disparity of age existed between Miss Fidler and her adorer, but this was conceded by all to be abundantly made up by the superabounding gentility of the lady, and when Mr. Daker returned from New York with his new stock of goods and his stylish bride, I thought I had seldom seen a happier or better mated couple. And at this present writing, I do not believe Eloise, with all her whims, would exchange her very nice Edkins for the proudest Dacre of the British Peerage.

1839?·1839

41 'Young Duke,' a novel by Benjamin Disraeli (1804-1881), later prime minister of Great Britain. Its heroine was named May Dacre.

Singers of the West

In the new country being opened up by the emigrants, new songs were made which caught the spirit of the times in various ways. The four which follow show something of their variety: one was made for a political campaign, one was written by a composer of popular songs

who was just starting his career in Cincinnati, two were the works of forgotten movers or settlers. All were ballads or ballad-like songs, and all, with the possible exception of "The Wolverine's Song," had widespread currency.

The Wolverine's Song

Most memorable, perhaps, of all Presidential campaigns before 1860 was the one of 1840, in which Harrison and Tyler, "Tippecanoe and Tyler, too," were elected. To the utmost, this campaign exploited the American enthusiasm about the frontier and the democratic spirit which flourished there.

A chance remark gave the campaign its cue. The Whig party, after having done badly in the local elections of 1839, met in December of that year and managed to nominate William Henry Harrison, hero of the battle of Tippecanoe, for the Presidency and John Tyler as his running mate. For several months Harrison's chances seemed hopeless even to the most enthusiastic Whigs. Then an opposition newspaper in Baltimore printed an attack on Harrison which hooted at his boorishness: "Give him a barrel of hard cider and a pension of two thousand a year, and, our word for it, he will sit the remainder of his days in a log cabin by the side of a sea coal fire and study moral philosophy."

Harrison was well-to-do and well-educated, but instead

of pointing this out, his supporters made the remarks about his ignorance the basis of a campaign playing up Harrison as a Western Indian fighter and log-cabin settler. The General discarded his high silk hat for a broad-brimmed one, and all the publicity about him made him the symbol of the log-cabin, hard-cider West. In every corner of the land there were log-cabin meetings, log-cabin floats in political processions, Log Cabin newspapers, Log Cabin Almanacs, and log-cabin songs. Whig leaders also hit on the device of making Harrison's opponent, Martin Van Buren, a symbol of the moneyed aristocracy—one who dressed like a dandy, "strutted and swaggered like a crow in a gutter," "laced up in corsets, such as women in town wear," perfumed his whiskers, and dined with gold spoons. The electoral vote: Harrison, 234, Van Buren, 60.

"The chief means of popular excitement," said a Harrison campaigner, "were the glee clubs, which never before or since have been so effectively used." Said a Van Buren supporter: "Songs rang in my ears wherever I went, morning, noon, and night. . . . Men, women, and children did nothing but sing. It worried, annoyed, dumfounded, crushed the Democrats, but there was no use trying to escape." One of the hundreds of such pieces, the song which follows, taken from *The Log Cabin Minstrel*, appeals to the "Wolverines"—the Michigan men.

Ye hard fisted, log cabin, Wolverine boys,
 Whom slander and ridicule never annoys,
 Now come up to the scratch, for your country demands
 The prayers of your hearts and the work of your hands,
 For a race of vile "soap-locks" and ruffle-gay knaves
 Have seized on our birthrights, and made us all slaves!
 Come, then, to the rescue—be fearless and true,
 And we'll put them to flight with Old Tippecanoe!

Make way for Tippecanoe!

10 He's death on a Tory, that Tippecanoe!

They call him a Granny—they say he is poor,
 And lives in a Cabin befitting a boor!
 And they say that he never drinks Port or Champagne,
 But Cider as hard as his dwelling is plain!—
 Well, what if he does? Still, his table is spread
 With such as his purse will afford, and a bed—
 Though coarser than Martin Van Buren's, tis true,
 Is kept for the stranger by Tippecanoe!

Huzza for Tippecanoe!

20 He's death on a Tory, that Tippecanoe!

We know that Van Buren can ride in his coach,
 With servants, forbidding the vulgar's approach,
 We know that his fortune such things will allow,
 And we know that our candidate follows the plough;

But what if he does? Who was bolder to fight
 In his country's defence on that perilous night
 When nought save his valor sufficed to subdue
 Our foes at the battle of Tippecanoe?

Huzza for Tippecanoe!

He dropped the red Locos at Tippecanoe!

They call him a coward, the dastardly slaves!
 Whose courage preserved them from infantile graves,

And gave them that life which they ignobly spend
 Traducing their own and their Country's best friend.

But slander and ridicule ne'er can efface

That long-settled, well-settled, deep-settled trace

Of gratitude, marked on the heart that is true!

He's after you, Matty, that Tippecanoe!

Make way for Tippecanoe!

He's death on a Tory, that Tippecanoe!

1840

5 soap-locks, hair made shiny and curly with the aid of soap •
 8 Tippecanoe, a two-hour battle in November 1811, during which
 the force of eleven hundred men under Harrison defeated the Indians
 led by Tecumseh. Harrison thus won his nickname • 30 Locos, ab-
 breviation for Locofoco, a nickname of a wing of the anti-Whig
 Democratic party, 1835-1837 • 32 Whose . . . graves The inspired
 poet exaggerated somewhat the results of Harrison's victory over the
 Indians

Oh! Susanna

Stephen Collins Foster 1826 • 1864

"My Old Kentucky Home," "Swanee River," "Jeanie with
 the Light Brown Hair," "Beautiful Dreamer," "Old Black
 Joe"—these were only a few of the songs by Stephen
 Collins Foster, the most popular song writer in American
 history. Foster was born of Scotch-Irish parents in Pitts-
 burgh, July 4, 1826. Though he was scantily educated, he
 discovered in the late 1840's his extraordinary gifts as a
 composer. Introduced, as a rule, by singers in minstrel
 shows, Foster's ballad-like compositions often became na-
 tionally famous, and many are still remembered and sung.

Despite his popularity, Foster was abjectly poor when he
 died in 1864.

Foster was living in Cincinnati when his song "Oh!
 Susanna" was introduced in 1847 by singers in Andrew's
 Eagle Ice Cream Saloon in Pittsburgh. Within less than
 two years at least twenty editions had been published by
 various publishers, and several minstrel troupes were sing-
 ing it wherever they stopped. It traveled across the ocean,
 and was translated into French, German, Italian, and mod-
 ern Greek. Bayard Taylor, an American tourist, heard it
 sung in Delhi.

The song was becoming tremendously popular in Jan-
 uary 1848, when gold was discovered in California. For
 the great throng of Forty-Niners who crossed the continent
 westward, this was the favorite song. The nonsense rhymes
 had no relevance whatever to the gold rush, but the amus-
 ing words and the jaunty tune made the song unforgettable.

I come from Alabama
 Wid my banjo on my knee.
 I'm gwan to Louisiana,
 My true love for to see.
 It rain'd all night the day I left,
 The weather it was dry,
 The sun so hot I froze to death,
 Susanna, don't you cry

Chorus

Oh! Susanna Oh! don't you cry for me,
 I've come from Alabama wid my banjo on my
 knee.

10

I jumped aboard de telegraph,
 And trabbelled down de ribber,
 De 'lectric fluid magnified,
 And killed five hundred nigger.
 De bullgine bust, de horse run off,
 I really thought I'd die,

I shut my eyes to hold my breath,
 Susanna, don't you cry.

I had a dream de odder night,
 When eb'ry ting was still;
 I thought I saw Susanna,
 A-coming down de hill.
 The buckwheat cake war in her mouth,
 The tear was in her eye,
 Says I, I'm coming from de South,
 Susanna, don't you cry

I soon will be in New Orleans,
 And den I'll look all round,
 And when I find Susanna,
 I'll fall upon the ground.
 But if I do not find her,
 Dis darkie'll surely die,
 And when I'm dead and buried,
 Susanna, don't you cry.

1847-1843

Sweet Betsy from Pike

Did you ev-er hear tell of Sweet Bet- sy from Pike, Who crossed the wide
 prair- ies with her lov - er Ike, And two yoke of cat- tle, a
 large yal- ler dog, A tall, shang- hai roost-er, and one spot- ted hog.
Chorus
 Say- ing Good- bye, Pike Coun- ty, fare - well for a while;
 We'll come back a - gain when we've panned out our pile.

Pike County, Missouri, was the birthplace of many of the earliest emigrants to cross the plains, and the type of emigrants from this county was peculiar enough so that Westerners soon were talking of "Pikes." In 1855 the California humorist Phoenix, describing a migrating train from Pike County, said. "Each family consists of a man in butternut-colored clothing driving the oxen, a wife in butternut-colored clothing riding in the wagon, holding a butternut baby, and seventeen butternut children running promiscuously about the establishment, all are barefoot, dusty, and smell unpleasantly." In time 'Pike' became the term for similar specimens not only from Missouri but also from other Middle Western or Southern states. "The Pike," said Bayard Taylor, "is the Anglo-Saxon relapsed into semi-barbarism . . . long, lathy, sallow . . . he takes naturally to whisky . . . has the 'shakes' his life long at home . . . distrusts men in 'store clothes'." An anonymous singer, in the 1850's, invented the following account of the travels Westward of two such poor whites. The chorus is the same as in the first stanza except in the instances where changed choruses appear.

Did you ever hear tell of Sweet Betsy from Pike,
Who crossed the wide prairies with her lover Ike,
And two yoke of cattle, a large yaller dog,
A tall, shanghai rooster, and one spotted hog

Chorus

Saying, "Good-bye, Pike County, farewell for
a while,
We'll come back again when we've panned out
our pile."

One evening quite early they camped on the Platte,
'Twas near by the road on a green shady flat,
Where Betsy, quite tired, lay down for repose,
10 While with wonder Ike gazed on his Pike County rose

They soon reached the desert, where Betsy gave out,
And down on the sand she lay rolling about,
While Ike in great terror looked on in surprise,
Saying, "Betsy, get up, you'll get sand in your eyes."

Chorus

Saying, "Good-bye, Pike County, farewell for
a while,
I'd go back tonight, if it was but a mile."

Sweet Betsy got up in a great deal of pain,
And declared she'd go back to Pike County again;
Then Ike heaved a sigh and they fondly embraced,
And she traveled around with his arm round her waist.

The Injuns came down in a wild yelling horde,
And Betsy was skeered they would scalp her adored;
Behind the front wagon wheel Betsy did crawl,
And there she fought Injuns with musket and ball.

The alkali desert was burning and bare,
And Isaac's soul shrank from the death that lurked
there
"Dear old Pike County, I'll go back to you"
Says Betsy, "You'll go by yourself if you do"

The wagon tipped over with a terrible crash,
And out on the prairie rolled all sorts of trash,
A few baby clothes done up with great care
Looked rather suspicious, but 'twas all on the square.

The shanghai ran off and the cattle all died,
The last piece of bacon that morning was fried,
Poor Ike got discouraged, and Betsy got mad,
The dog wagged his tail and looked wonderfully sad

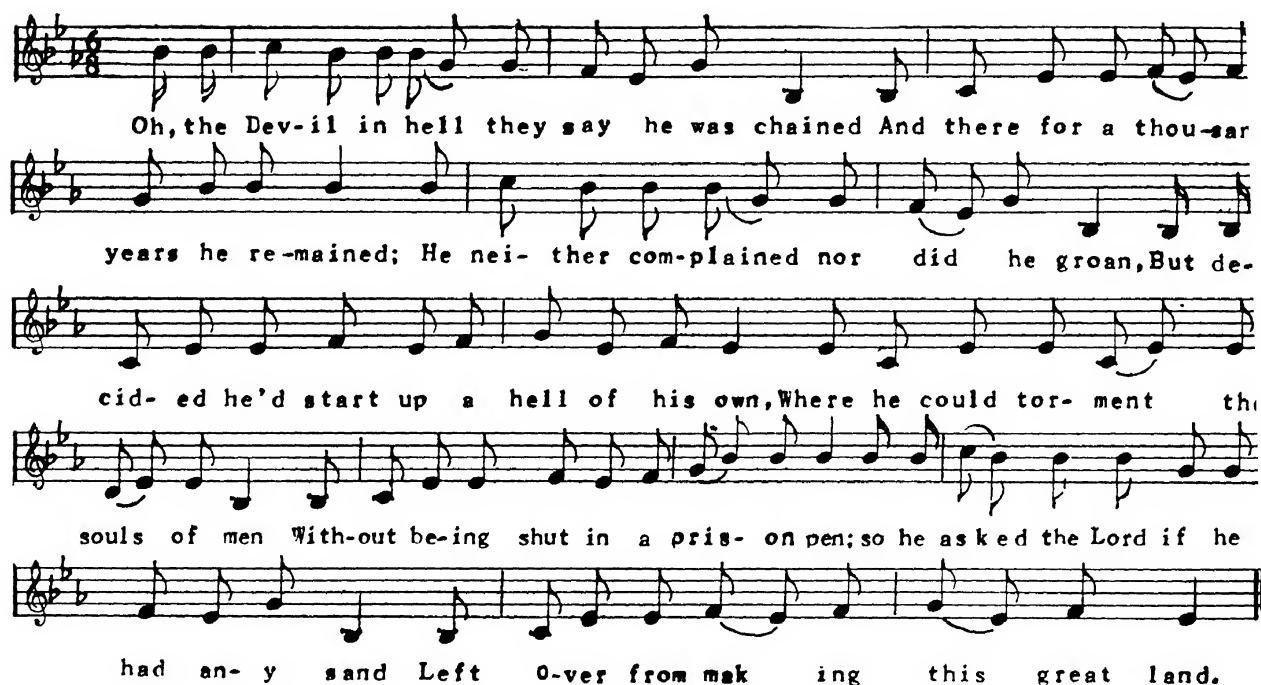

They swam the wide rivers and crossed the tall peaks,
And camped on the prairie for weeks upon weeks.
Starvation and cholera and hard work and slaughter.
They reached California spite of hell and high water.

Long Ike and sweet Betsy got married of course,
But Ike getting jealous obtained a divorce;
And Betsy well satisfied, said with a shout.
"Good-bye, you big lummo, I'm glad you backed out!"

Chorus

Saying, "Good-bye, dear Isaac, farewell for a
while,
But come back in time to replenish my pile."

1855?

Oh, the Dev-il in hell they say he was chained And there for a thou-sar
years he re-mained; He nei- ther com-plained nor did he groan, But de-
cid- ed he'd start up a hell of his own, Where he could tor- ment the
souls of men With-out be-ing shut in a pris- on pen; so he asked the Lord if he
had an- y sand Left O-ver from mak ing this great land.

The year gold was discovered in California, Texas was ceded by Mexico to the United States. The great stretch of territory thus secured had several climates, some of which were fairly distressing. In "Hell in Texas," a ballad composer told in rollicking words a fanciful story of the way Texas got some of its least attractive features

Oh, the Devil in hell they say he was chained,
And there for a thousand years he remained;
He neither complained nor did he groan,
But decided he'd start up a hell of his own,
Where he could torment the souls of men
Without being shut in a prison pen:
So he asked the Lord if He had any sand
Left over from making this great land.

The Lord He said, "Yes, I have plenty on hand,
But it's away down south on the Rio Grande,

And, to tell you the truth, the stuff is so poor
I doubt if 'twill do for hell any more"
The Devil went down and looked over the truck,
And he said if it came as a gift he was stuck,
For when he'd examined it carefully and well
He decided the place was too dry for a Hell

But the Lord just to get the stuff off His hands
He promised the Devil He'd water the land,
For he had some old water that was of no use,
A regular bog hole that stunk like the deuce
So the grant it was made and the deed it was given;
The Lord He returned to His place up in heaven.
The Devil soon saw he had everything needed
To make up a hell and so he proceeded.

He scattered tarantulas over the roads,
Put thorns on the cactus and horns on the roads,
He sprinkled the sands with millions of ants
So the man that sits down must wear soles on his pants.

He lengthened the horns of the Texas steer,
And added an inch to the jack rabbit's ear,
He put water puppies in all of the lakes,
And under the rocks he put rattlesnakes

He hung thorns and brambles on all of the trees,
He mixed up the dust with jiggers and fleas,
The rattlesnake bites you, the scorpion stings,
The mosquito delights you by buzzing his wings
The heat in the summer's a hundred and ten
Too hot for the Devil and too hot for men,

30

And all who remained in that climate soon bore
Cuts, bites, stings, and scratches, and blisters galore. 40

He quickened the buck of the bronco steed,
And poisoned the feet of the centipede;
The wild boar roams in the black chaparral,
It's a hell of a place that we've got for a hell.
He planted red pepper beside of the brooks,
The Mexicans use them in all that they cook
Just dine with a Greaser and then you will shout,
"I've hell on the inside as well as the out!"

INDEX OF FIRST LINES

A mighty Hand, from an exhaustless Urn ..	480	"Here comes Dana, abstractedly loitering along .	837
Announced by all the trumpets of the sky	929	'Here's Cooper, who's written six volumes, to show	838
At Eutaw springs the valiant died	444	How cold are thy bathis, Apollo ..	808
Ay, tear her tattered ensign down	810	How dear to this heart are the scenes of my childhood	498
Beside the ungathered rice he lay	775	How much, preventing God, how much I owe	930
Bring me wine, but wine which never grew	932	How strange it seems! These Hebrews in their graves	777
Bulkeley, Hunt, Willard, Hosmer, Meriam, Flint	934	I cannot forget with what fervid devotion ...	470
By a route obscure and lonely	704	I come from Alabama ..	1158
By the rude bridge that arched the flood ..	928	I had eight birds hatcht in one nest .	190
Columbia, Columbia, to glory arise .	451	I heard the trailing garments of the Night .	772
Come now behold	195	I kening through Astronomy Divine . .	197
Daughters of Time, the hypocritic Days .	936	I like a church, I like a cowl	928
Dear common flower, that grow'st beside the way	833	I sat beside the glowing grate, fresh heaped	471
Did you ever hear tell of Sweet Betsy from Pike	1159	I saw him once before . .	812
Fair flower, that dost so comely grow	444	I shot an arrow into the air .	777
Fair Vernal! loveliest village of the west . . .	452	I spose you wonder ware I be, I can't tell, for the soul o' me .	845
Father and I went down to camp .	321	I stood on the bridge at midnight .	776
Gallants attend, and hear a friend ..	323	If ever two were one, then surely we	191
Gayly bedight.	709	If the red slayer think he slays	937
Give all to love	935	In a branch of a willow hid .	448
God makes sech nights, all white an' still	858	In Heaven a spirit doth dwell ..	701
Great God, I ask thee for no meaner pelf .	976	In Heaven soaring up, I dropt an Eare . .	195
Guv'nor B is a sensible man.....	844	In May, when sea-winds pierced our solitudes.	927
Has there any old fellow got mixed with the boys?	815	In secret place where once I stood.....	192
Have you heard of the wonderful one-hoss shay.	813	In silent night when rest I took	191
Helen, thy beauty is to me.	700	In spite of a!! the learn'd have said	445
Here are old trees, tall oaks, and gnarled pines	476	In the Old Colony days, in Plymouth the land of the Pilgrims	780
		It is time to be old.....	937
		It was a tall young oysterman lived by the river-side..	810

Light-wingèd smoke, Icarian bird.....	977	The groves were God's first temples. Ere man learne	
Little thinks, in the field, yon red-cloaked clown... ..	927	The skies they were ashen and sober	
Lo! Death has reared himself a throne	700	The tide rises, the tide falls.	
Lull me to sleep, ye winds, whose fitful sound... ..	807	There are some qualities—some incorporate things. .	
Make me, O Lord, thy Spinning Wheele compleat ..	196	"There comes Emerson first, whose rich words, ever	one
Merrily swinging on brier and weed	478	"There comes Poe, with his raven, like Barnaby Rudge	
My aunt! my dear unmarried aunt	811	There is a vale which none hath seen . . .	
My books I'd fain cast off, I cannot read	977	"There is Bryant, as quiet, as cool, and as dignified .	
My heart, I cannot still it.	871	"There is Hawthorne, with genius so shrinking and rare	
My life is like the summer rose... ..	497	"There is Lowell, who's striving Parnassus to climb .	
"O Caesar, we who are about to die	804	"There is Whittier, whose swelling and vehement heart	
O Love Divine, that stooped to share	816	"There swaggers John Neal, who has wasted in Maine	
O'er the rough main, with flowing sheet	442	"There's Holmes, who is matchless among you for wit	
Oft have I seen at some cathedral door	802	This is the ship of pearl, which, poets feign	
Often I think of the beautiful town	778	Thou wast all that to me, love	
Oh mother of a mighty race	477	Thou, who wouldst wear the name	
Oh! that I alwayes breath'd in such an aire . .	196	Though all the fates should prove unkind	
Oh, the Devil in hell they say he was chained . .	1160	Though loath to grieve... ..	
On one fix'd point all nature moves	449	Throgh drifting snow and cutting sleet	
Once upon a midnight dreary, while I pondered, weak		Thy trivial harp will never please	
and weary.	705	To him who in the love of Nature holds	
Our farce is now finish'd, your sport s at an end .	325	Type of the antique Rome! Rich reliquary	7
Pensive, on this green turf I cast my eye	446	View, all ye eyes above, this sight which flings . . .	1
Remote, beneath a sultry star	447	Wakeful, vagrant, restless thing	4
Romance, who loves to nod and sing	699	Weak-winged is song	8
Science! true daughter of Old Time thou art	679	"What! Irving? thrice welcome, warm heart and fine	brain
Speak! speak! thou fearful guest	773		8
Stranger, if thou hast learned a truth which needs . .	467	What mean these dreams, and hideous forms that rise	44
Tell me not, in mournful numbers	771	Whate'er we leave to God, God does	97
The Angells sung a Carole at thy Birth	199	Whither, midst falling dew	46
The breezes went steadily thro' the tall pines . .	322	Ye Alps audacious thro' the heav'ns that rise . . .	45
The day is cold, and dark, and dreary....	776	Ye Angells bright, pluck from your Wings a Quill	19
		Ye hard fisted, log cabin, Wolverine boys	115
		Your men of the land, from the king to Jack Ketch	44
